57 In my view, there are at least two problems with this submission. First, while it may be arguable that if one succeeds under a distinct nominate tort against an individual defendant, then an action in conspiracy should not be available against that defendant, it is far from clear that the mere fact that a plaintiff *alleges* that a defendant committed other torts is a bar to pleading the tort of conspiracy. It seems to me that one can only determine whether the plaintiff should be barred from recovery under the tort of conspiracy once one ascertains whether he has established that the defendant did in fact commit the other alleged torts. And while on a motion to strike we are required to assume that the *facts* as pleaded are true, I do not think that it is open to us to assume that the plaintiff will necessarily succeed in persuading the court that these facts establish the commission of the other alleged nominate torts. Thus, even if one were to accept the appellants' (defendants') submission that "[u]pon proof

of the commission of the tortious acts alleged" in para. 20 of the plaintiff's statement of claim "the conspiracy merges with the tort", one simply could not decide whether this "merger" had taken place without first deciding whether the plaintiff had proved that the other tortious acts had been committed.

58 This brings me to the second difficulty I have with the defendants' submission. It seems to me totally inappropriate on a motion to strike out a statement of claim to get into the question whether the plaintiff's allegations concerning other nominate torts will be successful. This is a matter that should be considered at trial where evidence with respect to the other torts can be led and where a fully informed decision about the applicability of the tort of conspiracy can be made in light of that evidence and the submissions of counsel. If the plaintiff is successful with respect to the other nominate torts, then the trial judge can consider the defendants' arguments about the unavailability of the tort of conspiracy. If the plaintiff is unsuccessful with respect to the other nominate torts, then the trial judge can consider whether he might still succeed in conspiracy. Regardless of the outcome, it seems to me inappropriate at this stage in the proceedings to reach a conclusion about the validity of the defendants' claims about merger. I believe that this matter is also properly left for the consideration of the trial judge.

59 In the result the appellants have not demonstrated that those portions of the respondent's statement of claim which allege the tort of conspiracy fail to disclose a reasonable claim. They should not therefore be struck out under R. 19(24)(a) of the British Columbia Rules of Court.

## 5. Disposition

60 The appeal should be dismissed with costs.

*Appeal dismissed.*

**Headnote**

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — General principles

Plaintiff L was implanted with pacemaker designed, developed, manufactured and sold by defendants — Defendants issued several advisory letters to physicians, patients and regulatory authorities drawing attention to malfunctions of defendants' pacemakers — United States Food and Drug Administration issued several class I recalls for defendants' pacemakers which indicated reasonable probability of malfunctioning — L had pacemaker explanted and replaced by another of defendants' pacemakers — Shortly thereafter, L was advised replacement pacemaker was also included in recall — Plaintiffs brought action against defendants for defective design, manufacture and marketing of alleged defective pacemakers seeking damages for painful medical procedures, potentially defective devices and psychological harm from learning they were potentially at risk — L sought to represent persons in whom pacemakers were implanted — Plaintiff I was L's spouse and sought to represent persons with derivative claims as family members of those within primary class — Defendants were currently defendants in similar class proceedings in British Columbia and Quebec — Multi-district litigation in United States over defendants' pacemakers was subject to proposed settlement, but Canadian patients were not entitled to participate — Plaintiffs brought motion to certify proceeding as class action under Class Proceedings Act, 1992 — Motion granted — Fundamental purpose at certification stage

of class proceeding was to determine if requirements in s. 5(1) of Act were satisfied and not to decide factual issues — Use that defendants sought to make of evidence on motion was not consistent with this purpose — It was not legitimate response to plaintiffs' motion for defendants to attempt to demonstrate claims asserted on behalf of class members were without merit — Causes of action on which plaintiffs rely were adequately disclosed in pleading — Class definition was not unnecessarily over-inclusive at this stage of proceeding, but may be amended following productions and discovery — Proposed common issues were substantively very similar to those accepted for purpose of class certification in another case relating to defendants' defibrillators — Class proceeding was preferred method to try claims — Apart from issue of credibility, plaintiffs were willing to and capable of representing interests of class — Litigation plan was comprehensive.

## Table of Authorities

### Cases considered by *Cullity J.*:

- Attis v. Canada (Minister of Health)* (2007), 2007 CarswellOnt 2786, 46 C.P.C. (6th) 129 (Ont. S.C.J.) — considered

MOTION by plaintiffs to certify proceeding as class action.

**Cullity J.:**

1 The hearing of the motion to certify this proceeding under the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 was of unusual length due to the elaborateness and comprehensiveness of the attack launched by the defendants on the plaintiffs' case for certification and the attempted use of evidence for this purpose. Most of the evidence had a direct bearing on the merits of

the claims asserted by the plaintiffs on behalf of the class they seek to represent and, although defendants' counsel went to some pains to relate it to the requirements for certification, its relevance and weight for this purpose were very much in issue.

## **Background**

2 The claims asserted by the plaintiffs concern allegedly defective pacemakers designed, manufactured and marketed by the defendants. The plaintiffs allege that, with prior knowledge that the devices were defective and prone to failure, the defendants permitted them to be implanted in patients and concealed the defects from patients, health care providers and regulatory authorities including Health Canada and the U.S. Food and Drug Administration ("FDA"). On behalf of the persons in whom the pacemakers were implanted, they claim damages not only for the painful medical procedures associated with the implantation, and explantation, of potentially defective devices but also for psychological harm consisting of emotional distress, anger, and anxiety from learning that they were potentially at risk. Mr Lambert is proposed as a representative of a primary class consisting of such persons. His spouse, Ms Ibbetson, seeks to represent persons who have derivative claims as members of the families of those within the primary class.

3 The claims were originally made against the defendants in respect of, among other things, their negligence in designing, manufacturing and selling allegedly defective defibrillators and pacemakers. After a carriage motion had been instituted in connection with this proceeding and a consolidated action involving the defendants' defibrillators, orders were made permitting the substitution of Mr Lambert and Ms Ibbetson for the original plaintiff in this action, and granting leave for the statement of claim to be amended to exclude the claims in respect of defibrillators: *Heron v. Guidant Corp.*, [2007] O.J. No. 3823 (Ont. S.C.J.).

4 The claims against the defendants in connection with the defibrillators were continued in a separate proceeding which was subsequently certified: *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) and [2008] O.J. No. 2402 (Ont. S.C.J.). Leave to appeal to the Divisional Court was denied on January 6, 2009 [2009 CarswellOnt 30 (Ont. Div. Ct.)]. In *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), Hoy J. made an order certifying an action in which similar claims had been made against a different manufacturer of defibrillators.

5 While the claims and the facts of *LeFrancois* and this case have several points of similarity, defendants' counsel emphasised that *LeFrancois* was under appeal and that they did not resile from any of the submissions they had made at first instance. Although they accepted that, in at least one respect, their challenge to the appropriateness of certification in this case was, in this court, probably foreclosed by the earlier decision, they reserved to their clients the right on any appeal to repeat the submissions on that point that had been rejected in *LeFrancois*. On all the other statutory requirements for certification, defendants' counsel submitted that *LeFrancois* was distinguishable on various grounds.

## **1. The Defendants**

6 Guidant Corporation is incorporated under the laws of Indiana. It is the parent corporation of the other defendants and has numerous other subsidiaries.

7 The Guidant group of companies designs, develops, manufactures and sells therapeutic medical devices for use in treating cardiac and vascular diseases. Such devices include the pacemakers at issue in this litigation.

8 The plaintiffs allege that the defendants are organised so as to function as a single business unit sharing common purposes and objectives and with a common overall management. I will refer to the defendants collectively as "Guidant".

## **2. The Plaintiffs**

9 Gerard Lambert and Elsa Ibbetson have lived together in a spousal relationship since 1974. They reside in Toronto.

10 Mr Lambert was implanted with one of the allegedly defective pacemakers on June 8, 2000. After he was advised that this pacemaker was the subject of a recall, it was explanted on June 1, 2006 and replaced by a different model. It is pleaded that, shortly thereafter, Mr Lambert was advised that the replacement pacemaker was one of a second series included in an FDA recall.

### **3. Terminology: advisories and recalls**

11 The significance of reports and communications from Guidant, the FDA and Health Canada is very much in issue in the litigation. These were referred to by counsel as "advisories" and "recalls".

12 The advisories issued by Guidant that were referred to throughout the hearing generally consisted of letters sent by Guidant to physicians, patients and the regulatory authorities reporting, and drawing their attention to, potential malfunctions with Guidant's pacemakers. Those sent to physicians were also referred to as "Dear Doctor letters".

13 The term "recall" is defined in the Medical Device Regulations made pursuant to the *Food and Drugs Act*, R.S.C. 1985, c. F. 27 (as amended) as follows:

"recall", in respect of a medical device that has been sold, means any action taken by the manufacturer, importer or distributor of the device to recall or correct the device, or to notify owners and users of its defectiveness or potential defectiveness, after becoming aware that the device

- (a) may be hazardous to health;
- (b) may fail to conform to any claim made by the manufacturer or importer relating to the effectiveness, benefits, performance characteristics or safety; or
- (c) may not meet the requirements of the Act or these Regulations.

14 It was emphasised by defendant's counsel that this definition is sufficiently broad to encompass advisories as described above. It is not limited to "recalls" in a sense that would require devices to be replaced or returned to Guidant.

15 A similarly broad description is contained in a bulletin issued by the FDA which states in part:

A recall is an action taken to address a problem with a medical device that violates FDA law. Recalls occur when a medical device is defective, when it could be a risk to health, or when it is both defective *and* a risk to health. A medical device recall does not always mean that you must stop using the product or return it to the company. A recall sometimes means that the medical device needs to be checked, adjusted, or fixed. If an implanted device (for example, a pacemaker or an artificial hip) is recalled, it does not always have to be removed. When an implanted device has the potential to fail unexpectedly, companies often tell doctors to contact their patients to discuss the risk of removing the device compared to the risk of leaving it in place.

16 The FDA classifies recalls according to the potential degree of risk to public health. Class I recalls indicate that there is a high risk, class II that there is a less serious risk and class III that the risk is low. Reports and notices to the public and press releases are primarily the responsibility of the vendor, but the FDA posts information about class I recalls on its website and may also issue its own press releases or public health notices

### **4. The Pacemakers**

17 There are numerous different models of the pacemakers manufactured and sold by Guidant. These are classified as belonging to different "families" such as DISCOVERY, PULSAR, or NEXUS. Within each family the models are identified by numbers. Pacemakers within 80 of the models have been identified by the plaintiffs as the devices that were defective. The defendants' evidence is that only 51 of the 80 models comprising 28,443 pacemakers were implanted in Canada. They assert, also, that only various subsets of each model - comprising 14,791 pacemakers - were subject to advisories issued by Guidant that referred to the defects identified by the plaintiffs. These devices can, it is said, be identified by reference to the different serial number provided for each of them.

### **5. Guidant's Conduct**

18 While the alleged defects of the pacemakers fall into four separate categories, the plaintiffs allege that Guidant's misconduct in connection with them is systemic and part of a pattern that commenced on or before February, 2002 when it became aware of serious problems with certain models of its defibrillators. Between 2002 and 2005 further problems were identified and it is pleaded that none of them was disclosed to medical device regulators, physicians, patients or to the public until May 23, 2005 - the day before the proposed publication date of a New York Times article that was to refer to a death linked to one of the defective defibrillators.

19 In the meantime, one of Guidant's subsidiaries had pleaded guilty to ten federal felonies in the United States in connection with, among other things, a failure to report to the FDA more than 2,600 adverse events with its products.

20 On July 18, 2005, the defendants issued advisories consisting of letters to physicians and healthcare professionals that subsets of numerous models of its pacemakers were subject to a hermetic seal defect that caused the seals to degrade and, ultimately, could lead to the failure of the device. On July 22, 2005, the devices, identified by their model numbers, were subjected to a class I FDA recall which was intended to indicate that there was a reasonable probability that the malfunctioning devices would cause serious health concerns or death. Additional devices subject to the defect were reported by Guidant in an advisory of January 21, 2006 that referred to the models potentially affected and not the serial numbers of the devices.

21 In further advisories of September 22, 2005, Guidant identified defects with other models of its pacemakers. On December 21, 2005, these devices were subjected to a class II FDA recall that referred to the possibility that the continued operation of the pacemakers would cause temporary or reversible health problems, and a remote possibility of more serious health consequences. In the advisory of September 22, Guidant stated that it was unable to identify the root cause of one of the malfunctions and it identified the devices at risk only in terms of their model numbers. In a subsequent advisory of December 12, 2005, Guidant identified the cause and stated that it was providing physicians with the serial numbers of affected devices. The FDA recall of December 21, 2005, however, indicated that all serial numbers of the specified models were subject to it.

22 The fourth potential defect was identified in an advisory of June 26, 2006 as affecting subsets of 54 different models. For the most part, the advisories and recalls in evidence refer to the affected pacemakers only as subsets of specified models and state that details of the particular devices comprising the subsets are being provided separately to the physicians to whom the advisories were sent.

23 On March 20, 2006, an independent panel of experts, that had been appointed by Guidant to assess and evaluate its operations, released a lengthy report that referred, among other things, to Guidant's failure to give timely warnings to physicians and patients of defects it had identified with its products. Guidant's practices were said to be

contrary to the policy that patient safety is the first priority for evaluation, and managing device malfunction.

24 Guidant is currently the defendant in similar class proceedings in British Columbia and Quebec. I was informed that there was also an individual action in British Columbia. Multi-District litigation in the United States with respect to Guidant's pacemakers and defibrillators is the subject of a proposed settlement in which Guidant would pay \$240 million to 8,500 plaintiffs. The devices covered by the settlement include those in issue in this proceeding but patients implanted in Canada are not entitled to participate in it.

## Evidence

### ***1. Evidence in Support of Certification***

25 The plaintiffs delivered affidavits of Mr Lambert and Dr Geddes Frank Owen Tyers - a qualified cardiovascular and thoracic surgeon.

(a) *Mr Gerard Lambert*

26 Mr Lambert swore two affidavits of which the second dealt only with revisions to the litigation plan. In his first affidavit, he deposed to his personal history as a recipient of two Guidant pacemakers, his reasons for commencing the litigation under the CPA and his personal commitment to its prosecution in the interests of the class. He referred to certain of the advisories issued by Guidant, the pacemakers that had been identified as potentially defective and the harm he had suffered. His description of the procedure under the CPA and the contents of the proposed litigation plan in its original form, and as subsequently amended, were stated to be based on information provided by his counsel.

(b) *Dr Geddes Frank Owen Tyers*

27 Dr Tyers is now Professor Emeritus at the University of British Columbia. He was formerly an eminent academic and practising surgeon specialising in cardiovascular and thoracic surgery. From 1965 he was continuously involved in cardiac rhythm and management device research and development. At different times, he held academic posts in other universities in Canada and in the United States.

28 Dr Tyers has published voluminously in his area of specialisation and expertise and has been a member of numerous professional bodies and committees concerned with cardiovascular medical science. He has also had extensive practical experience with the implementation of pacemakers and defibrillators and, in his retirement, he still does occasional implants.

29 In his affidavit, Dr Tyers addressed the natural functioning of the heart in human beings, the irregularities that can occur, and the manner in which pacemakers operate to monitor and remedy abnormal heart rhythms. Although he stated that the occurrences that will require pacing are unpredictable, it was his opinion that all patients who have been implanted with a pacemaker will, at one time or another, critically depend upon its proper functioning on a second to second basis, and that almost all such persons are at risk of serious injury or death if the device fails without warning.

30 Dr Tyers referred to the history of the advisories that had been issued by Guidant and the nature of the defects they had disclosed. He stated that he had received notice of, or observed, a remarkable number of problems with the Guidant pacemakers. In his opinion, each recipient of one of the recalled products was subject to an increased risk to their overall health and mental and physical well-being, including the risk of permanent injury and death.

31 Dr Tyers deposed that explantation in order to replace a pacemaker is accompanied by further risks and should not, he stated, be considered to be a minor surgical intervention.

32 Finally Dr Tyers estimated that only a minority of incidents of malfunctioning pacemakers are identified and investigated as, for example, pacemakers are rarely explanted from deceased patients.

**2. Responding Evidence**

33 The defendants delivered affidavits of Dr Michael Kim - an associate professor of medicine at north-western University; Dr Albert Druktinis - a forensic psychiatrist; Mr Brooks Berg - the manager of Regulatory Affairs at the Cardiac Rhythm Management Division of Boston Scientific Corporation, the present corporate owner of Guidant; Ms Lisa Becker - the Director of Regulatory Affairs at the same division of Boston Scientific Corporation; and Mr Jerome R. Morse - a member of the Ontario Bar.

(a) *Dr Michael Kim*

34 Dr Kim was asked to opine on the treatment of patients suffering from cardiac health disorders with particular reference to treatment involving implantable pacemakers. He has held teaching and research appointments at a number of universities in the United States. He specialises in cardiac electrophysiology - the study of heart rhythm disorders and related clinical conditions. He has lectured widely in cardiology and electrophysiology for professional associations and has numerous research publications. Over the past eight years he has performed over 2,000 invasive electrophysiology procedures of which about 1,000 have concerned implantable devices such as pacemakers and defibrillators.

35 After a general discussion of the types of electrical disorders that can affect the natural function of the heart, and the role of pacemakers in treating abnormally slow heart rates, Dr Kim emphasised the differences in function between defibrillators and pacemakers. In so doing, he was critical of Dr Tyers' affidavit which, in his opinion, inaccurately conflated the devices in a number of ways. In particular, Dr Kim insisted that most recipients of pacemakers are not "dependent" on them in the sense that there would be a risk of death if the device failed. He recognized that no accepted definition of pacemaker dependency exists.

36 Dr Kim also emphasised the uniqueness of a determination of whether it was desirable to replace potentially malfunctioning pacemakers in any particular non-dependent patient, and the relevance of the individual characteristics and medical history of each patient. In his opinion, relatively few patients with a recalled pacemaker require premature explantation of the device.

37 Dr Kim also dealt at some length with the factors that may bear on a cardiologist's decision to recommend explantation and the risks that would be associated with the operation. He stressed, again, the need for any recommendations or advice of the attending physician to be made on a patient by patient basis.

38 In a second affidavit Dr Kim commented further on the concept of pacemaker dependency. Using his definition of "true pacemaker dependency", he estimated that only ten to fifteen per cent of his patients would qualify. He acknowledged the possibility of a broader definition that would include persons who experience severe symptoms, including loss of consciousness, when a pacemaker is turned off. In his experience no more than 25 % of the North American pacemaker population would fall within the expanded definition.

(b) *Dr Albert Drukeinis.*

39 Dr Drukeinis has been in private practice as a psychiatrist for more than 30 years. During part of that time he was Chief of Psychiatry at a hospital in New Hampshire and was an adjunct associate professor of psychiatry at Dartmouth Medical School. He deposed that he has performed 3,000 clinical and forensic evaluations of patients who have claimed mental and emotional harm as a result of stressful life events, and that he has lectured widely on the issue of emotional damages in litigation.

40 On the basis of his understanding of Canadian law - as set out in *Mustapha v. Culligan of Canada Ltd.*, [2008] 2 S.C.R. 114 (S.C.C.) - he offered his opinion that "evidence and conclusions concerning emotional damage cannot be offered to a court without expert psychiatric evidence".

41 In support of his opinion, he emphasised the complexity of the questions of causation that may be involved and how the inquiry requires an exploration of a claimant's entire life history. A battery of psychological tests may, he said, be required to address issues of validity, exaggeration and malingering. In his opinion, the total time required to conduct a forensic psychiatric evaluation would rarely be less than 10 to 12 hours and often it could be many times that number.

(c) *Mr Brooks Berg*

42 Mr Berg described in some detail the manner in which pacemakers operate and how their settings are tailored to the problems and needs of each patient. He described also the four failure modes or trends for which claims are asserted by the plaintiffs and how Guidant dealt with reported incidents of which, he deposed, there were only 13, involving six models, in Canada. He referred to the finite life of any pacemaker and the ultimate need to replace it due to battery depletion.

43 The possibility that any pacemaker will malfunction is, he stated, a known risk of which physicians are advised by Guidant.

44 Mr Berg described the reliability rates attaching to the Guidant pacemakers as remarkably high, and device malfunctioning extremely rare, due to Guidant's demonstrated continuing corporate-wide commitment to - and the enormous efforts it has made to ensure -high standards of engineering, design, manufacturing and monitoring.

45 On the third day of the hearing an issue was raised with respect to the correct interpretation of a chart provided by Mr Berg that purported to summarise details of devices implanted in Canada that fell within the models identified in the statement of

claim. In particular, there was an issue whether any devices that fell within an advisory were implanted subsequently. Defendants' counsel had stated more than once that this had not occurred.

46 The hearing was adjourned and, on its resumption, a further affidavit of Mr Berg was filed that contained an exhibit of 730 pages that purports to identify by serial number each of the 28,443 pacemakers implanted in Canada. Details of the date of implantation and of explantation (if this occurred) and whether or not it was subject to an advisory were provided.

47 In Mr Berg's cross examination on this affidavit it was disclosed that more than 400 pacemakers had been implanted after one of the defects - though not its cause - had been identified by Guidant in the advisory of September 22, 2005, and that 14 pacemakers had been implanted by hospitals in Canada after they had been identified in a subsequent update in December of that year.

(d) *Ms Lisa Becker*

48 Ms Becker has been Director of Regulatory Affairs at Guidant since October, 2006. In that capacity she has had responsibility for various matters involving Health Canada and the FDA including regulatory submissions in respect of defibrillators and pacemakers. Internally, she has the responsibility to ensure that the products comply with Health Canada and FDA requirements and that proper documentation has been provided to the regulatory bodies.

49 Her affidavit was directed at the requirements of the Medical Device Regulations made pursuant to the *Food and Drugs Act*. In her opinion, the question whether Guidant violated any of such requirements, including those relating to mandatory problem reporting, must be analysed separately for each device model.

50 I have not found Ms Becker's opinions in her affidavit to be helpful. The plaintiffs do not have to prove that there was a breach of reporting requirements on a model by model basis. Their claims are based, in part, on an alleged failure to report in a comprehensive and timely manner the defects or trends particularised in the statement of claim.

51 Each of the relevant advisories and regulatory recalls deals with numerous models together, and I am not persuaded that the exhaustive examination of the investigations into 80 (or 51) models separately would be required if the plaintiffs are to prove their case. Nor am I satisfied that Ms Becker's opinions of what will be necessary for this purpose are admissible as evidence.

(e) *Mr Jerome Morse*

52 Mr Morse is an experienced legal practitioner who has conducted a civil litigation practice since his call to the Bar in 1981. He was asked to provide an opinion as an expert witness on the procedural and evidentiary requirements for the preparation and conduct of individual trials in product liability, medical malpractice and personal injury cases including those brought against medical device manufacturers that raise issues of causation, harm and damages.

53 The gist of Mr Morse's affidavit was that the litigation plan proposed by the plaintiffs does not contemplate, or provide for, the necessary procedural protections for the defendants in connection with substantial legal issues of causation and damages that may remain after a trial of common issues.

54 Plaintiffs' counsel objected to the admissibility of Mr Morse's evidence and, in my opinion, they were correct in so doing. Quite apart from Mr Morse's disclaimer in cross-examination of an intention to suggest that his opinions reflected any expertise in class actions, his evidence addresses the very issues that this court must decide under section 5 (1) (e) of the CPA, and that the trial judge may have to consider after a trial of common issues.

55 In my opinion, the views of legal practitioners, however eminent, on the requirements of section 5 (1) (e) - or on any of the other requirements for certification for that matter - are not admissible as evidence to be considered in arriving at a decision. That is not, of course, to suggest that Mr Morse's opinions are not of interest, or that they would be unworthy of careful consideration outside the courtroom. In this motion, however, they have no more weight, status or authority than any opinions offered by counsel in the course of the hearing.

### **3. Comments on the Evidence**

56 It is a trite observation that, in this jurisdiction, decisions on certification most commonly determine the outcome of a proceeding commenced under the CPA. A consequence is that the certification motion that was intended to be no more than a preliminary screening process at a very early stage of the litigation is very often strenuously contested. The requirement that the motion be heard within 90 days of the close of pleadings has become a virtual dead letter.

57 In cases involving products liability, it is almost the invariable practice for defendants to file evidence - including affidavits of experts - for the purpose of demonstrating that the statutory requirements in section 5 of the CPA are not satisfied. Very often defendants' counsel will submit, and sometimes they have been able to establish, that the necessary connection exists notwithstanding the direct bearing that the evidence may have on the merits of the claims asserted on behalf of the class. In other cases, attempts to influence decisions on certification by evidence going to the merits have been less successful. This case may well represent the high water mark of such attempts.

58 As in other cases involving products liability, a great deal of the evidence was directly relevant to the merits of the plaintiffs' claims and the resolution of the common issues they have proposed for trial. Some of this was useful and required in order to provide the court with the necessary background to any determination of the requirements for certification. It is, however, one thing to admit the evidence for this limited purpose and quite another to permit its uncontrolled use in determining whether the statutory requirements are satisfied.

59 While plaintiffs' counsel were careful not to overstep the line in the presentation of their case in their original factum, a large part of the hearing involved the submissions of defendants' counsel on evidence that goes directly to the merits, and that, at this stage of the proceeding, is entirely within their own specialised knowledge. Their attempted reliance on this evidence raises quite fundamental questions about the requirements of proof and the function of the court at this stage of the proceeding.

60 The inevitable tension between evidence that is admissible as relevant to the certification requirements, and that which is inadmissible as evidence of the merits, was addressed in *Hollick v. Metropolitan Toronto (Municipality)* [2001 CarswellOnt 3577] (S.C.C.)] (at paras 19-26) where it was insisted that the merits are irrelevant and that, in discharging the evidentiary burden with respect to the statutory conditions for certification -other than that in section 5 (1) (a) which is to be decided solely on the pleading - a plaintiff would be required to satisfy only a minimum standard - "some basis in fact".

61 The general discussion of the relevance and admissibility of evidence in *Hollick* was made in the context of the existence of class members' claims that raise common issues and it was unnecessary for the court to explore the implications of its affirmation of the minimum standard. Read literally, and without qualification, the reasons of the learned Chief Justice might suggest that all issues of fact that relate to the requirements for certification are to be decided in accordance with that standard and not in accordance with the ordinary civil standard of a balance of probabilities. Thus, in finding that a class proceeding would not be the preferable procedure on the facts of the case, the Chief Justice stated that this was so "[e]ven on the generous approach advocated above" (para 36).

62 While without further guidance, I would be reluctant to accept that no questions of fact that affect the statutory requirements are to be decided in accordance with a standard less onerous than the usual civil standard - for example, facts that would determine whether a proposed representative plaintiff has an interest in conflict with those of class members - I believe that, consistently with the analysis in *Hollick*, I must accept that the standard is less strict in connection with - at least - the requirement that there is a class of persons whose claims raise common issues.

63 The justification for such an approach is illustrated by the facts of this case where, for the purpose of rebutting the case for certification, the defendants have filed a mass of evidence of facts relating to the pacemakers, the problems with them and the patients in whom they were implanted. This evidence, which includes the 730 pages that are said to provide details of the implantation of 51 different models of pacemakers in each of 28,443 patients in Canada, is at this stage uniquely within the knowledge of the defendants. The plaintiffs do not accept that this evidence is necessarily reliable but, as much of it was not

challenged on cross-examination by plaintiffs' counsel - and no motions were made with respect to numerous refusals - it was submitted by defendants' counsel that the evidence must be accepted as undisputed.

64 I do not accept that, at the certification stage, this is a legitimate approach. Quite apart from the fact that much of the detailed evidence relating to the implants was introduced, and admitted, for a limited purpose during the hearing of the motion, I do not consider that it was intended, or that it would be reasonable, to require the plaintiffs to embark on the inquiries and investigations necessary to test the methodology and grounds on which the defendants' numerous and unqualified assertions of fact were based. This would be the function of discoveries that will normally be conducted after certification has been granted and the descriptions of the class and the common issues have been ascertained in preparation for a trial of common issues or, in an appropriate case, a motion for summary judgment.

65 It may be that, after discoveries have been completed and the case proceeds towards trial, particular assertions of facts on which the defendants rely will ultimately be accepted by the plaintiffs. It may then, for example, be possible to narrow the definition of the class. At this stage of the proceeding, however, the plaintiffs are, in my opinion, entitled to treat as in issue facts relating to the defendants' conduct that are exclusively within their knowledge and may bear directly on the resolution of the claims against them. Such an approach is, I believe, necessary to reconcile the rule that certification motions are not tests of the merits of a proceeding with the undoubted fact that evidence that bears on the merits can also be relevant to requirements for certification such as the existence of a class with claims that raise common issues, and the manageability of the litigation.

66 A recurring theme in the defendants' submissions was that the prevailing approach to certification in this jurisdiction has departed from the legislative intention embodied in section 5 (1) of the CPA. I was told that, rather than acting as a gatekeeper, the courts have been holding the gate open and have "stumbled into a black hole".

67 It was repeatedly submitted by defendants' counsel that decisions certifying proceedings must have an "air of reality". To the extent that this means that the statutory requirements must be read and applied in the light of the purposes and objectives of the legislation, it is a truism. To the extent, however, that references to an air of reality are intended to introduce a preliminary merits test - disguised or otherwise - they are inconsistent with the analysis in *Hollick* and the significance that McLachlin C.J. attributed to the rejection of the views of the Ontario Law Reform Commission. In its report released in 1982, the Commission was firmly of the opinion that a plaintiff seeking certification should have the burden of establishing that the claims advanced have "substantive adequacy" and apparent validity. In the unanimous opinion of the members of the commission, this would be required in order to eliminate the potential use of the class action procedure to blackmail defendants into agreeing to settle unmeritorious claims. The possibility that such claims could be excluded by a requirement that the pleading disclosed a cause of action was categorically rejected.

68 The legislative history was relied on in *Hollick* as justifying the very weak evidential burden of "some basis in fact" that was held to apply to each of the statutory requirements for certification, other than that relating to the disclosure of a cause of action. It must, I believe, follow logically that, although a defendant would be entitled to deliver affidavit evidence in rebuttal, the standard of proof is inversely heavy. It is not enough for the defendant to establish on a balance of probabilities that facts that bear on the existence of "colourable" claims differ from those asserted by the plaintiff - the onus must be to demonstrate that there is no basis in the evidence for the latter. For this reason, the court has generally declined to choose between conflicting opinions of qualified experts on the requirement of commonality of issues, or on the existence of the claims of class members that are said to raise such issues. Similarly, on this motion, I do not believe I would be obligated to choose between the conflicting opinions of Dr Tyers and Dr Kim on the important questions of pacemaker dependency, and the risks to which the putative class members were exposed, even if - which I doubt - such opinions had any significant bearing on the requirements for certification.

69 I am also not concerned with whether the statutory requirements are adequate to exclude the kind of legalised blackmail that was contemplated by the Law Reform Commission. The analysis in *Hollick* must be applied and the plaintiff must not be subjected to any more stringent an evidential burden than that affirmed by the Chief Justice. I believe it follows, also, that in determining the weight to be given to the evidence in rebuttal filed by the defendants, I must take into account that it is not the function of the court at this preliminary stage of the proceeding to decide factual issues - and, for such purpose, to weigh, and

draw inferences from, the evidence - in the same manner, and to the same extent, as when the court exercises its function as a trier of fact in the exercise of its ordinary jurisdiction.

70 Most fundamentally, the purpose of the certification stage of a class proceeding is to determine whether the requirements in section 5 (1) of the CPA are satisfied and, if so, to define the issues to be tried. It would be a reversal of the process to permit certification to be determined by deciding issues that are likely to be front and centre at a trial.

71 The use that defendants' counsel sought to make of evidence on this motion was not consistent with the above principles. The fact that productions and examinations for discovery do not occur prior to certification is consistent with the legislative intention that the certification stage is not the time for facts that bear on the merits of a plaintiff's claims to be determined. It would be inconsistent with the purpose of discovery - and manifestly unfair to plaintiffs - to deny certification on the basis of findings of fact that may be in dispute and that would likely be the subject of discoveries prior to trial. To a very large extent, this is what defendants' counsel urged me to do in this case.

72 There are, in my opinion, two further comments that arise out of the defendants' reliance on evidence in this case. The first is that the court is concerned only with the claims asserted by the plaintiffs on behalf of the class. It is not concerned with other claims that defendants' counsel believe the plaintiff should have made, or would, for the purpose of rebuttal, have preferred them to have made. I mention this obvious point because, at different times during the hearing, it was evident that plaintiffs' counsel had difficulty in recognizing the case to which defendants' counsel were responding.

73 The second point is, I believe, the inevitable consequence of the "some basis in fact" approach adopted in *Hollick* to the existence of a rational connection between the class and the common issues. As it is not necessary for the plaintiffs to establish on a balance of probabilities that each class member will have an interest in the resolution of the common issues, there must always be the possibility that the judge at trial will find that this is not the case.

74 In *Pearson v. Inco Ltd.* (2005), 78 O.R. (3d) 641 (Ont. C.A.), for example, the decision of the Court of Appeal to certify the proceeding was premised on its acceptance of - as a common issue - the question whether published reports of nickel contamination from the defendant's facility had a depressing effect on property values in the geographical area in which the class members resided. The Court of Appeal's acceptance of this common issue would not preclude a finding at trial, on the basis of a full evidential record, that some property values in the area were depressed and others were not. Such a finding would, in effect, deny that the issue had commonality - that success for one class member would mean success for all: *Western Canadian Shopping Centres Inc. v. Dutton* [2001 CarswellAlta 884 (S.C.C.)], para 40. The court would then, it seems, have the option of decertifying the proceeding or, if the facts permitted, adopting a nuanced approach analogous to that approved by the Supreme Court of Canada in *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.), at para 32, by amending the certification order, dividing the class into subclasses, and answering the common issues separately for each subclass.

75 The relevance of the above comments to the evidence presented on behalf of the defendants in this case can be seen by the assertions of fact repeatedly made by defendants' counsel on the basis of evidence that plaintiffs' counsel could not reasonably be expected, prior to discoveries, to be in a position to assess for accuracy, reliability or completeness. These include:

1. 28,443 patients were implanted with Guidant pacemakers in Canada;
2. Only 51 models were involved with those implants;
3. Only 14,791 of the devices implanted were subject to advisories from Guidant;
4. Only 3,497 of the 14,791 were subject to Class 1 recalls;
5. Only 3,559 (or possibly 1337) pacemakers were explanted after an advisory relating to them;
6. Only 13 incidents relating to the alleged defects were reported to Guidant from Canada;

7. Seventy-five per cent to 90 per cent of class members were not dependent on pacemakers to the extent that they would be harmed if the device failed to function;
8. All Guidant pacemakers had a very low failure rate;
9. Guidant was highly successful in meeting, or surpassing, its predicted reliability rates;
10. At all relevant times Guidant had a "robust" system of reporting performance problems and possible defects;
11. Guidant would issue advisories whenever they had knowledge of a departure from the predicted reliability rate, or if this would meaningfully improve patient welfare;
12. Guidant was subject to a rigorous regulatory system; and
13. No pacemakers subject to an advisory were implanted after the advisory was issued.

76 While each of the alleged facts was ostensibly relied on in connection with one or more of the statutory requirements for certification, a number of them had little, if any, relevance for this purpose and some had, in my opinion, none at all. An underlying theme - in my opinion, the predominant underlying theme - of the defendant's case against certification was that the alleged facts demonstrated that the claims asserted on behalf of the class members were without merit. The action was, in counsel's words, "misguided and weak". This theme was not well disguised by an appeal to the supposed implied overriding requirement that the plaintiffs' case for certification must possess an "air of reality".

77 Nor is it a legitimate response to the plaintiffs' motion to certify the proceeding to rely on the strength of the defendants' case on the merits to demonstrate that a trial of the common issues would be - as defendants' counsel contended - "a monster of complexity" and "the trial of the century" extending over three years, or more than five years, according to the estimates provided by defendants' counsel at different times during the hearing.

78 The response of plaintiffs' counsel was that, until the defendants' productions have been received, and examinations for discovery of the defendants have been conducted, the plaintiffs could not reasonably be expected to assess the reliability and comprehensiveness of the evidence relied on for the above assertions. In their counsel's submission, the required exercise could not properly, or reasonably, be undertaken by way of a cross-examination of the affidavits delivered on this motion. I accept this submission.

79 On virtually the only occasion when plaintiffs' counsel considered they were in a position to challenge the reliability of the evidence of any of the above assertions of fact, the challenge had, in my opinion, some merit. When, in the course of the hearing, plaintiffs' counsel challenged the confidently repeated assertion that no devices had been implanted after they had been referred to in an advisory, the defendants' response was to file the additional affidavit that exhibited the 730 page list of 28,443 implanted devices in Canada. Leave was granted to plaintiffs' counsel to cross-examine the deponent on this matter. As I have indicated earlier in these reasons, this revealed not only that 14 pacemakers had been implanted after an advisory that identified them as potentially defective, but that more than 400 of the pacemakers had been implanted after the problem and the model numbers had been identified in the advisory of September 22, 2005.

80 Defendants' counsel, moreover, subsequently attempted to rely on the contents of the exhibit for other purposes notwithstanding that the contents had not been previously disclosed -although apparently relied on by the deponent when preparing his first affidavit - and notwithstanding that the leave to cross-examine had been limited to the matter of the post-advisory implants.

81 As has been insisted on many prior occasions, the certification motion is essentially procedural in nature. There is, of course, nothing to prevent the defendants from making full disclosure of facts that will assist in narrowing the class, or formulating the issues. Just as obviously, the proceedings are adversarial and they cannot be compelled to do this. If, however, they choose to rely on assertions of facts peculiarly within their own knowledge, and which cannot properly and adequately

be tested on the motion, they cannot, in my opinion, insist that their evidence must be accepted as conclusive. The court must decide the weight that is to be given to it in the light of all the evidence and with strict attention to, and its focus on, the claims actually advanced by the plaintiffs on behalf of the class, and the standard of proof applicable to them.

82 To the limited extent that any of the above factual assertions are relevant to one or others of the requirements for certification, I will comment on them in connection with the claims advanced on behalf of the class, and together with the evidence in support of such claims. In doing this, I intend to have regard to the underlying principle that motions for certification are procedural in nature and are not intended to provide the occasion for an exhaustive inquiry into factual questions that would fall to be determined at a trial when the merits of the claims of class members are in issue. The starting point and the emphasis at this stage of the proceedings must be on the claims as formulated and advanced by the plaintiffs.

## Certification

83 Each of the five conditions in section 5 (1) of the CPA is a prerequisite for certification.

### 1. Section 5 (1) (a) - disclosure of a cause of action

84 In the statement of claim the plaintiffs claim declarations and damages for the torts of negligence and conspiracy. In addition, they seek punitive damages and the right to elect a disgorgement of revenues under the principles governing waiver of tort.

85 Although the defendants have reserved the right to request a reconsideration by appellate courts of the principles that have previously been approved and applied in this jurisdiction for the purposes of section 5 (1) (a), they have conceded that such an exercise cannot properly be undertaken on this motion in this court. They have also accepted that, in view of the close similarities between the statement of claim in this case and the pleading in *LeFrancois*, my rejection of their submissions in that case would apply equally to those they would seek to rely on in the present motion. Counsel made no additional submissions on the requirement in section 5 (1) (a). They refiled the factum they had delivered in *LeFrancois* and reserved their right to rely on it in the event of an appeal.

86 In these circumstances, I confirm my understanding that, for the purposes of section 5 (1) (a), I am constrained by the previous decisions - including *Hollick* and *Cloud v. Canada (Attorney General)* [[2004] O.J. No. 4924 (Ont. C.A.)] at para 41 - to apply the plain and obvious test in *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.) on the assumption that the facts pleaded by the plaintiffs will be proven. The submission of defendants' counsel that this is an inappropriate test for the purpose of the screening, or gatekeeping, function of the court at the certification stage is supported by the views of the Ontario Law Reform Commission, at page 311 of its Report - as well as the reasoning in *Hoffman v. Monsanto Canada Inc.*, [2007] 6 W.W.R. 387 (Sask. C.A.). However, as noted by McLachlin C.J. in *Hollick*, at para 16, the views of the Ontario Law Reform Commission with respect to the need for a preliminary merits test were not accepted by the drafters of the CPA.

87 The statement of claim contains numerous particulars of the defendants' alleged negligence. Essentially, it is pleaded that Guidant designed, manufactured, sold and distributed the pacemakers for implantation in class members knowing that they were subject to defects, and failing to disclose this in a timely manner to class members, the FDA and Health Canada.

88 It is alleged that, by reason of these negligent acts and omissions, class members suffered damages and losses that include personal injuries and the pain suffered, and risks incurred, from medical procedures for implantation of the defective devices, explantation, and implantation of replacements. In addition, damages are claimed for "emotional distress including mental distress, anger, depression and anxiety".

89 In connection with the claim for conspiracy it is pleaded, among other things, that the defendants conspired to conceal the defects in the products they were selling and to perform the other particularised acts of negligence, and that, in so doing, they breached provisions of the *Food and Drugs Act*, the Medical Device Regulations and US legislation and medical device reporting regulations. This conspiracy is alleged to have been directed towards the plaintiffs and class members with knowledge that they would suffer injuries and losses.

90 The plaintiffs reservation of a right to elect the restitutionary remedy known as waiver of tort is based essentially on the same conduct pleaded in connection with the claims in negligence, and the profits received by the defendants prior to the recalls.

91 The claim for punitive damages rests on an allegation that the defendants' wrongful conduct as particularised in the pleading was deliberate, callous and sufficiently egregious to support it.

92 Finally, the derivative claims of the family class are based, generally, on expenses incurred, loss of income, and compensation for loss of support, guidance, care and companionship, they might otherwise have received from members of the primary class.

93 In *LeFrancois*, the sufficiency of the above allegations was challenged on a number of grounds. In particular, it was submitted that most of the categories of harm pleaded were not compensable in damages, that the claim for conspiracy was barred by the doctrine of merger, and that the restitutionary remedy was not available for negligent misconduct. As I have indicated, it was the position of defendants' counsel in this case that, in view of the close similarity of the pleading to that in *LeFrancois*, it was not open to me to accept the submissions I had rejected in that case. Whether or not that is strictly correct, I am of the opinion that, for essentially the same reasons as those in the earlier case, the causes of action on which the plaintiffs rely are adequately disclosed in the pleading. The claims in the two cases are grounded in essentially the same allegations of systemic corporate misconduct and I do not believe it would serve any useful purpose to inflate these lengthy reasons further by repeating the analysis in *LeFrancois*.

## **2. Section 5 (1) (b) - the class**

94 The statement of claim defines the primary class that the plaintiffs seek to represent as:

All persons who were implanted in Canada with one or more of [the 80 models] of pacemakers.

95 In addition there is the family class with derivative claims under the *Family Law Act*, R.S.O. 1990, c. F. 3 or under equivalent, or comparable, legislation in other provinces.

96 The definition provides objective criteria and it is not suggested that there should be any difficulty in identifying the members of the class. The defendants claim that they can do this and, in the evidence filed on the fourth day of the hearing, they provided details of the dates and locations in Canada in which each of the alleged 28,443 members was implanted, and they have indicated whether each such device was the subject of one of the advisories. As the class is limited to persons who were implanted in Canada, the defendants evidence that only 51 of the 80 models were sold in this country has no bearing on the adequacy of the class description.

97 In the submission of defendants' counsel, the class proposed by the plaintiffs should be rejected on the ground that there was no evidence that anyone other than the plaintiffs has a genuine interest in trying the merits of the claims asserted by them and, also, because the class definition is "grossly broad and over-inclusive".

98 In some cases, judges have insisted that as a requirement for certification the court must be satisfied that the plaintiffs are not the only members of the class who wish to enforce the claims that the plaintiffs seek to assert on their behalf. In *Poulin v. Ford Motor Co. of Canada Ltd./Ford du Canada Ltée*, [2006] O.J. No. 4625 (Ont. S.C.J.), at para 55, MacDougall J. stated:

In my view, before the extensive process of a class proceeding is engaged, it ought to be clear to the court that there is a real and subsisting group of persons who are desirous of having their common complaint (assuming there to be a common complaint) determined through that process. The scale and complexity of the class-action process ought not to be invoked at the behest, and for the benefit, of a single complainant.

99 In other cases, courts have not insisted on evidence of a group interest in the enforcement of the claims, and I do not understand the above statement in *Poulin* to require evidence in all cases that the plaintiffs are not the only persons interested in advancing claims: *Cassano v. Toronto Dominion Bank* (2007), 87 O.R. (3d) 401 (Ont. C.A.) is an example of a case in which

a proceeding was certified notwithstanding the absence of any evidence of interest by putative class members other than the plaintiffs. In such cases, it seems that the court may be prepared to presume from the nature of the claims and the circumstances of a particular case that the plaintiffs are likely to have the support of other class members. Such a presumption does not seem unreasonable where, as here, the claims are asserted on behalf of persons who allegedly suffered physical or psychological harm from the defendants' negligent manufacture and marketing of defective medical implants.

100 As a general rule, the question whether such evidence should be required is, I believe, best considered along with the other factors that may bear on the exercise of the court's discretion under section 5 (1) (d). In the present case, however, I note that, quite apart from the existence of the pending actions in British Columbia and Quebec - in one of which defendants' counsel have been retained - and the multi-district litigation involving the same Guidant pacemakers in the United States - plaintiffs' counsel informed me that they have been in contact with a number of other putative class members who expressed an interest in the proceeding. If the defendants are not willing to accept that assurance, I would give leave to the plaintiffs to deliver an affidavit of one of their counsel for the purpose. Each of such persons would be similarly situated to Mr Lambert and - subject to the arguments of defendants' counsel on over-inclusiveness - would have at least a colourable claim that has a rational connection with the proposed common issues that will be considered below.

101 The requirement that a class must not be over-inclusive has its foundation in the following passage from the reasons of McLachlin C.J. in *Hollick*, at para 21:

The representative need not show that everyone in the class shares the same interest in the resolution of the asserted common issue. There must be some showing, however, that the class is not *unnecessarily* broad - that is, that the class could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issue. Where the class could be defined more narrowly, the court should either disallow certification or allow certification on condition that the definition of the class be amended ... (italics in original)

102 As the passage indicates, the prohibition is not against over-inclusive class definitions *per se* but against those that are unnecessarily over-inclusive in the sense that any attempt to limit them would arbitrarily exclude some persons who have the same interest as other class members in a resolution of the common issues. It follows that, as classes cannot be limited to persons who suffered harm or damages, class descriptions in mass tort cases - and, in particular, cases involving claims for negligence - will almost inevitably be over-inclusive. The inevitability that acceptable class definitions will be over-inclusive was recognized by Winkler J. (now Winkler C.J.O.) in *Frohlinger v. Nortel Networks Corp.* (2007), 40 C.P.C. (6th) 62 (Ont. S.C.J.) and *Attis v. Canada (Minister of Health)* (2007), 46 C.P.C. (6th) 129 (Ont. S.C.J.).

103 In *Frohlinger*, at para 23, the learned judge stated:

Merits-based definitions are self-evident. Over-inclusive class definitions on the other hand are more elusive. It cannot be the case, as is evident here from the fact that approximately 150,000 claims had been filed as of the date of the hearing, that a class is over-inclusive simply by reason of its numerical size. Similarly, a proper class definition does not include only those persons whose claims will be successful. Rather, as the Chief Justice states in *Hollick*, the essence of a proper class definition goes to the "rational connection between the class as defined and of the asserted common issues". It is neither expressed or implied in that statement that a class "colourable" claim must be one that will ultimately be successful. Indeed, it is the purpose of a class action to resolve claims through the utilization of a common issue phase and an individual issue determination, if necessary

104 The following passage in *Attis*, at para 52, is to the same effect:

The fact that some of the individual class members may not have suffered harm, or not yet suffered harm, does not alter the fact that they were exposed to an allegedly defective device. While any particular class member's claim may prove to be unsuccessful, one purpose of class-action litigation is to achieve judicial economy by resolving all potential claims.

In consideration of an allegation that a given product is unsafe for use, it is difficult to accept the proposition that all users would not have some interest in the outcome of litigation. Conversely, it is equally difficult to accept a proposition that

the defendants subject to the allegation would not want to ensure that all potential claims are resolved and all potential claimants bound by the result, including those claims that may fail.

105 The criticism levelled by defendants' counsel in terms of the over-inclusiveness of the class definition in this case is not consistent with the above analysis. In paragraph 149 of their factum, defendants' counsel stated:

The only class members who are likely to have a genuine claim for compensation against the defendants are individuals (1) who are pacemaker-dependent, (2) who were implanted with one of the 14,791 devices subject to one of the four trends in respect of which an advisory was sent, and (3) who had their devices explanted because of the advisory.

106 Counsel accepted that any formulation of a class definition in terms of such criteria would, like definitions limited to those who suffer harm, offend the principle that prohibits merits-based criteria. At the same time, however, counsel assert that the result is an unacceptably over-inclusive class definition as, on the evidence they have provided, the number of individuals who are likely to satisfy the second and third of the criteria that cannot be included in the definition would be no more than 3,559. Thus, having excluded merits-based criteria from the class definition, they then asked the court to reject the definition on the basis of those criteria. The short answer is that the criteria raise issues that go directly to the merits of the claims asserted on behalf of the class and it is not the function of the court at the certification stage to decide such questions. Merits-based criteria are rejected precisely because they raise issues that are to be resolved either at a trial of common issues or, subsequently, when individual issues are determined.

107 Even if defendants' counsel were correct in their estimate of only 3,559 persons with "potentially genuine claims" this would not necessarily be inimical to the plaintiffs' case for certification. Apart from anything else, it would detract significantly from the force of counsel's submissions that manageable procedures for resolving individual issues could not be devised.

108 I do not understand it to be disputed that the defects occurred in the 80 models of Guidant pacemakers identified by the plaintiffs, or that devices with these defects were implanted in 28,443 patients in Canada. At the hearing, defendants' counsel expanded their submissions on the over-inclusiveness of the class definition so as to reduce even further the number of members with colourable claims. Their reasoning was as follows:

- (1) only approximately 14,791 of the patients received pacemakers that were subject to an advisory;
- (2) only 3,497 of these had been subject to a class I recall and the remaining 11,294 that were subject to a class II recall could not give rise to valid claims; and
- (3) of the 3,497 patients, more than two thirds would not have been pacemaker-dependent and at risk of harm if their devices malfunctioned because of the Class 1 defect.

109 The first of these submissions ignores the fact that the claims asserted on behalf of the class are, again, not premised on the accuracy of Guidant's advisories and, like the second and third of the above submissions, this may be in issue at a trial. Plaintiffs' counsel objected, moreover, that their clients should not be compelled prior to discoveries to investigate, challenge and rebut the evidence provided by the defendants of such facts that are within their own special knowledge and are not otherwise available to the plaintiffs. I believe this objection is well founded.

110 It is not open to a defendant to rebut evidence that indicates some basis in fact for the existence of colourable claims by attempting to prove on a balance of probabilities that the claims will not succeed at trial. The question at the certification stage is not whether the claim is likely to succeed, but whether the suit is appropriately prosecuted as a class action: *Hollick*, at para 16. The line between evidence that demonstrates the absence of any basis of fact for the claims of class members, and that which amounts to the kind of attack on the validity of such claims that is properly left to a trial, may be difficult to draw but, in my opinion, it has been crossed by defendants' counsel in this case.

111 In order to reduce the class without arbitrarily excluding persons interested in the common issues, it would be necessary to accept at least the uncorroborated evidence of Guidant's proponents that the only possibly defective devices in the models referred

to in the FDR recalls were those Guidant has identified by their serial numbers in lists that were said to have accompanied the advisories. In the submission of plaintiffs' counsel they should not be compelled to do this at the certification stage, and should be permitted, at least provisionally, to define the class by reference to the models identified in the FDA recalls. At this stage, Guidant's assertions that only particular subsets of the models were affected are not supported by any evidence of the methodology employed, or anything else that would enable the plaintiffs to verify, or challenge, their accuracy. Unless the parties can reach agreement on them, these are pre-eminently questions to be tried and not questions to be disposed of on this motion and on which certification should depend. Sections 8 and 10 of the CPA contemplate that certification orders may need to be amended, and it may well be found possible to reduce the size of the class as the litigation proceeds towards trial.

112 The submissions of defendants' counsel were premised on the complete reliability of the contents of the advisories. A decision to certify the proceeding would, I was told, "drive a dagger through the heart" of the advisory system and, indeed, the medical device manufacturing industry. However, the conduct of Guidant with respect to the advisories is very much in issue in the litigation. The advisories were based on Guidant's investigations of reported incidents of malfunctioning pacemakers and, in their pleading, the plaintiffs have challenged the adequacy of the investigations and the reasonableness of the conclusions drawn from them, as well as alleging that Guidant failed to report the latter in a fair, objective and unbiased manner. It was, moreover, accepted by Mr Berg, as well as supported by the evidence of Dr Tyers, that not all incidents of malfunctioning pacemakers were reported. It was Dr Tyers' evidence that a majority of failed devices were never returned to Guidant for examination and that, in consequence, the failure rates claimed by Guidant grossly underestimated the number of actual failures and injuries experienced. Guidant's reliance on the existence of only 13 known incidents of malfunctioning devices in Canada - and its counsel's repeated references to these - must also be viewed in the light of the undisputed evidence of under-reporting.

113 Given that damages are claimed for mental distress, depression and anxiety, and are not limited to physical injury caused by the defective pacemakers, counsel also referred to the fact that in Guidant's advisories, and the notices of recall provided by the regulatory authorities and health care facilities, reference was generally made only to the affected models and the serial numbers of the subset that are said to be affected were not set out. 54,000 Guidant pacemakers were covered by the models referred to in a January 21, 2006 advisory update in which Guidant stated that it had not been able to identify the serial numbers of a subset of affected devices subject to the class I recall by the FDA.

114 The submission of defendants' counsel on the suggested over-inclusiveness of the class definition is consistent with much of their detailed response to the motion in that they: either beg questions that bear on the merits, or ask the court to decide them; either ignore the plaintiffs' theory of the case, or attribute to - or seek to impose upon - them their own theory; and they ignore the very low standard of proof - some basis in fact - required to discharge the evidential burden on the plaintiffs with respect to the existence of the class. In particular, they attempt to exclude all claims for damages of persons other than those who had their devices explanted because of one of the advisories issued by Guidant, and to tie the plaintiffs' case to the contents of the advisories. The plaintiffs are not obligated at this stage to accept the timeliness of the advisories, or the adequacy or accuracy of their contents. These matters are aspects of the defendants' overall conduct on which the claims asserted on behalf of the class are based.

115 Each of the three merits-based criteria identified, and quite properly rejected as class criteria, by the defendants - and then relied on by them to establish over-inclusiveness - is at present very much in issue in this proceeding. At this stage, the question is whether the class members have colourable claims in the sense referred to by McLachlin C.J. in *Hollick* and discussed by Winkler J. in *Frohlinger*. In order to establish the necessary basis of fact for an affirmative answer, the plaintiffs have provided the expert evidence of Dr Tyers. This is, in my judgment more than sufficient for the purpose and it is not the function of a court on this procedural motion to resolve the substantive conflicts and inconsistencies between his evidence and that of the equally well-qualified Dr Kim, and the evidence of the defendants' employee, Mr Berg.

116 On the basis of the record, I am not prepared to find that the class definition is *unnecessarily* over-inclusive at this stage of the proceeding. Although in the course of their submissions counsel suggested that the information in the 730 page summary would have permitted the plaintiffs to devise a more narrow - and, presumably, acceptable - class description, they did not indicate how this might be achieved. In declining to do this, counsel stated that it was not their obligation to assist the plaintiffs.

As I have indicated, however, I do not consider that the plaintiffs are compelled on this motion to accept as incontrovertible fact the contents of the summary.

117 Nor am I prepared to grant the request of defendants' counsel for an order directing members of the class who wish to make claims to identify themselves prior to a trial of common issues. As this would, in effect, convert the opting-out procedure under the CPA into an opting-in process, I do not believe I have jurisdiction to make such an order under section 12 of the CPA, or otherwise. Sections 24 and 25 of the statute contemplate that claims to share in awards of damages are to be made after a trial of common issues and I see no reason why I should require earlier decisions to participate to be made, even if I had the authority to do this.

118 My acceptance of the class definition proposed by the plaintiffs does not preclude the possibility that it might be amended following productions and the examinations for discovery of the defendants. Plaintiffs' counsel were not averse to doing this. What they object to is being forced to accept the accuracy and comprehensiveness of the contents of the advisories and the detailed summary at this stage of the proceeding.

### **3. Section 5 (1) (C) - Common Issues**

119 The plaintiffs propose the following common issues for trial:

- (1) Did the defendants, or any of them owe a duty of care to the class in respect of the design, development, testing, manufacturing, licensing, assembling, distribution and sale of the pacemakers?
- (2) If so, did the defendants, or any of them, breach such duty? If so, what was the nature of the breach?
- (3) Did the defendants, or any of them, owe a duty to the class to warn of the potential defects associated with the pacemakers, and if so, when did such duty arise?
- (4) If so, did the defendants, or any of them, fail to warn the class of the existence of the potential defects associated with the pacemakers?
- (5) Did the defendants, or any two or more of the defendants, act in combination to conceal information from the class, Health Canada and the FDA relating to the potential defects associated with the pacemakers? If so, was the defendants' conduct unlawful in that it violated the Food and Drugs Act, the medical devices regulations, the Food, Drug, and Cosmetic Act and related medical device reporting legislation and regulations? Should the defendants have known that, in the circumstances, injury to the class was likely to occur as a result of the defendant's actions?
- (6) Can all or part of the class elect to have damages determined through an accounting and disgorgement of the proceeds of the sale of the pacemakers implanted in class members? If so, in what amount and for whose benefit is such accounting to be made? If part, but not all, of the class can elect, which part or parts of the class can elect?
- (7) Should any or all of the defendants pay punitive damages to the class?
- (8) Should any or all of the defendants pay the cost of administering and distributing any recovery? If so, in what amount?
- (9) Should any or all of the defendants be ordered to pay pre-judgment interest? If so, who should pay, and at what annual rate? Should the payment be simple or compound interest? How is the pre-judgment interest to be calculated?

120 The proposed common issues are substantively very similar to those proposed and accepted for the purpose of certification of the claims in respect of Guidant's defibrillators in *LeFrancois*. With the exception of the reference to pacemakers - rather than defibrillators - they are virtually identical both in form as well as substance to the common issues accepted by Hoy J. in *Peter*. A resolution of these issues in favour of the class would not determine whether Guidant is liable for damages for negligence or conspiracy, but it would resolve questions that are central to any finding of liability.

121 Defendants' counsel were, in my opinion, correct in their insistence that the commonality of the issues, and the extent to which their resolution would advance the proceeding, must be decided on the basis of the relevant evidence of the particular facts of this case. *LeFrancois* was, in their submission, clearly distinguishable because of the evidence here that relates to the number of class members, the number of models, and the fact that only subsets of each model were the subject of the alleged defects identified in the advisories. Each model -and, presumably, each subset - was, in counsel's submission, necessarily the product of a separate process of designing, manufacturing, testing and regulatory approval, and each has had its own performance history and post-market surveillance program. The consequential inability to extrapolate a finding with respect to one subset to others of the same model, and from one model to another, was, they submitted, fatal to any finding of commonality.

122 Defendants' counsel submitted, further, that the need to engage in a detailed examination of Guidant's conduct with respect to each of 51 models would make the trial of common issues away a "monster of complexity" and the "trial of the century" that would take three or five years to complete.

123 On the basis of the record before me, I am not prepared to accept these submissions. Only four specific defects have been particularised in the statement of claim and the fact that they have been found in 51 different models - or subsets of models - does not persuade me that the reasonableness of Guidant's conduct with respect to them will necessarily involve the detailed and lengthy inquiries into the history of the development, surveillance or marketing of each model that defendants' counsel assumed would be required. There is evidence that each of the four defects is common to particular models, or subsets, and it is the conduct of the defendants with respect to these common defects that will be in issue. Whether or not a separation of the class into four or more subclasses would be required before, or at, trial, this evidence is, in my judgment, sufficient to satisfy the evidential burden on the plaintiffs on the question of commonality for purposes of certification on this motion.

124 Given the extent to which the facts are, at present, within the sole knowledge of the defendants, it would be idle to speculate about the likely length of a common issues trial and I am not going to deny certification on the basis of the estimates provided by their counsel prior to discoveries. Similar *in terrorem* submissions were made and rejected in *LeFrancois*, at para 76

125 In deference to submissions made by defendants' counsel, I would add the following as a common issue for trial:

Are any of the categories of damages referred to in paragraph 62 of the statement of claim not compensable as such and, if so, which?

**4. Section 5 (1) (d) - the preferable procedure.**

126 Viewed in the light of the three objectives of the CPA, there are strong reasons for preferring the procedure under the statute to the institution of proceedings by class members as individuals.

127 Access to justice will be served in that few class members are likely to be willing to accept the risks and expense of litigating the complex issues of fact and law against these defendants. Behavioural modification is also very much a goal that would likely be achieved by proof of the serious factual allegations on which the claims of class members are based. The third of the statutory objectives - judicial economy - will be achieved by a single trial of the common issues with or without the "monstrous complexity" to which defendants' counsel have referred.

128 The question of judicial economy - and that of preferability in general - must, however, be looked at in the context of the claims as a whole and what will be required for their resolution: *Hollick*, at paras 27 - 30. As McLachlin C.J. noted, at para 29, undue weight is not to be given to "the fact that [section 5 (1) (d)] uses the phrase "resolution of the common issues" rather than "resolution of the class members' claims". For this reason, the plaintiffs are required to demonstrate that the resolution of the common issues will substantially advance the proceeding. If, on the basis of the necessary cost-benefit approach, its significance as a step in the litigation will be overwhelmed by the number and complexity of individual issues that remain, certification should be refused. This has happened in previous decisions in which it has been said that the end of the common issues trial would, in reality, mark the commencement of the litigation rather than its end.

129 Allied to this approach to determining the preferable procedure is the court's insistence in previous cases that the evidence must establish that a class proceeding will be a fair, efficient and manageable method of achieving the goals of the CPA: see, for example, *Caputo v. Imperial Tobacco Ltd.* (2004), 42 B.L.R. (3d) 276 (Ont. S.C.J.), at para 68.

130 The resulting inquiry can, of course, be one of some difficulty for the court to embark upon at the certification stage and, in particular, where the individual issues may be affected by findings made at trial. In the submission of defendants' counsel, the number of class members, and the complexity of the individual issues involved in the claims for damages for negligence and conspiracy - and, in particular, the proof of harm and causation - would make it impossible for the court to devise procedures for their resolution that would be both manageable and fair to the defendants. Methods of disposing of 28,443 claims - each involving a hearing of at least three days - were, it was asserted, far beyond the capacity of the court to implement and supervise. This factor, by itself, was in counsel's submission, sufficient to distinguish the case from the facts of *LeFrancois*.

131 This approach of defendants' counsel to the requirement of preferability does not affect the alternative claim for a disgorgement of revenues. It also either ignores their submissions that only a very small percentage of the class members will have suffered compensable harm, or it assumes that those submissions will be rejected. As I indicated earlier in these reasons, the size of the class I have accepted may be reduced significantly after discoveries have been conducted and plaintiffs' counsel have had an opportunity to test the accuracy, and the reliability, of the defendants' evidence of the number of the allegedly defective pacemakers implanted in Canada, and the likely incidence of compensable harm inflicted upon the recipients. It was no part of the plaintiffs' case for certification that each one of the 28,443 class members will have received a defective device or will have suffered serious physical or psychological harm as a consequence of having done so.

132 There is also the possibility that the class will be further reduced by reason of the trial judge's acceptance of defendants' counsel's submissions on the legitimate heads of compensable damages. Even if all of those claimed are accepted, it does not follow that a large proportion of a class members will be making claims for damages for such serious physical injuries that will require something akin to mini-trials for their determination. Different more summary procedures might well be devised to resolve claims for damages arising solely from the implantation and successful explantation of defective devices.

133 In addition, individual issues will, of course, only have to be determined in respect of class members who make claims pursuant to section 25 of the Act and, again, if the evidence of the defendants is accepted at trial, the number of such persons may not be fatal to manageability.

134 This case is unusual by reason of the possibility of a very over-inclusive class that, by reason of the nature of the evidence on which the defendants sought to rely, cannot fairly be reduced at this stage of the proceeding. It is also unusual in that the position taken by defendants' counsel on the question of preferability is inconsistent with, and contradicts, their reliance on such evidence for the purpose of the other statutory requirements. In determining whether a class proceeding is the preferable procedure and, for such purpose, determining whether there is some basis of fact for an affirmative answer, a court is entitled - and, I believe, must - look at the totality of the evidence and not just that provided on behalf of the plaintiffs. In these circumstances, I am satisfied that there is enough evidence to justify a conclusion that the provisions of section 25 of the Act confer upon the trial judge sufficient powers to fashion, and manage, the resolution of the individual issues. As the goals of the CPA would otherwise be achieved, I find that a class proceeding is the preferable procedure.

##### **5. Section 5 (1) (e) - the representative plaintiffs and the litigation plan**

###### **(a) Representative Plaintiffs**

135 Mr Lambert and Ms Ibbetson are proposed as the representatives of the primary class and the family class respectively. The burden is on each of them to demonstrate that they would fairly and adequately represent the interests of the class. The court must be satisfied that they have the willingness and the ability to do this capably and vigorously. They must understand and accept the responsibilities that will attach to them as class representatives if certification is granted.

136 Most importantly, they are to prosecute the litigation in the interests of the class and not solely in their own interests. Although, for this purpose, they will normally have to place great reliance on their counsel's advice, this must not be allowed to detract from the fundamental principle that it is the clients, and not their lawyers, who are in charge of the litigation and that it is to be conducted in accordance with their instructions. On a motion to certify the proceedings, the intended representatives must satisfy the court that they have the ability - and are prepared -to do this. Such a finding is a precondition to a conclusion that a proposed representative will fairly and adequately represent the interests of the class.

137 In *Hoffman v. Monsanto Canada Inc.*, [2005] 7 W.W.R. 665 (Sask. Q.B.), at para 337, the court stated:

The representative plaintiff under the Class Actions Act has a responsibility to prosecute the lawsuit, once certified, in the interests of the members of the class. Their duty is akin to that of a fiduciary. They must have adequate knowledge and ability to instruct counsel and they must act in the interests of the members of the class. They are answerable to the court for the adequate performance of these obligations. These are duties that cannot, in my view, be delegated to another party who is not answerable to the court.

138 Although class representatives who are merely puppets of their lawyers will be rejected, class counsel have responsibilities unique to class proceedings. As well as the usual obligation to ensure that their clients are fully informed about the procedural steps required, and to obtain and follow their instructions, they have the responsibility to see that the clients are aware of and accept the obligations that, if certification is granted, will attach to them as representatives of the class. For that reason the competence and experience of class counsel has been considered to be a relevant consideration.

139 The plaintiffs are represented by counsel experienced in class proceedings. I have no doubt that Mr Lambert and Ms Ibbetson are motivated to advance the interests of the class members. By itself, such motivation is not sufficient to satisfy the onus on the plaintiffs and it was submitted by defendants' counsel that neither of them would be a suitable representative. Relying heavily on the answers Mr Lambert gave in cross-examination on his affidavit, defendants' counsel argued that he lacked an adequate understanding, and acceptance, of the responsibilities he would be required to assume. It was submitted also that both he and Ms Ibbetson were unduly partisan and lacked credibility to an extent that neither should be considered to have the complete integrity that the court should require.

140 To a very large extent, the criticism of Mr Lambert's knowledge of, and acceptance, of the responsibilities of a class representative were based on his admission that he did not know of any other members of the class, had not inquired of his counsel about them and had not read any of the affidavits filed on behalf of the defendants. It was also objected that Mr Lambert's understanding of such matters as the nature and function of the advisories and recalls, and the concept of pacemaker dependency, was neither complete nor accurate.

141 Of necessity, the matters on which representative plaintiffs may appropriately defer to, and rely upon, the judgment of their counsel will vary according to the particular facts of each case. In the circumstances of this litigation, I do not attribute great weight to the suggested deficiencies. Mr Lambert's explanation, for example, that he would not have understood much of the evidence of Mr Berg and Dr Kim - that is "what I have lawyers for" - has the appearance of an honest and, in view of the nature of their evidence, by no means a disqualifying admission.

142 Communications with other class members are important but they will become more so after certification is granted. In many, and probably most, class actions, counsel establish a website or at least provide a telephone number so that inquiries from interested persons about the proceeding will go to them and not to the plaintiffs personally. From Mr Lambert's answers in cross-examination, this appears to have been done here. Moreover, although some cases receive considerable publicity prior to the hearing of a certification motion, notice to members of the putative class is not normally required at this stage. In some circumstances, the nature of the claims asserted makes it undesirable to raise expectations and, if certification is granted, close attention must be given to the contents of the notice to be sent to class members. In *Lefrancois*, for example, defendants' counsel have quite properly insisted that the notice of certification should be framed in a manner that will not cause unfounded concerns among recipients of defibrillators who are not at risk. In this respect, the present case is no different.

143 Consistently with their general approach to the motion, the cross-examination of defendants' counsel tended to ignore the fact that there are facts that are in dispute and, in particular, that the plaintiffs reserve the right to contest the reliability of the defendants' evidence of the limited subsets of defective pacemakers in each of the 51 models. Thus, for example, on page 20 of the cross-examination conducted on January 6, 2009, the following exchange occurred between Mr Campion and Mr Lambert:

Q. Now, it is your evidence, as I understand it, that you received a defective device from Guidant and the Toronto East General Hospital and Dr Campbell?

A. As far as I understand, yes.

Q. My proposition is stronger than that, it is your unequivocal testimony that you received a defective device from Guidant?

A. I received a device from Guidant. It was recalled back. Whether or not mine was defective, I don't know.

Q. Okay. So you now saying that you're not sure that your device was defective?

A. No, I'm saying that Guidant recalled them, mine was in that model that was recalled. So rather than be sorry, I considered that it's defective, of course.

Q. And you also take the position that all of the 28,000 or the 14,000 putative plaintiff's that you seek to represent also received defective devices, is that right?

A. No. I said that 14,000 people have a possibility of having a defective pacemaker, the same as I have.

144 Similarly, other lines of questioning developed by defendants' counsel in their exhaustive cross-examination assumed acceptance of their concepts and terminology relating to advisories, recalls and pacemaker dependency.

145 The challenge to Mr Lambert's credibility, and that of Ms Ibbitson, was most fully developed in a continuation of their examinations in open court on the first day set aside for the hearing of the certification motion. The request for permission to do this was made after defendants' counsel had obtained documentation as a result of the answers previously given by Mr Lambert. My initial response to the request was that I was not satisfied that the issue of credibility was likely to have significant relevance to the requirement in section 5 (1) (e) of the CPA. There was also a concern that the hearing of the motion to certify the proceeding would have to be postponed again unnecessarily. I indicated also that I thought it unlikely that I could properly make a finding of a disqualifying lack of credibility on the basis of transcripts.

146 After counsel had made submissions on the possible relevance of the issue of credibility in this context, I ruled that the examinations could continue in open court on the date set down for the commencement of the hearing of the motion to certify the proceeding, and that I would defer a decision on the question of admissibility until the submissions of counsel had been made in the course of the certification hearing.

147 In so ruling, I was strongly influenced by the appearance of inconsistencies between the facts that had emerged and the answers given previously by Mr Lambert that might, I considered, call into question his acceptability as a class representative. To that extent, I accepted the submissions of defendants' counsel.

148 At different stages of a class proceeding there may be motions that require decisions to be made in the interests of the class as a whole. On such motions the evidence of representative plaintiffs - or proposed representative plaintiffs - may be important. On certification motions such evidence will normally be required. This would usually be the case with motions to discontinue and, in particular, motions to approve settlements and counsel's fees in which the court must be able to rely on the judgment and opinions of a credible representative or proposed representative. The evidence may consist of relevant facts, communications with class members, or simply of reasons why the motion should be granted, or dismissed, in the interests of the class.

149 The court has an obligation to protect the interests of the class members and, in my opinion, it is entitled to insist that a person who represents them in the proceeding has credibility on issues that may involve or affect such interests.

150 An absence of credibility on issues that affect only the individual claims of the plaintiff will not necessarily require a conclusion that he or she would not fairly and adequately represent the class. In *Price v. Panasonic Canada Inc.*, [2001] O.J. No. 5244 (Ont. S.C.J.), para 15, leave to conduct a further cross-examination was denied by Shaughnessy J. on the ground the issues of credibility were relevant to the merits and not to the requirements for certification. By way of contrast, in *Shaw v. BCE Inc.*, [2003] O.J. No. 2695 (Ont. S.C.J.), a proposed representative was rejected when, in cross-examination, he had admitted that statements in his affidavit were untrue and the court concluded that he had "a credibility problem of some magnitude". There seems no doubt that such a conclusion should be drawn if the court is satisfied that it would be unsafe to rely on any evidence that the plaintiff might give - that there is to that extent a general lack of credibility. In Mr Campion's submission this was such a case and it was on this ground that I permitted the examinations to continue despite the fact that the impugned evidence of Mr Lambert and Ms Ibbetson was relevant only, if at all, to the former's individual claims.

151 The evidence on which defendants' counsel relied related primarily to communications and advice Mr Lambert stated that he had received from East York Hospital and his personal physician to the effect that he should have his pacemakers explanted. The relevant letters from the hospital and the hospital's notes of an attendance there were produced at the continuation of the cross-examination and it is clear that they contained no such advice. Mr Lambert testified that he had destroyed the letters but it emerged that one of them was in the possession of his counsel. When questioned by Mr Campion, Ms Ibbetson stated emphatically that she had not sent the letter to them. Subsequently, when a fax cover sheet was produced by her counsel, she agreed that the transmittal message was in her handwriting.

152 While there are inconsistencies between the undoubted facts and the evidence of the plaintiffs with respect to the contents of the communications and the destruction of the letters from the hospital, they are not, in my opinion, as great as counsel suggested and some of them disappear when Mr Lambert's statements are read in the context of his evidence as a whole. He was skeptical of the extent that the hospital would be prepared to make clear and unequivocal statements that the pacemakers were defective and must be replaced, but he believed that this was "insinuated". In his original cross-examination, he had stated that he would not expect the hospital - as a Guidant customer - to tell him if his pacemaker was malfunctioning.

153 Mr Lambert's suspicions may have been unfounded, and his attempts to read between the lines of the letters may not have been successful, but it does not follow that he was being untruthful. At different times during his cross-examinations he admitted to difficulty in remembering facts including details relating to the letters. His evidence that he destroyed the first of them was qualified by the words "as far as I remember". Although in an answer to one question he stated that he had torn up each of the two letters from the hospital, he qualified this subsequently by stating that he had not destroyed one of the letters but had merely thrown it in the garbage. While counsel placed some emphasis on the unlikelihood that the physician - a cardiologist - would, as Mr Lambert stated, have advised him to have his first pacemaker explanted simply on the basis of the first letter from the hospital, it does not appear that the letter was shown to the physician. Mr Lambert's evidence was that the cardiologist had said that, if the hospital had stated that the pacemaker should be explanted, then Mr Lambert should have this done.

154 Mr Lambert was not a sophisticated witness in medical matters. From reading the initial transcript and from listening to, and observing the taking of, his evidence in court it was, I believe, also clear that there was a vast difference between the skilled examiner's deliberate and precise choice of language and that of Mr Lambert. While, in the continuation of the examination, counsel succeeded in clarifying the contents of the communications from the hospital, and in establishing that Mr Lambert's evidence of his personal recollections may not always be reliable, it did not persuade me that this indicated a lack of integrity that would disqualify him as a class representative. On the totality of his evidence, I believe the most severe criticism that can justly be levelled at him as a witness is that at times he tended to give categorical answers when his actual recollections of the relevant facts were probably less than perfect.

155 The same criticism can be levelled in respect of the evidence of Ms Ibbetson. Despite her emphatic assertion that she had not sent a copy of a second letter to her lawyers, she was subsequently compelled to admit that she must have done this even though, she said, she did not remember doing so.

156 The question is whether, in these circumstances, I should find that the apparent willingness of the plaintiffs to give categorical answers on the basis of imperfect recollections shows such a serious disregard for their obligations to testify honestly and truthfully that they should be disqualified as class representatives. I decline to make such a finding. To do so would, in my opinion, be to impose too high a standard. It is part of the stock-in-trade of cross-examining counsel to confound, and discredit the testimony of, witnesses by exposing discrepancies between the facts and what they believe they remember. I believe that is probably all that occurred in this case. Given the likelihood that copies of the letters from the hospital would be available from its records, I find it much less likely that the plaintiffs would, as defendants' counsel submitted, give evidence they knew to be untrue in, presumably, an attempt to withhold evidence of their true contents from the court.

157 I am satisfied that, apart from the issue of credibility, the plaintiffs are willing to represent, and capable of representing, the interests of the class and, for the reasons I have given, I reject the challenge that they lack the degree of credibility and personal integrity that the court should require for this purpose.

(b) *The Litigation Plan*

158 The litigation plan, as now proposed, is quite comprehensive. As well as the cooperative arrangements between plaintiffs' counsel and those in the other provinces - and the facilities in place for communicating with class members - it deals with the various stages of the proceeding before and after certification. It was, however, criticised by defendants' counsel on the ground that it does not make adequate provision for procedures required to permit the defendants to protect their substantive rights and meaningfully contest individual issues of causation and damages.

159 Consistently with their general approach, the criticisms of defendant's counsel were not understated. Ignoring their earlier submission that the putative class is grossly over-inclusive, they ridiculed the notion that it would be necessary to hold 28,443 individual trials at which the defendants would be able to fairly and fully defend on issues of causation and damages. For the reasons I have given, the totality of the evidence - including that provided by the defendants - indicates that nothing like that number of individual trials is likely to be necessary. It is, I believe, quite likely that it will become possible to reduce the size of the class and, depending upon the decisions made at the trial of common issues, it may well be that many - and quite possibly most - of the claims asserted will not require trials of any length, or at all. The proposed plan contemplates that different procedures may be required according to the nature and severity of the damages claimed. Section 25 of the CPA gives a trial judge ample discretion to do this.

160 The uncertainty in this regard and the fact that it is for the trial judge to devise the procedures for the resolution of individual issues makes it unreasonable to require the plaintiffs to set out in their litigation plan all steps that that may conceivably be required to be taken. The principal purposes of a "workable" litigation plan are to assist in the determination of the preferable procedure and to demonstrate that manageable methods of conducting the litigation are feasible: *Carom v. Bre-X Minerals Ltd.* (1999), 44 O.R. (3d) 173 (Ont. S.C.J.), at p. 203. The purpose is not to bind the plaintiffs or the defendants to any particular procedure.

161 The defendants are, of course, correct in insisting that their rights must be protected in the determination of individual issues. They will be entitled to make submissions to the trial judge on the manner in which this will be done. The proposed litigation plan provides for their participation in the resolution of issues of causation and I do not believe it is necessary to go further at this stage and to speculate, for example, about the rights and limits to pre-trial discoveries on individual issues. It is, in my opinion, sufficient that the proposed plan can accommodate reasonable measures that will permit the resolution of the individual issues in a manner that would be fair as between the parties.

162 The amount of detail to be provided in a proposed litigation plan will vary according to the circumstances of each case. While a mere list of steps to be taken will not be acceptable, and workable methods for resolving individual issues must be

provided, the uncertainty that attaches in this case to the number and the nature of the individual claims that will be made would make it unduly speculative to require the plaintiffs to provide more detail. In this respect, the plan is no less comprehensive than that approved in *Peter* and *LeFrancois*. As with the class definition, further light may be shed on the adequacy of the litigation plan as a blueprint as the case proceeds towards trial. To the extent that they will be relying on it as a guide, the parties may find it necessary, or useful, to amend it from time to time under the supervision of the case-management judge.

## Conclusion

163 The requirements for certification are, in my judgment, satisfied. There will be an order accordingly.

164 If the parties are unable to agree upon costs, the plaintiffs' submissions may be made within 14 days of the release of these reasons, and the defendants will have a further 10 days in which to respond.

s. 5(1) — referred to

MOTION by defendants for leave to appeal judgment reported at *Lambert v. Guidant Corp.* (2009), 2009 CarswellOnt 2535, 72 C.P.C. (6th) 120 (Ont. S.C.J.), certifying action as class proceeding.

**Jennings J.:**

1 The appellants seek leave to appeal the decision of Cullity J. dated May 8, 2009, certifying this action as a class proceeding.

2 I was told this action is the third of a trilogy of cases seeking damages as a result of allegedly defective heart devices. The two other actions have recently been certified in this province, being *Peter v. Medtronic Inc.* and *LeFrancois v. Guidant Corp.* Leave to appeal the certification orders to the Divisional Court was denied in both cases.

3 The certification application took seven days to hear. The opening paragraph of Cullity J.'s carefully reasoned thirty page decision is instructive:

The hearing of the motion to certify this proceeding under the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 was of unusual length due to the elaborateness and comprehensiveness of the attack launched by the defendants on the plaintiffs' case for certification and the attempted use of evidence for this purpose. Most of the evidence had a direct bearing on the merits of the claims asserted by the plaintiffs on behalf of the class they seek to represent and, although defendants' counsel went to some pains to relate it to the requirements for certification, its relevance and weight for this purpose were very much in issue.

4 I deny leave to appeal for the following reasons.

5 Before me, the main thrust of the moving parties' forceful argument was that Cullity J. misconstrued the "some basis in fact" standard applicable to the statutory requirements for certification, as established by the Supreme Court of Canada in *Hollick v. Metropolitan Toronto (Municipality)* [2001 CarswellOnt 3577 (S.C.C.)], so as to effectively prevent the moving party from leading evidence to challenge that the requirements for certification had been met.

6 My review of the reasons of Cullity J. must be in the context of numerous directions from the Court of Appeal that deference is owed to those experienced judges hearing certification applications in this province. The cases have been helpfully and recently gathered in the decisions of Ferrier J. in *LeFrancois v. Guidant Corp.*, [2009] O.J. No. 36 (Ont. Div. Ct.) and Carnwath J. in *Peter v. Medtronic Inc.*, [2008] O.J. No. 1916 (Ont. Div. Ct.).

7 Mr. Campion quite properly acknowledged the considerable expertise in these matters possessed by Cullity J.

8 The evidentiary principles to be applied on a certification motion have been clearly established. The plaintiff must establish "some basis in fact" for the certification and must file evidence in support of his or her position. It is for the motions judge to determine what evidence is necessary to permit the determination of the requirements for certification as opposed to evidence directly relevant to the merits of the claim.

9 In paragraphs 25 through 55 of his reasons, Cullity J. reviewed in considerable detail the evidence led by each party. Some of it he accepted and some of it he did not. He was entitled to do that. He was alive to and fully discussed the tension between admissible evidence relevant to certification requirements and inadmissible evidence going to the merits. In weighing the evidence, Cullity J. was clearly guided by the law established in *Hollick* to which he made frequent reference.

10 The moving party submitted that the class definition was overly inclusive. Cullity J. was alive to that concern, (see reasons for judgment paragraphs 94-118) and I have no reason to doubt his conclusion that the class definition was not "*unnecessarily* overly inclusive" (emphasis in judgment). He correctly concluded his analysis with the observation that the definition of the class may be amended following productions and examinations for discovery.

11 In my opinion what was really driving this motion for leave was counsel's concern that courts dealing with certification applications have interpreted s.5(1) of the CPA so as to make any meaningful opposition to certification virtually impossible. I am aware that amongst the members of the class action bar, counsel's view is not unique. If I am correct I observe that any perceived imperfections in the certification process must be resolved by the Legislature. The judges must work with the legislation that presently exists.

12 Further, I agree with Cullity J.'s observations on this issue as set out by him in the following paragraphs of his reasons:

66. A recurring theme in the defendants' submissions was the prevailing approach to certification in this jurisdiction has departed from the legislative intention embodied in section 5(1) of the CPA. I was told that, rather than acting as a gatekeeper, the courts have been holding the gate open and have "stumbled into a black hole".

67. It was repeatedly submitted by defendants' counsel that decisions certifying proceedings must have an "air of reality". To the extent that this means that the statutory requirements must be read and applied in the light of the purposes and objectives of the legislation, it is a truism. To the extent, however, that references to an air of reality are intended to introduce a preliminary merits test - disguised or otherwise - they are inconsistent with the analysis in *Hollick* and the significance that McLachlin C.J. attributed to the rejection of the view of the Ontario Law Reform Commission. In its report released 1982, the Commission was firmly of the opinion that a plaintiff seeking certification should have the burden of establishing that the claims advanced have "substantive adequacy" and apparent validity. In the unanimous opinion of the members of the commission, this would be required in order to eliminate the potential use of the class action procedure to blackmail defendants into agreeing to settle unmeritorious claims. The possibility that such claims could be excluded by a requirement that the pleading disclosed a cause of action was categorically rejected.

68. (in part) The legislative history was relied on in *Hollick* as justifying the very weak evidential burden of "some basis in fact" that was held to apply to each of the statutory requirements for certification, other than that relating to the disclosure of a cause of action. It must, I believe, follow logically that, although a defendant would be entitled to deliver affidavit evidence in rebuttal, the standard of proof is inversely heavy. It is not enough for the defendant to establish on a balance of probabilities that facts that bear on the existence of "colourable" claims differ from those asserted by the plaintiff - the onus must be to demonstrate that there is no basis in the evidence for the latter. ...

69. I am also concerned with whether the statutory requirements are adequate to exclude the kind of legalised blackmail that was contemplated by the Law Reform Commission. The analysis in *Hollick* must be applied and the plaintiff must not be subjected to any more stringent an evidential burden than that affirmed by the Chief Justice. I believe it follows, also, that in determining the weight to be given to the evidence in rebuttal filed by the defendants, I must take into account that it is not the function of the court at this preliminary stage of the proceedings to decide factual issues - and, for such purpose, to weigh, and draw inferences from, the evidence - in the same manner, and to the same extent, as when the court exercises its function as a trier of fact in the exercise of its ordinary jurisdiction.

70. Most fundamentally, the purpose of the certification stage of a class proceedings is to determine whether the requirements in section 5(1) of the CPA are satisfied and, if so, to define the issues to be tried. It would be a reversal of the process to permit certification to be determined by deciding issues that are likely to be front and centre at a trial.

13 The ground of conflicting decisions was not aggressively pursued before me. The cases relied upon by the moving party were fact driven and do not establish a conflict.

14 To conclude in Cullity J.'s very full reasons he made factual findings to which deference is owed and he correctly applied established principles of law dealing with the certification of class actions.

15 I have no reason to doubt the correctness of his decision. There are no conflicting decisions.

16 The motion is dismissed with costs payable to the responding parties fixed at \$15,000, as agreed by counsel at the hearing.

*Motion dismissed.*

APPEAL from a decision reported at *Lavender v. Miller Bernstein* (2017), 2017 ONSC 3958, 2017 CarswellOnt 10841 (Ont. S.C.J.) granting partial summary judgment to class plaintiff.

**Gloria Epstein J.A.:**

**A. OVERVIEW**

1 Buckingham Securities ("Buckingham") is a now defunct securities dealer. In 2001, the Ontario Securities Commission (the "OSC") suspended Buckingham's registration and an order was made placing it into receivership because it breached regulatory requirements by failing to segregate investor assets and maintain a minimum level of net free capital. Its clients, who held investment accounts with the firm, lost millions.

2 The respondent, Barry Lavender, commenced a class action in 2005 on behalf of every person who had an investment account with Buckingham when Buckingham was placed into receivership (the "Class"). Mr. Lavender alleged that in each of fiscal years 1998 to 2000, Buckingham's auditor, the appellant, Miller Bernstein LLP (the "Auditor"), negligently audited an annual registration renewal requirement filed with the OSC that confirmed compliance with segregation and minimum capital requirements: *General, R.R.O. 1990*, Reg. 1015, s. 142 (under the *Securities Act, R.S.O. 1990*, c. S.5); see also ss. 107, 117, 118 and Form 9, known as Form 9 Reports. Buckingham's Form 9 Reports falsely stated that Buckingham was in compliance with the regulatory segregation and minimum capital requirements.

3 The motion judge agreed with the Class, holding that the Auditor owed the class members a duty of care in conducting the audit and that the Auditor fell below the requisite standard of care. He granted summary judgment in favour of the Class.

4 The Auditor appeals. For the reasons that follow I would allow the appeal. In my view, the Auditor did not owe the class members a duty of care and the motion judge erred in so holding.

**B. BACKGROUND FACTS**

5 Under the statutory regime that existed at the relevant time, which has since been repealed, the Form 9 Report had to be audited each year in accordance with generally accepted auditing standards and audit requirements published by the OSC: *General*, s. 144. The Auditor audited Buckingham's Form 9 Reports for the years 1998, 1999 and 2000, and signed the audit reports contained in them. After the Auditor audited the Form 9 Reports, Buckingham filed the reports with the OSC. No class member ever obtained or reviewed any of the Form 9 Reports through this process or otherwise.

6 In 2004, the OSC initiated proceedings against Buckingham and certain of its principals, including Howard Kornblum, the partner at Miller Bernstein who oversaw the audit. Buckingham and several of its principals later admitted to the OSC that, in breach of regulatory requirements, they made materially untrue statements in the 1999 and 2000 Form 9 Reports filed with the OSC.

7 The Class asserts that by negligently performing its assurance audit by failing to properly review and confirm the accuracy of Buckingham's Form 9 Reports, the Auditor breached the duty of care that it owed to the Class, as clients of Buckingham, causing more than \$10 million in losses.

8 In 2010, the parties consented to certification of the class proceeding. The certification settlement agreement, as codified in a July 20, 2010 order of Cullity J., provided that the class members include those Buckingham clients who maintained accounts at Buckingham on July 6, 2001 — the date on which the OSC suspended Buckingham's operations. As part of the settlement, the parties agreed to certification on six common issues and to the Class's abandoning its claims in negligent and reckless misrepresentation. In the certification order, the following common issues were certified:

- i. Did the *Securities Act* and the regulations thereunder (the "OSA") require Buckingham to segregate the cash and securities of its clients from its own cash and securities?
- ii. Did Buckingham fail to segregate its clients' cash and securities in violation of the OSA and, if so, when did Buckingham fail to do so?
- iii. Did the Auditor owe a duty of care to the Class and/or one or more of the sub-classes and what is the nature and extent of that duty?
- iv. If the answer to (iii) is yes, did the Auditor breach that duty of care to the Class and/or one or more of the sub-classes, either negligently or recklessly?
- v. If the answer to (iv) is yes, was the Auditor's breach of that duty a cause of damages to all of the Class and/or all of one or more of the sub-classes?
  1. If the answer to (v) is yes, can such damages be determined on a class wide basis in respect of the Class and/or one or more of the sub-classes?
  2. If the answer to (v)(1) is yes, how should the damages to be payable by the Auditor be calculated?
- vi. Does Ontario law recognize a tort of knowing assistance of breach of contract and, if so, what are the elements of that tort?
  1. If the answer to (vi) is yes, have the elements of that tort been met by all of the Class and/or all of one or more of the sub-classes?

9 In 2016, the Class moved for summary judgment on the first five of the six common issues. The motion judge granted summary judgment in favour of the Class on the certified common issues relevant to liability.

## C. THE SUMMARY JUDGMENT DECISION

10 The motion judge noted that there was no real dispute over the first two issues: Buckingham was required to segregate and hold in trust the cash and securities of the Class members on a client-by-client basis at all times, and it failed to do so.

11 The motion judge identified the third issue — the question of whether the Auditor owed the Class a duty of care — as "the core question" at issue on the motion: at para. 11. This issue is also the crux of this appeal.

12 The motion judge began his duty of care analysis by noting the Class's claim was properly characterized as one for negligence *simpliciter*, not negligent misrepresentation. He acknowledged that this was "obviously not a conventional negligence case", but, relying, *inter alia*, on this court's authority in *Lipson v. Cassels Brock & Blackwell LLP*, 2013 ONCA 165, 114 O.R. (3d) 481 (Ont. C.A.), he noted that on certain facts it is possible for a plaintiff in a negligent misstatement case to proceed against a defendant on the basis of a simple negligence claim: at para. 16. He explained, at para. 15, why the claim was properly one for negligence *simpliciter*:

Here as well, the plaintiff's negligence claim is based on the allegation that class members sustained losses which, but for the defendant's false audit of the Form 9s, would not have been sustained. If the defendant had filed accurate Form 9s documenting the regulatory breaches (or had not filed at all) the OSC, on the evidence, would in all likelihood have intervened before all the assets and monies were lost. In short, I am satisfied that on these facts and in principle that the negligence claim is appropriate.

13 Turning to whether a duty of care arose in this context, the motion judge noted, at para. 16, that it was not sufficient for the Class to say that the case fit within the negligent performance of a service "category" in which courts have recognized duties of care in certain third party benefit situations. He pointed out that the categories which have developed to govern recovery in tort for pure economic loss are merely analytical tools. The relationship between the Class and the Auditor was not one that had been previously recognized as giving rise to a duty of care and the two-stage analysis set out in *Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.) and *Cooper v. Hobart*, 2001 SCC 79, [2001] 3 S.C.R. 537 (S.C.C.), had to be undertaken.

14 As outlined in more detail below, the first stage of the *Anns/Cooper* analysis asks whether the facts disclose a sufficient level of foreseeability and proximity to establish a *prima facie* duty of care. The motion judge found, relying on *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.), that the foreseeability and proximity requirements were satisfied in this case. Even though the Class members never saw or even knew at the time about the Form 9 Reports, the Auditor "as a matter of simple justice" had an obligation to be mindful of their interests when auditing and filing the Reports: at para.

19.<sup>1</sup> More specifically, the motion judge reasoned, at para. 21, as follows:

My analysis is based on the auditing standards applicable at the time and the evidence and admissions of the parties and their experts. The defendant understood that the Form 9s were used by the OSC to police the securities dealers and protect their investors. If the Form 9s indicated a breach of the segregation or minimum capital requirements, the OSC would intervene. If the defendant was negligent in its audit and filed false Form 9s, causing the OSC to believe that the securities dealer was in compliance with the regulatory requirements when the truth was otherwise, monies invested by clients of the securities dealer could well be lost. In short, the defendant (and in particular Mr. Kornblum) well understood the consequences to "its client's clients" if the segregation or capital deficiency information was misstated in the Form 9s - that a negligent audit of these Form 9s could expose the class members to the very loss that they incurred.

15 The motion judge further concluded that the relationship was of sufficient closeness to ground foreseeability. Here, the Auditor was retained to audit and file the Form 9 Reports, had access to the individual names and investor accounts of every Class member, knew the exact amounts involved, and even corresponded with some of the Class members to verify that Buckingham's internal client account records were complete and accurate. Even if the Class members knew nothing about the Form 9 Reports, they would reasonably expect Buckingham and its auditor to provide any information required under provincial law accurately and honestly, particularly if that information could affect their financial interests.

16 The motion judge was therefore satisfied that the Class had established a *prima facie* duty of care under the first stage of the *Anns/Cooper* analysis.

17 He was similarly satisfied that policy concerns did not negate imposing liability. More specifically, the second stage of the *Anns/Cooper* analysis asks whether there are residual policy considerations that would justify denying liability in tort even though a *prima facie* duty of care has been established.

18 In this case, the motion judge noted that policy concerns are especially important in claims for pure economic loss, particularly given the spectre of indeterminate or unlimited liability. In his view, however, case law was clear that indeterminate liability was not a concern when an auditor knows the identity of the plaintiff (or a class of plaintiffs) and when the auditor's statements are used for the specific purpose for which they were made.

19 Here, the motion judge was satisfied that the Auditor both knew the Class members' identities and that the Form 9 Reports "were used for the very purpose for which they were prepared — to be relied on by the OSC in protecting investor (class member) assets": at para. 29. The Auditor knew the names of each of Buckingham's clients at the time of its audits and was required to stay informed of any major changes to Buckingham's business between audits. Moreover, its potential liability was narrowly circumscribed since it knew its precise potential liability (the sum of all customer accounts) at the time of each audit. As a result, the motion judge concluded, at para. 39, that "[u]nder the *Anns-Cooper* analysis . . . the defendant owed a duty of care to the class to conduct an audit of Buckingham's Form 9 reports with the skill and care of a competent practitioner".

20 After reaching this central conclusion, the motion judge went on to hold that the Auditor breached the duty of care it owed to the Class. The Auditor signed audit reports addressed to the OSC for fiscal years 1998, 1999 and 2000, falsely stating that it had examined the Form 9 Reports in accordance with auditing standards. It admitted that it breached its duty of care in the 1999 and 2000 Form 9 audits and there was uncontested evidence that it also breached its duty with respect to the 1998 Form 9 audit.

21 On the fifth issue, damages, the motion judge held that it was not possible at that time to determine damages on a Class-wide basis. He noted that the Class had indicated it may bring a follow-up motion based on a "corrected spreadsheet" prepared by the Receiver to determine the issue of damages at a later time.

22 On the basis of this analysis, the motion judge answered the questions, with the exception of the question of damages, in favour of the Class, and granted summary judgment.

## D. ISSUE

23 In my view, the central issue on appeal is whether the Auditor owed the Class a duty of care in relation to its audit of the Form 9s. For the reasons outlined below, I conclude that it did not. In light of this conclusion, it is not necessary to consider any of the other issues raised on appeal; I would allow the appeal and dismiss the Class's claim.

## E. ANALYSIS

### (1) The Duty of Care Analysis after *Livent*

24 In the Supreme Court's recent decision in *Deloitte & Touche v. Livent Inc. (Receiver of)* [2017 CarswellOnt 20138 (S.C.C.)], the court applied and refined the *Anns/Cooper* framework to define the duty of care owed by an auditor. Its analysis sets the conceptual table for my determination of whether the Auditor owed the Class a duty of care in this case. Below I consider and describe the *Anns/Cooper* framework, with particular attention paid to the Supreme Court's recent refinements in *Livent*.

25 In order to understand the application of *Livent* to this appeal, it is helpful to briefly restate the facts of that case. The *Livent* appeal arose out of the receivership of a theatre company, Livent Inc. ("Livent"), whose principals were fraudulently manipulating the company's financial records in order to attract investment. Its auditor, Deloitte & Touche ("Deloitte"), never uncovered the fraud, but did identify irregularities in the reporting of an asset sale in 1997. Nevertheless, Deloitte did not resign and instead assisted Livent in soliciting investment by providing a comfort letter and helping to prepare and approve a press

release that misrepresented the basis for the reporting of Livent's profit from the fraudulent sale. It also prepared Livent's 1997 audit, finalized in 1998 after Deloitte's discovery of the reporting irregularities. When the fraud was subsequently uncovered by new equity investors, Livent filed for insolvency protection and was placed into receivership.

26 Livent, through its receiver, sued Deloitte for damages in negligence and breach of contract. The trial judge concluded that Deloitte owed Livent a duty of care and fell below the standard of care on two occasions: (i) its provision of the comfort letter and approval of the press release containing misrepresentations in order to help Livent solicit further investment; and (ii) its completion of Livent's 1997 statutory audit.

27 This court dismissed the appeal. Deloitte appealed to the Supreme Court. The principal issue before the Supreme Court was the nature and scope of the duty of care owed by Deloitte with respect to those two separate negligent acts. The appeal was allowed, in part.

28 Applying the *Anns/Cooper* framework, Gascon and Brown JJ., for the majority, concluded that Deloitte owed Livent a duty of care in relation to its 1997 statutory audit, but not in relation to its representations concerning the solicitation of investment. Livent asserted that it detrimentally relied on Deloitte in each of these events, which impaired its ability to oversee its operations. The court, however, drew a distinction between the two events. Because the comfort letter and press release were prepared in order to solicit investment and not to assist shareholders with management oversight, Livent could not reasonably rely on those documents to oversee management. By contrast, the majority concluded that Deloitte owed a duty of care to Livent in relation to the statutory audit because the audit was prepared for the precise purpose of scrutinizing management conduct.

29 In reaching these conclusions, the Supreme Court refined and applied the two stages of the *Anns/Cooper* analysis. At the first stage, the court asks whether the facts establish a *prima facie* duty of care. The court then proceeds to the second stage, where it asks whether residual policy considerations justify denying liability in tort. I consider these two stages below.

#### (a) Stage One: *Prima Facie* Duty of Care

30 Most relevant for this appeal, the majority of the Supreme Court in *Livent*, at para. 20, reaffirmed that there is a *prima facie* duty of care where there exists a "sufficiently close relationship between the plaintiff and the defendant". This stage of the analysis involves establishing both reasonable foreseeability and proximity. The majority stressed that these elements are conceptually distinct and must be considered separately.

31 The majority in *Livent* reiterated the statement from *Cooper* that "foreseeability alone" is not enough to establish a *prima facie* duty of care; the first stage of the *Anns/Cooper* framework requires "something more". That "something more" is proximity. The majority observed, at para. 24, that it is useful to consider proximity before foreseeability in cases of negligent misrepresentation or negligent performance of a service because "[w]hat the defendant reasonably foresees as flowing from his or her negligence depends upon the characteristics of his or her relationship with the plaintiff, and specifically, in such cases, the purpose of the defendant's undertaking".

32 The proximity analysis determines whether the parties are sufficiently "close and direct" that it would be "just and fair having regard to their relationship to impose a duty of care": *Livent*, at para. 25, citing *Cooper*, at paras. 32 and 34. As most recently reaffirmed by the Supreme Court in *Rankin (Rankin's Garage & Sales) v. J.J., 2018 SCC 19* (S.C.C.), at para. 23, that close and direct relationship must be such that "the defendant is under an obligation to be mindful of the plaintiff's interests."

33 A preliminary question at this stage is whether the relationship at issue falls within a previously established category of relationship in which proximity has already been found to exist. If the relationship falls within a previously established category, or is analogous to one, then proximity is established, without more: *Livent*, at paras. 26-28. The majority in *Livent* cautioned, however, that courts must be careful to avoid identifying established categories "in an overly broad manner": at para. 28. As the majority noted, at para. 52, "the mere fact that proximity has been recognized as existing between an auditor and its client for *one* purpose is insufficient to conclude that proximity exists between the same parties for *all* purposes" (emphasis in original). Rather, the majority explained, at para. 28, that "a finding of proximity based upon a previously established or analogous

category must be grounded not merely upon the identity of the parties, but upon examination of the particular relationship at issue in each case."

34 Where an established proximate relationship cannot be found, courts must undertake a full proximity analysis by examining the relationship between the plaintiff and the defendant. Relevant considerations may include, but are not limited to, "expectations, representations, reliance, and the property or other interests involved" as well as any statutory obligations: *Livent*, at para. 29, citing *Cooper*, at paras. 34, 38.

35 In cases of pure economic loss arising from negligent misrepresentation or performance of a service, two factors are "determinative" of the proximity analysis: (i) the defendant's undertaking; and (ii) the plaintiff's reliance: *Livent*, at para. 30. Where the defendant undertakes to provide a representation or service in circumstances that invite the plaintiff's reasonable reliance, the defendant becomes obligated to take reasonable care, and the plaintiff has a right to rely on the defendant's undertaking to do so. These "corollary rights and obligations create a relationship of proximity": *Livent*, at para. 30.

36 However, the plaintiff's reliance must be within the scope of the defendant's undertaking — that is, the purpose for which the representation was made or the service was undertaken. Anything outside that scope will fall outside the scope of the proximate relationship and the defendant's duty of care; the defendant cannot be liable for a risk of injury against which it did not undertake to protect: *Livent*, at para. 31. Further, as the majority in *Livent* observed, at para. 31, "the proximity analysis not only determines the *existence* of a relationship of proximity, but also delineates the *scope* of the rights and duties which flow from that relationship" (emphasis in original).

37 Although the proximity and reasonable foreseeability stages are analytically distinct, they are nonetheless connected. In cases of negligent misrepresentation or performance of a service, *Livent* explains that the proximate relationship informs the foreseeability inquiry: at para. 34. A plaintiff's injury will be reasonably foreseeable in such cases where (1) the defendant should reasonably foresee that the plaintiff will rely on its representation; and (2) reliance would, in the particular circumstances of the case, be reasonable: *Livent*, at para. 35. This is also defined by the nature of the defendant's undertaking. The plaintiff may rely on the defendant to act with reasonable care for the particular purpose of the undertaking, but not for a purpose outside the scope of that undertaking.

#### (b) Stage Two: Residual Policy Considerations

38 Where a *prima facie* duty of care is recognized on the basis of proximity and reasonable foreseeability, the analysis advances to stage two of the *Anns/Cooper* framework. The court goes on to ask whether there are any "residual policy considerations" outside the relationship of the parties — that is, *despite* the proximate relationship between the parties and the reasonably foreseeable quality of the plaintiff's injury — that may negate the imposition of a duty of care: *Livent*, at paras. 37, 41.

39 The majority in *Livent* clarified, at para. 41, that the first stage of the *Anns/Cooper* framework does most of the analytical heavy lifting. Only in rare cases, such as those considering decisions of governmental policy or quasi-judicial bodies, will liability be denied on the basis of stage two. Residual policy considerations contemplate "the effect of recognizing a duty of care on other legal obligations, the legal system and society more generally": *Livent*, at para. 38, citing *Cooper*, at para. 37.

40 Accordingly, the *Livent* majority observed, at para. 42, that rarely, if ever, will a concern for indeterminate liability persist after a properly applied proximity and foreseeability analysis.

41 Applying this framework, the majority held that Deloitte owed *Livent* a duty of care in relation to the 1997 statutory audit, but not with respect to the comfort letter and press release.

### The Statutory Audit

42 The majority concluded that Deloitte's statutory audit fell within an established category of proximity, and that the type of injury *Livent* suffered as a result of the statutory audit was a reasonably foreseeable consequence of Deloitte's negligence.

43 Proximity was established based on a previously recognized category of proximate relationship. The court had already held in *Hercules Managements* that an auditor owes its corporate client a duty of care in the preparation of a statutory audit. It thus followed that, unless the purpose of Deloitte's undertaking to prepare the audit differed from the purpose underlying the audit in *Hercules Managements*, proximity was established. Finding it did not differ, the majority concluded Livent and Deloitte were in proximity in relation to the audit.

44 Reasonable foreseeability was also established. The majority agreed that Livent's losses were a reasonably foreseeable consequence of Deloitte's negligence, since the negligence allowed Livent to artificially extend its solvency. The majority found, at para. 64, that the purpose of the audit was to protect Livent from the consequences of undetected errors and wrongdoing, and to provide shareholders with reliable intelligence, enabling oversight. Livent's reliance on Deloitte for the purpose of overseeing the conduct of management was therefore both reasonable and reasonably foreseeable.

45 Since a proximate relationship based on a previously recognized category was found, the court noted that it need not consider whether residual policy considerations negated the duty of care.

### **The Comfort Letter and Press Release**

46 With respect to the comfort letter and press release, the majority found that proximity was established for the purpose of helping Livent to solicit investment, but that Livent's losses (which did not arise out of any inability to attract investment) did not fall within the scope of Deloitte's duty of care and were not a reasonably foreseeable consequence of Deloitte's assistance.

47 The majority first considered proximity. As the courts had not previously established a proximate relationship between an auditor and its client for the purposes of soliciting investment, it was necessary to conduct a full proximity analysis. Here, the majority held that Deloitte's provision of a comfort letter and ongoing assistance in relation to a press release were undertaken for the purpose of helping Livent to solicit investment and that Livent was therefore entitled to rely upon Deloitte to carry out these services with reasonable care.

48 However, the court held that Livent's losses were not a reasonably foreseeable consequence of Deloitte's assistance in the solicitation of investment. In drafting the comfort letter and helping with the press release, Deloitte undertook only to assist Livent with soliciting investment; it did not undertake to assist Livent's shareholders in overseeing management. Accordingly, Deloitte could not be held liable for failing to take reasonable care to assist such oversight. Livent had no right to rely on Deloitte's representations for that purpose, and its reliance was neither reasonable nor reasonably foreseeable.

49 Having concluded that no *prima facie* duty of care arose, the court did not go on to consider residual policy considerations with regard to the press release and comfort letter that were prepared for Livent's solicitation of investment.

### **(2) The Parties' Submissions on the Duty of Care and Livent's Impact on this Appeal**

50 The parties filed supplementary factums addressing the application of *Livent* to the appeal. Both parties agree that the analysis from *Livent* is highly relevant to the outcome of this appeal and that the key theme from the Supreme Court's decision is the necessity of ascertaining the scope of an auditor's undertaking when conducting a duty of care analysis. They agree that the Auditor's undertaking here is central to determining whether proximity and reasonable foreseeability are established. They disagree, however, on the proper characterization of that undertaking in the circumstances.

#### *(a) The Auditor's Position*

51 The Auditor argues the motion judge's decision is inconsistent with the principles articulated in *Livent*. This is based on two "refinements" to the *Anns/Cooper* analysis from *Livent*: (i) the clear distinction drawn between foreseeability and proximity; and (ii) a greater emphasis placed on a more demanding first stage of the *Anns/Cooper* test.

52 In the light of these refinements, the Auditor argues the motion judge conflated reasonable foreseeability and proximity and failed to properly engage in the proximity analysis. The Auditor argues that on the facts of this case, reliance is required to establish proximity. Absent reliance, the relationship between the Class and the Auditor cannot meet this threshold.

53 The Auditor submits that *Livent* emphasizes the importance of properly ascertaining the scope of a defendant's undertaking — a defendant cannot be liable for an injury in relation to which it did not take responsibility. Here, the Auditor undertook to audit Buckingham's Form 9 Reports, which were to be *confidentially* submitted by Buckingham to the OSC *only*. The scope of the Auditor's undertaking extended only to Buckingham or, at the furthest, to the OSC. The Auditor did not undertake responsibility to assist the Class in supervising the management of Buckingham, or in selecting or retaining a securities dealer. No representations were made to the Class, there was no reliance by the Class, and the Class could not have had any expectations of the Auditors.

54 On the reasonable foreseeability analysis, the Auditor emphasizes *Livent*'s focus on the nature of the plaintiff's reasonable reliance. In this case, there was no reliance — neither the representative plaintiff nor any member of the Class saw the Form 9 Reports or even knew of their existence. In any event, the Class did not have the right to rely on the Auditor for something outside the scope of the Auditor's specific undertaking.

55 On the second branch of the *Anns/Cooper* test, the Auditor argues that indeterminate liability concerns in these circumstances must negate any duty of care, despite the Supreme Court's observing in *Livent* that only in rare cases will liability be negated solely because of residual policy considerations.

(b) *The Class's Position*

56 The Class agrees that *Livent* provides the applicable framework for the proximity analysis in this case, subject to necessary modifications to account for a different method of causation since this is not a negligent misrepresentation case. It also agrees that the proximity analysis from *Livent* focuses on the nature of the defendant's undertaking. However, the Class argues that the Auditor mischaracterizes its undertaking in a manner that is inconsistent with the record. It argues that the Auditor undertook to protect the Class against the *very* harm that occurred: specifically, the Class asserts that the Auditor undertook to provide accurate information as part of its Form 9 audits so that the OSC would use that information to protect investors.

57 To support this assertion, the Class points to the following aspects of the record, *inter alia*:

- Mr. Kornblum's admissions that: (i) the OSC used the Form 9 Reports to "facilitate the identification of circumstances when an entity was not in compliance with the *Securities Act* and Regulations"; (ii) he knew the Form 9 Reports would be sent to the OSC; (iii) the reason the OSC wanted the Form 9 Reports to be audited was to provide "comfort" that the numbers were accurate; and (iv) the OSC was relying on the Auditor to achieve that level of comfort.
- The Auditor's regulatory expert admitted that the OSC reviewed the Form 9 Reports as part of its investor protection mandate and that the reports were a "key part of the rules around licensing" which "had an underlying goal of protection of investors".
- Auditing standards required the Auditor to understand that the OSC would use the Form 9 Reports to execute its investor protection function, and that negligence in its audit of the segregation or capital requirements could cause the precise loss that the Class suffered.
- The motion judge found as a fact at para. 21 of his reasons, as outlined above, that "[the Auditor] understood that the Form 9s were used by the OSC to police the securities dealers and protect their investors. If the Form 9s indicated a breach of the segregation or minimum capital requirements, the OSC would intervene. If [the Auditor] was negligent in its audit and filed false Form 9s, causing the OSC to believe that the securities dealer was in compliance with the regulatory requirements when the truth was otherwise, monies invested by clients of the securities dealer could well be lost."

58 The Class also argues that the harm that occurred was reasonably foreseeable. The Form 9 Report was a "special report on compliance"; its purpose was to provide accurate information to the OSC so the OSC could protect Class member assets. The Auditor's negligent audit impaired the OSC's investor protection function and exposed the Class members to the specific foreseeable risk against which the Auditor undertook to protect.

**(3) Application: The Duty of Care Analysis**

**(a) Stage One: Is There a Prima Facie Duty of Care?**

**(i) Proximity**

59 I agree with the Auditor that the motion judge, who, as I previously indicated, did not have the benefit of the *Livent* decision, conflated the questions of proximity and foreseeability and that he did not conduct a proper proximity analysis in this case. This is a legal error. Conducting such an analysis, and in light of the Supreme Court's refinements of the *Anns/Cooper* test in *Livent*, in my view, the Class's claim fails on the first branch of that test and this court can intervene: see *Housen v. Nikolaisen*, 2002 SCC 33, [2002] 2 S.C.R. 245 (S.C.C.), at para. 36. I do not believe that proximity is established between the Auditor and the Class in relation to the Form 9 Reports. As I explain below, the parties are *not* in "such a 'close and direct' relationship that it would be 'just and fair having regard to that relationship to impose a duty of care in law)": *Livent*, at para. 25.

***The relationship does not fit within a previously established category of proximity***

60 I begin by observing that the relationship between the Auditor and the Class does not fall within a previously established or analogous category of relationship where proximity has already been found. The Class has not identified any case in which a duty of care has been recognized between an auditor and a company's investor account holders for purposes of auditing the company's Form 9 Reports or through a similar component of the securities statutory regime. Accordingly, this court must undertake a full proximity analysis to determine whether there is a sufficiently "close and direct" relationship to ground a duty of care: *Livent*, at para. 29.

***No relationship of proximity is established in the circumstances***

61 In conducting the proximity inquiry courts must examine all relevant factors arising from the relationship between the parties. The relevant factors vary depending on the circumstances of the case. They may include reliance, expectations, representations, property or other interests, and statutory obligations: *Livent*, at para. 29, citing, *inter alia*, *Cooper*, at paras. 35 and 38; *Odhavji Estate v. Woodhouse*, 2003 SCC 69, [2003] 3 S.C.R. 263 (S.C.C.), at paras. 50 and 56; *Followka v. Royal Oak Ventures Inc.*, 2010 SCC 5, [2010] 1 S.C.R. 132 (S.C.C.), at para. 26; *Edwards v. Law Society of Upper Canada*, 2001 SCC 80, [2001] 3 S.C.R. 562 (S.C.C.), at paras. 9 and 13. In cases of pure economic loss arising from negligent misrepresentation or performance of a service, the defendant's undertaking and the plaintiff's reliance are determinative: *Livent*, at para. 30.

62 The absence of a personal relationship between the parties, while "not necessarily determinative", is nonetheless an "important factor to consider": *Hill v. Hamilton-Wentworth (Regional Municipality) Police Services Board*, 2007 SCC 41, [2007] 3 S.C.R. 129 (S.C.C.), at para. 30; *Cavanaugh v. Grenville Christian College*, 2013 ONCA 139, 304 O.A.C. 163 (Ont. C.A.), at paras. 75-77. The court will inquire into whether the defendant's actions have a close or direct effect on the plaintiff, "such that the [defendant] ought to have had the [plaintiff] in mind as a person potentially harmed": *Hill*, at para. 29. As the Supreme Court explained in *Hercules Managements*, at para. 24, the plaintiff must establish "that the circumstances of the relationship inhering between the plaintiff and the defendant are of such a nature that the defendant may be said to be under an obligation to be mindful of the plaintiff's legitimate interests in conducting his or her affairs."

63 Here, the motion judge anchored his finding of proximity on the correspondence between some of the Class members and the Auditor as well as his conclusion that the Class members would reasonably expect the Auditor and Buckingham to provide accurate information to the OSC:

In my view, on the particular facts herein, a relationship of sufficient closeness has been established. The defendant was retained by Buckingham to audit and file the Form 9s. In doing this "assurance audit" for its client, the defendant had access to the individual names and investor accounts of every class member. The defendant knew the exact amounts involved, and even corresponded with some of the class members to verify that Buckingham's internal client account records were complete and accurate. Some of the class members responded to the auditor's letter and alerted the defendant to serious discrepancies between Buckingham's internal account records and the actual holdings and activity within their accounts. The defendant also knew, without being told, that even if the class members knew nothing about the Form 9s, they would reasonably expect Buckingham and its auditor to provide any information required under provincial law accurately and honestly, particularly if that information could affect their financial interests. [at para. 23]

64 With respect, I am of the view that the motion judge's finding that a relationship of proximity existed is unsupportable on the evidence. Simply put, it stretches proximity beyond its permissible bounds. I say this for the following reasons.

65 First, the primary reason I believe proximity has not been established turns on the nature of the Auditor's undertaking and the connection between that undertaking and the loss claimed. Buckingham retained the Auditor to audit its Form 9 Reports, which Buckingham then filed confidentially with the OSC. Although the motion judge observed that the Form 9 Reports were used by the OSC to police securities dealers and that their purpose was to protect investor assets, it does not necessarily follow that the audit of the Form 9 Reports creates proximity between an auditor and those investors. The Auditor made no representations to members of the Class, most of whom never even knew of the Auditor's existence or its involvement with Buckingham. The Auditor did not undertake to assist the Class in making investment decisions. The limited scope of the Auditor's undertaking and lack of direct connection between the Auditor and the Class militate against finding proximity in this case.

66 In my view, the interposition of the OSC and Buckingham between the Auditors and the Class rendered the relationship between the parties too remote to ground a duty of care. The Auditor may well have owed a duty of care to Buckingham to properly conduct the audit. Perhaps an argument could be made that a duty was also owed to the OSC (which provided regulatory oversight and received the audit reports). This, however, is an issue I need not determine. In this case, the Auditor's undertaking did not extend to assisting the Class members — who, as mentioned earlier and as the motion judge noted, never saw the Form 9 Reports and did not even know of their existence — with supervising Buckingham and making investment decisions. As a result, I am of the view that the Auditor's undertaking in this case strongly militates against a finding of proximity.

67 A second related consideration weighing against holding that the Auditor and Class were in a proximate relationship for the purpose of the Form 9 Reports is the absence of *any* reliance, whether intended or not. Indeed, the Class conceded that the members did not rely on or review any of the Form 9 Reports. As I have indicated, the Form 9 Reports were held confidentially by the OSC. They were not shared with the Class and not intended to inform or induce the Class in making investment decisions. The absence of the class members' reliance on the Form 9 Reports further supports my view there is no proximity between the Auditor and the Class in relation to the Reports.

68 The third reason that informs my conclusion that the motion judge erred in finding proximity is because, with respect, I am of the view that his analysis is based, in part, on factual findings that amount to palpable and overriding errors.

69 First, the motion judge found that the Auditor, and not Buckingham, filed the Form 9 Reports with the OSC. This is incorrect. Although the Auditor audited the Form 9 Reports, the obligation to file the Form 9 Reports rested with Buckingham. Second, the motion judge found that the Auditor had access to the names and accounts of every member of the Class. Again, this is incorrect. The record demonstrates that Buckingham's clients and their accounts changed regularly and the Auditor was not engaged to perform a continuous audit.

70 In my view, both of these palpable and overriding errors further distance the Auditor from the Class and undermine the motion judge's proximity analysis.

71 The fourth factor weighing against a finding of proximity in this case is the relevant statutory scheme. While the Class does not contend that the duty of care arises by the direct operation of any statute, the statutory scheme nonetheless provides

relevant context for assessing the sufficiency of proximity between parties: *Livent*, at para. 29. Here, the statutory scheme required Buckingham, as a securities dealer, to segregate investor assets and maintain a net free capital, and to file an audited Form 9 Report with the OSC that confirmed that it had met these obligations: *General*, Reg. 1015, ss. 107, 117-18, 142 and 144. In my view, it cannot be said that these provisions are sufficient to ground a relationship of proximity between a securities dealer's auditor and its account holders for the purpose of this case. While the Auditor was required to audit Buckingham's Form 9 Reports in accordance with generally accepted auditing standards and audit requirements published by the OSC, the statutory scheme did not create a proximate relationship between the Auditor and the Class for the purpose of their investment decisions in relation to forms that they never saw.

72 Finally, I am conscious of the Supreme Court's admonition that significant scrutiny is warranted when deciding whether to recognize a duty of care in a claim for pure economic loss: *Martel Building Ltd. v. R.*, 2000 SCC 60, [2000] 2 S.C.R. 860 (S.C.C.), at para. 35; *Knight v. Imperial Tobacco Canada Ltd.*, 2011 SCC 42, [2011] 3 S.C.R. 45 (S.C.C.), at para. 42. While there is no automatic bar to recovery for pure economic loss, such claims warrant more rigorous examination than other claims for negligence: *Martel Building Ltd.*, at para. 35; *Mandeville v. Manufacturers Life Insurance Co.*, 2014 ONCA 417, 120 O.R. (3d) 81 (Ont. C.A.), at paras. 148-50, leave to appeal refused [2014] S.C.C.A. No. 390 (S.C.C.). This consideration further weighs against finding proximity in this case.

73 In summary, I am of the view that the Class's claim fails at the proximity stage of the *Anns/Cooper* analysis. When properly scrutinized in the light of the *Livent* decision and other jurisprudence, the Class's claim cannot survive because there is no proximity between the Auditor and the Class in relation to the Form 9 Reports.

## **(ii) Reasonable Foreseeability**

74 Given my conclusion in relation to proximity, it is not necessary to consider whether any harm suffered was reasonably foreseeable. As *Livent* confirms, at para. 23, both reasonable foreseeability and proximity are required to establish a *prima facie* duty of care. In the absence of proximity, there is no *prima facie* duty of care.

### *(b) Stage Two: Do Any Residual Policy Concerns Negate the Duty of Care?*

75 In the light of my conclusion on stage one of the *Anns/Cooper* analysis, it is not necessary to consider the second stage of the *Anns/Cooper* analysis: *Livent*, at para. 57.

## **F. CONCLUSION**

76 As I have outlined above, I am of the view that the Class's claim fails due to a lack of proximity. I would not recognize a duty of care owed by the Auditor to the Class in these circumstances for these purposes. The motion judge erred in granting summary judgment in favour of the Class.

## **G. DISPOSITION**

77 For these reasons, I would allow the appeal, set aside the judgment below, and grant summary judgment to the Auditor, dismissing the Class's claim for negligence.

78 As to costs, failing agreement as to costs, I would ask the parties and the Law Foundation of Ontario to make submissions as to the costs before the motion judge and before this court, taking into account and providing any requisite notice pursuant to the provisions of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194, the *Class Proceedings Act*, 1992, S.O. 1992, c. 6, or any other relevant legislation.

### ***K. van Rensburg J.A.:***

I agree.

### ***David Brown J.A.:***

I agree.

*Appeal allowed and class action dismissed.*

Footnotes

- 1 On appeal, the Class concedes that it was an error for the motion judge to find that the Auditor filed the Form 9 Reports. The Auditor audited and signed the Form 9 Reports, but Buckingham, as the registrant, actually filed them with the OSC.

**V.2.b.i** Plaintiff's class proceeding

**V.2.b.i.D** Preferable procedure

**Headnote**

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiff brought action against H Corp. and two of its executives, C and B, for primary market misrepresentation pursuant to s. 130 of Securities Act and equivalent statutes in other provinces — H Corp. defendants consented to certification of statutory action against them as class proceeding — Abandoning statutory claim, plaintiff also claimed against C Inc. and D Ltd. ("underwriters") for negligent misrepresentation and for negligence simplicitor, i.e. for common law negligence — Plaintiff brought motion for certification of action as class proceeding — Motion granted in part; motion dismissed as against underwriters — Having regard to constituent elements of torts, elements of reliance, causation, and damages were matters that raised highly individual issues that had to be proven at individual issues trials — Inevitability of individual issues trials substantially diminished productivity of common issues trial and introduced significant concerns about manageability — Individual issues were not amenable to summary determinations under ss. 12 and 25 of Class Proceedings Act, 1992 — Cost/benefit analysis indicated that there was little benefit in subjecting individual claims to procedure of class action — Common issues of statutory claim against H Corp. defendants were not congruent with common issues of tort claims against underwriters — This increased problems of managing action with combined claims and decreased benefits of class action procedure.

MOTION by plaintiff for certification of action as class proceeding.

***Perell J.:***

## **A. Introduction**

1 Pursuant to the *Class Proceedings Act, 1992*,<sup>1</sup> LBP Holdings Ltd. sues Hycroft Mining Corporation and two of its executives, Scott A. Caldwell and Robert M. Buchan for primary market misrepresentation pursuant to s. 130 of Ontario's *Securities Act*<sup>2</sup> and equivalent *Securities Acts* in other provinces. The Hycroft defendants consent to certification of the statutory action against them as a class proceeding.

2 Abandoning a statutory claim, LBP Holdings also sues Cormark Securities Inc. and Dundee Securities Ltd., (the "Underwriters"), for negligent misrepresentation and for negligence *simpliciter*; *i.e.*, for common law negligence. The Underwriters resist certification of the tort claims. They submit that LBP Holdings' Statement of Claim does not disclose a reasonable cause of action in tort against them and, in any event, a class proceeding is not the preferable procedure for resolving the common issues. The Underwriters also submit that they are entitled, in any event, to costs arising from LBP Holdings' abandonment of the statutory claim against them.

3 For the reasons that follow, I certify the action as against the Hycroft Defendants and I dismiss the certification motion as against Cormark Securities and Dundee Securities.

## **B. Factual and Procedural Background**

### **1. The Bought Deal Distribution of Hycroft's Shares**

4 LBP Holdings is a Nova Scotia corporation. Lloyd B. Parker is its director, president and secretary. LBP Holdings was a shareholder in Hycroft.

5 Hycroft, formerly Allied Nevada Gold Corp., operates the Hycroft Gold Mine in Nevada, U.S.A. The mine is its source of revenue. Hycroft's shares trade on the New York ("NYSE") and Toronto ("TSX") stock exchanges.

6 Cormark Securities and Dundee Securities are underwriters. Under the Ontario *Securities Act*, an underwriter is defined in s. 1(1) as follows:

"underwriter" means a person or company who, as principal, agrees to purchase securities with a view to distribution or who, as agent, offers for sale or sells securities in connection with a distribution and includes a person or company who has a direct or indirect participation in any such distribution but does not include,

- (a) a person or company whose interest in the transaction is limited to receiving the usual and customary distributor's or seller's commission payable by an underwriter or issuer,
- (b) a mutual fund that, under the laws of the jurisdiction to which it is subject, accepts its shares or units for surrender and resells them,
- (c) a company that, under the laws of the jurisdiction to which it is subject, purchases its shares and resells them, or
- (d) a bank listed in Schedule I, II or III to the *Bank Act* (Canada) with respect to securities described in paragraph 1 of subsection 35(2) or to such banking transactions as are designated by the regulations

7 Where securities are distributed pursuant to a prospectus and there is an underwriter, s. 59(1) of the Ontario *Securities Act* requires that the prospectus include a certificate in the prescribed form from the underwriter(s). Section 59(1) states:

59(1) Subject to subsection 63(2), where there is an underwriter, a prospectus shall contain a certificate in the prescribed form, signed by the underwriter or underwriters who, with respect to the securities offered by the prospectus, are in a contractual relationship with the issuer or security holder whose securities are being offered by the prospectus.

8 The prescribed form requires the underwriters to certify that the prospectus contains full, true and plain disclosure to the best of their knowledge, information and belief.<sup>3</sup>

9 Underwriters are among the entities that are exposed to liability for misrepresentations in a prospectus pursuant to s. 130 of the Ontario *Securities Act*. Section 130 provides a purchaser of a security under a prospectus; *i.e.*, a purchaser in the primary market, with a remedy for misrepresentation. The statutory remedy is available against the issuer and the underwriters of the security as well as against the directors of the issuer and others who have signed the prospectus or have allowed their reports or statements to be used in the prospectus. The remedy is available regardless of whether the purchaser relied on the misrepresentation, which makes the statutory claim easier to prove than the common law claim for negligent misrepresentation, which has reasonable reliance as a constituent element. The statutory claim is also more amenable to certification as a class action. Section 130 states:

*Liability for misrepresentation in prospectus*

130. (1) Where a prospectus, together with any amendment to the prospectus, contains a misrepresentation, a purchaser who purchases a security offered by the prospectus during the period of distribution or during distribution to the public has, without regard to whether the purchaser relied on the misrepresentation, a right of action for damages against,

- (a) the issuer or a selling security holder on whose behalf the distribution is made;
- (b) each underwriter of the securities who is required to sign the certificate required by section 59;

- (c) every director of the issuer at the time the prospectus or the amendment to the prospectus was filed;
- (d) every person or company whose consent to disclosure of information in the prospectus has been filed pursuant to a requirement of the regulations but only with respect to reports, opinions or statements that have been made by them; and
- (e) every person or company who signed the prospectus or the amendment to the prospectus other than the persons or companies included in clauses (a) to (d),  
or, where the purchaser purchased the security from a person or company referred to in clause (a) or (b) or from another underwriter of the securities, the purchaser may elect to exercise a right of rescission against such person, company or underwriter, in which case the purchaser shall have no right of action for damages against such person, company or underwriter.

*Defence*

(2) No person or company is liable under subsection (1) if he, she or it proves that the purchaser purchased the securities with knowledge of the misrepresentation.

*Idem*

(3) No person or company, other than the issuer or selling security holder, is liable under subsection (1) if he, she or it proves,

- (a) that the prospectus or the amendment to the prospectus was filed without his, her or its knowledge or consent, and that, on becoming aware of its filing, he, she or it forthwith gave reasonable general notice that it was so filed;
- (b) that, after the issue of a receipt for the prospectus and before the purchase of the securities by the purchaser, on becoming aware of any misrepresentation in the prospectus or an amendment to the prospectus he, she or it withdrew the consent thereto and gave reasonable general notice of such withdrawal and the reason therefor;
- (c) that, with respect to any part of the prospectus or the amendment to the prospectus purporting to be made on the authority of an expert or purporting to be a copy of or an extract from a report, opinion or statement of an expert, he, she or it had no reasonable grounds to believe and did not believe that there had been a misrepresentation or that such part of the prospectus or the amendment to the prospectus did not fairly represent the report, opinion or statement of the expert or was not a fair copy of or extract from the report, opinion or statement of the expert;
- (d) that, with respect to any part of the prospectus or the amendment to the prospectus purporting to be made on his, her or its own authority as an expert or purporting to be a copy of or an extract from his, her or its own report, opinion or statement as an expert but that contains a misrepresentation attributable to failure to represent fairly his, her or its report, opinion or statement as an expert,
  - (i) the person or company had, after reasonable investigation, reasonable grounds to believe and did believe that such part of the prospectus or the amendment to the prospectus fairly represented his, her or its report, opinion or statement, or
  - (ii) on becoming aware that such part of the prospectus or the amendment to the prospectus did not fairly represent his, her or its report, opinion or statement as an expert, he, she or it forthwith advised the Commission and gave reasonable general notice that such use had been made and that he, she or it would not be responsible for that part of the prospectus or the amendment to the prospectus; or

(e) that, with respect to a false statement purporting to be a statement made by an official person or contained in what purports to be a copy of or extract from a public official document, it was a correct and fair representation of the statement or copy of or extract from the document, and he, she or it had reasonable grounds to believe and did believe that the statement was true.

*Idem*

(4) No person or company, other than the issuer or selling security holder, is liable under subsection (1) with respect to any part of the prospectus or the amendment to the prospectus purporting to be made on his, her or its own authority as an expert or purporting to be a copy of or an extract from his, her or its own report, opinion or statement as an expert unless he, she or it,

- (a) failed to conduct such reasonable investigation as to provide reasonable grounds for a belief that there had been no misrepresentation; or
- (b) believed there had been a misrepresentation.

*Idem*

(5) No person or company, other than the issuer or selling security holder, is liable under subsection (1) with respect to any part of the prospectus or the amendment to the prospectus not purporting to be made on the authority of an expert and not purporting to be a copy of or an extract from a report, opinion or statement of an expert unless he, she or it,

- (a) failed to conduct such reasonable investigation as to provide reasonable grounds for a belief that there had been no misrepresentation; or
- (b) believed there had been a misrepresentation.

*Limitation re underwriters*

(6) No underwriter is liable for more than the total public offering price represented by the portion of the distribution underwritten by the underwriter.

*Limitation in action for damages*

(7) In an action for damages pursuant to subsection (1), the defendant is not liable for all or any portion of such damages that the defendant proves do not represent the depreciation in value of the security as a result of the misrepresentation relied upon.

*Joint and several liability*

(8) All or any one or more of the persons or companies specified in subsection (1) are jointly and severally liable, and every person or company who becomes liable to make any payment under this section may recover a contribution from any person or company who, if sued separately, would have been liable to make the same payment provided that the court may deny the right to recover such contribution where, in all the circumstances of the case, it is satisfied that to permit recovery of such contribution would not be just and equitable.

*Limitation re amount recoverable*

(9) In no case shall the amount recoverable under this section exceed the price at which the securities were offered to the public.

*No derogation of rights*

(10) The right of action for rescission or damages conferred by this section is in addition to and without derogation from any other right the purchaser may have at law.

10 Although this action is about the primary market, for the discussion later of the cause of action criterion for certification and the scope of an underwriter's duty of care, it shall be useful to note that with respect to distributions of shares in the secondary market, at common law a purchaser of shares had no cause of action about misrepresentations in a prospectus.<sup>4</sup> This lacunae in the law was remedied by amendment to the Ontario *Securities Act* and the addition of Part XXIII.1 (Civil Liability for Secondary Market Disclosure), which provided a statutory cause of action for misrepresentation without proof of reliance. The statutory remedy is available against the issuer, directors of the issuer and certain others who have signed the prospectus or have allowed their reports or statements to be used in the prospectus. There, however, is no statutory secondary market misrepresentation claim against underwriters. Thus, although underwriters are exposed to statutory liability in the primary market, they are not included amongst those exposed to statutory liability for secondary market disclosure.<sup>5</sup> Underwriters are, however, exposed to tort claims in both the primary and the secondary markets.

11 In an Underwriting Agreement dated May 2, 2013, Cormark Securities and Dundee Securities contracted with Hycroft to act as underwriters in a public offering of Hycroft's common shares. Under the Underwriting Agreement, Cormark Securities and Dundee Securities were permitted to conduct due diligence with respect to their certificate under the Ontario *Securities Act*. The Underwriting Agreement stated:

[Hycroft agrees to] . . . allow the Underwriters to conduct all due diligence which they may reasonably require in order to fulfill their obligations as Underwriters and in order to enable the Underwriters to responsibly execute the certificates required to be executed by them in the Canadian Preliminary Prospectus, the Canadian Final Prospectus or in any Supplementary Material.

12 On May 9, 2013, Hycroft released the final short form prospectus and published it on SEDAR (System for Electronic Document Analysis and Retrieval). The prospectus included the certification of the Underwriters. In the short form prospectus, Cormark Securities and Dundee Securities affirmed:

To the best of our knowledge, information, and belief, this short form prospectus together with the documents incorporated by reference, constitutes full, true and plain disclosure of all material facts relating to the securities offered by this short form prospectus as required by the securities legislation of the provinces of British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, New Brunswick, Prince Edward Island, Nova Scotia and Newfoundland and Labrador.

13 On May 17, 2013, Hycroft effected a cross-border \$150 million (USD) secondary public offering of 14 million shares of common stock at a price of \$10.75 (USD) per share. The offering was financed as a "bought deal" with Cormark Securities and Dundee Securities acting as principals. A bought deal is an offering where the underwriter, rather than acting as sales agent of the issuer, commits to buying the entire offering from the issuer of the security and then the underwriter resells it. Under a bought deal, the underwriter takes on the market risk of reselling, and thus a bought deal is different from an underwriting in which an underwriter makes best efforts to sell the securities of the issuer but provides no guarantee of the amount or value of the securities that will be sold and the issuer takes on the market risk.

14 For the resale of the Hycroft shares, the price of the shares sold pursuant to the prospectus was based on the prevailing price for Hycroft's shares in the secondary market on the TSX on April 29, 2013 (the last trading day before the announcement of the offering) and May 8, 2013 (the last trading day before the filing of the prospectus).

15 Incorporated by reference as an integral part of the short form prospectus was Hycroft's 2012 Annual Report, its Q12013 Interim Report, and its MD&As (Management Discussion and Analysis of Financial Conditions and Results of Operations). The documents incorporated by reference included representations about Hycroft's gold production and its ability to finance its gold mine.

16 LBP Holdings alleges that the representations about the gold mine's production violated Hycroft's disclosure obligations because the prospectus omitted to disclose that during late 2012, the company was having persistent operational problems with its Lewis Leach Pad that had not been rectified. These operational problems had an adverse effect on Hycroft's ability to produce gold. LBP Holdings alleges that the production projections were unreasonable because of the persistent operational problems.

17 LBP Holdings submits that before signing the underwriter's prescribed certificate for the public offering, by the exercise of due diligence, the Underwriters ought to have discovered the material facts not disclosed by Hycroft.

18 LBP Holdings alleges that the Underwriters knew and intended that the purchasers would rely on the prospectus in making a decision to purchase Hycroft's securities.

19 Pursuant to the prospectus, Hycroft shares were distributed in British Columbia, Alberta, Saskatchewan, Ontario, Nova Scotia, and the United States. Excluding U.S. purchasers, 247 Canadians and 7 foreigners purchased 7.2 million Hycroft common shares directly from Cormark Securities and Dundee Securities.

20 The Underwriters know the identities and addresses of the purchasers. On average, each purchaser purchased \$307,745.12 (USD) worth of shares.

21 LBP Holdings reviewed the prospectus for the secondary public offering before making its purchase. LBP Holdings purchased 20,000 shares of Hycroft for \$215,000 (USD).

22 On August 6, 2013, Hycroft released information about operational problems with the Lewis Leach Pad at the mine. The disclosure led to a nearly 26% decline in the value of Hycroft's shares falling from \$6.09 to \$4.56.

23 On August 7, 2013, the decline continued, and the shares closed at \$3.85, a two-day decline of approximately 37%.

## ***2. LBP Holdings' Proposed Class Action***

24 By notice of action, on July 16, 2014, LBP Holdings commenced a proposed class action against Hycroft and Messrs. Caldwell and Buchan.

25 LBP Holdings' Statement of Claim was filed on August 14, 2014. LBP Holdings claims damages of \$47 million (USD). The Underwriters were not named as parties.

26 LBP Holdings proposed to be the representative plaintiff for:

All persons, other than Excluded Persons, who acquired Hycroft Mining Corporation's SPO [secondary public offering] securities in a transaction occurring outside the United States pursuant to the Prospectus and during its distribution period (the "Class").

Excluded Persons is defined as the defendants' affiliates, officers, directors, senior employees, legal representatives, heirs, predecessors, successors and assigns, and any member of the Individual Defendants' immediate families and any entity in which any of the foregoing has or had an interest during the distribution period for the Prospectus, or any time a document incorporated by reference in the Prospectus was released, and, with respect to the Class definition in paragraph 1(g) means U.S. citizens or residents who acquired Hycroft's securities in the SPO in a trade under the U.S. prospectus. Also excluded from the Class are any SPO shares sold prior to July 22, 2013.

27 The definition of "Excluded Persons" will exclude any investor that is included within a U.S. class proceeding against Hycroft that parallels the action in Ontario.

28 In the Canadian proposed class action, LBP Holdings alleges that Hycroft published core documents and made other statements containing material misrepresentations about: (a) its ability to process and leach ore at the Hycroft Mine; (b) the feasibility of its 2013 gold production and cash cost guidance projections; and (c) its ability to finance the expansion of the

Hycroft Mine. LBP Holdings pleads that these misrepresentations were incorporated by reference into the short form prospectus for the secondary public offering.

29 LBP Holdings pleads that the alleged misrepresentations were first corrected on July 22, 2013, when Hycroft published its second quarter operating results. Those results disclosed previous operating errors that prevented Hycroft from achieving its production targets. LBP Holdings pleads that the alleged misrepresentations were corrected again on August 6 and 7, 2013, when Hycroft announced in a series of conference calls that, because it could not leach enough ore to generate sufficient cash flows, the expansion of the Hycroft Mine had to be postponed.

30 On March 5, 2015, LBP Holdings amended its Statement of Claim.

31 On March 9, 2015, Hycroft filed for protection under U.S. bankruptcy law.

32 Two months later, on May 15, 2015, LBP Holdings served a motion seeking to add Cormark Securities and Dundee Securities as defendants to the proposed Canadian class action. The motion to add the Underwriters as defendants was to be heard a year later by Justice Belobaba.

33 On October 2015, before the argument of the joinder motion, Hycroft emerged from the Chapter 11 bankruptcy protection in the United States.

34 On the motion to add defendants, on April 27, 2016, Justice Belobaba held that LBP Holdings' claim against Cormark Securities and Dundee Securities under s. 130 of the Ontario *Securities Act* was statute-barred and that its claims under Part XXIII.1 of the *Act* - the secondary market claim against the Underwriters as alleged "experts" - for which leave is required, had no reasonable prospect of success. Justice Belobaba also held that LBP Holdings' unjust enrichment claim did not disclose a reasonable cause of action.

35 At the joinder motion, Cormark Securities and Dundee Securities did not object to the common law claims, and Justice Belobaba held that the tort claims, "remain alive for purposes of certification, although I assume that this is not a preferred alternative for the plaintiff."

36 After the decision on the joinder motion, LBP Holdings discontinued its secondary market claims (both statutory and common law) and its common law primary market claims against the Hycroft Defendants. This left LBP Holdings with a statutory claim against the Hycroft Defendants. The discontinuance of the other claims was in exchange for the consent of the Hycroft Defendants to certification of the statutory primary market prospectus misrepresentation claim under s. 130 of Ontario's *Securities Act* and the equivalent *Securities Acts* in other provinces. In March 2017, LBP Holdings filed a Fresh as Amended Statement of Claim reflecting these changes.

37 There was no agreement between LBP Holdings and the Underwriters about the certification of the action against them and by Notice of Motion dated March 17, 2017, LBP Holdings sought to certify the claims against the Underwriters for: (a) prospectus misrepresentation under s. 130 of the *Securities Act*, (b) negligent misrepresentation, and (c) negligence. The certification motion was returnable on July 25, 2017.

38 On the return of the certification motion, LBP Holdings abandoned its statutory claims as against Cormark Securities and Dundee Securities, and Justice Belobaba adjourned the incomplete certification motion to allow LBP Holdings to amend, once again, its Statement of Claim. The substantive part of the Order of Justice Belobaba stated:

1. THIS COURT ORDERS that subject to submissions on costs, leave is granted to the plaintiff pursuant to s. 29(1) of the *Class Proceedings Act 1992*, S.O. 1992, c. 6 (the "CPA") to abandon all claims for primary market liability under securities legislation, including under Part XXIII of the Ontario *Securities Act*, R.S.O. 1990, c. S.5 and equivalent provisions of other securities legislation (the "Statutory Primary Market Claim") as against the Underwriters.

2. THIS COURT ORDERS that this motion is adjourned pursuant to s. 5(4) of the CPA to permit the plaintiff to deliver an amended Fresh as Amended Statement of Claim for consideration under s. 5 of the CPA:

- (a) to remove the Statutory Primary Market Claim as against the Underwriters;
- (b) to re-plead the plaintiff's claims for primary market common law liability in negligence *simpliciter* and negligent misrepresentation;
- (c) to revise the proposed common issues as they relate to the plaintiff's claims for primary market common law liability in negligence *simpliciter* and negligent misrepresentation.

3. THIS COURT ORDERS that the Underwriters are not precluded from advancing any arguments in response to the plaintiff's amended Fresh as Amended Statement of Claim, including the argument that the plaintiff's claim for primary market common law liability in negligence *simpliciter* is subsumed with the plaintiff's claim for primary market common law liability in negligent misrepresentation.

4. THIS COURT ORDERS that the costs of this motion, including costs resulting from the plaintiff's abandonment of its Statutory Primary Market Claim as against the Underwriters, are to be determined as part of the hearing of the motion for certification of this action as a class proceeding.

39 On August 10, 2017, LBP Holdings served a Second Fresh as Amended Statement of Claim that deleted the statutory prospectus misrepresentation claim as against the Underwriters; repledged the negligence and the negligent misrepresentation claim, and revised the proposed common issues.

40 In the Second Fresh as Amended Statement of Claim, LBP Holdings alleges that: the Underwriters owed class members a duty of care to conduct reasonable due diligence and ensure that the prospectus made "full, true and plain disclosure . . . free of misrepresentation" and the duty of care arose from the Underwriters' certificate and from the Underwriting Agreement between Hycroft and the Underwriters that created a "special relationship" between the Underwriters and class members. LBP Holdings pleads that the Underwriters' certificate represented that the prospectus made full, true and plain disclosure but the prospectus contained multiple misrepresentations. Paragraph 104 of the Second Fresh as Amended Statement of Claim states:

104. Had the Underwriters not breached their duty of care in conducting their due diligence and pricing the securities offered by the Prospectus, the Plaintiff and the members of the Class would either: (a) not have purchased Hycroft's securities in the SPO [secondary public offering] at all; or, in the alternative, (b) they would have purchased those securities at a lower price; or, in the further alternative, (c) they would have purchased fewer securities offered in the SPO.

41 LBP Holdings alleges that the Underwriters failed to meet the standard of care because they knew or ought to have known that the prospectus did not make full, true, and plain disclosure of all material facts and, therefore, contained misrepresentations. It alleges that the Underwriters failed in their due diligence to learn about the operational problems at the Lewis Leach Pad or did learn about the problems and were negligent in not reporting the material facts in the prospectus.

42 In an amended Notice of Motion for certification, LBP Holdings proposes the following common issues:

*Common Issues relating to Part XXIII of the OSA ["Ontario Securities Act"] (against the Corporate Defendants)*

1. Was Hycroft a responsible issuer within the meaning of the *OSA*?
2. Was Hycroft obliged to disclose all material facts in the Prospectus?
3. Did Hycroft encounter operational problems with the Lewis Leach Pad during Q1 2013 and prior to the release of the final Prospectus?
4. If so, was Hycroft required to disclose the operational problems at the Lewis Leach Pad in its final Prospectus for the SPO [secondary public offering]?

5. Did Hycroft's final Prospectus omit the material facts about the then known operational problems with the Lewis Leach Pad?
6. Were the Individual Defendants aware of the operational problems with the Lewis Leach Pad prior to the release of the final Prospectus?
7. If so, did the Individual Defendants conduct any type of due diligence to determine whether the facts about the operational problems at the Lewis Leach Pad were material facts as defined in the *OSA*?
8. Were the gold production and cash cost guidance projections relating to Hycroft's Q2 and annual results for 2013 fiscal year reasonable when made prior to and within the final Prospectus?
9. Did the pricing of the SPO incorporate the material facts released by the Individual Defendants during quarterly conference calls?
10. Are any of the Individual Defendants liable for releasing the final Prospectus that contained misrepresentations? If so, which Individual Defendant or both Individual Defendants?

*Common Issues relating to Negligent Misrepresentation (against the Underwriters)*

1. Did the Underwriters owe a duty of care to the Plaintiff and the members of the Class to ensure that the final Prospectus for the SPO did not contain any misrepresentations and otherwise made full, true and plain disclosure of all material facts?
2. What is the standard of care applicable to the Underwriters?
3. Did the Prospectus contain any misrepresentations or other failures to make full true and plain disclosure of all material facts?
4. If so, did the Underwriters breach the applicable standard of care?
5. If so, how did the Underwriters breach the applicable standard of care?
6. Did the Underwriters' breach of the applicable standard of care result in their section 59 *OSA* underwriter certification forms being released containing a misrepresentation?

*Common Issues relating to Negligence Simpliciter (against the Underwriters)*

Were the Underwriters negligent in conducting their due diligence and in pricing the securities offered by the final Prospectus? More specifically:

1. Did the Underwriters owe a duty of care to the Plaintiff and the members of the Class in respect of the SPO?
2. What is the standard of care applicable to the Underwriters?
3. Did the Underwriters breach the applicable standard of care?
4. If so, how did the Underwriters breach the applicable standard of care?
5. Did the Underwriters' breach of the applicable standard of care result in the securities offered by the final Prospectus being over-priced?
6. If so, at what price should the securities offered by the final Prospectus have been priced?

## C. Discussion and Analysis

### 1. The Certification Motion as against the Hycroft Defendants

43 Pursuant to s. 5(1) of the *Class Proceedings Act, 1992*, the court shall certify a proceeding as a class proceeding if: (1) the pleadings disclose a cause of action; (2) there is an identifiable class; (3) the claims or defences of the class members raise common issues of fact or law; (4) a class proceeding would be the preferable procedure; and (5) there is a representative plaintiff or defendant who would adequately represent the interests of the class without conflict of interest and who has presented a workable litigation plan.

44 The test for certification is to be applied in a purposive and generous manner, to give effect to the important goals of class actions -- providing access to justice for litigants; promoting the efficient use of judicial resources; and sanctioning wrongdoers to encourage behaviour modification.<sup>6</sup> The purpose of a certification motion is to determine how the litigation is to proceed and not to address the merits of the plaintiff's claim; there is to be no preliminary review of the merits of the claim.<sup>7</sup>

45 As noted at the outset, the Hycroft Defendants consent to certification of the statutory claim under s. 130 of the Ontario *Securities Act* and equivalent legislation in other provinces in exchange for LBP Holdings abandoning its common law tort claims against them.

46 Having reviewed the record, I am satisfied that as against the Hycroft Defendants, LBP Holdings has satisfied the criterion for certification of the statutory claims under the Ontario *Securities Act* and equivalent *Securities Acts* in other provinces.

47 Accordingly, I order the action be certified as a class proceeding with respect to the Hycroft Defendants.

### 2. The Certification Motion as against the Underwriters: Overview

48 Turning to the certification motion as against Cormark Securities and Dundee Securities, they resist certification by challenging: (a) the cause of action criterion; and (b) the preferable procedure criterion.

49 By way of overview of the analysis that will follow, I shall address the preferable procedure criterion first and then consider the cause of action criterion.

50 With respect to the preferable procedure criterion, I shall assume that LBP Holdings has satisfied the cause of action criterion for discrete claims for negligent misrepresentation and for negligence (what LBP Holdings calls a negligence *simpliciter* claim). To foreshadow the result, I conclude that a class action is not the preferable procedure for either cause of action against the Underwriters.

51 Notwithstanding this dispositive conclusion, following the discussion of the preferable procedure criterion, I shall go on to consider Cormark Securities' and Dundee Securities' argument that the cause of action criterion is not satisfied.

52 To foreshadow the result, I agree with the Underwriters' argument that LBP Holdings' negligence claim is subsumed by its negligent misrepresentation claim, but I do not agree with the Underwriters' argument that LBP Holdings has not adequately pleaded a cause of action for negligent misrepresentation. Thus, LBP Holdings' action does satisfy the cause of action criterion for a claim of negligent misrepresentation.

53 Still foreshadowing the result, I agree with the Underwriters' argument that the cause of action criterion cannot be satisfied for a negligence claim based on the Underwriters' conduct in association with the bought deal distribution of Hycroft's shares. In my opinion, a free-standing negligence claim, although adequately pleaded, does not survive a duty of care analysis, which I also foreshadow to say is a different analysis from simply determining whether the constituent elements of a negligence claim have been properly pleaded. I also foreshadow to say that if the duty of care element is satisfied for a negligent misrepresentation claim that it does not necessarily follow that the defendant will also have a duty of care for a negligence claim.

54 The result of the analysis below is that the cause of action criterion is satisfied for a negligent misrepresentation claim but not for a negligence claim. However, the action should, nevertheless, not be certified because, in any event, a class proceeding is not the preferable procedure for either cause of action.

55 I pause here to note that because the action is not being certified as against Cormark Securities and Dundee Securities, it is not necessary to address - as a discrete item - their request for costs arising from LBP Holdings' abandonment of its statutory claims as against them. This claim for costs, including any claim for substantial indemnity costs in whole or in part, is incorporated in their claim for costs for the dismissal of the certification motion.

### **3. Preferable Procedure Criterion**

#### *(a) General Principles: Preferable Procedure*

56 Under the *Class Proceedings Act, 1992*, the fourth criterion for certification is the preferable procedure criterion. Preferability captures the ideas of: (a) whether a class proceeding would be an appropriate method of advancing the claims of the class members; and (b) whether a class proceeding would be better than other methods such as joinder, test cases, consolidation, and any other means of resolving the dispute.<sup>8</sup>

57 In *Fischer v. IG Investment Management Ltd.* [hereinafter AIC Limited v. Fischer],<sup>9</sup> the Supreme Court of Canada emphasized that the preferability analysis must be conducted through the lens of judicial economy, behaviour modification, and access to justice. Justice Cromwell for the Court stated that access to justice has both a procedural and substantive dimension. The procedural aspect focuses on whether the claimants have a fair process to resolve their claims. The substantive aspect focuses on the results to be obtained and is concerned with whether the claimants will receive a just and effective remedy for their claims if established. Thus, for a class proceeding to be the preferable procedure for the resolution of the claims of a given class, it must represent a fair, efficient, and manageable procedure that is preferable to any alternative method of resolving the claims.<sup>10</sup> Arguments that no litigation is preferable to a class proceeding cannot be given effect.<sup>11</sup> Whether a class proceeding is the preferable procedure is judged by reference to the purposes of access to justice, behaviour modification, and judicial economy and by taking into account the importance of the common issues to the claims as a whole, including the individual issues.<sup>12</sup>

58 Relevant to the preferable procedure analysis are the factors listed in s. 6 of the *Class Proceedings Act, 1992*, which states:

6. The court shall not refuse to certify a proceeding as a class proceeding solely on any of the following grounds:

1. The relief claimed includes a claim for damages that would require individual assessment after determination of the common issues.
2. The relief claimed relates to separate contracts involving different Class Members.
3. Different remedies are sought for different Class Members.
4. The number of Class Members or the identity of each Class Member is not known.
5. The class includes a subclass whose members have claims or defences that raise common issues not shared by all Class Members.

59 To satisfy the preferable procedure criterion, the proposed representative plaintiff must show some basis in fact that the proposed class action would: (a) be a fair, efficient and manageable method of advancing the claim; (b) be preferable to any other reasonably available means of resolving the class members' claims; and (c) facilitate the three principal goals of class proceedings; namely: judicial economy, behaviour modification, and access to justice.<sup>13</sup>

60 In considering the preferable procedure criterion, the court should consider: (a) the nature of the proposed common issue(s) and their importance in relation to the claim as a whole; (b) the individual issues which would remain after determination of the common issue(s); (c) the factors listed in the *Act*; (d) the complexity and manageability of the proposed action as a whole; (e) alternative procedures for dealing with the claims asserted; (f) the extent to which certification furthers the objectives underlying the *Act*; and (g) the rights of the plaintiff(s) and defendant(s).<sup>14</sup>

61 The court must identify alternatives to the proposed class proceeding.<sup>15</sup> The proposed representative plaintiff bears the onus of showing that there is some basis in fact that a class proceeding would be preferable to any other reasonably available means of resolving the class members' claims, but if the defendant relies on a specific non-litigation alternative, the defendant has the evidentiary burden of raising the non-litigation alternative.<sup>16</sup> It is not enough for the plaintiff to establish that there is no other procedure which is preferable to a class proceeding; he or she must also satisfy the court that a class proceeding would be fair, efficient and manageable.<sup>17</sup>

62 In *AIC Limited v. Fischer*, Justice Cromwell pointed out that when the court is considering alternatives to a class action, the question is whether the alternative has potential to provide effective redress for the substance of the plaintiff's claims and to do so in a manner that accords suitable procedural rights. He said that there are five questions to be answered when considering whether alternatives to a class action will achieve access to justice: (1) Are there economic, psychological, social, or procedural barriers to access to justice in the case?; (2) What is the potential of the class proceeding to address those barriers?; (3) What are the alternatives to class proceedings?; (4) To what extent do the alternatives address the relevant barriers?; and (5) How do the two proceedings compare?<sup>18</sup>

63 And in light of the Supreme Court of Canada's directives in *Hryniak v. Mauldin*<sup>19</sup> and *Bruno Appliance and Furniture Inc. v. Hryniak*,<sup>20</sup> one should now add to the preferable procedure factors the factor of the relationship between access to justice, which is the preeminent concern of class proceedings, and proportionality in civil procedures. The proportionality analysis, which addresses how much procedure a litigant actually needs to obtain access to justice, fits nicely with the focus on judicial economy and with the part of the preferable procedure analysis that considers manageability and whether the claimants will receive a just and effective remedy for their claims.

64 In cases, particularly cases where the individual class members' respective harm is nominal, or cases where an aggregate assessment of damages in whole or in part is possible, a class action may more readily satisfy the preferable procedure criterion because the common issues trial may be the only viable means for remedying the wrong and for calling the wrongdoer to account because individual litigation may be prohibitively expensive.<sup>21</sup>

65 In undertaking a preferable procedure analysis in a case in which individual issue trials are inevitable, it should be appreciated that the *Class Proceedings Act, 1992* envisions the prospect of individual claims being litigated and sections 12 and 25 of the *Act* empowers the court with tools to manage and achieve access to justice and judicial economy in those circumstances, and, thus, the inevitability of individual issues trials is not an obstacle to certification. In the context of misrepresentation claims, numerous actions have been certified notwithstanding individual issues of reliance and damages.<sup>22</sup>

66 That said, in a given particular case, the inevitability of individual issues trials may obviate any advantages from the common issues trial and make the case unmanageable and thus the particular case will fail the preferable procedure criterion.<sup>23</sup> Or, in a given case, the inevitability of individual issues may mean that while the action may be manageable, those individual issue trials are the preferable procedure and a class action is not the preferable procedure to achieve access to justice, behaviour modification, and judicial economy. A class action may not be fair, efficient and manageable having regard to the common issues in the context of the action as a whole and the individual issues that would remain after the common issues are resolved.<sup>24</sup> A class action will not be preferable if, at the end of the day, claimants remain faced with the same economic and practical hurdles that they faced at the outset of the proposed class action.<sup>25</sup>

#### 4. Analysis: Preferable Procedure

67 In the case at bar, LBP Holdings seeks to combine common law claims for negligent misrepresentation and negligence against the Underwriters with the certified statutory claim under s. 130 of the Ontario *Securities Act* against the Hycroft Defendants. Cormark Securities and Dundee Securities submit, however, that the negligence claim is subsumed by the negligent misrepresentation claim. As I shall explain in my discussion of the cause of action criterion below, I agree with the Underwriters' submission that this has occurred in the case at bar; however, for the purposes of a preferable procedure analysis, I shall assume that the cause of action criterion has been satisfied for both causes of action, and I shall examine whether these discrete actions satisfy the preferable procedure criterion.

68 Cormark Securities and Dundee Securities argue that the proposed class action would ultimately involve a vast number of complex individual trials on the critical issues of reliance, causation, and damages, thus undermining two of the key goals of a class action, judicial economy and access to justice. They submit that in the circumstances of the immediate case, a class action is unmanageable, inefficient, unfair and unnecessary having regard to the alternative of individual actions.

69 In opposition, LBP Holdings submits that the combination of claims in the case at bar appropriately satisfies the preferable procedure criterion and will provide behaviour modification, judicial economy, and access to justice.

70 I shall begin the analysis of the parties' competing arguments by noting that I agree with LBP Holdings' submission that a common law negligent misrepresentation claim can be certified notwithstanding that there will be individual issues trials to address the reliance and damages elements of the tort.<sup>26</sup> I also agree with its submission that the circumstance in the immediate case that there is a statutory claim, which the courts have held is uniquely suited for a class action,<sup>27</sup> does not derogate from a plaintiff's right to also sue for a common law claim. And I agree that this last point is underlined by s. 130 of the Ontario *Securities Act*, which expressly states that: "the right of action for rescission or damages . . . is in addition to and without derogation from any other right the purchaser may have."

71 Further, I agree with LBP Holdings' submission that, generally speaking, if the statutory cause of action is certified, then numerous synergies might be achieved for a companion common law tort. However, I note that in the immediate case, the statutory cause of action is not being certified as against the Underwriters and, as I shall explain below, the statutory misrepresentation claim against the Hycroft Defendants is not congruent with the common law claims against the Underwriters.

72 Where I part company with LBP Holdings is my view that in the particular circumstances of the immediate case, the tort claims against the Underwriters (either separately or in combination with the statutory claim against the Hycroft Defendants) do not satisfy the preferable procedure criterion.

73 In *Musicians' Pension Fund of Canada (Trustee of) v. Kinross Gold Corp.*,<sup>28</sup> the Court of Appeal held a common law negligent misrepresentation claim in securities cases may not be suitable for certification where it would involve numerous individual issues of causation, reliance, and damages assessments. In *McKenna v. Gammon Gold Inc.*,<sup>29</sup> Justice Strathy, as he then was, concluded that reliance was an individual issue and the need to prove reliance as a constituent element of negligent misrepresentation makes a common law misrepresentation claim fundamentally unsuitable for certification.

74 However, courts have been willing to certify common law misrepresentation claims alongside associated statutory claims or alongside associated negligence claim.<sup>30</sup> The point to note is that notwithstanding the categorical arguments of the parties, it cannot be said that a class action is always or is never the preferable procedure for a negligent misrepresentation claim or a negligence claim in a proposed class action about the sale of securities in the primary or secondary markets for corporate securities. The principles for determining whether the preferable procedure criterion has been satisfied must be applied to the exigencies of each case.

75 In my opinion, in the case at bar, applying the principles as they have been articulated by the Supreme Court in *AIC Limited v. Fischer*,<sup>31</sup> LBP Holdings' negligent misrepresentation claim and its negligence claim do not satisfy the preferable procedure criterion either standing alone or standing in combination with the statutory claim.

76 I begin a more detailed analysis of the preferable procedure criterion in the circumstances of the immediate case by describing the constituent elements of a negligent misrepresentation cause of action and of a negligence cause of action and by noting that they are more complex than the statutory misrepresentation claim under s. 130 of the Ontario *Securities Act*.

77 The constituent elements of negligent misrepresentation are: (1) duty of care based on a special relationship between the plaintiff and the defendant; (2) an untrue, inaccurate, or misleading representation; (3) the defendant making the representation negligently; (4) the plaintiff having reasonably relied on the misrepresentation; and, (5) the plaintiff suffering damages as a consequence of relying on the misrepresentation.<sup>32</sup>

78 The constituent elements of a negligence action are: (1) the defendant owes the plaintiff a duty of care; (2) the defendant's behaviour breached the standard of care; (3) the plaintiff suffered compensable damages; (4) the damages were caused in fact by the defendant's breach; and, (5) the damages are not too remote in law.<sup>33</sup>

79 In contrast, the constituent elements of a statutory misrepresentation claim with respect to the sale of securities pursuant to a prospectus are: (a) a distribution of securities by prospectus; (b) a misrepresentation in the prospectus; (c) the plaintiff purchasing a security offered by the prospectus during the period of distribution; and (d) the defendant being the issuer of the prospectus or one of the persons referred to in s. 130(1) of the *Act*.<sup>34</sup>

80 In the case at bar, having regard to the constituent elements of the torts, the elements of reliance, causation, and damages are matters that raise highly individual issues that must be proven at individual issues trials. In the case at bar, individual issue trials against the Underwriters are inevitable for both the negligent misrepresentation and the negligence claim.

81 I would not go so far as to say that the individual issues would completely overwhelm the common issues in the action against the Underwriters, but the inevitability of individual issues trials does very substantially diminish the productivity of the common issues trial and introduces significant concerns about manageability similar to the concerns that led the Court of Appeal, in *Musicians' Pension Fund of Canada (Trustee of) v. Kinross Gold Corp.*,<sup>35</sup> to conduct a preferable procedure analysis and to conclude that the common law action was not certifiable. Moreover, the individual issues in the case at bar are not amenable to summary determinations using the tools of s. 12 and 25 of the *Class Proceedings Act, 1992*. A costs benefits analysis indicates that little benefit is added by subjecting the individual claims to the procedure of a class action.

82 Further, in the case at bar, the common issues of the statutory claim against the Hycroft Defendants are not congruent with the common issues of the tort claims against the Underwriters. These circumstances increase the problems of managing the action with the combined claims and decrease the benefits of a class action procedure.

83 In the case at bar, combining the statutory misrepresentation claim against the Hycroft Defendants with the common law misrepresentation and negligence claims against the Underwriters is incongruent and unlikely to produce synergies and efficiencies because the legal situation of the Underwriters is different from that of the Hycroft Defendants. The Underwriters' misrepresentation is of a different order than the Hycroft Defendants' misrepresentation, and outside of the statutory scheme the Underwriters' standard of care is also different in its nature, as the discussion below of the cause of action criterion will reveal.

84 Cormark Securities or Dundee Securities are not in the mining industry, and their misrepresentations, if any, are concerned with their representing that the prospectus contains full, true and plain disclosure to the best of their knowledge, information and belief. The Underwriters' representation is different from the representations or omissions of material facts made by the Hycroft Defendants. Thus, the Underwriters' representation could be true even if the prospectus did not contain full, true and plain disclosure by the Hycroft Defendants. The Underwriters' duty of care in negligence and standard of care in negligence are also different from the duty of care and standard of care of the Hycroft Defendants. The misrepresentation claim and the negligence

claim against the Underwriters, while they arise out of a common factual narrative that involves the Hycroft Defendants, do not rest on the same factual or legal foundation as the claim against the Hycroft Defendants. The findings made in the statutory action against the Hycroft Defendants will only moderately assist the prosecution of the tort misrepresentation claim.

85 In the case at bar, coat tailing the tort claims against the Underwriters with the statutory misrepresentation claim against the Hycroft Defendants is problematic in terms of manageability and given the difference between the claims against the co-defendants, there is only modest advancement in judicial economy and much less than would be the case if a statutory claim against the Underwriters had been combined with the common law claims against them. Indeed, given that the misrepresentations, duty of care, and standard of care issues are not the same for the co-defendants, combining the statutory and common law claims may complicate the prosecution and defence of the various causes of action.

86 The negligence claim against the Underwriters is also incongruent with the misrepresentation claim against them, which presupposes a very different theory of liability that does not concern what the Underwriters said but rather concerns what they did or did not do before signing the certificate in the prospectus. The misrepresentation claim is about words found in the prospectus, but the negligence claim is about deeds and the Underwriters' alleged role as a gatekeeper and price setter before the prospectus was released and shares distributed.

87 I appreciate that for the purposes of a free standing negligence claim, a common issues trial would be an efficient and productive means to determine the duty of care and standard of care issues of the claim against the Underwriters. I appreciate that the prosecution of the negligence claim will require expensive expert evidence about the role that underwriters play in the securities marketplace. And I appreciate that advantageously, the expense of the common issues trial could be distributed over hundreds of class members; however, there is the prospect of unmanageability and negligible synergies to be achieved by combining all the claims, and, in any event, after the common issues trial of the common law claims, expensive evidence, and repetitive evidence, would be required at the individual issues trials about reliance, causation, and damages.

88 And given the monetary size of most, if not all of the putative Class Members' claims, a class action is not preferable to individual actions by those Class Members who can prove that they relied on something that Cormark Securities and Dundee Securities said or did not say before they decided to purchase Hycroft's shares. The individual claims would appear to be economically viable to litigate in the Superior Court. There is an alternative route for access to justice. For example, the Plaintiff's own claim is in excess of \$200,000 (USD) and the average claim of the Class Members is over \$300,000 (USD). Indeed, LBP Holdings indicated that if its action was not certified as against the Underwriters, it would proceed with an individual action against the Underwriters perhaps with other putative Class Members joined as co-plaintiffs.

89 I, therefore, conclude that the preferable procedure criterion is not satisfied in the proposed class action against the Underwriters.

### ***5. The Cause of Action Criterion***

#### ***(a) General Principles and Introduction***

90 The first criterion for certification is that the plaintiff's pleading discloses a cause of action. The Underwriters submit that this criterion has not been satisfied in the case at bar.

91 The Underwriters do not dispute that LBP Holdings is capable of disclosing a reasonable cause of action for negligent misrepresentation, but they assert that as currently pleaded, LBP Holdings' misrepresentation claim is deficient for failure to plead the constituent element of reliance.

92 Further, the Underwriters argue that the negligence claim fails the cause of action criterion because the duties pleaded do not exist, reliance on the Underwriters is not and cannot be properly pleaded, and the negligence claim overlaps with and is subsumed within the negligent misrepresentation claim. Thus, they argue that the cause of action criterion has not been satisfied and cannot be satisfied by granting LBP Holdings leave to amend, for the sixth time, its Statement of Claim.

93 In this part of my Reasons for Decision I shall analyze whether the cause of criterion has been satisfied. To do this, I shall first set out in this introduction the general principles about the cause of action criterion. Next, I will discuss the pleading of the negligent misrepresentation claim. This discussion will be brief because I disagree with the Underwriters' submission that the pleading is inadequate. Then, in the following parts of the decision, I will consider at much greater length whether LBP Holdings' Statement of Claim discloses a reasonable cause of action in negligence assuming that it is distinct and independent and not subsumed by the negligent misrepresentation claim.

94 The "plain and obvious" test for disclosing a cause of action from *Hunt v. T & N plc*<sup>36</sup> is used to determine whether a proposed class proceeding discloses a cause of action for the purposes of s. 5(1)(a) of the *Class Proceedings Act, 1992*. Thus, to satisfy the first criterion for certification, a claim will be satisfactory, unless it has a radical defect or it is plain and obvious that it could not succeed.<sup>37</sup>

95 In a proposed class proceeding, in determining whether the pleading discloses a cause of action, no evidence is admissible, and the material facts pleaded are accepted as true, unless patently ridiculous or incapable of proof. The pleading is read generously, and it will be unsatisfactory only if it is plain, obvious, and beyond a reasonable doubt that the plaintiff cannot succeed.<sup>38</sup> Matters of law that are not fully settled should not be disposed of on a motion to strike, and the court's power to strike a claim is exercised only in the clearest cases.<sup>39</sup>

96 In *Knight v. Imperial Tobacco Canada Ltd.*,<sup>40</sup> the Supreme Court of Canada noted that although the tool of a motion to strike for failure to disclose a reasonable cause of action must be used with considerable care, it is a valuable tool because it promotes judicial efficiency by removing claims that have no reasonable prospect of success, and it promotes correct results by allowing judges to focus their attention on claims with a reasonable chance of success.

97 On motions brought under the procedure to strike a claim or defence as untenable in law, leave to amend the pleading may and usually will be given, and leave to amend will be denied only in the clearest cases when it is plain and obvious that no tenable cause of action is possible on the facts as alleged and there is no reason to suppose that the party could improve his or her case by any amendment.<sup>41</sup>

#### (b) *The Negligent Misrepresentation Cause of Action*

98 But for an alleged failure to plead reasonable reliance, which, as noted above, is a constituent element of the tort of negligent misrepresentation, Cormark Securities and Dundee Securities do not dispute that LBP Holdings has adequately pleaded a reasonable cause of action for negligent misrepresentation.

99 Reading the Statement of Claim generously, in my opinion, all of the constituent elements of a negligent misrepresentation claim have been adequately pleaded.

100 As for the reliance element, LBP Holdings pleads that the Underwriters intended and knew the purchasers of Hycroft shares would rely upon the prospectus in making a decision to purchase. Mr. Parker testified that LBP Holdings reviewed a copy of the prospectus and relied on it in making its decision to purchase Hycroft's shares.

101 I, therefore, conclude that insofar as a common law negligent misrepresentation claim is concerned, that LBP Holdings has satisfied the cause of action criterion.

#### (c) *The Negligence Cause of Action:*

#### **Is it Subsumed by the Negligent Misrepresentation Cause of Action?**

102 Turning to LBP Holdings' cause of action in negligence, I agree with the Underwriters that as was the case in *Deep v. M.D. Management*,<sup>42</sup> *Singer v. Schering-Plough Canada Inc.*,<sup>43</sup> *Silver v. Imax Corp.*,<sup>44</sup> and *Mask v. Silvercorp Metals Inc.*,<sup>45</sup> the negligence claim is subsumed by the negligent misrepresentation claim and reliance is a constituent element of this claim.

103 The above cases are authority that a plaintiff cannot dress up what in substance is a negligent misrepresentation claim as a negligence claim and thereby avoid the necessity of proving reliance as a constituent element of its cause of action. In my opinion, it is plain and obvious that in the immediate case, the pleading of negligence has been dressed up to hide its real identity as a negligent misrepresentation claim arising out of the circumstances that led to the Underwriters signing their certification found in the short form prospectus.

104 In the case at bar, the negligence claim arises from the same circumstances as the negligent misrepresentation claim, and it does have the appearance of being a disguised version of the misrepresentation claim. The alleged duties to properly price the shares and to perform due diligence to ensure comprehensive disclosure of material facts in the prospectus are inexorably intertwined with the negligent misrepresentation claim that caused the alleged inflated share price and the putative Class Members' damages by purchasing Hycroft's shares. LBP Holdings' negligence claim purportedly focuses on the fact that it was a purchaser in a bought deal from the Underwriters, but this circumstance does not detach the negligence claim from the circumstance that the claim is essentially about the content of the prospectus, the Underwriters' due diligence about its certificate that was found in the prospectus, and the damage caused by the purchasers reading the prospectus before making a decision to purchase shares.

105 The negligence claim in the case at bar is much like the claim in *Deep v. M.D. Management*, where Mr. Deep sued Nortel for negligent misrepresentation and for negligence after the value of Nortel's shares dropped precipitously in value. Much like the case at bar, the underlying alleged duty of care was to accurately represent Nortel's financial situation in the prospectus and the misconduct, *i.e.* the breach of duty concerns activities or the failure to take steps before the shares were ever released to the public.

106 It follows from the conclusion that the negligence claim is subsumed by the negligent misrepresentation claim that there is no free-standing negligence claim and rather that the negligence claim is a reprise of a negligent misrepresentation claim that satisfies the cause of action criterion. Therefore, the negligence claim as such does not satisfy the cause of action criterion.

107 However, I shall nevertheless go on in the next parts of my Reasons for Decision to analyze LBP Holdings' negligence pleading as if it were an independent cause of action in negligence and determine whether it is plain and obvious that LBP Holdings' Statement of Claim does not disclose a legally viable claim in negligence.

#### (d) Negligence Duty of Care Analysis: General Principles

108 Notwithstanding my view that the negligence pleading is a reprise of the negligent misrepresentation pleading, for the purposes of a cause of action analysis, I shall treat the negligence claim against the Underwriters as a discrete and independent claim from the negligent misrepresentation claim, and I shall analyze that claim as an independent cause of action.

109 I shall proceed in this fashion because I agree with LBP Holdings' submission that it is doctrinally possible that a defendant may be concurrently liable for negligent misrepresentation and negligence, and I agree with its submission that concurrent negligent misrepresentation and negligence claims have been certified in cases such as: *Robinson v. Rochester Financial Ltd.*,<sup>46</sup> *Dobbie v. Arctic Glacier Income Fund*,<sup>47</sup> *Lipson v. Cassels Brock & Blackwell LLP*,<sup>48</sup> *Cannon v. Funds for Canada Foundation*,<sup>49</sup> *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP*<sup>50</sup> and *Lavender v. Miller Bernstein*.<sup>51</sup> Thus, in the case at bar, it is necessary to undertake a duty of care analysis to explain why LBP Holdings' negligence claim does not satisfy the cause of action criterion.

110 In this section of my Reasons for Decision, I shall set out the general principles for a duty of care analysis, and then in the following section, I shall apply those principles to the case at bar.

111 The Canadian approach to determining whether there is a duty of care has been developed in a series of Supreme Court of Canada decisions<sup>52</sup> adapting and explaining the House of Lord's decision in *Anns v. Merton London Borough Council*,<sup>53</sup> which derived from the seminal negligence case, *McAlister (Donoghue) v. Stevenson*.<sup>54</sup>

112 The first element of a tort claim for negligence is a duty of care. As Lord Esher stated in *Le Livre v. Gould*:<sup>55</sup> "[a] man is entitled to be as negligent as he pleases towards the whole world if he owes no duty to them". The contemporary Canadian analysis of whether a duty of care exists begins by asking whether the plaintiff and the defendant are in a relationship that the law categorically recognizes as involving a duty of care or whether the relationship constitutes a new category of claim. If the claim falls within an established category, then precedent will have established that there is a duty of care associated with the relationship between the parties.<sup>56</sup>

113 Where the plaintiff's loss is purely economic, although the categories are not closed, there are five recognized categories of claims for which a duty of care has been found with respect to pure economic losses; namely (1) negligent misrepresentation;<sup>57</sup> (2) negligent performance of a service (professional negligence)<sup>58</sup>; (3) products liability where the goods pose a danger;<sup>59</sup> (4) the liability of public authorities<sup>60</sup>; and (5) relational economic loss.<sup>61</sup>

114 If the case does not come within an established category, it is necessary to undertake a duty of care analysis. In *Anns v. Merton London Borough Council*, the House of Lords adopted a two-step analysis to determine whether there was a duty of care between a plaintiff and a defendant: (1) Is there a sufficiently close relationship between the plaintiff and the defendant such that in the reasonable contemplation of the defendant, carelessness on its part might cause damage to the plaintiff?; and (2) Are there any considerations that ought to negative or limit (a) the scope of the duty; (b) the class of persons to whom it is owed; or (c) the damages to which a breach of it may give rise?

115 As developed by the case law in Canada, the two-step analysis became a four-step analysis. The first step is to determine whether the case falls within a recognized category of case. In Canada, if the relationship between the plaintiff and the defendant does not fall within a recognized class whose members have a duty of care to others, then whether a duty of care to another exists involves satisfying the requirements of the next three steps: (1) foreseeability, in the sense that the defendant ought to have contemplated that the plaintiff would be affected by the defendant's conduct; (2) sufficient proximity, in the sense that the relationship between the plaintiff and the defendant is sufficiently close *prima facie* to give rise to a duty of care; and (3) the absence of overriding policy considerations that would negate any *prima facie* duty established by foreseeability and proximity. Thus, in a new category of case whether a relationship giving rise to a duty of care exists depends on foreseeability and proximity, moderated by policy concerns.<sup>62</sup>

116 To determine the foreseeability element, the court asks whether the harm that occurred was the reasonably foreseeable consequence of the defendant's act.<sup>63</sup> A reasonable foreseeability analysis requires only that the general harm, not its manner of incidence, be reasonably foreseeable.<sup>64</sup>

117 Proximity focuses on the type of relationship between the plaintiff and defendant and asks whether this relationship is sufficiently close that the defendant may reasonably be said to owe the plaintiff a duty to take care not to injure him or her.<sup>65</sup> Proximate relationships giving rise to a duty of care are of such a nature as the defendant in conducting his or her affairs may be said to be under an obligation to be mindful of the plaintiff's legitimate interests.<sup>66</sup> The proximity inquiry probes whether it would be unjust or unfair to hold the defendant subject to a duty of care having regard to the nature of the relationship between the defendant and the plaintiff.<sup>67</sup> The focus of the proximity probe is on the nature of the relationship between victim and alleged wrongdoer and the question is whether the relationship is one where the imposition of legal liability for the wrongdoer's actions would be appropriate.<sup>68</sup> Not every foreseeable harm will attract a duty of care, which must be grounded in a relationship of sufficient closeness, or proximity, to make it just and reasonable to impose an obligation on one party to take reasonable care

not to injure the other.<sup>69</sup> The proximity analysis of the first stage of the duty of care test involves policy issues because it asks the normative question of whether the relationship is sufficiently close to give rise to a legal duty.<sup>70</sup>

118 The proximity analysis involves considering factors such as expectations, representations, reliance, and property or other interests involved.<sup>71</sup> Proximity is not concerned with how intimate the plaintiff and defendant were or with their physical proximity, so much as with whether the actions of the alleged wrongdoer have a close or direct effect on the victim, such that the wrongdoer ought to have had the victim in mind as a person potentially harmed.<sup>72</sup>

119 The proximity inquiry recognizes a distinction between misfeasance, which is an overt act that may be foreseen to cause harm to another, and nonfeasance which is the failure to act to prevent foreseeable harm to another. Where the conduct alleged against the defendant is a failure to act, foreseeability alone may not establish a duty of care.<sup>73</sup> Where the allegation is that the defendant failed to prevent harm, the law requires close examination of the question of proximity and is concerned with whether the case discloses factors that show that the relationship between the plaintiff and the defendant is sufficiently close and direct to give rise to a legal duty of care.<sup>74</sup>

120 The proximity aspect of the formulation of a duty of care was examined in *Childs v. Desormeaux*,<sup>75</sup> which was the case that examined whether a social host has a duty of care to a stranger who is injured by an inebriated guest who drives away from the social host's party and causes a motor vehicle accident. In this case, Chief Justice McLachlin noted at para. 31 that: "[W]here the conduct alleged against the defendant is a failure to act, foreseeability alone may not establish a duty of care." This qualification recognizes that action that causes harm to another and inaction that fails to prevent harm being caused to another have different qualities of moral and legal culpability. In *Childs v. Desormeaux*, without intending to establish rigid categories, the Chief Justice identified three situations where there may be a relationship giving rise to a duty of care and liability for failure to act: (1) where a defendant intentionally attracts and invites third parties to an inherent and obvious risk that he or she has created or controls; (2) where the parties have relationships of supervision and control, such as those of a parent and a minor child, or a teacher and student; and (3) where the defendant either exercises a public function or engage in a commercial enterprise that includes implied responsibilities to the public at large.

121 At paras. 38-40, Chief Justice McLachlin identified several recurrent themes running through the situations where the law will impose a duty of care and liability for failure to act to prevent the harm suffered by the plaintiff; namely: (1) the defendant's involvement in the creation of a risk or in controlling a risk to which others have been invited may justify imposing an obligation to minimize the risk; (2) respect for the plaintiff's autonomy may justify a defendant standing by and not intervening to prevent or minimize the risk to the plaintiff because the law accepts that competent people have a right to engage in risky activities; and (3) where the defendant creates or invites others into a dangerous situation, the defendant may reasonably expect that the persons invited can rely on the defendant to ensure that the risk is a reasonable one or to take appropriate rescue action if the risk materializes. In *Childs v. Desormeaux*, the Chief Justice explained (para. 39) that: "the law does not impose a duty to eliminate risk. It accepts that competent people have the right to engage in risky activities. Conversely, it permits third parties witnessing risk to decide not to become rescuers or otherwise intervene."

122 Moving on to the final stage of the duty of care analysis, and the consideration of whether countervailing policy considerations negate a duty of care, the policy concerns must be more than speculative and a real potential for negative consequences must be apparent.<sup>76</sup> The final stage of the analysis is not concerned with the type of relationship between the plaintiff and the defendant. At this stage of the analysis, the question to be asked is whether there exist broad policy considerations that would make the imposition of a duty of care unwise, despite the fact that harm was a reasonably foreseeable consequence of the conduct in question and there was a sufficient degree of proximity between the plaintiff and the defendant such that the imposition of a duty would be fair.<sup>77</sup> The final stage of the analysis is about the effect of recognizing a duty of care on other legal obligations, the legal system and society more generally.<sup>78</sup>

(e) *The Negligence Cause of Action: Analysis*

123 I regard LBP Holdings' negligence claim as adequately pleaded from the perspective of alleging the constituent elements of a negligence claim, which are set out above. As a free-standing and independent tort claim, the negligence claim against the Underwriters focuses on their failing to perform due diligence, mispricing the shares, and allowing a sale of the shares to proceed in the primary marketplace. To quote from its factum, LBP Holdings' negligence claim concerns the manner in which the underwriters: (1) performed their due diligence obligations under the Underwriting Agreement, (2) performed their contractual duties under the Underwriting Agreement, and (3) performed their statutory duties as gatekeepers in connection with the share offering.

124 LBP Holdings emphasizes that the theory of its case in negligence is discrete and different from the theory of its case in negligent misrepresentation. Insofar as the negligence claim is concerned, LBP Holdings' argument that the Underwriters had a proximate relationship hinges on the existence of a bought deal and contract of sale between the Underwriters and the purchasers of shares. In its Reply Factum, LBP Holdings states:

. . . [its] common law negligence *simpliciter* claim is absolutely distinct and independent cause of action from the negligent misrepresentation claim. That is, the negligence claim concerns different impugned acts of the Underwriters, that were performed at different times within the underwriting process, from the impugned conduct that leads to a negligent misrepresentation. . . . Given that the Underwriters sell to, distribute to, and collect the capital from (either directly or through agents) the members of the Class, there is a special relationship between the Underwriters and investors, which gives rise to a duty of care between the Underwriters and the Class Members.

125 What LBP Holdings' submission reveals is that insofar as its negligence claim is concerned, the pertinent relationship between the putative Class Members and the Underwriters is the relationship of a seller to a purchaser. Based on this relationship, LBP Holdings submits that in addition to the Underwriters' statutory duties and its duty of care for the economic tort of negligent misrepresentation, they also have an independent duty of care for a pure economic loss claim in negligence. As acknowledged during the hearing of the certification motion, LBP Holdings' negligence claim focuses on the relationship that comes about between the putative Class Members and the Underwriters because the distribution of shares in the case at bar was pursuant to a "bought deal". LBP Holdings also acknowledged that it was not asserting that underwriters acting just as sales agents of the vendor would have comparable duties of care in negligence for pure economic losses.

126 These acknowledgements by LBP Holdings reveal both the novelty and also the tenuousness of the alleged duty of care. In general, there is no recognized duty of care to properly price goods to reflect their genuine value in the marketplace or to perform due diligence in the pricing of the goods sold. In general, while vendors of goods will have contractual duties to purchasers, sometimes statutory duties to purchasers, and duties to not manufacture dangerous or potentially dangerous goods, generally speaking, the law of the sale of goods is *caveat emptor* and permits self-interested hard bargaining. Apart from negligent misrepresentation and warranty in contract, vendors of goods typically do not have a duty of care to purchasers.

127 I begin the analysis of whether there is a duty of care of the type posited in the case at bar by noting that it does not follow that because a defendant has a legally proximate relationship that gives rise to a duty of care for negligent misrepresentation that he or she will necessarily have a duty of care for negligence *simpliciter*. The converse is also true and it does not follow that because a defendant has a duty of care for negligence that he or she will have a duty of care for negligent misrepresentation.

128 These points are trite and can be quickly demonstrated by illustration and analogy. The fact that a defendant motor vehicle driver has a duty of care to a plaintiff passenger to drive the vehicle without negligence does not necessarily mean that the defendant has other duties of care to the passenger, including a duty of care about what he or she says to the passenger about buying stocks in the stock market. Similarly, it does not categorically follow that because a defendant has a proximate relationship giving rise to a duty of care for negligent misrepresentation that the defendant has a duty of care of a different sort.

129 Thus, it does not necessarily follow from the fact that a defendant underwriter has a duty of care for the words it expresses in a certificate in a prospectus that the defendant underwriter has a duty of care to price the shares so that they do not underrate their true value. The duties of care being different, each requires a duty of care analysis. In other words, in the case

at bar, that LBP Holdings' negligent misrepresentation claim falls within an established duty of care to prevent pure economic loss, does not by itself mean that LBP Holdings' discrete negligence claim falls within a new category where pure economic losses are recoverable.

130 The categories of negligence are not closed, but newly proposed categories require new analysis. In the case at bar, the posited Underwriters' duty of care in negligence is a novel cause of action that does not fall within an established duty of care category for pure economic loss. It also cannot be regarded as an extension of an existing category. For example, there is no relationship contractual, statutory, or otherwise where the Underwriters, directly or indirectly, undertook to provide a service for the benefit of the putative Class Members.

131 LBP Holdings' argument for a duty of care in the case at bar is similar to the unsuccessful argument of the plaintiff in *Martel Building Ltd. v. R.*<sup>79</sup> The facts of the *Martel Building Ltd.* case were that Martel leased space to the federal government's Department of Public Works. In the spring of 1991, Martel's president met with officials from Public Works to negotiate a renewal of the lease, but then over a year passed until Public Works indicated that negotiations would have to be completed promptly or an open tender process would begin. Several more meetings followed without much progress and, in October 1992, Martel was told the tender process was proceeding, although Public Works would accept proposals from Martel until October 27, 1992. On that day, a proposal was made that Martel thought the negotiators would recommend, but on October 30, Public Works required that details of Martel's plans to retrofit its building be immediately settled or there would be a tender to find new space. It was not possible for Martel to comply, and tender documents were issued by Public Works. Martel and three others submitted bids and, although Martel's bid was the lowest, it was not awarded the contract. After the lease was awarded to Standard Life, Martel sued Public Works. Martel advanced three different claims, one in contract and two in negligence. With respect to negligence, Martel argued that Public Works had breached a duty to negotiate in good faith and also a duty of care in the tendering process.

132 The Supreme Court's judgment dismissing Martel's claim was written jointly by Justices Iacobucci and Major.<sup>80</sup> They concluded that all three of Martel's claims failed. The duty of care in tendering claim failed because it was subsumed by the contract claim that had failed. As for the breach of a duty to negotiate in good faith, it largely turned on how Public Works had conveyed or not conveyed information to Martel and Justices Iacobucci and Major regarded it as a novel economic loss claim that required a duty of care analysis. They concluded that Martel had shown a sufficiently close relationship between the parties such that the defendant Public Works was under an obligation to be mindful of Martel's legitimate interests; however, they also concluded that policy considerations would negate or limit the scope of the duty of care, the class of persons to whom it is owed, or the damages from a breach of duty. Justices Iacobucci and Major concluded that, as a general proposition, no duty of care arises in conducting negotiations.

133 For the present purposes of analyzing the negligence claim against the Underwriters, Justices Iacobucci's and Major's identification of policy factors negating a duty of care is particularly pertinent. They identified six factors that were relevant to determining whether a duty of care for pure economic loss should be recognized; namely (1) whether extending recovery for pure economic losses would create circumstances of indeterminate liability; (2) whether extending recovery for pure economic losses would deter useful economic activity; (3) whether extending recovery for pure economic losses would encourage or discourage economically efficient conduct; (4) whether extending recovery for pure economic losses would interject tort law as after-the-fact insurance against failures to pursue alternative strategies or opportunities or to act with due diligence or self-vigilance, a necessary ingredient of commerce; (5) whether extending recovery for pure economic losses would introduce the courts to a significant regulatory function when other causes of action already provided remedies for misconduct; and (6) whether extending recovery for pure economic losses would encourage needless litigation and a multiplicity of lawsuits in place of allowing market forces to operate.

134 In the circumstances of the *Martel Building Ltd.* case, there was no indeterminate liability, but the Supreme Court concluded that the other policy factors negated a *prima facie* duty of care. In essence, Justices Iacobucci and Major agreed with the argument of Public Works that to extend the tort of negligence into the conduct of commercial negotiations would be

an unnecessary and unsound invasion of the marketplace where business risks should be borne by the parties and not be re-allocated through the imposition of a duty of care.

135 Returning to the case at bar, assuming that the Underwriters had a duty of care for negligence independent of their duty of care for representations, then in my opinion, policy factors similar to those that were identified in the *Martel Building Ltd.* case negate the duty of care. I accept that there is no problem of indeterminate liability on the particular facts of the case at bar; however, extending an underwriter's liability for pure economic losses beyond an underwriter's current liability for negligent misrepresentation or for statutory liability under the Ontario *Securities Act* would: (a) deter useful economic activity where the parties are best left to allocate risks through the autonomy of contract, insurance, and due diligence; (b) encourage a multiplicity of inappropriate lawsuits; (c) arguably disturb the balance between statutory and common law actions envisioned by the legislator; and (e) introduce the courts to a significant regulatory function when existing causes of action and the marketplace already provide remedies.

136 In the case at bar there are also factors that indicate that the claim against the Underwriters does not even reach the policy factors stage of an *Anns v. Merton* analysis. In the immediate case even if the foreseeability stage of an *Anns v. Merton* analysis is satisfied, the proximity stage arguably is not satisfied. As noted above, the proximity analysis recognizes a distinction between misfeasance and nonfeasance, and at the heart of the negligence claim against the Underwriters, as distinct from the claim for misrepresentation, is the notion that the Underwriters had a gatekeeper's duty to prevent the harm of buying Hycroft's shares at an inflated price. Where the allegation is that the defendant failed to prevent harm, the law requires close examination of the question of proximity,<sup>81</sup> and as noted by Chief Justice McLachlin in *Childs v. Desormeaux*,<sup>82</sup> where the conduct alleged against the defendant is a failure to act, foreseeability alone may not establish a duty of care. In my opinion, even in the circumstances of a bought deal, an underwriter would not anticipate that purchasers would be relying on it to act as a gatekeeper beyond and distinct from its duties of care under s. 130 of the Ontario *Securities Act* and its common law duties with respect to misrepresentations in the prospectus.

137 As reflected by the scheme of the *Securities Act*, which responds to misrepresentations in a prospectus, the role played by the underwriters is different and more remote and less proximate, than the role played by the issuers, the auditors, and others whose words and opinions are found in a prospectus or in the disclosure documents that inform the secondary marketplace in securities. Underwriters, in their role in a distribution of securities pursuant to a prospectus, do not stand in the same relationship of proximity to shareholders as do the others involved in the distribution.

138 In the case at bar, it simply begs the question of whether there is a duty of care in negligence to submit that had the Underwriters fulfilled their duties, the securities would either not have been issued or would have been offered at lower prices. That questioning reads negligence backwards from harm having occurred to a foreseeable duty to prevent harm.

139 I disagree with LBP Holdings' argument that its concurrent and independent negligence claim against the Underwriters is essentially the same as the negligence claims that were made in *Robinson v. Rochester Financial Ltd.*,<sup>83</sup> *Lipson v. Cassels Brock & Blackwell LLP*,<sup>84</sup> *Cannon v. Funds for Canada Foundation*,<sup>85</sup> *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP*,<sup>86</sup> and *Lavender v. Miller Bernstein*,<sup>87</sup> which claims survived a duty of care analysis. In making its argument for a duty of care in negligence, LBP Holdings principally relied on *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP*.

140 In those cases, the role of the defendants and their relationship to the class members was different and more proximate than in the case at bar, where, but for the bought deal, LBP Holdings acknowledged that an underwriter would not have a duty of care beyond his statutory duties and its duty of care with respect to misrepresentations in its certificate.

141 The facts of *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP* were that in March 2010, Rodman & Renshaw LLP, as placement agents, offered a private placement of the shares and warrants of Southern China Livestock, an American corporation that was raising money for its hog farming business in China. The portfolio manager of the plaintiff, Excalibur, a Manitoba limited partnership that invested in small-cap companies carefully read the Private Placement

Memorandum. The Memorandum included the audited financial statements and the auditor's opinion prepared by Schwartz Levitsky Feldman LLP, a firm of chartered accountants that held itself out as an expert in conducting financial due diligence and providing auditing services for companies based in China. Based on his reading of the offering memorandum and relying on the fact that Schwartz Levitsky Feldman LLP had delivered a clean audit opinion, the portfolio manager decided that Excalibur should invest \$950,000 of what turned out to be an approximately \$7.5 million investment by 57 investors. From the proceeds of the private placement, Schwartz Levitsky Feldman LLP was paid \$45,000 for its services. Later that year, in December, Southern China Livestock filed its annual 10-K Report under American securities legislation that included a Management's Discussion and Analysis section. Upon reading the 10-K Report, the portfolio manager was shocked by the disclosures and he concluded that the audit report could not have fairly and fully represented the financial state of Southern China Livestock. Seven months' later Southern China Livestock's North American directors resigned and it closed. Its shares and warrants were worthless. With the demise of Southern China Livestock, Excalibur commenced a class action against Schwartz Levitsky Feldman LLP and advanced concurrent claims for negligent misrepresentation and negligence. In other words, Excalibur submitted that in breach of a duty of care, Schwartz Levitsky Feldman LLP spoke falsely (negligent misrepresentation) and alternatively in breach of a duty of care, Schwartz Levitsky Feldman LLP ought not to have spoken at all (negligence). The essence of Excalibur's negligence claim is that Schwartz Levitsky Feldman LLP breached a duty of care by issuing a clean audit report and but for this report the private placement would not have been able to proceed.

142 In contrast to the circumstances and the relationships in *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP*, in the case at bar, the role of the Underwriters is different. The Underwriters are not auditors; they are not hired to provide an opinion or to develop an investment transaction or an investment scheme, but rather they are hired essentially to be distributors of another's goods often as sales agents or, as in the immediate case, by assuming the risks of a bought deal. Underwriters make a weak representation of the sort made in the case at bar that the prospectus contains full, true and plain disclosure to the best of their knowledge, information and belief. They do not make strong representations of the nature made by the promoters, auditors, lawyers, and experts involved in the creation of the investment. Underwriters are obliged by statute to make a representation but are afforded a variety of statutory defences if they exercise due diligence before providing their certificate, but that is not the same thing as assuming a responsibility to ensure that the purchasers are making a sound bargain.

143 For similar reasons, while I do not doubt the soundness of the conclusions in *Robinson v. Rochester Financial Ltd.*,<sup>88</sup> *Dobbie v. Arctic Glacier Income Fund*,<sup>89</sup> *Lipson v. Cassels Brock & Blackwell LLP*,<sup>90</sup> *Cannon v. Funds for Canada Foundation*,<sup>91</sup> and *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP*<sup>92</sup> that it was not plain and obvious that there was not a concurrent duty of care in negligence, the case at bar, which involves underwriters, and not auditors, promoters, and lawyers expressing tax opinions necessary to market or promote an investment, does not present a tenable duty of care in negligence in addition to the underwriters' duty of care in negligent misrepresentation.

144 Nor is *Lavender v. Miller Bernstein*,<sup>93</sup> where on a summary judgment motion on the common issues in a class action against an auditing firm, Justice Belobaba held that the auditors had breached a free-standing duty of care in negligence of any assistance to LBP Holdings in advancing its negligence claim against the Underwriters in the case at bar. In that case, Justice Belobaba also held that the negligence claim was not subsumed by the negligent misrepresentation claim against the auditors.

145 The facts of *Lavender v. Miller Bernstein* were that Buckingham Securities was a securities dealer that was obliged to file with the Ontario Securities Commission ("OSC") audited Form 9 reports confirming its minimum net free capital and confirming the segregation of assets and investor accounts. The accounting firm Miller Bernstein audited the Form 9s. It, however, failed to note that the reports were false for fiscal years 1998, 1999, and 2000. In 2001, the OSC placed Buckingham Securities into receivership because it failed to segregate investor (class member) assets and to maintain a minimum net free capital in breach of regulatory requirements. Buckingham Securities went out of business, and the investors lost \$10.6 million. The plaintiff, Lavender, who was one of the investors, sued Miller Bernstein for negligence, but it submitted that he was attempting to dress up a negligent misrepresentation claim as something else because he was unable to establish reliance. Miller Bernstein also submitted that it had no duty of care to its client's client.

146 In *Lavender v. Miller Bernstein*, Justice Belobaba accepted that there could be a free-standing cause of action in negligence against the auditors in a situation in which a duty of care exists independent of the duty of care for negligent misrepresentation, and then Justice Belobaba examined whether the relationship between Miller Bernstein with Buckingham Securities' investors was proximate enough to give rise to a duty of care. Justice Belobaba appreciated that it was a novel duty of care to safeguard against pure economic loss and that an *Anns v. Merton* duty of care analysis was required. He stated:<sup>94</sup>

16. The more pressing issue is whether on the facts herein the plaintiff can establish a duty of care. This is a case about an auditor's misstatement that was filed with the OSC, was never seen by the class members, and arguably caused pure economic loss to the auditor's client's clients. This is obviously not a conventional negligence case. Nor is it sufficient for the plaintiff to say that the case fits within the "negligence performance of a service" category in which courts have recognized duties of care in certain third-party-benefit situations. The underlying facts in the cases that have been grouped by academic commentators under the "negligent performance of a service" category are varied and the applicable law has not yet been uniformly articulated or accepted. [footnotes omitted]

147 Justice Belobaba undertook the duty of care analysis, and he concluded that on the particular facts of the case, a duty of care had been established. He stated:<sup>95</sup>

20. Here on the evidence, I find that the foreseeability and proximity requirements are satisfied. Even though the class members never saw or even knew, at the time, about the Form 9s, the defendant auditor as a matter of simple justice had an obligation to be mindful of the plaintiff's interests when auditing and filing the Form 9 reports with the OSC.

21. My analysis is based on the auditing standards applicable at the time and the evidence and admissions of the parties and their experts. The defendant understood that the Form 9s were used by the OSC to police the securities dealers and protect their investors. If the Form 9s indicated a breach of the segregation or minimum capital requirements, the OSC would intervene. If the defendant was negligent in its audit and filed false Form 9s, causing the OSC to believe that the securities dealer was in compliance with the regulatory requirements when the truth was otherwise, monies invested by clients of the securities dealer could well be lost. In short, the defendant . . . well understood the consequences to "its client's clients" if the segregation or capital deficiency information was misstated in the Form 9s - that a negligent audit of these Form 9s could expose the class members to the very loss that they incurred.

...

23. In my view, on the particular facts herein, a relationship of sufficient closeness has been established. The defendant was retained by Buckingham to audit and file the Form 9s. In doing this "assurance audit" for its client, the defendant had access to the individual names and investor accounts of every class member. The defendant knew the exact amounts involved, and even corresponded with some of the class members to verify that Buckingham's internal client account records were complete and accurate. Some of the class members responded to the auditor's letter and alerted the defendant to serious discrepancies between Buckingham's internal account records and the actual holdings and activity within their accounts. The defendant also knew, without being told, that even if the class members knew nothing about the Form 9s, they would reasonably expect Buckingham and its auditor to provide any information required under provincial law accurately and honestly, particularly if that information could affect their financial interests.

24. I therefore have no difficulty concluding on the particular facts of this case, that it is just and reasonable to impose a *prima facie* duty of care on the defendant auditor. Tracking the language used by the Supreme Court in *Hercules Management*, I am satisfied that "as a matter of simple justice, the defendant [had] an obligation to be mindful of the plaintiff's interests in going about his or her business." [footnotes omitted]

148 While there was a duty of care existing on the particular facts of *Lavender v. Miller Bernstein*, the particular facts of the case at bar, including the pleaded fact that the purchasers relied on the Underwriters' certificate in making their investment decision, do not lead to comparable conclusions that that the purchasers could reasonably expect the Underwriters to have

superadded duties of care to act as a gatekeeper, to undertake due diligence, and to assume the risk of ensuring that the shares were properly valued. The Underwriters do not have a responsibility comparable to the auditors in *Lavender v. Miller Bernstein* to prepare a document designed to ensure regulatory compliance. Nor do I think that it is a matter of simple justice that underwriters who can be sued for both negligent misrepresentation and also under s. 130 of the Ontario *Securities Act* should have the posited superadded duties of care in negligence when they enter into a bought deal that exposes them to the commercial risk associated with the sale of the shares. Insofar as the bought deal is concerned, the Underwriters had a contractual relationship and warranting the value of the shares sold is a matter of contract not negligence *simpliciter*.

#### D. Conclusion

149 For the above reasons, I certify the action as against the Hycroft Defendants and I dismiss the certification motion as against Cormark Securities and Dundee Securities.

150 If the parties cannot agree about the matter of costs, they may make submissions in writing beginning with the submissions of Cormark Securities and Dundee Securities within 20 days from the release of these Reasons for Decision followed by LBP Holdings' submissions within a further 20 days.

*Motion granted in part.*

Civil practice and procedure --- Limitation of actions — Actions in tort — Specific actions — Actions against particular parties — Barristers and solicitors

Between 2000 and 2003, L participated in timeshare program in which he, and others, donated both cash and also resort timeshare to Canadian athletic associations — L anticipated receiving tax credits for his charitable donations — Tax opinion prepared by law firm, CBB, was included in promotional material — CBB's opinion was that it was unlikely that Canada Customs and Revenue Agency could successfully deny tax credits — In 2004, Canada Revenue (CR) disallowed anticipated tax credits — In

2004 and 2005, L and other participants sought advice from law firm, T, and in 2006 some participants commenced litigation against CR as test cases — In 2008, test case litigation settled, and CR allowed participants to receive tax credit for cash portion of donation but L was denied greater part of his anticipated tax credit based on value of donated timeshares — In 2009, L commenced proposed class action against CBB for damages for negligence and negligent misrepresentation — L moved for certification of class action — Motion dismissed — L's proposed class action was statute-barred — Class members, including L, discovered or should have discovered their tort claims against CBB when validity of tax credits was denied by CR in 2004 — At that time and not later than 2006, when T was retained to sue CR, class members knew or ought to have known material facts on which negligence claim or negligent misrepresentation claim against CBB was based — As soon as letters from CR started to arrive, L and class members knew or ought to have known that CBB's opinion had caused them damage because but for those opinions they would not have participated in timeshare program and suffered damages.

Tax --- Income tax — Tax credits — Charitable donations — Miscellaneous

Between 2000 and 2003, L participated in timeshare program in which he, and others, donated both cash and also resort timeshare to Canadian athletic associations — L anticipated receiving tax credits for his charitable donations — Tax opinion prepared by law firm, CBB, was included in promotional material — CBB's opinion was that it was unlikely that Canada Customs and Revenue Agency could successfully deny tax credits — In 2004, Canada Revenue (CR) disallowed anticipated tax credits — In 2004 and 2005, L and other participants sought advice from law firm, T, and in 2006 some participants commenced litigation against CR as test cases — In 2008, test case litigation settled, and CR allowed participants to receive tax credit for cash portion of donation but L was denied greater part of his anticipated tax credit based on value of donated timeshares — In 2009, L commenced proposed class action against CBB for damages for negligence and negligent misrepresentation — L moved for certification of class action — Motion dismissed — L's proposed class action was statute-barred — Class members, including L, discovered or should have discovered their tort claims against CBB when validity of tax credits was denied by CR in 2004 — At that time and not later than 2006, when T was retained to sue CR, class members knew or ought to have known material facts on which negligence claim or negligent misrepresentation claim against CBB was based — As soon as letters from CR started to arrive, L and class members knew or ought to have known that CBB's opinion had caused them damage because but for those opinions they would not have participated in timeshare program and suffered damages.

## Table of Authorities

### Cases considered by Perell J.:

*Abdool v. Anaheim Management Ltd.* (1995), 1995 CarswellOnt 129, 21 O.R. (3d) 453, 31 C.P.C. (3d) 197, 78 O.A.C. 377, 121 D.L.R. (4th) 496 (Ont. Div. Ct.) — referred to

*Anderson v. Wilson* (1999), 36 C.P.C. (4th) 17, 44 O.R. (3d) 673, 1999 CarswellOnt 2073, 175 D.L.R. (4th) 409, 122 O.A.C. 69 (Ont. C.A.) — referred to

Generally — referred to

MOTION by class member for certification of class action.

**Perell J.:**

**A. Introduction**

1 Between 2000 to 2003, Jeffrey Lipson and about 900 other Canadian taxpayers participated in a Timeshare Program in which they donated both cash and also resort timeshares to Canadian athletic associations. Mr. Lipson and the donors anticipated receiving tax credits for their charitable donations. In the marketing of the Timeshare Program, a tax opinion prepared by the law firm Cassels Brock & Blackwell LLP, was included in the promotional material. The Cassels Brock opinion was that it was unlikely that the Canada Customs and Revenue Agency could successfully deny the tax credits. Mr. Lipson says that he and the other participants would not have participated in the program but for the opinion of a reputable law firm that the charitable tax credits under the *Income Tax Act* would be available.

2 In 2004, Canada Revenue disallowed the anticipated tax credits in their entirety.

3 In 2004 and 2005, Mr. Lipson and other participants sought advice from Thornsteinssons LLP, a law firm that specializes in tax litigation, and in 2006, some of the participants commenced litigation against Canada Revenue as test cases to determine the availability of the tax credits for the donations.

4 In 2008, the test case litigation settled, and Canada Revenue allowed the participants to receive a tax credit for the cash portion of the donation. Mr. Lipson and the other participants in the Timeshare Program, however, were denied the greater part of their anticipated tax credit based on the value of the donated timeshares.

5 In 2009, to recover his losses, Mr. Lipson commenced a proposed class action against Cassels Brock for damages for negligence and negligent misrepresentation.

6 Cassels Brock brought third party claims against Mintz & Partners LLP, Deloitte & Touche LLP, Glenn F. Ploughman, Shelley Shifman, Prenick Langer LLP, TMK Financial Group Ltd., Gardiner Roberts LLP, the Estate of Ronald J. Farano, deceased, John Doe 1-100, John Doe Inc. 1-100, John Doe Partnership 1-100, John Doe LLP 1-100. These third parties were involved in the promotion and marketing of the Timeshare Program.

7 Mr. Lipson now brings a motion for certification of his action as a class action under the *Class Proceedings Act, 1992*, S.O. 1992, c. C.6.

8 Cassels Brock and the third parties Gardiner Roberts and the Farano Estate oppose the certification of Mr. Lipson's action as a class proceeding and, among other things, they submit that the claims of all the Class Members, including most particularly Mr. Lipson, are statute-barred under the *Limitations Act, 2002*, S.O. 2002, c. 24, Sched. B.

9 Cassels Brock also submits that Mr. Lipson's proposed class action does not satisfy the common issues, preferable procedure, and suitable representative plaintiff criteria of the test for certification. Further, Cassels Brock submits that Mr. Lipson's negligence claim does not disclose a reasonable cause of action or it is a disguised and defective negligent misrepresentation claim purporting to obviate the reasonable reliance and causation elements of the tort.

10 For the Reasons for Decision that follow, it is my opinion that Mr. Lipson's proposed class action is statute-barred and, therefore, it should be dismissed.

11 Further, it is my opinion that, but for the fatal statute bar, Mr. Lipson's action would have satisfied the criterion for certification, although I should acknowledge that: (a) some of the proposed common issues do not meet the test for commonality and require revision; and (b) Cassels Brock had a strong, albeit ultimately unsuccessful argument that a class proceeding was not the preferable procedure for the resolution of the Class Members' claims.

12 After this introduction, I will explain my opinions by: (a) describing the evidentiary background; (b) describing the factual background; (c) analyzing whether Mr. Lipson's action satisfies the criteria for certification ignoring Cassel Brock's, Gardiner Roberts' LLP and the Farano Estate's arguments that the action is statute-barred; (d) analyzing whether the Class Members' claims are statute-barred; and (e) concluding with some directions about the determination of costs for the certification motion and directions about the resolution of the third party claims.

## B. Evidentiary Background

13 The evidentiary record for the certification motion was as follows:

- An affidavit of Mr. Lipson, who was cross-examined for the certification motion.
- An affidavit from Alexandra Carr, an associate lawyer at Roy Elliott O'Connor LLP, proposed class counsel. She appended a transcript of a cross-examination of Harley Mintz from another action with respect to the Timeshare Program.
- Affidavits containing an opinion from law professor, Vern Krisna, who was retained by Mr. Lipson to provide an expert opinion on the nature of the Timeshare Program's tax credits and on the validity or appropriateness of the legal opinions prepared by Cassels Brock about the tax credits for charitable donations. Professor Krisna was cross-examined for the certification motion.
- An affidavit from Eric Wagner, an articling student with the law firm of Lenczner Slaght Royce Smith Griffin LLP, the lawyers of record for Cassels Brock. He collected materials associated with the Timeshare Program.
- The transcript of a cross-examination of Stephen Elliott, one of the promoters of the Timeshare Program.

## C. Factual Background

### 1. The Timeshare Program

14 Around 2000, Stephen Elliott and Steven Mintz approached the accounting firm, Mintz & Partners with the idea of a Timeshare Program that would provide tax benefits to participants. Steven Mintz's brother Harley was a partner of the accounting firm.

15 Messrs. Elliot and Mintz's idea was that participants in the Timeshare Program would donate timeshares to a Canadian amateur athletic association along with sufficient cash to discharge the encumbrances against the timeshares. In return for the donations, the athletic association would provide the participants with tax receipts for the charitable donations.

16 The Timeshare Program was established, and Mintz & Partners established an entity known as Tuscany Marketing Services to oversee the marketing of the program.

17 Many participated in the marketing of the Timeshare Program, including Venturedge Corporation, which was a corporation owned by Gerald Prenick and Morris Langer, the principals of Prenick Langer LLP, another accounting firm and a third-party to these proceedings.

18 More precisely, the structure of the Timeshare Program and of the associated marketing campaign was as follows:

- Mr. Adrian Crosbie-Jones, a resident of the Bahamas, purchased timeshares in a Caribbean resort, which he settled (conveyed) to a trust known as the Athletic Trust of Canada.
- The Athletic Trust had two classes of beneficiaries. One class was the capital property beneficiaries, who at the discretion of the trustee would be assigned timeshares for which they had to agree to pay ongoing expenses and to assume the obligation to pay the encumbrance or lien against the timeshare.
- Canadian residents could apply to become beneficiaries of the trust if they demonstrated past charitable giving and a desire to assist amateur athletics in Canada. The trustee had the discretion to allocate timeshares to the beneficiaries who then would be in a position to donate them.
- A capital property beneficiary with a timeshare could, but was not obliged to, donate it to a Canadian amateur athletic association along with sufficient cash to have the timeshare conveyed free and clear of encumbrances.
- In return for a donation, the athletic association would issue two donation tax receipts.
- One tax receipt was for the donor's cash contribution to discharge the encumbrance, which ranged from \$4,600 to \$9,700 per timeshare.
- The other tax receipt was for the then fair market value of the donated timeshare less the amount of the encumbrance. The second receipt ranged from between \$8,765 and \$18,900.
- Thus, the two charitable donation receipts issued to donor participants in the Timeshare Program ranged from between \$13,275 to \$28,000 per timeshare.
- It should be noted that from an economic perspective, under these arrangements and assuming that tax receipts were operative, a donor would earn an approximately 35% return on his or her cash contribution to the athletic association, since it was the settlor of the trust who had paid for the timeshare settled on the Athletic Trust of Canada that was being conveyed to the athletic association.
- Canadian Athletic Advisors Ltd. was retained to sell or to re-sell the timeshares that were being donated to the athletic associations. Canadian Athletic Advisors received a 5% commission of the revenue from the sale of the timeshares, net of expenses.
- The athletic associations that received donations agreed to pool their donated timeshares into a common marketing pool to facilitate the re-sales by Canadian Athletic Advisors.
- The athletic associations agreed that if the resort developers repurchased 100 or more timeshares, the associations would sell a one bedroom timeshare for \$1,000 (USD) and a two bedroom timeshare for \$1,100 (\$USD).

- It may be noted that under these arrangements, although the athletic association would have issued tax receipts for between \$13,275 and \$28,600 per timeshare, its own financial resources would ultimately have increased only by around a \$1,300.
- The promotional materials for the Timeshare Program promised attractive income tax benefits. The marketing package included a Beneficiary Guide and a FAQ (frequently asked questions) sheet.
- Potential participants in the Timeshare Program could and did contact the promoters of the Timeshare Program, and many of the potential participants could and did obtain independent financial and legal advice from lawyers and accountants.
- The promotional material referred to the fact that Canadian Athletic Advisors had retained Cassels Brock to provide legal opinions with respect to the tax consequences of the Timeshare Program.
- The sales force was provided with the promotional material and with a due diligence information package. The sales force was provided with the legal opinions obtained from Cassels Brock.

## **2. The Cassels Brock Legal Opinions**

19 In 2000, Messrs. Elliot and Mintz retained Cassels Brock to provide Canadian Athletic Advisors with a legal opinion about the tax consequences under the *Income Tax Act* of participating in the Timeshare Program.

20 Cassels Brock is a full service law firm carrying on business in Toronto as a limited liability partnership. Lorne Saltman, a tax lawyer and a partner of the firm, prepared the opinion for Canadian Athletic Advisors.

21 In the following years, Cassels Brock prepared more legal opinions for Canadian Athletic Advisors about the Timeshare Program. There are six opinions. The opinions are substantially the same.

22 Using the October 8, 2003 opinion as an example, it is a 26-page, single-spaced, legal opinion divided into nine parts after an introduction. The parts are: (1) Facts; (2) Relevant Provisions of the Tax Act; (3) Meaning of "Gift"; (4) Transfer of Timeshare Weeks to Class A Beneficiaries; (5) Capital Gains; (6) Valuation; (7) General Anti-Avoidance Rule ("GAAR"); (8) Tax Shelter Identification Number; and (9) General Comments.

23 For present purposes, the following excerpts from the Cassels Brock opinions are pertinent, with emphasis added.

Re: Donation of One-Bedroom and Two-Bedroom, Biennial Timeshare Vacation Weeks

You have requested our opinion regarding the Canadian Federal Income Tax consequences relating to a donation of a 75-year leasehold Biennial Timeshare Resort Weeks at the Alexandra Resort and Spa in Providenciales, Turks and Caicos Islands, British West Indies (the "Timeshare Weeks") by individual Canadian resident taxpayers. It is contemplated that any such donation would entitle the donor to claim a tax credit under the *Income Tax Act* (Canada) (the "Tax Act").

Our comments are based on the facts and assumptions expressed below. **This opinion is specifically directed to potential donors who are individuals and who acquire and hold the Timeshare Weeks as capital property.** The Timeshare Weeks will generally be considered to be held as capital property, unless the taxpayer is a trader or dealer in timeshare weeks, has acquired the Timeshare Weeks as an adventure in the nature of trade, or does not otherwise hold the Timeshare Weeks for investment purposes. ....

## **3. Meaning of "Gift"**

In order to claim a tax credit for a donation there must be a complete gift of the property. Each of several elements must be found in order for a donation to qualify as a gift for income tax purposes. These elements are summarized by the CCRA in its Interpretation Bulletin IT-110R3 entitled, "Gifts and Official Donation Receipts" ....

If a Class A Beneficiary chooses to retain the Timeshare Weeks, he or she may do so and hold, exchange, or sell the Timeshare Weeks, as well as to utilize them for his or her own vacations, or for any other lawful and permitted purposes. **If all or substantially all of the Class A Beneficiaries who receive Timeshare Weeks donate them, the CCRA may be more inclined to challenge the arrangement (but see our opinion below at page 23 as to the unlikely success of such a challenge.) ....**

#### 7. General Anti-Avoidance Rule ("GAAR")

Although the current version of GAAR has been in place since 1988, there has to date been little jurisprudence of direct relevance to charitable donations. GAAR is intended to apply to situations where a transaction or series of transactions results in a tax benefit, unless the transaction may reasonably be considered to have been undertaken or arranged primarily for *bona fide* purposes other than to obtain the tax benefit, or unless the transaction does not result in a misuse of the provisions of the Tax Act or an abuse having regard to the provisions of the Tax Act as a whole. ....

Accordingly, **we are of the opinion that a good argument can be made that it cannot reasonably be said that there is an abuse of the provisions of the Tax Act as a whole in these circumstances.** In our opinion, and based on the foregoing, a donation of Timeshare Weeks in these circumstances would not likely be successfully attacked under GAAR. ....

#### 9. General Comments

This opinion is based on the current provisions of the Tax Act, the regulations thereunder, and our understanding of the current administrative practices of the CCRA. .... No advance tax ruling has been sought or obtained from the CCRA to confirm the tax consequences or any of the transactions described herein.

**This opinion may be relied upon only by CAA and potential donors, their agents and professional advisors, for the purpose of the transactions contemplated by this opinion.** It may not be relied upon by any other person or for any other purpose, nor may it be quoted in whole or in part or its existence or contents otherwise referred to, without our prior written consent.

**Based on and subject to the foregoing review, in our opinion it is unlikely that the CCRA could successfully deny the deemed adjusted cost base of the Timeshare Weeks to, nor the tax credit claimed by, the Class A Beneficiaries who receive a distribution of the Timeshare Weeks from the Trust, and subsequently choose to make a voluntary and complete donation of some or all of their Timeshare Weeks to an RCAA.**

This opinion is based upon our understanding of the facts and circumstances surrounding the proposed arrangements. If these facts or circumstances turn out to be different from what we have understood, our opinion may be different, in which event this letter should not be relied upon.

24 In Mr. Lipson's action, a core allegation against Cassels Brock is that it failed to consider whether Canada Revenue would consider the conveyance of timeshares a gift in accordance with the *Income Tax Act* jurisprudence.

25 It was Professor Krisna's opinion that the Cassels Brock opinions did not address the circumstance that if a tax credit was available for the donation of a timeshare, the credit would yield a financial return to the donor that exceeded his or her cash outlays in making the donation. His opinion was that Cassels Brock failed to address the implications of the financial advantages of making a donation of timeshares in circumstances where the purported donor was gaining (being enriched) and not losing (being impoverished) by his or her donation. This circumstance ran the risk that Canada Revenue would deny that the donation was actually a gift or intended to be a gift; i.e. Canada Revenue could submit that the donor did not actually make a gift or did not have the necessary donative intent of gift giving.

26 It was also Professor Krisna's opinion that Cassels Brock's opinion did not meet the standard of care expected of a tax lawyer.

### **3. Other Legal Opinions**

27 In December 2002, the law firm Aikins, McCauley & Thorvaldson provided a tax opinion to Canadian Athletic Advisors about whether the opinions set out in the Cassels Brock opinion for the Canada *Income Tax Act* were applicable to the Manitoba Tax Act. The firm provided the perfunctory legal opinion that:

Although we have not independently verified the strength of the arguments raised or the conclusions reached in the Cassels Brock Opinion, given the similarities between the *Federal Tax Act* and the *Manitoba Tax Act*, we know of no reason why similar arguments could not be raised and similar conclusions could not be reached, with the necessary contextual changes, with respect to the *Manitoba Tax Act*.

28 As noted above, one of the entities marketing the Timeshare Program was Venturedge, which was a corporation established by Mr. Prenick and Mr. Langer, the principals of the third party Prenick and Langer LLP.

29 On behalf of Venturedge, Mr. Prenick retained the late Ronald J. Farano, Q.C., a tax partner at the law firm Gardiner Roberts LLP to provide a second opinion about the Timeshare Program. The opinion written by Mr. Farano stated:

Based upon my understanding of the law as it exists as of this date the [Cassels Brock] Opinion properly reflects the legal situation in an income tax context.

30 It is a contested point about whether Mr. Prenick may have provided Mr. Farano's opinion to prospective participants in the Timeshare Program.

### **4. Mr. Lipson's Participation in the Timeshare Program**

31 In the fall of 2000, Morris Langer of Prenick Langer LLP, who was Mr. Lipson's accountant, told Mr. Lipson about the Timeshare Program.

32 Jeffrey Lipson is a wealthy retired businessman living in Toronto, Ontario. Before his retirement, he oversaw his family's retail business and he was a real estate investor.

33 Mr. Lipson says that he did not understand the intricacies of the Timeshare Program, and he asked Mr. Langer whether there was a legal opinion to support the tax benefits. Mr. Langer advised him that Cassels Brock had issued a supporting legal opinion. This satisfied Mr. Lipson, who says that he had a high aversion to financial risk, and he decided to participate in the program. Mr. Lipson says that he would not have participated in the Timeshare Program if there had not been a favourable tax opinion from a reputable law firm.

34 Mr. Lipson, however, did not read the Cassels Brock opinion, and he has no recollection of ever reading it even to this date.

35 In 2000 and in the following years, Mr. Lipson went ahead and participated in the program. After his 2000 donation, he did not put his mind to the Cassels Brock opinion before making more donations.

36 For 2000, he claimed tax credits of \$634,352. For 2001, he claimed credits of \$1,261,988. For 2002, he claimed credits of \$2,085,835. For 2003, he claimed credits of \$1,148,879.60.

### **5. The Denial of the Tax Credits and Proceedings Against Canada Revenue**

37 In October and November 2004, in terse letters to the participants in the Timeshare Program, Canada Revenue disallowed the charitable donation receipts as a basis for tax credits. As an explanation for denying the charitable donations: (1) Canada Revenue denied that the Athletic Trust was a validly constituted trust and, therefore, Canada Revenue's position was that there had been no valid transfer of timeshares; (2) Canada Revenue denied that the donors had acquired legal title to timeshares and denied that the donors had transferred timeshares to the athletic associations; (3) Canada Revenue denied that the Athletic Trust was a not charitable trust; (4) Canada Revenue denied that the donation of the timeshares was a true gift and was not giving

willingly without conditions or without restrictions on the charity; (5) Canada Revenue contended that the reported fair market value was significantly overstated.

38 With the receipt of the correspondence from Canada Revenue, Mr. Lipson immediately realized that there was a problem, and he sought legal and accounting advice at some expense. During his cross-examination, he stated that he realized that the tax treatment allegedly ensured by Cassel Brock's opinion "was not going to happen."

39 In April 2004, Mr. Lipson and many other participants retained Thornsteinssons LLP to represent them in dealing with Canada Revenue with respect to the Timeshare Program.

40 In January 2006, several of Thornsteinssons' clients brought test cases to challenge the disallowances of the tax receipts.

41 Also in 2006, Mr. Lipson filed notice of objection to his reassessments. He claimed that he was entitled to the full amount of the tax credits. These notices were held in abeyance pending the determination of the test cases.

42 In 2008, CCRA settled the test cases, and it offered to settle with all of the donors. Mr. Lipson settled with CCRA at that time.

43 In the settlement, Canada Revenue agreed that the cash paid by the donors to discharge the encumbrances against the timeshares constituted a charitable donation entitled to a tax credit. Canada Revenue, however, denied any charitable donation for the alleged fair market value of the donated timeshare.

44 Mr. Lipson submits that the settlement with Canada Revenue crystallized his damages and the damages suffered by the other participants in the Timeshare Program caused by the negligence of Cassels Brock. He further submits that but for the Cassels Brock opinions there would not have been a Timeshare Program. He submits that with the settlement, he discovered that he had suffered damages and that he had a claim against Cassels Brock for negligence and negligent misrepresentation.

45 Mr. Lipson submits that his heads of damages are: (a) special damages associated with the litigation with Canada Revenue; (b) the expense of interest arrears on his unpaid taxes; and (c) lost financial opportunities. The claims of the proposed Class Members are similar.

## ***6. The Class Action***

46 After the settlement with Canada Revenue, on April 15, 2009, Mr. Lipson commenced a proposed class action.

47 It should be noted that Mr. Lipson's action was commenced almost four and a half years from the first letters from Canada Revenue disallowing the tax credits and two and a half years after retaining a law firm to take proceedings against Canada Revenue.

48 Mr. Lipson claims damages in the amount of \$55 million for professional negligence and negligent misrepresentation. He also claims special damages for accounting, legal and other professional fees and expenses.

49 In his Statement of Claim against Cassels Brock, Mr. Lipson advances a claim of solicitor's negligence based on the allegation that the law firm provided advice negligently.

50 Mr. Lipson pleads that Cassels Brock breached a duty to Class Members to exercise the care and skill of a reasonably competent tax solicitor by:

(a) concluding that it was reasonably unlikely that the Canada Revenue could successfully deny the tax credits claimed by the Class Members in connection with the Timeshare Program;

(b) failing to consider or explain that Canada Revenue might deny all of the tax credits claimed by the Class Members in connection with the Timeshare Program on the grounds that they lacked the required donative intent to make a gift to the athletic associations because they had entered into a series of predetermined transactions merely to obtain a tax benefit; and

(c) permitting Cassels Brock's name and reputation to be used by the Athletic Trust in promoting and legitimizing the Timeshare Program in circumstances where Cassels Brock failed to exercise the requisite reasonable care and skill in assessing the income tax consequences relating to donations under the Timeshare Program.

51 Mr. Lipson pleads that but for Cassels Brock's negligence, the promoters of the Timeshare Program would not have created and made the Timeshare Program available to the public, and could not have successfully promoted the Timeshare Program. He pleads that Cassels Brock knew or should have known that without a favourable tax opinion, the Timeshares Program would not have been or could not have been made publicly available or successfully promoted. He pleads that Cassels Brock knew or ought to have known that potential donors, including Lipson and the other Class Members, would rely upon the Legal Opinions, including the existence and favourable nature of the Legal Opinions, in deciding whether to participate in the Timeshare Program in each Taxation Year. He pleads that but for Cassels Brock's involvement, no Class Member would have participated in the Timeshare Program and none would have suffered a loss.

52 He pleads that the opinions were prepared by Cassels Brock knowing that a favourable tax opinion was a necessary precondition to the creation and successful promotion of the Timeshare Program and that the Class Members (including Lipson) would rely on the existence of a favourable tax opinion in deciding whether to participate in the Timeshare Program. He pleads that in reliance on the legal opinions and its express and implied representations, the Class Members decided to participate in the Timeshare Program on the understanding they could both support amateur athletics and reduce their tax liability.

53 Mr. Lipson proposes the following class definition, which he estimates will identify approximately 900 Class Members:

All individuals who applied and were accepted to be beneficiaries of the Athletic Trust in 2000, 2001, 2002 and/or 2003 and received Timeshare Weeks from the Athletic Trust and donated them, together with a cash donation, to one or more of the RCAAAs (the "Class Members" or the "Class").

54 Mr. Lipson proposes the following common issues:

#### **Negligence**

- (1) Did the Defendant owe the Class a duty of care (in, among other things, negligence or negligent misrepresentation) in the preparation of the Legal Opinions?
- (2) If the answer to common issue 1 is "yes", what is the content of the standard(s) of care?
- (3) Did the Defendant breach the foregoing standard(s) of care? If so, how?
- (4) If the answer to common issue 3 is "yes", did the Defendant's breach of the foregoing standard(s) of care cause or materially contribute to the damages of the Class Members?

#### **Damages or Other Relief**

- (5) If the answer to common issue 4 is "yes", what types or heads of damages, if any, are the class members entitled to?
- (6) If the answer to common issue 4 is "yes" what remedy or remedies, if any, are the Class Members entitled to?
- (7) If the Class Member is entitled to a damages award, can some or all of that award be determined commonly? If so, what is the quantum and how?

55 On April 15, 2011, Cassels Brock issued a third party claim against: Mintz & Partners LLP; Deloitte and Touche LLP; Glenn F. Ploughman; Shelley Shifman; Prenick Langer LLP; TMK Financial Group Ltd.; Gardiner Roberts LLP; the Estate of Ronald J. Ferano, deceased; John Doe 1-100; John Doe Inc. 1-100; John Doe Partnership 1-100; and John Doe LLP 1-100. It is alleged that these third parties promoted or marketed the Timeshare Program.

56 Mintz & Partners LLP, Gardiner Roberts LLP, and the Estate of Ronald J. Farano, deceased have defended the main action.

57 Mintz & Partners LLP, Deloitte & Touche LLP, Prenick Langer LLP, Gardiner Roberts LLP, and the Estate of Ronald J. Farano, deceased, have defended the Third Party Claim.

58 On July 27, 2011, I granted the third parties leave to participate on the certification motion, and Gardiner Roberts and the Farano Estate did participate and they opposed certification.

59 Cassels Brock submits that several of the criteria for certification have not been satisfied. In any event, Cassels Brock and Gardiner Roberts LLP and the Farano Estate submit that the proposed class action is statute-barred.

#### D. The Criteria for Certification as a Class Action

##### 1. Introduction

60 Pursuant to s. 5(1) of the *Class Proceedings Act, 1992*, the court shall certify a proceeding as a class proceeding if: (a) the pleadings disclose a cause of action; (b) there is an identifiable class; (c) the claims of the class members raise common issues of fact or law; (d) a class proceeding would be the preferable procedure; and (e) there is a representative plaintiff who would adequately represent the interests of the class without conflict of interest and who has produced a workable litigation plan.

61 For an action to be certified as a class proceeding, there must be a cause of action, shared by an identifiable class from which common issues arise that can be resolved in a fair, efficient, and manageable way that will advance the proceeding and achieve access to justice, judicial economy, and the modification of behaviour of wrongdoers: *Sauer v. Canada (Minister of Agriculture)*, [2008] O.J. No. 3419 (Ont. S.C.J.) at para. 14, leave to appeal to Div. Ct. refused, (Ont. Div. Ct.).

62 On a certification motion, the question is not whether the plaintiff's claims are likely to succeed on the merits but whether the claims can appropriately be prosecuted as a class proceeding: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 16.

63 The test for certification is to be applied in a purposive and generous manner, to give effect to the important goals of class actions — providing access to justice for litigants; promoting the efficient use of judicial resources; and sanctioning wrongdoers to encourage behaviour modification: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at paras. 26-29; *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at paras. 15 and 16.

64 The purpose of a certification motion is to determine how the litigation is to proceed and not to address the merits of the plaintiff's claim; there is to be no preliminary review of the merits of the claim: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at paras. 28-29.

65 In the case at bar, Cassels Brock did not dispute that Mr. Lipson's Statement of Claim disclosed a cause of action in negligent misrepresentation, and it accepted that there was a satisfactory class definition and an adequate litigation plan if the action was certified as a class action.

66 However, Cassels Brock challenged Mr. Lipson's pleading in negligence. The law firm also challenged the commonality of the proposed common issues, and it disputed that a class action was the preferable procedure. It challenged Mr. Lipson as a suitable representative plaintiff.

67 In any event, as noted above, Cassels Brock, Gardiner Roberts, and the Farano Estate submitted that the class action should be dismissed as statute-barred, which is a matter that I will discuss after analyzing whether the action otherwise satisfies the criteria for certification as a class action.

##### 2. Disclosure of Cause of Action

68 The first criterion is whether the plaintiff's pleading discloses a cause of action. The "plain and obvious" test for disclosing a cause of action from *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.) is used to determine whether a proposed class proceeding discloses a cause of action for the purposes of s. 5 (1)(a) of the *Class Proceedings Act, 1992*. Thus, to satisfy the first criterion for certification, a claim will be satisfactory, unless it has a radical defect or it is plain and obvious that it could not succeed: *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.) at p. 679, leave to appeal to S.C.C. ref'd, (2000) (S.C.C.); *II76560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.* (2002), 62 O.R. (3d) 535 (Ont. S.C.J.) at para. 19, leave to appeal granted, (2003), 64 O.R. (3d) 42 (Ont. Div. Ct.), aff'd (2004), 70 O.R. (3d) 182 (Ont. Div. Ct.).

69 In a proposed class proceeding, in determining whether the pleading discloses a cause of action, no evidence is admissible, and the material facts pleaded are accepted as true, unless patently ridiculous or incapable of proof. The pleading is read generously and it will be unsatisfactory only if it is plain, obvious, and beyond a reasonable doubt that the plaintiff cannot succeed: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 25; *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 41, leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'g (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.); *Abdoool v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) at p. 469.

70 Cassels Brock concedes that Mr. Lipson has disclosed a cause of action for negligent misrepresentation, the constituent elements of which are: (1) a duty of care relationship; (2) a misrepresentation by the defendant; (3) the defendant having been negligent in making the misrepresentation; (4) the plaintiff having reasonably relied on the misrepresentation; and (5) the plaintiff having suffered damages as a consequence of relying on the misrepresentation. See *Queen v. Cognos Inc.*, [1993] 1 S.C.R. 87 (S.C.C.).

71 However, Cassels Brock challenges Mr. Lipson's negligence claim as not showing a reasonable cause of action or as a disguised and defective negligent misrepresentation action that attempts to circumvent the constituent elements of reasonable reliance and causation of damages.

72 Cassels Brock states that there was no lawyer and client relationship between it and the Class Members, and Cassels Brock submits that the Class Members claims are for pure economic losses for which the only available tort claim would be the tort of negligent misrepresentation. As I understand it, the point of this argument is that if Mr. Lipson's action is to proceed as a class action, it can proceed only as a negligent misrepresentation claim, in which case each of the class members must prove reasonable reliance.

73 Cassels Brock's arguments are similar to those made by the defendants in *Robinson v. Rochester Financial Ltd.*, [2010] O.J. No. 187 (Ont. S.C.J.), leave to appeal ref'd 2010 ONSC 1899 (Ont. Div. Ct.), which was a class action that was certified by Justice Lax, who allowed a general negligence claim to proceed. Cassels Brock submits that *Robinson* is distinguishable or wrongly decided.

74 In *Robinson*, the defendants were the promoters of a donation program in which the participants anticipating receiving tax credits under the *Income Tax Act*. The law firm Fraser Milner Casgrain LLP had prepared tax opinions for the promoters supporting the availability of tax credits. Canada Revenue, however, denied the tax credits, and the participants sued the promoters for breach of contract and for negligence. The participants sued Fraser Milner Casgrain for negligence.

75 The participants alleged that the law firm's legal opinions were a necessary precondition to the marketing of the donation program and that they had relied on the existence of the opinions as a factor in deciding whether to participate in the program. The participants alleged that Fraser Milner Casgrain was liable for negligence in preparing the opinions. The participants alleged that the opinions prepared for the promoters were prepared to be relied on by the promoters as fundamentally necessary to promote the donation program.

76 On the certification motion, Fraser Milner Casgrain moved to have the action against it dismissed. It argued that in the pleaded circumstances it could not have a duty of care and there could not be a negligence claim based on an allegedly negligent opinion that was never read or relied upon by the participants and that had been prepared just for the promoters.

77 Justice Lax disagreed with Fraser Milner Casgrain's argument that the participants' claim was a disguised and deficient negligent misrepresentation claim; rather, she viewed it as a discrete negligence claim pleading duty of care, standard of care, breach of the standard of care, causation, and damages. Justice Lax concluded that it was at least arguable that Fraser Milner Casgrain ought to have foreseen that its tax opinion would be used to market the program and that the participants would suffer damages if the opinion was negligently prepared. It was arguable that the law firm had a duty of care to the participants in the donation program. In paragraph 31 of her judgment, Justice Lax stated:

In my view, FMC placed itself in a relationship of sufficient proximity to owe a *prima facie* duty of care to the plaintiffs and proposed class members and I would leave to trial the question of whether policy considerations ought to negative that duty.

78 I take Justice Lax to be saying that it was not plain and obvious that the participants did not have a claim in negligence against the law firm. She appreciated that the negligence claim was a novel cause of action given that the participants were not the clients of the firm and that the opinion had been prepared only for the promoter clients. Justice Lax appreciated that the participants' claim against the law firm might not succeed and that it was still open for Fraser Milner Casgrain to argue that it had no duty of care to the participants of the program. These matters, however, were for trial and did not stand against the certification of the action as a class action.

79 I agree with Justice Lax's analysis. The *Robinson* case is not distinguishable from the case at bar, and, indeed, the case at bar is a stronger case for her analysis, which posits that it is arguable that the law firm had a duty of care and that the other constituent elements of negligence claim might be established; i.e. it is not plain and obvious that Mr. Lipson and the Class Member's do not have a free-standing claim for negligence that is discrete from a claim for negligent misrepresentation. See also: *Yorkshire Trust Co. v. Empire Acceptance Corp.*, [1986] B.C.J. No. 3254 (B.C. S.C.); *Collette v. Great Pacific Management Co.*, [2004] B.C.J. No. 381 (B.C. C.A.); *McCann v. CP Ships Ltd.*, [2009] O.J. No. 5182 (Ont. S.C.J.); *Dobbie v. Arctic Glacier Income Fund*, 2011 ONSC 25 (Ont. S.C.J.).

80 On the duty of care point of a negligence analysis, the case at bar is stronger than in the *Robinson* case because Cassels Brock wrote its opinions so that they might be relied on "by potential donors, their agents and professional advisors for the purpose of the transactions contemplated by this opinion" while in *Robinson* the opinion was for the promoters although it was foreseeable that they would use to market the donation program to potential donors.

81 I conclude that Mr. Lipson has satisfied the cause of action criterion for the certification of his action as a class action.

82 I will discuss below whether his negligent misrepresentation action and his negligence action generate common issues suitable to be certified for a class action and whether a class action would be the preferable procedure for the determination of Mr. Lipson and the Class Members' claims.

### **3. Identifiable Class**

83 As already noted above, there is no challenge to the proposed class definition.

84 I find that the proposed definition satisfies the identifiable class criterion of the test for certification as a class action.

### **4. Common Issues**

85 For an issue to be a common issue, it must be a substantial ingredient of each class member's claim and its resolution must be necessary to the resolution of each class member's claim: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 18.

86 The focus of the analysis of whether there is a common issue is not on how many individual issues there might be but whether there are issues the resolution of which would be necessary to resolve each class member's claim and which could be said to be a substantial ingredient of those claims: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 55, leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'g, (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.).

87 The fundamental aspect of a common issue is that the resolution of the common issue will avoid duplication of fact-finding or legal analysis: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 39.

88 For an issue to be common, it is not essential that the class members be identically situated vis-à-vis the opposing party or benefit from the successful prosecution of the action to the same extent: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at paras. 39-40.

89 The comparative extent of individual issues is not a consideration in the commonality inquiry, although it is a factor in the preferability assessment: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 65, leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'd, [2003], 65 O.R. (3d) 492 (Ont. Div. Ct.); *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.) at para. 33.

90 An issue is not a common issue if its resolution is dependent upon individual findings of fact that would have to be made for each class member: *Fehringer v. Sun Media Corp.*, [2003] O.J. No. 3918 (Ont. Div. Ct.) at paras. 3, 6.

91 Common issues cannot be dependent upon findings which will have to be made at individual trials, nor can they be based on assumptions that circumvent the necessity for individual inquiries: *Nadolny v. Peel (Region)*, [2009] O.J. No. 4006 (Ont. S.C.J.) at paras. 50-52; *Collette v. Great Pacific Management Co.*, [2003] B.C.J. No. 529 (B.C. S.C.) at para. 51, var'd on other grounds (2004), 42 B.L.R. (3d) 161 (B.C. C.A.); *McKenna v. Gammon Gold Inc.*, [2010] O.J. No. 1057 (Ont. S.C.J.) at para. 126, leave to appeal granted (Ont. Div. Ct.), var'd 2011 ONSC 5882 (Ont. Div. Ct.).

92 While only a minimum evidentiary basis is required, there must be some evidence to show that this issue exists and that the common issues trial judge is capable of assessing it in common; otherwise, the task for the common issues trial judge would not be to determine a common issue, but rather to identify one: *Fresco v. Canadian Imperial Bank of Commerce*, [2009] O.J. No. 2531 (Ont. S.C.J.) at para. 61, aff'd 2010 ONSC 4724 (Ont. Div. Ct.).

93 Cassels Brock submits that Mr. Lipson's proposed common issues, which are set out earlier in these Reasons for Decision, want for commonality and are unfair. It submits that the certification of the list of proposed common issues would deny it the right and the ability to defend itself from the Class Members' claims. Thus, it states in paragraph 126 of its factum:

126. These proposed common issues raise significant individual issues. Grouping them together as common issues would severely limit Cassels Brock's ability to defend itself. It would be unable to raise, for instance, the individual circumstances of a plaintiff's actual knowledge of (including whether they read) the Opinion Letters, representations made by any third party agents or advisors (many of whom are third parties in the action), what reliance a plaintiff placed on the Opinion Letters, the results of any additional due diligence performed by the participant or their agents or advisors (such as the Farano Opinion), and the actual loss suffered by any individual plaintiff. All of these issues are raised squarely on the face of the pleading and the common issues as proposed.

94 Cassels Brock argues that reliance and causation are inherently idiosyncratic and individual issues that make Mr. Lipson's action unsuitable for a class action and that Mr. Lipson has unfairly designed the common issues to relieve the Class Members of the requirement of proving reliance and causation as elements of their claims of negligent misrepresentation and negligence respectively.

95 Notwithstanding Cassels Brock's arguments, in my opinion, questions 1, 2, and 3 of the list of proposed questions are suitable for certification as common issues. These issues have sufficient commonality and are not unfair to Cassels Brock.

96 Further, questions 5 and 6 would be suitable for certification if they were revised to state:

(5) If after an individual issues trial, the defendant were found liable to a Class Member for negligent misrepresentation or negligence, what types or heads of damages, if any, would the Class Members be entitled to?

(6) If after an individual issues trial, the defendant were found liable to a Class Member for negligent misrepresentation or negligence what remedy or remedies, if any, would the Class Members be entitled to?

97 However, in my opinion, questions 4 and 7 are problematic, and these questions should not be certified for the class action.

98 Question 4 is:

(4) If the answer to common issue 3 is "yes", did the Defendant's breach of the foregoing standard(s) of care cause or materially contribute to the damages of the Class Members?

99 Question 4 either assumes that causation is a common issue or it makes determining whether causation is a common issue a common issue, which is not permissible. The commonality of an issue must have some basis in fact and cannot be simply assumed, and a common issue cannot be the determination of whether the purported common issue has commonality.

100 In my opinion, the commonality factors relied on by Mr. Lipson establishes some basis in fact that Cassels Brock's role was sufficient to cause *individual* Class Members, like Mr. Lipson, to incur a loss, but these factors are not sufficient to show some basis in fact that Cassels Brock's role was the necessary cause of *all* of the Class Members suffering a loss.

101 It seems to me that for Mr. Lipson's "but for causation argument" to work on a class-wide basis, there would have to be some basis in fact that Cassels Brock had the monopoly on the legal opinions that were the posited as a *sine qua non* for the Timeshare Program, but the evidence and common sense is to the contrary. The Timeshare Program was in fact supported by other opinions.

102 By way of illustration and comparison and contrast, the commonality of question 1, whether Cassels Brock owed the class a duty of care, has some basis in fact because Cassels Brock wrote its opinions so that they might be relied on "by potential donors, their agents and professional advisors for the purpose of the transactions contemplated by this opinion." The legal opinions were communicated or made available to the whole class.

103 In contrast, the submission that but for the Cassels Brock opinion, the Class Members would not have suffered damages because there would not have been a Timeshare Program does not show some basis in fact for the commonality of causation because: (a) in so far as the negligent misrepresentation claim is concerned, the Class Members would still have to establish that they reasonably relied on Cassels Brock's opinion, which is an inherently individualistic inquiry; and (b) insofar as the negligent misrepresentation and negligence claims are concerned it should not be assumed and it does not necessarily follow that if Cassels Brock had a duty of care and breached the standard of care, it necessarily caused damages to *all* class members, including those who did not read or perhaps did not even put their mind to the existence of a tax opinion or who actually relied on the advice of persons who expressed their own independent opinion about the availability of tax receipts to participants in the Timeshare Program.

104 In *Yorkshire Trust Co. v. Empire Acceptance Corp.*, *supra* at para. 15. Justice McLachlin, as she then was, pointed out that reliance was considered an essential element of a cause of action for negligent misrepresentation for two reasons; namely, (1) it confines the class of persons who may sue; and (2) it constitutes the causal link between the misrepresentation and the loss; it is because the plaintiff relied on the statement that he or she suffered a loss.

105 Later, in her judgment at para. 18, Justice McLachlin notes that in cases where a causal link independent of reliance can be found, courts have been prepared to find a cause of action despite the absence of reliance. Earlier, in this judgment, I accepted that it was not plain and obvious that the Class Members did not have a reasonable cause of action in negligence, in which case the Class Members would not have to prove reasonable reliance, which is not a constituent element of a general negligence claim. (Proof of reasonable reliance would remain a constituent element in the Class Members' negligent misrepresentation claim). However, it does not follow from the absence of the requirement to show reliance in a general negligence claim that causation is to be assumed or that causation is no longer a constituent element of the general negligence claim.

106 While it may be provable for *some* Class Members, particularly those that put their minds to what the tax opinions actually stated, that Cassels Brock's alleged negligence caused them to participate in the Timeshare Program with attendant losses, and while it may be provable for *some more* Class Members, who were ignorant of Cassels Brock's opinions, that they have Cassels Brock to blame for their being a Timeshare Program, it does not follow that Cassels Brock should not be able to argue that there were *some* Class Members that have only themselves or others to blame for participating in the Timeshare Program.

107 Causation is an element of culpability for the torts of negligent misrepresentation and negligence, and this is a matter of fairness and justice. In *Hanke v. Resurface Corp.*, [2007] 1 S.C.R. 333 (S.C.C.), Chief Justice McLachlin stated at para. 23:

23 The "but for" test recognizes that compensation for negligent conduct should only be made "where a substantial connection between the injury and defendant's conduct" is present. It ensures that a defendant will not be held liable for the plaintiff's injuries where they "may very well be due to factors unconnected to the defendant and not the fault of anyone": *Snell v. Farrell*, at para. 26 per Sopinka J.

108 In *Snell v. Farrell*, [1990] 2 S.C.R. 311 (S.C.C.), Justice Sopinka also stated at para. 26 that "causation is an expression of the relationship that must be found to exist between the tortious act of the wrongdoer and the injury to the victim in order to justify compensation of the latter out of the pocket of the former."

109 Assuming that Cassels Brock opinion was the *sine qua non* or indispensable precondition to the Timeshare Program for all Class Members is unfair to the defendant Cassels Brock and ignores the evidence that there were other supportive legal opinions available and some of the marketers were accountants or professional advisors capable of evaluating the merits, or lack thereof, of the Cassels Brock opinions and of providing their own advice and opinions.

110 Moreover, it is at least arguable that the Timeshare Program would have gone forward regardless of Cassels Brock's opinion for those who would have been satisfied with a tax credit for the cash portion of their donation to the Athletic Association or for those with a higher tolerance for risk than Mr. Lipson or for those aware of the weaknesses of the Cassels Brock opinion but still prepared to take their chances. Put shortly, in the circumstances of this case, reasonable reliance and causation are individual not common issues and Cassels Brock should be able to show that individual Class Members have not proven all of the constituent elements of their respective tort claims.

111 This conclusion means that assuming that Mr. Lipson was successful at a common issues trial of questions 1, 2, and 3, Class Members would have to establish on an individual basis that they actually reasonably relied on the Cassels Brock opinion in making their decision to participate in the Timeshare Program or that the existence of the Cassels Brock opinion was a causal factor in their decision to participate in the Timeshare Program.

112 With causation as an individual issue, the Class Members would not have to prove that the Cassels Brock opinion was the *sine qua non* of the Timeshare Program for all Class Members and Cassels Brock would have the burden of proving that its opinion was not a factor or a contributing factor in the particular Class Members' decision to participate in the program. Treating reliance and causation as individual issues is fair to both parties.

113 As for question 7, it states:

(7) If the Class is entitled to a damages award, can some or all of that award be determined commonly? If so, what is the quantum and how?

114 There is no basis in fact and no theory advanced as to how the identified class — as a class — would be entitled to a damages award as a class. The class members would have individual claims for damages, which would depend on their individual tax situations. In this regard, I understand that there are limits to the availability of tax credits, and thus it is conceivable that there may have been other reasons for Canada Revenue to deny or limit the charitable tax credits in whole or in part from the Timeshare Program. In other words, the assessment of damages is an individual issue for each Class Member.

115 Based on the above analysis, I conclude that questions 1, 2, 3, 5 and 6 as revised are suitable common issues and that Mr. Lipson's action satisfies the third criterion for certification as a class action.

### **5. Preferable Procedure**

116 For a class proceeding to be the preferable procedure for the resolution of the claims of a given class, it must represent a fair, efficient, and manageable procedure that is preferable to any alternative method of resolving the claims: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at paras. 73-75, leave to appeal to S.C.C. ref'd, (S.C.C.).

117 Preferability captures the ideas of whether a class proceeding would be an appropriate method of advancing the claim and whether it would be better than other methods such as joinder, test cases, consolidation, and any other means of resolving the dispute: *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.) at para. 69, leave to appeal to S.C.C. ref'd, (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.).

118 Whether a class proceeding is the preferable procedure is judged by reference to the purposes of access to justice, behaviour modification, and judicial economy and by taking into account the importance of the common issues to the claims as a whole including the individual issues: *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.) at para. 69, rev'd (2005), 78 O.R. (3d) 38 (Ont. Div. Ct.), which aff'd (2004), 71 O.R. (3d) 741 (Ont. S.C.J.), leave to appeal to S.C.C. ref'd, (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.); *Mouhteros v. DeVry Canada Inc.* (1998), 41 O.R. (3d) 63 (Ont. Gen. Div.).

119 In considering the preferable procedure criterion, the court should consider: (a) the nature of the proposed common issue(s); (b) the individual issues which would remain after determination of the common issue(s); (c) the factors listed in the Act; (d) the complexity and manageability of the proposed action as a whole; (e) alternative procedures for dealing with the claims asserted; (f) the extent to which certification furthers the objectives underlying the Act; and (g) the rights of the plaintiff(s) and defendant(s): *Chadha v. Bayer Inc.* (2001), 54 O.R. (3d) 520 (Ont. Div. Ct.) at para. 16, aff'd (2003), 63 O.R. (3d) 22 (Ont. C.A.), leave to appeal to S.C.C. ref'd, (S.C.C.).

120 A class proceeding will not satisfy the requirement that it be the preferable procedure to resolve the common issues if the common issues are overwhelmed or subsumed by the individual issues such that the resolution of the common issues will, in substance, mark just the beginning of the process leading to a final disposition of the claims of class members: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 39; *Abdoool v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) at paras. 134, 135; *Mouhteros v. DeVry Canada Inc.* (1998), 41 O.R. (3d) 63 (Ont. Gen. Div.); *Moyes v. Fortune Financial Corp.* (2002), 61 O.R. (3d) 770 (Ont. S.C.J.); *Gariepy v. Shell Oil Co.*, [2002] O.J. No. 2766 (Ont. S.C.J.), aff'd (Ont. Div. Ct.).

121 In the case at bar, there is little to commend Mr. Lipson's action as class action as the preferable procedure based on access to justice or behaviour modification. There was no suggestion that the class members could not afford to litigate their substantial individual claims, and there was no suggestion that Cassels Brock or law firms in general need behaviour modification and that a class action is required to encourage Cassels Brock or law firms in general to meet the standard of care of a tax lawyer when offering tax opinions about charitable donation programs.

122 Turning to the preferability factor of judicial economy, in the case at bar, the common issues that have been certified would be followed by individual issues trials to determine the issues of reliance, reasonable reliance, causation, and quantification of damages, and, thus, Cassels Brock submits that the common issues are overwhelmed by the individual issues and a class action is not the preferable procedure.

123 While there is considerable strength in this submission, in my opinion, it understates the judicial resource economies to be achieved by the common issues trial. If, for instance, Cassels Brock were to succeed in showing that its opinion met the standard of care, then all 900 claims would have been resolved. Conversely, if Mr. Lipson were successful at the common issues

trial, the Class Members would have gone a long distance in advancing their claims against Cassels Brock. Cassels Brock's third party claims are manageable within the context of the individual issues trials, which is where they appear to properly belong.

124 Practically speaking, the common issues trial would be about Cassels Brock's role in providing its opinions and the individual issues trial would be about the conduct of the class members and the third parties, if any. This is a manageable and preferable procedure to having the common issues repeatedly litigated. Thus, I conclude that the fourth criterion for certification is satisfied in the case at bar.

#### ***6. Representative Plaintiff and Litigation Plan***

125 The representative plaintiff must be a member of the class asserting claims against the defendant, which is to say that the representative plaintiff must have a claim that is a genuine representation of the claims of the members of the class to be represented or that the representative plaintiff must be capable of asserting a claim on behalf of all of the class members as against the defendant: *Drady v. Canada (Minister of Health)*, [2007] O.J. No. 2812 (Ont. S.C.J.) at paras. 36-45; *Attis v. Canada (Minister of Health)*, [2003] O.J. No. 344 (Ont. S.C.J.) at para. 40, aff'd (Ont. C.A.).

126 Provided that the representative plaintiff has his or her own cause of action, the representative plaintiff can assert a cause of action against a defendant on behalf of other class members that he or she does not assert personally, provided that the causes of action all share a common issue of law or of fact: *Boulanger v. Johnson & Johnson Corp.*, [2002] O.J. No. 1075 (Ont. S.C.J.) at para. 22, leave to appeal granted, (Ont. S.C.J.), varied (2003), 64 O.R. (3d) 208 (Ont. Div. Ct.) at paras. 41, 48, varied (Ont. C.A.); *Matoni v. C.B.S. Interactive Multimedia Inc.*, [2008] O.J. No. 197 (Ont. S.C.J.), at paras. 71-77; *Voutour v. Pfizer Canada Inc.*, [2008] O.J. No. 3070 (Ont. S.C.J.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) at para. 55.

127 Whether the representative plaintiff can provide adequate representation depends on such factors as: his or her motivation to prosecute the claim; his or her ability to bear the costs of the litigation; and the competence of his or her counsel to prosecute the claim: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 41.

128 The representative plaintiff must: (a) have knowledge of the overall factual situation; (b) assist in gathering evidence; (c) and decide whether to pursue the claim. However, because he or she will have the advice of competent counsel, one should not expect too much or be too demanding in evaluating whether a person can properly serve as a representative plaintiff: *Frey v. Bell Mobility Inc.*, [2007] S.J. No. 476 (Sask. Q.B.) at para. 7.

129 If the access to justice concerns of the *Class Proceedings Act, 1992*, are to be accomplished, the court should not subject the proposed representative plaintiff to the LSAT or some sort of Class Action Aptitude Test and should be skeptical of the defendant's arguments based on the personality of the candidate: *Coulson v. Citigroup Global Markets Canada Inc.*, [2010] O.J. No. 1109 (Ont. S.C.J.) at para. 158.

130 Cassels Brock submits that Mr. Lipson does not have the attributes to qualify as a representative plaintiff. It points out that although he ultimately abandoned the attempt, he sought to purchase interests in the actions of fellow class members. It points out that he never read the Cassels Brock opinions and has shown little interest in understanding his own allegations about the alleged deficiencies in the opinions.

131 Putting aside the problem discussed next of whether his claim is statute-barred, in my opinion, Mr. Lipson is a suitable representative plaintiff. With the assistance of competent counsel he has brought this action forward to a certification motion. There is no reason to think that he would not move the action forward to the common issues stage, which as noted above, focuses on Cassels Brock's role. He has prepared an unchallenged litigation plan and he has selected competent counsel with considerable experience in class action litigation.

132 I, therefore, conclude that the fifth criterion for certification has been satisfied.

#### ***7. Conclusion about the Certification of Mr. Lipson's Action as a Class Action***

133 Assuming that the action is not statute-barred, which is the topic next to be considered, for the above Reasons and subject to the qualifications noted above, Mr. Lipson's action satisfies the criteria for certification as a class action.

#### E. Are the Class Members Claims Statute-Barred?

134 Cassels Brock, Gardiner Roberts LLP, and the Farano Estate submit that Mr. Lipson's claims and the claims of all the Class Members in negligence and in negligent misrepresentation are statute-barred. They submit that when it can be shown that the proposed representative plaintiff's claim is statute-barred, he or she cannot be a member of the proposed class and he or she cannot act as the representative plaintiff. *Stone v. Wellington (County) Board of Education*, [1999] O.J. No. 1298 (Ont. C.A.); *Graham v. Imperial Parking Canada Corp.*, 2010 ONSC 4982 (Ont. S.C.J.).

135 Under the *Limitations Act, 2002*, actions are subject to a two-year limitation period from the date a claim is discovered. The discoverability rule is codified and particularized by s.5 (1) of the *Limitations Act, 2002*, which states:

5 (1) A claim is discovered on the earlier of,

- (a) the day on which the person with the claim first knew,
  - (i) that the injury, loss or damage occurred;
  - (ii) that the injury, loss or damage was caused by or contributed to by an act or omission;
  - (iii) that the act or omission was that of the person against whom the claim is made; and
  - (iv) that, having regard to the nature of the injury, loss or damage, a proceeding would be an appropriate means to seek to remedy it; and
- (b) the day on which a reasonable person with the abilities and in the circumstances of the person with the claim first ought to have known of the matters referred to in clause (a).

136 The discoverability principle governs the commencement of a limitation period and stipulates that a limitation period begins to run only after the plaintiff has the knowledge, or the means of acquiring the knowledge, of the existence of the facts that would support a claim for relief: *Nielsen v. Kamloops (City)* (1984), 10 D.L.R. (4th) 641 (S.C.C.); *Central & Eastern Trust Co. v. Rafuse*, [1986] 2 S.C.R. 147 (S.C.C.); *Peixeiro v. Haberman*, [1997] 3 S.C.R. 549 (S.C.C.). Thus, a limitation period commences when the plaintiff discovers the underlying material facts or, alternatively, when the plaintiff ought to have discovered those facts by the exercise of reasonable diligence.

137 The circumstance that a potential claimant may not appreciate the legal significance of the facts does not postpone the commencement of the limitation period if he or she knows or ought to know the existence of the material facts, which is to say, the constitute factual elements of his or her cause of action. Error or ignorance of the law or legal consequences of the facts does not postpone the running of the limitation period: *Nicholas v. McCarthy Tétrault*, [2008] O.J. No. 4258 (Ont. S.C.J.), aff'd (Ont. C.A.), leave to appeal to S.C.C. ref'd (S.C.C.).

138 In my opinion, the Supreme Court of Canada's decision in *Central & Eastern Trust Co. v. Rafuse*, *supra*, is dispositive of the question of whether the Class Members' claims are statute-barred. In my opinion, the *Central Trust* case demonstrates that Mr. Lipson's and the other Class Members' claims are barred by the operation of the *Limitations Act, 2002*, which came into force in 2004 and which imposes a two-year limitation period for the claims in negligence and negligent misrepresentation.

139 In *Central Trust Company v. Rafuse*, Jack Rafuse and Frankly Cordon were the lawyers acting for Central Trust in a mortgage loan transaction. Central Trust had granted a mortgage loan to the purchasers of the shares of a motel and restaurant business. In breach of the standard of care, the lawyers, who were also acting for the purchasers, were negligent and in breach of contract for failing to advise Central Trust that the mortgage might, if challenged, be held to be void, which is what occurred

when, after the mortgage went into default, the Supreme Court declared the mortgage to be illegal as contravening a statute making it unlawful for a company to give financial assistance in connection with a purchase of its own shares.

140 Following the judgment of the Supreme Court declaring the mortgage to be void, Central Trust sued the lawyers for breach of contract and negligence. The Nova Scotia Court of Appeal held that the lawyers had been negligent, but the appellate court dismissed the action on the grounds that it was statute-barred. Central Trust appealed to the Supreme Court of Canada, which reversed the decision and held that the claim in negligence was not statute-barred.

141 In *Central Trust*, in the Supreme Court, the major issues included whether a lawyer could be concurrently liable in contract and in tort. For present purposes, the important issue to consider was whether Central Trust's action was statute-barred. In this regard, it was conceded that Central Trust's claim in contract was statute-barred. That being the case, after the Supreme Court decided that concurrent liability was possible, it addressed the questions of whether the claim in negligence was also statute-barred. The precise questions were whether the doctrine of discoverability applied to the claim in negligence and, if so, when had Central Trust discovered the solicitor's negligence claim.

142 Justice Le Dain decided that a doctrine of discoverability applied to the running of limitation periods. In paragraph 77 of his judgment, he stated:

I am thus of the view that the judgment of the majority in *Kamloops* laid down a general rule that a cause of action arises for purposes of a limitation period when the material facts on which it is based have been discovered or ought to have been discovered by the plaintiff by the exercise of reasonable diligence, and that that rule should be followed and applied to the appellant's cause of action in tort against the respondents under the Nova Scotia *Statute of Limitations*, R.S.N.S. 1967, c. 168. There is no principled reason, in my opinion, for distinguishing in this regard between an action for injury to property and an action for the recovery of purely financial loss caused by professional negligence, ....

143 Having decided that the doctrine of discoverability applied, this meant that the limitation period, which was six years for Central Trust's negligence claim, started to run not when the claim in negligence occurred but from the date that the claim was discovered or from the date that it ought to have been discovered.

144 To apply the doctrine of discoverability, the relevant dates for Central Trust's claim were as follows: (a) the mortgage was granted as security on December 31, 1968; (b) the lawyer's certificate of title stating that the mortgage formed a first charge on the property was given to Central Trust on January 17, 1969; (c) the validity of the mortgage was challenged on April 21, 1977; (d) the mortgage was held to be void by the Supreme Court on April 22, 1980; and (e) Central Trust's action for negligence was instituted on October 22, 1980.

145 Justice Le Dain held that although the 1968 mortgage was not declared by final judgment to be void until 1980, it was void *ab initio* and actual damage occurred when Central Trust took the mortgage on December 31, 1968, because it acquired no enforceable security for its loan. However, as of the date of the mortgage loan, Central Trust did not know that it had suffered damage, and thus the question was when ought Central Trust to have discovered it had been damaged. The answer was April 1977, when the validity of the mortgage was challenged during foreclosure proceedings.

146 Justice Le Dain's succinct analysis of discoverability is found in paragraph 77 where he stated:

Since the [lawyers] gave the [Central Trust] a certificate on January 17, 1969 that the mortgage was a first charge on the Stonehouse property, thereby implying that it was a valid mortgage, the earliest that it can be said that [Central Trust] discovered or should have discovered the respondents' negligence by the exercise of reasonable diligence was in April or May 1977 when the validity of the mortgage was challenged in the action for foreclosure. Accordingly [Central Trust's] cause of action in tort did not arise before that date and its action for negligence against the [lawyers] is not statute-barred.

147 It should be noted that the damage suffered by Central Trust occurred when it accepted a mortgage that could be challenged as illegal. It later transpired that the mortgage was challenged, and Justice Le Dain held that the limitation period

for the claim of solicitor's negligence commenced running with the manifest challenge to the mortgage, even though the actual declaration of the invalidity of the mortgage would occur still later.

148 The same analysis can be applied to the case at bar. The Class Members, including Mr. Lipson, discovered or should have discovered their tort claims against Cassels Brock when the validity of the tax credits was denied by Canada Revenue in 2004. At that time and certainly not later than 2006, when Thornsteinssons LLP was retained to sue Canada Revenue, the Class Members knew or ought to have known the material facts on which the negligence claim or negligent misrepresentation claim against Cassels Brock was based.

149 Like Central Trust, which took the security of a mortgage that turned out to be illegal based on its lawyers' title opinion, in the case at bar, the Class Members made donations that turned out to be ineligible for tax credits. It is alleged that the Class Members relied on Cassels Brock's opinions or but for Cassels Brock's opinions they would not have participated in the Timeshare Program. In both situations, albeit with hindsight, the damage to the participants occurred at the time when Cassels Brock was negligent but their awareness of the material facts of their claim against Cassels Brock came later when Central Trust or the participants in the Timeshare Program respectively learned that there was a potential problem with the tax credits.

150 In the case at bar, as soon as the letters from Canada Revenue started to arrive, Mr. Lipson and the Class Members knew or ought to have known that Cassels Brock's opinion had caused them damage because they had actually relied on the opinions, or, but for those opinions they would not or could not have participated in the Timeshare Program and suffered damages. Given that Canada Revenue was challenging the validity of the trust, the validity of the gift, the donative intent of the participants, and the value of the donation, the donors knew that Canada Revenue could successfully deny the tax credit.

151 The Class Members had all of the material facts necessary to determine that they had grounds for understanding that they had a tort claim against Cassels Brock. The Class Members may not have known the full extent of what it was going to cost them for having participated in the Timeshare Program but they did know that there had been harm caused because of Cassels Brock's opinions.

152 Mr. Lipson relies on *Beuthling v. Hayes*, [2011] O.J. No. 858 (Ont. S.C.J.) to argue that the limitation period did not start running until a settlement was reached with Canada Revenue. *Beuthling v. Hayes* was an action for solicitors' negligence by Mr. Beuthling, who alleged that because of his lawyer's incompetence, he had been wrongfully convicted for sexual assault. Justice Grey dismissed the defendant lawyer's motion for summary judgment based on a limitation period defence. Justice Grey concluded that the limitation period did not begin to run until Mr. Beuthling's conviction had been set aside because that would have been the earliest that he would have known that he had a chance to succeed in recovering a judgment for damages against his lawyer.

153 The *Beuthling* case does not assist Mr. Lipson. In the circumstances of a wrongful conviction because of a lawyer's failure to meet the standard of care of a competent defence lawyer, the client might know that the lawyer was incompetent at the time of the conviction and the client would have suffered damages as at the time of the conviction, however, the client could not know that he or she had a claim for solicitor's negligence until the conviction was set aside. The setting aside of the conviction is not a crystallization of damages, which would have already incurred, nor is it the perfection or completion of the constituent elements of the negligence action, which would also have occurred; rather, the setting aside of the conviction is the discovery that this claim exists. In this regard, the client's situation in *Beuthling* is analogous to Central Trust in *Central Trust v. Rafuse*, where Central Trust suffered damages at the moment when the lawyers provided negligent services but Central Trust did not discover it had a claim for solicitor's negligence until the validity and enforceability of the mortgage was challenged.

154 For the reasons, expressed above, in so far as the timeliness of the action is concerned, Mr. Lipson's and the Class Members' situation is different from Central Trust in the *Central Trust* case and of Mr. Beuthling, both of whom brought actions after the discovery of the already constituted negligence claims against their lawyers. In the case at bar, Mr. Lipson and the Class Members discovered that they had a claim against Cassels Brock in 2004 or in 2006. Mr. Lipson, however, did not commence his negligence and negligent misrepresentation actions until 2009.

155 By way of counterargument, Mr. Lipson submits that Cassel Brock's and the Third Parties' argument that the limitation period had run its course mistakenly uses knowledge of a potential loss to establish discoverability instead of knowledge that the loss was attributable to a breach of duty by Cassels Brock which was not ascertainable until there was a settlement or adjudication with Canada Revenue.

156 I think this counterargument means that although the Class Members knew they had a potential loss when they received the letters from Canada Revenue, they did not know whether to blame Cassels Brock for their potential loss. Thus, the Class Members submit an action against Cassels Brock would have been premature and that they had not discovered their claims against Cassels Brock. This argument is wrong.

157 At the time of the letters from Revenue Canada, the Class Members' loss was actual not potential and they knew who to blame for that actual loss. The Class Members had been denied the tax credits in their entirety, and they allegedly had been lured into a transaction or not properly warned about a transaction that they allege they would have avoided but for the role played by Cassels Brock. The Class Members incurred expenses, i.e. special damages, in an attempt to fix their problems by retaining another law firm and bringing proceedings against Canada Revenue.

158 In the case at bar, no independent inquiry of the facts is necessary to determine whether or not the Class Members claims are statute-barred. Indeed, this is apparent from the statement of claim that sets out that the material facts for the discovery of the negligence and negligent misrepresentation claims that occurred when the letters from Canada Revenue arrived denying the tax credits to the Class Members.

#### F. Conclusion

159 For the above Reasons, I dismiss Mr. Lipson's action. It follows that the third party claims should be discontinued because they are moot.

160 If the parties, including the third parties, cannot agree about the resolution of the third party claims and the matter of costs, a case conference should be arranged to address the manner in which these matters will be determined.

*Motion dismissed.*

**S.T. Goudge, Simmons JJ.A.:**

**A. Overview**

1 The main issue before us is whether, on a motion for certification, the motion judge erred in holding that a proposed class action for solicitor negligence and negligent misrepresentation is statute-barred, but that the action otherwise qualifies for certification.

2 The appellant, Jeffrey Lipson, is one of about 900 Canadian taxpayers who donated cash and resort timeshare weeks to registered Canadian athletic associations during the four-year period between 2000 and 2003. He and the other donors made their

donations through a program (the "Timeshare Tax Reduction Program" or "the Program") operated by the Canadian Athletic Trust (the "Athletic Trust").

3 Under the terms of the Timeshare Tax Reduction Program, donors anticipated receiving tax credits worth more than the donor's actual financial outlay. In support of the viability of the Program, the promotional material included an opinion prepared by Cassels Brock & Blackwell LLP indicating that it was unlikely that the Canada Customs and Revenue Agency could successfully deny the anticipated tax credits.

4 In 2004, the CCRA notified Mr. Lipson that it intended to disallow his claims for tax credits under the Timeshare Tax Reduction Program in their entirety. On receiving this information, he and other donors who had received similar notices sought legal and accounting advice.

5 In 2006, two of the other donors launched proceedings with the assistance of counsel as a test case to challenge the CCRA's denial of the tax credits.

6 In 2008, the CCRA settled the test case on the basis that the donors would receive tax credits for their actual cash donations, but not for their donations of timeshare weeks (which had been paid for by a third party). Mr. Lipson and other members of the proposed class entered into similar arrangements with the CCRA.

7 In April 2009, almost five years after he had received the initial notice of disallowance from the CCRA, Mr. Lipson commenced a proposed class action in which he sued Cassels Brock for negligence and negligent misrepresentation relating to their opinion about the Timeshare Tax Reduction Program. Mr. Lipson claimed damages in the form of interest arrears, lost opportunities to make other donations, and special damages consisting of professional fees for challenging the CCRA's position.

8 On a motion for certification of the action as a class proceeding, Perell J. found that, apart from the limitations issue (and with the exception of certain proposed common issues including causation), the proposed class action satisfied the criteria for certification. Nonetheless, in an order dated November 14, 2011 (the "Order"), he dismissed the action, holding that it is statute-barred by the two-year limitation period set out in the *Limitations Act, 2002*, S.O. 2002, c. 24, Sched. B.

9 Mr. Lipson raises two issues on appeal:

1. Did the motion judge err in dismissing his action as statute-barred?
2. Did the motion judge err in not certifying the action, including his proposed common issue relating to causation, as a class proceeding?

10 In the event Mr. Lipson succeeds on the first issue, Cassels Brock cross-appeals from aspects of the motion judge's finding that the proposed class action otherwise satisfies the criteria for certification.

11 For the reasons that follow, we allow the appeal, set aside those portions of the Order holding that the action is statute-barred and dismissing it, and substitute an order certifying the action as a class proceeding. The cross-appeal is dismissed.

## **B. Background**

### **(1) The Timeshare Tax Reduction Program**

12 The motion judge provided a full summary of the origin and structure of the Timeshare Tax Reduction Program at paras. 14 to 18 of his reasons.

13 In brief, after establishing the Athletic Trust in Ontario, a Bahamian resident purchased timeshare weeks in a Caribbean resort and transferred them to the Trust.

14 Under the terms of the Timeshare Tax Reduction Program, potential donors could apply to become beneficiaries of the Athletic Trust and, once accepted, the trustee of the Athletic Trust had discretion to distribute timeshare weeks to them.

Beneficiaries could, but were not required to, donate their timeshare weeks to a registered Canadian amateur athletic association, along with sufficient cash to discharge encumbrances on the timeshare weeks.

15 In return for each donation, the registered Canadian amateur athletic association that received the donation would issue two charitable tax receipts: one for the donor's cash contribution to discharge the encumbrances on the timeshare weeks (ranging from \$4,600 to \$9,700 per donated timeshare week); and one for the then fair market value of the donated timeshare week, less the amount of the encumbrance (ranging from \$8,765-\$18,900).

16 The Program also included arrangements for pooling the donated timeshare units and facilitating their resale to the original developer at a significantly discounted price, subject to a 5% commission on net revenue to one of the promoters of the Program.

17 Without getting into all the details, in general, the net result of these arrangements was:

- assuming receipt of the anticipated tax credits, participants in the Program would realize a net return on their cash donations of about 35% (this is because it was the Bahamian resident who settled the Athletic Trust and actually paid for the timeshare weeks); and
- although they issued charitable receipts to each participant totalling between \$13,275 and \$28,600, the registered Canadian amateur athletic associations that received donations ultimately benefited by about \$1,300 per donated timeshare week.

## **(2) The Cassels Brock Legal Opinions**

18 Commencing in 2000, on each occasion that timeshare weeks were made available for distribution to beneficiaries, Cassels Brock was retained to provide the promoters of the Timeshare Tax Reduction Program with a legal opinion about the tax consequences of participating in the Program as a beneficiary and donor.

19 In all, Cassels Brock provided six opinions between October 2000 and April 2003. The six opinions are substantially the same. The motion judge excerpted the relevant passages of the opinions at para. 23 of his reasons.

20 For the purposes of this appeal, two aspects of the opinions are key. First, the opinions are directed not just to the promoters of the Athletic Trust, but also to potential donors. In fact, all but the final opinion specifically state that the opinion "may be relied upon ... by ... potential donors".

21 Second, although the opinions acknowledge the prospect of a challenge by the CCRA to the tax benefits available under the Program, the opinions state that "it is unlikely that the CCRA could successfully deny ... the [anticipated] tax credit[s]."

22 As we have said, a copy of the pertinent Cassels Brock opinion was included in the promotional material marketing the Timeshare Tax Reduction Program on each occasion that timeshare weeks were offered for distribution.

23 Because the opinions are central to the issues on appeal, we set out here the text of the key passages. The remainder of the excerpts quoted by the motion judge together with certain other passages we consider important are set out in Appendix 'A':

### **Re: Donation of One-Bedroom and Two-Bedroom, Biennial Timeshare Vacation Weeks**

You have requested our opinion regarding the Canadian Federal Income Tax consequences relating to a donation of ... Timeshare Resort Weeks ... by individual Canadian resident taxpayers. It is contemplated that any such donation would entitle the donor to claim a tax credit under the *Income Tax Act* (Canada) (the "Tax Act").

*...This opinion is specifically directed to potential donors who are individuals and who acquire and hold the Timeshare Weeks as capital property.*

...

3. Meaning of "Gift"

In order to claim a tax credit for a donation there must be a complete gift of the property.

...

*If all or substantially all of the Class A Beneficiaries who receive Timeshare Weeks donate them, the CCRA may be more inclined to challenge the arrangement (but see our opinion below at page 23 as to the unlikely success of such a challenge.)*

...

7. General Anti-Avoidance Rule ("GAAR")

...

In our opinion, and based on the foregoing, a donation of Timeshare Weeks in these circumstances would not likely be successfully attacked under GAAR.

...

9. General Comments

...

*This opinion may be relied upon only by CAA and potential donors, their agents and professional advisors, for the purpose of the transactions contemplated by this opinion. ...*

*Based on and subject to the foregoing review, in our opinion it is unlikely that the CCRA could successfully deny the deemed adjusted cost base of the Timeshare Weeks to, nor the tax credit claimed by, the Class A Beneficiaries who receive a distribution of the Timeshare Weeks from the Trust, and subsequently choose to make a voluntary and complete donation of some or all of their Timeshare Weeks to a [registered Canadian amateur athletic association].*

**(3) Other Legal Opinions Obtained by Promoters and Marketers**

24 In addition to the Cassels Brock opinion, in December 2002, the promoters of the Timeshare Tax Reduction Program obtained an opinion from a Manitoba law firm confirming the applicability of the Cassels Brock opinion to the *Manitoba Tax Act*.

25 Further, one of the entities marketing the Timeshare Tax Reduction Program obtained a second opinion confirming the Cassels Brock opinion from Ronald J. Farano, Q.C., a tax partner at Gardner Roberts LLP.

**(4) Mr. Lipson's Participation in the Timeshare Tax Reduction Program**

26 In an affidavit filed on the certification motion, Mr. Lipson deposed that his accountant spoke to him about the Timeshare Tax Reduction Program in the fall of 2000. Although he understood "the gist" of the Program, he says he did not understand the intricacies of how it worked. He asked his accountant whether there was a legal opinion to support the tax benefits of the program. On being told that Cassels Brock had issued a supporting legal opinion, Mr. Lipson was satisfied that the Program offered legitimate tax benefits and decided to participate. He states: "I would not have participated in the Program absent a favourable tax opinion from a reputable law firm."

27 On his cross-examination, Mr. Lipson indicated he has no recollection of reading the Cassels Brock opinion. He understood from his accountant that the Cassels Brock opinion provided an assurance that the Program was "legal" and thus that there would be "nothing for the [CCRA] to complain about." According to Mr Lipson, had there been an 80% chance he would not receive the tax credits, he would not have participated.

28 Mr. Lipson confirmed that, for the years 2000 to 2003, he claimed the following tax credits for donations under the Timeshare Tax Reduction Program:

2000 — \$634,352

2001 — \$1,261,988

2002 — \$2,085,835

2003 — \$1,148,879.60.

**(5) Mr. Lipson's Dealings with the CCRA**

29 In a series of letters to Mr. Lipson dated October 19 through to November 9, 2004, the CCRA indicated it would be denying the full amount of the tax credits Mr. Lipson had claimed arising from the Program. Among other things, in their correspondence, the CCRA challenged (i) the validity of the Athletic Trust; (ii) the validity of the gifts of timeshare weeks; and (iii) the valuation of timeshare weeks.

30 Both in the statement of claim and in his affidavit, Mr. Lipson indicates that in response to the reassessments, he "sought legal and accounting advice at significant personal expense". In his affidavit, Mr. Lipson also states that he retained Thorsteinssons LLP in April 2004 to act for him in his dealings with the CCRA and that it is his understanding that Thorsteinssons acted for most of the class members in this regard.

31 On his cross-examination, Mr. Lipson confirmed that the promoters of the Program had created a fund to look after any challenge to the tax structure that might occur and that he understood that Thorsteinssons' legal fees were paid from that fund. This evidence was confirmed by evidence from one of the creators of the Program.

32 According to Mr. Lipson, the dispute with the CCRA proceeded by way of test cases launched in 2006 by two of the participants in the Timeshare Tax Reduction Program on behalf of all of the donors who participated in the Program and who were reassessed.

33 On March 24, 2008, Mr. Lipson accepted an offer to settle made by the CCRA restricting his tax credits for participation in the Timeshare Tax Reduction Program to the amount of his cash donations to Canadian athletic associations.

34 Although Thorsteinssons conducted the test case litigation, on his cross-examination, Mr. Lipson testified that he retained Davies Ward Phillips & Vineberg LLP "to interface" with Thorsteinssons. Further, he says he settled with the CCRA as a result of advice received from Davies Ward, and not Thorsteinssons.

35 During his cross-examination, Mr. Lipson agreed with suggestions that he realized there was a problem as soon as he received the first disallowance letter and that he knew then that the result Cassels Brock had said would occur was not going to happen.

**(6) The Proposed Class-Action**

36 On April 15, 2009, Mr. Lipson commenced the proposed class action in which he sued Cassels Brock for negligence and negligent misrepresentation.

37 At para. 35 of his Fresh As Amended Statement of Claim, Mr. Lipson characterizes the Cassels Brock opinions as follows:

35. In each of the Legal Opinions, Cassels Brock stated that Lipson and the other Class Members would obtain the tax benefits described in the promotional materials. Cassels Brock's ultimate conclusion, as set out in each of the Legal Opinions, was that:

[I]t is unlikely that the [CCRA] could successfully deny the deemed adjusted cost base of the Timeshare Weeks to, nor the tax credit claimed by, the Class A beneficiaries who receive a distribution of the Timeshare Weeks from the [Athletic] Trust, and subsequently choose to make a voluntary and complete donation of some or all of their Timeshare Weeks to an RCAA.

38 In essence, Mr. Lipson alleges that Cassels Brock (i) fell below the standard of care of a reasonably competent tax solicitor in preparing its opinion, resulting in an opinion that contains material misrepresentations; (ii) knew that a favourable tax opinion was a necessary precondition to the creation and successful promotion of the Timeshare Tax Reduction Program; and (iii) knew that potential donors would rely on the existence of a favourable tax opinion in deciding whether to participate in the Program.

39 Mr. Lipson claims that, but for the Cassels Brock opinion, the Timeshare Tax Reduction Program could not have been made publicly available or successfully promoted. In addition, he claims that he and the other class members decided to participate in the Program in reliance on the Cassels Brock opinion and the representations, both express and implied, which it contained.

40 Finally, Mr. Lipson claims that, as a result of the negligence and negligent misrepresentations of Cassels Brock, he and the other class members suffered damages in the form of substantial interest arrears under federal and provincial income tax legislation, loss of the opportunity to make other donations or participate in other tax shelters, and special damages in the form of accounting and other professional fees to respond to the CCRA's reassessments.

41 In his Fresh As Amended Statement of Claim, Mr. Lipson defines the proposed class as:

[A]ll individuals who applied and were accepted to be beneficiaries of the Athletic Trust 2000, 2001, 2002 and/or 2003 and received Timeshare Weeks from the Athletic Trust and donated them, together with a cash donation, to one or more of [certain registered Canadian amateur athletic associations].

42 According to the Fresh As Amended Statement of Claim, Mr. Lipson and the other class members settled with the CCRA when it became "at least likely, if not certain" that the CCRA would be successful in challenging the tax credits claimed by Mr. Lipson and the other class members.<sup>1</sup>

#### **(7) Cassels Brock's Third-Party Claim and Statement of Defence**

43 On April 15, 2011, Cassels Brock issued a third party claim against a number of individuals and entities, alleging that they provided tax, financial or legal advice to putative class members with respect to the Timeshare Tax Reduction Program. Gardiner Roberts LLP and the Estate of former Gardiner Roberts senior tax partner Ronald J. Farano, deceased, are among the named third parties.

44 In accordance with a direction from the motion judge, prior to the certification motion, Cassels Brock delivered its statement of defence and the third parties delivered statements of defence to the main action and to the third party action.

45 The statements of defence to the main action included an assertion that, by pleading that the CCRA denied his claims for tax credits in 2004, Mr. Lipson had acknowledged that the proposed class action is statute-barred.

#### **(8) Mr. Lipson's Reply**

46 In his reply, Mr Lipson pleaded that "[u]ntil January 2008 during the test case litigation ... it was not known or reasonably discoverable that it was at least likely ... that [the CCRA] would be successful in challenging the tax credits claimed by Lipson and the other Class Members." He also pleaded that it was not until at least January 2008, when the test case appeal litigation had significantly progressed, that a proceeding against Cassels Brock became an appropriate avenue for the donors to seek redress.

#### **(9) The Proposed Common Issues**

47 On the certification motion, the Mr. Lipson proposed the following common issues:

Negligence

1. Did the Defendant owe the Class a duty of care (in among other things, negligence or negligent misrepresentation) in the preparation of the Legal Opinions?
2. If the answer to common issue 1 is "yes", what is the content of the standard(s) of care?
3. Did the Defendant breach the foregoing standard(s) of care? If so, how?
4. If the answer to common issue 3 is "yes", did the Defendant's breach of the foregoing standard(s) of care cause or materially contribute to the damages of the Class Members?

Damages or Other Relief

5. If the answer to common issue 4 is "yes", what types or heads of damages, if any, are the class members entitled to?
6. If the answer to common issue 4 is "yes", what remedy or remedies, if any, are the Class Members entitled to?
7. If the Class Member is entitled to a damages award, can some or all of that award be determined commonly? If so, what is the quantum and how?

**(10) Expert Opinion from Professor Vern Krishna**

48 Mr. Lipson's material on the certification motion included affidavits and letters of opinion from Professor Vern Krishna concerning the validity and appropriateness of the Cassels Brock legal opinions supporting the Timeshare Tax Reduction Program.

49 Professor Krishna's letters of opinion address two main issues: i) Cassels Brock's opinions concerning whether the donation of timeshare weeks constitutes a valid gift; and ii) Cassels Brock's opinions concerning the general anti-avoidance rule.

50 In relation to the first issue, Professor Krishna concludes that the Cassels Brock opinions failed to address issues relevant to the validity of the gift in circumstances where the anticipated tax credit substantially exceeds the donor's financial outlay. On that issue, he opines that the Cassels Brock legal opinions do not meet the standard of care expected of a tax lawyer.

51 In relation to the second issue, Professor Krishna states that while "existing jurisprudence suggests that the [Timeshare Tax Reduction Program] would violate the general anti-avoidance provisions of the *Income Tax Act* ... the jurisprudence in the Supreme Court of Canada did not emerge until 2005." Moreover, "even after the three Supreme Court of Canada's decisions, there remains considerable uncertainty as to the scope and reach of GAAR." On that issue, he opines that the Cassels Brock legal opinions reasonably address the anti-avoidance aspects of the Timeshare Tax Reduction Program in light of the available jurisprudence at the relevant time.

**(11) The Positions of the Parties on the Certification Motion**

52 Cassels Brock and the third parties opposed certification of the proposed class action on the grounds that the claims of all class members, including Mr. Lipson, are statute-barred under the *Limitations Act*. In particular, they argued that the class members' claims were discoverable when the CCRA disallowed their claims for tax credits. In addition, they claimed that, when it can be shown that a proposed representative plaintiff's claim is statute-barred, he or she cannot be a member of the proposed class and he or she cannot act as the representative plaintiff.

53 Cassels Brock also submitted that the proposed class action failed to satisfy three of the five criteria for certification under s. 5(1) of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6:

- i) The claims of the class members must raise a common issue (s. 5 (1)(c));

- ii) A class proceeding must be the preferable procedure for the resolution of the common issues (s. 5 (1)(d)); and
- iii) There must be a suitable representative plaintiff (s. 5 (1)(e)).

54 Finally, although Cassels Brock conceded that the proposed class action disclosed a cause of action for negligent misrepresentation, it argued that the negligence claim failed to disclose a reasonable cause of action (s. 5 (1)(a)) because none of the class members were clients of Cassels Brock.

### C. The Motion Judge's Decision

55 In the analysis section of his reasons, the motion judge dealt first with the question of whether, leaving aside the limitation issue, the proposed class action meets the criteria for certification. He held as follows:

- It was not plain and obvious that either the negligent misrepresentation claim or the negligence claim failed to disclose a reasonable cause of action (s. 5(1)(a) of the *Class Proceedings Act*). Although the negligence claim may be novel, the question of whether Cassels Brock owed class members a duty of care should be left for trial.
- The proposed class definition satisfies the identifiable class criterion (s. 5 (1)(b) of the *Class Proceedings Act*).
- The claims of the proposed class raise common issues. Proposed questions one, two and three are suitable for certification as common issues. Proposed questions five and six would be suitable for certification if revised.<sup>2</sup> Proposed questions four and seven, relating to causation and damages, are not suitable common issues. (Section 5 (1)(c) of the *Class Proceedings Act*).
- A class proceeding would be the preferable procedural for resolution of the common issues. Although there is little to suggest that the class proceeding is necessary to ensure access to justice or to modify behaviour, the judicial economy factor justifies a class proceeding in which the common issues at trial will focus essentially on the opinions of Cassels Brock. (Section 5 (1)(d) of the *Class Proceedings Act*).
- As Mr. Lipson had selected competent and experienced counsel and, as his litigation plan was unchallenged, there was no reason to believe he would not move the action forward to the common issues stage. Leaving aside the limitations issue, he is a suitable representative plaintiff (Section 5 (1)(e) of the *Class Proceedings Act*).

56 As for the limitations issue, the motion judge concluded that no independent factual inquiry was necessary to dispose of it. Based on the Supreme Court of Canada's decision in *Central & Eastern Trust Co. v. Rafuse*, [1986] 2 S.C.R. 147 (S.C.C.), and a review of the facts alleged in the statement of claim, the claims for negligence and negligent misrepresentation should have been discovered in 2004 when the CCRA denied the validity of the tax credits or, at the very latest, in 2006, when Thornsteinssons was retained to sue the CCRA. The claims of Mr. Lipson and the other class members were therefore statute-barred.

### D. The Appeal

#### (1) Did the motion judge err in dismissing the appellant's claim as statute-barred?

##### (a) The Positions of the Parties on Appeal

57 On appeal, Mr. Lipson submits that the motion judge acted without jurisdiction or authority in dismissing the action as statute-barred on a certification motion. He argues that the purpose of a certification motion is purely procedural. Such a motion is intended to determine whether the proposed claims are suitable as a class proceeding and there is to be no preliminary review of the merits of any proposed defence.

58 Further, Mr. Lipson says that, in the absence of a Rule 21 motion or a summary judgment motion, he had no proper notice of the limitation issue. The record he placed before the court was intended to address only the certification issue. It was not

intended to address a merits defence. It was particularly not intended to address a merits defence for the class that had never been certified as a common issue — and one which, by its very nature, is not a common issue in any event.

59 In the alternative, if the motion judge was entitled to address the limitation issue under s. 5(1)(a) of the *Class Proceedings Act* — as relating to whether the statement of claim disclosed a reasonable cause of action — Mr. Lipson submits that the motion judge erred by failing to accept the facts as pleaded in the statement of claim and in the reply as true. In both documents, Mr. Lipson pleaded facts indicating the claim was not discovered until approximately January 2008 when the test case had significantly progressed and it became apparent that the CCRA would likely be successful in denying a substantial portion of the tax credits claimed.

60 Further, whether the motion judge proceeded under s. 5(1)(a) or 5(1)(e) (proper plaintiff) of the *Class Proceedings Act*, Mr. Lipson submits that he erred by misinterpreting *Central & Eastern Trust Co. v. Rafuse* as standing for the proposition that, in a claim for negligence arising from a solicitor's opinion, the limitation period begins to run when the validity of the opinion is challenged.

61 Cassels Brock asserts that a motion judge on a certification hearing is required to perform a gatekeeping function — accordingly, where it is apparent on the certification motion that an action is bound to fail, the certification judge has the authority both to decline to certify the action and to dismiss it without the need for a cross-motion. The motion judge's decision in this regard is entitled to deference.

62 In this case, Mr. Lipson had notice of the limitations issue by virtue of the statements of defence that were delivered. Further, on Mr Lipson's own evidence, it was clear — and the motion judge concluded — that the limitation period had expired. Mr. Lipson did not read the Cassels Brock opinions. Moreover, he testified that he understood the opinions to mean that the Timeshare Tax Reduction Program was legal and that there was no risk that the CCRA would reassess him. He learned in 2004 that that was not the case — he also began incurring damages in the form of legal and accounting fees at that time.

63 Further, all members of the class were aware of the reassessments and had begun incurring legal and accounting fees by no later than 2006 when the test case litigation was commenced.

64 Except for acknowledging that it may have been preferable for Cassels Brock to have brought a formal motion to dismiss the action, the third parties, take the same position as Cassels Brock. They assert that the motion judge had authority to decline to certify the action because it was clear on the evidence that the limitation period had expired and Mr. Lipson was fully aware of this issue.

*(b) The Discoverability Principle*

65 As the motion judge observed, in this case, the application of the two-year limitation period turns on the discoverability principle, now codified in s. 5 of the *Limitations Act*. That section provides as follows:

5. (1) A claim is discovered on the earlier of,

- (a) the day on which the person with the claim first knew,
  - (i) that the injury, loss or damage occurred,
  - (ii) that the injury, loss or damage was caused by or contributed to by an act or omission,
  - (iii) that the act or omission was that of the person against whom the claim is made, and
  - (iv) that, having regard to the nature of the injury, loss or damage, a proceeding would be an appropriate means to seek to remedy it; and

(b) the day on which a reasonable person with the abilities and in the circumstances of the person with the claim first ought to have known of the matters referred to in clause (a).

(2) A person with a claim shall be presumed to have known of the matters referred to in clause (1) (a) on the day the act or omission on which the claim is based took place, unless the contrary is proved.

*(c) Discussion*

66 In our view, it is unnecessary that we resolve the question of whether it is open to a certification judge to dismiss a proposed class action based on a finding that the action is statute-barred, and in particular, in the absence of a cross-motion under either Rule 20 or Rule 21.

67 Based on our review of the motion judge's reasons, his decision to dismiss the proposed class action as statute-barred turned on his interpretation of the Supreme Court of Canada's decision in *Central & Eastern Trust Co. v. Rafuse* and his application of that decision to the facts of this case.

68 In our respectful view, the motion judge erred in interpreting and applying *Central & Eastern Trust Co. v. Rafuse*. Moreover, when that decision is interpreted properly, it is apparent that the record before the motion judge did not disclose whether Mr. Lipson's claim was statute-barred. Nor did it support the conclusion that the limitation period applicable to Mr. Lipson's claim also applied to the entire class.

69 The motion judge's findings concerning *Central & Eastern Trust Co. v. Rafuse* begin at para. 138 of his reasons where he said that, in his view, the Supreme Court of Canada's decision in that case is dispositive of the question of whether the class members' claims in this case are statute-barred.

70 The motion judge correctly described the issues in *Central & Eastern Trust Co. v. Rafuse*. In that case, the defendant solicitors had acted for Central Trust on a mortgage transaction in 1969 and had certified that Central Trust had a valid mortgage against the title to the property on which it was registered. However, in a subsequent action by Central Trust against the mortgagor, the mortgage was held to be void *ab initio* because it contravened a statutory prohibition against a certain form of lending.

71 In 1980, Central Trust sued the solicitors who acted for it on the mortgage transaction. A major issue was whether the solicitors could be held liable both in contract and in negligence. If the solicitors could be found concurrently liable in negligence, further issues arose concerning whether the doctrine of discoverability applied in determining the limitation period, and, if so, when the limitation period began to run.

72 However, the motion judge had this to say at paras. 146-147 of his reasons about the Supreme Court of Canada's conclusions about discoverability:

[146] Justice Le Dain's succinct analysis of discoverability is found in paragraph 77 where he stated:

Since the [lawyers] gave the [Central Trust] a certificate on January 17, 1969 that the mortgage was a first charge on the Stonehouse property, thereby implying that it was a valid mortgage, *the earliest that it can be said that [Central Trust] discovered or should have discovered the respondents' negligence by the exercise of reasonable diligence was in April or May 1977 when the validity of the mortgage was challenged in the action for foreclosure*. Accordingly [Central Trust's] cause of action in tort did not arise before that date and its action for negligence against the [lawyers] is not statute-barred.

[147] It should be noted that the damage suffered by Central Trust occurred when it accepted a mortgage that could be challenged as illegal. It later transpired that the mortgage was challenged, and *Justice Le Dain held that the limitation period for the claim of solicitor's negligence commenced running with the manifest challenge to the mortgage*, even though the actual declaration of invalidity of the mortgage would occur still later.

[Emphasis added.]

73 In our respectful view, the motion judge's conclusion about Justice Le Dain's holding in *Central & Eastern Trust Co. v. Rafuse* is incorrect. Justice Le Dain did not hold that "the limitation period for the claim of solicitor's negligence commenced running with the manifest challenge to the mortgage". Rather, he concluded that the *earliest* date on which the claim for solicitor's negligence could have commenced running was the date on which the validity of the mortgage (and therefore the validity of the solicitors' opinion) was challenged.

74 Because the applicable limitation period for solicitor negligence was six years when *Central & Eastern Trust Co. v. Rafuse* was decided, it was unnecessary that Justice Le Dain go further and determine the actual date on which the limitation period commenced — the action for solicitor negligence had been started well within six years after the earliest date on which Justice Le Dain found the cause of action was discoverable.

75 In *Kenderry - Esprit (Receiver of) v. Burgess, MacDonald, Martin & Younger* (2001), 53 O.R. (3d) 208 (Ont. S.C.J.), at para. 19, Molloy J. recognized that *Central & Eastern Trust Co. v. Rafuse* is not binding authority for the proposition that the limitation period in an action for solicitor negligence begins to run on the date of a manifest challenge to the solicitor's opinion.

76 Instead, Molloy J. held that, in an action for solicitor negligence arising from a solicitor's opinion, "[t]he date upon which the plaintiff can be said to be in receipt of sufficient information to cause the limitation period to commence to run will depend on the circumstances of the particular case."

77 We agree with that conclusion and note that it was adopted by the majority in this court's decision in *Ferrara v. Lorenzetti, Wolfe Barristers and Solicitors*, 2012 ONCA 851 (Ont. C.A.), at para. 71.

78 The motion judge in this case applied his understanding of *Central & Eastern Trust Co. v. Rafuse* to the facts pleaded in the Fresh As Amended Statement of Claim at paras. 148 to 158 of his reasons. We excerpt the most relevant portions of these paragraphs below:

[148] The same analysis can be applied to the case at bar. The Class Members, including Mr. Lipson ... should have discovered their tort claims against Cassels Brock when the validity of the tax credits was denied by Canada Revenue in 2004. At that time and certainly not later than 2006, when Thornsteinssons LLP was retained to sue Canada Revenue, the Class Members knew or ought to have known the material facts on which the negligence claim or negligent misrepresentation claim against Cassels Brock was based.

[149] Like Central Trust, ... *the Class Members made donations that turned out to be ineligible for tax credits*. It is alleged that the Class Members relied on Cassels Brock's opinions or but for Cassels Brock's opinions they would have not participated in the Timeshare Program. *In both situations ... their awareness of the material facts of their claim against Cassels Brock came ... when Central Trust or the participants in the Timeshare Program respectively learned that there was a potential problem with the tax credits.*

[150] In the case at bar, as soon as the letters from Canada Revenue started to arrive, Mr. Lipson and the Class Members knew or ought to have known that Cassels Brock's opinion had caused damage because they had actually relied on the opinions, or, but for those opinions they would not or could not have participated in the Timeshare Program and suffered damages. Given that Canada Revenue was challenging the validity of the trust, the validity of the gift, the donative intent of the participants, and the value of the donation, **the donors knew that Canada Revenue could successfully deny the tax credit.**

[157] At the time of the letters from Revenue Canada, the Class Members' loss was actual not potential and they knew who to blame for that actual loss. The Class Members had been denied the tax credits in their entirety, and they allegedly had been lured into a transaction or not properly warned about a transaction that they allege they would have avoided but for

the role played by Cassels Brock. The Class Members incurred expenses, i.e. special damages, in an attempt to fix their problems by retaining another law firm in bringing proceedings against Canada Revenue.

[158] In the case at bar, no independent inquiry of the facts is necessary to determine whether or not the Class Members' claims are statute-barred. Indeed, this is apparent from the statement of claim that sets out the material facts for the discovery of the negligence and negligent misrepresentation claims that occurred when the letters of from Canada Revenue arrived denying the tax credits to the Class Members. [Emphasis added.]

79 In our respectful view, the motion judge's reasons concerning this issue are not entirely clear.

80 On the one hand, although the motion judge seems to acknowledge that the notices of disallowance were not a final disposition of the tax credit issue — and therefore at best provided notice of a *potential* claim — he appears to have concluded that all class members should have known when they received the notices of disallowance that the CCRA could successfully challenge their claims for tax credits and that the action therefore became statute-barred at that time (for example, see paras. 150 and 158).

81 Further, the motion judge appears to have treated the class members' knowledge that they were incurring professional fees to challenge the CCRA's denial of the claimed tax credits as a relevant factor affecting the commencement of the limitation period (for example, see paras. 148, 157).

82 In our view, neither the fact that the CCRA was challenging the claimed tax credits nor the fact that the class members may have been incurring professional fees to challenge the CCRA's denial of the tax credits is determinative of when the class members reasonably ought to have known they had suffered a loss as a result of a breach of the standard of care on the part of Cassels Brock.

83 As pleaded in the Fresh As Amended Statement of Claim, the Cassels Brock opinion was that it was unlikely that the CCRA could successfully deny the claimed tax credits. Accordingly, the fact of a CCRA challenge to the tax credits did not, in itself, mean the challenge would likely be successful or make the Cassels Brock opinion invalid. Further, even accepting that receipt of the notices of disallowance prompted class members to obtain professional advice and to launch test case litigation to challenge the denial of the tax credits, that conduct does not demonstrate when class members knew, or ought reasonably to have known, that the test case litigation would not likely be entirely successful.

84 The test case litigation did not settle until 2008. The answer to when the limitation period began to run for each Class Member may very well depend on several factors, including what position, if any, Cassels Brock took in response to the CCRA challenge; what notice, if any, Cassels Brock gave to class members of their position, if any, on the CCRA challenge; and what each class member was told by his or her professional advisor(s) and when: see *Ferrara v. Lorenzetti, Wolfe Barristers and Solicitors*. Importantly, this may be an issue that must be determined individually for each class member, depending on what individual class members were told and when.

85 In the Fresh As Amended Statement of Claim, Mr. Lipson pleaded that he and the other class members settled with the CCRA when it became "at least likely, if not certain" that the CCRA would be successful in challenging the tax credits claimed by Mr. Lipson and the other class members. In his Reply, he pleaded that "[u]ntil January 2008, during the test case litigation ... it was not known or reasonably discoverable that it was at least likely ... that [the CCRA] would be successful in challenging the tax credits claimed by Lipson and the other Class Members."

86 Although perhaps not express, these pleadings at least imply that Mr. Lipson and the other class members were not advised until January 2008 of the likelihood that the CCRA's disallowance of the tax credits would succeed, at least in part.

87 For the purposes of s. 5(1)(a) of the *Class Proceedings Act* (the reasonable cause of action prong of the certification test), no evidence is admissible. Unless patently ridiculous or incapable of proof, a plaintiff's pleadings must be accepted as true. On their face, Mr. Lipson's pleadings do not demonstrate that, prior to January 2008, he knew that the CCRA's challenge

to his claimed tax credits would likely be successful. Accordingly, his pleadings do not demonstrate that his claim was statute-barred when he commenced his action in April 2009.

88 Further, under ss. 5(1)(b)-(e) of the *Class Proceedings Act* (the remaining prongs of the certification test), a plaintiff need only show some evidence that the proposed claim satisfies each of the relevant criteria. Because the limitation issue is a defence, in the absence of evidence tending to demonstrate that the limitation period had expired, the limitation issue did not undermine Mr. Lipson's request for certification.

89 Cassels Brock argues that Mr. Lipson's own evidence demonstrates that, at least for him, the relevant limitation period had expired. They rely, for example, on the fact that he testified that he did not read the Cassels Brock opinion; that he interpreted the existence of the opinion as meaning the Timeshare Tax Reduction was legal and not subject to challenge; and that, when the CCRA challenged the tax credits, he knew he had a problem and that he would not obtain what Cassels Brock had promised.

90 We do not accept this argument. Whatever Mr. Lipson's interpretation of the Cassels Brock opinion, their opinion remains the same. Their opinion did not promise that the CCRA would not challenge the anticipated tax credits under the Timeshare Tax Reduction Program. Rather, it stated that it was unlikely that the CCRA could *successfully* challenge tax credits claimed under the Program. Mr. Lipson is not entitled to, and did not, sue Cassels Brock for an opinion they did not give. To the extent that his interpretation of the opinion may weaken his claim for reliance in relation to his negligent misrepresentation claim, in our view, that will be an issue for the trial judge.

91 Based on the foregoing reasons, we allow the appeal on this ground.

**(2) Did the motion judge err in finding that causation in simple negligence is not a proper common issue?**

92 The motion judge found that Mr. Lipson's pleading disclosed a cause of action in negligent misrepresentation and also in simple negligence, and that it was not plain and obvious that these claims would fail. He also found that, for both causes of action, whether Cassels Brock owed the class a duty of care and whether it had breached that duty were proper common issues.

93 However, the motion judge found that, for both causes of action, the question of whether Cassels Brock's breach caused the class damage was not a proper common issue but instead had to be answered on an individual basis for each class member.

94 Mr. Lipson contests this finding as it applies to his claim in simple negligence. He says that, for that cause of action, causation should be certified as a common issue.

95 For the following reasons, we agree.

96 In finding that Mr. Lipson's claim in simple negligence was properly disclosed by his pleading, the motion judge looked to Mr. Lipson's allegations that the Cassels Brock legal opinion was a necessary precondition for the marketing of the program, that Cassels Brock ought to have foreseen that for the promoters the opinion was fundamentally necessary for the presentation of the program, and that those who then bought into the program would suffer damage if the opinion had been negligently prepared.

97 Thus, the claim in simple negligence is distinct from Mr. Lipson's claim in negligent misrepresentation, which required proof of reliance on the opinion by individual class members in deciding to participate in the program.

98 Framed in this way, the cause of action in simple negligence does not require a showing of reliance on the Cassels Brock opinion by individual class members. The allegation is that class members suffered damage because they participated in the program, which, but for Cassels Brock's negligent opinion, would not have been marketed by the promoters and thus not available to class members. In our view, this issue is common to the claims of all class members.

99 It may be that, at the trial of this common issue, evidence will emerge that the Cassels Brock legal opinion was not a necessary precondition for the promoters to market the program. For example, there may be evidence that the promoters were satisfied to go to market without any legal opinion, or because of legal opinions other than those of Cassels Brock. However, that determination is for the trial. At this stage, there need only be some basis in fact supporting Mr. Lipson's simple negligence

claim. That requirement was met here. In addition to Mr. Lipson's pleading that the legal opinion was a necessary precondition, there was evidence of the promoters' accountant who said as much.

100 In summary, as it is pleaded, Mr. Lipson's claim in simple negligence raises the issue of whether, but for the Cassels Brock opinion, the program would have been marketed and therefore available to cause harm to all members of the class. This issue is properly resolved in a common trial.

#### **E. The Cross-Appeal**

101 Cassels Brock raises three issues by way of cross-appeal.

102 First, it says that the motion judge erred in finding that Mr. Lipson properly pleaded the elements of negligence, in particular: duty of care, causation and damages.

103 We do not agree. The claim pleads that Cassels Brock owed a duty of care to those who it could reasonably foresee would read and rely on its opinion and to those who would participate in the program marketed by the promoters based on the opinion. The claim pleads causation and damages insofar as those participating in the program on either basis suffered losses as a consequence.

104 Second, Cassels Brock says that the motion judge erred in certifying as common issues whether it owed the class a duty of care, what types of heads of damage class members may have suffered, and what remedies they might therefore be entitled to.

105 Again, we do not agree. Cassels Brock is mistaken in arguing that reliance on its opinion (which is an individual issue) is a key element in determining whether it owed a duty of care to any class members. Whether or not any class member in fact relied on the Cassels Brock opinion is irrelevant to whether Cassels Brock owed a duty of care to those who Cassels Brock could reasonably foresee might do so. Cassels Brock is also in error in saying that the quantum of damage each class member in fact suffered (an individual issue) is integral to determining what types or heads of damage to which class members could be entitled, and what remedies flow from that determination. The former is not relevant to the latter.

106 Third, Cassels Brock argues that the motion judge erred in finding that Mr. Lipson's action met the preferred procedure requirement for certification. It says that, in this case, the individual issues overwhelm the common issues and that the third party claims make a common trial unmanageable.

107 Here too we reject Cassels Brock's argument. The motion judge's conclusion about preferable procedure requires the balancing of a number of considerations. This exercise of judicial discretion will attract appellate scrutiny only if it reflects an error in principle or an unreasonable finding of fact. Neither argument raised by Cassels Brock permits such a conclusion. The motion judge was well-aware of the individual issues that would remain after adjudication of the common issues. He weighed the relative importance of each in fully resolving the action, and determined that the latter were not overwhelmed by the former. We see no basis to interfere with his conclusion.

108 Mr. Lipson's litigation plan effectively addresses the manageability question in light of the third party claims. The motion judge approved that plan, and Cassels Brock did not challenge the plan in this court. Here too, we see no basis to interfere with the motion judge's determination.

#### **F. Disposition**

109 For these reasons, we allow the appeal, set aside paras. 1, 2 and 3 of the Order and dismiss the cross-appeal. Further, the action is ordered certified as proposed by the motion judge, with the addition of the common issue of causation in simple negligence. The Order should be amended to that effect.

110 The parties shall file submissions of no more than ten pages addressing the issues of costs here and below. These are to be filed within 30 days of the release of these reasons.

**E.E. Gillese J.A.:**

I agree

*Appeal allowed; cross-appeal dismissed.*

#### **Appendix 'A'**

#### **Re: Donation of One-Bedroom and Two-Bedroom, Biennial Timeshare Vacation Weeks**

You have requested our opinion regarding the Canadian Federal Income Tax consequences relating to a donation of 75-year leasehold Biennial Timeshare Resort Weeks at the Alexandra Resort and Spa in Providenciales, Turks and Caicos Islands, British West Indies (the "Timeshare Weeks") by individual Canadian resident taxpayers. It is contemplated that any such donation would entitle the donor to claim a tax credit under the *Income Tax Act* (Canada) (the "Tax Act").

This opinion is specifically directed to potential donors who are individuals and who acquire and hold the Timeshare Weeks as capital property. The Timeshare Weeks will generally be considered to be held as capital property, unless...

...

#### **1. Meaning of "Gift"**

In order to claim a tax credit for a donation there must be a complete gift of the property. Each of several elements must be found in order for a donation to qualify as a gift for income tax purposes. These elements are summarized by the CCCRA in its Interpretation Bulletin IT-110R3 entitled, "Gifts and Official Donation Receipts", at para 3 as follows:

A gift, for purposes of sections 110.1 and 118.1, is a voluntary transfer of property without valuable consideration. Generally, a gift is made if all three of the conditions listed below are satisfied:

...

(c) the transfer is made without expectation of return. No benefit of any kind may be provided to the donor or to anyone designated by the donor, except where the benefit is of nominal value.

...

The courts have held that a tax advantage (that is a tax credit for an individual) is not considered to be a benefit within this test (see *Friedberg (A.D.) v. Canada*, 92 D.T.C. 6031 (F.C.A.)).

...

If a Class A Beneficiary chooses to retain the Timeshare Weeks, he or she may do so and hold, exchange, or sell the Timeshare Weeks, as well as to utilize them for his or her own vacations, or for any other lawful and permitted purposes. *If all or substantially all of the Class A Beneficiaries who receive Timeshare Weeks donate them, the CCCRA may be more inclined to challenge the arrangement (but see our opinion below at page 23 as to the unlikely success of such a challenge.)*

...

#### **7. General Anti-Avoidance Rule ("GAAR")**

Although the current version of GAAR has been in place since 1988, there has to date been little jurisprudence of direct relevance to charitable donations. GAAR is intended to apply to situations where a transaction or series of transactions results in a tax benefit, unless the transaction may reasonably be considered to have been undertaken or arranged primarily for *bona fide*

purposes other than to obtain the tax benefit, or unless the transaction does not result in a misuse of the provisions of the Tax Act or an abuse having regard to the provisions of the Tax Act as a whole.

...

Accordingly, we are of the opinion that a good argument can be made that it cannot reasonably be said that there is an abuse of the provisions of the Tax Act as a whole in these circumstances.

In our opinion, and based on the foregoing, a donation of Timeshare Weeks in these circumstances would not likely be successfully attacked under GAAR.

...

**9. General Comments** This opinion is based on the current provisions of the Tax Act, the regulations thereunder, and our understanding of the current administrative practices of the CCCRA. .... No advance tax ruling has been sought or obtained from the CCCRA to confirm the tax consequences or any of the transactions described herein.

This opinion may be relied upon only by CAA and potential donors, their agents and professional advisors, for the purpose of the transactions contemplated by this opinion. It may not be relied upon by any other person or for any other purpose, nor may it be quoted in whole or in part or its existence or contents otherwise referred to, without our prior written consent.

Based on and subject to the foregoing review, in our opinion it is unlikely that the CCCRA could successfully deny the deemed adjusted cost base of the Timeshare Weeks to, nor the tax credit claimed by, the Class A Beneficiaries who receive a distribution of the Timeshare Weeks from the Trust, and subsequently choose to make a voluntary and complete donation of some or all of their Timeshare Weeks to an RCAA.

#### Footnotes

**1** Paragraphs 54 and 55 of the Fresh As Amended Statement of Claim provide as follows:

54. In or about January 2008, [the CCRA] agreed to settle the test case litigation on the basis that [the two donors] would be entitled to a tax credit for the cash portion of their donations to the [registered Canadian amateur athletic associations] under the [Timeshare Tax Reduction Program], but would not receive any tax credits for their donations of Timeshare Weeks. [The CCRA] extended this settlement offered to Lipson and the other Class Members.

55. Faced with the prospect that it was at least likely, if not certain — and not "unlikely" as Cassels Brock had represented in each of the Legal Opinions — that [the CCRA] would be successful in challenging the tax credits claimed by Lipson and the other Class Members in respect of at least their donation of Timeshare Weeks to the [registered Canadian amateur athletic associations], Lipson accepted [the CCRA's] settlement offers.

**2** The motion judge stated the revised questions as follows:

5. If after an individual issues trial, the defendant were found liable to a Class Member for negligent misrepresentation or negligence, what types or heads of damages, if any, would the Class Members be entitled to?

6. If after an individual issues trial, the defendant were found liable to a Class Member for negligent misrepresentation or negligence what remedy or remedies, if any, would the Class Members be entitled to?

**Headnote**

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiff customer alleged that combined effect of flat fee and interest rate charged by defendant bank on credit card cash advances amounted to usurious rate of interest contrary to s. 347 of Criminal Code — Plaintiff brought action for breach of

contract, accounting of interest paid, injunctive relief and restitutionary damages — Motion judge dismissed plaintiff's motion to certify, holding that class proceeding was not preferable procedure because if action succeeded and defendant was forced to comply with law, its customers would have fewer options and pay more interest — Divisional Court agreed with motion judge's analysis of preferable procedure respecting restitutionary claims and claims for injunctive and declaratory relief, and held that motion judge could consider potential negative consequences of class action to members when weighing alternative procedures — Plaintiff appealed — Appeal allowed and motion for certification granted — Findings of motion judge on issue of preferable procedure were fundamentally inconsistent, and motion judge erred in principle in analyzing whether class proceeding was preferable procedure — If plaintiff pursued individual action and obtained declaration or injunction, consequence would be no different than class proceeding, as defendant would comply with injunction or conduct its business in accordance with declaration and stop violating law for all customers and not just plaintiff — Motion judge also failed to apply criteria for preferable procedure which involved considering proceeding through lens of judicial economy, access to justice and behaviour modification — Judge appeared to have accepted that class proceeding would meet behaviour modification and access to justice issues, but failed to expressly deal with issue of judicial economy — Goal of judicial economy also favoured class proceeding — Class proceeding would be fair, efficient, manageable way to advance claim — Class proceeding was not only preferable procedure, but only viable procedure for remedying alleged wrong and calling alleged wrongdoer to account.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiff customer alleged that combined effect of flat fee and interest rate charged by defendant bank on credit card cash advances amounted to usurious rate of interest contrary to s. 347 of Criminal Code — Plaintiff brought action for breach of contract, accounting of interest paid, injunctive relief and restitutionary damages — Motion judge refused to certify action as class proceeding, holding that common issues requirement was only met with respect to claims for declaration and injunction and not in respect of restitution claim, and that defendant's records were such that case would disintegrate into manual examination of millions of transactions — Divisional Court dismissed appeal, holding that individual issues would have to be decided before liability to class members could be determined and that plaintiff had not shown that common trial would adjudicate substantial part of member's claims, and so failed to meet commonality requirement regarding restitution claims — Plaintiff appealed — Appeal allowed and motion for certification granted — Claims were unsuitable for certification if transactions had to be examined individually as time and cost would overwhelm common issues — By recasting case to take advantage of ss. 23 and 24 of Class Proceedings Act, plaintiff met lower courts' concerns regarding common issues for restitution and breach of contract claims and costs of analyzing claims — Section 23 authorized plaintiff to use statistical sampling to determine issues relating to amount or distribution of monetary award — Section 24, together with statistical sampling methods permitted by s. 23, would meet individual assessment problem — This was case where aggregate liability to members of class could be reasonably determined — Section 23 and 24 provided means of avoiding potentially unconscionable result of wrong eluding effective remedy — Section 24 was applicable where only questions of fact or law that remained to be determined concerned assessment of monetary relief, and plaintiff satisfied this and other preconditions in s. 24 — Provided plaintiff could establish liability on class-wide basis, s. 23 could be used to calculate global damages figure and s. 24 could be used to find way to distribute aggregate sum to class members — Result might be that some members who did not suffer damage would receive share of award, but that was very result contemplated by s. 24 — This case was very kind of case that s. 24 was designed to deal with because it was impractical and inefficient to identify specific recipients — Accordingly, there were common issues in relation to claims for declaratory and injunctive relief, restitution, and breach of contract.

Financial institutions --- Loans and discounts — Interest

Plaintiff customer alleged that combined effect of flat fee and interest rate charged by defendant bank on credit card cash advances amounted to usurious rate of interest contrary to s. 347 of Criminal Code — Plaintiff brought action for breach of contract, accounting of interest paid, injunctive relief and restitutionary damages — Motion judge refused to certify action as class proceeding, holding that common issues requirement was only met with respect to claims for declaration and injunction and not in respect of restitution claim, and that defendant's records were such that case would disintegrate into manual examination of millions of transactions — Divisional Court dismissed appeal, holding that individual issues would have to be decided before liability to class members could be determined and that plaintiff had not shown that common trial would adjudicate substantial part of member's claims, and so failed to meet commonality requirement regarding restitution claims — Plaintiff appealed — Appeal allowed and motion for certification granted — Claims were unsuitable for certification if transactions had to be

examined individually as time and cost would overwhelm common issues — By recasting case to take advantage of ss. 23 and 24 of Class Proceedings Act, plaintiff met lower courts' concerns regarding common issues for restitution and breach of contract claims and costs of analyzing claims — Section 23 authorized plaintiff to use statistical sampling to determine issues relating to amount or distribution of monetary award — Section 24, together with statistical sampling methods permitted by s. 23, would meet individual assessment problem — This was case where aggregate liability to members of class could be reasonably determined — Section 23 and 24 provided means of avoiding potentially unconscionable result of wrong eluding effective remedy — Section 24 was applicable where only questions of fact or law that remained to be determined concerned assessment of monetary relief, and plaintiff satisfied this and other preconditions in s. 24 — Provided plaintiff could establish liability on class-wide basis, s. 23 could be used to calculate global damages figure and s. 24 could be used to find way to distribute aggregate sum to class members — Result might be that some members who did not suffer damage would receive share of award, but that was very result contemplated by s. 24 — This case was very kind of case s. 24 was designed to deal with because it was impractical and inefficient to identify specific recipients — Accordingly, there were common issues in relation to claims for declaratory and injunctive relief, restitution, and breach of contract.

Criminal law --- Offences — Criminal interest rate — Receiving payment of interest at criminal rate

APPEAL by plaintiff from judgment reported at *Markson v. MBNA Canada Bank* (2005), 204 O.A.C. 94, 78 O.R. (3d) 38, 2005 CarswellOnt 5230, 22 C.P.C. (6th) 221 (Ont. Div. Ct.), upholding judgment refusing certification of action as class proceeding.

***M. Rosenberg J.A.:***

1 The issue in this case is whether a claim based on allegations that a financial institution received interest on cash advances in violation of s. 347(1)(b) of the *Criminal Code* is suitable for certification as a class action under the *Class Proceedings Act*, 1992, S.O. 1992, c. 6. The alleged violation of s. 347(1)(b) turns on the fact that the defendant bank charges a flat fee (the transaction fee), in addition to compound interest, on every cash advance from its credit cards. Depending on other activity in the cardholder's account and the timing of repayment, it is possible that the interest rate calculated in accordance with s. 347 will exceed the 60 per cent maximum prescribed by s. 347. In these reasons I will refer to an effective annual interest rate exceeding 60 per cent as the criminal interest rate.

2 The plaintiff seeks three types of relief. First, he seeks a declaration that the defendant's practice violates s. 347 and injunctive relief to prevent the defendant from continuing its practice. Second, he seeks damages for breach of contract and restitution for the amounts received by the defendant in excess of the permissible interest rate. Finally, he seeks punitive damages.

3 Cullity J., an experienced class proceedings judge, refused to certify the class because the restitution and breach of contract claims did not raise common issues and because a class proceeding was not the preferable procedure with respect to the balance of the claims. His reasons are reported at (2004), 71 O.R. (3d) 741 (Ont. S.C.J.). A majority of the Divisional Court (Dunnet and Jennings JJ.) upheld that decision. O'Driscoll J., dissenting, would have overturned the decision and certified the class proceedings. Their reasons are reported at (2005), 78 O.R. (3d) 38 (Ont. Div. Ct.).

4 The fundamental question raised by the appeal is whether a class proceeding is appropriate where *all* members of the class are at risk of being charged a criminal interest rate and thus, potential beneficiaries of the declarative and injunctive relief sought, but *only some* of the members — a much smaller number of the class — were actually victims of the defendant's practice and thus, entitled to damages and restitution. A related issue is whether a class proceeding is the preferable procedure where it is reasonable to conclude that some, perhaps many, might actually prefer that the alleged illegal practice continue rather than

risk losing the benefit of taking cash advances on their credit card or having additional restrictions imposed on the size of the advances and repayment terms.

5 For the following reasons I would allow the appeal, set aside the orders of the Divisional Court and the motion judge, and substitute an order granting the motion for certification. In short, it is my view that a trial judge could find that this is an appropriate case for an aggregate assessment of monetary relief under s. 24 of the *CPA*. Accordingly, that section, together with the statistical sampling methods permitted by s. 23, will meet the individual assessment problem identified by the motion judge. I am also of the view that the motion judge erred in principle in his analysis of whether a class proceeding is the preferable procedure. As the Chief Justice said in *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 29, "Without class actions, those who cause widespread but individually minimal harm might not take into account the full costs of their conduct". In my view, this is manifestly a case where a class proceeding is not only the preferable procedure, but also the only viable procedure for remedying the alleged wrong and calling the alleged wrongdoer to account.

### **The Facts**

6 The facts underlying this action are fully set out in the comprehensive reasons of the motion judge. I will, however, provide a brief summary of the relevant facts so that the legal issues can be properly understood. The defendant MBNA is a Schedule II bank under the *Bank Act*, S.C. 1991, c. 46. It issues MasterCard credit cards. Cardholders (or customers) can use their credit cards to make purchases and to obtain cash advances. The defendant charges a transaction fee for cash advances. At the applicable time, the transaction fee charged was the greater of \$7.50 or one per cent of the cash advanced. For the purposes of the certification motion only, the defendant concedes that the transaction fee falls within the definition of interest in s. 347.

7 In addition to the transaction fee, the cardholder is charged compound interest from the day the cash advance is made until it is paid off. While the cardholder is required to pay off a certain minimum amount outstanding on the credit card account each month, the cardholder is not required to pay down the account to zero every month. If a cardholder borrows less than \$62.30, does not engage in any other transactions in the month, and pays off the cash advance, including the transaction fee and interest before the end of the month, the defendant will receive a payment of interest, as defined in s. 347, in excess of 60 per cent. Depending on how quickly the cardholder pays off the amounts owing, the effective annual interest rate can be astronomical, in the thousands of per cent.

8 As this short explanation foreshadows, many variables influence whether or not the defendant receives interest at the criminal rate. The most important are the timing of repayment and other transactions on the account. For example, an isolated cash advance of \$62.30, or more, will result in an effective annual interest rate of less than 60 per cent if the cardholder simply repays in accordance with the required minimum monthly payments. Similarly, if the cardholder uses the credit card to not only make cash advances but to purchase goods or services, which do not attract a transaction fee, the effective interest rate on the account may or may not exceed 60 per cent. There are various combinations and permutations that affect the interest rate calculation.

9 The defendant claims that there is no simple way to determine the interest rate that it charged its customers on various transactions. As of December 2003, it had approximately 2.5 million credit card accounts with current charging practices. Between January 2000 and December 2003, there were eight million cash advance transactions. Of these eight million cash advances, 17 per cent were for amounts less than \$62.00. It has no electronically-preserved data for the period before January 2000 and therefore provided no data as to the number of cash advances for that period. The motion judge described the defendant's position in these terms at para. 36:

It claims that it is not possible to determine from its database the effective annual interest rate received by it for each cash transaction and that this could be done only by manually and individually tracking each advance from the time it was made to the time it was repaid in full. Even then, assumptions would have to be made about the effect of multiple transactions in the accounts in order to determine when a particular advance was repaid in full.

10 The plaintiff does not accept this position. The motion judge described his position in these terms at para. 37:

From the information provided in the affidavits filed on behalf of the defendant, a forensic accountant retained by the plaintiff indicated that he was not satisfied of the accuracy and completeness of MBNA's assertion that it cannot determine, on an automated basis, the effective annual interest rate it received for each cash transaction. In his opinion, if his firm was able to review MBNA's systems with the co-operation and assistance of its staff, it would be able to determine if it is possible to identify the potential class members and devise a system to do this.

11 As I will discuss later when dealing with the question of common issues for the restitution claim, it appears that the motion judge accepted the defendant's position. As he said at para. 55: "There is, in my judgment, insufficient evidence of the likelihood that an appropriate electronic system can be developed — and of the cost of doing this — to justify certification of the restitutionary issues."

12 The defendant denies that its practice in respect of cash advances violates s. 347(1)(b). It relies on a voluntariness defence arising from the decision of the Supreme Court of Canada in *Degelder Construction Co. v. Dancorp Developments Ltd.*, [1998] 3 S.C.R. 90 (S.C.C.) and *Garland v. Consumers' Gas Co.*, [1998] 3 S.C.R. 112 (S.C.C.) ("Garland No. I"). Those cases hold that there is no violation of s. 347(1)(b) where a payment of interest exceeding 60 per cent arises from a voluntary act of the debtor. The defendant submits that because the cardholder can determine when to pay back the cash advance, whether to make other purchases, how much to borrow and so on, any payment of interest at the criminal rate is voluntary. The defendant submits that this voluntariness defence applies to all of the impugned transactions.

### **The Reasons of the Motion Judge**

13 The motion judge noted that at least with respect to the representative plaintiff there was little controversy about the facts; that resolution of the claim would depend more on issues of law than issues of fact. As he said at para. 17, the principal issue would relate to the interpretation of s. 347 of the *Criminal Code*:

The threshold question, that may determine the outcome of the litigation, is whether payments of excess interest on advances obtained pursuant to the cardholders agreement are necessarily to be considered voluntary. This is, I believe, a question of law as, essentially, it requires an elucidation of the definition provided by Major J. [in *Degelder, supra*].

14 The motion judge then identified the central factual issues that would arise if the legal issues were determined in the plaintiff's favour. Factual investigations would be required to identify those cardholders who paid interest at a criminal rate and the amount paid in excess of 60 per cent in each case.<sup>1</sup> However, he indicated that such investigations would be required only in respect of the claim for restitution. This distinction appears to have dominated the motion judge's reasons and ultimately led him to find that a class proceeding is not the preferable procedure.

15 After reviewing the evidence in much greater detail than I have done here, the motion judge turned to the requirements for certification in s. 5 of the *CPA*. With respect to s. 5(1)(a) — disclosure of a cause of action — as the motion judge noted, this issue was to be determined on the basis of the pleadings, including the provisions of the cardholders agreement and disclosure statement that were to be considered incorporated into the amended statement of claim. He held that the s. 5(1)(a) requirement was made out in respect of the cause of action relating to the alleged violation of s. 347 and consequent unjust enrichment. He was also satisfied that a cause of action based on breach of contract was made out on the theory that the respondent failed to credit excess payments of interest to its customers.

16 As the motion judge noted, the requirement in s. 5(1)(b) — existence of a class — posed a problem of under and over-inclusion. The original class proposed in the statement of claim was as follows:

all persons who (i) hold or have held an MBNA Credit Card and (ii) paid, or have been charged, or will pay, or will be charged interest on Cash Advances on a MBNA Credit Card since MBNA commenced carrying on business in Canada, and the date of judgment in this matter.

17 While this definition might suffice in respect of the claims for declaratory and injunctive relief, it was over-inclusive because it would include a large number of cardholders who never paid interest at the alleged criminal rate because they (i) never took cash advances or (ii) repaid their advances in a manner that did not trigger a criminal interest rate. These cardholders would have no restitution claim and, presumably, for the same reason no claim for breach of contract.

18 The motion judge was also of the view that the definition could be criticized as under-inclusive because it excludes existing cardholders "who have not, and do not, pay interest within the defined period but may do so thereafter" [para. 38].

19 In the end, the motion judge rejected the defendant's argument that the defined class was over-inclusive. He did so, it seems, on the theory that each member of the proposed class was potentially at risk of being charged a criminal interest rate and that there was no way to define the class more narrowly. The proposed definition had the advantage of allowing potential class members to identify themselves without running afoul of the rule that the class must be defined without reference to the merits of the claim. Thus, the motion judge rejected an alternative definition of the class that had been proposed by the plaintiff and would have restricted the class to those cardholders who made interest payments in excess of an effective annual rate of 60 per cent.

20 The motion judge did, however, reformulate the original class definition because of a concern that the definition did not refer to persons who obtained cash advances after the date on which notice of certification was given. Accordingly, at para. 43, he proposed the following definition:

All persons in Canada who, at any time before the date [or the last of the dates] on which notice of certification is given pursuant to the order of this Court, hold or have held, an MBNA credit card on which cash advances could be obtained.

21 The motion judge held that the common issues requirement prescribed in s. 5(1)(c) was met only with respect to the claims for a declaration and an injunction. Accordingly, at para. 60, he restated and reduced the original twelve common issues proposed to the following:

1. Has MBNA received interest in excess of an effective annual rate of 60 per cent on cash advances made under agreements or arrangements with class members?
2. If so, were, and are, class members entitled to withhold payment of such excess interest:
  - (a) because MBNA's receipt of such excess interest would be in violation of s. 347 of the *Criminal Code*; or
  - (b) pursuant to such agreements or arrangements?
3. Should MBNA be [e]njoined from charging, or receiving and not crediting, excess interest in the future?
4. Should the class be awarded punitive damages against MBNA?

22 The motion judge was of the view that issues concerned solely with the rights of class members to restitution "would not advance the proceeding sufficiently in view of the likelihood that it will be necessary to review the transactions of each cardholder in order to identify those who paid interest at a criminal rate, the amount of such payments and the variables that affected the rate in each case" [para. 53]. In Appendix "A" I have set out the common issues proposed by the plaintiff before the motion judge. Some of the common issues rejected by the motion judge were: whether the defendant was required to pay to the class, as restitution, the transaction fees or, alternatively, the interest it has received from the class that exceeds an effective annual interest rate of 60 per cent and whether the cash advance transaction fee was incurred voluntarily by the class so as to give rise to a defence of voluntariness.

23 The motion judge's finding that there were not appropriate common issues in respect of the restitution claim depended, in part, on his view that since it was unlikely that an electronic system could be developed to identify the transactions on which an effective interest rate exceeding 60 per cent was paid, the case would disintegrate into manually examining millions of transactions. Even if some kind of electronic system could be developed, the expense of this exercise would far exceed the

benefit to the individual class members given the plaintiff's concession that restitution to individual cardholders would be in the neighbourhood of \$7.50. Accordingly, the motion judge refused to certify the proceeding in respect of the issues directed solely at the restitutionary claims.

24 The motion judge then addressed s. 5(1)(d), the question of preferable procedure, in relation to the balance of the claims. He seems to have found that a class proceeding would meet the goals of access to justice and behaviour modification. He did not expressly deal with the third goal — judicial economy. Rather, he found that the preferable procedure requirement was not met in relation to the claims for declaratory and injunctive relief because if the action succeeded, the defendant would be required to comply with the law and compliance with the law would reduce the credit options available to consumers. The basis for this finding was in an affidavit filed by the defendant. In short, the defendant asserted that to avoid receiving a criminal interest rate on transactions it could preclude customers from drawing less than a certain amount and repaying the advance before a certain date. In the result, customers would end up with fewer options and would be required to pay greater amounts of interest. As the motion judge put it at para. 67: "Given the declaratory and injunctive nature of the relief sought by the plaintiff, the right to opt out would provide cold comfort to class members who would prefer to pay less interest than to participate, as private citizens, in the enforcement of s. 347 of the *Criminal Code*."

25 The motion judge considered that it would still be open to the plaintiff to pursue the litigation in his individual capacity, but it was not appropriate to force other consumers to join in the proceeding. As he said at para. 68:

Mr. Markson is free to pursue his objective in his individual capacity but that does not mean that the court should subject cardholders in general to the proceedings when there are reasons why they might well consider orders for the declaratory and injunctive relief as not in their best interests if they were informed of the likely consequences, and there is no evidence to the contrary.

26 In the result, the motion judge refused to certify the proceeding in relation to the claims for a declaration and an injunction. He nevertheless went on to consider the final criterion, the presence of an appropriate representative plaintiff. The principal challenge to Mr. Markson as an appropriate representative plaintiff rested with the defendant's assertion that it had a defence to his claim that might not apply to the class as a whole based on evidence from which it could be inferred that the plaintiff had deliberately set out to create a transaction that resulted in him paying an effective rate of interest in excess of 60 per cent. The motion judge dealt with this issue at length and resolved the issue in the plaintiff's favour. Since this is not an issue on the appeal I will simply say that I agree with the motion judge's analysis.

27 The motion judge did not expressly deal with whether the plaintiff had proposed an acceptable litigation plan. Again, however, this is not an issue on the appeal.

## **The Reasons of the Divisional Court**

### **(a) The Majority**

28 Writing for the majority of the Divisional Court, Dunnet J., Jennings J. concurring, agreed with the motion judge. At para. 47, she interpreted the reasons of the motion judge as holding that each cash advance transaction, including its surrounding circumstances, "would have to be reviewed in order to determine whether interest at an effective annual rate in excess of 60 per cent was received by each cardholder, the quantum of such excess in each case, whether that receipt arose as a result of a voluntary act and whether, ultimately, the test for unjust enrichment in each case could be established." She held that the record before the motion judge disclosed that notwithstanding resolution of the proposed common issues, individual issues would have to be decided before the defendant's liability to any class member could be determined. Consequently, she concluded, at para. 49, that "the [plaintiff] failed to demonstrate that a common trial would adjudicate a substantial part of each class member's claims and thus failed to meet the commonality requirement regarding the restitutionary claims."

29 The majority of the Divisional Court also agreed with the motion judge's analysis of preferable procedure respecting the restitutionary claims and the claims for injunctive and declaratory relief. In particular, the majority concluded, at para. 71,

that the motion judge was "entitled to consider the potential negative consequences of a class action to class members when weighing alternative procedures."

**(b) O'Driscoll J. (Dissenting)**

30 O'Driscoll J., dissenting, held that the motion judge erred in several respects. First, he committed the error identified by this court in *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236 (Ont. C.A.), leave to appeal refused (2001), [2000] S.C.C.A. No. 660 (S.C.C.), by finding common issues in relation to some but not all of the causes of action notwithstanding the causes of action substantially overlapped. O'Driscoll J. held at para. 43 of his reasons that:

Far from being unrelated and disparate claims, in my view, the claim grounded in an alleged breach of s. 347 of the Code and the claim grounded in breach of contract and calling for restitution all revolve around whether the respondent received interest exceeding the rate allowed in s. 347 of the Code from the appellant and other members of the class when the cardholders obtained cash advances on their individual cards.

31 Accordingly, the motion judge erred in separating these issues; the plaintiff had provided a sufficient basis to conclude that a resolution of common issues relating to breach of contract and restitution would, in a significant way, advance those claims. The motion judge also erred in finding that a class proceeding was not the preferable procedure because:

- Individual actions would be cost prohibitive given the small amounts in issue for any individual. Thus, a class proceeding meets the goal of access to justice.
- There was no undertaking from the defendant that it would stop its method of charging on cash advances. A class proceeding therefore meets the goal of behaviour modification.
- The defendant's "*in terrorem*" argument about the sanctions it would impose upon its customers if it were forced to comply with the law is not a matter for the court, but for Parliament<sup>2</sup> and the marketplace [para. 55].

32 Further, O'Driscoll J. was unimpressed with the argument that the plaintiff was not a suitable representative plaintiff. As he said at para. 34, "In a 'clean hands' competition between these parties, in my view, the appellant would win in a walk." He concluded, at para. 60, that "this case fits perfectly into the mould designed for class proceedings." He would therefore have allowed the appeal and certified the class action with the common issues identified by the plaintiff, which have been reproduced in Appendix "A".

**Analysis**

**(a) Introduction**

33 This court has repeatedly held that the decisions of experienced judges, like the motion judge in this case, are entitled to substantial deference. Accordingly, as was said in *Cloud v. Canada (Attorney General)* (2004), 247 D.L.R. (4th) 667 (Ont. C.A.) at para. 39, leave to appeal refused [2005] S.C.C.A. No. 50 (S.C.C.), this court "should restrict its intervention to matters of general principle."

34 As indicated, the motion judge found that the following requirements of s. 5 of the *CPA* had been made out:

- Disclosure of a cause of action [5(1)(a)] in relation to unjust enrichment based on a violation of s. 347 and breach of the cardholders agreement;
- Existence of a class [5(1)(b)];
- Common issues [5(1)(c)] in relation to claims for injunctive and declaratory relief and punitive damages; and,
- Acceptable representative plaintiff [5(1)(e)].

35 I agree with the motion judge with respect to those issues decided in the plaintiff's favour. Accordingly, I will address only the common issues criterion in relation to the claims for restitution and breach of contract, and the question of preferable procedure. In my view, the motion judge erred in principle with respect to the preferable procedure issue. I am also of the view that by recasting its case to take advantage of ss. 23 and 24 of the *CPA*, the plaintiff has met the concerns of the motion judge and the Divisional Court regarding common issues for the restitution and breach of contract claims.

**(b) Common issues and the claims for restitution and breach of contract**

36 The fundamental problem underlying the question of issues common to the claims for restitution and breach of contract is that the defendant has structured its affairs such that it is practically impossible to determine the extent of its breach of s. 347 of the *Criminal Code*. In framing the issue in this way, I should not be taken as having found that the defendant deliberately structured its affairs to avoid a possible class proceeding or a finding that it violated s. 347. The fact remains, however, that the effect of the defendant's accounting practices is that the precise extent of any violation of s. 347 can be determined only at great cost.

37 While the plaintiff continues to assert that it may be possible to design a computer programme that could determine the extent of the alleged breach of s. 347 and identify the individual cardholders who would be entitled to restitution or damages for breach of contract, I have not been persuaded that the motion judge's finding to the contrary is unreasonable. Accordingly, if the millions of transactions have to be examined individually, the motion judge is undoubtedly correct that those claims are not suitable for certification; the time and cost to determine the size of the liability in relation to each member of the class would overwhelm the common issues. However, if the motion judge is correct in finding that each transaction would have to be examined individually, the allegedly illegal conduct of the defendant will continue and its customers will receive no remedy for the previous violations.

38 On appeal to this court the plaintiff for the first time submitted that ss. 23 and 24 of the *CPA* offer a solution to the common issues problem with respect to the restitution and breach of contract claims. The relevant provisions are as follows:

23. (1) For the purposes of determining issues relating to the amount or distribution of a monetary award under this Act, the court may admit as evidence statistical information that would not otherwise be admissible as evidence, including information derived from sampling, if the information was compiled in accordance with principles that are generally accepted by experts in the field of statistics.

24. (1) The court may determine the aggregate or a part of a defendant's liability to class members and give judgment accordingly where,

(a) monetary relief is claimed on behalf of some or all class members;

(b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability; and

(c) the aggregate or a part of the defendant's liability to some or all class members can reasonably be determined without proof by individual class members.

(2) The court may order that all or a part of an award under subsection (1) be applied so that some or all individual class members share in the award on an average or proportional basis.

(3) In deciding whether to make an order under subsection (2), the court shall consider whether it would be impractical or inefficient to identify the class members entitled to share in the award or to determine the exact shares that should be allocated to individual class members.

39 Provided the defendant is not prejudiced, it is open to a plaintiff to recast its case to make it more suitable for certification: see *Kumar v. Mutual Life Assurance Co. of Canada* (2003), 226 D.L.R. (4th) 112 (Ont. C.A.) at paras. 30-34 and *Rumley v.*

*British Columbia* (2001), 205 D.L.R. (4th) 39 (S.C.C.) at para. 30. In sum, that is what has occurred here. While the plaintiff has not abandoned its position that it may be possible to design a computer programme to identify those customers who actually paid a criminal interest rate, he now suggests that in the alternative, an aggregate monetary award can meet the commonality concerns. The defendant has not shown how it has been prejudiced by this change in the plaintiff's position.

40 The statistical sampling authorized by s. 23 cannot be used to determine the defendant's liability. Rather, s. 23 provides a means "of determining issues relating to the amount or distribution of a monetary award". Similarly, this court held in *Chadha v. Bayer Inc.* (2003), 63 O.R. (3d) 22 (Ont. C.A.) at para. 49, leave to appeal refused [2003] S.C.C.A. No. 106 (S.C.C.), that s. 24 "is applicable only once liability has been established, and provides a method to assess the quantum of damages on a global basis, but not the fact of damage."

41 If the common issues relating to the application for a declaration and injunctive relief were to be determined in the plaintiff's favour, the trial court will have found that the defendant received interest in excess of an effective annual rate of 60 per cent on cash advances. Thus, liability to some class members will have been established. At least some members of the class would therefore be entitled to a remedy, either by way of restitution or damages for breach of contract. In my view, those two findings — liability and entitlement to a remedy — are sufficient to trigger the application of ss. 23 and 24.

42 As I have said, because of the way the defendant has structured its affairs it is practically impossible to determine the extent of its breach of s. 347. Once the common issues are resolved, it would be possible to review the statements of each individual cardholder and calculate the cardholder's damages. The vast number of accounts to be reviewed and the small potential award in each case are such that it is impractical and inefficient to do so. Sections 23 and 24 provide a means of avoiding the potentially unconscionable result of a wrong eluding an effective remedy.

43 Pursuant to s. 24(1), the section applies if: (a) monetary relief is claimed on behalf of *some* or all class members; (b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability; and (c) the aggregate or a part of the defendant's liability to some or all class members can be reasonably determined without proof of individual claims. In my view, this is a case where the aggregate liability to all members of the class can be reasonably determined.

44 The difficult issue in this case is whether s. 24 can apply where, as here, it is alleged that whether or not an individual was affected by a breach of contract or violation of the *Criminal Code* can only be done on a case-by-case basis. This depends on an interpretation of s. 24(1). Section 24 has received relatively little attention in the reported cases: see e.g. *Serhan Estate v. Johnson & Johnson* (2006), 269 D.L.R. (4th) 279 (Ont. Div. Ct.) at paras. 136-39. However, I agree with Cullity J. in *Vezina v. Loblaw Cos.*, [2005] O.J. No. 1974 (Ont. S.C.J.) at para. 25 that at the certification stage the plaintiff need only establish that "there is a reasonable likelihood that the preconditions in section 24(1) of the CPA would be satisfied and an aggregate assessment made if the plaintiffs are otherwise successful at a trial for common issues."

45 In this case, conditions (a) and (c) pose no difficulty. With respect to (a), monetary relief is claimed on behalf of the class. As to condition (c), statistical sampling — as provided for in s. 23 — can be employed to determine the aggregate or part of the defendant's liability without proof of individual claims. Thus, this condition is also satisfied.

46 This leaves condition (b). Can it be said that no questions of fact or law *other than those relating to the assessment of monetary relief* remain to be determined in order to establish the amount of the defendant's monetary liability? The defendant submits that liability turns on individual assessments and therefore, resolution of common issues concerning the alleged breach of s. 347 and breach of contract would not establish its liability to any particular customer. If the defendant is correct, the kind of action sought to be pursued in this case will almost never be capable of certification. Large institutions allegedly receiving large amounts of illegal profits from millions of small transactions will effectively be immunized from suit.

47 Condition (b) in s. 24(1) must be interpreted in light of the other parts of the section, and in particular, in light of s. 24(3). It is a basic tenet of statutory interpretation that any provision of a statute must be interpreted having regard to the entire context, as explained in Elmer A. Driedger, *Construction of Statutes*, 2d ed. (Toronto: Butterworths, 1983) at 87:

Today there is only one principle or approach, namely, the words of an Act are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament.

48 Section 24(3) provides, in part, that, "In deciding whether to make an order under subsection (2), the court shall consider whether it would be impractical or inefficient to identify the class members entitled to share in the award". The subsection therefore contemplates that an aggregate award will be appropriate notwithstanding that identifying the individual class members entitled to damages and determining the amount cannot be done except on a case-by-case basis, which may be impractical or inefficient. Condition (b) must be interpreted accordingly. In my view, condition (b) is satisfied where potential liability can be established on a class-wide basis, but entitlement to monetary relief may depend on individual assessments. Or, in the words of s. 24(1)(b), where the only questions of fact or law that remain to be determined concern assessment of monetary relief.

49 In the context of this case, if the plaintiff can establish that the defendant administered its cash advances in a manner that violated s. 347 and/or breached its contract with its customers, it will have established potential liability on a class-wide basis. Each member of the class would be entitled to declaratory and injunctive relief. The only matter remaining would be the application of the decision on the common issues to the specific account activity of each class member to determine that class member's entitlement to monetary relief. Section 23 can be used to calculate the global damages figure. Section 24 can be used to find a way to distribute the aggregate sum to class members. It may be that in the result some class members who did not actually suffer damage will receive a share of the award. However, that is exactly the result contemplated by s. 24(2) and (3) because "it would be impractical or inefficient to identify the class members entitled to share in the award".

50 An example of such an award is found in *Gilbert v. Canadian Imperial Bank of Commerce*, [2004] O.J. No. 4260 (Ont. S.C.J.). In that case, on consent, Winkler J. certified a class proceeding and approved a settlement. The defendant CIBC was alleged to have charged undisclosed and unauthorized fees or charges in relation to foreign currency transactions on VISA accounts. The members of the class were defined as all persons in Canada issued one or more CIBC VISA cards on or before a certain date. There was apparently no attempt to identify those members of the class who had actually used their VISA cards to conduct transactions in foreign currency.

51 In *Gilbert*, CIBC agreed to pay \$16.5 million to settle the claims. Slightly less than \$14 million<sup>3</sup> was to be paid directly to class members in amounts ranging from 72 cents to \$14.32. As Winkler J. observed at para. 15 these amounts were arbitrary and "[did] not purport to compensate class members in terms of actual amounts owing nor [did] they compensate only class members with valid claims". It would have been too costly and time consuming to determine liability and amount on an individual basis. Moreover, like this case, in *Gilbert*, records were not available for a significant portion of the period in question. But, as Winkler J. said, at para. 15, "The CPA anticipates such a problem in s. 24(2) and (3) which provide that the court may order that an award be applied so that individual class members share in an award on an average or proportional basis and that the court shall consider whether it would be impractical or inefficient to identify class members entitled to share in the award or exact shares in making such a determination."<sup>4</sup>

52 By resort to ss. 23 and 24 in this case it will be possible for the trial court to deal with the problem identified by the motion judge in para. 57 of his reasons that "the cost of investigating, and analyzing, the details of each cardholder's transactions with MBNA — 8 million since 2000 — and processing the claims of those who are found to have paid interest at a criminal rate, might well be quite disproportionate in relation to the amounts recoverable".

53 In my view, this case, like *Gilbert*, is the very kind of case which s. 24 was designed to deal with because it is impractical and inefficient to identify specific recipients. Such an award is consistent with the recommendations of the Ontario Law Reform Commission in its *Report on Class Actions* (Toronto: Ministry of the Attorney General, 1982) at 572:

We therefore recommend that, where the court makes an aggregate assessment, but the circumstances render impracticable the determination of those class members entitled to share in the award or the exact share that should be allocated to particular class members, the court should be empowered to order that the members of the class are entitled to share in

the award on an average or proportional basis where the failure to do so would deny recovery to a substantial number of class members who have been injured.

54 I do not consider this application of the *CPA* inconsistent with the decisions of the Supreme Court of Canada, such as *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.). In that case, the plaintiff could establish that only a very small proportion of the class had actually complained about the pollution. The court nonetheless found that the common issues requirement was satisfied: see para. 26 of *Hollick*.<sup>5</sup> The court went on to find that the case for certification failed because the preferable procedure requirement was not met.

55 Nor does this application of the *CPA* offend this court's holding in *Chadha, supra* or *Pearson v. Inco Ltd.* (2005), 78 O.R. (3d) 641 (Ont. C.A.), leave to appeal refused [2006] S.C.C.A. No. 1 (S.C.C.). In *Chadha*, the plaintiff adduced no evidence that the result of the defendants' allegedly illegal acts were passed through to the consumers who made up the proposed class. That is not an issue in this case. There is no question that the allegedly illegal fees were passed on to the class members and received by the defendant. The only serious issue is how many members of the class actually suffered an economic loss. This issue can be addressed by ss. 23 and 24.

56 In *Pearson, supra*, at para. 77, the court stated that s. 24 might apply if the plaintiff could "show that every member of the class was adversely affected by the disclosure of the nickel pollution by Inco." However, that is how the *Pearson* case was cast by the plaintiff in this court and the court was not required to consider the full scope of the application of s. 24.

57 Accordingly, in addition to the common issues identified by the motion judge in relation to the claims for declaratory and injunctive relief, there are common issues relating to the claims for restitution and breach of contract as follows:

- (a) If MBNA received interest in excess of an effective annual rate of 60 per cent on cash advances made under agreements or arrangements with class members, is MBNA required to repay to the class, as restitution, the transaction fees it received from the class, or alternatively, the interest it has received from the class that exceeds an effective annual rate of 60 per cent interest?
- (b) Are the terms of the paragraph headed "Interest" of the Cardholder Agreement a bar to the class claim?
- (c) Has MBNA breached its contracts with the class by making interest payable that exceeds an effective annual rate of 60 per cent, within the meaning of s. 347 of the *Criminal Code*?
- (d) Has MBNA breached its contracts with the class by failing to credit their accounts with the interest it has received that exceeds an effective annual rate of 60 per cent?
- (e) Do provincial Statutes of Limitations have any application to claims of unjust enrichment flowing from interest charged or received in contravention of s. 347 of the *Criminal Code*?

58 If these issues are determined in favour of the class, the trial judge will be able to resort to ss. 23 and 24 of the *CPA* to resolve the issues of quantum and distribution of the monetary award. Section 26 provides a shopping list of methods for distributing an award under s. 24, including abatement and credit to class members by the defendant (s. 26(2)(a)). That said, the trial judge might nevertheless find, pursuant to s. 24(4) that individual claims need to be made to give effect to the order. If so, it may well be that the trial judge will be asked to exercise the power under s. 10 of the *CPA* to "amend the certification order, ... decertify the proceeding or ... make any other order it considers appropriate."

59 Strictly speaking it is not necessary to state the possibility of an aggregate damage award as a common issue: see *Healey v. Lakeridge Health Corp.*, [2006] O.J. No. 4277 (Ont. S.C.J.) at para. 102. However, I think it is appropriate to do so in this case, given the importance of the issue. I would state the issue as follows:

Can the amount of restitution and damages for breach of contract be determined on an aggregate basis? If so, in what amount?

60 There is one further issue that requires consideration in relation to the problem of common issues — the voluntariness defence. The defendant has taken slightly inconsistent positions in relation to the voluntariness defence. On the one hand, counsel asserted that voluntariness was a complete defence to all of the claims, and on the other, stated that the issue would have to be determined on a case-by-case basis. The motion judge did not directly address this issue.<sup>6</sup> However, in his subsequent decision in *McCutcheon v. Cash Store Inc.*, [2006] O.J. No. 1860 (Ont. S.C.J.), the motion judge explained that he did not consider voluntariness to be an issue that would have to be determined on an individual basis. At para. 67 of *McCutcheon*, he said the following in relation to this case:

The facts of *Markson* differed from those of this case in that there were several variables that could affect whether the interest charged exceeded a criminal rate and a number of these were within the control of the debtors. While, in view of these variables, an examination of the individual facts of each transaction would be required to determine whether interest at a criminal rate had been received and the extent, if any, of the defendants' unjust enrichment, the threshold question whether, and in what circumstances, the payments at such a rate were voluntary depended, as here, on the terms of the agreements between the parties and could therefore be accepted as a common issue.

61 The so-called voluntariness defence arises from the decisions of the Supreme Court of Canada in *Degelder*, *supra*, and *Nelson v. C.T.C. Mortgage Corp.* (1984), 16 D.L.R. (4th) 139 (B.C. C.A.), aff'd [1986] 1 S.C.R. 749 (S.C.C.). In *Degelder*, at para. 34, Major J. held that "[t]here is no violation of s. 347(1)(b) [the provision at issue in this case] where a payment of interest at a criminal rate arises from a *voluntary* act of the debtor, that is, an act wholly within the control of the debtor and not compelled by the lender or by the occurrence of a determining event set out in the agreement." [Emphasis in original].

62 In this case, the defendant submits that since the cardholder controls the amount of the cash advance and the amounts and period of repayment (subject only to certain minimum payment requirements) and whether or not to engage in other transactions (i.e. credit card purchases) affecting the ultimate interest rate paid, the voluntariness defence protects it from liability under s. 347(1)(b).

63 Hoy J. considered the question of the voluntariness defence in the context of a class proceeding in *Smith v. National Money Mart Co.*, [2007] O.J. No. 46 (Ont. S.C.J.).<sup>7</sup> The claim in *National Money Mart* concerned an allegation that the defendants received a criminal rate of interest on "payday loans". At the time the loan is advanced to the customer, the customer provides a personal cheque payable to the lender for a period ending one day after the stated due date of the loan (being the day before the borrower's payday). If the customer is able to pay off the loan before the due date by paying the principal amount and the accumulated interest (at a rate of 59% per annum) there is no cheque cashing fee. If, however, the lender needs to pay off the loan by cashing the personal cheque, certain cheque cashing and other fees are triggered, potentially also triggering a criminal interest rate if those fees come within the definition of interest in s. 347. As in this case, the *National Money Mart* defendants argued that the voluntariness defence was applicable and would have to be determined on an individual basis. Hoy J. held that application of the voluntariness defence was a common issue. As she pointed out, in *Garland No. 1* the Supreme Court of Canada did not approach the voluntariness issue on a case-by-case basis: see also *Bodnar v. Cash Store Inc.* (2006), 55 B.C.L.R. (4th) 53 (B.C. C.A.) at paras. 11-12.

64 I agree with the reasons of Hoy J. in *National Money Mart* and the motion judge that the voluntariness defence could be accepted as a common issue. The defendant may well be right that since the customer can choose the amount of the cash advance, when to repay it and whether to make additional credit purchases, the payment of interest at a criminal rate arises from a voluntary act of the debtor. However, that defence would apply across the class. It is not apparent to me why decisions, such as the date of repayment, would give rise to a voluntariness defence in one case and not another. At least at this stage, I cannot see why it will be necessary to determine the application of the defence on an individual basis. Accordingly, in my view, the possible availability of a voluntariness defence does not stand in the way of certification. I would therefore include the following as a common issue:

If MBNA received interest at an effective annual rate in excess of 60 per cent on cash advances made under agreements or arrangements with class members, did payment of interest at that rate arise from the voluntary acts of the class members so as to give rise to a "voluntariness defence" thereby precluding a violation of s. 347 of the *Criminal Code of Canada*?

65 To conclude on this aspect of the case, in my view there are common issues in relation to the claims for restitution and breach of contract. In fairness to the motion judge and the Divisional Court, I have reached this conclusion because of the application of ss. 23 and 24 of the *CPA*, matters that were not raised before those courts.

**(c) Preferable Procedure**

66 Even though the motion judge found that there were common issues in relation to the claims for injunctive and declaratory relief, he held that a class proceeding was not a preferable procedure because if the action was successful and the defendant was forced to comply with the law, its customers would end up with fewer options and would be required to pay greater amounts of interest. Yet, the motion judge recognized that the plaintiff could pursue an individual action. In my view, the motion judge erred.

67 First, the findings of the motion judge are fundamentally inconsistent. If the plaintiff did pursue an individual action and obtained a declaration or injunction I cannot imagine why the consequence would be any different than a class proceeding. Surely, the defendant bank would comply with the injunction or conduct its business in accordance with the declaration and stop violating the law, not just in relation to this plaintiff, but for all of its customers. Thus, whether the issue were pursued as an individual action or a class proceeding, the customers would be deprived of certain options.

68 The only significant result of refusing to allow this action to go forward as a class proceeding but permitting the plaintiff to pursue his individual action is that the defendant, even if found to have violated the *Criminal Code* and breached its contract with its customers, will not be required to disgorge the illegal profit. In the result, customers will not only lose the options referred to by the motion judge, but they will also receive no recompense for past illegal acts by the defendant. In my view, this is not a reasonable result. To a similar effect see *1176560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.* (2002), 62 O.R. (3d) 535 (Ont. S.C.J.) at para. 45, aff'd [2004] O.J. No. 865 (Ont. Div. Ct.).

69 Second, in my view, the motion judge erred in failing to apply the criteria for preferable procedure as articulated by the Supreme Court of Canada. A succinct statement of the applicable principles is set out in *Hollick, supra*, at paras. 27 to 31. I would summarize those principles as follows:

- (1) The preferability inquiry should be conducted through the lens of the three principal advantages of a class proceeding: judicial economy, access to justice and behaviour modification;
- (2) "Preferable" is to be construed broadly and is meant to capture the two ideas of whether the class proceeding would be a fair, efficient and manageable method of advancing the claim and whether a class proceeding would be preferable to other procedures such as joinder, test cases, consolidation and any other means of resolving the dispute; and,
- (3) The preferability determination must be made by looking at the common issues in context, meaning, the importance of the common issues must be taken into account in relation to the claims as a whole.

70 As I read the cases from the Supreme Court of Canada and appellate and trial courts, these principles do not result in separate inquiries. Rather, the inquiry into the questions of judicial economy, access to justice and behaviour modification can only be answered by considering the context, the other available procedures and, in short, whether a class proceeding is a fair, efficient and manageable method of advancing the claim.

71 As I have said, the motion judge appears to have accepted that a class proceeding would meet the goals of behaviour modification and access to justice. For the reasons that follow, I agree with that conclusion. The defendant has said that it will continue to conduct business in a manner that may violate the law until presumably the law is changed or it is required to stop by court order. A class proceeding would therefore meet the goal of behaviour modification. While presumably an individual action that resulted in an injunction or declaration would achieve the same result, a class proceeding, unlike an individual

action, will also have the advantage of requiring the defendant to account for the economic harm it has caused. As Doherty J.A. observed in *Hickey-Button v. Loyalist College of Applied Arts & Technology* (2006), 267 D.L.R. (4th) 601 (Ont. C.A.) at para. 58, "Accountability is an important first step toward behaviour modification".

72 In my view, access to justice overwhelmingly favours a class proceeding. The amounts involved are so small that no litigant would have an interest in pursuing an individual claim. The legal and other fees to pursue the claim would be hugely disproportionate to the amounts in issue in any individual claim. No other viable procedure has been identified to resolve the claims.

73 The goal of judicial economy also favours a class proceeding. Admittedly, maximum judicial economy will result if this action is not certified, in that no claim would be advanced at all.<sup>8</sup> However, this result hardly strikes me as what the courts had in mind in terms of judicial economy. Moreover, it would be an overly rigid interpretation of the *CPA* and inconsistent with the instruction in *Hollick, supra*, at para. 15 that "courts not take an overly restrictive approach to the legislation, but rather interpret the Act in a way that gives full effect to the benefits foreseen by the drafters." I agree with Winkler J. in *1176560 Ontario Ltd., supra*, at para. 45 that:

Arguments that no litigation is preferable to a class proceeding cannot be given effect. If there is any basis to this argument, it is subsumed in the cause of action element of the test for certification.

74 Thus, judicial economy should focus on the relationship of the common issues to the other issues in the case. Viewed from this perspective, a class proceeding is not inconsistent with judicial economy. If I am right that the voluntariness defence can be determined on a class-wide basis and that ss. 23 and 24 can resolve the issues of quantum and distribution of the monetary award, the entire case will be determined by resolution of the common issues. It will not be necessary to engage in trials of any individual issues. A class proceeding in this case would achieve litigation efficiency in the sense referred to in the *Report of the Attorney General's Advisory Committee on Class Action Reform* (Ontario: Ministry of the Attorney General, 1990) at 15, in providing "an efficient means to achieve redress for widespread harm or injury by allowing one or more persons to bring the action on behalf of the many."<sup>9</sup>

75 A class proceeding will be a fair, efficient and manageable way of advancing the claim. It may be that some customers of the defendant would prefer that it continue to have the right to break the criminal law (if it is doing so), in order to offer its customers some added advantages. In this sense, allowing the plaintiff to pursue a class proceeding may be seen as unfair to some of the customers. In an organized society however, I do not see this as the kind of fairness concern that should prevent a court from intervening. Rather, the concern should be whether the defendant is acting in accordance with the law. As Iacobucci J. said in *Garland v. Consumers' Gas Co.*, [2004] 1 S.C.R. 629 (S.C.C.) at para. 57, "As a matter of public policy, a criminal should not be permitted to keep the proceeds of his crime".

## **Conclusion**

76 I would allow the appeal, set aside the orders of the Divisional Court and the motion judge, and substitute an order granting the motion for certification on terms that are consistent with these reasons. The case should be remitted to the supervision of the Regional Senior Justice or such judge as he directs to manage the action.

### **J.C. MacPherson J.A.:**

I agree.

### **P. Rouleau J.A.:**

I agree.

*Appeal allowed.*

## **Appendix "A"**

### **Common Issues Proposed by the Plaintiff Before the Motion Judge**

At para. 45 of his reasons, the motion judge enumerated the following as the proposed common issues:

- (a) is the cash advance transaction fee "interest" for the purpose of calculating the effective annual interest under s. 347 of the Criminal Code;
- (b) in what circumstances does MBNA charge interest at a rate in excess of an effective annual interest rate of 60 per cent;
- (c) in what circumstances does MBNA receive interest at a rate in excess of an effective annual interest rate of 60 per cent;
- (d) did MBNA receive interest at a rate in excess of 60 per cent, and if so, how much;
- (e) if so, is MBNA required to pay to the class, as restitution, the transaction fees it received from the class, or alternatively, the interest it has received from the class that exceeds an effective annual rate of 60 per cent interest;
- (f) is the cash advance transaction free incurred voluntarily by the class, so as to give rise to a defence of "voluntariness" to the allegation that the interest received by MBNA exceeds the maximum permitted by s. 347 of the Criminal Code of Canada;
- (g) do the class members pay the cash advance transaction fee voluntarily, so as to give rise to a defence of "voluntariness" to the allegation that the interest received by MBNA exceeds the maximum permitted by s. 347 of the Criminal Code of Canada;
- (h) are the terms of the paragraph headed "Interest" of the cardholder agreement a bar to the class claim;
- (i) has MBNA breached its contracts with the class by making interest payable that exceeds an effective annual rate of 60 per cent, within the meaning of s. 347 of the Criminal Code;
- (j) has MBNA breached its contracts with the class by failing to credit their accounts with the interest it has received that exceeds an effective annual rate of 60 per cent;
- (k) do provincial statutes of limitations have any application to claims of unjust enrichment flowing from interest charged or received in contravention of s. 347 of the Criminal Code; and
- (l) is the class entitled to punitive damages?

#### **Footnotes**

- <sup>1</sup> The respondent also asserted that even if the legal questions were determined in favour of the plaintiff, there would still need to be an individual investigation as to whether in the particular circumstances the payment received was effected by a voluntary act undertaken by the cardholder. This may be inconsistent with the respondent's principal position in this case that voluntariness would be a defence to all of the claims of the class members. I discuss this issue further below.
- <sup>2</sup> On February 6, 2007, the House of Commons passed Bill C-26, *An Act to amend the Criminal Code (criminal interest rate)*, 1st. Sess., 39<sup>th</sup> Parl., 2006. Pursuant to the provisions of this Bill, some payday lenders will be exempt from the application of s. 347 of the *Criminal Code*. It is not apparent that the Bill would impact on the issues in this case.
- <sup>3</sup> A further \$1 million was to be paid to the United Way and \$1.65 million to the Class Proceedings Fund of the Law Foundation of Ontario.

**4** Also see the reasons of Winkler J. in *Nantais v. Easyhome Ltd.*, [2005] O.J. No. 5805 (Ont. S.C.J.).

**5** Certification ultimately failed in *Hollick* because the plaintiff could not meet the preferable procedure requirement.

**6** He did address a related issue of whether the defendant might have a unique defence against the plaintiff because of the circumstances surrounding his two transactions. The motion judge held at para. 88 that if the plaintiff's claim was dismissed because of a defence unique to him, it would be possible to appoint a substitute representative plaintiff.

**7** The parties brought this case to our attention after the appeal was argued. We received additional submissions with respect to *National Money Mart* on January 22 and 23, 2007.

**8** See *National Money Mart*, above, at para. 135.

Labour and employment law

[III](#) Employment standards legislation

[III.6](#) Hours of work

**Headnote**

Labour and employment law --- Employment standards legislation — Hours of work

Under s. 167(2) of Canada Labour Code, overtime and maximum hours of work rules of Code do not apply to managers, superintendents or employees who exercised management functions — Plaintiff alleged that defendant railway company unlawfully classified all its first-line supervisors (FLS) as managers, depriving them of overtime and holiday wages payable under Code — Plaintiff brought motion for certification of class action — Defendant brought cross-motion to stay or dismiss action — Motion granted with qualifications and conditions; cross-motion granted in part — Criterion of identifiable class was satisfied, six questions passed test for certification as common issues, four additional questions involving aggregate assessment of damages could not be certified as common issues and plaintiff was deemed to be suitable representative plaintiff — Plaintiff's litigation plan was based on supposition that all of causes of action and common issues would be certified, which did not occur — Plaintiff appealed and defendant cross-appealed certification order — Defendant's appeal allowed in part; certification vacated — Trial judge did not err by concluding plaintiff's proposed misclassification issue could not be determined on class-wide basis — Case law did not support plaintiff's allegation that misclassification cases are inherently amenable to resolution by class action, as almost all cases referred to employees with common job description and that was not present for allegations against defendant — Trial judge did not find there was basis in fact establishing misclassification could be resolved on class-wide basis — Plaintiff's evidence failed to establish commonality on misclassification issue — Commonality requirement in s. 5(1)(c) of Class Proceedings Act, 1992 requires evidence to afford some basis in fact to find that claims of individual class members raise common issues as defined by case law — Inability to determine misclassification meant matter could not proceed as class proceeding — Trial judge did not err by applying new test for certification — Trial judge did not impose secondary and higher burden of proof on plaintiffs at certification stage.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Under s. 167(2) of Canada Labour Code, overtime and maximum hours of work rules of Code did not apply to employees who were managers or superintendents or who exercised management functions — Plaintiff alleged that defendant railway company unlawfully classified all its first-line supervisors (FLS) as managers, depriving them of overtime and holiday wages payable under Code — Plaintiff brought motion for certification of class action — Defendant brought cross-motion to stay or dismiss action — Motion was granted with qualifications and conditions; cross-motion granted in part — Six questions were certified — Four additional questions involving aggregate assessment of damages could not be certified as common issues — Plaintiff appealed and defendant cross-appealed certification order — Defendant's appeal allowed in part; certification vacated — Trial judge did not err by concluding plaintiff's proposed misclassification issue could not be determined on class-wide basis — Plaintiff's evidence failed to establish commonality on misclassification issue — Commonality requirement in s. 5(1)(c) of Class Proceedings Act, 1992 requires evidence to afford some basis in fact to find that claims of individual class members raise common issues as defined by case law — Trial judge did not err in refusing to certify common issue of misclassification of FLS workers as management, which excluded them from overtime eligibility — Plaintiff's affiants' assertions regarding duties of FLS was not evidence that court could rely on in establishing basis for existence of common issue of misclassification, as assertions were vague and anecdotal and fell short of meeting requirement of specifying source of information and belief — Trial judge's role in common issues trial is not to formulate issues for trial but to make decisions for issues that have already been set out, as setting issues for trial is role of judge who hears certification motion — It would be misapplication of CPA to certify action where common issues are not set out and trial judge is expected to formulate issues for trial — Misclassification issue and lack of evidence on it was fundamental bar to certification — Plaintiff had responsibility for proposing common issues and for adducing evidence showing issues existed — Plaintiff's evidence admitted that it did not contain basis to find

misclassification issue could be resolved without individual assessments for class members — Trial judge erred by setting out his own certifiable common issue as evidence underlying claims remained insufficient, as core of commonality did not exist and at its heart, matter was about misclassification which did not have evidentiary support.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — General principles

Under s. 167(2) of Canada Labour Code, overtime and maximum hours of work rules of Code do not apply to employees who were managers or superintendents or who exercised management functions — Plaintiff alleged that defendant railway company unlawfully classified all its first-line supervisors (FLS) as managers, depriving them of overtime and holiday wages payable under Code — Plaintiff brought motion for certification of class action — Defendant brought cross-motion to stay or dismiss action — Motion granted with qualifications and conditions; cross-motion granted in part — Criterion of identifiable class was satisfied — Plaintiff appealed and defendant cross-appealed certification order — Defendant's appeal allowed in part; certification vacated — Trial judge did not err by applying new test for certification — Trial judge did not impose secondary and higher burden of proof on plaintiffs at certification stage — Trial judge merely explained that legal principles governing criteria for certification have to be considered in context of evidentiary record filed in support of motion.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Costs, fees and disbursements — General principles

Plaintiff brought motion to certify proceedings concerning overtime pay as class action — Defendant brought cross-motion under R. 21 of Rules of Civil Procedure — Motion was granted with qualifications, and cross-motion was granted in part — Both parties denied that other was successful and both claimed costs as successful party — Plaintiff sought costs of \$740,650.55 and defendant sought costs of \$400,000, each on partial indemnity scale — Plaintiff awarded costs claimed — It was appropriate that class counsel be treated as successful party on certification motion and proceedings under R. 21 — Plaintiff and class counsel achieved level of success that justified award of costs for what, practically speaking, was single complex motion with multitude of issues, some of them interconnected and some mutually exclusive — Level of success achieved by defendant did not rise to level that would justify offsetting awarded to defendant — It is not unusual that class action emerging from certification motion is different from class action sought by class counsel and plaintiff — This is usual and anticipated, precisely because defendants may challenge each of criteria for certification — Common questions are often revised as part of certification motion — Court may modify definition of class or common issues — Award was within reasonable expectations of unsuccessful party, conclusion supported by reference to amount of defendant's claimed costs — Defendant appealed — Appeal allowed — Common issues findings were reversed — Success as justification for costs award was eliminated.

Civil practice and procedure --- Costs — Effect of success of proceedings — Miscellaneous

Plaintiff brought motion to certify proceedings concerning overtime pay as class action — Defendant brought cross-motion under R. 21 of Rules of Civil Procedure — Motion was granted with qualifications, and cross-motion was granted in part — Both parties denied that other was successful and both claimed costs as successful party — Plaintiff sought costs of \$740,650.55 and defendant sought costs of \$400,000, each on partial indemnity scale — Plaintiff awarded costs claimed — It was appropriate that class counsel be treated as successful party on certification motion and proceedings under R. 21 — There was no reason to depart from typical structure of awards made after certification motion — Plaintiff and class counsel achieved level of success that justified award of costs for what, practically speaking, was single complex motion with multitude of issues, some of them interconnected and some mutually exclusive — Level of success achieved by defendant did not rise to level that would justify offsetting awarded to defendant — Common questions are often revised as part of certification motion — Court may modify definition of class or common issues — It was appropriate to include costs of cross-examinations — Award was within reasonable expectations of unsuccessful party, conclusion supported by reference to amount of defendant's claimed costs — Defendant appealed — Appeal allowed — Common issues findings were reversed — Success as justification for costs award was eliminated.

### ***W.K. Winkler C.J.O.:***

#### **A. Introduction**

1 This is the third of a trilogy of class action cases against federally-regulated employers claiming unpaid overtime pay: see also *Fulawka v. Bank of Nova Scotia*, 2012 ONCA 443 (Ont. C.A.), and *Fresco v. Canadian Imperial Bank of Commerce*, 2012 ONCA 444 (Ont. C.A.). The court's concurrently released reasons in *Fulawka* and *Fresco* explain why the two class actions against the defendant banks for unpaid overtime pay should be certified.

2 The present class action against the defendant, Canadian National Railway Company ("defendant" or "CN"), is premised on a different theory of liability than in the overtime class actions against the banks. The overtime actions against the banks are brought on behalf of class members who were classified as non-managerial employees.<sup>1</sup> Their right to be paid overtime wages at 1.5 times their normal hourly rate is provided for in their employment contracts and by the provisions of Part III of the *Canada Labour Code*, R.S.C. 1985, c. L-2 ("Code"). The central issue is not whether the class members are eligible for overtime pay but, rather, whether the policies, practices or systems of the defendant banks have effectively and routinely denied payment of overtime compensation to class members, contrary to the express or implied terms of their employment contracts.

3 In contrast, in the present case, CN has classified the class members as managerial employees. The class consists of First Line Supervisors ("FLSs") employed by CN. The effect of s.167(2)(a) of the *Code* is that employers are not required to pay overtime compensation as provided in Part III of the *Code* to employees who "are managers or superintendents or exercise management functions". CN's overtime policy explicitly excludes FLSs from eligibility for overtime pay. The success of the proposed class action for unpaid overtime pay thus depends on the threshold issue whether CN has misclassified FLSs as managerial employees.

#### **B. Overview of the Proceedings**

4 The motion to certify the class action against CN under s. 5(1) of the *Class Proceedings Act*, 1992, S.O. 1992, c. C.6, s. 30 ("CPA"), was heard together with CN's motion under Rule 21 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194, to dismiss the action. On the Rule 21 motion, CN argued that the Superior Court of Justice lacks jurisdiction to hear the proposed action. The motion judge rejected this argument. However, he struck, dismissed and stayed various elements of the plaintiff's claims in negligence and breach of contract. The motion judge granted the motion for certification, but in doing so, he significantly re-drafted the common issues.

5 Both parties have appealed different elements of the motion judge's orders. The plaintiff appeals from the Rule 21 order and the certification order, while CN appeals and cross-appeals from the Rule 21 order and appeals from the certification order. CN also appeals from the order awarding the plaintiff his costs of both motions. All the appeals that would otherwise lie in the Divisional Court have been traversed to this court.<sup>2</sup>

6 The parties raise a matrix of issues before this court. However, it is not necessary to decide most of these issues to dispose of the various appeals and cross-appeals.

7 For the reasons that follow, I would allow CN's appeal from the certification order and set aside that order. I conclude that the motion judge was correct in rejecting the plaintiff's proposed common issues concerning whether CN misclassified FLSs

as managerial employees. The evidence on the motion did not support a finding that a common issues trial judge would be able to resolve the fundamental issue of misclassification on a class-wide basis. Rather, the evidence indicated that individualized assessments of the job duties and responsibilities of class members would be needed to determine if they were properly classified.

8 However, the motion judge fell into reversible error in recasting as a common issue the question of what the minimum requirements are to be a managerial employee at CN. The same evidentiary deficiency — the lack of evidence supporting a finding of a core of commonality concerning FLSs' job duties and responsibilities — still remained.

9 These conclusions on the absence of a core of commonality make it unnecessary to decide the correctness of the motion judge's rulings on the Rule 21 motion, or to review his rulings on the other proposed common issues and preferable procedure. At the end of these reasons, I comment briefly on a few practice points that arise out of some of these rulings.

### C. Factual Background

#### (1) Overview of the Proposed Class Proceeding

10 The putative representative plaintiff, Michael McCracken ("plaintiff"), is a former CN employee. He started this action on behalf of approximately 1,550 current and former non-unionized CN employees across Canada who have held the position of FLS since July 5, 2002.

11 The plaintiff began working at CN in 1998 as a unionized employee. In October 2005, he was promoted to the non-unionized position of manager of corridor operations, which is a FLS position. In January 2008, he was promoted to the position of senior manager, corridor operations. The plaintiff alleges in his statement of claim<sup>3</sup> that the senior manager position is a FLS position, while according to CN, it is a higher-ranking managerial position rather than a FLS position. The plaintiff held the position of senior manager, corridor operations until March 26, 2008, the day after he served the statement of claim in this action. He deposed that he was informed that he was being demoted to the unionized position of dispatcher because he had started the action and not for performance deficiencies. The plaintiff resigned from CN in 2010.

12 The plaintiff pleads causes of action against CN based on CN's alleged violation of the *Code*, breach of contract, breach of a duty of good faith, negligence and unjust enrichment. The central allegation driving the proposed class action is that, since July 5, 2002, CN has uniformly, deliberately, improperly, negligently, and illegally misclassified FLSs as managers. As a result of this misclassification, CN is said to have unlawfully deprived the class members of their entitlement to receive overtime pay and holiday wages as stipulated by the *Code*. The statement of claim alleges that all class members have been regularly scheduled, as a matter of uniform company policy, to work in excess of 40 hours per work week or 8 hours per day without receiving overtime pay, contrary to law and in violation of various provisions of Part III of the *Code*, as will be discussed below.

13 The plaintiff claims \$250 million in general damages, \$50 million in special damages and an order pursuant to s. 24 of the *CPA* directing an aggregate assessment of damages. The plaintiff also seeks an order requiring CN to disgorge amounts wrongly withheld from the class in respect of unpaid overtime and holiday pay. In addition, the plaintiff requests various forms of declaratory and injunctive relief, including a declaration that CN has been unjustly enriched, and a declaration that CN has breached the *Code* and the express or implied terms of the employment contracts with class members by misclassifying these employees and by failing to pay them overtime pay.

#### (2) The Role of FLSs at CN

14 In CN's employment hierarchy, FLSs are immediately above unionized workers and immediately below the non-unionized managerial positions of assistant superintendant and superintendant. FLSs are the primary point of contact between the non-unionized and unionized workforce.

15 Approximately 82 percent of CN's Canadian employees are unionized. This element of CN's workforce is represented by five major unions and is divided into over 30 different bargaining units, each of which is governed by a different collective agreement. The collective agreements regulate such matters as the length of the work week, overtime, vacation pay, and

contracting out of work. FLSs are required to know and enforce the rules found in the various collective agreements that apply to the unionized employees under their supervision.

16 CN's recruiting materials describe the duties of FLSs as follows:

The First Line Supervisor manages the day-to-day operation of their territory through their unionized staff; ensures the on-time performance of trains, delivering on our commitments to our customers; the efficient utilization of locomotives and repair of cars (Mechanical); repair and maintenance of trackage and signals (Engineering); and safe haulage of merchandise to their destination (Transportation); as well as interacting with customers (Marketing).

17 CN identified 70 different job positions held by FLSs. More than 90 percent of FLSs are responsible for duties associated with train operations, which encompasses the movement of trains, the repair and maintenance of tracks and signals, and the repair and maintenance of train cars and engines. There are also FLS positions in finance and accounting, customer service, corporate facilities, and various other miscellaneous positions.

18 The salary range for FLSs is from \$55,600 to \$109,200. FLSs are eligible for bonuses equivalent to 15 to 30 percent of their base pay. They are also entitled to benefits, including a defined benefit pension plan and a share purchase plan.

### **(3) CN's Overtime Policy**

19 CN's overtime policy, titled "Compensation Management — Time Management" ("Policy"), came into effect on January 1, 2006. The Policy put into writing the policy and practice that had existed at CN since July 5, 2002.

20 The Policy states that it "is intended for non-unionized, professional and administrative support employees working in Canada. *For greater clarity, this policy does not apply to managers, supervisors or anyone who exercise[s] management functions*" (emphasis added). The Policy entitles non-unionized and non-managerial employees of CN to receive compensation at a rate of 1.5 times the employee's regular rate for pre-authorized or directed overtime hours worked.

21 FLSs are not eligible for such overtime pay under the Policy. However, the Policy provides that FLSs may be paid discretionary lump sum amounts in extraordinary circumstances where extensive hours are required:

In the spirit of the FLS compensation package, First Line Supervisors may receive payments under the Service Response/Emergency program, in case of extraordinary circumstances where extensive hours are required e.g. derailments, severe winter conditions etc. Under these special circumstances, a Vice-President, General Manager or equivalent may authorize a special lump sum payment to be paid in increments of \$500. In cases involving payments in excess of \$2,500, the authorizing officer will review the circumstances with the appropriate Vice-President.

22 The Policy also provides that FLSs who are required to work on a general holiday will receive time off at the regular rate.

23 The plaintiff refers to the Policy several times in his statement of claim. He asserts that the Policy forms part of each class member's contract of employment. He alleges that FLSs had been entitled to receive overtime wages until July 5, 2002, when the Policy came into effect. The plaintiff requests a declaration that the Policy is "unlawful, void and unenforceable".

24 On the certification motion, CN led evidence that conflicted with the plaintiff's allegation that FLSs received overtime wages up until July 5, 2002. CN pointed to its 1998 policy on overtime applicable to FLSs working in the Operations Division,<sup>4</sup> which announced that CN was "adopt[ing] the CP [Canadian Pacific] method of not paying overtime or shift premiums and instead create[d] an allowance" for these FLSs.

### **(4) Hours Worked by FLSs**

25 The plaintiff pleads that FLSs regularly work in excess of 40 hours per week or eight hours per day and they regularly work on statutory holidays. He also pleads that FLSs are frequently called for unscheduled work and to substitute for unionized and non-unionized employees: see the motion judge's reasons, at para. 48.

26 The plaintiff pleads, and the defendant does not dispute, that CN does not keep records of the hours worked by FLSs.

#### **(5) Relevant Code Provisions**

27 The provision of the *Code* of most significance in this case is s. 167(2), which states:

167. (2) Division I does not apply to or in respect of employees who

(a) are managers or superintendents or exercise management functions...

28 The plaintiff also pleads and relies on provisions in Division I of Part III of the *Code* regulating the standard hours of work and payment of overtime for employees who are subject to Part III: see ss. 169(1) and 174. As explained in *Fulawka*, at para. 33, the combined effect of ss. 169(1) and 174 of the *Code* is that an employer must pay an employee overtime wages at the rate of 1.5 times the regular rate of wages when the employee works more than eight hours in a day or more than 40 hours in a week. However, s. 167(2)(a) exempts employees who are managers, superintendents or who exercise management functions from entitlement to overtime pay under these provisions.

29 The plaintiff further pleads and relies on the provisions in Division XVI of the *Code*, and in the accompanying regulation, which impose obligations on employers to accurately record and maintain records of employees' hours of work: see ss. 252(2) and 264(a) of the *Code* and s. 24 of the *Canada Labour Standards Regulations*, C.R.C., c. 986.<sup>5</sup> He also pleads and relies on the provisions in ss. 191, 196, 198 and 199 of Division V of the *Code* governing compensation for general holidays, including the entitlement of managerial employees to be compensated for work performed on a general holiday.

30 The plaintiff pleads that the duties and obligations found in these provisions of the *Code* and the *Regulations* are implied by fact or law into the contracts of employment of class members.

#### **(6) Procedural History**

31 The plaintiff moved to certify the action as a class proceeding. He submitted that a misclassification case such as his is "inherently amenable to resolution by way of class proceeding." CN argued that none of the criteria for certification was satisfied.

32 CN moved under rule 21.01(3)(a) for an order dismissing the action on the basis that the Superior Court of Justice has no jurisdiction to directly enforce the *Code*. CN also moved under rule 21.01(1)(b) to strike portions of the claim for failing to disclose a reasonable cause of action. The certification and Rule 21 motions were argued together in July 2011.

#### **D. The Motion Judge's Reasons**

33 The motion judge granted CN's Rule 21 motion in part and granted the plaintiff's certification motion with qualifications and conditions. His reasons on the Rule 21 motion may be summarized as follows:

- The language of the *Code* reveals that Parliament intended that courts have a subject matter jurisdiction to enforce wage claims for overtime and thus the statutory rights in the *Code* are terms of the contract of FLSs "by force of statute": see paras. 114-85.
- The plaintiff's claim for breach of the express or implied terms of the employment contract discloses a reasonable cause of action: see paras. 199-227.
- However, the plaintiff's claim for breach of contract based on CN's alleged failure to pay holiday pay should be dismissed on the merits because CN provided class members with time *in lieu* of holiday pay, which is permitted by ss. 198 and 199 of the *Code*: see paras. 204-13.

- The plaintiff's claims for breach of an express or implied term of the contract should be stayed because these causes of action are academic or moot, the court having concluded that the terms of the *Code* are terms of the contract by force of statute: see paras. 228-34.
- The plaintiff has actually proven on the Rule 21 motion that he has a cause of action for breach of a statutory implied term, which is an issue that might otherwise have been decided at the common issues trial: see paras. 224-27.
- The court on a certification motion has jurisdiction to decide or stay what would otherwise be a common issue based on rule 37.13(2)(a) of the *Rules of Civil Procedure*, and this jurisdiction is augmented and enhanced by ss. 12 and 13 of the *CPA*: see paras. 228-32.
- The asserted cause of action for breach of a free-standing duty of good faith should be struck because no such independent duty exists. However, the pleading of the material facts alleging a breach of duty of good faith may remain in support of the cause of action for breach of contract: see paras. 235-45.
- The plaintiff has shown a cause of action for unjust enrichment: see para. 246-48.
- The plaintiff's proposed cause of action for negligence should be struck from the statement of claim for failing to disclose a reasonable cause of action: see paras. 249-72.
- CN's limitation period argument is limited to the claims and causes of action for negligence and breach of a free-standing duty of good faith based on CN allegedly improperly classifying its FLSs as managers. These claims are not proceeding so the limitation period issue is moot: see paras. 273-76.

34 The motion judge then turned to the certification motion. Before assessing the five criteria for certification under s. 5(1) of the *CPA*,<sup>6</sup> the motion judge addressed CN's argument that the evidentiary threshold that a plaintiff must meet to prove the certification criteria should be higher than the "some basis in fact" test described in *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.), at paras. 16-26. At paras. 291-92, the motion judge described a "festering point of complaint by defendants" that a plaintiff need only show "some basis in fact" for each of the criteria for certification to obtain a certification order.

35 The motion judge explained that the "some basis in fact" test is not applied in the way that defendants have suggested. Rather, he observed that satisfying the "some basis in fact" test is "necessary but not sufficient for the satisfaction of the various criteria" (at para. 300). I will say more about his reasons on this issue below, at paras. 72-81.

36 The motion judge next addressed the five criteria for certification and concluded they were met for the following reasons.

**(1) Section 5(1)(a): Do the Pleadings Disclose a Cause of Action?**

37 The motion judge relied on his reasons on the Rule 21 issues to conclude that the plaintiff had shown a cause of action for unjust enrichment and for breach of contract based on express or implied contractual terms and based on contractual terms implied by force of statute: see para. 304.

**(2) Section 5(1)(b): Identifiable Class**

38 CN did not dispute that the plaintiff identified a class that technically satisfies the requirements of the *CPA*, but argued that the class definition was deficient because the plaintiff failed to provide any evidence concerning FLSs in 56 of the 70 job positions held by FLSs, and argued that there was thus no basis in fact for including these FLSs as class members.

39 The motion judge found this argument to be fallacious because the plaintiff demonstrated some basis in fact for his own cause of action and for his own job description. He concluded that this was a sufficient evidentiary basis for the plaintiff's submission that there is a group of similarly-situated claimants with similar claims: see paras. 305-11.

**(3) Section 5(1)(c): Common Issues**

40 The plaintiff initially proposed a list of seven common issues (the "Revised List"), which includes "misclassification" as common issue 1: see the motion judge's reasons, at para. 322, and Appendix A to these reasons. The plaintiff's Revised List was predicated on his submission that, at the common issues trial, the court could and should determine whether FLSs were properly or improperly classified as managers on a class-wide basis: see the motion judge's reasons, at para. 323.

41 The motion judge expressed reservations about the commonality of some of the proposed issues. To focus the discussion on his concerns, the motion judge prepared an amended list containing six common issues (the "Amended Revised List") and requested the parties' submissions on his suggestions: see the motion judge's reasons, at para. 325, and Appendix B to these reasons. This list did not include misclassification of the class as a free-standing common issue, although it included questions about whether CN had statutory or common law duties to properly classify class members and, if so, whether CN had breached any of these alleged duties.

42 The plaintiff accepted the Amended Revised List with the following three reservations: i) misclassification of the whole class should be certified as a common issue, as the plaintiff had initially submitted; ii) there should be an additional common issue about how management status can be determined on a class-wide basis; and iii) there should be a common issue about the aggregate assessment of damages.

43 CN disputed that any of the proposed common issues — whether from the plaintiff's Revised List or the motion judge's Amended Revised List — are proper common issues for one or more or all of the following reasons: (i) the issues are not common to the class; (ii) answering the proposed common issues depends on individual findings of fact for each claimant; (iii) the proposed common issues are not necessary to the resolution of each class member's claim for overtime; (iv) resolution of the common issues would not significantly advance the litigation; and (v) the common issues lack a factual basis in the evidence.

44 The motion judge examined each of the proposed common issues from both lists and through a process of elimination, he arrived at a final list of six questions, which he ultimately certified ("Approved List"): see the motion judge's reasons, at para. 351, and Appendix C to these reasons. I include his Approved List here for ease of reference:

**Common Issue One — Payment of Overtime Pay**

Did the Class Members receive overtime pay under the [Code]?

**Common Issue Two — Contract Terms**

What are the terms by force of statute of the Class Members' contracts of employment with the Defendant respecting: (i) classification; (ii) regular and overtime hours; and (iii) the recording of hours worked?

**Common Issue Three — Minimum Requirements of Manager Status at CN**

In accordance with the meaning under s. 167 (2) of the *Canada Labour Code*, of "employees who are managers or superintendents or exercise management functions", what are the minimum requirements to be a managerial employee at CN?

**Common Issue Four — Unjust Enrichment**

Would the Defendant be unjustly enriched by failing to compensate a Class Member with pay or overtime pay for hours worked in excess of his or her standard hours of work?

**Common Issue Five — Damages or other relief**

If the Defendant breached a duty or its contract or was unjustly enriched what remedies are available to the Class Member?

#### Common Issue Six — Punitive Damages

Would the Defendant's conduct justify an award of aggravated, exemplary or punitive damages?

45 The motion judge observed, at paras. 353-54, that four of these questions (common issues 1, 2, 4 and 5) are answerable before the common issues trial. He said, at para. 359, that while answering these four questions would advance the litigation, they are not determinative of the action "because the heart of the matter remains whether the first line supervisors were or were not managers, which is unanswered."

46 In arriving at this list, the motion judge rejected the plaintiff's proposed common issues 1, 2, 3(a)-(b), 4(a)-(i) and 7(a) from the Revised List. He observed, at para. 331, that these questions, which include the proposed misclassification common issue: "lack commonality or would depend on individual findings of fact for each claimant." In his opinion, "these questions cannot be determined on a class-wide basis and rather require individual questions to be answered."

47 Rather than certifying misclassification as a common issue, the motion judge certified a common issue of his own design — common issue 3 — which would identify "the minimum requirements to be a managerial employee at CN".<sup>7</sup> The motion judge reasoned, at para. 363, that this question "avoids the problems of commonality" of the plaintiff's proposed misclassification question. He found, at paras. 363-64, that common issue 3 could be answered on a class-wide basis and that doing so would substantially advance the litigation because it would divide the class into the following three groups:

- i) class members who satisfy the minimum standards for being a manager at CN because of who they are and what they do;
- ii) class members who could not possibly satisfy the minimum standards for being a manager at CN; and
- iii) class members whose status as a manager at CN remained to be determined.

48 According to the motion judge, at para. 367, by dividing the class into these three groups, the claims of the first group would be dismissed, while the claims of the latter two groups would proceed to manageable individual issues trials as contemplated by s. 25 of the *CPA*.

#### (4) Section 5(1)(d): Preferable Procedure

49 After critiquing the parties' approach to the preferable procedure issue, at paras. 445-51, the motion judge concluded, at para. 456, that a class action is preferable to the administrative process under the *Code* for resolving the class members' claims. He observed that the class proceeding will "provide access to justice and judicial economy for a mass mistake in an efficient and manageable way."

#### (5) Section 5(1)(e): Representative Plaintiff and Litigation Plan

50 The motion judge found Mr. McCracken to be a suitable representative plaintiff because "he has no conflict of interest in the sense that his claim or position in the class is adverse in interest" to other class members and he "was astute enough to hire seasoned class action counsel" to prosecute the litigation: see paras. 471-72.

51 As for the litigation plan, the motion judge observed, at para. 474, that the plaintiff "must go back to the drawing board and prepare a new litigation plan based on the outcomes of the motion and cross-motion." He held that, even in the absence of a suitable litigation plan, this criterion was satisfied because he foresaw no difficulty in producing one. The motion judge made the certification order subject to the condition that a litigation plan be settled.

#### (6) Costs

52 The motion judge awarded the plaintiff — "really class counsel" — costs of the motions on a partial indemnity scale fixed at \$740,650.55: see *McCracken v. Canadian National Railway*, 2010 ONSC 6026 (Ont. S.C.J.), at para. 33. He found that, even though the defendant succeeded in part on the Rule 21 motion and even though the plaintiff's certification motion was granted with qualifications, the plaintiff had achieved a level of success warranting an award of costs in his favour without an offsetting award in favour of CN (at para. 21).

## E. The Misclassification Issue

### (1) *Misclassification is a Necessary Element for Establishing Liability*

53 As discussed, the class members' claims for damages for unpaid overtime are framed in breach of statute, breach of contract, negligence and unjust enrichment. In attempting to make this action amenable to certification as a class proceeding, the plaintiff proposed a common issue concerning misclassification. In theory, if this common issue were to be resolved in the plaintiff's favour, this would be a finding that CN had uniformly and improperly classified all FLSs as managerial employees. Such a finding would significantly advance the unpaid overtime claims of class members on a class-wide basis because it would establish their eligibility to receive overtime wages under Part III of the *Code*.

54 Conversely, if CN were found to have properly classified the class members as managers or as employees who exercise managerial functions, then CN would not have breached any alleged statutory or private law duty to pay them overtime wages and their claims would fail.

55 The central factual assertion related to the misclassification issue is found in paragraph 13 of the statement of claim:

The nature of the Class Members' duties, responsibilities and authority is such that they were not managers or superintendents or exercising management functions within the meaning of section 167(2) of the *Code*.

56 There is no question that, in the abstract, a class-wide resolution of the issue concerning the alleged misclassification of FLSs would significantly advance the litigation. A crucial question on the motion was whether there is some basis in fact to find that the misclassification issue could be resolved commonly.

### (2) *Plaintiff's Proposed Common Issues Concerning Misclassification*

57 The plaintiff argues that the motion judge erred in refusing to certify common issue 1 on his Revised List, which states:

Common Issue One — Misclassification

Are the Class Members excluded from overtime eligibility under contract (express or implied) and/or under the [*Code*]?

58 The plaintiff's Revised List includes other questions concerning the misclassification issue. These questions ask if CN had contractual, statutory, or tort duties to properly classify the class members and, if so, whether CN breached any of these duties: see common issues 2, 3(a) and (b) and 4(a)-(i) in Appendix A. My analysis of common issue 1 applies equally to the misclassification issue as it arises out of these common issues.

### (3) *Plaintiff's Evidentiary Basis for Misclassification as a Common Issue*

59 The plaintiff contends that he led evidence on the certification motion establishing that misclassification can "be determined on a class-wide basis (or at the very least, on the basis of sub-groups)", and that this evidence "far exceeded" the standard of some basis in fact.

60 The plaintiff points to two types of evidence that he introduced on the motion:

- (1) evidence that CN made an arbitrary, class-wide determination that all class members are management without conducting any analysis of their job functions; and

(2) evidence of restrictive and common limits on class members' authority and discretion such that they uniformly had no real decision-making authority in essential managerial matters.

61 The primary evidence that the plaintiff points to in the first category is the following testimony of CN's director of compensation, Louis Lagacé, during cross-examination on his affidavit:

Q. Have you ever analyzed the individual job functions [of FLSs]?

A. Not under my leadership.<sup>8</sup>

Q. To your knowledge has it ever been done?

A. Well, I cannot speak of my predecessors. But clearly, you know, in our company first line supervisors are managers and therefore they are not subject to overtime.

Q. To your knowledge has there ever been an analysis of each of the jobs of the first line supervisors to determine whether they're managers?

A. No. We rely largely on when someone is appointed a first line supervisor, say a trainmaster, clearly this individual is administered along the job grade and compensated accordingly.

62 The plaintiff's evidence in the second category — which is said to show that there are common limits on FLSs' decision-making authority — consists of sworn affidavits from the plaintiff, 11 current or former class members, and two CN employees who are union representatives. The class members who gave affidavit evidence on behalf of the plaintiff held one or more of the following job titles: trainmaster, mechanical supervisor, chief train dispatcher (also known as manager of corridor operations or MCO), coordinator operations and crew management supervisor.<sup>9</sup> Although CN identified 70 different job titles for FLSs based on its payroll codes, the plaintiff submits that the job titles of the affiants are from a group of ten job titles that are held by nearly 80 percent of currently-employed class members.

63 These class members assert that FLSs do not have real decision-making authority in essential managerial matters and that they uniformly lack the following powers or responsibilities that are characteristic of managers:

- the authority to hire, terminate, promote, demote or transfer employees;
- the authority to represent management in collective bargaining or in grievance procedures;
- unfettered authority to discipline;
- involvement in setting budgets or policies;
- determining employees' schedules; and
- negotiating contracts on behalf of CN.

64 The following summary of the affidavits submitted by the plaintiff illustrates the nature of the evidence that he tendered to show that FLSs uniformly lack real decision-making authority in managerial matters:

- Affidavit evidence of Ian McCracken, who held the FLS position of manager, corridor operations, from 2005 to January 2008 and held the title of senior manager, corridor operations from January to March 2008, at MacMillan Yard, Toronto:

I do not believe that I was ever a manager or that I ever exercised management functions while I was a FLS. I could not hire, fire, promote, demote or transfer other employees. My efforts to assist in matters involving hiring were rebuffed. My power to discipline other employees was limited to investigating and recommending that minor

disciplinary warnings be issued. I lacked the power to decide whether discipline would actually be imposed and, if so, its nature. Those decisions were made by my supervisors and more senior managers. I could not make budgetary or expenditure decisions on behalf of CN. I was told by my manager that I lacked the authority to make any changes to schedules for rail traffic controllers, even if I felt that a change was logical. When other MCOs requested the trains be subjected to unscheduled stops, I was expected to run these requests by the superintendent or assistant superintendent.

- Affidavit evidence of George Anderson, presently a unionized employee at CN, who held three different FLS positions <sup>10</sup> from 1995 to 2006:

In my role as FLS, I did not have any authority to hire, fire, suspend, promote, demote or transfer employees. I had no independent authority to issue demerit points, suspensions, terminations or demotions. I could initiate investigations and recommend demerit points to my supervisor or general manager, but I could not issue demerit points without their prior approval. I was never involved in any arbitration cases on behalf of CN. I had no independent authority to schedule hours of work for employees. I did not make any budgetary decisions and I had no involvement in the development of company policy or planning. I did not negotiate any contracts on behalf of CN. When employees under my supervision needed to work overtime, I could keep them working in accordance with their collective agreements and as specifically authorized by my superiors. *During my time at CN, I have worked primarily in the South Western Ontario region, including in Windsor, Sarnia and London. At all of these locations, in my experience, the FLSs had no different level of authority than described above.*

[Emphasis added.]

- Affidavit evidence of John Caissie, who has held FLS positions <sup>11</sup> in Winnipeg, Moncton, Toronto and Montreal over the last 19 years:

My responsibilities as a FLS have included supervising a number of employees. At no time have I exercised managerial functions. I have not had a determining influence on the employment, promotion or discipline of other staff. I have never hired, fired, promoted or transferred employees. I have never unilaterally disciplined employees, though I have recommended discipline at times to my superiors, who are under no obligation to accept my recommendations. I have not acted on behalf of CN at grievance arbitrations, nor have I ever controlled scheduling or made budgetary or expenditure decisions. Finally, I have never been involved in company policy or planning, or negotiated contracts on behalf of CN. *I understand, from speaking with various colleagues throughout my employment that the level of supervision I exercised as trainmaster, manager — crew utilizations and manager — corridor operations is in line with that exercised by other FLSs employed by CN in both large and small centres across the country.*

[Emphasis added.]

#### **(4) CN's Evidence on the Misclassification Issue**

65 CN's primary position on commonality, as described by the motion judge, at para. 56, was that the misclassification issue, as a matter of adjudication, cannot be proved globally in a class action because the status of each FLS must be assessed individually. To support this position, CN lead evidence to show a wide disparity in the roles and functions of FLSs, including of FLSs holding the same job position: see the motion judge's reasons, at para. 69.

66 CN tendered evidence — including affidavits from 19 class members — to show that class members work in different environments ranging from small towns to large cities, from office environments to shops, garages, small depots, or outdoors in train yards, or along the vast length of track that comprises CN's rail network: see the motion judge's reasons, at para. 44.

67 In addition, in an effort to highlight the lack of commonality of FLSs' job functions and responsibilities, CN introduced a chart outlining the affidavit evidence adduced by both parties about the varying duties and responsibilities of class members

who held the positions of MCO and trainmaster. CN argued that this chart illustrates that the level of authority and managerial responsibility of class members varies significantly. For example, some MCO's deposed that they have authority to approve overtime and to perform job performance appraisals of unionized employees without approval or oversight from higher levels of CN management. In contrast, other MCOs deposed that they have no authority to make any changes to work schedules or to provide input into performance evaluations.

68 Similarly, some class members who held the position of trainmaster said that they have authority to directly lay off unionized employees or to make decisions about required staffing levels that sometimes cause lay-offs, while another class member asserted that trainmasters cannot unilaterally lay-off employees. Several trainmasters gave evidence that they have the authority to remove an employee from service where drugs or alcohol are involved and in the event of a serious rule violation. There was no evidence to the contrary. Several trainmasters indicated that they have authority to impose demerit points and to level discipline, while others said that they never disciplined employees or they claimed to have only a limited role in discipline.

69 In addition, CN's tendered affidavit evidence indicated that FLSs working in more remote locations exercise greater decision-making authority than FLSs working in busier, more urban locations where more senior-level managers are present in the workplace. For example, one trainmaster, Norman Hart, deposed that he supervised only 16 yard employees and inbound and outbound train crews when he worked at CN's largest rail yard near downtown Toronto, whereas he supervised well over 100 employees when he worked at a smaller yard in Hornepayne, Ontario. His evidence indicated that he exercised more significant decision-making authority over unionized staff when he worked in Hornepayne where there was no higher-level manager within a several hundred mile radius.

70 CN's secondary line of attack against the proposed common issue of misclassification involved adducing evidence intended to refute the plaintiff's assertion that FLSs were not properly classified as managers. CN offered evidence showing the following attributes of FLSs, as described by the motion judge, at paras. 68-69:

- FLSs are expected to play a pivotal role in managing CN's workforce because they are the primary point of contact between management and unionized employees.
- Many FLSs undergo extensive training to acquire the management skills required for their jobs.
- Some FLSs have the authority to approve overtime and leaves of absence, to co-ordinate crews, to schedule shifts, to approve changes to the vacation schedule, to complete job performance appraisals, to administer collective agreements and to oversee compliance with safety legislation.
- FLSs carry out their role dependent upon their experience and aptitudes, for example, some FLSs manage large numbers of employees whereas others exercise control over significant budgets.

## F. Analysis

71 As discussed, the success of the proposed class action is contingent on the threshold issue whether CN misclassified FLSs as managerial employees. The overarching dispositive question on appeal is whether the allegation of misclassification raises a certifiable common issue. In resolving this question, it is necessary to address the following three questions raised by the parties:

- (1) Did the motion judge err by creating a new test for certification?
- (2) Did the motion judge err by rejecting the plaintiff's proposed common issue of misclassification?
- (3) Did the motion judge err by reframing a common issue concerning the minimum requirements to be a managerial employee at CN?

### ***(1) Did the Motion Judge Err by Creating a New Test for Certification?***

#### *(a) Plaintiff's Submissions*

72 The plaintiff contends that the motion judge erred by applying a new test for certifying common issues. The relevant passage from the motion judge's reasons states, at paras. 301-302:

That the some basis in fact test is a necessary but not sufficient condition for certification makes sense because the criteria for certification are not just factual matters. In so far as the criteria are factual, the plaintiff is more favourably treated than is the defendant. However, all the criteria are issues of mixed fact and law, and the legal and policy side of the class definition, commonality, preferability, and the adequacy of the representative plaintiff are matters of argument and not just facts, although there must be a factual basis for the arguments. While defendants may have to push the evidentiary burden up a steep hill, they are on a level playing field with the plaintiffs in arguing the law and policy of whether the various criteria have been satisfied.

Applying the some basis in fact test to the case at bar, Mr. McCracken must show that there is some basis in fact for his cause of action and some basis in fact for each of the certification criteria other than the first one. CN, however, if it is able to do so, may show that there is no evidentiary basis for the claims or the certification criteria. If the evidentiary basis is established, then whether the certification criteria have been satisfied remains a matter of argument between Mr. McCracken and CN on a level playing field.

73 The plaintiff interprets the motion judge's comment that the "some basis in fact" test is a "necessary but not sufficient condition for certification" to mean that the motion judge not only required him to show some basis in fact for the proposed common issues, but that he also imposed "an additional burden of proving, on a balance of probabilities, and as a matter of law and policy, that a common issue ought to be certified." According to the plaintiff, the motion judge viewed this "additional burden" as "levelling the playing field" between plaintiffs and defendants on a certification motion.

74 The plaintiff complains that the motion judge's approach to establishing commonality is "unsupported by any class action jurisprudence and is at odds with the purpose of class proceedings." He contends that the motion judge failed to certify the proposed misclassification issue because he confused what should have been a factual analysis with a legal and policy analysis.

*(b) The Motion Judge Did Not Apply a New Test for Certification*

75 The "some basis in fact" principle is meant to address two concerns. First, there is a requirement that, for all but the cause of action criterion, an evidentiary foundation is needed to support a certification order.

76 Second, in keeping with the procedural scheme of the *CPA*, the use of the word "some" conveys the meaning that the evidentiary record need not be exhaustive, and certainly not a record upon which the merits will be argued. This legislative intention is reflected in s. 2(3)(a) of the *CPA*, which — although honoured more often in the breach — requires the proposed representative plaintiff to bring a motion for certification within 90 days of the filing of, or the expiry of the time for filing of, a statement of defence or notice of intent. Thereafter, leave of the court is required to bring the motion: see s. 2(3)(b).

77 With the exception of the motion judge's suggestion that the "some basis in fact" test applies to the cause of action requirement in s. 5(1)(a) of the *CPA*, his reasons do not bear out the plaintiff's suggestion that he imposed an additional and unprecedented burden of proof on the plaintiff at the certification stage. In my view, the motion judge was simply explaining that the legal principles governing the criteria for certification have to be considered in the context of the evidentiary record filed in support of the motion. It is clear from *Hollick* that, were it otherwise, the certification criteria would be argued in the air.

78 An example of what the motion judge meant by his comment that the "some basis in fact test is a necessary but not sufficient condition for certification" is provided by the preferable procedure analysis in *Caputo v. Imperial Tobacco Ltd.* (2004), 236 D.L.R. (4th) 348 (Ont. S.C.J.). The court there stated, at para. 67: "[I]n as much as the defendants cannot simply assert to any effect that there are other procedures that would be preferable without an evidentiary basis, neither can the plaintiffs satisfy the onus with argument alone. It must be supported by some evidence."

79 This point applies equally to the common issues criterion in s. 5(1)(c) of the *CPA*. In assessing whether there is some basis in the evidence to establish the existence of common issues, the motion judge must consider the pertinent legal principles that apply to the commonality assessment with reference to the evidence adduced on the motion.

80 As indicated, the notable exception is that the "some basis in fact" test does not apply to the first criterion in s. 5(1)(a) that the pleadings disclose a cause of action. This criterion does not require the plaintiff to lead evidence showing a basis in fact for the allegations in the pleadings: see *Hollick*, at para. 25. The pleadings must contain sufficient factual allegations to establish the necessary elements of the cause of action asserted. However, unless the allegations of fact are patently ridiculous or incapable of proof, the facts must be accepted as pleaded for the purpose of determining if the plaintiff has stated a viable cause of action.

81 It is not clear to me what the motion judge had in mind with his remarks about the plaintiff and defendant being on a level playing field on the certification motion. However, I do not accept the plaintiff's submission that the motion judge imposed an impermissibly higher burden on him to show commonality. The motion judge found that the misclassification issue required individual assessments of the class members. For the reasons that follow, I agree with his conclusion on this point.

## **(2) Did the Motion Judge Err by Rejecting the Plaintiff's Proposed Common Issue of Misclassification?**

### *(a) Governing Principles on Common Issues*

82 This court's reasons in *Fulawka*, at para. 80, describe the definition of common issues in s. 1 and the requirement in s. 5(1)(c) of the *CPA* that the claims of the class members raise common issues. *Fulawka* also sets out, at para. 81, the legal principles concerning the common issues requirement that have emerged from the case law, citing *Singer v. Schering-Plough Canada Inc.*, 2010 ONSC 42, 87 C.P.C. (6th) 276 (Ont. S.C.J.), at para. 140. And, as noted in *Fulawka*, at para. 82, it is up to the motion judge to decide which of the governing legal principles concerning the common issues requirement are contentious in any particular case.

83 As will become clear in the ensuing analysis, the contentious legal principles governing the commonality inquiry in the present case are the following:

The underlying foundation of a common issue is whether its resolution will avoid duplication of fact-finding or legal analysis: *Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46, [2001] 2 S.C.R. 534 (S.C.C.), at para. 39.

With regard to the common issues, "success for one member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent." That is, the answer to a question raised by a common issue for the plaintiff must be capable of extrapolation, in the same manner, to each member of the class: *Dutton*, at para. 40; *Ernewein v. General Motors of Canada Ltd.*, 2005 BCCA 540, 46 B.C.L.R. (4th) 234 (B.C. C.A.), at para. 32; *Wuttunee v. Merck Frosst Canada Ltd.*, 2009 SKCA 43, [2009] S.J. No. 179 (Sask. C.A.), at paras. 145-46 and 160.

A common issue cannot be dependent upon individual findings of fact that have to be made with respect to each individual claimant: *Williams v. Mutual Life Assurance Co. of Canada* (2000), 51 O.R. (3d) 54 (Ont. S.C.J.), at para. 39, aff'd [Kumar v. Mutual Life Assurance Co. of Canada] (2001), 17 C.P.C. (5th) 103 (Ont. Div. Ct.), aff'd [2003] O.J. No. 1160 (Ont. C.A.) and *Zicherman v. Equitable Life Insurance Co. of Canada*, [2003] O.J. No. 1161 (Ont. C.A.); *Fehringer v. Sun Media Corp.* (2002), 27 C.P.C. (5th) 155 (Ont. S.C.J.), aff'd (2003), 39 C.P.C. (5th) 151 (Ont. Div. Ct.).

Common issues should not be framed in overly broad terms: "It would not serve the ends of either fairness or efficiency to certify an action on the basis of issues that are common only when stated in the most general terms. Inevitably such an action would ultimately break down into individual proceedings. That the suit had initially been certified as a class action could only make the proceeding less fair and less efficient": *Rumley v. British Columbia*, 2001 SCC 69, [2001] 3 S.C.R. 184 (S.C.C.), at para. 29.

### *(b) Plaintiff's Submissions on his Proposed Common Issue of Misclassification*

84 The plaintiff contends that misclassification cases are "inherently amenable to resolution by way of class proceeding." In support of this view, he relies on *obiter* comments by the motion judges in *Fulawka v. Bank of Nova Scotia*, 2010 ONSC 1148, 101 O.R. (3d) 93 (Ont. S.C.J.), and in *Fresco v. Canadian Imperial Bank of Commerce* (2009), 84 C.C.E.L. (3d) 161 (Ont. S.C.J.), about misclassification class actions.

85 He also points to a "substantial body" of decisions by the Canadian Industrial Relations Board and its predecessor, the Canadian Labour Relations Board (collectively, the "Board"), which he says show that group-wide determinations of managerial classification can be made: *Captains & Chiefs Assn. v. Algoma Central Marine*, 2010 CIRB 531, [2010] C.I.R.B.D. No. 40 (C.I.R.B.), aff'd 2011 FCA 94, [2011] F.C.J. No. 340 (F.C.A.); *I.B.E.W. Local 1574 v. NorthwesTel Mobility Inc.*, 2006 CIRB 346, [2006] C.I.R.B.D. No. 4 (C.I.R.B.); *Syndicat des agents de maîtrise de Québec-Téléphone v. Québec-Téléphone*, [1996] C.L.R.B.D. No. 36 (Can. L.R.B.), aff'd [*Québec-Téléphone v. Syndicat des agents de maîtrise de Québec-Téléphone*] (1997), 75 A.C.W.S. (3d) 1056 (Fed. C.A.) [1997 CarswellNat 2170 (Fed. C.A.)]; *I.A.M. v. Québecair* (1978), 33 di 480 (Can. L.R.B.) (CLRB no. 163); *U.S.W.A. v. Cominco Ltd.* (1980), 40 di 75 (Can. L.R.B.) (CLRB no. 240); and *C.W.C. v. Island Telephone Co.* (1990), 81 di 126 (Can. L.R.B.) (CLRB no. 811).

86 The plaintiff then argues that the motion judge was satisfied that the evidence shows "some basis in fact" to find that the misclassification issue can be determined on a class-wide basis. He especially relies on the motion judge's following statements, at paras. 70 and 293:

For his part, Mr. McCracken provided evidence about the role of first line supervisors, and his evidence shows that there is some basis in fact for his allegations that first line supervisors are not managers under the *Code*. There is evidence that at least some of them: (a) do not have authority to hire, terminate, promote, demote, or transfer employees; (b) do not represent management in collective bargaining or in grievance procedures; (c) have limited authority to discipline restricted to investigating and recommending minor discipline; and (d) are not involved in setting budgets, CN policies, or its Service Plan.

.....

... Mr. McCracken has provided some basis in fact for the proposition that all first line managers are non-managers. Therefore, he might assert that the commonality of the first line supervisors is established as a common issue to be decided at the common issues trial.

87 The plaintiff says that, having made these factual findings, the motion judge erred by refusing to certify his proposed misclassification issue given that this issue is indisputably a substantial and necessary ingredient of each class member's claim.

*(c) The Motion Judge Did Not Err by Concluding that the Plaintiff's Proposed Misclassification Issue Cannot be Determined on a Class-wide Basis*

88 There are three flaws in the plaintiff's argument:

- (i) the cases he relies on do not establish that misclassification cases are inherently amenable to resolution by way of a class action;
- (ii) the motion judge did not find a basis in fact showing that the plaintiff's proposed misclassification issue could be resolved commonly; and
- (iii) the plaintiff's evidence fails to establish the existence of a common issue of misclassification.

89 I discuss each flaw in turn.

**(i) Misclassification cases are not necessarily appropriate for certification**

90 The plaintiff relies on Strathy J.'s statement in *Fulawka*, at para. 145, that: "misclassification cases are appropriate for certification due to commonality of employment functions and common treatment by the employer." He also relies on the

following comments by Lax J. in *Fresco*, at para. 54, distinguishing misclassification cases from the claim for overtime wages in the proceeding before her:

A useful place to begin is to compare the kind of claim that is advanced in this proceeding with the kind of claims that are advanced in the misclassification cases. *In those cases, commonality arises from the employees' identical or similar job duties and the determination by the employer that it is not required to pay overtime to employees with these duties.* The question for the common issues judge is whether the employees' duties entitle them to overtime within the meaning of the applicable statutes and regulations. This can be assessed without examining individual claims. Success for one does mean success for all... [Emphasis added. Footnote and citation omitted.]

91 These comments do not assist the plaintiff. I agree with the motion judge's observation, at para. 385, that these comments cannot be taken as a categorical assertion that every misclassification case is inevitably certifiable as a class action. On the contrary, these comments make it clear that misclassification cases are amenable to certification where the similarity of job duties performed by class members provides the fundamental element of commonality.

92 Indeed, after the present appeal was argued, Strathy J. released a decision refusing to certify a proposed class action for unpaid overtime: see *Brown v. Canadian Imperial Bank of Commerce*, 2012 ONSC 2377, [2012] O.J. No. 1853 (Ont. S.C.J.). That action was based on the allegation that the defendant bank had misclassified class members as managerial employees. Strathy J. concluded that the actual job duties performed by the members of the proposed class differed significantly, which would make it impossible to assess on a common basis whether the defendant bank had properly classified them.

93 The Board decisions that the plaintiff relies on likewise do not support his position. In these cases, the Board made determinations of managerial status under s. 3 of Part I of the *Code* for the purpose of deciding if employees should be included in the bargaining unit. Employees who perform "management functions" are excluded from the collective bargaining rights conferred by Part I of the *Code* because the definition of "employee" in s. 3 excludes persons who perform "management functions" from the protection of Part I.

94 A review of these decisions — and other Board decisions that CN cites — reveals that the Board has made group-wide determinations of managerial status in cases where the job tasks of the affected employees are defined by a common job description and where there was no dispute that the employees perform similar tasks, or where the parties consented to a group determination by the Board: see e.g. *Algoma Central*, at para. 13; *NorthwesTel*, at paras. 10-14; and *I.L.W.U., Local 514 v. Vancouver Wharves Ltd.* (1974), [1975] 1 Canadian L.R.B.R. 162 (Can. L.R.B.).

95 Contrary to the plaintiff's proposed reading of these decisions, in *Island Telephone*, the Board indicated that it carefully reviewed the individual circumstances of the employees in question. In addition, where the case involves classifying numerous positions and where there are varying levels of responsibility between positions and within the same position, the Board has received extensive oral and documentary evidence to determine whether a particular employee's position is managerial in nature: see, e.g., *Canada Post Corp. v. C.U.P.W.* (1989), 79 di 35 (Can. L.R.B.) (CLRB no. 767); *Canadian Union of Bank Employees v. Bank of Nova Scotia* (1977), 21 di 439 (Can. L.R.B.) (CLRB no. 91); and *Quebecair*. Moreover, even in cases where the employees' job descriptions were substantially similar, the Board considered the particular circumstances of individual employees in isolated locations and concluded that, unlike employees in more centralized work places who reported to higher-level managers, the employees in more isolated locations actually performed management functions: see *Québec-Téléphone*, at para. 40; *Telephone Supervisors Assn. v. British Columbia Telephone Co.* (1977), 33 di 361 (Can. L.R.B.) (CLRB No. 98), at p. 378.

**(ii) The motion judge did not find a basis in fact showing that the plaintiff's proposed misclassification issue could be resolved commonly**

96 The second shortcoming in the plaintiff's argument is his contention that the motion judge found there is a basis in fact establishing that the misclassification issue could be resolved on a class-wide basis. The plaintiff relies on the motion judge's comment that his evidence "shows that there is some basis in fact for his allegations that [FLSs] are not managers under the

*Code.*" However, the motion judge tempered this observation with his ensuing comment, at para. 70, that there is evidence that "*at least some of them*" do not exercise managerial functions (emphasis added).

97 And while the motion judge said, at para. 293, that "Mr. McCracken has provided some basis in fact for the proposition that all first line managers are non-managers", he concluded that same paragraph with the following remark:

However, as I will explain later in these Reasons for Decision, accepting Mr. McCracken's submission as correct is to accept as a given truth something that is patently or obviously untrue because there are some questions that are not common issues and rather are fundamentally or intrinsically or unavoidably individual questions.

Following up on this point, the motion judge later said, at para. 333, that: "[t]he common label of being a first line supervisor tells almost nothing about entitlement [to overtime pay] under the *Code*."

98 Thus, when his reasons are viewed in their entirety, I do not think that the motion judge can accurately be said to have found that there is a basis in fact showing that the plaintiff's proposed misclassification issue could be determined on behalf of the entire class.<sup>12</sup>

99 I will now explain why such a factual finding was not available when the applicable legal principles on commonality are applied to the evidentiary record.

### **(iii) The plaintiff's evidence fails to establish the existence of a common issue of misclassification**

#### *(a) What the plaintiff's evidence needed to establish*

100 The plaintiff filed evidence from multiple class members indicating that they do not have real decision-making authority and asserting that CN has misclassified them as managers or as employees who exercise managerial functions. However, to raise common issues, more is required than simply showing that some members of the class have similar claims. This point was made in *Lau v. Bayview Landmark Inc. (1999)*, 40 C.P.C. (4th) 301 (Ont. S.C.J.), at para. 24:

But neither is it enough to show that there is a group of similarly situated individuals with respect to claims against the defendants. Evidence of the mere existence of multiple plaintiffs with a similar cause of action against the defendants does not in and of itself establish that the claims should be litigated as a class action. The claims that those individuals could assert must also be capable of raising common issues.

101 To satisfy the commonality requirement in s. 5(1)(c) of the *CPA*, the evidence must afford some basis in fact to find that the claims of individual class members raise common issues as defined by the case law.

102 The plaintiff's proposed misclassification common issue asks:

Are the class members excluded from overtime eligibility under contract (express or implied) and/or under the [*Code*]?

103 The plaintiff is required to show that there is a basis in fact to find that this proposed common issue satisfies the apposite legal principles concerning commonality, which are repeated here for ease of reference (citations omitted):

The underlying foundation of a common issue is whether its resolution will avoid duplication of fact-finding or legal analysis.

With regard to the common issues, "success for one member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent." That is, the answer to a question raised by a common issue for the plaintiff must be capable of extrapolation, in the same manner, to each member of the class.

A common issue cannot be dependent upon individual findings of fact that have to be made with respect to each individual claimant.

Common issues should not be framed in overly broad terms: "It would not serve the ends of either fairness or efficiency to certify an action on the basis of issues that are common only when stated in the most general terms. Inevitably such an action would ultimately break down into individual proceedings. That the suit had initially been certified as a class action could only make the proceeding less fair and less efficient".

104 For these legal principles to be satisfied in the context of a proposed common issue of misclassification, the plaintiff's evidence must establish some basis in fact to find that the job functions and duties of class members are sufficiently similar that the misclassification element of the claim against CN could be resolved without considering the individual circumstances of class members. In the absence of such evidence, there is no basis in fact to find that resolving the proposed common issue would avoid duplication of fact-finding or legal analysis, or that success for one class member will mean success for all, or that individual findings of fact would not be required with respect to each individual claimant. Likewise, in the absence of this type of evidence, the requirement that the common issue should not be framed in overly broad terms is not met. That is because the motion judge could not be satisfied that the plaintiff's proposed abstract question will not "break down into individual proceedings."

(b) *The plaintiff's evidence*

105 The plaintiff's evidence, as summarized above at paras. 62-64, includes affidavits from class members who held several different FLS positions. This evidence indicates that these class members lacked real decision-making authority in managerial matters, including the powers of hiring and firing, imposing discipline, and setting budgets and policies.

106 These class members spoke more generally about the duties and responsibilities of other FLSs — including ones they had worked with or ones they had spoken to. However, even in this latter respect, the affiants' assertions are not evidence that a court could rely on as establishing a basis in fact for the existence of a common issue of misclassification because the assertions in question are vague and anecdotal.

107 For example, Mr. Anderson deposed: "During my time at CN, I have worked primarily in the South Western Ontario region, including in Windsor, Sarnia and London. At all of these locations, in my experience, the FLSs had no different level of authority than described above." Mr. Anderson does not indicate what FLS job positions he is referring to, the number of class members he has in mind, or why he is well-positioned to assess the level of authority exercised by these class members.

108 Equally vague and unhelpful is the following statement in Mr. Caissie's affidavit:

I understand, from speaking with various colleagues throughout my employment that the level of supervision I exercised as Trainmaster, Manager — Crew Utilizations and Manager — Corridor Operations is in line with that exercised by other FLSs employed by CN in both large and small centres across the country.

109 Mr. Caissie does not identify the "various colleagues" he spoke with, nor indicate the positions held by the "other FLSs" to which he refers. He also fails to explain why these colleagues were well-positioned to comment on the level of supervision exercised by FLSs in both large and small centres across the country.

110 Even considering rule 39.01(4) of the *Rules of Civil Procedure*, which permits an affidavit on a motion to contain statements of the deponent's information and belief, this evidence falls short of meeting the requirement for specifying the source of the information and belief: see *Smith v. National Money Mart Co.*, [2007] O.J. No. 1507 (Ont. S.C.J.). In sum, these statements are simply bald, sweeping and conclusory assertions. They do not constitute evidence showing a basis in fact for the claim that the class members' job duties and responsibilities across all of CN's workplaces are sufficiently similar that a common issues trial judge could determine on a class-wide basis whether CN properly classified them as managerial employees.

111 The plaintiff, in responding to CN's evidence showing a lack of uniformity in the job duties and responsibilities of class members, also filed affidavits from two union leaders at CN: Rex Beatty and John Dinnery. Mr. Beatty has never held a FLS position, while Mr. Dinnery held a FLS position from 1979-1982 — long before the start of the class period.

112 Mr. Beatty described his experience working for unions representing CN employees. The relevant parts of his evidence are confined to observations about the authority of the trainmaster position, which is held by about 18 percent of current class members. For example, he stated: "At no location do trainmasters have the authority to hire, discipline, or terminate employees, to negotiate contracts with the union, or to participate in the grievance procedure beyond its most preliminary stage."

113 Mr. Dinnery's evidence primarily describes his involvement with FLSs in his role as president of the United Steel Workers Union, Local 2004 ("USW 2004"). The USW 2004 represents CN employees in the engineering division. Employees in the bargaining unit represented by USW 2004 are subject to Collective Agreement 10.1, which is one of approximately 40 collective agreements governing CN's unionized workforce. Mr. Dinnery said:

Because the Collective Agreement is the same from coast to coast, the authority of [FLSs] under the Agreement is similarly uniform. Based on my experience in the union leadership, I believe that the union's dealing with [FLSs] are exactly the same across Canada. Indeed, under the Collective Agreement, employees must be treated in the same manner by their supervisors.

114 This evidence reveals several inaccuracies and limitations. First, the premise for Mr. Dinnery's claim that the authority of FLSs is uniform appears to be that their authority is defined by the collective agreement. However, the collective agreement only dictates the terms and conditions of the work performed by employees who are supervised by the FLSs. In other words, the uniformity is not of the supervisors but of the supervised.

115 Second, his statement ignores that there are different collective agreements that apply to the employees supervised by FLSs. Differences in the collective agreement provisions concerning matters such as imposing discipline, lay-offs, and setting hours of work undermine the premise of uniformity in the FLSs' authority.

116 Third, Mr. Dinnery's evidence is limited to discussing the role of FLSs in CN's engineering division. He says nothing about the role of FLSs in the transportation or mechanical departments, or in the areas of sales and marketing or support services. His evidence is further limited to describing the role played by FLSs in imposing discipline and participating in the grievance process. In the former respect, he acknowledged that under the collective agreement with USW 2004, FLSs have authority to impose up to 15 demerit points for minor infractions without needing authorization from higher management to do so, subject to the employee's right to request a formal investigation by more senior management. Mr. Dinnery did not discuss the other indicia of management functions, such as the extent of FLSs' authority over matters such as budgeting, scheduling hours of work, deciding staffing levels, ordering lay-offs, or participating in policy-making.

*(c) The lack of evidence of job descriptions for FLS positions*

117 On the certification motion, there was no evidence in the form of job descriptions for the various FLS positions. Class counsel asked CN's representative, Mr. Lagacé, to undertake to "provide copies of the various job descriptions [for FLSs] in the various salary grades as they existed in 1999." CN refused on the basis that the undertaking was not within the proper scope of a cross-examination on an affidavit and on the basis that "it is not relevant to the issues before the court". The plaintiff did not bring a refusals motion to compel the requested undertaking.

118 CN asserts on appeal that it does not have any formal job descriptions for FLS positions. In oral argument, the plaintiff asked the court to draw an adverse inference on this point because of CN's refusal to provide any documentation in response to the questions put to the deponent.<sup>13</sup> However, there is no adverse inference that could be drawn that would advance the plaintiff's request to certify the action. Evidence of job descriptions is only relevant to the commonality criterion. In considering as a whole the evidence of the nature of the job functions performed by class members, the court cannot go so far as to infer

that each job is identical or substantially similar. CN has adduced evidence to the contrary suggesting that individuals with the same job title had different duties and responsibilities.

*(d) The plaintiff's suggested use of "sub-groups"*

119 The plaintiff — in apparent recognition of the lack of evidence showing sufficient commonality of the job functions and responsibilities of class members — suggested on appeal that the misclassification issue could be adjudicated based on "sub-groups". However, he did not offer any concrete guidance on how to sub-divide the class, such as by way of job title, or by the location where class members worked (e.g., urban centres versus more isolated areas). Instead, the plaintiff suggested using the sub-groups that the motion judge identified in approved common issue 3, namely: (1) class members who clearly meet the minimum managerial criteria; (2) those who clearly could not meet these criteria; and (3) those whose status remains to be determined.

120 Applying the plaintiff's suggested lines of division would not assign individual class members to a particular sub-group. The common issues trial judge would need to identify the indicia of managerial functions and would then need to apply these indicia to members of the class, without any assurance that this application could be done commonly, that is, without the need to examine the individual circumstances of most, if not all, of the 1,550 class members.

*(e) Plaintiff's position in reply*

121 In his reply factum, the plaintiff contends that a trial judge would substantially advance the case for all class members by making a class-wide determination of the various indicia of management that are relevant within the organizational and operational context of CN. He goes on to identify three possible scenarios that might arise after the trial judge identifies these criteria:

In particular, a trial judge could substantially advance the case for all class members by first making a class-wide determination of the various indicia of management specifically relevant within the organizational and operational context of CN. A trial judge could then make one of several determinations depending on the evidence led at trial. *One determination would be to move to an individual assessment process in which "the common issues judge could use the considerable resources of the CPA to achieve manageable individual proceedings" in order to determine, on a principled and consistent basis, which of the class members (or groups of class members) are not management.* A second determination could find that the class as a whole, or sub-groups within the class, do or do not have sufficient independent authority under the above criteria to qualify as management. A third determination could be that some of the common indicia may be determined, on a class-wide basis, leaving only limited individual inquiries. [Footnotes omitted. Emphasis added.]

122 The next section of my reasons explains why determining the various indicia of management will not substantially advance the case for all class members. I make three observations about the plaintiff's position in reply.

123 First, the plaintiff's Revised List did not refer anywhere to the need for the trial judge to identify the legal and factual criteria for deciding whether class members were properly classified as managerial employees. In submitting that "a trial judge could substantially advance the case for all class members by first making a class-wide determination of the various indicia of management", the plaintiff is arguing, in effect, that the action should be certified so that the common issues trial judge can determine what the common issues should be.

124 At a conceptual level, the plaintiff's approach is fundamentally wrong. The sentiment expressed in *Caputo*, at para. 56, applies here:

[T]he judge presiding over the "common issues trial" is there in the role of arbiter of issues that have already been set out. That role is to make findings with respect to issues certified for trial, rather than to decide what issues are to be resolved. Setting the issues for trial is the role of the motions judge on certification.

125 In other words, it is a misapplication of the *CPA* to certify an action where the common issues trial judge is expected to formulate the issues for trial. I would add that while the motion judge on certification may amend or revise common issues, it is the plaintiff who bears the responsibility at first instance for proposing the common issues and for adducing evidence demonstrating that those issues exist. The plaintiff must not abdicate this responsibility in the hope that the motion judge will formulate certifiable issues.

126 Second, the plaintiff's submissions reveal a practical defect. The plaintiff speaks of the common issues trial judge making determinations of the indicia of management that are "specifically relevant within the organizational and operational context of CN". However, the evidentiary record reveals that the "organizational and operational context of CN" differs for individual class members depending on factors such as which FLS job title they hold, where they work and whether they work alongside other FLSs or higher-level managers. The effect of this evidence is that there are no common issues but rather an amalgam of individual assessments. As stated by Cullity J. in *Risorto v. State Farm Mutual Automobile Insurance Co.* (2007), 38 C.P.C. (6th) 373 (Ont. S.C.J.), at para 45: "[i]f an issue is one that the court at trial could decide only by reference to the facts relating to the claim of each class member, it lacks commonality."

127 Finally, the plaintiff acknowledges in these submissions that, after the common issues trial judge identifies the indicia of managerial status, "one determination would be to move to an individual assessment process" for deciding which of the class members are not management. This acknowledgement amounts to a full and complete answer to the certification requirement in s. 5(1)(c) because it is an admission that the plaintiff's evidence does not provide a basis in fact to find that the misclassification issue can be resolved without the need for individual assessments of class members.

(f) Summary

128 The plaintiff's litigation strategy seizes on the superficial commonality that all class members work for CN and all share the common label of being a FLS. However, this common label conveys a false impression of commonality given the evidence on the motion of the different job responsibilities and functions of class members, who hold many different job titles and who work in a variety of workplaces with different reporting structures and different sizes of workforce. There is no basis in fact to support a finding that the essential misclassification determination could be made without resorting to the evidence of individual class members. Simply put, the plaintiff has not shown that any significant element of his claim is capable of common proof.

129 Finally, determining the minimum requirements to be a managerial employee at CN would not advance the claims of class members in any significant way.

**(3) Did the Motion Judge Err by Reframing a Common Issue Concerning the Minimum Requirements to be a Managerial Employee at CN?**

130 The motion judge rejected the plaintiff's proposed misclassification common issues on the basis that they lacked commonality. Having done so, he drew up a set of revised common issues for certification, at para. 351, which included the following common issue:

In accordance with the meaning under s. 167 (2) of the [Code], of "employees who are managers or superintendents or exercise management functions", what are the minimum requirements to be a managerial employee at CN?

The motion judge held that this "minimum requirements" issue could be determined on a class-wide basis and that resolving it would substantially advance the litigation.

131 I do not agree with the motion judge's conclusion that the issue he proposed is a certifiable common issue. The motion judge rejected the plaintiff's various formulations of a misclassification common issue based on his finding that the element of commonality is lacking. In that, he was correct.

132 Where the motion judge fell into error was in attempting to recast common issues that were, in his view, amenable to certification. Despite his efforts to reformulate the common issues, the evidentiary shortcomings remained. A core of

commonality either exists on the record or it does not. In other words, commonality is not manufactured through the statement of common issues. The common issues are derived from the facts and from the issues of law arising from the causes of action asserted by class members and not the other way around.

133 In the absence of a common issues trial that would be able to resolve the threshold misclassification issue, determining the issue of the minimum indicia of management — or on the motion judge's formulation, the "minimum requirements" for being a managerial employee at CN — would not advance the proceeding in any significant way. The motion judge seemingly acknowledged this point, as reflected by his remarks, at para. 359, that "the heart of the matter remains whether the first line supervisors were or were not managers, which is unanswered."

134 In attempting to state common issues that would minimally advance the proceeding on a class-wide basis, the motion judge lost sight of the fact that the plaintiff's action for unpaid overtime is fundamentally a misclassification case. Answering the motion judge's revised common issues would not eliminate the need for substantial individual inquiries to determine whether — having regard to the specific job duties and responsibilities of class members and the organizational context in which each works — CN had properly or improperly classified FLSs as managerial employees.

135 In the absence of an evidentiary basis for certifying a common issue that would resolve the misclassification allegation, the proposed class action for unpaid overtime wages simply collapses.

## **G. Additional Issues**

136 On the Rule 21 motion, the motion judge concluded that the Superior Court of Justice has jurisdiction to enforce the provisions of Part III of the *Code* pertaining to overtime and holiday pay. He reached this conclusion based on his view that the *Code* provisions are terms of CN's employment contracts "by force of statute". CN contends that this conclusion is in error.

137 Given that I see no basis in fact for the proposed common issue of misclassification, it is not necessary to consider the parties' arguments concerning jurisdiction. Nor is it necessary to consider CN's submission that the motion judge should have struck the plaintiff's claims for breach of contract for failing to state a proper cause of action. However, in not addressing these issues, I do not wish to be understood as endorsing the motion judge's reasons on them.

138 The parties also object to the following rulings by the motion judge on the Rule 21 motion and on the certification motion:

1. Did the motion judge err in staying the plaintiff's claims for breach of express or implied terms of the class members' contracts of employment?
2. Did the motion judge err in dismissing the plaintiff's claim for holiday pay?
3. Did the motion judge err in striking the plaintiff's pleading in negligence for policy reasons without the benefit of a proper record?
4. Did the motion judge err in refusing to certify the proposed common issue concerning contractual terms?
5. Did the motion judge err in refusing to certify any of the proposed common issues concerning the duty in contract, the duty of good faith, and a duty in tort?
6. Did the motion judge err in finding that an aggregate assessment of damages would not be available?
7. Did the motion judge err in finding on the certification motion that a class proceeding would be the preferable procedure?

139 Again, given my reasons on the absence of a proper common issue concerning the fundamental question of misclassification, it is not necessary to assess these questions individually. However, as the first five of these questions point

to a common theme about the scope of a motion judge's authority on a Rule 21 motion and on an accompanying motion for certification, I make the following comments.

140 The motion judge made the following rulings and observations that, in my view, misconstrue the extent of his authority under the *Rules* and under the relevant provisions of the *CPA*:

- A consequence of the certification and Rule 21 motions is that several common issues will have already been determined (at para. 14).
- The function of a Rule 21 motion is not to adjudicate the genuine merits of a claim or defence, but there is a way on any motion to obtain judgment on the merits by way of a motion for judgment. It is appropriate to use the motion for judgment jurisdiction under rule 37.13(2) in this case to dismiss the plaintiff's claim for holiday pay on the merits (at paras. 211-12).
- It is also appropriate to use the motion for judgment jurisdiction and the jurisdiction provided by ss. 12 and 13 of the *CPA* to decide common issues on their merits before the common issues trial (at paras. 228-31).
- It would be propitious to the advancement of the class action and fair to both the class members and CN to exercise the court's jurisdiction to decide that the terms of the *Code* are terms of the employment contracts by force of law (at para. 232).
- The plaintiff's claims for breach of express or implied contract terms should be stayed (at paras. 228-34).
- Four of the six questions on the list of approved common issues can and should be answered before the common issues trial and these answers, which are readily available, would substantially advance the class member's litigation against CN (at para. 353).
- The answer to common issue two is now known as a by-product of CN's motion under rule 20.01(3)(a). The answer to the question is that compliance with the overtime provisions of the *Code* is by force of statute an implied term of the contracts of employment between CN and the FLSs (at para. 357).
- Answering common issue two substantially advances the litigation and makes it unnecessary or moot to answer several factually or legally more difficult questions (at para. 357).
- Common issues four and five are subjunctive tense questions that are readily answered in the subjunctive. On the assumption that CN did not pay overtime pay when it was required to do so and on the assumption that CN's as yet unpledged defence failed at the common issues trial, then the requirements for an unjust enrichment claim would be satisfied at the common issues trial and CN would have to disgorge its ill-gotten gains, once those gains had been calculated (at para. 358).

141 While a Rule 21 motion permits a motion judge to find that a pleaded cause of action is wholly without merit, a motion judge should not convert such a motion into a motion for judgment using rule 37.13(2)(a) unless the parties agree that all relevant evidence is before the court and they have had a full opportunity to argue their positions on the motion for judgment: see *Royal Bank v. Rastogi*, 2011 ONCA 47 (Ont. C.A.), at para. 22, citing *CMLQ Investors Co. v. CIBC Trust Corp.* (1996), 3 C.P.C. (4th) 62 (Ont. C.A.), at para. 8. Those circumstances did not exist here.

142 Nor do I agree that the provisions in ss. 12 and 13 of the *CPA* confer jurisdiction on a certification judge to decide the common issues before the common issues trial. Section 12 is a purely procedural provision that allows a motion judge to make orders concerning the conduct of a class action, while s. 13 empowers a motion judge to stay a related proceeding.

143 Moreover, deciding common issues on the certification motion is antithetical to the well-established principle enshrined in *Hollick*, at para. 16, that the decision to certify a class action is not a decision on the merits of the action. A key reason for this is that the evidentiary record at the certification stage is far from complete.

144 I also note that the motion judge fundamentally altered the plaintiff's proposed common issues. While this is a power that may be exercised by the motion judge, it should be exercised with caution and restraint and should be the exception rather than the norm.

145 Given his decision to refashion the common issues, the motion judge granted certification subject to the condition that a litigation plan be settled. In my view, motion judges should not, as a matter of common practice, bifurcate the requirement in s. 5(1)(e)(ii) of the *CPA* to produce "a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class". Nor should the litigation plan requirement be treated as a mere afterthought.

146 Preparing a litigation plan requires the plaintiff to translate his or her analytical proposal for a class proceeding into practice by having to explain, in concrete terms, the process whereby the common issues, and any remaining individual issues, will be decided. The need for a clear explanation of how a proposed common issue would be resolved for all class members on a common basis serves as an important check in considering if the plaintiff has met the common issues and preferable procedure criteria.

## **H. Conclusion and Disposition**

147 The absence of commonality is fatal to the certification of this action. I would allow CN's appeal and cross-appeal from the certification order and would set aside that order. The plaintiff's appeal from the motion judge's certification order is dismissed. Given my proposed disposition of the appeals from the certification order, I would dismiss the parties' appeals from the motion judge's order under Rule 21.

148 In light of this result, the motion judge's costs order should be set aside. CN shall have its costs of the certification motion, to be fixed by the motion judge.

149 The parties may make written submissions on the costs of the appeal, with the respondent/defendant's submissions to be delivered within 10 days of the release of these reasons and the appellant/plaintiff's submissions to be delivered within 10 days thereafter.

I agree

*Defendants' appeals allowed in part.*

## **Appendix A — Plaintiff's Revised List of Common Issues**

### **Common Issue One — Misclassification**

1. Are the Class Members excluded from overtime eligibility under contract (express or implied) and/or under the *Canada Labour Code*, c. L-2, as amended?

### **Common Issue Two — Overall Breach and Misclassification**

2. Did the Defendant breach its contracts of employment with the Class or was it unjustly enriched, by denying eligibility for overtime compensation to some or all Class Members whom CN classified as [FLSs]?

### **Common Issue Three — Breach of Contract**

3.

a) What are the relevant terms of (express or implied or otherwise) of the Class Members' contracts of employment with the Defendant respecting: (i) classification; (ii) regular and overtime hours; (iii) holiday pay; and (iv) the recording of hours worked?

b) Did the Defendant breach any of the foregoing terms? If so how?

**Common Issue Four — Duties of the Defendant**

4.

a) Did the Defendant have a contractual duty (express or implied) to take reasonable steps to ensure that Class Members were properly classified?

b) If so, did the Defendant breach this duty?

c) Did the Defendant have a statutory duty to take reasonable steps to ensure that Class Members were properly classified?

d) If so, did the Defendant breach this duty?

e) Did the Defendant have a duty to act in good faith in the performance of its contractual and/or statutory obligations to the Class and individual Class Members, including (but not limited to) a duty to take reasonable steps to ensure that Class Members were properly classified?

f) If so, did the Defendant breach this duty?

g) Did the Defendant owe a duty of care to the Class or each Class Member to ensure that individual Class Members were properly classified?

h) If so, what is the standard of care?

i) Did the Defendant fall below the standard of care? If so how?

**Common Issue Five — Unjust Enrichment**

5.

a) Was the Defendant enriched by (i) failing to compensate the Class Members with pay or overtime pay for hours worked in excess of their standard hours of work, or (ii) failing to compensate the Class Members with holiday pay?

b) If the answer to question 5(a)(i) or (ii) is "yes," did the Class suffer a corresponding deprivation?

c) If the answer to question 5(a)(i) and (b) is "yes," was there any juristic reason for the enrichment?

d) If the answer to question 5(a)(ii) and (b) is "yes," was there any juristic reason for the enrichment?

**Common Issue Six — Damages or other Relief**

6.

a) If an answer to any of the foregoing common issues is in favour of the Class, what remedies are Class Members entitled?

b) If an answer to any of the foregoing common issues is in favour of the Class, is the Defendant potentially liable on a class-wide basis? If "yes":

1. Can damages be assessed on an aggregate basis? If "yes":

- a. Can aggregate damages be assessed in whole or in part on the basis of statistical evidence, including statistical evidence based on random sampling?
- b. What is the quantum of aggregate damages owed to Class Members?
- c. What is the appropriate method or procedure for distributing the aggregate damages award to Class Members?

#### **Common Issue Seven — Punitive Damages**

7.

- a) Is the Class entitled to an award of aggravated, exemplary or punitive damages based upon the Defendant's conduct?
- b) If the answer to 7(a) is "yes," can that damage award be determined on an aggregate basis?
- c) If the answer to 7(b) is "yes," what is the appropriate method or procedure for distributing the aggregate aggravated, exemplary or punitive damage award to the Class?

#### **Appendix B — Motion Judge's Proposed "Amended Revised List of Common Issues"**

#### **Common Issue One — Payment of Overtime Pay**

1. Did the Class Members receive overtime pay and or holiday pay under the *Canada Labour Code*, c. L-2, as amended?

#### **Common Issue Two — Breach of Contract**

2.

- a. What are the terms (express or implied or otherwise) of the Class Member's contracts of employment with the Defendant respecting: (i) classification; (ii) regular and overtime hours; (iii) holiday pay; and (iv) the recording of hours worked?

#### **Common Issue Three — Duties of the Defendant**

3.

- a. Did the Defendant have a contractual duty (express or implied) to take reasonable steps to ensure that Class Members were properly classified?
- b. If so, did the Defendant breach this duty?
- c. Did the Defendant have a statutory duty to take reasonable steps to ensure that Class Members were properly classified?
- d. If so, did the Defendant breach this duty?
- e. Did the Defendant have a duty to act in good faith in the performance of its contractual and/or statutory obligations to the Class and individual Class Members to ensure that Class Members were properly classified?
- f. If so, did the Defendant breach this duty?
- g. Did the Defendant owe a duty of care to the Class or each Class Member to ensure that individual Class Members were properly classified?
- h. If so, what is the standard of care?
- i. Did the Defendant fall below the standard of care? If so how?

#### **Common Issue Four — Unjust Enrichment**

4.

- a. Would the Defendant be enriched by (i) failing to compensate a Class Members with pay or overtime pay for hours worked in excess of his or her standard hours of work, or (ii) failing to compensate the Class Member with holiday pay?
- b. If the answer to question 4(a)(i) or (ii) is "yes," would the Class Member suffer a corresponding deprivation?
- c. If the answer to question 4(a)(i) and (b) is "yes," was there any juristic reason for the enrichment?
- d. If the answer to question 4(a)(ii) and (b) is "yes," was there any juristic reason for the enrichment?

#### **Common Issue Five — Damages or other Relief**

5. If the Defendant breached a duty or its contract or was unjustly enriched what remedies are available to the Class Member?

#### **Common Issue Six — Punitive Damages**

6. Would the Defendant's conduct justify an award of aggravated, exemplary or punitive damages?

### **Appendix C — Common Issues Approved by the Motion Judge**

#### **Common Issue One — Payment of Overtime Pay**

Did the Class Members receiv overtime pay under the *Canada Labour Code*, c. L-2, as amended?

#### **Common Issue Two — Contract Terms**

What are the terms by force of statute of the Class Members' contracts of employment with the Defendant respecting: (i) classification; (ii) regular and overtime hours; and (iii) the recording of hours worked?

#### **Common Issue Three — Minimum Requirements of Manager Status at CN**

In accordance with the meaning under s. 167 (2) of the *Canada Labour Code*, of "employees who are managers or superintendents or exercise management functions", what are the minimum requirements to be a managerial employee at CN?

#### **Common Issue Four — Unjust Enrichment**

Would the Defendant be unjustly enriched by failing to compensate a Class Member with pay or overtime pay for hours worked in excess of his or her standard hours of work?

#### **Common Issue Five — Damages or other relief**

If the Defendant breached a duty or its contract or was unjustly enriched what remedies are available to the Class Member?

#### **Common Issue Six — Punitive Damages**

Would the Defendant's conduct justify an award of aggravated, exemplary or punitive damages?

#### **Footnotes**

<sup>1</sup> In *Fulawka*, the plaintiff's pleadings included a misclassification claim concerning Level 6 employees at Bank of Nova Scotia ("Scotiabank"). In 2008, Scotiabank re-classified these employees as non-management and extended overtime entitlement to them.

Scotiabank also implemented a retroactive claims process whereby Level 6 employees could claim unpaid overtime going back to 2005.

- 2 The appellate routes are a maze of complexity owing to s. 30 of the *CPA* and s. 6 of the *Courts of Justice Act*, R.S.O. 1990, c. C.43. The parties both filed motions for leave to appeal in the Divisional Court from the motion judge's order certifying the action as a class proceeding. In addition, both parties appealed to this court from the motion judge's order under rules 21.01(1) and (3) of the *Rules of Civil Procedure* dismissing part of the plaintiff's claim. The defendant sought leave to appeal the interlocutory parts of the Rule 21 order to the Divisional Court and cross-appealed as of right from the final elements of that order to this court. The defendant also sought leave to appeal to the Divisional Court from the motion judge's costs order on the motions. On consent of the parties, leave to appeal to the Divisional Court from the interlocutory parts of the motion judge's Rule 21 order, and his certification and costs orders, was granted by orders of Jennings J., dated December 14, 2010. Pursuant to a consent order of Doherty J.A., dated February 9, 2011, the appeals as of right from the order under Rule 21 were combined with the appeals pending in Divisional Court for hearing by this court.
- 3 Amended Fresh as Amended Statement of Claim, dated March 3, 2010.
- 4 Most FLS positions exist in the Operations Division in one of three departments: Transportation, Mechanical and Engineering.
- 5 These statutory and regulatory provisions are discussed in this court's reasons in *Fulawka*, at para. 35.
- 6 The criteria in s. 5(1) of the *CPA* may be summarized as follows:
  - (a) the pleadings disclose a cause of action;
  - (b) there is an identifiable class;
  - (c) the claims raise common issues;
  - (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
  - (e) there are appropriate representative plaintiffs who could produce a workable litigation plan.
- 7 The motion judge reviewed, at paras. 58-67, various cases describing the analytical approach under the *Code* to classifying employees as a manager or an employee who exercises management functions.
- 8 Mr. Lagacé assumed the role of Director of Compensation at CN in January 2001.
- 9 The class member, Enzo Fabrizi, says he held the position of Commuter Central Officer from 1997-2006 and his affidavit focuses on this time period. This particular job title does not appear on the list of 70 FLS job categories as of April 1, 2008, which CN filed in evidence.
- 10 Mr. Anderson deposed that he held the FLS positions of MCO in Toronto and manager of dispatchers and crew clerks in Michigan, U.S.A. He also held the position of trainmaster, first in Michigan, and later in Windsor and Sarnia. To the extent that Mr. Anderson's comments relate to his experience while working as a FLS in Michigan, it is not admissible evidence in the proposed class action. The class consists only of FLS employees at CN's Canadian operations.
- 11 Mr. Caissie deposed that he held the following FLS positions: manager for customs in Winnipeg; crew coordinator in Moncton; trainmaster in Brampton; and manager — crew utilization in Toronto. He is currently a MCO in Toronto.
- 12 I recognize that the motion judge commented, at para. 345, that "Mr. McCracken has met the low standard of showing that there is some basis in fact for his proposed common issues." However, this comment must be read in light of his finding, at para. 331, that the plaintiff's proposed misclassification question — together with various other of his proposed questions on the Revised List — "cannot be determined on a class-wide basis and rather require individual questions to be answered."
- 13 The record suggests that CN at least had a job description for the FLS position of trainmaster. The record includes a 2007 report by an inspector with Human Resources and Social Development Canada under Part III of the *Code*, regarding his investigation of a trainmaster's complaint that he was improperly excluded from the overtime provisions of the *Code* because CN misclassified him as a

manager. The inspector commented: "It is my determination, after reviewing the comments made by both parties, *the job descriptions of the Trainmaster submitted by both Mr. [H] and CN Rail* and the above-noted cases, ... that Mr. [H] did perform sufficient managerial functions to warrant his exclusion from the Hours of Work provision of the *Code*" (emphasis added).

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Miscellaneous

Limitation period — Plaintiff applied for certification of class proceeding under Class Proceedings Act — He alleged that defendants, who manufactured optical disc drives (ODDs) and ODD products, conspired to fix prices of ODDs and ODD products — Certification judge certified action as class proceeding, subject to certain exceptions and conditions — Defendants' appeals were dismissed — Defendants appealed — Appeals dismissed — While certain subset of named defendants argued that plaintiff's claim against them was statute-barred as it was commenced after two-year limitation period in s. 36(4)(a)(i) of Competition Act expired, discoverability rule applied to extend limitation period in s. 36(4)(a)(i) and it was not plain and obvious that plaintiff's claim against defendants in issue would fail on this basis — It was not "plain and obvious" that fraudulent concealment could not delay running of limitation period in this case.

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiff applied for certification of class proceeding under Class Proceedings Act — He alleged that defendants, who manufactured optical disc drives (ODDs) and ODD products, conspired to fix prices of ODDs and ODD products — Proposed class consisted of direct purchasers and indirect purchasers, as well as umbrella purchasers, whose ODD or ODD product was manufactured and supplied by non-defendant — Certification judge certified action as class proceeding, subject to certain exceptions and conditions — Defendants' appeals were dismissed — Defendants appealed — Appeals dismissed — In order for loss-related questions to be certified as common issues, plaintiff's expert's methodology need only be sufficiently credible or plausible to establish that loss reached requisite purchaser level — Certification judge identified correct standard to certify commonality of loss as common issue — There was no palpable and overriding error in certification judge's conclusion that

plaintiff showed some basis in fact for finding loss issues to be common — Certification judge's decision to certify questions related to aggregate damages for non-umbrella purchasers should not be disturbed.

Commercial law --- Trade and commerce — Competition and combines legislation — Right to civil action — General principles Plaintiff applied for certification of class proceeding under Class Proceedings Act — He alleged that defendants, who manufactured optical disc drives (ODDs) and ODD products, conspired to fix prices of ODDs and ODD products — Proposed class consisted of direct purchasers and indirect purchasers, as well as umbrella purchasers, whose ODD or ODD product was manufactured and supplied by non-defendant — Certification judge certified action as class proceeding, subject to certain exceptions and conditions — Defendants' appeals were dismissed — Defendants appealed — Appeals dismissed — It was not plain and obvious that umbrella purchasers' cause of action under s. 36(1)(a) of Competition Act (CA) could not succeed — It was not plain and obvious that plaintiff's common law and equitable claims could not succeed, except as was otherwise held by certification judge — Prior to enactment of cause of action contained in what was now s. 36(1) of CA, breach of s. 45(1) of CA was, as it still was, able to satisfy "unlawful means" element of tort of civil conspiracy — Courts below correctly decided it was not plain and obvious that plaintiff was precluded from bringing common law and equitable causes of action alongside his claim under s. 36(1)(a) of CA.

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiff applied for certification of class proceeding under Class Proceedings Act — He alleged that defendants, who manufactured optical disc drives (ODDs) and ODD products, conspired to fix prices of ODDs and ODD products — Proposed class consisted of direct purchasers and indirect purchasers, as well as umbrella purchasers, whose ODD or ODD product was manufactured and supplied by non-defendant — Certification judge certified action as class proceeding, subject to certain exceptions and conditions — Defendants' appeals were dismissed — Defendants appealed — Appeals dismissed — While certain subset of named defendants argued that plaintiff's claim against them was statute-barred as it was commenced after two-year limitation period in s. 36(4)(a)(i) of Competition Act (CA) expired, discoverability rule applied to extend limitation period in s. 36(4)(a)(i) and it was not plain and obvious that plaintiff's claim against defendants in issue would fail on this basis — It was not plain and obvious that umbrella purchasers' cause of action under s. 36(1)(a) of CA could not succeed — It was not plain and obvious that plaintiff's common law and equitable claims could not succeed, except as was otherwise held by certification judge. Procédure civile --- Procédures entamées dans le cadre d'un recours collectif ou par le représentant — Procédures entamées dans le cadre d'un recours collectif ou par le représentant en vertu d'une législation sur les recours collectifs — Autorisation — Recours collectif du demandeur — Divers

Délai de prescription — Demandeur a demandé l'autorisation d'un recours collectif en vertu de la Class Proceedings Act — Il a fait valoir que les défenderesses, qui fabriquaient des lecteurs de disques optiques (LDO) et des produits munis de LDO, ont comploté pour fixer les prix des LDO et des produits munis de LDO — Juge saisi de la demande d'autorisation a autorisé l'action comme recours collectif, sous réserve de certaines exceptions et conditions — Appels interjetés par les défenderesses ont été rejetés — Défenderesses ont formé un pourvoi — Pourvois rejetés — Alors qu'un certain sous-groupe faisant partie des défenderesses désignées alléguait que la réclamation du demandeur à son encontre était prescrite puisqu'elle avait été déposée une fois le délai de prescription de deux ans prévu à l'art. 36(4)a)(i) de la Loi sur la concurrence écoulé, la règle de la possibilité de découvrir s'appliquait de façon à prolonger le délai de prescription prévu à l'art. 36(4)a)(i) et il n'était pas « évident et manifeste » que la réclamation du demandeur contre les défenderesses devait être rejetée pour ce motif — Il n'était pas « évident et manifeste » que la doctrine de la dissimulation frauduleuse ne pouvait pas retarder le point de départ du délai de prescription dans le présent dossier.

Procédure civile --- Procédures entamées dans le cadre d'un recours collectif ou par le représentant — Procédures entamées dans le cadre d'un recours collectif ou par le représentant en vertu d'une législation sur les recours collectifs — Autorisation — Recours collectif du demandeur — Cause commune ou intérêt commun

Demandeur a demandé l'autorisation d'un recours collectif en vertu de la Class Proceedings Act — Il a fait valoir que les défenderesses, qui fabriquaient des lecteurs de disques optiques (LDO) et des produits munis de LDO, ont comploté pour fixer les prix des LDO et des produits munis de LDO — Groupe projeté était composé des acheteurs directs, des acheteurs indirects et des acheteurs sous parapluie, soit les acheteurs dont les LDO ou produits munis de LDO ont été fabriqués et fournis par une personne qui n'était pas une défenderesse — Juge saisi de la demande d'autorisation a autorisé l'action comme recours collectif, sous réserve de certaines exceptions et conditions — Appels interjetés par les défenderesses ont été rejetés — Défenderesses

ont formé un pourvoi — Pourvois rejetés — Pour que les questions relatives à la perte soient autorisées en tant que questions communes, la méthode de l'expert du demandeur n'a qu'à être suffisamment fiable ou acceptable pour établir que l'acheteur du niveau requis a subi une perte — Juge saisi de la demande d'autorisation a arrêté la norme applicable à l'autorisation, en tant que question commune, de la question de la communauté de la perte — Il n'y avait aucune erreur manifeste et déterminante dans la conclusion du juge saisi de la demande d'autorisation que le demandeur a établi un certain fondement factuel permettant de qualifier de communes les questions liées à la perte — Il n'y avait pas lieu de modifier la décision du juge saisi de la demande d'autorisation d'autoriser les questions liées à l'octroi de dommages-intérêts globaux aux acheteurs qui n'étaient pas sous parapluie.

Droit commercial --- Échange et commerce — Législation en matière de concurrence et de coalitions — Droit de poursuivre au civil — Principes généraux

Demandeur a demandé l'autorisation d'un recours collectif en vertu de la Class Proceedings Act — Il a fait valoir que les défenderesses, qui fabriquaient des lecteurs de disques optiques (LDO) et des produits munis de LDO, ont comploté pour fixer les prix des LDO et des produits munis de LDO — Groupe projeté était composé des acheteurs directs, des acheteurs indirects et des acheteurs sous parapluie, soit les acheteurs dont les LDO ou produits munis de LDO ont été fabriqués et fournis par une personne qui n'était pas une défenderesse — Juge saisi de la demande d'autorisation a autorisé l'action comme recours collectif, sous réserve de certaines exceptions et conditions — Appels interjetés par les défenderesses ont été rejetés — Défenderesses ont formé un pourvoi — Pourvois rejetés — Il n'était pas évident et manifeste que la cause d'action que reconnaît l'art. 36(1) de la Loi sur la concurrence (LC) aux acheteurs sous parapluie ne pouvait pas réussir — Il n'était pas évident et manifeste que les recours de common law ou d'equity exercés par le demandeur ne pouvaient être accueillis, sauf indication contraire dans les conclusions du juge saisi de la demande d'autorisation — Avant l'adoption de la disposition conférant une cause d'action qui se trouve dans ce qui est devenu l'art. 36(1) de la LC, une infraction à l'art. 45(1) de la LC pouvait, et peut encore, satisfaire à l'élément « moyens illégaux » du délit de complot civil — Tribunaux d'instance inférieure ont à juste titre décidé qu'il n'était pas évident et manifeste que le demandeur ne pouvait exercer des recours de common law et d'equity en même temps qu'une action fondée sur l'art. 36(1)a) de la LC.

Procédure civile --- Procédures entamées dans le cadre d'un recours collectif ou par le représentant — Procédures entamées dans le cadre d'un recours collectif ou par le représentant en vertu d'une législation sur les recours collectifs — Autorisation — Recours collectif du demandeur — Procédures écrites révèlent une cause d'action

Demandeur a demandé l'autorisation d'un recours collectif en vertu de la Class Proceedings Act — Il a fait valoir que les défenderesses, qui fabriquaient des lecteurs de disques optiques (LDO) et des produits munis de LDO, ont comploté pour fixer les prix des LDO et des produits munis de LDO — Groupe projeté était composé des acheteurs directs, des acheteurs indirects et des acheteurs sous parapluie, soit les acheteurs dont les LDO ou produits munis de LDO ont été fabriqués et fournis par une personne qui n'était pas une défenderesse — Juge saisi de la demande d'autorisation a autorisé l'action comme recours collectif, sous réserve de certaines exceptions et conditions — Appels interjetés par les défenderesses ont été rejetés — Défenderesses ont formé un pourvoi — Pourvois rejetés — Alors qu'un certain sous-groupe faisant partie des défenderesses désignées alléguait que la réclamation du demandeur à son encontre était prescrite puisqu'elle avait été déposée une fois le délai de prescription de deux ans prévu à l'art. 36(4)a)(i) de la Loi sur la concurrence (LC) écoulé, la règle de la possibilité de découvrir s'appliquait de façon à prolonger le délai de prescription prévu à l'art. 36(4)a)(i) et il n'était pas évident et manifeste que la réclamation du demandeur contre les défenderesses devait être rejetée pour ce motif — Il n'était pas évident et manifeste que la cause d'action que reconnaît l'art. 36(1)a) de la LC aux acheteurs sous parapluie ne pouvait pas réussir — Il n'était pas évident et manifeste que les recours de common law ou d'equity exercés par le demandeur ne pouvaient être accueillis, sauf indication contraire dans les conclusions du juge saisi de la demande d'autorisation.

The plaintiff applied for certification of a class proceeding under the Class Proceedings Act (CPA). He alleged that the defendants, who manufactured optical disc drives (ODDs) and ODD products, conspired to fix prices of ODDs and ODD products. The proposed class consisted of direct purchasers and indirect purchasers, as well as umbrella purchasers, whose ODD or ODD product was manufactured and supplied by a non-defendant. The certification judge certified the action as a class proceeding, subject to certain exceptions and conditions. The defendants' appeals were dismissed. The defendants appealed.

**Held:** The appeals were dismissed.

Per Brown J. (Wagner C.J.C., Abella, Moldaver, Karakatsanis, Gascon, Rowe, Martin JJ. concurring): While a certain subset of the named defendants argued that the plaintiff's claim against them was statute-barred as it was commenced after the two-year

limitation period in s. 36(4)(a)(i) of the Competition Act (CA) expired, the discoverability rule applied to extend the limitation period in s. 36(4)(a)(i) and it was not plain and obvious that the plaintiff's claim against the defendants in issue would fail on this basis. It was also not "plain and obvious" that fraudulent concealment could not delay the running of the limitation period in this case. The concern which drives the application of the doctrine of equitable fraud is not limited to the unconscionability of taking advantage of a special relationship with the plaintiff. Nor is the doctrine's application limited to cases where there is something tantamount to or commensurate with a special relationship between the plaintiff and the defendant. The inquiry is not into the relationship within which the conduct occurred, but into the unconscionability of the conduct itself.

It was not plain and obvious that the umbrella purchasers' cause of action under s. 36(1)(a) of the CA could not succeed. The text of s. 36(1)(a) of the CA supported the view that umbrella purchasers had a cause of action thereunder for conduct contrary to s. 45(1) of the CA. The purpose of the CA is to maintain and encourage competition in Canada with a view to providing consumers with competitive prices and product choices. A conspiracy to price-fix was the very antithesis of the CA's objective. Monetary sanctions for such anti-competitive conduct furthered the CA's purpose. Interpreting s. 36(1)(a) of the CA so as to permit umbrella purchaser actions also furthered two other objectives of the CA, being deterrence of anti-competitive behaviour, and compensation for the victims of such behaviour. Recognizing the umbrella purchasers' cause of action under s. 36(1)(a) did not risk exposing the defendants to indeterminate liability.

It was not plain and obvious that the plaintiff's common law and equitable claims could not succeed, except as was otherwise held by the certification judge. Prior to the enactment of the cause of action contained in what was now s. 36(1) of the CA, a breach of s. 45(1) of the CA was, as it still was, able to satisfy the "unlawful means" element of the tort of civil conspiracy. The courts below correctly decided that it was not plain and obvious that the plaintiff was precluded from bringing common law and equitable causes of action alongside his claim under s. 36(1)(a) of the CA.

It was not necessary, in order to support certifying loss as a common question, that a plaintiff's expert's methodology establish that each and every class member suffered a loss. Nor was it necessary that the methodology of the expert in issue be able to identify those class members who suffered no loss so as to distinguish them from those who did. In order for loss-related questions to be certified as common issues, a plaintiff's expert's methodology need only be sufficiently credible or plausible to establish that loss reached the requisite purchaser level. The certification judge identified the correct standard to certify commonality of loss as a common issue. There was no palpable and overriding error in the certification judge's conclusion that the plaintiff showed some basis in fact for finding the loss issues to be common.

The certification judge's decision to certify certain questions related to aggregate damages for the non-umbrella purchasers should not be disturbed. Aggregate damages under s. 29(1)(b) of the CPA are purely remedial, available only after all other common issues have been determined, including liability. Neither the range of possible findings of the trial judge following the common issues trial, nor the unavailability of aggregate damages for class members that suffered no loss, was relevant to the decision to certify aggregate damages as a common issue. The aggregate damages questions the certification judge certified related solely to whether damages could be determined on an aggregate basis and if so, in what amount.

Per Côté J. (dissenting in part): The appeals should be allowed in part.

With respect to the limitations issues raised in the appeal of certain defendants, the discoverability rule does not apply to the limitation period in s. 36(4)(a)(i) of the CA because the event that triggers the commencement of the limitation period occurs without regard to the state of a plaintiff's knowledge. As for the doctrine of fraudulent concealment, it was not plain and obvious that it would toll the operation of the limitation period in this case only if the plaintiff was capable of demonstrating a special relationship existed. It might be that something tantamount to or commensurate with the existence of a special relationship would be sufficient to toll the limitation period. Simply establishing the existence of the conspiracy would not suffice.

The CA does not prevent a plaintiff from advancing a claim at common law or in equity together with, or instead of, a claim pursuant to the statutory cause of action in s. 36(1) of the CA in respect of the same anti-competitive prohibitions. However, the umbrella purchasers could not succeed in their claims against the defendants under s. 36(1) of the CA. Also, it could not be accepted that a methodology capable of proving only that loss reached the indirect purchaser level in the distribution chain was sufficient for the purpose of certifying the loss-related questions proposed by the plaintiff as "common issues", pursuant to s. 4(1)(c) of the CPA.

Le demandeur a demandé l'autorisation d'un recours collectif en vertu de la Class Proceedings Act (CPA). Il a fait valoir que les défenderesses, qui fabriquaient des lecteurs de disques optiques (LDO) et des produits munis de LDO, ont comploté pour fixer les prix des LDO et des produits munis de LDO. Le groupe projeté était composé des acheteurs directs, des acheteurs indirects

et des acheteurs sous parapluie, soit les acheteurs dont les LDO ou produits munis de LDO ont été fabriqués et fournis par une personne qui n'était pas une défenderesse. Le juge saisi de la demande d'autorisation a autorisé l'action comme recours collectif, sous réserve de certaines exceptions et conditions. Les appels interjetés par les défenderesses ont été rejetés. Les défenderesses ont formé un pourvoi.

**Arrêt:** Les pourvois ont été rejetés.

Brown, J. (Wagner, J.C.C., Abella, Moldaver, Karakatsanis, Gascon, Rowe, Martin, JJ., souscrivant à son opinion) : Alors qu'un certain sous-groupe faisant partie des défenderesses désignées alléguait que la réclamation du demandeur à son encontre était prescrite puisqu'elle avait été déposée une fois le délai de prescription de deux ans prévu à l'art. 36(4)a)(i) de la Loi sur la concurrence (LC) écoulé, la règle de la possibilité de découvrir s'appliquait de façon à prolonger le délai de prescription prévu à l'art. 36(4)a)(i) et il n'était pas « évident et manifeste » que la réclamation du demandeur contre les défenderesses devait être rejetée pour ce motif. Il n'était pas plus « évident et manifeste » que la doctrine de la dissimulation frauduleuse ne pouvait pas retarder le point de départ du délai de prescription dans le présent dossier. Ce n'est pas seulement l'iniquité qui découle du fait de laisser une personne profiter de l'avantage d'une relation spéciale avec le demandeur qui justifie l'application de la doctrine de la fraude d'equity. L'application de la doctrine n'est pas non plus restreinte aux cas où il y a quelque chose d'équivalent ou correspondant à une relation spéciale entre le demandeur et le défendeur. L'examen ne porte pas sur la relation dans le cadre de laquelle le comportement a eu lieu, mais sur le caractère abusif du comportement lui-même.

Il n'était pas évident et manifeste que la cause d'action que reconnaît l'art. 36(1)a) de la LC aux acheteurs sous parapluie ne pouvait pas réussir. Le texte de l'art. 36(1)a) de la LC étayait le point de vue selon lequel, sous son régime, les acheteurs sous parapluie avaient une cause d'action pour tout comportement allant à l'encontre de l'art. 45(1) de la LC. L'objet de la LC est de préserver et de favoriser la concurrence au Canada dans le but d'assurer aux consommateurs des prix compétitifs et un choix dans les produits. Comploter en vue de fixer les prix va totalement à l'encontre de l'objet de la LC. Les sanctions pécuniaires imposées dans de tels cas de conduite anticoncurrentielle favorisaient ainsi l'atteinte de la fin visée par la LC. Interpréter l'art. 36(1)a) de la LC de façon à autoriser les actions des acheteurs sous parapluie favorisait l'atteinte de deux autres objectifs, soit la dissuasion des comportements anticoncurrentiels et l'indemnisation des victimes de ces comportements. La reconnaissance de la cause d'action des acheteurs sous parapluie fondée sur l'art. 36(1)a) ne risquait pas d'exposer les défenderesses à une responsabilité indéterminée.

Il n'était pas évident et manifeste que les recours de common law ou d'equity exercés par le demandeur ne pouvaient être accueillis, sauf indication contraire dans les conclusions du juge saisi de la demande d'autorisation. Avant l'adoption de la disposition conférant une cause d'action qui se trouve dans ce qui est devenu l'art. 36(1) de la LC, une infraction à l'art. 45(1) de la LC pouvait, et peut encore, faire à l'élément « moyens illégaux » du délit de complot civil. Les tribunaux d'instance inférieure ont à juste titre décidé qu'il n'était pas évident et manifeste que le demandeur ne pouvait exercer des recours de common law et d'equity en même temps qu'une action fondée sur l'art. 36(1)a) de la LC.

Il n'était pas nécessaire, pour justifier l'autorisation de la question de la perte en tant que question commune, que la méthode proposée par un expert du demandeur établisse que chaque membre du groupe a subi une perte. Il n'était pas non plus nécessaire que la méthode de l'expert en question permette d'identifier les membres du groupe qui n'ont subi aucune perte de manière à les distinguer de ceux qui en ont subi une. Pour que les questions relatives à la perte soient autorisées en tant que questions communes, la méthode de l'expert du demandeur n'a qu'à être suffisamment fiable ou acceptable pour établir que l'acheteur du niveau requis a subi une perte. Le juge saisi de la demande d'autorisation a arrêté la norme applicable à l'autorisation, en tant que question commune, de la question de la communauté de la perte. Il n'y avait aucune erreur manifeste et déterminante dans la conclusion du juge saisi de la demande d'autorisation que le demandeur a établi un certain fondement factuel permettant de qualifier de communes les questions liées à la perte.

Il n'y avait pas lieu de modifier la décision du juge saisi de la demande d'autorisation d'autoriser certaines questions liées à l'octroi de dommages-intérêts globaux aux acheteurs qui n'étaient pas sous parapluie. Les dommages-intérêts globaux au sens de l'art. 29(1)(b) de la CPA ont un objectif purement réparateur et ne peuvent être octroyés qu'après le règlement de toutes les autres questions communes, y compris la responsabilité. Ni l'éventail des conclusions que pourra tirer le juge du procès à l'issue de l'audition des questions communes, ni la possibilité d'accorder des dommages-intérêts globaux aux membres du groupe qui n'ont subi aucune perte n'étaient pertinentes pour la décision d'autoriser les dommages-intérêts globaux en tant que question commune. Les questions liées aux dommages-intérêts globaux que le juge saisi de la demande d'autorisation a autorisées consistaient

seulement à savoir si le montant des dommages-intérêts pouvait être arrêté globalement et, dans l'affirmative, quel était ce montant.

Côté, J. (dissidente en partie) : Les pourvois devraient être accueillis en partie.

En ce qui concerne les questions relatives aux délais de prescription soulevées dans le pourvoi d'une des défenderesses, la règle de la possibilité de découvrir ne s'applique pas au délai de prescription prévu à l'art. 36(4)a)(i) de la LC, puisque l'événement qui marque le point de départ du délai de prescription se produit peu importe si un demandeur a connaissance du préjudice. En ce qui a trait à la dissimulation frauduleuse, il ne semblait pas évident et manifeste que cette doctrine serait susceptible de repousser le point de départ du délai de prescription en l'espèce seulement si le demandeur arrivait à démontrer qu'il existait une relation spéciale. Il était possible que quelque chose d'équivalent ou correspondant à une relation spéciale suffise à reporter le point de départ du délai de prescription. Cependant, le simple fait d'établir l'existence du complot ne suffirait pas.

La LC n'empêche pas le demandeur d'intenter un recours en common law ou en equity en même temps, ou au lieu, d'un recours fondé sur la cause d'action prévue à l'art. 36(1) à l'égard des mêmes pratiques anticoncurrentielles. Toutefois, les acheteurs sous parapluie ne pouvaient pas avoir gain de cause contre les défenderesses dans leurs réclamations fondées sur l'art. 36(1) de la LC. De même, on ne saurait affirmer qu'une méthode permettant uniquement de prouver que la perte a atteint le niveau des acheteurs indirects dans la chaîne de distribution suffisait à l'autorisation des questions liées à la perte proposées par le demandeur en tant que « questions communes » au titre de l'art. 4(1)c) de la CPA.

#### **Words and phrases considered:**

##### **discoverability**

Discoverability is a judge-made rule of statutory interpretation that assists in determining whether the event triggering the commencement of a limitation period depends upon the state of the plaintiff's knowledge.

##### **fraudulent concealment**

Fraudulent concealment is an equitable doctrine that prevents limitation periods from being used "as an instrument of injustice" (*M. (K.) [M. (K.) v. M. (H.)*, [1992] 3 S.C.R. 6], at pp. 58-59). Where the defendant fraudulently conceals the existence of a cause of action, the limitation period is suspended until the plaintiff discovers the fraud or ought reasonably to have discovered the fraud (*Guerin v. The Queen*, [1984] 2 S.C.R. 335, at p. 390). It is a form of "equitable fraud" (*Guerin*, at p. 390; *M. (K.)*, at pp. 56-57), which is not confined to the parameters of the common law action for fraud (*M. (K.)*, at p. 57).

##### **fraudulent concealment doctrine**

The fraudulent concealment doctrine is a doctrine that operates to prevent a limitation clause from being used as an instrument of injustice in circumstances where a defendant conceals the facts giving rise to a potential cause of action from a plaintiff. Because it would be unconscionable for that defendant to then rely on the limitation clause as a defence to the claim, equity "suspend[s] the running of the limitation clock until such time as the injured party can reasonably discover the cause of action" (*Giroux Estate v. Trillium Health Centre* (2005), 74 O.R. (3d) 341 (C.A.), at para. 28).

##### **limitation clauses**

Limitation clauses are statutory provisions that place temporal limits on a claimant's ability to institute legal proceedings.

##### **Termes et locutions cités:**

##### **dispositions de prescription**

Les dispositions de prescription sont des dispositions statutaires qui visent à fixer des limites temporelles à la faculté du demandeur de se pourvoir devant les tribunaux.

### **dissimulation frauduleuse**

La doctrine de la dissimulation frauduleuse est une doctrine d'equity qui vise à empêcher que les délais de prescription servent « à créer une injustice » ([*M. (K.) c. M. (H.)*, [1992] 3 R.C.S. 6], p. 58-59). Si le défendeur a dissimulé frauduleusement l'existence d'une cause d'action, le délai de prescription est suspendu jusqu'au moment où le demandeur découvre, ou aurait raisonnablement dû découvrir, la fraude (*Guerin c. La Reine*, [1984] 2 R.C.S. 335, p. 390). Il s'agit d'une forme de « fraude d'equity » (*Guerin*, p. 390; *M. (K.)*, p. 56-57), qui n'est pas limitée par les paramètres de l'action pour fraude de la common law (*M. (K.)*, p. 57).

### **doctrine de la dissimulation frauduleuse**

La doctrine de la dissimulation frauduleuse vise à empêcher que le délai de prescription serve à créer une injustice lorsque le défendeur cache au demandeur les faits à l'origine d'une cause d'action potentielle. Puisqu'il serait abusif pour le défendeur d'invoquer la prescription comme défense, l'equity [TRADUCTION] « permet de suspendre l'écoulement du délai de prescription jusqu'à ce que la partie lésée puisse raisonnablement découvrir l'existence de la cause d'action » (*Giroux Estate c. Trillium Health Centre* (2005), 74 O.R. (3d) 341 (C.A.), par. 28).

### **règle de la possibilité de découvrir**

La règle de la possibilité de découvrir est une règle prétorienne d'interprétation statutaire qui aide à déterminer si l'événement qui marque le point de départ du délai de prescription dépend de la connaissance qu'en avait le demandeur.

APPEALS by defendants from judgment reported at *Godfrey v. Sony Corporation* (2017), 2017 BCCA 302, 2017 CarswellBC 2245, 1 B.C.L.R. (6th) 319, [2017] 12 W.W.R. 448 (B.C. C.A.), dismissing defendants' appeals from decision certifying action as class proceeding subject to certain exceptions and conditions.

POURVOIS formés par les défenderesses à l'encontre d'une décision publiée à *Godfrey v. Sony Corporation* (2017), 2017 BCCA 302, 2017 CarswellBC 2245, 1 B.C.L.R. (6th) 319, [2017] 12 W.W.R. 448 (B.C. ***Brown J. (Wagner C.J. and Abella, Moldaver, Karakatsanis, Gascon, Rowe and Martin JJ. concurring):***

### **I. Introduction**

1 The proposed representative plaintiff, Neil Godfrey, applied for certification of a class proceeding under the British Columbia *Class Proceedings Act*, R.S.B.C. 1996, c. 50. The defendants manufacture Optical Disc Drives ("ODDs"—a memory storage device that uses laser light or electromagnetic waves near the light spectrum to read and/or record data on optical discs), and ODD products (products that contain ODDs). Godfrey alleges that the defendants conspired to fix prices of ODDs and ODD products.

2 The certification judge granted Godfrey's application. Two sets of defendants — one led by Pioneer Corporation, and the other by Toshiba Corporation — each appealed from that decision, unsuccessfully, to the British Columbia Court of Appeal. At stake in these appeals is, principally, whether it is plain and obvious that the claim under s. 36(1)(a) of the *Competition Act*, R.S.C. 1985, c. C-34, of so-called "umbrella purchasers" who bought ODDs or ODD products manufactured and supplied by someone *other than* the defendants, but who allege that the defendants' price-fixing conduct raised the market price of the product, cannot succeed. This depends on whether these umbrella purchasers have a cause of action under s. 36(1)(a). For the reasons that follow, I agree with the courts below that they do, and it therefore follows that it is not plain and obvious that their claim cannot succeed.

3 These appeals also present an occasion to clarify the operation of the statutory limitation period for claims under s. 36(1)(a) of the *Competition Act*, to affirm the availability of common law and equitable actions in respect of claims also brought under s. 36(1)(a) of the *Competition Act*, and to reiterate the standard required to certify loss-related questions as common issues in class proceedings.

4 As I will explain below, my disposition of all these matters would lead me to dismiss the appeals.

## II. Background

5 Godfrey applied for certification of a class proceeding against 42 defendants (collectively, "Toshiba"), alleging a conspiracy to raise, maintain, fix and/or stabilize the price of ODDs between January 1, 2004 and January 1, 2010 ("class period"). He deposed that he purchased ODD products during the class period, and that he seeks to bring the proposed class proceeding on behalf of all British Columbia residents who purchased an ODD or an ODD product during the class period. The proposed class consists of:

- (a) *direct purchasers*, whose ODD or ODD product was manufactured or supplied *by a defendant* and purchased *from that defendant*,
- (b) *indirect purchasers*, whose ODD or ODD product was manufactured or supplied *by a defendant* and purchased *from a non-defendant*; and
- (c) *umbrella purchasers*, whose ODD or ODD product was manufactured *and supplied by a non-defendant*.

## III. Judicial History

### A. British Columbia Supreme Court, 2016 BCSC 844 (B.C. S.C.) — *Masuhara J.*

6 The certification judge certified the action as a class proceeding, subject to certain exceptions and conditions (para. 221 (CanLII)). One condition was that the class definition be amended so as to satisfy s. 4(1)(b) of the *Class Proceedings Act*. The certification judge held that the class definition ("[a]ll persons resident in British Columbia who purchased [ODDs and ODD products] in [the class period]") was insufficiently precise, as it was unclear which products were included (paras. 128-31).

7 In his reasons, the certification judge resolved a number of matters, only two of which are relevant to these appeals: whether the pleadings disclose a cause of action, and whether Godfrey's proposed questions relating to loss suffered by the class are certifiable as common questions.

#### (1) Do the Pleadings Disclose a Cause of Action?

8 The certification judge first considered whether Godfrey's pleadings satisfy s. 4(1)(a) of the *Class Proceedings Act*, which conditions certification upon the pleadings disclosing a cause of action.

#### (a) The Pioneer Claim

9 A subset of the named defendants ("Pioneer") opposed Godfrey's certification application, arguing that the action was bound to fail because it was barred by the two-year limitation period in s. 36(4) of the *Competition Act* (although the action against the other defendants was filed on September 27, 2010, the action against Pioneer was not filed until August 16, 2013). The certification judge held, however, that this argument could not be considered at the certification stage (para. 46). Further, it was not plain and obvious in any event that the limitation period could *not* be extended in this case by applying principles of discoverability or fraudulent concealment.

#### (b) Umbrella Purchasers

10 Toshiba argued that the umbrella purchasers had no cause of action under s. 36(1)(a) of the *Competition Act*, because their inclusion would expose it to indeterminate liability. For four reasons, however, the certification judge held that the umbrella purchasers had a cause of action:

1. While "allowing umbrella claims is inconsistent with restitutionary law", restitutionary law does not determine the scope of the *Competition Act* claims, since s. 36 exists to compensate for losses, not to restore wrongful gains (para. 73).
2. The possibility of indeterminate liability does not militate against affording umbrella purchasers a cause of action, since the defendants' liability exposure, while significant, would not be indeterminate (paras. 75-76).
3. While umbrella claims expose the defendants to liability for the pricing decisions of non-defendants, the pricing decisions of non-defendants, under the theory of umbrella effects, are not truly "independent" (para. 77).
4. The umbrella purchaser claims would further the goals of the *Competition Act*, including compensation and deterrence (para. 78).

### (c) "Unlawfulness" Element

11 The certification judge then considered Toshiba's argument that a breach of the *Competition Act* could not constitute the "unlawful" element of civil causes of action, such as the tort of unlawful means conspiracy (para. 83). He held that he was bound by *Watson v. Bank of America Corp.*, 2015 BCCA 362, 79 B.C.L.R. (5th) 1 (B.C. C.A.), such that it could. While, for other reasons, the pleadings did not disclose a cause of action for the unlawful means tort, Godfrey was permitted to amend his pleadings (paras. 109-10). And, while finding that Godfrey's pleadings *did* disclose a cause of action in civil conspiracy (both predominant purpose conspiracy and unlawful means conspiracy), unjust enrichment and waiver of tort (paras. 100, 102, 115 and 119), the certification judge also found that the umbrella purchasers' claims in unjust enrichment and waiver of tort were bound to fail (paras. 116 and 120).

#### (2) Do the Claims Raise Common Issues?

12 Godfrey sought to have 25 questions certified as common questions under s. 4(1)(c) of the *Class Proceedings Act* (several of which related to loss alleged to have been suffered by the proposed class (para. 143)). Godfrey's expert, Dr. Keith Reutter, opined that (1) all the proposed class members would have been impacted by Toshiba's alleged conspiracy, and (2) there are methods available to estimate any overcharge that resulted from the alleged conspiracy, as well as aggregate damages (paras. 151-52). Some of the defendants, however, retained their own expert, Dr. James Levinsohn, who opined that it would not be possible to determine the fact of injury for the proposed class members using common evidence and analysis (para. 153).

13 After examining Dr. Reutter's opinion in detail, the certification judge concluded that his was a plausible methodology which satisfied the standard set in *Pro-Sys Consultants Ltd. v. Microsoft Corp.*, 2013 SCC 57, [2013] 3 S.C.R. 477 (S.C.C.), for evidence to support certifying loss as a common issue. Specifically, it could establish that overcharges were passed on to the indirect purchaser level (paras. 167 and 179).

14 The certification judge therefore certified all of the common issues with respect to the direct purchasers and indirect purchasers, except those relating to the unlawful means tort (para. 199). With respect to the umbrella purchasers, he certified all of the common issues except those relating to the unlawful means tort, unjust enrichment, waiver of tort (para. 200) and aggregate damages (para. 188).

#### **B. British Columbia Court of Appeal, 2017 BCCA 302, 1 B.C.L.R. (6th) 319 (B.C. C.A.) — per Savage J.A.**

15 Pioneer appealed, arguing the certification judge erred in holding: (1) that the limitation period defence cannot be considered at the certification stage; (2) that it is not plain and obvious that the discoverability rule never applies to the limitation period in s. 36(4)(a)(i) of the *Competition Act*; and (3) that it is not plain and obvious that the doctrine of fraudulent concealment cannot toll the limitation period in this case (para. 45).

16 Toshiba also appealed, arguing the certification judge erred by: (1) recasting the standard for certifying loss as a common issue; (2) holding that a breach of s. 45 of the *Competition Act* can furnish the "unlawfulness" element for common law actions; and (3) allowing the umbrella purchasers' causes of action to proceed (para. 44).

17 The Court of Appeal dismissed both sets of appeals.

(1) *Pioneer's Appeal*

18 Agreeing with the certification judge, the Court of Appeal held that limitations arguments should, generally, not be considered at the certification stage. Further, and that aside, the limitations issue in this case was "intimately connected with the facts of the alleged conspiracy" and should be reserved for trial (paras. 67-68). Alternatively, were discoverability properly considered at the certification stage, it would not be plain and obvious that discoverability does not apply to delay the running of the limitation period in s. 36(4)(a)(i) of the *Competition Act*. While recognizing that some courts have declined to apply discoverability to s. 36(4)(a)(i) (at para. 72), the Court of Appeal read this Court's decision in *Ryan v. Moore*, 2005 SCC 38, [2005] 2 S.C.R. 53 (S.C.C.) , as directing that discoverability applies where the limitation period is explicitly linked to the injured party's knowledge or the basis of the cause of action (para. 89).

19 Further, the certification judge was correct, said the Court of Appeal, to conclude that it is not plain and obvious that the doctrine of fraudulent concealment could not apply (para. 110). Equitable fraud was sufficient to invoke the doctrine, and a purely commercial relationship could support the requirement for a "special relationship" (paras. 102-3) between the parties so as to toll the applicable limitation period. Accordingly, Godfrey's failure to plead a "special relationship" would not preclude the doctrine's application here (para. 104).

(2) *Certifying Loss as a Common Issue*

20 Toshiba argued that, since Dr. Reutter's proposed methodology could neither demonstrate that loss was suffered by each class member nor identify the class members who did not suffer harm, the certification judge erred in certifying questions relating to harm as common questions (para. 113). It also saw error in the certification judge's reference (at para. 169) to the *Class Proceedings Act*'s aggregate damages provisions as supporting the possibility of liability, even where some class members have not demonstrated actual loss.

21 The Court of Appeal rejected these arguments, noting that *Microsoft* allows loss to be certified as a common issue if "the methodology [is] able to establish that the overcharges have been passed on to the indirect-purchaser level in the distribution chain" (para. 149, citing *Microsoft*, at para. 115). Certifying an issue as common does not create an ultimate right to recovery; it is merely a procedural step that does not change the substantive rights of the parties (para. 158). And, while the aggregate damages provisions in the *Class Proceedings Act* are applicable only once liability is established, they do indeed demonstrate that the statute contemplates recovery where certain class members have not proven that they suffered loss (paras. 160-61).

(3) *Unlawfulness Element*

22 The Court of Appeal agreed with the certification judge that a breach of s. 45 of the *Competition Act* could represent the unlawfulness element of the various causes of action advanced by Godfrey (para. 186).

(4) *The Umbrella Purchasers*

23 Here, too, the Court of Appeal found no error in the certification judge's reasons. Umbrella purchasers have a cause of action under s. 36(1)(a) of the *Competition Act* based on a breach of s. 45(1) (paras. 247-48). Toshiba's arguments that the certification judge did not expressly consider whether the umbrella purchasers have claims at common law, and that the certification judge erred in his interpretation of s. 36, were rejected (paras. 188-89).

24 Finally, the Court of Appeal agreed with the certification judge that Toshiba's concerns about indeterminate liability did not support denying certification of the umbrella purchasers' claims. An action under s. 36(1)(a) based on a breach of s. 45(1)

is subject to internal limitations within ss. 36(1) and 45(1) which address indeterminacy such that it does not arise as a concern in this case (paras. 230-31). Further, Toshiba's additional potential liability to the umbrella purchasers would be significantly less, relative to its potential liability to non-umbrella purchasers (para. 236).

#### **IV. Issues on Appeal**

25 Pioneer's appeal raises the issue of whether it is plain and obvious that the claim against it will not succeed because it is statute-barred by s. 36(4)(a)(i) of the *Competition Act*. In answering this question, we must decide:

1. whether the principle of discoverability applies to the limitation period in s. 36(4)(a)(i) of the *Competition Act*; and
2. whether, for fraudulent concealment to toll the limitation period in s. 36(4)(a)(i) of the *Competition Act*, a special relationship between the parties must be established.

26 The appeals, taken together, raise three common issues:

1. whether it is plain and obvious that the umbrella purchasers' claim under s. 36(1)(a) of the *Competition Act* cannot succeed;
2. whether it is plain and obvious that s. 36(1) of the *Competition Act* bars a plaintiff from bringing concurrent common law and equitable claims; and
3. the required standard to certify loss as a common issue, and whether Dr. Reutter's evidence satisfies that standard.

#### **V. Analysis**

27 Section 4(1) of the *Class Proceedings Act* contains the requirements for certification of a class proceeding in British Columbia. At issue is whether Godfrey has satisfied s. 4(1)(a), which requires that the pleadings disclose a cause of action, and s. 4(1)(c), which requires that the claims of the class members raise common issues. The former requirement is satisfied unless, assuming all the facts pleaded to be true, it is plain and obvious that the plaintiff's claim cannot succeed (*Elder Advocates of Alberta Society v. Alberta*, 2011 SCC 24, [2011] 2 S.C.R. 261 (S.C.C.), at para. 20; *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.), at para. 25; *Microsoft*, at para. 63). The latter is satisfied where there is "some basis in fact" to support a common issue (*Hollick*, at para. 25; *Microsoft*, at paras. 99-100).

28 Although at certification the plaintiff must satisfy s. 4(1)'s requirements that I have just described, the standard of review on appeal for each particular question depends on the nature of the question, and will be identified in turn.

##### **A. Pioneer's Appeal**

29 Noting that the alleged conspiracy is said to have ended on January 1, 2010, and that the action against Pioneer was not commenced until August 16, 2013, Pioneer argues that Godfrey's claim is statute-barred, as it was commenced after the two-year limitation period in s. 36(4)(a)(i) of the *Competition Act* expired. As I will explain, I agree that the discoverability rule applies to extend the limitation period in s. 36(4)(a)(i). It is not plain and obvious that Godfrey's claim against Pioneer will fail on this basis. Although it is therefore unnecessary to opine on whether the doctrine of fraudulent concealment would apply, I take this opportunity to briefly discuss why its application is not conditioned upon a special relationship between the parties.

30 Determining whether discoverability applies to the limitation period in s. 36(4)(a)(i) is a question of law subject to a standard of correctness, as is the question of whether fraudulent concealment requires a special relationship to be established between the parties. The applicability of either doctrine is, however (and as noted by the Court of Appeal), "bound up in the facts" and must be left to the certification judge to decide (C.A. reasons, at para. 68).

##### *(1) Discoverability*

###### **(a) Limitation Periods Run From the Accrual or Knowledge of the Cause of Action**

31 This Court has recognized that limitation periods may be subject to a rule of discoverability, such that a cause of action will not accrue for the purposes of the running of a limitation period until "the material facts on which [the cause of action] is based have been discovered or ought to have been discovered by the plaintiff by the exercise of reasonable diligence" (*Central & Eastern Trust Co. v. Rafuse*, [1986] 2 S.C.R. 147 (S.C.C.), at p. 224; *Ryan*, at paras. 2 and 22).

32 This discoverability rule does not apply automatically to every limitation period. While a "rule", it is not a universally applicable rule of *limitations*, but a rule of *construction* to aid in the interpretation of statutory limitation periods (*Peixeiro v. Haberman*, [1997] 3 S.C.R. 549 (S.C.C.), at para. 37). It can therefore be displaced by clear legislative language (*Ermineskin Indian Band & Nation v. Canada*, 2006 FCA 415, [2007] 3 F.C. 245 (F.C.A.), at para. 333, aff'd 2009 SCC 9, [2009] 1 S.C.R. 222 (S.C.C.)). In this regard, many provincial legislatures have chosen to enact statutory limitation periods that codify, limit or oust entirely discoverability's application, particularly in connection with ultimate limitation periods (see e.g. *Limitations Act, 2002*, S.O. 2002, c. 24, Sch. B, ss. 4-5 and 15; *Limitations Act*, R.S.A. 2000, c. L-12, s. 3(1), *Limitation Act*, S.B.C. 2012, c. 13, ss. 6-8 and 21; *The Limitations Act*, S.S. 2004, c. L-16.1, ss. 5-7, *Limitation of Actions Act*, S.N.B. 2009, c. L-8.5, s. 5, *Limitation of Actions Act*, S.N.S. 2014 c. 35, s. 8; see also *Bowes v. Edmonton (City)*, 2007 ABCA 347, 425 A.R. 123 (Alta. C.A.), at paras. 146-58).

33 Further, absent legislative intervention, the discoverability rule applies only where the limitation period in question runs from the accrual of the cause of action, or from some other event that occurs when the plaintiff has knowledge of the injury sustained:

In my opinion, the judge-made discoverability rule is nothing more than a rule of construction. Whenever a statute requires an action to be commenced within a specified time from the happening of a specific event, the statutory language must be construed. When time runs from "the accrual of the cause of action" or from some other event which can be construed as occurring only when the injured party has knowledge of the injury sustained, the judge-made discoverability rule applies. But, when time runs from an event which clearly occurs without regard to the injured party's knowledge, the judge-made discoverability rule may not extend the period the legislature has prescribed. [Emphasis added.]

(*Fehr v. Jacob* (1993), 14 C.C.L.T. (2d) 200 (Man. C.A.), at para. 22, cited in *Peixeiro*, at para. 37.)

34 Two points flow from this statement. First, where the running of a limitation period is contingent upon the accrual of a cause of action or some other event that can occur only when the plaintiff has knowledge of his or her injury, the discoverability principle applies in order to ensure that the plaintiff had knowledge of the existence of his or her legal rights before such rights expire (*Peixeiro*, at para. 39).

35 Secondly (and conversely), where a statutory limitation period runs from an event unrelated to the accrual of the cause of action or which does not require the plaintiff's knowledge of his or her injury, the rule of discoverability will not apply. In *Ryan*, for example, this Court held that discoverability did not apply to s. 5 of the *Survival of Actions Act*, R.S.N.L. 1990, c. S-32, which stated that an action against a deceased could not be brought after one year from the date of death. As the Court explained (para. 24):

The law does not permit resort to the judge-made discoverability rule when the limitation period is explicitly linked by the governing legislation to a fixed event unrelated to the injured party's knowledge or the basis of the cause of action. [Emphasis added; citation omitted.]

By tying, then, the limitation period to an event unrelated to the cause of action, and which did not necessitate the plaintiff's knowledge of an injury, the legislature had clearly displaced the discoverability rule (*Ryan*, at para. 27).

36 In determining whether a limitation period runs from the accrual of a cause of action or knowledge of the injury, such that discoverability applies, substance, not form, is to prevail: even where the statute does not explicitly state that the limitation period runs from "the accrual of the cause of action", discoverability will apply if it is evident that the operation of a limitation period is, in substance, conditioned upon accrual of a cause of action or knowledge of an injury. Indeed, clear statutory text is

necessary to oust its application. In *Peixeiro*, for example, this Court applied the discoverability rule to s. 206(1) of the *Highway Traffic Act*, R.S.O. 1990, c. H.8, which stated that an action must be commenced within two years of the time when "damages were sustained" (para. 2). The use of the phrase "damages were sustained" rather than "when the cause of action arose" was a "distinction without a difference", as it was unlikely that the legislature intended that the limitation period should run without the plaintiff's knowledge (para. 38).

37 It is therefore clear that the "the judge-made discoverability rule will apply when the requisite limitation statute indicates that time starts to run from when the cause of action arose (*or other wording to that effect*)" (G. Mew, D. Rolph and D. Zacks, *The Law of Limitations* (3rd ed. 2016), at p. 103, emphasis added). And, while my colleague Côté J. claims to disagree with my analysis, I am fortified by the endorsement in her reasons of this formulation of discoverability (paras. 140 and 149).

38 The issue raised by this appeal is what constitutes sufficiently clear legislative expression in this regard, such that discoverability will apply. In my view, where the event triggering the limitation period is an element of the cause of action, the legislature has shown its intention that the limitation period be linked to the cause of action's accrual, such that discoverability will apply. As this Court stated in *M. (K.) v. M. (H.)*, [1992] 3 S.C.R. 6 (S.C.C.), the accrual of a cause of action is a "gradatio[n]" (p. 34). Where all the elements of a cause of action occur simultaneously, the cause of action accrues contemporaneously with the occurrence of each element (*M. (K.)*, at p. 34). Where, however, the occurrence of each element is separated in time, the accrual of the cause of action is a continuing (but not continual) process. That is, the cause of action will continue to accrue as each element of the cause of action occurs.

39 This was what the Court in *Ryan* was referring to when it said that discoverability does not apply where the limitation period "is explicitly linked by the governing legislation to a fixed event unrelated to the injured party's knowledge *or the basis of the cause of action*" (para. 24, emphasis added). In *Ryan*, discoverability did not apply because the action was "complete in all its elements" before the operation of the event triggering the limitation period (para. 18). The limitation period was not dependent upon the accrual of the cause of action and thus the limitation period would begin to run independent of the accrual of the cause of action (see *Ryan*, at paras. 16, 18, 20, 29 and 32). Citing the trial judge with approval, the Court added this:

The fact of death is of no relevance to the cause of action in question. It is not an element of the cause of action and is not required to complete the cause of action. Whatever the nature of the cause of action, it is existing and complete before the *Survival of Actions Act* operates, in the case of a death, to maintain it and provide a limited time window within which it must be pursued. The fact of the death is irrelevant to the cause of action and serves only to provide a time from which the time within which to bring the action is to be calculated. [Emphasis added; para. 32.]

40 Had, however, the event triggering the limitation period been an *element* of the cause of action, or had it been required to occur before the cause of action could accrue, discoverability *could* apply (*Ryan*, at paras. 29-30, citing *Burt v. LeLacheur*, 2000 NSCA 90, 189 D.L.R. (4th) 193 (N.S. C.A.)). I do not see my colleague Côté J. as disagreeing on this point: she is quite right when she says that "the words 'basis of the cause of action' in para. 24 of *Ryan* should be understood as essentially synonymous with the 'arising or accrual of the cause of action'" (para. 148). As this Court held in *Peixeiro*, where the limitation period is based on an event that can be construed as synonymous with the accrual of the cause of action, discoverability will apply (para. 38).

41 From all this, it is evident that discoverability continues to apply where the legislature has shown its intent that a limitation period shall run from "when the cause of action arose (or other wording to that effect)" or where the event triggering the limitation period requires the plaintiff's knowledge of his or her injury (Mew et al., at p. 103). Conversely, discoverability does not apply where that triggering event does not depend on the plaintiff's knowledge or is independent of the accrual of the cause of action. This is not, as my colleague suggests, a modified test for discoverability (para. 154), but rather is the product of this Court's application of *Fehr* in *Peixeiro* (regarding when discoverability *does* apply) and *Ryan* (regarding when discoverability *does not* apply).

## (b) The Statutory Scheme, and the Objects of Statutory Limitation Periods

42 Bearing in mind that, as I have explained, the discoverability rule is a rule of *construction*, its application depends on an examination of the pertinent statutory text to assess what triggers the running of the limitation period in question, supplemented by consideration of the statutory scheme within which it operates, and of the legislature's purpose in enacting limitation periods (*Rizzo & Rizzo Shoes Ltd., Re*, [1998] 1 S.C.R. 27 (S.C.C.), at para. 21).

43 Turning first to the statutory text, the relevant provisions of s. 36 of the *Competition Act* state:

**36 (1)** Any person who has suffered loss or damage as a result of

(a) conduct that is contrary to any provision of Part VI, ...

.....

may, in any court of competent jurisdiction, sue for and recover from the person who engaged in the conduct or failed to comply with the order an amount equal to the loss or damage proved to have been suffered by him, together with any additional amount that the court may allow not exceeding the full cost to him of any investigation in connection with the matter and of proceedings under this section.

.....

**(4)** No action may be brought under subsection (1),

(a) in the case of an action based on conduct that is contrary to any provision of Part VI, after two years from

(i) a day on which the conduct was engaged in, or

(ii) the day on which any criminal proceedings relating thereto were finally disposed of,

whichever is the later ....

44 The text of s. 36(4)(a)(i) provides that no action may be brought under s. 36(1)(a) after two years from a day *on which conduct contrary to Part VI occurred*. From this, it is clear that the event triggering this particular limitation period is an element of the underlying cause of action. That is, the limitation period in s. 36(4)(a)(i) is triggered by the occurrence of an element of the underlying cause of action — specifically, conduct contrary to Part VI of the *Competition Act*. Therefore, it is subject to discoverability (*Fanshawe College of Applied Arts and Technology v. AU Optronics Corp.*, 2016 ONCA 621, 132 O.R. (3d) 81 (Ont. C.A.), at para. 18).

45 The scheme of s. 36(4) also supports the view that discoverability was intended to apply to the limitation period in s. 36(4)(a)(i). Section 36(4)(a) sets out two limitation periods — s. 36(4)(a)(i), which runs from the day on which the conduct occurred and s. 36(4)(a)(ii), which runs from the day on which criminal proceedings are disposed of. The applicable limitation period is whichever event occurs later. Pioneer argues that Parliament enacted s. 36(4)(a)(ii) to revive a cause of action where the limitation period has expired under s. 36(4)(a)(i), which revival would mitigate any unfairness created by the operation of the limitation period in s. 36(4)(a)(i) (A.F. (Pioneer), at para. 92). I do not view s. 36(4)(a)(ii)'s operation in this way. It is simply an example of a limitation period to which discoverability does not apply because, as the Court of Appeal for Ontario said in *Fanshawe College of Applied Arts and Technology*, the event triggering the limitation period under s. 36(4)(a)(ii) — the disposition of criminal proceedings — is "not connected to a plaintiff's cause of action or knowledge" (para. 47). When s. 36(4)(a)(i) is contrasted with s. 36(4)(a)(ii), it is likely that Parliament intended that discoverability apply to the former limitation period and not the latter. Further, where criminal proceedings are *not* brought against a wrongdoer, the putative mitigating effect of s. 36(4)(a)(ii) would be of no assistance to plaintiffs whose right of action has expired by operation of s. 36(4)(a)(i).

46 So much for the statutory text and scheme. I turn, then, to consider this limitation period's relation to the overall object of the *Competition Act*, which is to "maintain and encourage competition in Canada in order to promote the efficiency and adaptability of the Canadian economy ... and in order to provide consumers with competitive prices and product choices" (*Competition Act*, s. 1.1). Anti-competitive agreements — which represent "conduct that is contrary to ... Part VI" (s. 36(1)(a)) — are invariably conducted through secrecy and deception (*Fanshawe College of Applied Arts and Technology*, at para. 46; C.A. reasons, at para.

93), meaning that they are, by their very nature, *unknown* to s. 36(1)(a) claimants. Parliament would have known this when enacting the limitation provision contained in s. 36(4)(a)(i). It would therefore be absurd, and would render the cause of action granted by s. 36(1)(a) almost meaningless, to state that Parliament did not intend for discoverability to apply, such that the plaintiff's right of action would expire prior to his or her acquiring knowledge of the anti-competitive behaviour. I agree with the Court of Appeal that "it cannot be said that Parliament intended to accord such little weight to the interests of injured plaintiffs in the context of alleged conspiracies so as to exclude the availability of the discoverability rule in s. 36(4)" (C.A. reasons, at para. 93).

47 The application of discoverability to the limitation period in s. 36(4)(a)(i) is also supported by the object of statutory limitation periods. This Court has recognized that three rationales underlie limitation periods (*M. (K.)*, at pp. 29-31), which courts must consider in deciding whether the discoverability rule applies to a particular limitation period. The first is that limitation periods foster *certainty*, in that "[t]here comes a time ... when a potential defendant should be secure in his reasonable expectation that he will not be held to account for ancient obligations" (*M. (K.)*, at p. 29). This concern must be balanced against the unfairness of allowing a wrongdoer to escape liability while the victim of injury continues to suffer the consequences (*M. (K.)*, at p. 29). The second rationale is *evidentiary*: limitation periods are intended to help prevent evidence from going stale, to the detriment of the plaintiff or the defendant (*M. (K.)*, at p. 30). Finally, limitation periods serve to encourage *diligence* on the part of plaintiffs in pursuing their claims (*M. (K.)*, at p. 30).

48 Consideration of these rationales for limitation periods affirms discoverability's application here. Even recognizing that shorter limitation periods indicate that Parliament put a premium on the certainty that comes with a limitation statute's function of repose (*Peixeiro*, at para. 34), balancing all of the competing interests underlying s. 36(4)(a)(i) weighs in favour of applying discoverability. The ability of plaintiffs to advance claims for loss arising from conduct contrary to Part VI of the *Competition Act* outweighs defendants' interests in barring them, especially where such conduct is, as I have already noted, concealed from plaintiffs (*Fanshawe College of Applied Arts and Technolog*, at para. 46) (such that the evidentiary rationale — that is, the concern about evidence going "stale" — has no place in the analysis). To hold otherwise would create perverse incentives, encouraging continued concealment of anti-competitive behaviour until the two-year limitation period has elapsed. It would therefore not only bar plaintiffs from pursuing their claims, but reward concealment that has been "particularly effective" (*Fanshawe College of Applied Arts and Technolog*, at para. 49).

49 In contrast, applying discoverability to s. 36(4)(a)(i) would not unduly affect the defendant's interests, as discoverability does not excuse the plaintiff from moving matters along, such that the rationale of encouraging diligence is still served (*Peixeiro*, at para. 39). Where plaintiffs sleep on their rights or otherwise do not diligently pursue their claims, discoverability will not operate to extend the limitation period (Mew et al., at p. 83).

50 For all of these reasons, I find that the discoverability rule applies to the limitation period in s. 36(4)(a)(i), such that it begins to run only when the material facts on which Godfrey's claim is based were discovered by him or ought to have been discovered by him by the exercise of reasonable diligence.

## (2) Fraudulent Concealment

51 In light of my finding that discoverability applies to s. 36(4)(a)(i), it is, strictly speaking, unnecessary to consider the doctrine of fraudulent concealment. Given, however, the submissions and attention given to this issue at the courts below, I will comment briefly here on whether fraudulent concealment requires establishing a special relationship between the parties.

52 Fraudulent concealment is an equitable doctrine that prevents limitation periods from being used "as an instrument of injustice" (*M. (K.)*, at pp. 58-59). Where the defendant fraudulently conceals the existence of a cause of action, the limitation period is suspended until the plaintiff discovers the fraud or ought reasonably to have discovered the fraud (*Guerin v. R.*, [1984] 2 S.C.R. 335 (S.C.C.), at p. 390). It is a form of "equitable fraud" (*Guerin*, at p. 390; *M. (K.)*, at pp. 56-57), which is not confined to the parameters of the common law action for fraud (*M. (K.)*, at p. 57). As Lord Evershed, M.R. explained in *Kitchen v. Royal Air Force Assn.*, [1958] 2 All E.R. 241 (Eng. C.A.), at p. 249, cited in *M. (K.)*, at pp. 56-57:

It is now clear ... that the word "fraud" in s. 26(b) of the *Limitation Act, 1939*, is by no means limited to common law fraud or deceit. Equally, it is clear, having regard to the decision in *Beaman v. A.R.T.S., Ltd.*, [1949] 1 All E.R. 465, that no degree of moral turpitude is necessary to establish fraud within the section. What is covered by equitable fraud is a matter which Lord Hardwicke did not attempt to define two hundred years ago, and I certainly shall not attempt to do so now, but it is, I think, clear that the phrase covers conduct which, having regard to some special relationship between the two parties concerned, is an unconscionable thing for the one to do towards the other. [Emphasis added.]

53 While it is therefore clear that equitable fraud *can* be established in cases where a special relationship subsists between the parties, Lord Evershed, M.R. did not limit its establishment to such circumstances, nor did he purport to define exhaustively the circumstances in which it would or would not apply (see *Photinopoulos v. Photinopoulos*, 1988 ABCA 352, 92 A.R. 122 (Alta. C.A.), at para. 10). Indeed, he expressly refused to do so: "[w]hat is covered by equitable fraud is a matter which Lord Hardwicke did not attempt to define two hundred years ago, and *I certainly shall not attempt to do so now*" (*Kitchen*, at p. 249, emphasis added).

54 When, then, does fraudulent concealment arise so as to delay the running of a limitation period? Recalling that it is a form of *equitable* fraud, it becomes readily apparent that what matters is *not* whether there is a *special relationship* between the parties, but whether it would be, for *any* reason, *unconscionable* for the defendant to rely on the advantage gained by having concealed the existence of a cause of action. This was the Court's point in *Performance Industries Ltd. v. Sylvan Lake Golf & Tennis Club Ltd.*, 2002 SCC 19, [2002] S.C.R. 678 (S.C.C.), at para. 39:

[Equitable fraud] "... refers to transactions falling short of deceit but where the Court is of the opinion that it is unconscientious for a person to avail himself of the advantage obtained" (p. 37). Fraud in the "wider sense" of a ground for equitable relief "is so infinite in its varieties that the Courts have not attempted to define it", but "all kinds of unfair dealing and unconscionable conduct in matters of contract come within its ken" [Emphasis added.]

It follows that the concern which drives the application of the doctrine of equitable fraud is not limited to the unconscionability of taking advantage of a special relationship with the plaintiff. Nor is the doctrine's application limited, as my colleague suggests, to cases where there is something "tantamount to or commensurate with" a special relationship between the plaintiff and the defendant (paras. 171 and 173-74). While a special relationship is a means by which a defendant might conceal the existence of a cause of action, equitable fraud may also be established by pointing to other forms of unconscionable behaviour, such as (for example) "some abuse of a confidential position, some intentional imposition, or some deliberate concealment of facts" (*M. (K.)*, at p. 57, citing *Halsbury's Laws of England* (4th ed. 1979), vol. 28, para. 919). In short, the inquiry is not into the *relationship* within which the conduct occurred, but into the *unconscionability* of the conduct itself.

55 The question of whether Pioneer's alleged conduct amounts to fraudulent concealment will, of course, fall to be decided by a trial judge. Nevertheless, I agree with the Court of Appeal and the certification judge that it is not "plain and obvious" that fraudulent concealment could not delay the running of the limitation period in this case (C.A. reasons, at para. 110).

#### **B. Umbrella Purchasers' Cause of Action Under Section 36(1) of the Competition Act**

56 Toshiba argues that the certification judge erred by certifying the umbrella purchasers' claims brought under s. 36(1)(a) of the *Competition Act*. For the following reasons, I disagree.

57 Whether umbrella purchasers have a cause of action under s. 36(1)(a) of the *Competition Act* is a question of law, reviewable on a standard of correctness. Since, as I explain below, I have concluded that umbrella purchasers *do* have a cause of action under s. 36(1)(a), it is *not* plain and obvious that their claim cannot succeed. Godfrey's pleadings disclose a cause of action for umbrella purchasers, thereby satisfying the conditions under s. 4(1)(a) of the *Class Proceedings Act* for certification.

58 The theory behind holding price-fixers liable to umbrella purchasers — who, it will be recalled are in this case persons who purchased ODDs or ODD products neither manufactured nor supplied by the defendants — is that the defendants' anti-competitive cartel activity creates an "umbrella" of supra-competitive prices, causing non-cartel manufacturers to raise their

prices (*Shah v. LG Chem, Ltd.*, 2015 ONSC 6148, 390 D.L.R. (4th) 87 (Ont. S.C.J.) ("Shah (Ont. S.C.J.)"), at para. 159). Additionally, the European Court of Justice in *Kone AG and Others v. ÖBB-Infrastruktur AG*, C-557/12, ECLI:EU:C:2014:1317, explained umbrella pricing as:

Where a cartel manages to maintain artificially high prices for particular goods and certain conditions are met, relating, in particular, to the nature of the goods or the size of the market covered by that cartel, it cannot be ruled out that a competing undertaking, outside the cartel in question, might choose to set the price of its offer at an amount higher than it would have chosen under normal conditions of competition, that is, in the absence of that cartel. In such a situation, even if the determination of an offer price is regarded as a purely autonomous decision, taken by the undertaking not party to a cartel, it must none the less be stated that such a decision has been able to be taken by reference to a market price distorted by that cartel and, as a result, contrary to the competition rules. [Emphasis added; para. 29.]

59 In short, a rising tide lifts all boats; under the theory of umbrella pricing, the entire market for the subject product is affected:

Umbrella effects typically arise when price increases lead to a diversion of demand to substitute products. Because successful cartels typically reduce quantities and increase prices, this diversion leads to a substitution away from the cartels' products toward substitute products produced by cartel outsiders.... [T]he increase demand for substitutes typically leads to higher prices for the substitute products. Such price increases are called umbrella effects and may arise either in the same relevant market ... or in neighboring markets.

(R. Inderst, F. Maier-Rigaud & U. Schwalbe, "Umbrella Effects" (2014) 10 *J. Competition L. & Econ.* 739, at p. 740.)

60 Several decisions of lower courts have certified umbrella purchaser actions brought under s. 36(1)(a) without expressly considering whether such purchasers had a cause of action (see: *Fairhurst v. Anglo American PLC*, 2014 BCSC 2270 (B.C. S.C.); *Pro-Sys Consultants Ltd. v. Infineon Technologies AG*, 2009 BCCA 503, 98 B.C.L.R. (4th) 272 (B.C. C.A.); *Irving Paper Ltd. v. Atofina Chemicals Inc.* (2009), 99 O.R. (3d) 358 (Ont. S.C.J.); *Crosslink Technology Inc. v. BASF Canada*, 2014 ONSC 1682, 54 C.P.C. (7th) 111 (Ont. S.C.J.)). Appellate decisions in British Columbia and Ontario have, however, expressly considered the issue and concluded that they *do* (see: C.A. reasons, at para. 247; *Shah v. LG Chem Ltd.*, 2018 ONCA 819, 142 O.R. (3d) 721 (Ont. C.A.) ("Shah (ONCA)"), at para. 52).

61 Whether umbrella purchasers have a cause of action under s. 36(1)(a) of the *Competition Act* is a question of statutory interpretation. The text of s. 36(1)(a) must therefore be read in its entire context and in its grammatical and ordinary sense, harmoniously with the scheme and objects of the *Competition Act*.

#### (I) Text of Section 36(1)

62 As already noted, s. 36(1)(a) of the *Competition Act* creates a statutory cause of action which allows for the recovery of damages or loss that resulted from conduct contrary to Part VI. The relevant portion states:

#### Recovery of damages

**36 (1)** Any person who has suffered loss or damage as a result of

**(a)** conduct that is contrary to any provision of Part VI...

may ... sue for and recover from the person who engaged in the conduct ... an amount equal to the loss or damage proved to have been suffered by him, together with any additional amount that the court may allow not exceeding the full cost to him of any investigation in connection with the matter and of proceedings under this section.

63 Godfrey relies on "conduct that is contrary to ... Part VI" ("Offences in Relation to Competition"), since he alleges that Toshiba acted contrary to ss. 45(1)(b), (c), and (d) of the *Competition Act*. During the class period<sup>1</sup>, s. 45(1) stated:

#### Conspiracy

45 (1) Every one who conspires, combines, agrees or arranges with another person

.....

- (b) to prevent, limit or lessen, unduly, the manufacture or production of a product or to enhance unreasonably the price thereof,
- (c) to prevent or lessen, unduly, competition in the production, manufacture, purchase, barter, sale, storage, rental, transportation or supply of a product, or in the price of insurance on persons or property, or
- (d) to otherwise restrain or injure competition unduly,

is guilty of an indictable offence and liable to imprisonment for a term not exceeding five years or to a fine not exceeding one million dollars or to both.

64 The text of s. 36(1)(a) supports the view that umbrella purchasers have a cause of action thereunder for conduct contrary to s. 45(1) of the *Competition Act*. Section 36(1)(a) provides a cause of action to *any person* who has *suffered loss or damage* as a result of conduct contrary to s. 45. Significantly, Parliament's use of "any person" does not narrow the realm of possible claimants. Rather, it empowers *any* claimant who can demonstrate that loss or damage was incurred as a result of the defendant's conduct to bring a claim. On this point, the following paragraph from the Court of Appeal for Ontario's decision in *Shah (ONCA)* (at para. 34) is apposite, and I adopt it as mine:

On a plain reading, if the umbrella purchasers can prove loss resulting from a proven conspiracy under s. 45, s. 36(1) grants those purchasers a statutory means by which to recover those losses. Taking the language at face value, the umbrella purchasers' right of recovery is limited only by their ability to demonstrate two things: (1) that the respondents conspired within the meaning of s. 45; and (2) that the losses or damages suffered by the appellants resulted from that conspiracy.

(2) *Purpose of the Competition Act*

65 As I have already recounted, the purpose of the *Competition Act* is to "maintain and encourage competition in Canada" with a view to providing consumers with "competitive prices and product choices" (s. 1.1). A conspiracy to price-fix is the "very antithesis of the *Competition Act's* objective" (*Shah (ONCA)*, at para. 38). Monetary sanctions for such anti-competitive conduct therefore further the *Competition Act's* purpose. This Court has also recognized two other objectives of the *Competition Act* of particular relevance here, being deterrence of anti-competitive behaviour, and compensation for the victims of such behaviour (*Option consommateurs c. Infineon Technologies AG*, 2013 SCC 59, [2013] 3 S.C.R. 600 (S.C.C.) ("Infineon"), at para. 111; *Sun-Rype Products Ltd. v. Archer Daniels Midland Co.*, 2013 SCC 58, [2013] 3 S.C.R. 545 (S.C.C.) ("Sun-Rype"), at paras. 24-27; *Microsoft*, at paras. 46-49). Interpreting s. 36(1)(a) so as to permit umbrella purchaser actions furthers both of these objectives.

66 Allowing umbrella purchaser actions furthers deterrence because it increases the potential liability falling upon those who engage in anti-competitive behaviour (*Shah (ONCA)*, at para. 38). Here, Godfrey alleges that four of the named defendants controlled 94% of the global ODD market (A.R., vol. II, at para. 70). While this means that Toshiba's potential liability to the umbrella purchasers would only marginally increase its existing liability to non-umbrella purchasers, I accept that any increase in potential liability will likely carry a correspondingly deterrent effect.

67 The objective of compensation is also furthered by allowing umbrella purchaser actions, because doing so affords umbrella purchasers recourse to recover from loss arising from what, for the purposes of these appeals, is assumed to have been anti-competitive conduct. Barring a class of purchasers who were, on the theory pleaded, intended by the defendants to pay higher prices as a result of their price-fixing is inconsistent with the compensatory goal of the *Competition Act*.

68 Relatedly, and while far from determinative, departmental and parliamentary statements fortify my view that Parliament intended that the cause of action in s. 36(1)(a) be broadly available, such that anyone who suffers a loss from anti-competitive behaviour could bring a private action. The briefing document accompanying the first stage of the modernization amendments (which introduced the original civil remedies provision) stated:

Under the existing law there is no civil recourse under the Act for persons injured by reason of the fact that others have participated in violation of the Combines Investigation Act. The provision dealing with civil damages, although it is expected to be of particular value to small businessmen who have been hurt by conduct contrary to the Act, will be equally available to consumers and to any other members of the public who have been so damaged.

The amendment provides that anyone who has suffered loss or damage because of such a violation ... may ... sue for and be awarded damages equal to the actual loss incurred .... [Emphasis added.]

(Consumer and Corporate Affairs Canada, *Proposals for a New Competition Policy for Canada* (1973), at pp. 48-49)

This is further supported by parliamentary committee discussions on the introduction of a private cause of action. In committee, the responsible minister explicitly stated that there was no reason to limit consumers' recourse under the private cause of action to direct loss or damage (House of Commons, Standing Committee on Finance, Trade and Economic Affairs, *Minutes of Proceedings and Evidence*, 1st Sess., 50th Parl., May 8 1975, at p. 45:18).

### (3) Indeterminate Liability

69 Toshiba argues that recognizing the umbrella purchasers as having a cause of action would expose Toshiba to a "potentially limitless scope of liability" (A.F. (Toshiba), at para. 97). This raises the question, first of all, of whether indeterminate liability is relevant *at all* to deciding the scope of possible s. 36(1)(a) claimants for conduct contrary to s. 45(1) of the *Competition Act*. On this point, the Court of Appeal considered that it might be relevant (on the express assumption that concerns about indeterminate liability might properly be considered outside the context of a negligence action) (C.A. reasons, at para. 227). I note, parenthetically, that whether that assumption is valid — that is, whether indeterminate liability might properly be considered *at all* in the context of a claim under s. 36(1)(a) of the *Competition Act* — I am content to leave for another day since, for the reasons that follow, I am of the view that indeterminate liability would not arise in this case in any event.

70 Toshiba argues that indeterminate liability is a relevant consideration here because the umbrella purchasers seek to recover for pure economic loss. Toshiba relies upon this Court's statement in *Knight v. Imperial Tobacco Canada Ltd.*, 2011 SCC 42, [2011] 3 S.C.R. 45 (S.C.C.), that "[t]he risk of indeterminate liability is enhanced by the fact that the claims are for pure economic loss" (para. 100). In *Imperial Tobacco*, a class proceeding was brought against Imperial Tobacco by persons who purchased "light" or "mild" cigarettes. Imperial Tobacco issued third-party notices to the Government of Canada, alleging it was liable to tobacco companies for, *inter alia*, negligent misrepresentation. This Court held that "the prospect of indeterminate liability is fatal to the tobacco companies' claims of negligent misrepresentation", since "Canada had no control over the number of people who smoked light cigarettes" (para. 99). Similarly, Toshiba argues that it had no control over the quantity of ODDs sold to the umbrella purchasers by non-defendant manufacturers or the number of purchasers to whom it may be liable, such that the extent of its liability is indeterminate (A.F. (Toshiba), at para. 102).

71 Several features of this case, however, lead me to the view that recognizing the umbrella purchasers' cause of action under s. 36(1)(a) does not risk exposing Toshiba to indeterminate liability.

72 First, Toshiba's liability is limited by the class period, and by the specific products whose prices are alleged to have been fixed. Whereas in *Imperial Tobacco*, Canada had no control over who smoked light cigarettes (para. 99), the theory of umbrella effects links the pricing decisions of the non-defendant manufacturers to Toshiba's anti-competitive behaviour (C.A. reasons, at para. 239). I have already noted that Godfrey's pleadings allege that, during the class period, four of the named defendants collectively controlled 94% of the global ODD market. Godfrey also alleges that Toshiba intended to raise prices across that market (A.R., vol. II, at pp. 21-22). This allegation is rooted in the theory that, in order for Toshiba to profit from the conspiracy, the entire market price for ODDs had to increase. Otherwise, Toshiba would have lost market share to non-defendant manufacturers (Transcript, at pp. 56-57, A.R., vol. III, at p. 166).

73 This supports the submission made before us by Godfrey's counsel that umbrella effects are "not just a known and foreseeable consequence of what the defendants are doing, it's an intended consequence" (Transcript, at p. 61). The point is that

the results of Toshiba's alleged anti-competitive behaviour are not indeterminate. Intended results are *not indeterminate*, but *pre-determined*. I therefore agree with the Court of Appeal that there is "no reason why defendants who intend to inflict damage on umbrella purchasers should be exonerated from liability on the basis that they exercised no control over their liability" (C.A. reasons, at para. 241).

74 Secondly, and as I have already recounted, s. 36(1)(a) limits recovery to only those purchasers who can show that they suffered a loss or damage "as a result of" the defendants' conspiratorial conduct. In order to recover under s. 36(1)(a), then, the umbrella purchasers will have to demonstrate that Toshiba engaged in anti-competitive behaviour, that the umbrella purchasers suffered "loss or damage", and that such loss or damage was "as a result of" such behaviour. The statutory text "as a result of" imports both factual and legal causation into s. 36(1). Recovery under s. 36(1) is therefore limited to claimants with a loss that is not too remote from the conduct.

75 Thirdly, the text of s. 45(1) in force during the class period is instructive. The elements of the wrongful conduct outlined therein were described by the British Columbia Court of Appeal in *Watson* (at paras. 73-74):

[T]he *actus reus* elements of former s. 45 are:

- i) the defendant conspired, combined, agreed, or arranged with another person; and
- ii) the agreement was to enhance unreasonably the price of a product, to lessen unduly the supply of a product, or to otherwise restrain or injure competition unduly.

The *mens rea* element of former s. 45 as defined in *R. v. Nova Scotia Pharmaceutical Society*, [1992] 2 S.C.R. 606, at 659-660, (1992) 93 D.L.R. (4th) 36, requires:

- i) the defendant had a subjective intention to agree and was aware of the agreement's terms; and
- ii) the defendant had the required objective intention, that is, a reasonable business person would or should be aware that the likely effect of the agreement would be to lessen competition unduly.

See also: *Shah (ONCA)*, at para. 50; *R. c. Proulx*, 2016 QCCA 1425 (C.A. Que.), at para. 20.

While the subjective *mens rea* does not require that the defendants' conduct be directed specifically towards the claimant, s. 45(1) "limits the reach of liability to those who, at a minimum, specifically intend to agree upon anti-competitive conduct" (*Shah (ONCA)*, at para. 51).

76 Taken together, these features of ss. 36(1)(a) and 45(1) of the *Competition Act* limit the availability of this cause of action to those claimants who can demonstrate: (1) a causal link between the loss suffered and the conspiratorial conduct; and (2) that the defendants' conduct satisfies the *actus reus* and *mens rea* elements of s. 45(1) of the *Competition Act*.

77 This is not to say that umbrella purchasers' actions will not be complex or otherwise difficult to pursue. Marshalling and presenting evidence to satisfy the conditions placed by Parliament on recovery under ss. 36(1)(a) and 45(1) — showing a causal link between loss and conspiratorial conduct, and proving the *actus reus* and *mens rea* of s. 45(1) — represents a significant burden. That said, this Court's statement in *Microsoft* (at paras. 44-45) regarding indirect purchaser claims is, in my view, equally applicable to claims brought by umbrella purchasers:

Indirect purchaser actions, especially in the antitrust context, will often involve large amounts of evidence, complex economic theories and multiple parties in a chain of distribution, making the tracing of the overcharges to their ultimate end an unenviable task. However, ... these same concerns can be raised in most antitrust cases, and should not stand in the way of allowing indirect purchasers an opportunity to make their case. ...

In bringing their action, the indirect purchasers willingly assume the burden of establishing that they have suffered loss. This task may well require expert testimony and complex economic evidence. Whether these tools will be sufficient to

meet the burden of proof, in my view, is a factual question to be decided on a case-by-case basis. Indirect purchaser actions should not be barred altogether solely because of the likely complexity associated with proof of damages.

And, of course, in this case it will be for the trial judge to determine whether the umbrella purchaser claimants have presented sufficient evidence to establish that, in the circumstances of the case and in the relevant market, Toshiba caused umbrella pricing.

78 In view of the foregoing, it is not plain and obvious that the umbrella purchasers' cause of action under s. 36(1)(a) of the *Competition Act* cannot succeed, and I would reject this ground of appeal.

### **C. Section 36(1) of the Competition Act Does Not Bar Common Law or Equitable Claims**

79 In addition to his statutory claims under the *Competition Act*, Godfrey advances claims in, *inter alia*, civil conspiracy.

80 Toshiba argues that the courts below erred in two respects concerning the relationship between a statutory claim under the *Competition Act* and the tort of civil conspiracy. First, it says that the tort of civil conspiracy based on a breach of the predecessor statute to the *Competition Act* (the *Combines Investigation Act*, R.S.C. 1970, c. C-23) was never available to plaintiffs prior to the enactment in 1975 of the private right of action. Secondly, and in any event, the courts below failed to recognize that, by legislating ss. 36(1) and 45(1) of the *Competition Act*, Parliament intended to oust the common law tort of civil conspiracy (A.F. (Toshiba), at para. 119).

81 These arguments raise questions of law, and are therefore reviewed on a standard of correctness. For the reasons below, I reject both arguments, and it is therefore not plain and obvious that Godfrey's common law and equitable claims cannot succeed, except as was otherwise held by the certification judge<sup>2</sup>.

#### *(1) The Tort of Civil Conspiracy Based on the Breach of a Statute Existed Prior to the Enactment of the Statutory Cause of Action*

82 To be clear, I do not dispute Toshiba's submission that the 1975 amendments were significant. The predecessor to the *Competition Act* (the *Combines Investigation Act*) was exclusively penal — indeed, its constitutionality as an exercise of Parliament's legislative authority over the criminal law was upheld in *Proprietary Articles Trade Assn. v. Canada (Attorney General)*, [1931] A.C. 310 (Jud. Com. of Privy Coun.). In 1975, Parliament supplemented this penal function with regulatory and civil enforcement provisions, including a civil remedy provision (now s. 36(1)) (*Watson*, at para. 36).

83 All this said, our law had recognized the tort of civil conspiracy based on the breach of a statute long before Parliament legislated a civil right of action in 1975. In *I.B. of T.C.W. & H. of A., Local 213 v. Therien*, [1960] S.C.R. 265 (S.C.C.), and *Gagnon v. Foundation Maritime Ltd.*, [1961] S.C.R. 435 (S.C.C.), this Court imposed liability on trade unions for unlawful means conspiracy for conduct prohibited by statute (*Therien*, at p. 280; *Gagnon*, at p. 446). And, in *Canada Cement Lafarge Ltd. v. British Columbia Lightweight Aggregate Ltd.*, [1983] 1 S.C.R. 452 (S.C.C.), which was decided on the basis of the *Combines Investigation Act*, this Court affirmed not only the existence of the tort of civil conspiracy, but also that a breach of the *Combines Investigation Act* could satisfy the "unlawful" element of unlawful means conspiracy (pp. 471-72). Any question on this point was settled when *Lafarge* was cited in *Bram Enterprises Ltd. v. A.I. Enterprises Ltd.*, 2014 SCC 12, [2014] 1 S.C.R. 177 (S.C.C.), at para. 64, for the same proposition — that a breach of statute could satisfy the "unlawful means" component of the tort of unlawful means conspiracy.

84 The law admits of no ambiguity on this point. Prior to the enactment of the cause of action contained in what is now s. 36(1) of the *Competition Act*, a breach of s. 45(1) of the *Competition Act* was, as it still is, able to satisfy the "unlawful means" element of the tort of civil conspiracy.

#### *(2) The Enactment of the Statutory Cause of Action Did Not Oust Common Law and Equitable Actions*

85 Turning to Toshiba's other argument, the starting point in deciding whether a common law right of action has been legislatively ousted is the presumption that Parliament does not intend to abrogate common law rights (R. Sullivan, *Sullivan on the Construction of Statutes* (6th ed. 2014), at p. 538). While s. 36(1) does not by its express terms oust common law causes

of action, legislation may rebut this presumption by ousting the common law either expressly or by necessary implication (*Gendron v. Supply & Services Union of the P.S.A.C., Local 50057*, [1990] 1 S.C.R. 1298 (S.C.C.), at pp. 1315-16).

86 In *Gendron*, this Court held, for three reasons, that the *Canada Labour Code*, R.S.C. 1970, c. L-1 (as amended by S.C. 1972, c. 18; S.C. 1977-78, c. 27) ousted the common law duty of fair representation by necessary implication. First, the content of the duty in the *Canada Labour Code* was co-extensive with the common law duty such that "[t]he common law duty is ... not in any sense additive; it is merely duplicative" (p. 1316). Secondly, in enacting the *Canada Labour Code*, Parliament enacted a comprehensive and exclusive code, which indicated an intention for the *Canada Labour Code* to "occupy the whole field in terms of a determination of whether or not a union has acted fairly" (p. 1317). Finally, the *Canada Labour Code* provided a "new and superior method of remedying a breach" of the duty of fair representation (p. 1319).

87 None of these considerations apply to s. 36(1) of the *Competition Act*, relative to the common law tort of civil conspiracy. Section 36(1) is neither duplicative of the tort of civil conspiracy nor does it provide a "new and superior" remedy. Claims under s. 36(1) are subject to the limitation period stated in s. 36(4), whereas the tort of civil conspiracy is subject to provincial limitations statutes. Additionally, the tort of civil conspiracy allows for a broader range of remedies than is available under s. 36(1), such as punitive damages (*Watson*, at para. 57).

88 Nor does s. 36(1) represent a comprehensive and exclusive code regarding claims for anti-competitive conspiratorial conduct. That this is so is made plain by s. 62 of the *Competition Act* ("Civil rights not affected") which contemplates the subsistence of common law and equitable rights of action by providing that "nothing in this Part [which includes s. 45(1), in respect of which s. 36(1) creates a statutory right of action] shall be construed as depriving any person of any civil right of action." This is also consistent with this Court's conclusion in *Infineon* (at para. 95) that it was open for a plaintiff to proceed with its claim under art. 1457 of the *Civil Code of Québec* ("C.C.Q.") for the alleged violation of s. 45(1) of the *Competition Act*. Were s. 36(1) a complete and exclusive code, no such claim under the C.C.Q. would have been possible.

89 I therefore would reject this ground of appeal. The courts below correctly decided that it is not plain and obvious that Godfrey is precluded from bringing common law and equitable causes of action alongside his s. 36(1)(a) claim. Additionally, a breach of s. 45(1) of the *Competition Act* can supply the "unlawful" element of the tort of civil conspiracy. I see nothing in my colleague's reasons (at paras. 193-203) that deviates in any respect from my own on this point.

#### **D. Certifying Loss as a Common Issue**

90 Toshiba's final ground of appeal relates to the requirement in s. 4(1)(c) of the *Class Proceedings Act* that class members' claims raise common issues.

91 Godfrey sought to certify several loss-related questions as common issues, principally whether the class members suffered economic loss. (Sup. Ct. reasons, at para. 143). These questions were stated broadly enough that they could be taken as asking whether *all* class members suffered economic loss or whether *any* class members suffered economic loss. And, because they could be taken in two different ways they might, following the common issues trial, be answered in different ways.

92 The certification judge certified the common issues relating to loss on the basis that the standard outlined in *Microsoft* requires that a plaintiff's expert methodology need only establish loss at the indirect-purchaser level (Sup. Ct. reasons, at paras. 167 and 179). The questions, therefore, of whether *any* class members suffered loss and of whether *all* class members suffered loss, fulfill the requirements of a common question. Toshiba says that he erred, and argues that *Microsoft* requires, for loss to be certified as a common issue, that a plaintiff's expert's methodology be capable either of showing loss to *each and every class member*, or of distinguishing between those class members who suffered loss from those who did not (A.F. (Toshiba), at para. 63). Dr. Reutter's methodology, Toshiba says, does not meet this standard (A.F. (Toshiba), at para. 76).

93 Godfrey responds that the courts below correctly held that *Microsoft* requires, as a condition of certifying loss as a common issue, only a methodology capable of establishing that overcharges were passed on to the indirect-purchaser level (R.F. (Toshiba Appeal), at para. 93). This standard is consistent with the principles underlying the commonality requirement,

since a single answer to whether loss reached the indirect-purchaser level significantly advances the litigation. Dr. Reutter's methodology meets this standard (R.F. (Toshiba Appeal), at para. 94).

94 The appropriate standard for certifying loss as a common issue at the certification stage is a question of law, to be reviewed on appeal for correctness. If I conclude that the certification judge identified the correct standard, then the certification judge's decision to certify the issues as common may not be disturbed absent a palpable and overriding error.

(I) *Dr. Reutter's Methodology*

95 Application of the *Microsoft* standard here requires some review of Dr. Reutter's report. In that report, he drew two conclusions:

1. All members of the proposed Class would have been impacted by the actions of defendants as alleged in the *Amended Notice of Civil Claim*, and
2. There are acceptable methods available to estimate any overcharge and aggregate damages that resulted from the alleged wrongdoing using evidence common to the proposed Class.

(A.R., vol. III, at p. 119).

96 These conclusions were based on the presence of four economic factors during the period of the alleged conspiracy that suggest that the ODD industry was vulnerable to collusive conduct (A.R., vol. III, at pp. 122-23 and 136). These factors are:

1. ODDs are commodity-like and manufactured to conform to industry standards;
2. During the proposed Class period [the] defendants accounted for a majority of all ODDs manufactured worldwide;
3. There are no economic substitutes for ODDs, and;
4. The manufacture of ODDs exhibits barriers to entry.

(A.R., vol. III, at pp. 119-20).

Because of the presence of these four factors, and the laws of supply and demand, Dr. Reutter concluded that "any conspiratorial overcharge would have been absorbed in part and passed-through in part at each level of the distribution chain, thus impacting all members of the proposed Class" (A.R., vol. III, at pp. 120 and 148).

97 In order to estimate overcharges and aggregate damages arising from the alleged price-fixing, Dr. Reutter developed a methodology to estimate the "but-for" price of the products subject to the anticompetitive conduct (A.R., vol. III, at p. 150). This involves use of mainstream and accepted economic methodologies based on multiple regression (Sup. Ct. reasons, at para. 158). In particular, it entails three steps:

First, for the matter at hand, an economic model describing the interaction of the supply of and demand for [ODDs] must be developed. Second, based on the economic model, data will need to be collected from various sources, including defendants (when available), as well as public and third party vendors. Third, standard statistical and econometric techniques are used to determine the extent to which the alleged conspiracy resulted in supra-competitive prices for [ODDs].

(A.R., vol. III, at p. 150).

98 In order to quantify the aggregate damages suffered by the proposed class, Dr. Reutter proposes to quantify the damages suffered by direct and indirect purchasers in the proposed class, which quantification can occur on a class-wide basis, using accepted economic and statistical methods (Sup. Ct. reasons, at para. 159). Overcharge, once estimated, can then be allocated among the class members (A.R., vol. III, at p. 167). Both aggregate damages and overcharge can be estimated using defendant transaction data, supplemented with data collected from public and private sources (A.R., vol. III, at p. 120).

99 The question of whether a plaintiff's methodology must show loss at the indirect purchaser level or loss to each and every class member appears to be moot, since Dr. Reutter opines that all class members were impacted by Toshiba's anti-competitive behaviour; his methodology therefore satisfies either standard. Toshiba, however, points to its cross-examination of Dr. Reutter at the certification hearing as obtaining the concession that his methodology cannot demonstrate that all class members suffered a loss (A.F. (Toshiba), at paras. 86-87). At the hearing before this Court, counsel for Godfrey argued that Toshiba's counsel mischaracterized what emerged from that cross-examination (Transcript, at p. 59). Because of this dispute, it is important to examine what actually occurred.

100 After confirming that Dr. Reutter would use an average selling price across the ODD market to estimate overcharge, the following exchange took place:

399 Q. And implicit in the average is the fact that some class members may not have suffered any loss, but they would be compensated by the amount of the average overcharge in relation to the purchase that they made?

A. It's an empirical question and I don't want to sound flippant, but it depends. There may be some — there may be some small subset or subset, I don't want to put an adjective in front of it. There may be some subset that were not impacted. I don't, from an economic standpoint, understand how that would be if there was, in fact, a conspiracy that fixed the price at the upstream and then that was, in fact, passed through.

.....  
403 Q. But if you conclude that some members were not impacted once you do the analysis, then they would be compensated even though they suffered no loss?

A. Again, it depends on how finely or where we want to draw the line of what we're analyzing or what we're measuring.

.....  
A. Someone could — the average is an average and if you want to throw a zero in there, as Dr. Levinsohn does, and say that there could be zero damages, I can't deny that, you know, if you average zero with some other numbers you get something other than zero by the definition of mathematics.

.....  
407 Q. ... Does the methodology which produces an average, is that average overcharge then applied to all class members irrespective of whether the average reflects the overage that they, in fact, incurred?

A. Yes.

408 Q. All right. And is there anything in the methodology that you are proposing that allows one to determine who those people are that suffered more or less? They're simply compensated on average?

.....  
A. In identifying him, no.

(A.R., vol. V, at pp. 216-19, emphasis added).

Dr. Reutter went on to explain that his methodology is capable of creating subgroups within the class. For example, if the evidence after discovery suggests that Toshiba stopped price-fixing for a few months and then resumed again, the class members who purchased ODDs during that time would be excluded from the model (A.R., vol. V, at pp. 220-21).

101 It is not at all apparent that this exchange shows Dr. Reutter resiling from his opinion that *all* class members would be impacted. On the contrary, he stated that he did not understand, from an economic standpoint, how it would be possible for some members of the class *not* to have suffered a loss if there was a conspiracy and the fixed price was passed through. Dr. Reutter's methodology therefore satisfies both the standards argued for by Toshiba and Godfrey.

102 In any event, even were Dr. Reutter's methodology incapable of showing loss to every class member, as I explain below, it is not necessary, in order to support certifying loss as a common question, that a plaintiff's expert's methodology establish

that each and every class member suffered a loss. Nor is it necessary that Dr. Reutter's methodology be able to identify those class members who suffered no loss so as to distinguish them from those who did. Rather, in order for loss-related questions to be certified as common issues, a plaintiff's expert's methodology need only be sufficiently credible or plausible to establish loss reached the requisite purchaser level. This leaves the only question being whether the courts below were correct in finding that Dr. Reutter's proposed methodology satisfies that required standard of commonality (C.A. reasons, at paras. 125 and 149). I see no reason to interfere with the certification judge's determination that Dr. Reutter's methodology satisfies this standard.

(2) *What is the Standard Required to Certify Loss as a Common Issue?*

103 The *Class Proceedings Act* provides that in order for an issue to be common, the issue need not "predominate over issues affecting only individual members" (s. 4(1)(c)). Section 1 of the *Class Proceedings Act* defines "common issues" as meaning:

- (a) common but not necessarily identical issues of fact, or
- (b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts

104 In *Microsoft*, this Court reaffirmed the principles of "common issues" for the purpose of certification, as they were explained in *Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46, [2001] 2 S.C.R. 534 (S.C.C.), at para. 108:

In ... *Dutton* ... this Court addressed the commonality question, stating that "[t]he underlying question is whether allowing the suit to proceed as a [class proceeding] will avoid duplication of fact-finding or legal analysis" (para. 39). I list the balance of McLachlin C.J.'s instructions, found at paras. 39-40 of that decision:

- (1) The commonality question should be approached purposively.
- (2) An issue will be "common" only where its resolution is necessary to the resolution of each class member's claim.
- (3) It is not essential that the class members be identically situated *vis-à-vis* the opposing party.
- (4) It [is] not necessary that common issues predominate over non-common issues. However, the class members' claims must share a substantial common ingredient to justify [a class proceeding]. The court will examine the significance of the common issues in relation to individual issues.
- (5) Success for one class member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent.

105 In *Dell'Aniello c. Vivendi Canada inc.*, 2014 SCC 1, [2014] 1 S.C.R. 3 (S.C.C.), this Court clarified that the "common success" requirement in *Dutton* should be applied flexibly. "Common success" denotes not that success for one class member must mean success for all, but rather that success for one class member must not mean *failure* for another (para. 45). A question is considered "common", then, "if it can serve to advance the resolution of every class member's claim", even if the answer to the question, while positive, will vary among those members (para. 46).

106 In *Microsoft*, the representative plaintiff sought to certify a class proceeding wherein the proposed class members consisted of the end consumers of products whose prices were allegedly fixed ("indirect purchasers"). After concluding that indirect purchasers have a cause of action for price-fixing, the Court considered the standard of expert methodology required to certify loss-related questions as common issues for indirect purchaser class proceedings. The key passage from the Court's reasons states:

One area in which difficulty is encountered in indirect purchaser actions is in assessing the commonality of the harm or loss-related issues. In order to determine if the loss-related issues meet the "some basis in fact" standard, some assurance is required that the questions are capable of resolution on a common basis. In indirect purchaser actions, plaintiffs generally seek to satisfy this requirement through the use of expert evidence in the form of economic models and methodologies.

The role of the expert methodology is to establish that the overcharge was passed on to the indirect purchasers, making the issue common to the class as a whole (see *Chadha [v. Bayer Inc. (2003), 63 O.R. (3d) 22]*, at para. 31). The requirement at the certification stage is not that the methodology quantify the damages in question; rather, the critical element that the methodology must establish is the ability to prove "common impact", as described in the U.S. antitrust case of *In Re: Linerboard Antitrust Litigation*, 305 F.3d 145 (3rd Cir. 2002). That is, plaintiffs must demonstrate that "sufficient proof [is] available, for use at trial, to prove antitrust impact common to all the members of the class" (*ibid.*, at p. 155). It is not necessary at the certification stage that the methodology establish the actual loss to the class, as long as the plaintiff has demonstrated that there is a methodology capable of doing so. In indirect purchaser actions, this means that the methodology must be able to establish that the overcharges have been passed on to the indirect-purchaser level in the distribution chain.

The most contentious question involving the use of expert evidence is how strong the evidence must be at the certification stage to satisfy the court that there is a method by which impact can be proved on a class-wide basis. The B.C.C.A. in *Infineon Technologies AG v. Option Consommateurs*, 2013 SCC 29, [2013] 3 S.C.R. 600 called for the plaintiff to show "only a credible or plausible methodology" and held that "[i]t was common ground that statistical regression analysis is in theory capable of providing reasonable estimates of gain or aggregate harm and the extent of pass-through in price-fixing cases" (para. 68)....

.....

In my view, the expert methodology must be sufficiently credible or plausible to establish some basis in fact for the commonality requirement. This means that the methodology must offer a realistic prospect of establishing loss on a class-wide basis so that, if the overcharge is eventually established at the trial of the common issues, there is a means by which to demonstrate that it is common to the class (i.e. that passing on has occurred). The methodology cannot be purely theoretical or hypothetical, but must be grounded in the facts of the particular case in question. There must be some evidence of the availability of the data to which the methodology is to be applied. [Emphasis added; paras. 114-18.]

107 While there may be some room for debate arising from the references to "class-wide basis" in the above passages, in my view, the Court was employing the term "class-wide basis" synonymously with "indirect purchaser level". *Microsoft*, therefore, directs that, for a court to certify loss-related questions as common issues in a price-fixing class proceeding, it must be satisfied that the plaintiff has shown a plausible methodology to establish that loss reached one or more purchasers — that is, claimants at the "purchaser level". For indirect purchasers, this would involve demonstrating that the direct purchasers passed on the overcharge.

108 Additionally, showing that loss reached the indirect purchaser level satisfies the criteria for certifying a common issue, since it will significantly advance the litigation, is a prerequisite to imposing liability upon Toshiba and will result in "common success" as explained in *Vivendi*, given that success for one class member will not result in failure for another. Showing loss reached the requisite purchaser level will advance the claims of all the purchasers at that level.

109 When thinking about whether a proposed common question would "advance the litigation", it is the perspective of *the litigation*, not the plaintiff, that matters. A common issues trial has the potential to *either* determine liability *or* terminate the litigation (W. K. Winkler et al., *The Law of Class Actions in Canada* (2014), at p. 108). Either scenario "advances" *the litigation* toward resolution. Here, if it cannot be shown that loss was suffered by *any* purchasers at the indirect purchaser level, then *none* of the indirect purchasers have a cause of action and the action with respect to *all* the indirect purchasers would fail. I endorse, in this regard, this statement of the Ontario Superior Court in *Shah (Ont. S.C.J.)* (at para. 69):

Thus, for the purposes of certification, the methodology about the existence of loss need only be shown to be a plausible one that the passing-on reached the indirect purchaser level of the distribution channel and that there might be individual issues about whether any particular class member experienced illegal price-fixing. If the plaintiff's expert's methodology failed in proof at trial, then the class members' claim would fail across the indirect class members' class because each and every one of them would have failed to prove a constituent element of their cause of action; i.e., that the price-fixing penetrated their place or "level" of the distribution channel, and the Defendants would secure a discharge of liability against all the class

members. Conversely, if the methodology proved sound to show that overcharges reached the indirect purchaser place in the distribution channel, then there might have to be individual issues trials to determine each class member's entitlement.

*(3) Does Dr. Reutter's Methodology Meet the Standard?*

110 The certification judge identified the correct standard to certify commonality of loss as a common issue. As Toshiba acknowledges, the issue of whether the certification judge erred in applying that standard to Dr. Reutter's evidence is "subject to [...] deference from an appellate court" (A.F. (Toshiba), at para. 42). The certification judge's analysis of Dr. Reutter's methodology as supporting certification should not be overturned absent a palpable and overriding error.

111 I agree with the Court of Appeal that the reasoning of the certification judge reveals no basis for interfering with his common issues determination (C.A. reasons, at para. 163). There is no palpable and overriding error in the certification judge's conclusion that Godfrey showed some basis in fact for finding the loss issues to be common (Sup. Ct. reasons, at para. 180). I would therefore reject this ground of appeal.

*(4) Availability of Aggregate Damages*

112 I turn, finally, to Toshiba's final argument, which goes to the availability of the aggregate damages provisions found in Division 2 of the *Class Proceedings Act*, s. 29(1)(b), which states:

**Aggregate awards of monetary relief**

**29** (1) The court may make an order for an aggregate monetary award in respect of all or any part of a defendant's liability to class members and may give judgment accordingly if

.....

(b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability.

113 Because all other issues of fact and law must be decided before the aggregate damages provisions could apply, it is plain that aggregate damages under s. 29(1)(b) are purely remedial, available only after all other common issues have been determined, including liability (see *Microsoft*, at para. 134). Irrespective, then, of whether aggregate damages are certified as a common issue, it is for the trial judge to determine, following the common issues trial, whether the statutory criteria are met such that the aggregate damages provisions can be applied to award damages (*Microsoft*, at para. 134; Winkler et al., at p. 121).

114 Here, the certification judge certified the following common issues related to aggregate damages for the non-umbrella purchasers (para. 143):

.....

(k) Can the amount of damages be determined on an aggregate basis and if so, in what amount?

.....

(w) Can the amount of restitution be determined on an aggregate basis and if so, in what amount?

As I will explain below, I would not disturb the certification judge's decision to certify these issues as common issues. Again, it is important to remember that the certification of these issues in relation to the non-umbrella purchasers and the lack of certification in relation to the umbrella purchasers neither mandates nor forecloses the possibility of the trial judge awarding aggregate damages following the common issues trial. As this Court said in *Microsoft* (para. 134): "... the failure to propose or certify aggregate damages, or another remedy, as a common issue does not preclude a trial judge from invoking the provisions if considered appropriate once liability is found."

115 Toshiba has not appealed the certification of these issues as common issues. Rather, it takes issue with the certification judge's statement when discussing certification of the loss-related common issues that "the aggregate damage provisions [...] allow for an aggregate award even where some class members have suffered no financial loss" (Sup. Ct. reasons, at para. 169). Toshiba argues that this statement contradicts this Court's direction in *Microsoft* regarding the purely procedural quality of rights conferred by the *Class Proceedings Act* (A.F. (Toshiba), at para. 54). More particularly, Toshiba says that, by not

confining its liability to class members who are able to show actual loss, the certification judge used the *Class Proceedings Act* to confer substantive (and not merely procedural) rights so as to grant a remedy to persons who cannot prove a loss. In this way, Toshiba argues that the certification judge treated the indirect and umbrella purchasers as "juridical entities" and eliminated the distinction between proof of harm and aggregate damages (A.F. (Toshiba), at para. 7).

116 On this point, I agree with Toshiba that the certification judge's statement that the aggregate damages provisions allow for an award of damages for class members that suffered no loss is inconsistent with this Court's jurisprudence. This Court has repeatedly affirmed that the advantages conferred by class proceeding legislation are purely procedural, and that they do not confer substantive rights (see: *Hollick*, at para. 14; *Bisaillon c. Concordia University*, 2006 SCC 19, [2006] 1 S.C.R. 666 (S.C.C.), at para. 17; *Microsoft*, at para. 131-32; *Sun-Rype*, at para. 75). In *Microsoft*, this Court could not have been clearer that the aggregate damages provisions cannot be used to establish liability:

With respect, I do not agree with this reasoning. The aggregate damages provisions of the CPA relate to remedy and are procedural. They cannot be used to establish liability (*2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp.*, 2010 ONCA 466, 100 O.R. (3d) 721, at para. 55). The language of s. 29(1)(b) specifies that no question of fact or law, other than the assessment of damages, should remain to be determined in order for an aggregate monetary award to be made. As I read it, this means that an antecedent finding of liability is required before resorting to the aggregate damages provision of the CPA. This includes, where required by the cause of action such as in a claim under s. 36 of the *Competition Act*, a finding of proof of loss. I do not see how a statutory provision designed to award damages on an aggregate basis can be said to be used to establish any aspect of liability.

I agree with Feldman J.A.'s holding in *Chadha* that aggregate damages provisions are "applicable only once liability has been established, and provid[e] a method to assess the quantum of damages on a global basis, but not the fact of damage" (para. 49). I also agree with Masuhara J. of the B.C.S.C. in *Infineon* that "liability requires that a pass-through reached the Class Members", and that "[t]hat question requires an answer before the aggregation provisions, which are only a tool to assist in the distribution of damages, can be invoked" (2008 BCSC 575 (CanLII), at para. 176). Furthermore, I agree with the Ontario Court of Appeal in *Quizno's*, that "[t]he majority clearly recognized that s. 24 [of the Ontario *Class Proceedings Act*, 1992, S.O. 1992, c. 6] is procedural and cannot be used in proving liability" (para. 55). [Emphasis added; paras. 131-32.]

117 The foregoing signifies that, where (as here) loss is an element of the cause of action, using the aggregate damages provisions to distribute damages to class members who did not suffer a loss would be inconsistent with the purely procedural quality of the advantages conferred by the *Class Proceedings Act*. It follows that the reliance by the courts below (Sup. Ct. reasons, at para. 169; C.A. reasons, at para. 161) on s. 31(1)(a)(i) of the *Class Proceedings Act* (which provides that the court may order an aggregate damages award where it would be impractical or inefficient to identify the class members entitled to share in the award) as indicating that the plaintiff need not establish loss to each and every class member was, in my respectful view, mistaken. Section 31(1)(a)(i) is applicable only once liability has been established; otherwise, it would effectively confer substantive rights.

118 To be clear, I agree that the *Class Proceedings Act* permits individual members of the class to obtain a remedy where it may be difficult to demonstrate *the extent* of individual loss. What the jurisprudence of this Court maintains, however, is that, in order for individual class members to participate in the award of damages, the trial judge must be satisfied that each has *actually suffered* a loss where proof of loss is essential to a finding of liability (as it is for liability under s. 36 of the *Competition Act*). Therefore, ultimately, to use the aggregate damages provisions, the trial judge must be satisfied, following the common issues trial, either that *all* class members suffered loss, or that he or she can distinguish those who have not suffered loss from those who have.

119 At this stage, it therefore remains possible that issues will arise, once it is determined that loss reached the indirect purchaser level, that affect individual class members' claims (*Microsoft*, at para. 140). In other words, while it was sufficient *for the purposes of certifying loss as a common issue* for Dr. Reutter's methodology to show merely that loss reached the indirect purchaser level, whether this methodology is sufficient *for the purposes of establishing* Toshiba's liability to *all* class members

will depend on the findings of the trial judge. In this case, Godfrey intends to use Dr. Reutter's methodology to prove that all class members suffered loss. It follows from the foregoing that, if he is successful in doing so, the same methodology can be used to establish both that Toshiba is liable to all class members and that aggregate damages are available to be awarded.

120 It should be borne in mind that the trial judge, following the common issues trial, might reach any one of numerous possible conclusions on the question of whether the class members suffered loss. For example, the trial judge might accept Dr. Reutter's evidence that *all* class members suffered a loss, in which case it would be open to the trial judge to use the aggregate damages provisions to award damages to all class members. Alternatively, the trial judge might conclude that *no* purchasers suffered a loss — for example, if the trial judge does not accept that Dr. Reutter's methodology demonstrates that loss reached the direct and indirect purchaser levels. Were that the case, the action would fail. Or, it might be that the trial judge finds that an *identifiable subset* of class members did not suffer a loss, in which case the trial judge could exclude those members from participating in the award of damages, and then use the aggregate damages provision in respect of the remaining class members' claims. Finally, the trial judge could accept Toshiba's argument that some class members suffered a loss and some did not, but that it is impossible to determine on the expert's methodology which class members suffered a loss. In such a case, individual issues trials would be required to determine the purchasers to whom Toshiba is liable and who are therefore entitled to share in the award of damages. At the certification stage, no comment can or should be made about the potential conclusions that the trial judge may reach. I outline these possibilities and the availability of aggregate damages merely to provide guidance.

121 But again, to be clear — neither the range of possible findings of the trial judge following the common issues trial, nor the unavailability of aggregate damages for class members that suffered no loss, is relevant to the decision to certify aggregate damages as a common issue. As was the case in *Microsoft*, "[t]he aggregate damages questions [the certification judge] certified relate solely to whether damages can be determined on an aggregate basis and if so in what amount" (para. 135). The certification judge's decision to certify the questions related to aggregate damages for the non-umbrella purchasers should therefore not be disturbed.

## VI. Conclusion

122 I would dismiss the appeals.

123 Section 37(1) of the *Class Proceedings Act* provides that "neither the [British Columbia] Supreme Court nor the Court of Appeal may award costs to any party to an application for certification". The parties appear to take this as precluding this Court from awarding costs at those courts, and seek only their costs at this Court. I would therefore award Godfrey costs in this Court only.

### *Côté J. (dissenting in part):*

124 These appeals raise a fundamental question: are courts at a stage where the balance struck by Parliament in Canada's competition law should be upset by applying new principles of liability for price-fixing cases, resulting in near-automatic certification of class actions? In doing so, are courts going a bridge too far?

## I. Overview

125 These appeals concern the certification of a proposed class action brought in British Columbia by representative plaintiff Neil Godfrey (the "Plaintiff", respondent in these appeals) against a number of defendants (the "Defendants", appellants in these appeals) that manufacture or supply devices known as optical disc drives ("ODDs"). The Plaintiff alleges that the Defendants conspired to fix the prices of ODDs between January 1, 2004 and January 1, 2010 (the "Class Period"). He relies on five causes of action against the Defendants: a contravention of s. 45 of the *Competition Act*, R.S.C. 1985, c. C-34 (which is actionable pursuant to s. 36(1) of that statute), the tort of unlawful means conspiracy, the tort of predominant purpose conspiracy, unjust enrichment, and waiver of tort.

126 The proposed class is essentially comprised of three groups. Direct purchasers are the class members who purchased an ODD or an ODD product manufactured or supplied by a Defendant *from that Defendant*. Indirect purchasers are the class

members who purchased an ODD or an ODD product manufactured or supplied by a Defendant *from a non-Defendant*. Neil Godfrey is one of those indirect purchasers. Finally, class members who purchased from a non-Defendant an ODD or an ODD product *that was not manufactured or supplied by a Defendant* are known as "Umbrella Purchasers". The Plaintiff alleges that all of the class members in these three groups have claims against the Defendants in respect of the alleged price-fixing conspiracy.

127 The Plaintiff's action against most of the Defendants was commenced on September 27, 2010. He brought a separate action against certain additional Defendants — Pioneer Corporation, Pioneer North America, Inc., Pioneer Electronics (USA) Inc., Pioneer High Fidelity Taiwan Co., Ltd. and Pioneer Electronics of Canada Inc. (the "Pioneer Defendants") — on August 16, 2013, roughly three and a half years following the end of the Class Period.

128 At the certification stage, Masuhara J. (the "Certification Judge") consolidated the two actions and conditionally certified them as class proceedings, in accordance with the criteria set out in s. 4(1) of British Columbia's *Class Proceedings Act*, R.S.B.C. 1996, c. 50 ([2016 BCSC 844](#) (B.C. S.C.)). The Defendants' appeals to the British Columbia Court of Appeal were unanimously dismissed ([2017 BCCA 302](#), [1 B.C.L.R. \(6th\) 319](#) (B.C. C.A.)).

129 The Defendants that challenge the Court of Appeal's order before this Court in file no. 37810 (the "Toshiba Appeal") contend that both the Certification Judge and the Court of Appeal erred in three respects: (a) by permitting the Umbrella Purchasers to claim under the statutory cause of action in s. 36(1) of the *Competition Act*; (b) by allowing common law and equitable relief based on a breach of the anti-competitive prohibitions in Part VI of the *Competition Act*; and (c) by finding that loss-related issues were common among the indirect purchasers based on the expert methodology proposed by the Plaintiff.

130 The appeal brought by the Pioneer Defendants in file no. 37809 (the "Pioneer Appeal") raises those same issues, as well as two unique issues pertaining to the treatment of the limitation defence by the courts below. The Pioneer Defendants argue that the Certification Judge erred in holding that the action against them can proceed — notwithstanding that it was commenced more than two years following the end of the Class Period — based on the application of the discoverability rule and the doctrine of fraudulent concealment. In this Court, the Pioneer Defendants submit (a) that the discoverability rule does not apply to postpone the commencement of the limitation period in s. 36(4)(a)(i) of the *Competition Act*, and (b) that the doctrine of fraudulent concealment cannot toll that limitation period unless the Plaintiff can establish that he and the other class members stand in a "special relationship" with the Pioneer Defendants. It follows, in their submission, that the Plaintiff's pleadings do not disclose a cause of action against them in accordance with s. 4(1)(a) of the *Class Proceedings Act*.

131 I would allow both appeals in part. With respect to the limitations issues raised in the Pioneer Appeal, my view is that the discoverability rule does not apply to the limitation period in s. 36(4)(a)(i) because the event that triggers the commencement of the limitation period occurs without regard to the state of a plaintiff's knowledge. As for the doctrine of fraudulent concealment, my view is that it is not plain and obvious that it will toll the operation of the limitation period in this case only if the Plaintiff is capable of demonstrating a special relationship existed. It may be that something tantamount to or commensurate with the existence of a special relationship would be sufficient to toll the limitation period. However, simply establishing the existence of the conspiracy will not suffice.

132 With respect to the issues raised in the Toshiba Appeal, which are common to both appeals, I agree with my colleague Brown J. — although for different reasons — that the *Competition Act* does not prevent a plaintiff from advancing a claim at common law or in equity together with, or instead of, a claim pursuant to the statutory cause of action in s. 36(1) in respect of the same anti-competitive prohibitions. I disagree with my colleague on the other two issues raised in that appeal, however. In my view, the Umbrella Purchasers cannot succeed in their claims against the Defendants under s. 36(1) of the *Competition Act*. Likewise, I cannot accept that a methodology capable of proving only that loss reached the indirect purchaser level in the distribution chain (and incapable of establishing loss in any individualized manner) is sufficient for the purpose of certifying the loss-related questions proposed by the Plaintiff as "common issues", pursuant to s. 4(1)(c) of the *Class Proceedings Act*.

## II. The Pioneer Appeal

133 The two unique issues raised in the Pioneer Appeal are as follows:

- (a) Does the discoverability rule apply to the limitation period established by s. 36(4)(a)(i) of the *Competition Act*?
- (b) Must there be a special relationship between the parties to an action in order for the doctrine of fraudulent concealment to toll the limitation period?

134 The statutory cause of action under s. 36(1)(a) of the *Competition Act*, which allows a claimant to recover for loss or damage resulting from conduct contrary to any provision of Part VI of that Act, is subject to the limitation period established by s. 36(4). These two provisions read as follows:

**36 (1)** Any person who has suffered loss or damage as a result of

- (a) conduct that is contrary to any provision of Part VI, or
- (b) the failure of any person to comply with an order of the Tribunal or another court under this Act,

may, in any court of competent jurisdiction, sue for and recover from the person who engaged in the conduct or failed to comply with the order an amount equal to the loss or damage proved to have been suffered by him, together with any additional amount that the court may allow not exceeding the full cost to him of any investigation in connection with the matter and of proceedings under this section.

.....

**(4)** No action may be brought under subsection (1),

(a) in the case of an action based on conduct that is contrary to any provision of Part VI, after two years from

- (i) a day on which the conduct was engaged in, or
- (ii) the day on which any criminal proceedings relating thereto were finally disposed of,

whichever is the later...

135 The Plaintiff's action against the Pioneer Defendants, which is based in part on s. 36(1) of the *Competition Act*, was commenced on August 16, 2013 — more than two years following the end of the Class Period, which is the period during which the alleged price-fixing conspiracy took place. The Pioneer Defendants take the position that the Plaintiff's claim for recovery under s. 36(1) of the *Competition Act* is time-barred by the limitation period in s. 36(4)(a)(i). The Plaintiff, for his part, says that both the discoverability rule and the doctrine of fraudulent concealment apply to toll that limitation period. If either applies, then the limitation clock will have begun ticking on the date that he discovered, or ought to have discovered, the existence of the alleged conspiracy.

136 In order to succeed, therefore, the Pioneer Defendants must persuade this Court that *neither* the discoverability rule *nor* the doctrine of fraudulent concealment has any application in this case.

**A. Does the Discoverability Rule Apply to the Limitation Period Contained in the Statutory Cause of Action in Section 36 of the Competition Act?**

137 On this first limitations issue raised in the Pioneer Appeal, my colleague takes the view that the discoverability rule postpones the commencement of the limitation period in s. 36(4)(a)(i) until the time at which the potential claimant discovers, or is reasonably capable of discovering, the existence of the impugned conduct that forms the basis of a claim under s. 36(1). I respectfully disagree, for the reasons that follow.

**(1) The Discoverability Rule**

138 Limitation clauses are statutory provisions that place temporal limits on a claimant's ability to institute legal proceedings. The expiry of a limitation period has the effect of "extinguish[ing] a party's legal remedies and also, in some cases, a party's legal

rights" (G. Mew, D. Rolph and D. Zacks, *The Law of Limitations* (3rd ed. 2016) ("Mew et al."), at p. 3). As this Court explained in *M. (K.) v. M. (H.)*, [1992] 3 S.C.R. 6 (S.C.C.), statutory limitation clauses reflect the balance struck by the legislature between three distinct policy rationales: granting repose to defendants, avoiding evidentiary issues relating to the passage of time, and encouraging diligence on the part of plaintiffs.

139 As statutory provisions, limitation clauses give rise to a number of interpretative issues. One important issue is the point at which the limitation period begins running — and in particular, whether the legislature intended that it commence only when the plaintiff has knowledge that the event which sets the clock ticking (sometimes referred to as the "triggering event") has in fact occurred. This is key, because a determination of when a limitation period expires depends on both its duration and its commencement (Mew et al., at pp. 69-70).

140 Discoverability is a judge-made rule of statutory interpretation that assists in determining whether the event triggering the commencement of a limitation period depends upon the state of the plaintiff's knowledge. In *Central & Eastern Trust Co. v. Rafuse*, [1986] 2 S.C.R. 147 (S.C.C.) [hereinafter Central Trust Co.], this Court recognized a "general rule that a cause of action arises for the purposes of a limitation period when the material facts on which it is based have been discovered or ought to have been discovered by the plaintiff by the exercise of reasonable diligence" (p. 224). What this means is that a limitation period that commences upon "the accrual of the [plaintiff's] cause of action", or wording to that effect, will begin running only when the plaintiff discovers, or is reasonably capable of discovering, the facts giving rise to the cause of action (Mew et al., at p. 69). That is the point at which that plaintiff's ability to sue the defendant crystallizes.

141 This Court expanded upon the principles applicable to the discoverability rule in *Peixeiro v. Haberman*, [1997] 3 S.C.R. 549 (S.C.C.). In that case, Major J. clarified that discoverability is not a general rule that applies *despite* the wording of a legislative enactment, but rather an "interpretive tool for the construing of limitations statutes which ought to be considered each time a limitations provision is in issue" (para. 37). In so doing, he endorsed the approach to this rule that had been taken by the Manitoba Court of Appeal in *Fehr v. Jacob* (1993), 14 C.C.L.T. (2d) 200 (Man. C.A.):

In my opinion, the judge-made discoverability rule is nothing more than a rule of construction. Whenever a statute requires an action to be commenced within a specified time from the happening of a specific event, the statutory language must be construed. When time runs from "the accrual of the cause of action" or from some other event which can be construed as occurring only when the injured party has knowledge of the injury sustained, the judge-made discoverability rule applies. But, when time runs from an event which clearly occurs without regard to the injured party's knowledge, the judge-made discoverability rule may not extend the period the legislature has prescribed. [para. 22]

142 The limitation period in *Peixeiro* ran for two years from the time when "damages were sustained" by the plaintiff (para. 2). Applying the test in *Fehr*, Major J. found it "unlikely that by using the words 'damages were sustained', the legislature intended that the determination of the starting point of the limitation period should take place without regard to the injured party's knowledge" (para. 38). In his view, "[t]he use of the phrase 'damages were sustained' rather than 'cause of action arose' ... is a distinction without a difference" (*ibid.*). He therefore concluded that the discoverability rule applied to the limitation period at issue in that case.

143 A different conclusion was reached by this Court on the facts in *Ryan v. Moore*, 2005 SCC 38, [2005] 2 S.C.R. 53 (S.C.C.). That dispute turned, in part, on the interpretation of a limitation period that "prohibits an action brought six months after letters of probate or administration of the estate of the deceased have been granted, and after the expiration of one year from the date of death" (para. 18, referring to s. 5 of the *Survival of Actions Act*, R.S.N.L. 1990, c. S-32). Bastarache J., writing for a unanimous Court, once again affirmed the test set out in *Fehr* and reiterated that discoverability is not a general rule but rather an "interpretative tool for construing limitation statutes" (para. 23). Applying the *Fehr* test to the limitation provision at issue in that case, Bastarache J. concluded as follows:

Pursuant to the *Survival of Actions Act*, the limitation period is triggered by the death of the defendant or the granting by a court of the letters of administration or probate. The section is clear and explicit: time begins to run from one of these two specific events. The Act does not establish a relationship between these events and the injured party's knowledge. I

agree with the appellants that knowledge is not a factor: the death or granting of the letters occurs regardless of the state of mind of the plaintiff. We face here a situation in respect of which, as recognized by this Court in *Peixeiro*, the judge-made discoverability rule does not apply to extend the period the legislature has prescribed. Thus, I agree with the Court of Appeal that by using a specific event as the starting point of the "limitation clock", the legislature was displacing the discoverability rule in all the situations to which the *Survival of Actions Act* applies. [Emphasis added; para. 27.]

144 The Plaintiff in the instant case agrees that *Fehr* sets out the test for whether a limitation period is subject to the discoverability rule (R.F. (Pioneer Appeal), at para. 29), and my colleague affirms this approach at paras. 31-35 of his reasons. However, he goes on to opine that "where the event triggering the limitation period is an *element* of the cause of action, the legislature has shown its intention that the limitation period be linked to the cause of action's accrual, such that discoverability will apply" (Brown J.'s reasons, at para. 38 (emphasis added)). In other words, he equates language referring to the *accrual* or *arising* of the cause of action in its entirety with language referring to the *occurrence of an element* of the cause of action; in his view, both evidence a legislative intent that the discoverability rule apply.

145 Although this approach accords with the view expressed by the British Columbia Court of Appeal in this case (paras. 89-90), as well as by the Ontario Court of Appeal in *Fanshawe College of Applied Arts and Technology v. AU Optronics Corp.*, 2016 ONCA 621, 132 O.R. (3d) 81 (Ont. C.A.), at paras. 40, 43 and 45, my respectful view is that it expands the scope of the discoverability rule in a manner that is neither consistent with precedent nor justifiable in principle.

146 First, the suggestion that discoverability applies in all cases where the triggering event is "the occurrence of an element of the underlying cause of action" (Brown J.'s reasons, at para. 44) broadens the test set out by the Manitoba Court of Appeal in *Fehr* — a test which my colleague purports to endorse at paras. 33-35 of his reasons. In that case, Twaddle J.A. was very clear in explaining that the discoverability rule applies "[w]hen time runs from 'the accrual of the cause of action' or from some other event which can be construed as occurring only when the injured party has knowledge of the injury sustained" (para. 22). Only these two situations were identified; there was no indication whatsoever that the discoverability rule ought to apply *automatically* in circumstances where the triggering event is merely the occurrence of a component element of the cause of action (and not the accrual of the cause of action in its entirety).

147 Not only did this Court endorse *Fehr* in both *Peixeiro* and *Ryan*, but both appeals were resolved on a fairly straightforward application of this approach to discoverability. In *Peixeiro*, this Court reasoned that the limitation period — which commenced when "damages were sustained" — fell within the first category outlined in *Fehr* (to which the discoverability rule applies), given that this triggering event did *not* occur without regard to the plaintiff's knowledge. Likewise, *Ryan* was decided on the basis that the events triggering the commencement of the limitation period at issue — the death of the defendant or the granting of letters of administration or probate — occurred regardless of the plaintiff's state of mind and therefore fell within the second category in *Fehr*, to which the discoverability rule has no application (para. 27). Put simply, neither case was resolved by determining whether the triggering event was "related to", "linked to the basis of" or "an element of" the plaintiff's cause of action.

148 It is true that this Court in *Ryan* stated that the discoverability rule does not apply where the limitation period "is explicitly linked by the governing legislation to a fixed event unrelated to the injured party's knowledge *or the basis of the cause of action*" (para. 24 (emphasis added)). The Court of Appeal in the present case characterized this as an "unequivocal statement ... that the rule can apply where the limitation period is linked to 'the basis of the cause of action'" (para. 89). With respect, the Court of Appeal's narrow focus on this specific statement ignores the broader context in which it was made. In the immediately preceding paragraph in *Ryan* (i.e. para. 23), Bastarache J. reaffirmed — and reproduced in full — the approach to discoverability set out in *Fehr*, and the statement in question appears to be nothing more than a paraphrased summary of this well-accepted approach. Moreover, in the same paragraph (i.e. para. 24), Bastarache J. explained that the discoverability rule *does* apply where the commencement of the limitation period is "related by the legislation to the arising or accrual of the cause of action". From my reading of *Ryan*, I see no intent on the part of this Court to broaden the traditional approach to discoverability, and for this reason, my view is that the words "basis of the cause of action" in para. 24 of *Ryan* should be understood as essentially synonymous with the "arising or accrual of the cause of action".

149 In any event, principle also commands that the discoverability rule apply *only* where the limitation period runs from the "accrual of the cause of action" (or wording to that effect) or from the occurrence of some event that is related to the state of the plaintiff's knowledge. This is because discoverability is nothing more than a tool of statutory interpretation. Where a legislature provides that a limitation period is triggered by an event whose occurrence depends on the plaintiff's knowledge, courts give effect to this legislative direction by calculating the running of the limitation period from the point at which the plaintiff acquired or was capable of acquiring such knowledge. Conversely, where the legislature provides that a limitation period is triggered by an event that occurs without regard to the plaintiff's state of mind, the courts do not — and indeed, cannot — apply the discoverability rule to postpone the commencement of the limitation period until such time as the plaintiff discovered, or ought to have discovered, that the event had taken place. Courts are bound to interpret and apply statutory law; they cannot rewrite it (*Reference re Pan-Canadian Securities Regulation*, 2018 SCC 48 (S.C.C.), at paras. 54-55 and 58).

150 Limitation periods that begin running upon the accrual of the plaintiff's cause of action evidently fall within the first category outlined in the preceding paragraph. Mew et al. note that a cause of action arises only "when all of the elements of a wrong existed, such that an action could be brought" (p. 69), and conversely, that "no cause of action can be said to have accrued unless there is a plaintiff available who is capable of commencing an action and a defendant in existence who is capable of being sued" (p. 70 (footnotes omitted)). Because a cause of action cannot accrue before the plaintiff discovers that they have the right to commence proceedings against the defendant, a legislature which provides for a limitation period that begins running at that point in time necessarily intends the discoverability rule to apply. This explains the reasoning behind the "general rule" set out by this Court in *Central Trust Co.* (see para. 140 above) and affirmed in *M. (K.)*. It is essential to recognize that the limitation period in each case was triggered by the accrual or arising of the plaintiff's cause of action.

151 Conversely, "the occurrence of an element of the underlying cause of action" (Brown J.'s reasons, at para. 44) will not always fit within either category outlined above at para. 149. It may be that the occurrence of such an event does in fact depend on the state of the plaintiff's knowledge, but unlike the accrual of a cause of action, this does not invariably follow as a matter of logical necessity. In *Peixeiro*, for example, this Court held that the point at which damages are sustained — a constituent element of (among other things) the tort of negligence — depends on when the plaintiff actually has knowledge of his or her injury. Knowledge will not form part of every element of the cause of action in negligence, however. A breach of a standard of care, for example, may occur years or even decades before the plaintiff first learns about it. Although such a breach is a prerequisite to a successful claim in negligence, it is also something that takes place without any regard to the plaintiff's state of mind.

152 It is for this reason that I disagree in principle with the proposition that the discoverability rule must *always* apply where the triggering event "is related to", "is linked to the basis of" or "constitutes an element of" the plaintiff's cause of action. My position is instead consistent with that stated by Marshall J.A. of the Newfoundland Court of Appeal in *Snow (Guardian ad litem of) v. Kashyap* (1995), 125 Nfld. & P.E.I.R. 182 (Nfld. C.A.):

Where the limitation period is set by the terms of the statute to run from the time when an action arises or accrues, as in *Kamloops [v. Nielsen*, [1984] 2 S.C.R. 2] and *Central Trust*, there is room to imply that the legislation does not intend the period to commence until the injured party has, or ought to have, an awareness of the claim's existence. The criteria under such legislation provisions, therefore, imports a mental element. However, when the limitation statute explicitly ties the prescription period to a specific occurrence, such as the termination of professional services, knowledge of the claimant cannot be construed as a factor. In such instances it is the happening of the factual event which is explicitly relevant and any interpretation implying the period to be related to the claimant's consciousness of the circumstances is precluded. No scope exists to imply the discoverability rule into the legislative intent. [Emphasis added; para. 38.]

153 With this in mind, I am respectfully of the view that my colleague's approach is undermined by the well-settled principle that the discoverability rule is fundamentally a rule of statutory interpretation. The fact that a limitation period begins running upon the *occurrence of an element* (and not upon the *accrual* or *arising*) of the plaintiff's cause of action is not, on its own, indicative of any legislative intent regarding the applicability of the discoverability rule. As I have already indicated, my colleague's conclusion is the same as the one reached by the Court of Appeal in this case and by the Ontario Court of Appeal in *Fanshawe College of Applied Arts and Technology*: in such circumstances, according to him, discoverability applies

automatically. This, however, creates an arbitrary distinction between triggering events that are related to the cause of action and those that are not, despite the fact that both may occur independently of the plaintiff's state of mind. How can it fairly be said that the legislature *intended* the discoverability rule to apply to one and not the other? Although knowledge is necessary for a cause of action to fully accrue to the plaintiff, it does not follow that an element of the cause of action also occurs only when the plaintiff has knowledge thereof.

154 A preferable approach is instead one that considers each statutory limitation clause on its own terms, recognizing that a triggering event that relates to a cause of action can, *but need not*, be dependent upon the plaintiff's state of mind. This approach is faithful to this Court's jurisprudence, and respectful of the notion of discoverability as an interpretative tool and not a general rule that allows clear statutory wording to be disregarded. For my part, I would reaffirm the approach laid out in *Fehr* without any modification.

#### (2) Application of the Discoverability Rule to the Limitation Period in Section 36(4)(a)(i)

155 Given the foregoing, it is no surprise that I disagree with my colleague that the discoverability rule applies to the limitation period in s. 36(4)(a)(i) of the *Competition Act* on the basis that "the event triggering this particular limitation period is an element of the underlying cause of action" (Brown J.'s reasons, at para. 44). Rather, the conclusion that results from applying the law as I explained it in the preceding section is that this limitation period commences on the day on which the conduct contrary to Part VI actually takes place, and not the day on which a potential claimant discovers, or is reasonably capable of discovering, that it took place.

156 Section 36 of the *Competition Act* was "carefully constructed" to create a limited cause of action in respect of serious criminal offences under Part VI of the *Competition Act* (*General Motors of Canada Ltd. v. City National Leasing*, [1989] 1 S.C.R. 641 (S.C.C.), at p. 689). For example, Parliament limited recovery to an amount "equal to the loss or damage proved to have been suffered" by the plaintiff as a result of the prohibited conduct, thereby foreclosing the availability of other types of damages, such as aggravated or punitive damages. Section 36(2) provides plaintiffs with a shortcut to proving conspiracy where the defendant was convicted of the underlying offence. And of significance for our purposes is the fact that this cause of action is circumscribed by a complex twofold limitation period at s. 36(4) that reflects the balance struck by Parliament among the certainty, evidentiary and diligence rationales that underlie this area of the law.

157 The wording of the limitation period set out in s. 36(4)(a)(i) provides ample support for the proposition that the two-year period commences independently of when the plaintiff first learns of the wrongdoing. Rather than having the limitation period commence upon the accrual of the cause of action (as was the case in *Central Trust Co. and M. (K.)*), Parliament decided that it would instead commence on "a day on which the conduct was engaged in" — which, contrary to the position taken by my colleague, is *not* "wording to [the same] effect" as "accrual of the cause of action" (paras. 37 and 41). There is simply no link between this triggering event and the plaintiff's state of mind; it is, in short, an "event which clearly occurs without regard to the injured party's knowledge". The Certification Judge's reading of this provision led him to the same conclusion (para. 54 (CanLII)). It was the existence of conflicting jurisprudence on this point that caused him "not [to be] satisfied that it is plain and obvious that the discoverability principle can never apply to the limitation period in s. 36(4)" (para. 58).

158 I acknowledge that the "discoverability rule has been applied by this Court even to statutes of limitation in which plain construction of the language used would appear to exclude the operation of the rule" (*Peixeiro*, at para. 38). However, a consideration of the context surrounding s. 36(4)(a)(i) lends further support to the conclusion that the discoverability rule does not apply.

159 First, the cause of action in s. 36(1)(a) is based on two essential elements: (i) the defendant engaging in conduct contrary to any provision of Part VI, and (ii) the plaintiff suffering loss or damage as a result of such conduct. It is only upon the occurrence of both events that the plaintiff can commence proceedings on the basis of this statutory cause of action. Cognizant of this, and of the fact that conspiracies of this nature take place in secret, Parliament decided that the limitation period would not begin when the plaintiff actually sustained loss or damage, but rather when the defendant engaged in the prohibited conduct. It is important to keep in mind that the point at which the conduct is engaged in necessarily precedes the point at which a claimant

will suffer loss or damage as a result of such conduct. I would also note that the offence under s. 45 is complete as soon as an unlawful agreement is made, meaning that the "conduct" is "engaged in" even if the agreement is not actually implemented or prices do not actually increase. It follows as a direct consequence of this legislative choice that the limitation period can in fact expire before the plaintiff is in a position to commence proceedings under s. 36(1)(a).

160 Second, s. 36(4)(a)(ii) provides a mechanism for the plaintiff to advance a claim that may be barred by s. 36(4)(a)(i): even if two years have expired from the day on which the prohibited conduct was engaged in, the limitation period will restart on the day on which criminal proceedings relating to the impugned conduct are finally disposed of. While s. 36(4)(a)(ii) applies only where the alleged conduct contrary to Part VI is the subject of criminal prosecution, it nevertheless provides an indication that Parliament was aware of the strictness of s. 36(4)(a)(i) and chose to enact this provision as the *only* means of relieving against it.

161 Third, and unlike claims subject to the general limitation period in British Columbia's *Limitation Act*, S.B.C. 2012, c. 13, s. 21, Parliament has not subjected claims under s. 36(1)(a) to any ultimate limitation period. Interpreting s. 36(4)(a)(i) as commencing only when the underlying conduct becomes discoverable will therefore have the effect of leaving defendants at risk of lawsuit indefinitely. As Paul-Erik Veel helpfully observes, the result would be that "companies could face claims decades later, well after the employees involved in the alleged conspiracy may have left and documents lost, without any ability to defend themselves" (*Waiting forever for the axe to drop? Discoverability and the limitation period for Competition Act claims*, *Lenczner Slaght*, August 12, 2016 (online)). This runs contrary to the certainty and evidentiary rationales that underlie the law of limitations.

162 Fourth, the two-year limitation period was enacted by Parliament at a time when limitation periods were comparatively much longer. For example, the provincial limitations statutes that were in force at the time in Ontario and British Columbia set out a general limitation period of six years (*The Limitations Act*, R.S.O. 1970, c. 246, s. 45(1); *Statute of Limitations*, R.S.B.C. 1960, c. 370, s. 3). The relatively short limitation period at issue here, which commences even before the cause of action fully crystallizes, provides a further indication of the premium that Parliament placed on granting repose to defendants and encouraging diligence by potential plaintiffs.

163 The statutory provision at issue here is therefore akin to s. 138.14 of Ontario's *Securities Act*, R.S.O. 1990, c. S.5, which this Court recently considered in *Canadian Imperial Bank of Commerce v. Green*, 2015 SCC 60, [2015] 3 S.C.R. 801 (S.C.C.); because there is no suspension mechanism built into that statutory limitation clause, "the limitation period begins to run regardless of knowledge on the plaintiff's part, be it on when a document containing a misrepresentation is released, when an oral statement containing a misrepresentation is made, or when there is a failure to make timely disclosure" (para. 79). Under both provisions, the limitation period is triggered by an event that is unrelated to the state of the plaintiff's knowledge. This is consistent with a number of judicial decisions that considered this issue as it pertains to s. 36 of the *Competition Act* (see *CCS Corp. v. Secure Energy Services Inc.*, 2014 ABCA 96, 575 A.R. 1 (Alta. C.A.), at para. 4; *Laboratoires Servier v. Apotex Inc.*, 2008 FC 825, 67 C.P.R. (4th) 241 (F.C.), at para. 488; *Garford Pty Ltd. v. Dywidag Systems International Canada Ltd.*, 2010 FC 996, 88 C.P.R. (4th) 7 (F.C.), at paras. 28-33; *Eli Lilly & Co. v. Apotex Inc.*, 2009 FC 991, 80 C.P.R. (4th) 1 (F.C.) at para. 729; *Fairview Donut Inc. v. TDL Group Corp.*, 2012 ONSC 1252 (Ont. S.C.J.), at paras. 643-46 (CanLII)).

164 On a different note, I am not persuaded that a short limitation period, to which the discoverability rule does not apply, will defeat the purpose for which Parliament enacted s. 36 and the rest of the *Competition Act*. Civil liability under s. 36 is not the exclusive means by which persons are held to account for anti-competitive conduct: the statute also provides for a variety of penal and administrative consequences for activities that reduce competition in the marketplace. Moreover, as I will explain later in these reasons, alleged wrongdoers may also be liable at common law or in equity for conduct that constitutes an offence under Part VI. A short limitation period for the cause of action under s. 36(1) therefore does not defeat Parliament's objective of "maintain[ing] and encourag[ing] competition in Canada ... in order to provide consumers with competitive prices and product choices" (*Competition Act*, s. 1.1).

165 As a result, I disagree with my colleague that the limitation period in s. 36(4)(a)(i) begins to run on the date that the conduct contrary to Part VI is either discovered or discoverable by the plaintiff. Properly interpreted, the triggering event in this statutory provision "clearly occurs without regard to the injured party's knowledge", and the provision does not contain

"wording to [the same] effect" as "accrual" of the s. 36 cause of action. A proper application of the *Fehr* test therefore leads to the conclusion that the discoverability rule does not apply. Applying discoverability would make the limitation period chosen by Parliament virtually meaningless and create uncertainty around the likelihood and timing of significant litigation.

**B. Must There be a Special Relationship Between the Parties to an Action in Order for the Doctrine of Fraudulent Concealment to Toll the Limitation Period?**

166 The fraudulent concealment doctrine is a doctrine that operates to prevent a limitation clause from being used as an instrument of injustice in circumstances where a defendant conceals the facts giving rise to a potential cause of action from a plaintiff. Because it would be unconscionable for that defendant to then rely on the limitation clause as a defence to the claim, equity "suspend[s] the running of the limitation clock until such time as the injured party can reasonably discover the cause of action" (*Giroux Estate v. Trillium Health Centre* (2005), 74 O.R. (3d) 341 (Ont. C.A.), at para. 28). The Canadian approach to this doctrine has its origin in the England and Wales Court of Appeal's decision in *Kitchen v. Royal Air Force Assn.*, [1958] 2 All E.R. 241 (Eng. C.A.), in which Lord Evershed, M.R., wrote as follows:

It is now clear ... that the word "fraud" in s. 26(b) of the *Limitation Act, 1939*, is by no means limited to common law fraud or deceit. Equally, it is clear ... that no degree of moral turpitude is necessary to establish fraud within the section. What is covered by equitable fraud is a matter which Lord Hardwicke did not attempt to define two hundred years ago, and I certainly shall not attempt to do so now, but it is, I think, clear that the phrase covers conduct which, having regard to some special relationship between the two parties concerned, is an unconscionable thing for the one to do towards the other. [Emphasis added; p. 249.]

167 The Pioneer Defendants, relying on *Kitchen* and the jurisprudence that followed, argue that the existence of a "special relationship" between the plaintiff and the defendant is a necessary precondition to the application of the doctrine of fraudulent concealment. Because such a relationship was not pleaded by the Plaintiff, they say that this doctrine cannot operate to toll the limitation period and that the claim against them must fail accordingly.

168 I would note that this Court has only ever considered the operation of fraudulent concealment in the context of a special relationship between the plaintiff and the defendant. This Court applied that doctrine in *Guerin v. R.*, [1984] 2 S.C.R. 335 (S.C.C.), after Dickson J. (as he then was) found that the conduct of the Indian Affairs Branch of the federal government was "unconscionable, having regard to the fiduciary relationship between the Branch and the [Musqueam Indian] Band" (p. 390). Likewise, this Court recognized the existence of a special relationship between a parent and a child in *M. (K.)*, a case concerning incest. There, La Forest J. explained that such cases necessarily involve "a grievous abuse of a position of confidence", since "incest is really a double wrong — the act of incest itself is followed by an abuse of the child's innocence to prevent recognition or revelation of the abuse" (p. 58). Canadian courts have also found special relationships to exist between lawyers and clients, physicians and patients, employers and terminated employees, and trustees and beneficiaries (Mew et al., at p. 234).

169 That said, I am not prepared to go so far as to say that a special relationship — which I understand to be one that is based on trust and confidence — is always a prerequisite or a necessary element for the operation of the fraudulent concealment doctrine. In *Performance Industries Ltd. v. Sylvan Lake Golf & Tennis Club Ltd.*, 2002 SCC 19, [2002] 1 S.C.R. 678 (S.C.C.), Binnie J. explained that fraud in equity is broader than it is at common law, as it captures "transactions falling short of deceit but where the Court is of the opinion that it is unconscientious for a person to avail himself of the advantage obtained" (para. 39 (emphasis added), citing *First City Capital Ltd. v. British Columbia Building Corp.* (1989), 43 B.L.R. 29 (B.C. S.C.), at p. 37). He further noted that this ground for equitable relief "is so infinite in its varieties that the Courts have not attempted to define it", adding that "all kinds of unfair dealing and unconscionable conduct in matters of contract come within its ken" (*ibid.* (emphasis added), citing *McMaster University v. Wilchar Construction Ltd.* (1971), 22 D.L.R. (3d) 9 (Ont. H.C.), at p. 19). What constitutes "unconscionable conduct" for the purposes of the doctrine of equitable fraud will vary from case to case and will depend in part on the connection between the parties. This is helpfully explained by Ian Spry in his leading textbook, *The Principles of Equitable Remedies: Specific Performance, Injunctions, Rectification and Equitable Damages* (9th ed. 2014):

Fraud in this sense includes, not only fraud in the sense of active dishonesty that gave rise to an action of deceit at law, but also the taking of active steps with the intention of concealing the existence of the material cause of action. The better view is that it includes also, in cases where the defendant is under a special duty to the plaintiff, a failure to disclose the events which have taken place and which give rise to the cause of action in question. So it was said by Lord Evershed that in this context fraud includes "conduct which, having regard to some special relationship between the two parties concerned, is an unconscionable thing for the one to do towards the other". [p. 440.]

170 In effect, in the commercial context, limiting the application of the fraudulent concealment doctrine to only those situations where there is a special relationship between the parties presupposes that, in that context, there can be no injustice resulting from the application of a limitation period *unless* a special relationship exists. Put differently, insofar as there may be situations in which the fraudulent concealment doctrine would rectify an injustice caused to a plaintiff by the application of a limitation period, *even though there exists no special relationship* between the parties, then limiting the doctrine by requiring such a relationship could be seen as contradicting the very spirit of a doctrine that aims to protect against unconscionable conduct.

171 Based on this understanding of fraudulent concealment, my view is that it is not plain and obvious that equity can intervene to toll the applicable limitation period only in cases where there exists a special relationship; it may be that it can also intervene in cases — at least in the commercial context, as here — where the plaintiff can demonstrate something commensurate with or tantamount to a special relationship.

172 To be sure, the mere allegation of a price-fixing agreement among defendants is not sufficient *on its own* for the fraudulent concealment doctrine to toll the applicable limitation period. If it were, the limitation period for which Parliament specifically provided in s. 36(4) of the *Competition Act* would be meaningless in these circumstances, given the fact that price-fixing agreements are, in practice, carried out in secret.

173 In the case at hand, the Plaintiff did not plead that there was a special relationship between the class members and the Pioneer Defendants. However, as I explained above, it is not plain and obvious that this is fatal to the Plaintiff's fraudulent concealment claim, since a special relationship may not be a necessary precondition to the application of the fraudulent concealment doctrine. While the mere allegation of a price-fixing agreement among the Pioneer Defendants is not sufficient *on its own* for this doctrine to toll the applicable limitation period, in the commercial context, a showing of fraud in equity tantamount to or commensurate with the existence of a special relationship could be enough.

174 The Plaintiff pleaded that the Pioneer Defendants "took active steps to, and did, conceal the unlawful conspiracy from their customers" (R.F. (Pioneer Appeal)). Given that we are at the certification stage, I am prepared to conclude that it is not "plain and obvious" that the fraudulent concealment doctrine has no application in this case. Whether or not the Plaintiff will be successful in relying on this doctrine to toll the applicable limitation period in these circumstances, however, will depend on what he can prove at trial — that is, whether he can establish a special relationship, or maybe something tantamount to or commensurate with one could suffice.

175 On the basis of the foregoing, while the discoverability rule does not apply to toll the limitation period, it may be that the fraudulent concealment doctrine does, and, accordingly, I would dismiss the Pioneer Appeal regarding that question. However, there remain three more issues, common to all Defendants, and because the Pioneer Defendants have adopted the submissions of the Toshiba Appeal with regards to these common issues, I will consider them together in the subsequent section. For the aforementioned reasons and for the reasons that follow, I would allow the Pioneer Appeal in part.

### **III. The Toshiba Appeal**

176 The issues in the Toshiba Appeal, which are common to both appeals, are threefold:

- (a) Is it plain and obvious that the Umbrella Purchasers' claims under s. 36(1)(a) of the *Competition Act* cannot succeed?

(b) Is it plain and obvious that s. 36(1) bars a plaintiff from alleging common law and equitable causes of action in respect of conduct that breaches the prohibitions in Part VI of the *Competition Act*?

(c) What standard must a representative plaintiff meet in order to have loss-related questions certified as "common issues" among indirect purchasers, and has the Plaintiff met this standard in the present case?

177 I write separately because my views diverge from those of my colleague on all three of these issues. I will address each in turn.

**A. Is it Plain and Obvious That the Umbrella Purchasers' Claims Under Section 36(1) of the Competition Act Cannot Succeed?**

178 The first issue in the Toshiba Appeal is whether the Certification Judge erred in holding that the Umbrella Purchasers can advance claims under s. 36(1) of the *Competition Act* against the Defendants. The Defendants submit that the Certification Judge did so err, and that upholding his conclusion on this point will have the effect of opening up "a potentially limitless scope of liability that could not have been contemplated by Parliament and is contrary to the scheme of the *Competition Act*" (A.F. (Toshiba Appeal), at para. 97).

179 I agree with my colleague that resolving this issue requires an exercise in statutory interpretation, under which the words of the *Competition Act* are to "be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament" (*Bell ExpressVu Ltd. Partnership v. Rex*, 2002 SCC 42, [2002] 2 S.C.R. 559 (S.C.C.), at para. 26, citing E. Driedger, *Construction of Statutes* (2nd ed. 1983), at p. 87). However, we must not lose sight of the fact that our contextual approach to statutory interpretation also draws on the relevant legal principles and norms (see *R. v. Alex*, 2017 SCC 37, [2017] 1 S.C.R. 967 (S.C.C.), at para. 31; *British Columbia (Securities Commission) v. McLean*, 2013 SCC 67, [2013] 3 S.C.R. 895 (S.C.C.), at para. 43; *ATCO Gas & Pipelines Ltd. v. Alberta (Energy & Utilities Board)*, 2006 SCC 4, [2006] 1 S.C.R. 140 (S.C.C.), at para. 48).

180 On its face, s. 36(1) appears to be worded broadly enough to capture claims by umbrella purchasers, so long as they can prove that they "suffered loss or damage as a result of" the conduct specified in para. (a) or (b). According to the Defendants, however, this statutory provision must be interpreted in a manner that is consistent with the principles that limit the extent of liability at common law (A.F. (Toshiba Appeal), at paras. 97-99). They point specifically to two legal principles that are relevant for the purposes of liability to umbrella purchasers: indeterminacy and remoteness. At its core, therefore, the issue under this heading raises the question of whether those principles can inform our interpretation of s. 36(1) of the *Competition Act* — and in particular, the extent of a defendant's liability thereunder in the context of a price-fixing claim brought by persons whose ODD or ODD product was manufactured or supplied by a non-Defendant.

181 *Indeterminacy* is a policy consideration that negates the imposition of a duty of care in negligence where it would expose the defendant to "liability in an indeterminate amount for an indeterminate time to an indeterminate class" (*Ultramares Corp. v. Touche* (1931), 174 N.E. 441 (U.S. N.Y. Ct. App. 1931), at p. 444, per Cardozo C.J.). This concern arises where finding a duty of care between a plaintiff and a defendant would open the floodgates, resulting in "massive, uncontrolled liability" (A. M. Linden et al., *Canadian Tort Law* (11th ed., 2018), at p. 278). *Remoteness* is a related principle that limits the scope of liability in negligence where "the harm [is] too unrelated to the wrongful conduct to hold the defendant fairly liable" (*Mustapha v. Culligan of Canada Ltd.*, 2008 SCC 27, [2008] 2 S.C.R. 114 (S.C.C.), at para. 12, citing A. M. Linden and B. Feldthusen, *Canadian Tort Law* (8th ed. 2006), at p. 360). According to the authors of the 11th edition of that text:

The losses or injuries incurred by plaintiffs must not be "too remote" a consequence of the defendants' negligent act, in order for compensation to ensue. In other words, to use the older language, negligent defendants who owe a general duty of care are not liable unless their conduct is the "proximate cause" of the plaintiff's losses. Causation alone is not enough; it must be demonstrated that the conduct was the *proximate* cause of the damage. This issue is better described as the scope or extent of liability issue. [p. 307]

182 Although both indeterminacy and remoteness relate primarily to liability in negligence, I agree with the Defendants that the same underlying concerns can inform our analysis of the issue at hand, which involves claims under s. 36 of the *Competition Act* for pure economic losses. In *Taylor v. 1103919 Alberta Ltd.*, 2015 ABCA 201, 602 A.R. 105 (Alta. C.A.), at para. 50, for example, the Alberta Court of Appeal discerned "no principled reason why [the principle of remoteness] ought not to apply" to the statutory cause of action in Alberta's *Land Titles Act*, R.S.A. 2000, c. L-4. In *Pro-Sys Consultants Ltd. v. Microsoft Corp.*, 2013 SCC 57, [2013] 3 S.C.R. 477 (S.C.C.), Rothstein J. considered the principle of remoteness, among other legal norms, in his analysis of whether indirect purchasers have a cause of action under s. 36 of the *Competition Act* (paras. 42-45).

183 Similarly, in *Associated General Contractors of California Inc. v. California State Council of Carpenters*, 459 U.S. 519 (U.S. Sup. Ct. 1983), the United States Supreme Court held that common law principles — including foreseeability and proximate cause, directness of injury, certainty of damages and privity of contract — can operate to limit the scope of a defendant's liability under the statutory cause of action for anti-competitive conduct in § 4 of the *Clayton Act*, 15 U.S.C. § 15.<sup>3</sup> In that case, the majority held that a plaintiff could not recover under that provision for harm allegedly suffered by reason of the defendants' coercion of third parties. Although Stevens J. recognized that "[a] literal reading of the statute is broad enough to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation" (p. 529), he nevertheless held that

the question whether the [plaintiff] may recover for the injury it allegedly suffered by reason of the defendants' coercion against certain third parties cannot be answered simply by reference to the broad language of [the applicable statutory provision]. Instead ... the question requires us to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them. [p. 535]

184 The issue in the instant case turns on whether the Defendants can be held liable for loss or damage of an economic nature suffered by the Umbrella Purchasers, a group of claimants who bought from non-Defendants ODDs that were manufactured or supplied by non-Defendants. Can the Umbrella Purchasers recover as against the Defendants — companies with which they have no commercial relationship whatsoever? In my view, the answer is no. Any overcharges that those claimants may have incurred were ultimately the direct result of pricing choices *made by those non-Defendant manufacturers and suppliers*, regardless of whether or not those choices were influenced by broader trends in the market. In short, the Defendants have control over their own business decisions, but not over those of non-Defendant manufacturers and suppliers. For this reason, and bearing in mind the principles underlying indeterminacy and remoteness, I am of the view that it would be unfair to hold the Defendants liable to the Umbrella Purchasers where they had no control over such liability. Indeed, interpreting s. 36(1) in the manner suggested by the Plaintiff might well expose the Defendants to unbounded liability — capable of encompassing not only the losses of those Umbrella Purchasers themselves, but also the losses of "[a]nyone who was affected by the economic ripples downstream of umbrella purchasers" (A.F. (Toshiba Appeal), at para. 105). In my opinion, this provision must be construed in a manner that prevents such a cascade of liability.

185 This is consistent with the views expressed by Perell J. of the Ontario Superior Court of Justice in *Shah v. LG Chem, Ltd.*, 2015 ONSC 6148, 390 D.L.R. (4th) 87 (Ont. S.C.J.), and by a unanimous Divisional Court, in *Shah v. LG Chem, Ltd.*, 2017 ONSC 2586, 413 D.L.R. (4th) 546 (Ont. Div. Ct.). *Shah* involved the certification of a price-fixing class action brought by direct, indirect and umbrella purchasers of lithium ion batteries ("LIBs") manufactured by various defendants. On the question of whether the umbrella purchasers in that case could succeed in their claim under s. 36(1) of the *Competition Act*, Perell J. held as follows:

... the Umbrella Purchasers' claim would impose indeterminate liability on the Defendants and the claim would be unfair because the law, generally speaking, does not impose liability on one person for the conduct of others, and in the instance of the Umbrella Purchasers, the Plaintiffs seek to make the Defendants liable for the advertent, inadvertent, voluntary or involuntary conduct of the non-Defendants in taking advantage of the price-fixing. [para. 175]

The Divisional Court unanimously upheld Perell J.'s conclusion on this point. As Nordheimer J. (as he then was) explained:

What is alleged here is that the non-defendant [LIB] manufacturers took advantage of the higher market prices being set by the [defendants] through their conspiracy, to similarly increase the prices of their LIBs or LIB products. Assuming that that occurred, the [defendants] had no control over the actions of the non-defendant manufacturers. First and foremost, they had no control over whether the non-defendant manufacturers chose to match prices. Second, they had no control over the volume of LIBs or LIB products, that the non-defendant manufacturers chose to produce and sell. [para. 34]

186 Both Perell J. and Nordheimer J. analogized the issue of liability to umbrella purchasers in *Shah* to the issue of indeterminacy that had arisen in *Knight v. Imperial Tobacco Canada Ltd.*, 2011 SCC 42, [2011] 3 S.C.R. 45 (S.C.C.). In that case, a number of tobacco companies were facing lawsuits relating to the sale of "light" or "mild" cigarettes. Those companies, in turn, brought third-party claims against the Government of Canada, alleging that if they were found liable to the plaintiffs, they would be entitled to compensation from Canada for (among other things) negligent misrepresentation. The argument was that Canada had negligently misrepresented the health attributes of low-tar cigarettes to consumers and to those tobacco companies. Canada countered that allowing the tobacco companies' claims in negligent misrepresentation "would result in indeterminate liability", as "Canada had no control over the number of cigarettes being sold" (para. 97). This Court accepted Canada's argument; McLachlin C.J., writing for a unanimous Court, explained as follows:

I agree with Canada that the prospect of indeterminate liability is fatal to the tobacco companies' claims of negligent misrepresentation. Insofar as the claims are based on representations to consumers, Canada had no control over the number of people who smoked light cigarettes. ...

The risk of indeterminate liability is enhanced by the fact that the claims are for pure economic loss. In *Design Services Ltd. v. Canada*, 2008 SCC 22, [2008] 1 S.C.R. 737, the Court, *per* Rothstein J., held that "in cases of pure economic loss, to paraphrase Cardozo C.J., care must be taken to find that a duty is recognized only in cases where the class of plaintiffs, the time and the amounts are determinate" (para. 62). If Canada owed a duty of care to consumers of light cigarettes, the potential class of plaintiffs and the amount of liability would be indeterminate. [Emphasis added; paras. 99-100.]

187 Although that case concerned indeterminacy in relation to the imposition of a duty of care in negligence, I agree with Nordheimer J. that "the fundamental principle is the same" (para. 32): s. 36(1) should not be interpreted in a manner that makes the Defendants liable to an indeterminate class of people for losses of an indeterminate nature that occurred as a result of business decisions over which they had no control. This accords with the approach taken by the United States Supreme Court in respect of a similar statutory cause of action for anti-competitive conduct: "An antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy; but 'despite the broad wording of § 4 [of the *Clayton Act*], there is a point beyond which the wrongdoer should not be held liable'" (*Associated General Contractors of California Inc.*, at pp. 534-35, citing *Blue Shield of Virginia v. McCready*, 457 U.S. 465 (U.S. Sup. Ct. 1982), at pp. 476-77, citing *Illinois Brick Co. v. Illinois*, 431 U.S. 720 (U.S. Ill. S.C. 1977), at p. 760, per Brennan J. dissenting). In my view, a preferable reading of the statutory cause of action in s. 36(1) of the *Competition Act* is one that, consistent with the principles underlying indeterminacy and remoteness which operate at common law, limits the potential scope of liability faced by defendants of price-fixing claims to losses flowing from their own pricing decisions, not those of third parties. This promotes the value of certainty so that commercial enterprises "have some appreciation of what risk is to be borne by whom" (*Canadian National Railway v. Norsk Pacific Steamship Co.*, [1992] 1 S.C.R. 1021 (S.C.C.), at p. 1139).

188 The Ontario Divisional Court's decision in *Shah* was subsequently overturned by the Court of Appeal, for reasons substantially similar to those set out by my colleague (*Shah v. LG Chem Ltd.*, 2018 ONCA 819, 142 O.R. (3d) 721 (Ont. C.A.)). The unanimous panel in that case took the position that "normative concerns about indeterminate liability" in negligence do not apply in the context of the statutory claim under ss. 36 and 45 of the *Competition Act*, since those concerns "have already been taken care of by Parliament" (para. 47). Like my colleague, the panel stated that, first, the scope of s. 36(1) limits recovery to persons who can prove that they suffered loss or damage "as a result of" the alleged conspiratorial conduct and that, second, the subjective *mens rea* in s. 45 "limits the reach of liability to those who, at a minimum, specifically intend to agree upon anti-competitive conduct" (*ibid.*, at para. 51, cited in Brown J.'s reasons, at para. 75).

189 In my respectful view, neither of those considerations actually protects against the risk of limitless liability that would flow from recognizing the availability of umbrella purchaser claims under s. 36(1). On the first point, the fact that the text of this provision reads as permitting recovery for any person capable of proving that their loss was sustained "as a result of" an alleged price-fixing conspiracy does not end the interpretative exercise. As I explained above, the dispute here concerns whether those words should be taken as allowing recovery for any and all losses that can conceivably be linked to the alleged wrongdoing, or whether relevant legal norms and principles can assist in construing the provision so as to circumscribe what might otherwise be potentially indeterminate liability. And on the second point, while I accept that the *mens rea* in s. 45 limits liability to defendants who intend to agree upon anti-competitive conduct, this still tells us nothing about the scope of their liability under s. 36(1) — in other words, it tells us *who* is liable but not for *what* they are actually liable.

190 Before concluding, I will add one final thought. Permitting umbrella purchaser claims under s. 36(1) opens up the possibility of recovery for overcharges that result from "conscious parallelism" — a phenomenon which occurs when parties not involved in a price-fixing conspiracy deliberately *choose* to adjust their prices in order to match those of their competitors, in the absence of any actual collusion between them. As recently observed by the Quebec Court of Appeal in *R. c. Proulx*, 2016 QCCA 1425 (C.A. Que.), at para. 32 (CanLII), "[a]dopting a comparable or identical pricing policy without an agreement — which by definition requires a meeting of minds — does not fall within the scope of s. 45 of the *Competition Act*".<sup>4</sup> An interpretation of s. 36(1) that allows umbrella purchaser claims for these kinds of independent pricing decisions would effectively grant a right to recover (a) in circumstances where those decisions — to which the umbrella purchasers' alleged overcharges are directly attributable — are neither criminally prohibited nor actionable in and of themselves, and (b) from parties who neither made nor benefitted from those decisions.

191 All of this leads me to conclude that s. 36(1) of the *Competition Act* should not be interpreted in a manner that would permit claimants to recover from defendants for *any* losses that in some way flowed from the alleged conspiracy. Doing so would have the undesirable effect of exposing defendants to liability that is potentially limitless in scope for loss and damage that are too remote from any price-fixing that occurred. I do not think that this could have been Parliament's intention when it enacted this statutory right of action.

192 In light of the principles to which I have referred above, my view is that the line should be drawn at loss and damage that flowed from the pricing decisions of the Defendants themselves (that is, the loss claimed by the direct and indirect purchasers), and not those that are attributable to third parties who did not participate in — but who nevertheless would have benefitted from — the alleged price-fixing conspiracy. Because the Umbrella Purchasers' losses are indeed attributable to the pricing decisions of non-Defendant ODD manufacturers and suppliers, I find it plain and obvious that their claims in this action under s. 36(1) of the *Competition Act* cannot succeed.

#### ***B. Is it Plain and Obvious That Section 36(1) Bars a Plaintiff From Alleging Common Law and Equitable Causes of Action in Respect of Conduct That Breaches the Prohibitions in Part VI of the Competition Act?***

193 The second issue raised in the Toshiba Appeal turns on whether the cause of action in s. 36(1) of the *Competition Act* is the exclusive civil remedy for conduct that breaches the criminal offence provisions in Part VI of that statute. The Defendants argue that it is, and that allowing claims in respect of such conduct under common law and equitable causes of action undermines the principle of parliamentary sovereignty. The Plaintiff, by contrast, says that Parliament did not intend to preclude private law remedies for such conduct when it enacted s. 36(1) of the *Competition Act*.

194 At its core, the issue under this heading is whether a claimant can rely on the common law and equity *as a supplement* to the right of action under s. 36(1) of the *Competition Act* — or put differently, whether a claimant can advance a common law or equitable cause of action instead of, or together with, the statutory cause of action in respect of the same allegation of anti-competitive conduct.

195 In her leading textbook, *Sullivan on the Construction of Statutes* (6th ed. 2014), Professor Ruth Sullivan explains that "[t]he issue of supplementation arises when there is overlap between legislation and the common law such that both may apply

to a particular set of facts and also when legislation is incomplete in that it says nothing of, or does not fully address, a matter relating to the subject of the legislation" (p. 549). On this point, she adds the following:

When the issue of supplementing legislation arises, the focus may be on the application of common law rules, entitlement to common law remedies or access to common law courts. Although rules, remedies and jurisdiction raise distinct concerns, in each case the fundamental question is the same: is it permissible in the circumstances to supplement the legislation by resorting to the common law? If there is a conflict, the answer is clearly no. In the absence of conflict, the answer to the question depends first of all on legislative intent, which is discovered using the usual methods of interpretation. However, the courts pay particular attention to whether the legislation in question constitutes a complete or exhaustive code. The adequacy of the legislation and the continuing usefulness of the common law rule, remedy or jurisdiction are important considerations. [Emphasis added; p. 549.]

196 As with the Umbrella Purchasers issue, resolving this issue requires an exercise in statutory interpretation: it must be determined, based on a proper reading of the *Competition Act*, whether Parliament intended s. 36(1) to provide the exclusive civil remedy for persons claiming to have suffered loss or damage as a result of conduct contrary to Part VI.

197 Like my colleague, I begin my analysis with the presumption against interpreting legislation in a manner that would interfere with common law rights. According to Professor Sullivan, such a presumption allows "the courts to insist on precise and explicit direction from the legislature before accepting any change", so as to shield the law "from inadvertent legislative encroachment" (p. 539). Such an intention can be found either in the express wording of the statute or by necessary implication (*Gendron v. Supply & Services Union of the P.S.A.C., Local 50057*, [1990] 1 S.C.R. 1298 (S.C.C.), at pp. 1315-16).

198 I agree with my colleague that the *Competition Act* does not expressly preclude claimants from supplementing the right of action in s. 36(1) with claims based on causes of action at common law or in equity. However, I am not convinced that the reasoning in *Gendron* applies to the case at hand; while that case dealt with a statutory provision that *codified* a common law right, s. 36 of the *Competition Act* is distinguishable in that it *created* a new right that did not exist before. Instead, I would resolve this issue simply on the basis that the coexistence of statutory and common law or equitable claims arising from conduct contrary to Part VI of the *Competition Act* is in fact contemplated by s. 62 of that statute, which reads as follows:

**62** Except as otherwise provided in [Part VI], nothing in [Part VI] shall be construed as depriving any person of any civil right of action.

199 In my view, this provision evinces a legislative intention that the provisions of Part VI (which is titled "Offences in Relation to Competition") not abrogate any right of action a claimant has — which might include a right of action founded on the tort of unlawful means conspiracy or in unjust enrichment — that is predicated upon a breach of the offence provisions of the *Competition Act*. As the Manitoba Court of Appeal recognized in *Westfair Foods Ltd. v. Lippens Inc.* (1989), 64 D.L.R. (4th) 335 (Man. C.A.), the inclusion of this provision in the statutory framework suggests that Parliament did not intend the provisions of the *Competition Act* to intrude upon the provinces' jurisdiction over civil rights and liberties.

200 The fact that s. 62 applies only to Part VI of the *Competition Act* — and therefore is not *directly* applicable to s. 36(1), which is instead located in Part IV — is not, in my view, consequential. The cause of action created by s. 36(1)(a) is expressly tied to conduct that would constitute an offence under Part VI of the statute. This Court recognized in *General Motors of Canada Ltd.*, at p. 673, that the purpose of this remedial provision is to "help enforce the substantive aspects of the Act", such as the prohibitions against anti-competitive conduct.

201 It is also essential to note that s. 62 uses the phrase "*any* civil right of action", which suggests that Parliament contemplated the preservation of the various civil rights of action that may exist in respect of conduct prohibited under Part VI, beyond the one provided for in s. 36(1). Indeed, the former provision would be redundant and pointless if it merely affirmed what the latter already states: that perpetrators of conduct prohibited by Part VI are subject *both* to criminal prosecution *and* to civil proceedings under s. 36(1)(a). This is especially the case given that s. 36(2) and s. 36(4)(a)(ii) indicate that statutory claims can be brought against defendants even after any criminal proceedings against them were finally disposed of.

202 Therefore, when I read the words of s. 62 "in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act and the intention of Parliament" (Driedger, at p. 87; *Bell ExpressVu Ltd.*, at para. 26), I am led to the conclusion that this provision has the effect of preserving all civil rights of action that a claimant may have — over and above the right of action available under s. 36(1) of the *Competition Act* — in respect of anti-competitive conduct that would constitute an offence under Part VI of that Act. Indeed, s. 62 would be meaningless if s. 36(1) were to be interpreted as exhaustive in respect of civil claims for such conduct.

203 On the basis of this reasoning, I agree with the result reached by my colleague: the courts below did not err in permitting the Plaintiff to advance the pleaded common law and equitable causes of action together with the statutory cause of action under s. 36(1) in this case.

**C. What Standard Must a Representative Plaintiff Meet in Order to Have Loss-Related Questions Certified as "Common Issues" Among Indirect Purchasers, and Has the Plaintiff Met This Standard in the Present Case?**

204 The final issue on appeal relates to the requirement of common issues in s. 4(1)(c) of the *Class Proceedings Act*. What is it that the Plaintiff must be capable of establishing at the certification stage in order to provide the necessary assurance that his loss-related questions are capable of resolution on a common basis, and does his proposed methodology for establishing loss satisfy this requirement?

*(1) Background*

205 The existence of common issues among the individual class members lies at the very heart of a class proceeding. The procedural ability to aggregate these issues and to consider them at once, and for all class members, during a common issues trial is what alleviates the need for each class member to seek redress via separate actions (M. A. Eizenga et al., *Class Actions Law and Practice* (2nd ed. (loose-leaf)), at p. 3-101). The authors of *The Law of Class Actions in Canada* explain the importance of commonality in the following terms:

The presence of significant common issues provides the access to justice and judicial economies that ultimately justify certifying a class proceeding. Common issues are what actually unite and define the class. The mere fact that a group of people suffers a wrong does not justify certifying a class proceeding unless there are common issues to be decided for the defendant and the members of the group.

(W. K. Winkler et al. (2014), at p. 107)

For this reason, the determination of what constitute the common issues in any proposed class action is a key aspect of a certification motion.

206 In his Proposed Litigation Plan, the Plaintiff submitted a number of questions for resolution on a common basis at trial (A.R., vol. II, at pp. 125-27), including questions that essentially relate to whether the class members suffered a loss in connection with the alleged price-fixing conspiracy.

207 In order to satisfy the Certification Judge that these loss-related questions were capable of resolution on a common basis, the Plaintiff adduced evidence from an expert economist named Dr. Keith Reutter. In his expert report, Dr. Reutter took the position that "all members of the proposed Class would have been impacted" by the alleged price-fixing conspiracy and that "there are accepted methods available to estimate any overcharge and aggregate damages that resulted from the alleged wrongdoing using evidence common to the proposed Class" (A.R., vol. III, at p. 119). His methods would involve constructing an economic model to estimate the "but-for" price of the ODDs, that is, their price if the alleged anti-competitive conduct had not occurred (Certification Judge's reasons, at para. 156), and would include "econometric methods based on multiple regression to determine the overcharge and pass-through rates" (*ibid.*, at para. 158).

208 The suggestion that Dr. Reutter's methodology could establish that all class members would have been impacted by the alleged price-fixing conspiracy was called into question during his cross-examination, however (see A.R., vol. V, at pp.

210-25). The Defendants therefore resisted certification of the loss-related questions, arguing that the Plaintiff's methodology could not address the issue of loss *on a class-wide basis* because it would not make it possible to answer the Plaintiff's proposed questions at trial in respect of every class member — either by establishing that all of them were overcharged for their ODDs, or by identifying those who were, and distinguishing them from those who were not. In the Defendants' submission, unless it could be determined at the common issues trial that a loss had actually been incurred by at least some specific indirect purchasers, then those loss-related questions could not be decided on a common basis at trial and should therefore not be certified as common issues.

209 For his part, the Plaintiff argued that, from a factual standpoint, his expert's methodology would be capable of establishing that all class members (including the indirect purchasers) had suffered a loss. As an alternative legal argument, he submitted that he was not required to demonstrate to the Certification Judge that, using his expert's methodology, he would be able to prove at trial that all class members were harmed or to distinguish those who were from those who were not in an individualized fashion (R.F. (Toshiba Appeal), at para. 96). Instead, his position was that it would be sufficient, at the certification stage, if the methodology were simply capable of proving that loss had reached the indirect purchaser *level* in the distribution chain — that is, that some overcharges were passed on to some indirect purchasers, without having to identify which ones.

210 What is key, for the purposes of the commonality issue, is the difference between demonstrating that loss reached the indirect purchaser *level* — that is, that some overcharges were passed on to some *unidentified* indirect purchasers — and proving that loss reached *all* or *an identified group* of indirect purchasers.

211 My colleague seems to accept that there is some basis in fact for finding that Dr. Reutter's methodology will have a reasonable prospect of establishing, at the common issues trial, that all of the indirect purchasers suffered a loss. In his view, however, nothing turns on this given his conclusion as to the law:

... it is not necessary, in order to support certifying loss as a common question, that a plaintiff's expert's methodology establish that each and every class member suffered a loss. Nor is it necessary that Dr. Reutter's methodology be able to identify those class members who suffered no loss so as to distinguish them from those who did. Rather, in order for loss-related questions to be certified as common issues, a plaintiff's expert's methodology need only be sufficiently credible or plausible to establish loss reached the requisite purchaser level. [Emphasis added; para. 102.]

212 For the purposes of my analysis, I am prepared to accept that there is some basis in fact on which the Certification Judge could have found that the proposed methodology would be capable of proving at trial that loss had reached the indirect purchaser level. My disagreement with my colleague lies elsewhere. In my view, a methodology that is incapable of establishing at trial that at least some *identifiable* indirect purchasers actually suffered a loss, but that can instead show only that loss occurred somewhere at the indirect purchaser *level* in the distribution chain, does not allow any of the loss-related questions proposed by the Plaintiff in this case to be answered on a "common" or "class-wide" basis.

## (2) Analysis

213 In *Microsoft*, this Court affirmed that, in order to have a question certified as a common issue, the representative plaintiff must show that there is some basis in fact for the commonality requirement in s. 4(1)(c) of the *Class Proceedings Act* — that is, that the question be capable of resolution *on a class-wide basis* (see paras. 99-114). What the "some basis in fact" standard requires in any given case depends on what it is that the proposed question asks; different questions will impose different requirements upon the representative plaintiff.

214 In the case at hand, the loss-related questions proposed by the Plaintiff include the following: What damages, if any, are payable to the Class Members pursuant to s. 36 of the *Competition Act*? Did the Class Members suffer economic loss? Have the Class Members suffered a corresponding deprivation in the amount of the overcharges on the sale of ODDs?

215 The term "Class Member" or "Class Members" is defined in the Plaintiff's Proposed Litigation Plan as "one or more members of the proposed class", which is comprised of:

All persons resident in British Columbia who, during the period commencing at least as early as January 1, 2004 and continuing through January 1, 2010 (the "Class Period"), purchased optical disc drives ("ODD") or products that contained ODD. [A.R., vol. II, at p. 114]

216 The broad definition of the term "Class Members", and the use of that term in stating the proposed loss-related questions, reflects the possibility that the Plaintiff might not be able to prove at trial that *everyone* who purchased an ODD or an ODD product actually suffered a loss in connection with the alleged price-fixing conspiracy. Rather, the evidence might be such that loss is provable only in respect of *some* class members. My colleague says that these questions are stated in such a way that they "could be taken as asking whether *all* class members suffered economic loss or whether *any* class members suffered economic loss", and adds that "because they could be taken in two different ways they might, following the common issues trial, be answered in different ways" (para. 91 (emphasis in original)).

217 Regardless of how flexible these questions might be, however, they cannot be answered on a "class-wide" or "common" basis at trial if the Plaintiff's methodology is incapable of establishing loss in any identifiable manner. This is because mere proof that some loss reached the indirect purchaser level in the distribution chain does not dispose of any element of liability for any indirect purchaser, nor does it otherwise advance the litigation in any meaningful way.

**(a) Proof at trial that loss reached the indirect purchaser level, without anything more, does not dispose of any element of liability for any indirect purchaser**

218 As my colleague seems to implicitly acknowledge in his reasons, proof that loss reached the indirect purchaser *level* is insufficient for any finding of liability to be made at the common issues trial. This is because loss or deprivation suffered by the claimant is an essential element of the causes of action under s. 36 of the *Competition Act*, under the common law tort of civil conspiracy, and in unjust enrichment. This is key: the Defendants can be held liable under these causes of action only to those class members who (among other things) are found to have suffered a loss in connection with the price fixing.<sup>5</sup> For this reason, the common issues trial judge cannot impose any liability on the Defendants if the Plaintiff cannot show which class members actually suffered a loss. Individual trials will then be necessary (see Brown J.'s reasons, at para. 120; C.A. reasons, at para. 158; *Shah* (Ont. S.C.J.), at para. 69). Indeed, the Plaintiff acknowledges as much in his Proposed Litigation Plan, when he states the following:

The common issues trial will determine the existence and scope of the alleged conspiracy. The common issues trial may also determine on a class-wide basis whether Class Members were injured, leading to a finding of liability and a determination of aggregate damages. If the common issues trial does not determine injury on a class-wide basis, liability and damages will be determined on an individual basis in a manageable process. [Emphasis added; A.R., vol. II, at p. 118.]

219 This, of course, makes sense when we consider the fact that a class action is essentially an aggregation of individual actions that share common issues of fact and law (*Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46, [2001] 2 S.C.R. 534 (S.C.C.), at para. 27). In *Bou Malhab c. Diffusion Métromédia CMR inc.*, 2011 SCC 9, [2011] 1 S.C.R. 214 (S.C.C.), this Court reiterated that the class proceeding is merely a procedural vehicle which "cannot be used to make up for the absence of one of the constituent elements of the cause of action", adding that such a proceeding "can succeed *only if each claim it covers, taken individually, could serve as a basis for court proceedings*" (para. 52 (emphasis added)). By way of illustration, a claimant in an individual trial would not be entitled to a remedy under s. 36(1) of the *Competition Act* merely upon establishing that loss had reached some unidentified persons at his or her level in the distribution chain; that claimant would likewise have no such entitlement in a class proceeding (see *Sun-Rype Products Ltd. v. Archer Daniels Midland Co.*, 2013 SCC 58, [2013] 3 S.C.R. 545 (S.C.C.), at para. 75).

220 Moreover, and again as my colleague's reasons make clear, the aggregate damages provisions of the *Class Proceedings Act* (ss. 29 to 34) cannot be of any assistance to the Plaintiff in establishing liability to all of the class members in a case like this, where proof of loss is a constituent element of the cause(s) of action. As Rothstein J. explained in *Microsoft*:

The aggregate damages provisions of the *CPA* relate to remedy and are procedural. They cannot be used to establish liability (*2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp.*, 2010 ONCA 466, 100 O.R. (3d) 721, at para. 55). The language of s. 29(1)(b) specifies that no question of fact or law, other than the assessment of damages, should remain to be determined in order for an aggregate monetary award to be made. As I read it, this means that an antecedent finding of liability is required before resorting to the aggregate damages provision of the CPA. This includes, where required by the cause of action such as in a claim under s. 36 of the *Competition Act*, a finding of proof of loss. I do not see how a statutory provision designed to award damages on an aggregate basis can be said to be used to establish any aspect of liability. [Emphasis added; para. 131.]

221 The aggregate damages provisions of the *Class Proceedings Act* therefore cannot be interpreted and applied in such a way as to give a remedy to class members who could not obtain a remedy in an individual trial due to their inability to show that they suffered a loss in connection with the alleged conspiracy. It is important not to conflate the assessment of aggregate damages with the rationale for awarding them.

222 What all of this means is that a determination at a common issues trial of whether loss reached the indirect purchaser *level* in the distribution chain is of no assistance in resolving the question of whether the Defendants are actually liable to any or all of the indirect purchasers under the causes of action listed above. From the Plaintiff's perspective, the best case scenario is that there is a need for individual trials on the question of which indirect purchasers actually suffered a loss. His worst case scenario is that it cannot be proved that any indirect purchasers suffered a loss at all, which would terminate the litigation altogether as it pertains to those class members. Contrary to what the Certification Judge stated in his reasons (at para. 168), establishing at trial that "the defendants took part in a conspiracy, that they sometimes or always overcharged direct purchasers, and that at least some direct purchasers passed on these overcharges" to the indirect purchasers will *not* be "sufficient to establish the fact of the defendants' liability". It follows, therefore, that the Certification Judge did not identify the correct standard for certifying loss as a common issue (see Brown J.'s reasons, at para. 110).

**(b) Proof at trial that loss reached the indirect purchaser level, without anything more, does not allow for any loss-related determination that would advance the litigation in a manner that satisfies the commonality requirement**

223 My colleague states that the loss-related questions proposed by the Plaintiff in this case satisfy the commonality requirement in s. 4(1)(c) of the *Class Proceedings Act*, based on a methodology that is capable of proving that overcharges were passed on somewhere at the indirect purchaser level, *even though* such a methodology cannot allow any finding of liability to be made at trial (see paras. 109 and 120). Similarly, the Plaintiff takes the position that a "single analysis of whether there was an overcharge and whether that overcharge was passed on to the indirect purchaser level would significantly advance the claim for all class members by avoiding repetition of the collection and analysis of large quantities of economic data" (R.F. (Toshiba Appeal), at para. 106).

224 In light of the legal principles set out by my colleague at paras. 103-5 of his reasons, however, I cannot agree. To begin with, the fact that losses might have occurred somewhere at the indirect purchaser level in the distribution chain does not assist us in determining which specific indirect purchasers suffered losses in order to identify the class members to whom the Defendants might be liable. If the common issues trial judge finds that overcharges were passed on to at least one unidentifiable indirect purchaser, there would still be a need for individual trials; therefore, duplication of fact-finding would not be eliminated (*Dutton*, at para. 39). And if such individual trials are indeed required, then proof that loss occurred somewhere at the indirect purchaser level is not truly "necessary to the resolution of *each class member's claim*", is not a "*substantial common ingredient*" of their causes of action, and cannot in fact result in "success" for any of those indirect purchasers (*ibid.*, at paras. 39-40 (emphasis added)).

225 My colleague nevertheless opines that the requisite commonality derives from the fact that failure to show that loss was suffered by *any* indirect purchasers would mean that *none* of them could succeed against the Defendants (para. 108). With respect, however, the function of the common issues trial is not to screen out unmeritorious claims; it is to allow issues of fact and law that are common among many claimants to be determined *at once*, so as to avoid the need for individual determinations

for each and every class member. Furthermore, it is unclear why any representative plaintiff would seek the certification of a question that can meaningfully "advance the litigation" only if it results in failure for all indirect purchasers (see Brown J.'s reasons, at para. 109). In any event, I agree that "it would be a gross waste of private and public resources to litigate if the only prospective 'benefit' was to show that there was no point bringing the case in the first place" (K. Wright, T. Shikaze and E. Snow, "On the 'Level' After *Godfrey*: Proving Liability in Canadian Price Fixing Class Actions" (2017), 12 *C.A.D.Q.* 13, at p. 18).<sup>6</sup>

226 All of this leads me to the conclusion that proof that loss reached the indirect purchaser *level* in the distribution chain would not, without more, allow the common issues trial judge to make any loss-related determinations on a class-wide basis so as to permit the proposed questions to be certified as common issues for trial.

**(c) Microsoft does not indicate that loss-related questions are certifiable in indirect purchaser class actions so long as the representative plaintiff has a plausible methodology for proving solely that some overcharges were passed on to the indirect purchaser level**

227 Like the courts below, my colleague relies on this Court's decision in *Microsoft* to support his conclusion that loss-related questions in indirect purchaser class actions are certifiable even if the representative plaintiff's methodology can show only that loss reached the indirect purchaser *level* (but cannot establish loss on any individualized basis). Because that case raised a number of issues that are similar to those in the case at hand, it is worth analyzing it in some depth.

228 As in this case, the class action in *Microsoft* was based on an allegation of price manipulation by the defendants, Microsoft Corporation and Microsoft Canada Co./Microsoft Canada CIE (collectively, "Microsoft"). The representative plaintiffs — Pro-Sys Consultants Ltd. and Neil Godfrey (collectively, "Pro-Sys") — specifically alleged, on behalf of all class members, that Microsoft had engaged in unlawful conduct by overcharging for its operating systems. The class was made up of indirect purchasers who had acquired Microsoft products from resellers that had themselves purchased the products from Microsoft or another reseller higher up in the distribution chain. Pro-Sys pleaded causes of action under the common law torts of intentional interference with economic interests and conspiracy, sought damages pursuant to ss. 36, 45 and 52 of the *Competition Act*, and claimed in unjust enrichment and waiver of tort.

229 Although the loss-related questions in that case are very similar to those proposed in the case at hand, they explicitly asked whether losses or overcharges had been passed on to *all* of the indirect purchaser class members.<sup>7</sup> Among the issues at the certification stage was "whether Pro-Sys' proposed methodology will be able to show the initial overcharges and the pass-through to the proposed class members" (*Pro-Sys Consultants Ltd. v. Microsoft Corp.*, 2010 BCSC 285 (B.C. S.C.) ("Microsoft (BCSC)"), at para. 8 (CanLII) (emphasis added)).

230 Rothstein J., writing for a unanimous Court, clarified that the onus on the representative plaintiff at the certification stage is to establish that there is some basis in fact for the commonality requirement. In the context of loss-related questions, he observed that this requires the proposed methodology to "offer a realistic prospect of establishing loss *on a class-wide basis*" (para. 118 (emphasis added)). Importantly, Rothstein J. also expanded on how commonality can be established in indirect purchaser class actions where expert evidence is adduced to show that the issue of loss is resolvable on a class-wide basis:

The role of the expert methodology is to establish that the overcharge was passed on to the indirect purchasers, making the issue common to the class as a whole (see *Chadha*, at para. 31). The requirement at the certification stage is not that the methodology quantify the damages in question; rather, the critical element that the methodology must establish is the ability to prove "common impact", as described in the U.S. antitrust case of *In Re: Linerboard Antitrust Litigation*, 305 F.3d 145 (3rd Cir. 2002). That is, plaintiffs must demonstrate that "sufficient proof [is] available, for use at trial, to prove antitrust impact common to all the members of the class" (*ibid.*, at p. 155). It is not necessary at the certification stage that the methodology establish the actual loss to the class, as long as the plaintiff has demonstrated that there is a methodology capable of doing so. In indirect purchaser actions, this means that the methodology must be able to establish that the overcharges have been passed on to the indirect-purchaser level in the distribution chain. [Emphasis added; para. 115.]

231 In the case at hand, the courts below interpreted this passage as meaning that loss-related questions will always be certifiable as common issues in the context of indirect purchaser class actions so long as the representative plaintiff's methodology is capable of showing loss at the indirect purchaser level of the distribution chain. Respectfully, this reading of *Microsoft* — which focuses almost exclusively on the final sentence in the above-reproduced passage — is not consistent with the reasons as a whole, when read alongside those of the motion judge in that case.

232 For our purposes, it is significant that the loss-related questions in *Microsoft* concerned whether *all* of the indirect purchasers had suffered a loss. Rothstein J. agreed that the class members' claims raised common issues because the resolution of those issues "would appear to advance the claims of the entire class and to answer them commonly will avoid duplication in legal and factual analysis" (para. 111). He also declined to interfere with the motion judge's finding that Pro-Sys "has a credible or plausible methodology to show that *all* class members were harmed by Microsoft's alleged illegal activities" (*Microsoft* (BCSC), at para. 122 (emphasis in original); see also *Microsoft*, at para. 126). This led Rothstein J. to conclude as follows:

Unlike *Hollick*, here the loss-related issues can be said to be common because there is an expert methodology that has been found to have a realistic prospect of establishing loss on a class-wide basis. If the common issues were to be resolved, they would be determinative of Microsoft's liability and of whether passing on of the overcharge to the indirect purchasers has occurred. Because such determinations will be essential in order for the class members to recover, it can be said, in this case, that a resolution of the common issues would significantly advance the action. While it is possible that individual issues may arise at the trial of the common issues, it is implicit in the reasons of [the motion judge] that, at the certification stage, he found the common issues to predominate over issues affecting only individual class members. [Emphasis added; para. 140.]

233 A careful reading of *Microsoft* therefore makes it clear that Pro-Sys's loss-related questions were found to be resolvable on a "class-wide" basis because there was a credible and plausible methodology capable of answering them in respect of *all of the class members* at the common issues trial. Rothstein J. most likely referred to a methodology that is "able to establish that the overcharges have been passed on to the indirect purchaser level in the distribution chain" (para. 115) because of the motion judge's observation that, in order to succeed, Pro-Sys "must show that the alleged increased charges to the direct customers were not absorbed by any subsequent level in the distribution channel" before reaching the indirect purchasers who formed part of the class (*Microsoft* (BCSC), at para. 6). Indeed, Rothstein J. went so far as to say that "[t]he role of the expert methodology is to establish that the overcharge was passed on to the indirect purchasers, making the issue common to the class as a whole", and that what the plaintiff "must demonstrate [is] that 'sufficient proof [is] available, for use at trial, to prove antitrust impact common to all the members of the class' ([*In Re:Linerboard Antitrust Litigation*, 305 F.3d 145 (3rd Cir. 2002)], at p. 155)" (para. 115 (emphasis added)).

234 *Microsoft* is therefore a case in which the representative plaintiffs obtained the certification of questions asking whether *all* indirect purchasers had suffered a loss, by providing the motion judge with some basis in fact on which to find that the representative plaintiffs would be capable of proving at trial that they all had. Because the methodology made it possible for the common issues trial judge to resolve a necessary component of everyone's claim at once, without the need for individual trials, the commonality requirement was clearly met. As I have explained, however, *Microsoft* does not support the proposition that loss-related questions concerning indirect purchasers are certifiable, as a matter of course, so long as the plaintiff's methodology can show that some loss reached their level in the distribution chain. My colleague provides no reason for reading *Microsoft* in any other way (see Brown J.'s reasons, at para. 107).

### (3) Conclusion on the Commonality Issue

235 The legal dispute between the parties turns on whether loss-related questions that pertain to indirect purchasers in a price-fixing class action can be certified as common issues *even if* the representative plaintiff's methodology is capable only of establishing at trial that loss was occasioned somewhere at the indirect purchaser level of the distribution chain. I would respectfully answer this question in the negative. If the methodology is such that the common issues trial judge will be unable to make any findings as to which class members actually suffered a loss (for the purpose of making determinations as to liability),

then those loss-related questions proposed by the plaintiff will not be capable of resolution on a "class-wide" or "common" basis. Indeed, this Court explained in *Sun-Rype* that "where the proposed certified causes of action require proof of loss as a component of proving liability, *the certification judge must be satisfied that there is some basis in fact that at least two persons can prove they incurred a loss*" (para. 76 (emphasis added)). No two persons can prove that *they* are the ones who incurred a loss if a representative plaintiff's methodology can demonstrate only that loss reached some unidentified persons at their level in the distribution chain; by itself, such a methodology does not establish an essential element of liability for anyone. The need for individual trials in those circumstances is indicative of the absence of commonality.

236 That being said, what is required of the Plaintiff in this case is a methodology capable of answering the loss-related questions on an individualized basis, either by showing that all of the indirect purchasers suffered a loss or at least by identifying those who did and separating them from those who did not or those about whom we cannot be sure (and for whom individual hearings will therefore be necessary). In light of "Dr. Reutter's admissions on cross-examination that there may be some subset of class members who were not impacted, and that it would not be possible, using his methodology, to determine which class members were actually harmed" (C.A. reasons, at para. 125), the loss-related questions should not have been certified as common issues under s. 4(1)(c) of the *Class Proceedings Act*.

#### IV. Conclusion

237 Regarding the limitations issues raised in the Pioneer Appeal, I respectfully disagree that the discoverability rule has any application to s. 36(4)(a)(i). As for the doctrine of fraudulent concealment, the Plaintiff did not plead that there is any special relationship between the Pioneer Defendants and the class members, but did plead that the Pioneer Defendants took active steps to conceal the existence of the alleged conspiracy. While these pleadings are sufficient for the purposes of s. 4(1)(a) of the *Class Proceedings Act*, whether any such steps are sufficient to trigger the operation of this equitable doctrine will depend on what the Plaintiff actually proves at trial. As I explained earlier, what is necessary in the commercial context, such as here, could be the demonstration of the existence of *either* a special relationship, *or* something tantamount to or commensurate with one.

238 Regarding the issues in the Toshiba Appeal, which are common to both appeals, I agree with my colleague — though for different reasons — that the existence of the statutory cause of action in s. 36(1) of the *Competition Act* does not preclude claimants from also advancing claims at common law or in equity based on the same conduct prohibited by Part VI. However, I part ways with my colleague in two important respects. First, I do not agree that the Umbrella Purchasers have a claim against the Defendants under s. 36(1) of the *Competition Act*. Second, I cannot accept that the questions proposed by the Plaintiff that pertain to the commonality of loss among indirect purchasers can be certified where his proposed methodology will be capable of showing nothing more than the fact that some overcharges reached the indirect purchaser level of the distribution chain. In class actions where loss is an essential element of liability (as here), my view is that loss-related questions can be certified as common issues only if the representative plaintiff will be able to actually identify which class members suffered a loss at trial — either by proving that they all did or by distinguishing those who did from those who did not. Because Dr. Reutter admitted on cross-examination that his methodology would be incapable of allowing the Plaintiff to make such an identification at trial, it follows that the loss-related questions proposed by the Plaintiff in this case should not have been certified.

239 I would therefore allow the appeals in part.

*Appeals dismissed.*

*Pourvois rejetés.*

#### Footnotes

<sup>1</sup> Section 45(1) was amended by the *Budget Implementation Act, 2009*, S.C. 2009, c. 2, s. 410. The amendments are not material to these reasons for judgment.

<sup>2</sup> As recounted at para. 11, the certification judge held that the pleadings did not disclose a cause of action for unlawful means tort, or (in respect of the umbrella purchasers) for unjust enrichment and waiver of tort.

- 3 That provision read as follows: "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee."
- 4 In its *Competitor Collaboration Guidelines* (December 2009), the Competition Bureau of Canada explains that it does not consider that the mere act of independently adopting a common course of conduct with awareness of the likely response of competitors or in response to the conduct of competitors, commonly referred to as "conscious parallelism", is sufficient to establish an agreement for the purpose of subsection 45(1). However, parallel conduct coupled with facilitating practices, such as sharing competitively sensitive information or activities that assist competitors in monitoring one another's prices, may be sufficient to prove that an agreement was concluded between the parties. [p. 7]
- 5 The degree of "connection" varies among the different causes of action. For example, the cause of action under s. 36 of the *Competition Act* is for loss or damage that has occurred "as a result of" anti-competitive conduct. Recovery in unjust enrichment is available to a claimant who suffered a deprivation that "corresponds" to the defendant's enrichment in circumstances where there is no juristic reason for either the enrichment or the deprivation.
- 6 One of the authors of this article served as counsel for certain defendants in this litigation (although not before this Court) and in *Shah*.
- 7 The loss-related questions proposed by Pro-Sys included the following: Are the Class Members entitled to losses or damages pursuant to section 36 of the *Competition Act*, and, if so, in what amount? Did the Class Members suffer economic loss? Did the Class Members suffer economic loss as a result of the Defendants' interference? Have the Class Members suffered a corresponding deprivation in the amount of the Overcharge? (See *Microsoft*, Appendix.) The term "Class Members" was defined in Pro-Sys's proposed litigation plan to mean "all persons resident in British Columbia who, on or after January 1, 1994, indirectly acquired a license for Microsoft Operating Systems and/or Microsoft Applications Software for their own use, and not for purposes of further selling or leasing" (Pro-Sys A.R., vol. III, at p. 196 (emphasis added)).

Droit commercial --- Échange et commerce — Législation en matière de concurrence et de coalitions — Infractions liées à la concurrence et pratiques pouvant faire l'objet d'une révision — Complot — Principes généraux

Demandeuses représentantes dans le cadre de l'action, la société PSC Ltd. et NG, ont déposé un recours collectif à l'encontre de la société M et la société M Canada Co. (collectivement M) faisant valoir qu'à partir de 1988, M s'était comportée de manière illégale en majorant le prix de ses systèmes d'exploitation et de ses logiciels d'application pour ordinateur — PSC Ltd. a demandé l'autorisation de déposer un recours collectif — PSC Ltd. a déposé sa déclaration initiale à la Cour suprême de la Colombie-Britannique — Juge de première instance a conclu à l'existence de causes d'action en responsabilité délictuelle pour complot et atteinte intentionnelle aux intérêts financiers, et en restitution pour renonciation au recours délictuel — M a interjeté appel — Juges de la Cour d'appel ont accueilli l'appel, annulé l'ordonnance d'autorisation et rejeté l'action — Demandeuses ont formé un pourvoi auprès de la Cour suprême du Canada — Pourvoi accueilli; le recours collectif a été autorisé, mais les allégations fondées sur la fiducie par interprétation ont été radiées — Permettre à l'acheteur indirect d'intenter une action en justice s'accordait avec l'objectif de réparation du droit de la restitution, car la personne qui a effectivement subi un préjudice, et non seulement l'acheteur direct qui a pu en fait transférer la majoration, pouvait ainsi être indemnisée — Risque de recouvrement multiple et les obstacles liés à la complexité de la preuve et au caractère indirect de la majoration ne constituaient pas des considérations suffisantes pour priver l'acheteur indirect d'un recours contre l'auteur de la majoration dont le montant lui aurait été transféré — Inexistence d'une cause d'action en responsabilité délictuelle pour complot en vue de recourir à des moyens illégaux ou pour atteinte intentionnelle aux intérêts financiers n'était pas manifeste — Il n'était pas manifeste que l'enrichissement sans cause ne serait susceptible d'être établi que si le lien entre la demandeuse et la défenderesse était direct.

Procédure civile --- Parties — Recours collectifs intentés en vertu d'une loi relative aux recours collectifs — Autorisation — Recours collectif du demandeur — Divers

Demandeuses représentantes dans le cadre de l'action, la société PSC Ltd. et NG, ont déposé un recours collectif à l'encontre de la société M et la société M Canada Co. (collectivement M) faisant valoir qu'à partir de 1988, M s'était comportée de manière illégale en majorant le prix de ses systèmes d'exploitation et de ses logiciels d'application pour ordinateur — PSC Ltd. a demandé l'autorisation de déposer un recours collectif — PSC Ltd. a déposé sa déclaration initiale à la Cour suprême de la Colombie-Britannique — Juge de première instance a conclu à l'existence de causes d'action en responsabilité délictuelle pour complot et

atteinte intentionnelle aux intérêts financiers, et en restitution pour renonciation au recours délictuel — M a interjeté appel — Juges de la Cour d'appel ont accueilli l'appel, annulé l'ordonnance d'autorisation et rejeté l'action — Demanderesses ont formé un pourvoi auprès de la Cour suprême du Canada — Pourvoi accueilli; le recours collectif a été autorisé, mais les allégations fondées sur la fiducie par interprétation ont été radiées — Permettre à l'acheteur indirect d'intenter une action en justice s'accordait avec l'objectif de réparation du droit de la restitution, car la personne qui a effectivement subi un préjudice, et non seulement l'acheteur direct qui a pu en fait transférer la majoration, pouvait ainsi être indemnisée — Risque de recouvrement multiple et les obstacles liés à la complexité de la preuve et au caractère indirect de la majoration ne constituaient pas des considérations suffisantes pour priver l'acheteur indirect d'un recours contre l'auteur de la majoration dont le montant lui aurait été transféré — Inexistence d'une cause d'action en responsabilité délictuelle pour complot en vue de recourir à des moyens illégaux ou pour atteinte intentionnelle aux intérêts financiers n'était pas manifeste — Il n'était pas manifeste que l'enrichissement sans cause ne serait susceptible d'être établi que si le lien entre la demanderesse et la défenderesse était direct.

Procédure civile --- Parties — Recours collectifs intentés en vertu d'une loi relative aux recours collectifs — Autorisation — Recours collectif du demandeur — Procédures écrites révèlent une cause d'action

Demandeeresses représentantes dans le cadre de l'action, la société PSC Ltd. et NG, ont déposé un recours collectif à l'encontre de la société M et la société M Canada Co. (collectivement M) faisant valoir qu'à partir de 1988, M s'était comportée de manière illégale en majorant le prix de ses systèmes d'exploitation et de ses logiciels d'application pour ordinateur — PSC Ltd. a demandé l'autorisation de déposer un recours collectif — PSC Ltd. a déposé sa déclaration initiale à la Cour suprême de la Colombie-Britannique — Juge de première instance a conclu à l'existence de causes d'action en responsabilité délictuelle pour complot et atteinte intentionnelle aux intérêts financiers, et en restitution pour renonciation au recours délictuel — M a interjeté appel — Juges de la Cour d'appel ont accueilli l'appel, annulé l'ordonnance d'autorisation et rejeté l'action — Demanderesses ont formé un pourvoi auprès de la Cour suprême du Canada — Pourvoi accueilli; le recours collectif a été autorisé, mais les allégations fondées sur la fiducie par interprétation ont été radiées — Permettre à l'acheteur indirect d'intenter une action en justice s'accordait avec l'objectif de réparation du droit de la restitution, car la personne qui a effectivement subi un préjudice, et non seulement l'acheteur direct qui a pu en fait transférer la majoration, pouvait ainsi être indemnisée — Risque de recouvrement multiple et les obstacles liés à la complexité de la preuve et au caractère indirect de la majoration ne constituaient pas des considérations suffisantes pour priver l'acheteur indirect d'un recours contre l'auteur de la majoration dont le montant lui aurait été transféré — Inexistence d'une cause d'action en responsabilité délictuelle pour complot en vue de recourir à des moyens illégaux ou pour atteinte intentionnelle aux intérêts financiers n'était pas manifeste — Il n'était pas manifeste que l'enrichissement sans cause ne serait susceptible d'être établi que si le lien entre la demanderesse et la défenderesse était direct.

Droit commercial --- Échange et commerce — Législation en matière de concurrence et de coalitions — Infractions liées à la concurrence et pratiques pouvant faire l'objet d'une révision — Détermination des prix — Principes généraux

Demandeeresses représentantes dans le cadre de l'action, la société PSC Ltd. et NG, ont déposé un recours collectif à l'encontre de la société M et la société M Canada Co. (collectivement M) faisant valoir qu'à partir de 1988, M s'était comportée de manière illégale en majorant le prix de ses systèmes d'exploitation et de ses logiciels d'application pour ordinateur — PSC Ltd. a demandé l'autorisation de déposer un recours collectif — PSC Ltd. a déposé sa déclaration initiale à la Cour suprême de la Colombie-Britannique — Juge de première instance a conclu à l'existence de causes d'action en responsabilité délictuelle pour complot et atteinte intentionnelle aux intérêts financiers, et en restitution pour renonciation au recours délictuel — M a interjeté appel — Juges de la Cour d'appel ont accueilli l'appel, annulé l'ordonnance d'autorisation et rejeté l'action — Demanderesses ont formé un pourvoi auprès de la Cour suprême du Canada — Pourvoi accueilli; le recours collectif a été autorisé, mais les allégations fondées sur la fiducie par interprétation ont été radiées — Permettre à l'acheteur indirect d'intenter une action en justice s'accordait avec l'objectif de réparation du droit de la restitution, car la personne qui a effectivement subi un préjudice, et non seulement l'acheteur direct qui a pu en fait transférer la majoration, pouvait ainsi être indemnisée — Risque de recouvrement multiple et les obstacles liés à la complexité de la preuve et au caractère indirect de la majoration ne constituaient pas des considérations suffisantes pour priver l'acheteur indirect d'un recours contre l'auteur de la majoration dont le montant lui aurait été transféré — Inexistence d'une cause d'action en responsabilité délictuelle pour complot en vue de recourir à des moyens illégaux ou pour atteinte intentionnelle aux intérêts financiers n'était pas manifeste — Il n'était pas manifeste que l'enrichissement sans cause ne serait susceptible d'être établi que si le lien entre la demanderesse et la défenderesse était direct.

The representative plaintiffs in the action, corporation PSC Ltd. and NG, brought a class action against M Corp. and M Canada Co. (collectively M) alleging that beginning in 1988, M engaged in unlawful conduct by overcharging for its computer operating

systems and applications software. PSC Ltd. claimed that as a direct consequence of M's unlawful conduct, it and all the class members paid and continue to pay higher prices for M operating systems and applications software than they would have paid absent the unlawful conduct. PSC Ltd. sought certification of the action as a class proceeding. The proposed class was made up of ultimate consumers who acquired M products from re-sellers, re-sellers who themselves purchased the products either directly from M or from other re-sellers higher up the chain of distribution. PSC Ltd. filed its original statement of claim in the British Columbia Supreme Court. M sought an order striking out the claim altogether and an order dismissing the action. Trial judge found causes of action under s. 36 of the Competition Act, in tort for conspiracy and intentional interference with economic interests and in restitution for waiver of tort. M appealed with the Court of Appeal. The appeal judges allowed the appeal, set aside the certification order and dismissed the action, finding it plain and obvious that the class members had no cause of action. The plaintiffs appealed with the Supreme Court of Canada.

**Held:** The appeal was allowed, and the action was certified as a class proceeding with the exception that the pleadings based on constructive trust were struck.

Per Rothstein J. (McLachlin C.J.C., LeBel, Fish, Abella, Cromwell, Moldaver, Karakatsanis, Wagner JJ. concurring): Allowing indirect purchaser actions was consistent with the remediation objective of restitution law because it allowed for compensating the parties who have actually suffered the harm rather than merely reserving these actions for direct purchasers who may have in fact passed on the overcharge. The risks of multiple recovery and the concerns of complexity and remoteness were insufficient bases for precluding indirect purchasers from bringing actions against the defendants responsible for overcharges that may have been passed on to them. The deterrence function of the competition law in Canada was not likely to be impaired by indirect purchaser actions. It was not plain and obvious that there was no cause of action in unlawful means conspiracy or in intentional interference with economic interests. It was not plain and obvious that a claim in unjust enrichment would be made out only where the relationship between the plaintiff and the defendant was direct. As PSC Ltd.'s claim neither explained why a monetary award was inappropriate or insufficient nor showed a link to specific property, the claim did not satisfy the conditions necessary to ground a constructive trust. The pleadings based on constructive trust were struck. It was not plain and obvious that a cause of action in waiver of tort would not succeed.

Les demanderesses représentantes dans le cadre de l'action, la société PSC Ltd. et NG, ont déposé un recours collectif à l'encontre de la société M et la société M Canada Co. (collectivement M) faisant valoir qu'à partir de 1988, M s'était comportée de manière illégale en majorant le prix de ses systèmes d'exploitation et de ses logiciels d'application pour ordinateur. PSC Ltd. a fait valoir qu'à la suite du comportement illégal de M, elle ainsi que tous les membres du recours collectif avaient payé et continuaient de payer, pour les systèmes d'exploitation et les logiciels d'application de M, un prix supérieur à celui qu'ils auraient payé n'eût été ce comportement illégal. PSC Ltd. a demandé l'autorisation de déposer un recours collectif. Le groupe proposé était composé de consommateurs ayant acheté les produits de M auprès de revendeurs, lesquels avaient eux-mêmes acheté les produits soit directement de M ou auprès de revendeurs situés en amont dans la chaîne de distribution. PSC Ltd. a déposé sa déclaration initiale à la Cour suprême de la Colombie-Britannique. M a demandé la radiation de la demande et le rejet de l'action. Le juge de première instance a conclu, pour les besoins de l'art. 36 de la Loi sur la concurrence, à l'existence de causes d'action en responsabilité délictuelle pour complot et atteinte intentionnelle aux intérêts financiers, et en restitution pour renonciation au recours délictuel. M a interjeté appel. Les juges de la Cour d'appel ont accueilli l'appel, annulé l'ordonnance d'autorisation et rejeté l'action au motif qu'il était manifeste que les membres du groupe n'avaient pas de cause d'action. Les demanderesses ont formé un pourvoi auprès de la Cour suprême du Canada.

**Arrêt:** Le pourvoi a été accueilli et le recours collectif a été autorisé, mais les allégations fondées sur la fiducie par interprétation ont été radiées.

Rothstein, J. (McLachlin, J.C.C., LeBel, Fish, Abella, Cromwell, Moldaver, Karakatsanis, Wagner, JJ., souscrivant à son opinion) : Permettre à l'acheteur indirect d'intenter une action en justice s'accordait avec l'objectif de réparation du droit de la restitution, car la personne qui a effectivement subi un préjudice, et non seulement l'acheteur direct qui a pu en fait transférer la majoration, pouvait ainsi être indemnisée. Le risque de recouvrement multiple et les obstacles liés à la complexité de la preuve et au caractère indirect de la majoration ne constituaient pas des considérations suffisantes pour priver l'acheteur indirect d'un recours contre l'auteur de la majoration dont le montant lui aurait été transféré. Le recours de l'acheteur indirect ne porterait vraisemblablement pas atteinte à l'effet dissuasif qu'étaient censées avoir les dispositions canadiennes sur la concurrence. L'inexistence d'une cause d'action en responsabilité délictuelle pour complot en vue de recourir à des moyens illégaux ou pour atteinte intentionnelle aux intérêts financiers n'était pas manifeste. Il n'était pas manifeste que l'enrichissement sans cause ne

serait susceptible d'être établi que si le lien entre la demanderesse et la défenderesse était direct. Comme la demande de PSC Ltd. n'indiquait pas en quoi une réparation pécuniaire serait inappropriée ou insuffisante, et comme elle n'établissait pas de lien avec un bien en particulier, elle ne satisfaisait pas aux conditions d'imposition d'une fiducie par interprétation. Les allégations fondées sur la fiducie par interprétation ont été radiées. Il n'était pas manifeste que le demandeur qui fonde son action sur la renonciation au recours délictuel serait débouté.

## Table of Authorities

### Cases considered by Rothstein J.:

APPEAL from judgment reported at *Pro-Sys Consultants Ltd. v. Microsoft Corp.* (2011), 2011 CarswellBC 930, 2011 BCCA 186, 331 D.L.R. (4th) 671, 304 B.C.A.C. 90, 513 W.A.C. 90 (B.C. C.A.), setting aside certification order and dismissing action in tort for conspiracy and intentional interference with economic interests and in restitution for waiver of tort.

POURVOI à l'encontre d'un jugement publié à *Pro-Sys Consultants Ltd. v. Microsoft Corp.* (2011), 2011 CarswellBC 930, 2011 BCCA 186, 331 D.L.R. (4th) 671, 304 B.C.A.C. 90, 513 W.A.C. 90 (B.C. C.A.), ayant annulé l'ordonnance d'autorisation et ayant rejeté l'action en responsabilité délictuelle invoquant un complot et une atteinte intentionnelle aux intérêts financiers et en restitution pour renonciation au recours délictuel.

**Rothstein J. (McLachlin C.J.C. and LeBel, Fish, Abella, Cromwell, Moldaver, Karakatsanis and Wagner JJ. concurring):**

## **Introduction**

1 It is no simple task to assess liability and apportion damages in situations where the wrongdoer and the harmed parties are separated by a long and complex chain of distribution, involving many parties, purchasers, resellers and intermediaries. Such is the problem presented by indirect purchaser actions in which downstream individual purchasers seek recovery for alleged unlawful overcharges that were passed on to them through the successive links in the chain.

2 The complexities inherent in indirect purchaser actions are magnified when such actions are brought as a class proceeding. When that happens, the courts are required to grapple with not only the difficulties associated with indirect purchaser actions, but are also then asked to decide whether the requirements for certification of a class action are met. These are the questions the Court is faced with in this appeal.

## **Background**

3 The representative plaintiffs in this action, Pro-Sys Consultants Ltd. and Neil Godfrey (collectively "Pro-Sys"), brought a class action against Microsoft Corporation and Microsoft Canada Co./Microsoft Canada CIE (collectively "Microsoft") alleging that beginning in 1988, Microsoft engaged in unlawful conduct by overcharging for its Intel-compatible PC operating systems and Intel-compatible PC applications software. Pro-Sys claims that as a direct consequence of Microsoft's unlawful conduct, it and all the class members paid and continue to pay higher prices for Microsoft operating systems and applications software than they would have paid absent the unlawful conduct.

4 Pro-Sys sought certification of the action as a class proceeding under the *Class Proceedings Act*, R.S.B.C. 1996, c. 50 ("CPA").

5 The proposed class is made up of ultimate consumers who acquired Microsoft products from re-sellers, re-sellers who themselves purchased the products either directly from Microsoft or from other re-sellers higher up the chain of distribution. These consumers are known as the "indirect purchasers". The proposed class was defined in the statement of claim as

all persons resident in British Columbia who, on or after January 1, 1994, indirectly acquired a license for Microsoft Operating Systems and/or Microsoft Applications Software for their own use, and not for purposes of further selling or leasing.

([2010 BCSC 285](#) (B.C. S.C.), at para. 16)

## The Proceedings Below

### *Certification Proceedings in the British Columbia Supreme Court*

6 Pro-Sys filed its original statement of claim in the British Columbia Supreme Court ("BCSC") in December 2004. Thereafter numerous amendments to the Statement of Claim were made with the approval of Tysoe J., ultimately resulting in the Third Further Amended Statement of Claim. A Fourth Further Amended Statement of Claim has not officially been filed.

7 In 2006, Microsoft sought an order striking out the claim altogether and an order dismissing the action. In the alternative, it sought to strike out only portions of the claim. The parties agreed that the outcome of the application to strike would be determinative of the certification requirement under s. 4(1)(a) of the *CPA* that the pleadings disclose a cause of action.

8 Tysoe J. found causes of action under s. 36 of the *Competition Act*, R.S.C. 1985, c. C-34, in tort for conspiracy and intentional interference with economic interests and in restitution for waiver of tort ([2006 BCSC 1047, 57 B.C.L.R. \(4th\) 323](#) (B.C. S.C.)). He ordered that the portions of the pleadings dealing with unjust enrichment and constructive trust should be struck out as they were not sufficient to support such claims, unless they were amended by Pro-Sys. Upon further motion to amend the claims ([2006 BCSC 1738, 59 B.C.L.R. \(4th\) 111](#) (B.C. S.C.)), Tysoe J. allowed amendments to support the claims of unjust enrichment and constructive trust.

9 Following his rulings on the applications to strike and to amend, Tysoe J. was appointed to the British Columbia Court of Appeal ("BCCA"), and Myers J. assumed management of the case. Myers J. assessed the remaining certification requirements set out in s. 4(1) of the *CPA*, namely (i) whether there was an identifiable class (s. 4(1)(b)); (ii) whether the claims of the class members raised common issues (s. 4(1)(c)); (iii) whether the class action was the preferable procedure (s. 4(1)(d)); and (iv) whether Pro-Sys and Neil Godfrey could adequately represent the class (s. 4(1)(e)). Myers J. certified the action, finding that all four of the remaining requirements for certification were met ([2010 BCSC 285](#) (B.C. S.C.)). The common issues certified by Myers J. are listed in the appendix to these reasons.

### *Appeal of the Certification to the British Columbia Court of Appeal, 2011 BCCA 186, 304 B.C.A.C. 90 (B.C. C.A.)*

10 Microsoft appealed from the decisions of Tysoe and Myers JJ. The majority of the BCCA, *per* Lowry J.A. (Frankel J.A. concurring), allowed the appeal, set aside the certification order and dismissed the action, finding it plain and obvious that the class members had no cause of action under s. 4(1)(a) of the *CPA*. The majority reached this conclusion after determining that indirect purchaser actions were not available as a matter of law in Canada. As such, it did not consider the other certification requirements.

11 Donald J.A., dissenting, would have dismissed the appeal and certified the action, finding indirect purchaser actions to be permitted in Canada, and finding sufficient grounds for the action.

12 In the BCCA, the present case was heard together with another case dealing with substantially similar issues (*Sun-Rype Products Ltd. v. Archer Daniels Midland Co.*, 2011 BCCA 187, 305 B.C.A.C. 55 (B.C. C.A.)). Counsel for the plaintiffs was the same in both appeals and the appeals were heard by the same panel of judges. As in the present appeal, in *Sun-Rype*, the issue of whether indirect purchaser actions are available in Canada was determinative. In reasons released simultaneously with the reasons in this appeal, the majority of the BCCA disposed of *Sun-Rype* in the same manner, decertifying and dismissing the indirect purchasers' class action on the basis that indirect purchaser actions were not available under Canadian law. Donald J.A. dissented, finding, as in this appeal, that indirect purchaser actions were permitted.

13 Leave to appeal was granted in both cases by this Court. They were heard with another indirect purchaser class action originating in Quebec, *Option consommateurs v. Infineon Technologies AG*, 2013 SCC 59 (S.C.C.), which this Court has addressed in separate reasons, *per* LeBel and Wagner JJ. Reasons in *Sun-Rype* can be found at 2013 SCC 58 (S.C.C.).

## Analysis

14 The issues are addressed in the following order:

- (1) Did the majority of the BCCA err in finding that indirect purchaser actions were not available as a matter of law in Canada?
- (2) Were the findings of Tysoe J. as to the requirement that the pleadings disclose a cause of action under s. 4(1)(a) of the *CPA* correct?
- (3) Were the findings of Myers J. as to the balance of the certification requirements under s. 4(1) of the *CPA* correct?

### ***Indirect Purchaser Actions (the "Passing-On" Issue)***

15 In this appeal, the parties have introduced numerous issues. The one occupying the largest portion of the factums and the oral argument was the question of whether indirect purchasers have the right to bring an action to recover losses that were passed on to them. Some sources have treated this issue as one of standing. I think it more appropriate to treat it as a threshold issue to be determined before moving into the specific causes of action alleged in the certification application.

16 As I have described above, indirect purchasers are consumers who have not purchased a product directly from the alleged overcharger, but who have purchased it either from one of the overcharger's direct purchasers, or from some other intermediary in the chain of distribution. The issue is whether indirect purchasers have a cause of action against the party who has effectuated the overcharge at the top of the distribution chain that has allegedly injured them indirectly as the result of the overcharge being "passed on" down the chain to them.

17 Microsoft argues that indirect purchasers should have no such cause of action. Its submits that permitting indirect purchasers to bring an action against the alleged overcharger to recover loss that has been "passed on" would be inconsistent with this Court's jurisprudence, which it says rejected passing on as a defence. Microsoft says that the rejection of the "passing-on" *defence* necessarily entails a rejection of the *offensive* use of passing on by indirect purchasers to recover overcharges that were passed on to them. I begin with a description of the passing-on defence and then deal with its impact on indirect purchaser actions.

### ***Rejection of Passing On as a Defence***

18 The passing-on defence was typically advanced by an overcharger at the top of a distribution chain. It was invoked under the proposition that if the direct purchaser who sustained the original overcharge then passed that overcharge on to its own customers, the gain conferred on the overcharger was not at the expense of the direct purchaser because the direct purchaser suffered no loss. As such, the fact that the overcharge was "passed on" was argued to be a defence to actions brought by the direct purchaser against the party responsible for the overcharge.

19 The passing-on defence has been rejected in both Canadian and U.S. jurisprudence. It was first addressed by the Supreme Court of the United States in 1968 in *Hanover Shoe Inc. v. United Shoe Machinery Corp.*, 392 U.S. 481 (U.S. Pa. S.C. 1968). In that case, Hanover sued United for damages under U.S. antitrust laws because United would only lease, not sell, its shoe machinery, which Hanover claimed resulted in an overcharge to it. United argued that Hanover had passed on the overcharge to its own customers and had therefore suffered no harm. The U.S. Supreme Court (*per* White J., Stewart J. dissenting) rejected the passing-on defence to overcharging. It cited difficulties in ascertaining the nature and extent of the passing on of the overcharge as the reason for rejecting the defence:

Even if it could be shown that the buyer raised his price in response to, and in the amount of, the overcharge and that his margin of profit and total sales had not thereafter declined, there would remain the nearly insuperable difficulty of demonstrating that the particular plaintiff could not or would not have raised his prices absent the overcharge or maintained the higher price had the overcharge been discontinued. Since establishing the applicability of the passing-on defense would require a convincing showing of each of these virtually unascertainable figures, the task would normally prove insurmountable. [p. 493]

20 The court added that to leave the only actionable causes in the hands of the indirect purchasers who "have only a tiny stake in a lawsuit and little interest in attempting a class action", would mean that "those who violate the antitrust laws by price fixing or monopolizing would retain the fruits of their illegality" (*Hanover Shoe*, at p. 494). The court thus rejected the passing-on defence. Since *Hanover Shoe*, defendants who effectuate illegal overcharges have been precluded from employing the passing-on defence as a means of absolving themselves of liability to their direct purchasers.

21 The passing-on defence was rejected in Canada in *Kingstreet Investments Ltd. v. New Brunswick (Department of Finance)*, 2007 SCC 1, [2007] 1 S.C.R. 3 (S.C.C.), in the context of a claim for the recovery of taxes paid pursuant to *ultra vires* legislation. The dispute in that case arose out of a claim for the recovery of *ultra vires* user charges on liquor levied by the province of New Brunswick against Kingstreet Investments, whose business, among other things, involved the operation of night clubs. Bastarache J., writing for a unanimous Court, held that a public authority who had illegally overcharged a taxpayer could not reduce its liability for the overcharge simply by establishing that some or all of the overcharge was passed on to the taxpayer's customers.

22 Bastarache J. found the passing-on defence to be inconsistent with the basic premise of restitution law. Basic restitutionary principles "provide for restoration of 'what has been taken or received from the plaintiff without justification'.... Restitution law is not concerned by the possibility of the plaintiff obtaining a windfall precisely because it is not founded on the concept of compensation for loss" (*Kingstreet*, at para. 47, quoting *Commissioner of State Revenue (Victoria) v. Royal Insurance Australia Ltd.* (1994), 182 C.L.R. 51 (Australia H.C.) at p. 71). Accordingly, "[a]s between the taxpayer and the Crown, the question of whether the taxpayer has been able to recoup its loss from some other source is simply irrelevant" (*Kingstreet*, at para. 45, quoting P. D. Maddaugh and J. D. McCamus, *The Law of Restitution* (loose-leaf updated September 2005), at p. 11-45).

23 Bastarache J. also found the passing-on defence to be "economically misconceived" (*Kingstreet*, at para. 48). By this he accepted that the task of determining the ultimate location of the harm of the overcharge is "exceedingly difficult and constitutes an inappropriate basis for denying relief" (para. 44). Echoing the misgivings expressed in *Hanover Shoe*, he cited the inherent difficulty in accounting for the effects of market elasticities on the prices charged by direct purchasers as the basis for this conclusion. He found these complexities made it impossible to tell what part, if any, of the overcharge was actually passed on (*Kingstreet*, at para. 48).

24 Pro-Sys says that *Kingstreet* stands only for the rejection of the defence in the context of *ultra vires* taxes. In my view, however, there are three reasons that lead to the conclusion that Bastarache J.'s rejection of the passing-on defence in *Kingstreet* was not limited to that context.

25 First, this Court's jurisprudence supports the broader rejection of the passing-on defence. In *British Columbia v. Canadian Forest Products Ltd.*, 2004 SCC 38, [2004] 2 S.C.R. 74 (S.C.C.) ("Carfor"), the Crown claimed "diminution of the value of

the timber" that it sold, following a forest fire caused largely by Canfor. Though the Court ultimately held in that case that the Crown had not in fact suffered loss because it was able to recover its damages through the regulatory scheme it had instituted, Binnie J. stated (albeit in *obiter*) that "[i]t is not generally open to a wrongdoer to dispute the existence of a loss on the basis it has been 'passed on' by the plaintiff" because this would burden courts with "the endlessness and futility of the effort to follow every transaction to its ultimate result" (para. 111, quoting *Southern Pacific Co. v. Darnell-Taenzer Lumber Co.*, 245 U.S. 531 (U.S. Tenn. S.C. 1918), at p. 534). Likewise, in the same decision LeBel J., dissenting, though not on this point, said that "the passing-on defence, on the facts of this case and generally, must not be allowed to take hold in Canadian jurisprudence" (para. 197). To allow otherwise, LeBel J. indicated, would force a difficult burden of proof on the plaintiff to demonstrate not only that it had suffered a loss, but that it did not engage in any other transactions that would have offset the loss (para. 203).

26 In *Kingstreet*, Bastarache J. endorsed the reasons for rejecting the passing-on defence advanced by LeBel J. in the tort law context in *Canfor*, saying such rejection was of equal if not greater consequence in restitution law (para. 49).

27 Second, in *Kingstreet*, Bastarache J. found that the rejection of the passing-on defence was consistent with basic restitutionary law principles. Specifically, the rejection of the defence accords with the principle against unjust enrichment or *nullus commodum capere potest de injuria sua propria* (barring wrongdoers from benefiting from their unlawful actions). Preventing defendants from invoking passing on as a defence helps to ensure that wrongdoers are not permitted to retain their ill-gotten gains simply because it would be difficult to ascertain the precise extent of the harm. Likewise, it is important as a matter of restitutionary law to ensure that wrongdoers who overcharge their purchasers do not operate with impunity, on the grounds that complexities in tracing the overcharge through the chain of distribution will serve to shield them from liability.

28 Finally, there is support in the academic commentary for the broader rejection of the passing-on defence. Maddaugh and McCamus have stated that *Kingstreet* was an "authoritative and apparently comprehensive rejection" of the passing-on defence in Canada, and that "[i]n reaching this conclusion, the Supreme Court reflected a broad international consensus with respect to the unsuitability of this defence" (p. 11-46 of 2013 update).

29 For these reasons, I conclude that the rejection of the passing-on defence in *Kingstreet* is not limited to the context of the imposition of *ultra vires* taxes. There is no principled reason to reject the defence in one context but not another; the passing-on defence is rejected throughout the whole of restitutionary law.

### ***Significance of the Passing-On Defence in This Appeal***

30 As described above, the offensive use of passing on would provide the basis for indirect purchaser actions. Microsoft argues that this Court's rejection of the passing-on defence carries, as a necessary corollary, a corresponding rejection of the offensive use of passing on. The rationale is that the rejection should apply equally so that if overchargers are not permitted to rely on passing on in their own defence, indirect purchasers should also not be able to invoke passed on overcharges as a basis for their cause of action.

31 Microsoft relies on the 1977 decision of the U.S. Supreme Court in *Illinois Brick Co. v. Illinois*, 431 U.S. 720 (U.S. Ill. S.C. 1977). Illinois Brick manufactured concrete block and sold it to masonry contractors who in turn provided their services to general contractors. The general contractors incorporated the concrete block into buildings and sold the buildings to customers such as the State of Illinois. The State was therefore an indirect purchaser of the products of Illinois Brick (p. 726). The State alleged that Illinois Brick had engaged in a conspiracy to fix the prices of concrete block, contrary to U.S. antitrust legislation, and brought an indirect purchaser action against the company (p. 727).

32 The U.S. Supreme Court found against the State of Illinois. It held that since, according to *Hanover Shoe*, passing on may not be used defensively, it should not be available to indirect purchasers to use offensively by bringing an action alleging that an overcharge was passed down to them. The court explained that "whatever rule [was] to be adopted regarding pass-on in antitrust damages actions, it must apply equally to plaintiffs and defendants" (*Illinois Brick*, at p. 728).

33 Microsoft argues that, just as the prohibition on the offensive use of passing on in *Illinois Brick* was considered a necessary corollary to the rejection of the passing-on defence in *Hanover Shoe*, the same result should flow in Canada from the rejection

of the passing-on defence in *Kingstreet*. The passing on issue was not raised before either of the applications judges because those decisions were released prior to *Kingstreet*. However, the majority of the BCCA accepted this argument in dismissing the Pro-Sys claim.

#### *Analysis of the "Necessary Corollary" Argument*

34 As I will explain, despite the rejection of the passing-on defence, the arguments advanced by Microsoft as to why there should be a corresponding rejection of the offensive use of passing on are not persuasive. Symmetry for its own sake without adequate justification cannot support the "necessary corollary" argument. In my view, the arguments advanced by Microsoft do not provide such justification.

#### *Double or Multiple Recovery*

35 Microsoft submits that the offensive use of passing on through indirect purchaser actions leaves it exposed to liability from all purchasers in the chain of distribution. It says that its inability to employ the passing-on defence means that direct purchasers would be able to seek recovery for the entire amount of the overcharge. If, at the same time, indirect purchasers bring actions, this would result in both direct and indirect purchasers seeking recovery of the same amount. Microsoft argues that this potential for double or even multiple recovery should be a sufficient reason to reject the offensive use of passing on.

36 In *Illinois Brick*, the U.S. Supreme Court considered multiple recovery to be a "serious risk" and said that it was "unwilling to 'open the door to duplicative recoveries'" (pp. 730-31, *per* White J.):

A one-sided application of *Hanover Shoe* substantially increases the possibility of inconsistent adjudications — and therefore of unwarranted multiple liability for the defendant — by presuming that one plaintiff (the direct purchaser) is entitled to full recovery while preventing the defendant from using that presumption against the other plaintiff ....

[Emphasis deleted; p. 730.]

37 This concern cannot be lightly dismissed. However, in my view, there are countervailing arguments to be considered. Practically, the risk of duplicate or multiple recoveries can be managed by the courts. Brennan J., dissenting in *Illinois Brick*, indicated that the risk of overlapping recovery exists only where additional suits are filed after an award for damages has been made or where actions by direct and indirect purchasers are pending at the same time. In both cases, he said, the risk is remote (pp. 762-64).

38 In the first situation, Brennan J. stated that the complex and protracted nature of antitrust actions, coupled with the short four-year statute of limitations, "make it impractical for potential plaintiffs to sit on their rights until after entry of judgment in the earlier suit" (*Illinois Brick*, at p. 764). With respect to actions under the *Competition Act*, the same reasoning would apply in Canada where our competition actions are similarly complex and where legislation restricts individual recovery for damages for violations to just two years (see *Competition Act*, at s. 36(4)(a)).

39 As for the risk of double recovery where actions by direct and indirect purchasers are pending at the same time, it will be open to the defendant to bring evidence of this risk before the trial judge and ask the trial judge to modify any award of damages accordingly. In *Multiple Access Ltd. v. McCutcheon*, [1982] 2 S.C.R. 161 (S.C.C.), in discussing the risk of a plaintiff seeking double recovery under separate legal provisions, Dickson J. (as he then was), writing for the majority, held that

[t]he courts are well able to prevent double recovery in the theoretical and unlikely event of plaintiffs trying to obtain relief under both sets of provisions. ... [t]he Court at the final stage of finding and quantifying liability could prevent double recovery if in fact compensation and an accounting had already been made by a defendant. No court would permit double recovery. [p. 191]

If the defendant is able to satisfy the judge that the risk is beyond the court's control, the judge retains the discretion to deny the claim.

40 Likewise, if the defendant presents evidence of parallel suits pending in other jurisdictions that would have the potential to result in multiple recovery, the judge may deny the claim or modify the damage award in accordance with an award sought or granted in the other jurisdiction in order to prevent overlapping recovery.

41 In view of these practical tools at the courts' disposal, I would agree with Donald J.A. of the BCCA, dissenting in *Sun-Rype*, that "the double recovery rule should not in the abstract bar a claim in real life cases where double recovery can be avoided" (para. 30). At this stage of the proceeding, Microsoft has not produced evidence to demonstrate that the courts in B.C. could not preclude double or multiple recovery. I would thus not reject indirect purchaser actions because of the risk of multiple recovery.

#### *Remoteness and Complexity*

42 Microsoft's second argument is that the remoteness of the overcharge and the complexities associated with tracing the loss constitute "'serious' and 'inherent' difficulties of proof associated with pass-on" (R.F., at para. 20). These difficulties are said to give rise to confusion and uncertainty and place a burden on the institutional capacities of the courts tasked with following each overcharge to its ultimate result.

43 Microsoft relies on the reasoning of the Ontario Court of Appeal in *Chadha v. Bayer Inc.* (2003), 63 O.R. (3d) 22 (Ont. C.A.). In *Chadha*, that court denied certification of an indirect purchaser action citing "the many problems of proof facing the appellants ... , including the number of parties in the chain of distribution and the 'multitude of variables' which would affect the end-purchase price" (para. 45 (adopting the findings of the Divisional Court)). Microsoft argues that if any part of the overcharge was absorbed by any party in the chain, "the chain would be broken" and the extent of the overcharge would become increasingly difficult to trace (R.F., at para. 22, quoting *Chadha*, at para. 45). The reasons on this point in *Illinois Brick*, on which Microsoft relies heavily, point out that there are significant "uncertainties and difficulties in analyzing price and output decisions 'in the real economic world rather than an economist's hypothetical model'" (pp. 731-32). The court lamented the "costs to the judicial system and the efficient enforcement of the antitrust laws of attempting to reconstruct those decisions in the courtroom" (p. 732).

44 Indirect purchaser actions, especially in the antitrust context, will often involve large amounts of evidence, complex economic theories and multiple parties in a chain of distribution, making the tracing of the overcharges to their ultimate end an unenviable task. However, Brennan J., dissenting in *Illinois Brick*, observed that these same concerns can be raised in most antitrust cases, and should not stand in the way of allowing indirect purchasers an opportunity to make their case:

Admittedly, there will be many cases in which the plaintiff will be unable to prove that the overcharge was passed on. In others, the portion of the overcharge passed on may be only approximately determinable. But again, this problem hardly distinguishes this case from other antitrust cases. Reasoned estimation is required in all antitrust cases, but "while the damages [in such cases] may not be determined by mere speculation or guess, it will be enough if the evidence show the extent of the damages as a matter of just and reasonable inference, although the result be only approximate." ... Lack of precision in apportioning damages between direct and indirect purchasers is thus plainly not a convincing reason for denying indirect purchasers an opportunity to prove their injuries and damages. [Text in brackets in original; pp. 759-60.]

45 In bringing their action, the indirect purchasers willingly assume the burden of establishing that they have suffered loss. This task may well require expert testimony and complex economic evidence. Whether these tools will be sufficient to meet the burden of proof, in my view, is a factual question to be decided on a case-by-case basis. Indirect purchaser actions should not be barred altogether solely because of the likely complexity associated with proof of damages.

#### *Deterrence*

46 A third argument, which was not raised by Microsoft, but which was discussed in *Illinois Brick* and is particularly relevant to competition actions, is that allowing the offensive use of passing on frustrates the enforcement of competition laws, thus reducing deterrence. While enforcement of competition laws is generally a question for the government, private individuals are engaged in the enforcement by way of s. 36 which gives them a right of recovery for breaches of Part VI of the *Competition Act*.

47 The majority in *Illinois Brick* understood *Hanover Shoe* to stand for the proposition that "antitrust laws will be more effectively enforced by concentrating the full recovery for the overcharge in the direct purchasers rather than by allowing every plaintiff potentially affected by the overcharge to sue only for the amount it could show was absorbed by it" (p. 735). The majority in *Illinois Brick* agreed, finding that direct purchasers would be in the best position to bring an action because the "massive evidence and complicated theories" that are characteristic of indirect purchaser actions impose an unacceptable burden on those plaintiffs, making success of such actions unlikely and thereby defeating the deterrence objectives of antitrust laws (p. 741).

48 In my opinion, allowing the offensive use of passing on should not frustrate the deterrence objectives of Canadian competition laws. I agree with Brennan J., dissenting in *Illinois Brick*, that the offensive use of passing on, unlike the passing-on defence, creates little danger that the overcharger will escape liability and frustrate deterrence objectives but, "[r]ather, the same policies of insuring the continued effectiveness of the [antitrust] action and preventing wrongdoers from retaining the spoils of their misdeeds favor allowing indirect purchasers to prove that overcharges were passed on to them" (p. 753). The rationale for rejecting the passing-on defence because it frustrates enforcement is not a reason for denying an action to those who have a valid claim against the overcharger.

49 Further, despite evidence advanced by the respondents in the *Sun-Type* appeal that direct purchasers are often the parties most likely to take action against the overchargers, there may be some situations where direct purchasers will have been overcharged but will be reticent to bring an action against the offending party for fear of jeopardizing a valuable business relationship. In this case, it is alleged that Microsoft's direct purchasers are parties to the overcharging arrangements and would themselves not be likely plaintiffs. Indirect purchaser actions may, in such circumstances, be the only means by which overcharges are claimed and deterrence is promoted. The rejection of indirect purchaser actions in such cases would increase the possibility that the overcharge would remain in the hands of the wrongdoer. For these reasons, I would be of the view that an absolute bar on indirect purchaser actions, thus leaving any potential action exclusively to direct purchasers, would not necessarily result in more effective deterrence than exclusively direct purchaser actions.

#### *Restitutionary Principles*

50 Restitution law is remedial in nature and is concerned with the recovery of gains from wrongdoing (see Maddaugh and McCamus, at pp. 3-1 to 3-3). In my view, allowing indirect purchaser actions is consistent with the remediation objective of restitution law because it allows for compensating the parties who have actually suffered the harm rather than merely reserving these actions for direct purchasers who may have in fact passed on the overcharge.

#### *Departure From the Rule in Illinois Brick in the United States*

51 Although *Illinois Brick* remains the law at the federal level, it has been made inapplicable at the state level in many states through so-called "repealer statutes" or by judicial decisions. In 2007, the Antitrust Modernization Commission issued a report to Congress indicating that "more than thirty-five states permit indirect, as well as direct, purchasers to sue for damages under state law" (*Antitrust Modernization Commission: Report and Recommendations* (2007) (online), at p. 269). It recommended to Congress that the rule in *Illinois Brick* be statutorily repealed at the federal level (p. 270). The validity of the "repealer statutes" came before the U.S. Supreme Court in *California v. ARC America Corp.*, 490 U.S. 93 (U.S. Cal. Sup. Ct. 1989). That court held that *Illinois Brick* did not preempt the enactment of state antitrust laws, even if they had the effect of repealing the rule in *Illinois Brick*. These developments cast doubt on the "necessary corollary" approach in *Illinois Brick*.

#### *Doctrinal Commentary*

52 Doctrinal discussions of indirect purchaser actions are still shaped by the initial exchange that occurred directly following the release of *Illinois Brick*. Shortly after the judgment was issued, American scholars William M. Landes and Richard A. Posner (now a judge of the U.S. Court of Appeals for the Seventh Circuit) published an article defending the rule barring indirect purchaser actions (see "Should Indirect Purchasers Have Standing To Sue Under the Antitrust Laws? An Economic Analysis of the Rule of *Illinois Brick*" (1979), 46 U. Chi. L. Rev. 602, at pp. 634-35). They argued that reserving the right to bring an action against overchargers to the direct purchasers alone would best promote the antitrust laws. They wrote that allowing indirect

purchasers to bring actions would have little to no effect on the objectives of compensation and deterrence because direct purchasers would be more likely to discover the overcharges in the first place and would be more likely to have the information and resources required to bring a successful antitrust action. They called the direct purchaser a more "efficient enforcer" of antitrust laws, and opined that with indirect purchasers, apportionment of the damages is so costly that it becomes a disincentive to sue and that sharing the right to sue among multiple parties has the effect of making the claims small and of weakening the deterrence effect (pp. 608-9). As to compensation, they argued that even if indirect purchasers had no independent right of action, they were nonetheless compensated by the ability of direct purchasers to bring an action because the benefit accruing to the direct purchaser as a result of an anticipated successful antitrust action against the overcharger would be reflected in the prices charged by the direct purchasers to the indirect purchasers (p. 605).

53 Shortly after the publication of Posner and Landes's article, two other antitrust authorities, Robert G. Harris and Lawrence A. Sullivan, expressed an opposing viewpoint (see "[Passing On the Monopoly Overcharge: A Comprehensive Policy Analysis](#)" (1979), 128 *U. Pa. L. Rev.* 269, at pp. 351-52). Harris and Sullivan argued that direct purchasers would be reluctant to disrupt valued supplier relationships and would thus be more likely to pass on the overcharge to their own customers. They would not therefore serve as efficient enforcers of the antitrust laws and, rather, it would be more suitable to vest standing in the indirect purchasers in order to best achieve deterrence.

54 Posner and Landes published a direct response to Harris and Sullivan the next year (see "[The Economics of Passing On: A Reply to Harris and Sullivan](#)" (1980), 128 *U. Pa. L. Rev.* 1274). In response to Harris and Sullivan's argument that direct purchasers would be reticent to sue so as not to compromise valuable commercial relationships, they stated that "any forbearance by the direct purchaser to sue will be compensated. The supplier must pay something to bind the direct purchaser to him and this payment is, functionally, a form of antitrust damages" (p. 1278). In other words, the direct purchaser is receiving a financial inducement to be a part of the conspiracy and this benefit could be passed along to the indirect purchasers.

55 In the years since the exchange between Posner and Landes and Harris and Sullivan, the literature has reflected an ongoing debate on the issue of indirect purchaser actions and specifically the rule in *Illinois Brick*. A survey of the literature reveals that most recently, however, there is a significant body of academic authority in favour of repealing the decision in *Illinois Brick* in order to best serve the objectives of the antitrust laws.

56 Some authors, including Gregory J. Werden and Marius Schwartz, joined Harris and Sullivan in their critique of Posner and Landes, stating specifically that the notion that indirect purchasers would see any of the benefits accruing to a direct purchaser as the result of an anticipated recovery was "quite implausible" ("[Illinois Brick and the Deterrence of Antitrust Violations — An Economic Analysis](#)" (1984), 35 *Hastings L.J.* 629, at p. 638-39).

57 The theory that direct purchasers may be unwilling to sue for fear of disrupting an important supplier relationship has also found favour among academics (see e.g. K. J. O'Connor, "Is the *Illinois Brick* Wall Crumbling?" (2001), 15:3 *Antitrust* 34, at p. 38 (noting that indirect purchasers are perhaps more likely to sue than are direct purchasers because they do not risk severing a "direct business relationship with the alleged violator"); A. Thimmesch, "[Beyond Treble Damages: Hanover Shoe and Direct Purchaser Suits After \*Comes v. Microsoft Corp.\*](#)" (2005), 90 *Iowa L. Rev.* 1649, at p. 1668 and fn. 127 (stating that in many situations the direct purchaser is in fact dependent upon the supplier and as such would be reticent to sue)). As recently as 2012, the same opinion has been expressed: "This is especially true if direct purchasers are able to pass on any overcharges that result from antitrust violations to consumers.... [T]he Supreme Court [of the United States]'s all-or-nothing 'Indirect Purchaser Rule' sweeps too broadly" (J. M. Glover, "[The Structural Role of Private Enforcement Mechanisms in Public Law](#)" (2012), 53 *Wm. & Mary L. Rev.* 1137, at p. 1187).

58 As to the objective of compensation, several authors have commented that the rule in *Illinois Brick* in fact runs contrary to the goal of compensation, with one author calling it "[t]he most far-reaching deviation from the compensatory rationale" (C. C. Van Cott, "[Standing at the Fringe: Antitrust Damages and the Fringe Producer](#)" (1983), 35 *Stan. L. Rev.* 763, at p. 775). Likewise, Andrew I. Gavil, an antitrust scholar, has stated that "providing compensation to all victims of unlawful conduct for the harms inflicted by the wrongdoer is a secondary but also essential goal of a comprehensive remedial system, one that *Illinois*

*Brick* disserves in many common circumstances" ("Thinking Outside the *Illinois Brick* Box: A Proposal for Reform" (2009), 76 *Antitrust L.J.* 167, at p. 170).

59 As can be seen from this overview, despite initial support from well-reputed antitrust scholars, it cannot be said that the rule in *Illinois Brick* still finds favour in the academic literature.

### ***Conclusion on the Offensive Use of Passing On***

60 Although the passing-on *defence* is unavailable as a matter of restitution law, it does not follow that indirect purchasers should be foreclosed from claiming losses passed on to them. In summary:

- (1) The risks of multiple recovery and the concerns of complexity and remoteness are insufficient bases for precluding indirect purchasers from bringing actions against the defendants responsible for overcharges that may have been passed on to them.
- (2) The deterrence function of the competition law in Canada is not likely to be impaired by indirect purchaser actions.
- (3) While the passing-on defence is contrary to basic restitutive principles, those same principles are promoted by allowing passing on to be used offensively.
- (4) Although the rule in *Illinois Brick* remains good law at the federal level in the United States, its subsequent repeal at the state level in many jurisdictions and the report to Congress recommending its reversal demonstrate that its rationale is under question.
- (5) Despite some initial support, the recent doctrinal commentary favours overturning the rule in *Illinois Brick*.

For these reasons, I would not agree with Microsoft's argument that this Court's rejection of the passing-on defence in previous cases and affirmed here precludes indirect purchaser actions.

### ***Certification of the Class Action***

61 Having answered the threshold question and determined that indirect purchasers may use passing on offensively to bring an action, I turn to the question of whether the present action should be certified as a class action. Because the majority of the BCCA disposed of the appeal based on its finding that indirect purchaser actions were not available in Canada, it did not consider the certification requirements dealt with by Tysoe J. (causes of action under s. 4(1)(a) of the *CPA*) and Myers J. (balance of the certification requirements under s. 4(1)(b) to (e) of the *CPA*). It therefore remains for this Court to review the certification analysis carried out by the two applications judges. Microsoft contests their findings as to only three of the certification requirements: (1) whether the pleadings disclose a cause of action; (2) whether the claims raise common issues; and (3) whether a class action is the preferable procedure.

### ***The Requirements for Certification Under the British Columbia Class Proceedings Act***

62 Section 4(1) of the *CPA* provides:

- 4 (1) The court must certify a proceeding as a class proceeding on an application under section 2 or 3 if all of the following requirements are met:
- (a) the pleadings disclose a cause of action;
  - (b) there is an identifiable class of 2 or more persons;
  - (c) the claims of the class members raise common issues, whether or not those common issues predominate over issues affecting only individual members;

- (d) a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues;
- (e) there is a representative plaintiff who
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues, an interest that is in conflict with the interests of other class members.

***Do the Pleadings Disclose a Cause of Action?***

63 The first certification requirement requires that the pleadings disclose a cause of action. In *Elder Advocates of Alberta Society v. Alberta*, 2011 SCC 24, [2011] 2 S.C.R. 261 (S.C.C.) ("Alberta Elders"), this Court explained that this requirement is assessed on the same standard of proof that applies to a motion to dismiss, as set out in *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), at p. 980. That is, a plaintiff satisfies this requirement unless, assuming all facts pleaded to be true, it is plain and obvious that the plaintiff's claim cannot succeed (*Alberta Elders*, at para. 20; *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.), at para. 25).

64 Pro-Sys has alleged causes of action (1) under s. 36 of the *Competition Act*, (2) in tort for conspiracy and intentional interference with economic interests, and (3) in restitution for unjust enrichment, constructive trust and waiver of tort. For the reasons that follow, I would agree with Tysoe J. that the pleadings disclose causes of action that should not be struck out at this stage of the proceedings.

***Section 36 of the Competition Act***

65 Under s. 36 of the *Competition Act*, any person who has suffered loss or damage as a result of conduct engaged in by any person contrary to Part VI of the Act may sue for and recover that loss or damage. Section 36 provides:

**36.** (1) Any person who has suffered loss or damage as a result of

(a) conduct that is contrary to any provision of Part VI ...

.....

may in any court of competent jurisdiction, sue for and recover from the person who engaged in the conduct or failed to comply with the order an amount equal to the loss or damage proved to have been suffered by him, together with any additional amount that the court may allow not exceeding the full cost to him of any investigation in connection with the matter and of proceedings under this section.

66 Part VI of the *Competition Act* is entitled "Offences in Relation to Competition". The Part VI offences alleged in this appeal are (1) conspiracy, contrary to s. 45(1), and (2) false or misleading representations, contrary to s. 52(1). At the time of the hearing before Tysoe J., those provisions read as follows:

**45.** (1) [Conspiracy] Every one who conspires, combines, agrees or arranges with another person

- (a) to limit unduly the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any product,
- (b) to prevent, limit or lessen, unduly, the manufacture or production of a product or to enhance unreasonably the price thereof,

- (c) to prevent or lessen, unduly, competition in the production, manufacture, purchase, barter, sale, storage, rental, transportation or supply of a product, or in the price of insurance on persons or property, or
- (d) to otherwise restrain or injure competition unduly,

is guilty of an indictable offence and liable to imprisonment for a term not exceeding five years or to a fine not exceeding ten million dollars or to both.

**52.** (1) [False or misleading representations] No person shall, for the purpose of promoting, directly or indirectly, the supply or use of a product or for the purpose of promoting, directly or indirectly, any business interest, by any means whatever, knowingly or recklessly make a representation to the public that is false or misleading in a material respect.

67 The bulk of Microsoft's objections to the cause of action under s. 36 of the *Competition Act* are tied to the theory that offensive passing on is not permitted. In view of my earlier finding that indirect purchaser actions are permitted, those arguments are no longer of consequence in this appeal.

68 However, Microsoft also argues that the s. 36 cause of action is not properly pleaded before this Court because it was not included in Pro-Sys's statement of claim. It argues that any attempt to add it now would be barred by the two-year limitation period contained in s. 36(4) of the Act. However, Donald J.A., dissenting in the BCCA, found Microsoft's contention to be a purely technical objection, and not one that would form a basis to dismiss the claim. I would agree. The Third Further Amended Statement of Claim alleges that the unlawful conduct was continuing, a fact that must be accepted as being true for the purposes of this appeal. As a result, it cannot be said that the action was not filed in a timely manner.

69 Moreover, the Third Further Amended Statement of Claim states specifically that "[t]he plaintiffs plead and rely upon .... Part VI of the *Competition Act*" (para. 109, A.R., vol. II, at p. 48) and seeks damages accordingly. Although the Third Further Amended Statement of Claim does not expressly refer to s. 36, recovery for breaches under Part VI of the *Competition Act* may only be sought by private individuals through a claim under s. 36. I agree with Donald J.A. that "the parties put their minds to s. 36 at the certification hearing and so no surprise or prejudice can be complained of" (BCCA, at para. 59). For these reasons, I would not accede to Microsoft's argument that the claim should be barred by the limitation provision of the *Competition Act*.

70 Microsoft made other brief arguments objecting to the cause of action under s. 36. Before Tysoe J., it argued that the Competition Tribunal should have jurisdiction over the enforcement of the competition law. I agree that a number of provisions of the *Competition Act* assign jurisdiction to the Competition Tribunal rather than the courts. However, that is not the case with s. 36, which expressly provides that any person who suffered loss by virtue of a breach of Part VI of the Act may seek to recover that loss. The section expressly confers jurisdiction on the court to entertain such claims.

71 For all these reasons, it is not plain and obvious that a claim under s. 36 of the *Competition Act* would be unsuccessful. For the purposes of s. 4(1)(a) of the *CPA*, it cannot be said that the pleadings do not disclose a cause of action under s. 36 of the *Competition Act*.

#### *Tort*

72 Pro-Sys alleges that Microsoft combined with various parties to commit the economic torts of conspiracy (both predominant purpose conspiracy and unlawful means conspiracy) and unlawful interference with economic interests. A conspiracy arises when two or more parties agree "to do an unlawful act, or to do a lawful act by unlawful means" (*Mulcahy v. R. (1868)*, L.R. 3 H.L. 306 (U.K. H.L.), at p. 317). Despite the fact that the tort of conspiracy traces its origins "to the Middle Ages, [it] is not now a well-settled tort in terms of its current utility or the scope of the remedy it affords" (*Golden Capital Securities Ltd. v. Holmes*, 2004 BCCA 565, 205 B.C.A.C. 54 (B.C. C.A.), at para. 42).

73 Nonetheless, in Canada, two types of actionable conspiracy remain available under tort law: predominant purpose conspiracy and unlawful means conspiracy. I first address the arguments related to predominant purpose conspiracy. I then turn

to unlawful means conspiracy and unlawful interference with economic interests and deal with them together, as the arguments against these causes of action relate to the "unlawful means" requirement common to both torts.

### Predominant Purpose Conspiracy

74 Predominant purpose conspiracy is made out where the predominant purpose of the defendant's conduct is to cause injury to the plaintiff using either lawful or unlawful means, and the plaintiff does in fact suffer loss caused by the defendant's conduct. Where lawful means are used, if their object is to injure the plaintiff, the lawful acts become unlawful (*Canada Cement Lafarge Ltd. v. British Columbia Lightweight Aggregate Ltd.*, [1983] 1 S.C.R. 452 (S.C.C.), at pp. 471-72).

75 It is worth noting that in *Cement Lafarge*, Estey J. wrote that predominant purpose conspiracy is a "commercial anachronism" and that the approach to this tort should be to restrict its application:

The tort of conspiracy to injure, even without the extension to include a conspiracy to perform unlawful acts where there is a constructive intent to injure, has been the target of much criticism throughout the common law world. It is indeed a commercial anachronism as so aptly illustrated by Lord Diplock in *Lonrho, supra*, at pp. 188-89. In fact, the action may have lost much of its usefulness in our commercial world, and survives in our law as an anomaly. Whether that be so or not, it is now too late in the day to uproot the tort of conspiracy to injure from the common law. No doubt the reaction of the courts in the future will be to restrict its application for the very reasons that some now advocate its demise. [p. 473]

Notwithstanding these observations, whether predominant purpose conspiracy should be restricted so as not to apply to the facts of this case is not a matter that should be determined on an application to strike pleadings.

76 At para. 91 of its Third Further Amended Statement of Claim, in a section discussing both predominant purpose and unlawful means conspiracy, Pro-Sys states that "[t]he defendants were motivated to conspire" and then lists the defendants' three "predominant purposes and predominant concerns": (1) to harm the plaintiffs by requiring them to purchase Microsoft products rather than competitors' products; (2) to harm the plaintiffs by requiring them to pay artificially high prices; and (3) to unlawfully increase their profits (A.R., vol. II, at p. 43).

77 Microsoft argues that the tort of predominant purpose conspiracy is not made out because Pro-Sys's statement of claim fails to identify one true predominant purpose and instead lists several "overlapping purpose[s]" (R.F., at para. 93). Microsoft submits that by pleading that it was "motivated solely by economic considerations" (R.F., at para. 94), Pro-Sys in effect concedes that the predominant purpose of Microsoft's alleged conduct could not have been to cause injury to the plaintiff as required under the law.

78 There is disagreement between the parties as to what the pleadings mean. Microsoft says that Pro-Sys failed to identify injury to the plaintiffs as the one true predominant purpose. Pro-Sys argues that its pleadings state that Microsoft acted with the predominant purpose of injuring the class members which resulted in, among other things, increased profits. While the pleadings could have been drafted with a more precise focus, I would hesitate on a pleadings application to rule definitively that the predominant purpose conspiracy pleading is so flawed that no cause of action is disclosed. At this stage, I cannot rule out Pro-Sys's explanation that Microsoft's primary intent was to injure the plaintiffs and that unlawfully increasing its profits was a result of that intention. For this reason, I cannot say it is plain and obvious that Pro-Sys's claim in predominant purpose conspiracy cannot succeed.

79 Microsoft also argues that this claim should be struck to the extent it applies as between corporate affiliates because "[p]arent and wholly-owned subsidiary corporations always act in combination" (R.F., at para. 95). Pro-Sys says that "[t]his is not true as a matter of law" (appellants response factum, at para. 55). Both parties cite, among other cases, para. 19 of *Smith v. National Money Mart Co. (2006)*, 80 O.R. (3d) 81 (Ont. C.A.), leave to appeal refused, [2006] 1 S.C.R. xii (note) (S.C.C.), which says that "there can be a conspiracy between a parent and a subsidiary corporation". In my view, this statement appears to leave open a cause of action in predominant purpose conspiracy even when the conspiracy is between affiliated corporations. Again, it would not be appropriate on a pleadings application to make a definitive ruling on this issue. In the circumstances, I cannot say it is plain and obvious that the predominant purpose conspiracy claim as it applies to an alleged conspiracy between a parent corporation and its subsidiaries should be struck at this phase of the proceedings.

### **Unlawful Means Conspiracy and Intentional Interference With Economic Interests**

80 The second type of conspiracy, called "unlawful means conspiracy", requires no predominant purpose but requires that the unlawful conduct in question be directed toward the plaintiff, that the defendant should know that injury to the plaintiff is likely to result, and that the injury to the plaintiff does in fact occur (*Cement LaFarge*, at pp. 471-72).

81 The tort of intentional interference with economic interests aims to provide a remedy to victims of intentional commercial wrongdoing (*Correia v. Canac Kitchens*, 2008 ONCA 506, 91 O.R. (3d) 353 (Ont. C.A.), at para. 98; *OBG Ltd. v. Allan*, [2007] UKHL 21, [2008] 1 A.C. 1 (U.K. H.L.)). The three essential elements of this tort are (1) the defendant intended to injure the plaintiff's economic interests; (2) the interference was by illegal or unlawful means; and (3) the plaintiff suffered economic loss or harm as a result (see P. H. Osborne, *The Law of Torts* (4th ed. 2011), at p. 336).

82 Microsoft argues that the claims for unlawful means conspiracy and intentional interference with economic interests should be struck because their common element requiring the use of "unlawful means" cannot be established.

83 These alleged causes of action must be dealt with summarily as the proper approach to the unlawful means requirement common to both torts is presently under reserve in this Court in *A.I. Enterprises Ltd. v. Bram Enterprises Ltd.*, 2012 NBCA 33, 387 N.B.R. (2d) 215 (N.B. C.A.), leave to appeal granted, [2012] 3 S.C.R. v (note) (S.C.C.). Suffice it to say that at this point it is not plain and obvious that there is no cause of action in unlawful means conspiracy or in intentional interference with economic interests. I would therefore not strike these claims. Depending on the decision of this Court in *Bram*, it will be open to Microsoft to raise the matter in the BCSC should it consider it advisable to do so.

#### *Restitution*

84 Pro-Sys makes restitutionary claims alleging causes of action in unjust enrichment, constructive trust and waiver of tort.

### **Unjust Enrichment**

85 The well-known elements required to establish an unjust enrichment are (1) an enrichment of the defendant; (2) a corresponding deprivation of the plaintiff; and (3) an absence of juristic reason (such as a contract) for the enrichment (see *Alberta Elders*, at para. 82; *Garland v. Consumers' Gas Co.*, 2004 SCC 25, [2004] 1 S.C.R. 629 (S.C.C.), at para. 30; *Rathwell v. Rathwell*, [1978] 2 S.C.R. 436 (S.C.C.), at p. 455; *Becker v. Pettikus*, [1980] 2 S.C.R. 834 (S.C.C.)). Pro-Sys says that Microsoft was unjustly enriched by the overcharge to its direct purchasers that was passed through the chain of distribution to the class members.

86 Microsoft argues that any enrichment it received came from the direct purchasers, and not from the class members, and that this lack of a direct connection between it and the class members forecloses the claim of unjust enrichment. Additionally, it says that the contracts between Microsoft and the direct purchasers and the contracts between the direct purchasers and the indirect purchasers (the existence of which are undisputed) constitute a juristic reason for the enrichment.

87 In support of its first argument, Microsoft cites *Peel (Regional Municipality) v. Canada*, [1992] 3 S.C.R. 762 (S.C.C.). In *Peel*, McLachlin J. (as she then was) held, at p. 797, that "[t]he cases in which claims for unjust enrichment have been made out generally deal with benefits conferred directly and specifically on the defendant". A claim in unjust enrichment must be based on "more than an incidental blow-by. A secondary collateral benefit will not suffice. To permit recovery for incidental collateral benefits would be to admit of the possibility that a plaintiff could recover twice — once from the person who is the immediate beneficiary of the payment or benefit ..., and again from the person who reaped an incidental benefit" (*Peel*, at p. 797). The words of *Peel* themselves would appear to foreclose the possibility of an indirect relationship between plaintiff and defendant. However, this does not resolve the issue. First, it is not apparent that the benefit to Microsoft is an "incidental blow-by" or "collateral benefit". Second, Pro-Sys relies on *Alberta Elders*, which it says stands for the proposition that an unjust enrichment may be possible where the benefit was indirect and was passed on by a third party. At this stage, I cannot conclude

that it is plain and obvious that a claim in unjust enrichment will be made out only where the relationship between the plaintiff and the defendant is direct.

88 With regard to Microsoft's juristic reason justification, Pro-Sys pleads that these contracts are "illegal and void" because they constitute a restraint of trade at common law, they violate U.S. antitrust law, they are prohibited by Microsoft's own corporate policies and they violate Part VI of the *Competition Act*. It submits that the contracts cannot therefore constitute a juristic reason for the enrichment. The question of whether the contracts are illegal and void should not be resolved at this stage of the proceedings. These are questions that must be left to the trial judge.

89 I am thus unable to find that it is plain and obvious that the claim in unjust enrichment cannot succeed.

### **Constructive Trust**

90 As a remedy for the alleged unjust enrichment, Pro-Sys submits that an amount equal to the overcharge from the sales of Microsoft operating systems and Microsoft applications software in British Columbia should be held by Microsoft in trust for the class members. In other words, Pro-Sys is asking that Microsoft be constituted a constructive trustee in favour of Pro-Sys.

91 *Kerr v. Baranow*, 2011 SCC 10, [2011] 1 S.C.R. 269 (S.C.C.), is the relevant controlling authority on constructive trusts. In *Kerr*, Justice Cromwell explains that in order to find that a constructive trust is made out, the plaintiff must be able to point to a link or causal connection between his or her contribution and the acquisition of specific property:

... the constructive trust is a broad and flexible equitable tool used to determine beneficial entitlement to property (*Pettkus*, at pp. 843-44 and 847-48). Where the plaintiff can demonstrate a link or causal connection between his or her contributions and the acquisition, preservation, maintenance or improvement of the disputed property, a share of the property proportionate to the unjust enrichment can be impressed with a constructive trust in his or her favour (*Pettkus*, at pp. 852-53; *Sorochan*, at p. 50). [para. 50]

92 In the present case, there is no referential property; Pro-Sys makes a purely monetary claim. Constructive trusts are designed to "determine beneficial entitlement to property" when "a monetary award is inappropriate or insufficient" (*Kerr*, at para. 50). As Pro-Sys's claim neither explains why a monetary award is inappropriate or insufficient nor shows a link to specific property, the claim does not satisfy the conditions necessary to ground a constructive trust. On the pleadings, it is plain and obvious that Pro-Sys's claim that an amount equal to the overcharge from the sale of Microsoft operating systems and Microsoft applications software in British Columbia should be held by Microsoft in trust for the class members cannot succeed. The pleadings based on constructive trust must be struck.

### **Waiver of Tort**

93 As an alternative to the causes of action in tort, Pro-Sys waives the tort and seeks to recover the unjust enrichment accruing to Microsoft. Waiver of tort occurs when the plaintiff gives up the right to sue in tort and elects instead to base its claim in restitution, "thereby seeking to recoup the benefits that the defendant has derived from the tortious conduct" (Maddaugh and McCamus, at p. 24-1). Causes of action in tort and restitution are not mutually exclusive, but rather provide alternative remedies that may be pursued concurrently (*United Australia Ltd. v. Barclays Bank Ltd.* (1940), [1941] A.C. 1 (U.K. H.L.), at p. 18). Waiver of tort is based on the theory that "in certain situations, where a tort has been committed, it may be to the plaintiff's advantage to seek recovery of an unjust enrichment accruing to the defendant rather than normal tort damages" (Maddaugh and McCamus, at pp. 24-1 and 24-2). An action in waiver of tort is considered by some to offer the plaintiff an advantage in that "it may relieve them of the need to prove loss in tort, or in fact at all (Maddaugh and McCamus, at p. 24-4).

94 Microsoft advances two arguments as to why this claim should be struck. First, it states that Pro-Sys has pleaded waiver of tort as a remedy and not a cause of action, and therefore proof of loss is an essential element. Second, if indeed waiver of tort is pleaded as a cause of action, the underlying tort must therefore be established, including the element of loss. In my view, neither argument provides a sufficient basis upon which to find that a claim in waiver of tort would plainly and obviously be unsuccessful.

95 In *Serhan Estate v. Johnson & Johnson* (2006), 85 O.R. (3d) 665 (Ont. Div. Ct.), Epstein J. (as she then was) performed an extensive review of the doctrine of waiver of tort. Her analysis found numerous authorities accepting the viability of waiver of tort as its own cause of action intended to disgorge a defendant's unjust enrichment gained through wrongdoing, as opposed to merely a remedy for unjust enrichment. These authorities differed, however, as to the question of whether the underlying tort needed to be established in order to sustain the action in waiver of tort.

96 The U.S. and U.K. jurisprudence as well as the academic texts on the subject have largely rejected the requirement that the underlying tort must be established in order for a claim in waiver of tort to succeed (see *Serhan*, at paras. 51-68, citing Maddaugh and McCamus at p. 24-20 of 2005 update; J. Beatson, *The Use and Abuse of Unjust Enrichment: Essays on the Law of Restitution* (1991); D. Friedmann, "Restitution for Wrongs: The Basis of Liability", in W. R. Cornish, et al., eds., *Restitution: Past, Present and Future: Essays in Honour of Gareth Jones* (1998), 133; *National Trust Co. v. Gleason*, 77 N.Y. 400 (U.S. N.Y. Ct. App. 1879); *Federal Sugar Refining Co. v. United States Sugar Equalization Board Inc.*, 268 F. 575 (U.S. D.C. N.Y. 1920); *Mahesan v. Malaysia Housing Society* (1977), [1979] A.C. 374 (Malaysia P.C.); *Universe Tankships Inc. of Monrovia v. International Transport Workers' Federation* (1982), [1983] 1 A.C. 366 (U.K. H.L.)). Another line of cases would find a cause of action in waiver of tort to be unavailable unless it can be established that the defendant has committed the underlying tort giving rise to the cause of action (see *United Australia*, at p. 18; *Zidaric v. Toshiba of Canada Ltd.* (2000), 5 C.C.L.T. (3d) 61 (Ont. S.C.J.), at para. 14; *Reid v. Ford Motor Co.*, 2006 BCSC 712 (B.C. S.C.)). At least one of these cases (*Reid*) suggests that a reluctance to eliminate the requirement of proving loss as an element of the cause of action is part of the reason for requiring the establishment of the underlying tort (para. 17).

97 Epstein J. ultimately concluded that, given this contradictory law, "[c]learly, it cannot be said that an action based on waiver of tort is sure to fail" and that the questions "about the consequences of identifying waiver of tort as an independent cause of action in circumstances such as exist here, involv[e] matters of policy that should not be determined at the pleadings stage" (*Serhan*, at para. 68). I agree. In my view, this appeal is not the proper place to resolve the details of the law of waiver of tort, nor the particular circumstances in which it can be pleaded. I cannot say that it is plain and obvious that a cause of action in waiver of tort would not succeed.

### ***The Remaining Certification Requirements***

98 The causes of action under s. 36 of the *Competition Act*, in tort and in restitution (except for constructive trust) have met the first certification requirement that the pleadings disclose a cause of action. I now turn to Microsoft's argument that the claims should nevertheless be rejected because they do not meet two of the remaining certification requirements: that the claims of the class members raise common issues and that a class action is the preferable procedure in this case.

#### ***Standard of Proof***

99 The starting point in determining the standard of proof to be applied to the remaining certification requirements is the standard articulated in this Court's seminal decision in *Hollick*. In that case, McLachlin C.J. succinctly set out the standard: "... the class representative must show *some basis in fact* for each of the certification requirements set out in ... the Act, other than the requirement that the pleadings disclose a cause of action" (para. 25 (emphasis added)). She noted, however, that "the certification stage is decidedly not meant to be a test of the merits of the action" (para. 16). Rather, this stage is concerned with form and with whether the action can properly proceed as a class action (see *Hollick*, at para. 16; *Pro-Sys Consultants Ltd. v. Infineon Technologies AG*, 2009 BCCA 503, 98 B.C.L.R. (4th) 272 (B.C. C.A.) ("Infineon") at para. 65; *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.), at para. 50).

100 The *Hollick* standard of proof asks not whether there is some basis in fact for the claim itself, but rather whether there is some basis in fact which establishes each of the individual certification requirements. McLachlin C.J. did, however, note in *Hollick* that evidence has a role to play in the certification process. She observed that "the *Report of the Attorney General's Advisory Committee on Class Action Reform* clearly contemplates that the class representative will have to establish an evidentiary basis for certification" (para. 25).

101 Microsoft, while accepting the "some basis in fact" standard, argues that "in order for the Plaintiffs to meet the standard of proof, the evidence must establish that the proposed class action raises common issues and is the preferable procedure *on a balance of probabilities*" (R.F., at para. 41 (emphasis in original)). Microsoft relies on the academic writings of Justice Cullity of the Ontario Superior Court of Justice. Cullity J. expressed the view that "[t]o the extent that some basis in fact reflects a concern that certification motions are procedural and should not be concerned with the merits of the claims asserted, there seems no justification for applying the lesser standard to essential preconditions for certification that will not be within the jurisdiction of the court at trial" ("Certification in Class Proceedings — The Curious Requirement of 'Some Basis in Fact'" (2011), 51 *Can. Bus. L.J.* 407, at p. 422). In other words, Cullity J. suggests that because certification requirements are procedural, they will not be revisited at a trial of the common issues. As such, there is no reason to assess them on a standard lower than the traditional civil standard of "balance of probabilities". Microsoft further submits that this Court should endorse the American approach of making factual determinations at the certification stage on a preponderance of the evidence and should require certification judges to weigh the evidence so as to resolve all factual or legal disputes at certification, even if those disputes overlap with the merits (see R.F., at para. 42, citing *In re Hydrogen Peroxide Antitrust Litigation*, 552 F.3d 305 (U.S. C.A. 3rd Cir. 2008), at p. 307, and para. 43).

102 I cannot agree with Microsoft's submissions on this issue. Had McLachlin C.J. intended that the standard of proof to meet the certification requirements was a "balance of probabilities", that is what she would have stated. There is nothing obscure here. The *Hollick* standard has never been judicially interpreted to require evidence on a balance of probabilities. Further, Microsoft's reliance on U.S. law is novel and departs from the *Hollick* standard. The "some basis in fact" standard does not require that the court resolve conflicting facts and evidence at the certification stage. Rather, it reflects the fact that at the certification stage "the court is ill-equipped to resolve conflicts in the evidence or to engage in the finely calibrated assessments of evidentiary weight" (*Cloud*, at para. 50; *Irving Paper Ltd. v. Atofina Chemicals Inc.* (2009), 99 O.R. (3d) 358 (Ont. S.C.J.), at para. 119, citing *Hague v. Liberty Mutual Insurance Co.* (2004), 13 C.P.C. (6th) 1 (Ont. S.C.J.)). The certification stage does not involve an assessment of the merits of the claim and is not intended to be a pronouncement on the viability or strength of the action; "rather, [it] focuses on the form of the action in order to determine whether the action can appropriately go forward as a class proceeding" (*Infineon*, at para. 65).

103 Nevertheless, it has been well over a decade since *Hollick* was decided, and it is worth reaffirming the importance of certification as a meaningful screening device. The standard for assessing evidence at certification does not give rise to "a determination of the merits of the proceeding" (*CPA*, s. 5(7)); nor does it involve such a superficial level of analysis into the sufficiency of the evidence that it would amount to nothing more than symbolic scrutiny.

104 In any event, in my respectful opinion, there is limited utility in attempting to define "some basis in fact" in the abstract. Each case must be decided on its own facts. There must be sufficient facts to satisfy the applications judge that the conditions for certification have been met to a degree that should allow the matter to proceed on a class basis without foundering at the merits stage by reason of the requirements of s. 4(1) of the *CPA* not having been met.

105 Finally, I would note that Canadian courts have resisted the U.S. approach of engaging in a robust analysis of the merits at the certification stage. Consequently, the outcome of a certification application will not be predictive of the success of the action at the trial of the common issues. I think it important to emphasize that the Canadian approach at the certification stage does not allow for an extensive assessment of the complexities and challenges that a plaintiff may face in establishing its case at trial. After an action has been certified, additional information may come to light calling into question whether the requirements of s. 4(1) continue to be met. It is for this reason that enshrined in the *CPA* is the power of the court to decertify the action if at any time it is found that the conditions for certification are no longer met (s. 10(1)).

#### *Do the Claims of the Class Members Raise Common Issues?*

106 The commonality requirement has been described as "[t]he central notion of a class proceeding" (M. A. Eizenga, et al., *Class Actions Law and Practice* (loose-leaf), at p. 3-34.6). It is based on the notion that "individuals who have litigation

concerns 'in common' ought to be able to resolve those common concerns in one central proceeding rather than through an inefficient multitude of repetitive proceedings" (*Ibid.*).

107 Section 4(1)(c) of the *CPA* states that the court must certify an action as a class proceeding if, among other requirements, "the claims of the class members raise common issues, whether or not those common issues predominate over issues affecting only individual members". Section 1 of the *CPA* defines "common issues" as "(a) common but not necessarily identical issues of fact, or (b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts".

108 In *Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46, [2001] 2 S.C.R. 534 (S.C.C.), this Court addressed the commonality question, stating that "the underlying question is whether allowing the suit to proceed as a [class action] will avoid duplication of fact-finding or legal analysis" (para. 39). I list the balance of McLachlin C.J.'s instructions, found at paras. 39-40 of that decision:

- (1) The commonality question should be approached purposively.
- (2) An issue will be "common" only where its resolution is necessary to the resolution of each class member's claim.
- (3) It is not essential that the class members be identically situated *vis-à-vis* the opposing party.
- (4) It is not necessary that common issues predominate over non-common issues. However, the class members' claims must share a substantial common ingredient to justify a class action. The court will examine the significance of the common issues in relation to individual issues.
- (5) Success for one class member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent.

109 Microsoft argues that the differences among the proposed class members are too great to satisfy the common issues requirement. It argues that the plaintiffs allege they were injured by multiple separate instances of wrongdoing, that these acts occurred over a period of 24 years and had to do with 19 different products, and that various co-conspirators and countless licences are implicated. Microsoft also argues that the fact that the overcharge has been passed on to the class members through the chain of distribution makes it unfeasible to prove loss to each of the class members for the purposes of establishing common issues.

110 The multitude of variables involved in indirect purchaser actions may well present a significant challenge at the merits stage. However, there would appear to be a number of common issues that are identifiable. In order to establish commonality, evidence that the acts alleged actually occurred is not required. Rather, the factual evidence required at this stage goes only to establishing whether these questions are common to all the class members.

111 Myers J. concluded that the claims raised common issues. I agree that their resolution is indeed necessary to the resolution of the claims of each class member. Their resolution would appear to advance the claims of the entire class and to answer them commonly will avoid duplication in legal and factual analysis. Those findings are entitled to deference from an appellate court.

112 The differences cited by Microsoft are, in my view, insufficient to defeat a finding of commonality. *Dutton* confirms that even a significant level of difference among the class members does not preclude a finding of commonality. In any event, as McLachlin C.J. stated, "[i]f material differences emerge, the court can deal with them when the time comes" (*Dutton*, at para. 54).

113 In addition to the common issues relating to scope and existence of the causes of action pleaded, the remaining common issues certified by Myers J. relate to the alleged loss suffered by the class members and as to whether damages can be calculated on an aggregate basis. The loss-related common issues, that is to say the proposed common issues that ask whether loss to the class members can be established on a class-wide basis, require the use of expert evidence in order for commonality to be established. The standard upon which that evidence should be assessed is contested and I turn to it first below. A question was also raised regarding whether the aggregate damages provision can be used to establish liability. I also address this below.

## Expert Evidence in Indirect Purchaser Class Actions

114 One area in which difficulty is encountered in indirect purchaser actions is in assessing the commonality of the harm or loss-related issues. In order to determine if the loss-related issues meet the "some basis in fact" standard, some assurance is required that the questions are capable of resolution on a common basis. In indirect purchaser actions, plaintiffs generally seek to satisfy this requirement through the use of expert evidence in the form of economic models and methodologies.

115 The role of the expert methodology is to establish that the overcharge was passed on to the indirect purchasers, making the issue common to the class as a whole (see *Chadha*, at para. 31). The requirement at the certification stage is not that the methodology quantify the damages in question; rather, the critical element that the methodology must establish is the ability to prove "common impact", as described in the U.S. antitrust case of *Linerboard Antitrust Litigation, Re*, 305 F.3d 145, 53 Fed. R. Serv. 3d 999 (U.S. C.A. 3rd Cir. 2002). That is, plaintiffs must demonstrate that "sufficient proof [is] available, for use at trial, to prove antitrust impact common to all the members of the class" (*ibid.*, at p. 155). It is not necessary at the certification stage that the methodology establish the actual loss to the class, as long as the plaintiff has demonstrated that there is a methodology capable of doing so. In indirect purchaser actions, this means that the methodology must be able to establish that the overcharges have been passed on to the indirect-purchaser level in the distribution chain.

116 The most contentious question involving the use of expert evidence is how strong the evidence must be at the certification stage to satisfy the court that there is a method by which impact can be proved on a class-wide basis. The BCCA in *Infineon* called for the plaintiff to show "only a credible or plausible methodology" and held that "[i]t was common ground that statistical regression analysis is in theory capable of providing reasonable estimates of gain or aggregate harm and the extent of pass-through in price-fixing cases" (para. 68). This was the standard adopted by Myers J. in the present case. Under this standard, he found the plaintiffs' methodologies to be adequate to satisfy the commonality requirement.

117 Microsoft submits that the "credible or plausible methodology" standard adopted by Myers J. was too permissive and allowed for a claim to be founded on insufficient evidence. It argues that under s. 5(4) of the *CPA*, the parties are required to file affidavits containing all material facts upon which they intend to rely, and as such Myers J. was under an obligation to weigh the evidence of both parties where a conflict arises. Microsoft alleges that despite this requirement, Myers J. failed to weigh Pro-Sys's expert evidence against Microsoft's expert evidence, merely concluding that Pro-Sys's expert evidence was "not implausible" and that assessing competing evidence was "not something that can and should be done in a certification application" (R.F., at para. 43, citing reasons of Myers J., at para. 144). Microsoft argues that this approach was in error and is inconsistent with the standard required at certification. Once again relying on U.S. case law, Microsoft urges this Court to weigh conflicting expert testimony at certification and to perform this review in a "robust" and "rigorous" manner (R.F., at paras. 45-48, citing *Hydrogen Peroxide*, at p. 323, and *Wal-Mart Stores, Inc. v. Dukes*, 131 S.Ct. 2541 (U.S. Sup. Ct. 2011), at p. 2551).

118 In my view, the expert methodology must be sufficiently credible or plausible to establish some basis in fact for the commonality requirement. This means that the methodology must offer a realistic prospect of establishing loss on a class-wide basis so that, if the overcharge is eventually established at the trial of the common issues, there is a means by which to demonstrate that it is common to the class (i.e. that passing on has occurred). The methodology cannot be purely theoretical or hypothetical, but must be grounded in the facts of the particular case in question. There must be some evidence of the availability of the data to which the methodology is to be applied.

119 To hold the methodology to the robust or rigorous standard suggested by Microsoft, for instance to require the plaintiff to demonstrate actual harm, would be inappropriate at the certification stage. In Canada, unlike the U.S., pre-certification discovery does not occur as a matter of right. Although document production may be ordered at the discretion of the applications judge, Microsoft objected and Myers J. acceded to Microsoft's position and refused to order it in this case (2007 BCSC 1663, 76 B.C.L.R. (4th) 171 (B.C. S.C. [In Chambers])). Microsoft can hardly argue for rigorous and robust scrutiny when it objected to pre-certification discovery and was successful before the applications judge.

120 Here, the Pro-Sys expert evidence consists of methodologies proposed by two economists, Professor James Brander and Dr. Janet Netz. Professor Brander's affidavit identified him as the Asia-Pacific Professor of International Business in the Sauder School of Business at the University of British Columbia and senior consultant in the Delta Economics Group. Dr. Netz's affidavit described her as an economist, a founding partner of ApplEcon LLC, an economics consulting firm based in Ann Arbor, Michigan, a tenured Associate Professor of Economics at Purdue University and a Visiting Associate Professor at the University of Michigan. Dr. Netz acted as expert witness in several similar cases brought against Microsoft in the United States. Dr. Netz's testimony drew heavily from the evidence she had prepared in her role as expert in those U.S. cases.

121 It is Dr. Netz's evidence that the same methodology that applied in the U.S. would apply equally to the case at bar. She testified that the methodologies can demonstrate the initial overcharges by Microsoft to its direct purchasers as well as the pass-through to the indirect purchasers. Dr. Netz outlines three alternative methods by which harm and damages can be calculated. The first two methods, called the "rate of return method" and the "profit margin method", identify the overcharge at the first level of the distribution chain — that is, the overcharge in the sales made directly by Microsoft to its own customers. The first two models do not on their own establish that the overcharge was passed on but are intended to prove the total amount received by Microsoft as a result of the overcharge. The third methodology, the "price premium method", begins the analysis at the other end of the distribution chain, at the ultimate-purchaser level.

122 Dr. Netz describes the price premium method as follows:

Under this method, one calculates the *retail* price premium that Microsoft products have relative to competing products for the products at issue and for a set of benchmark products where there have not been allegations of anticompetitive conduct. The overcharge equals the percentage decrease in the *retail* price of the products at issue such that Microsoft would still realize the same *retail* price premium as it does on the benchmark products (i.e., products in markets not affected by Microsoft's unlawful conduct). [2010 BCSC 285, at para. 26]

123 Once the retail price overcharge is calculated, the total class member expenditure on the products should then be multiplied by the overcharge percentage in order to arrive at the quantum of damages.

124 Dr. Netz testified that regression analysis could be employed to ascertain the extent of passing on in order to establish loss at the indirect-purchaser level. Relying on the successful application of the methods in the U.S., Dr. Netz testified that "[t]here is no theoretical reason, in my opinion, why the methods described above cannot be applied to the sales of Microsoft software in Canada" (Netz affidavit, at para. 49 (A.R., vol. II, at p. 177)). Implicit in this evidence is that the data necessary to apply the methodologies in Canada is available.

125 Myers J. dealt with Microsoft's criticisms of Dr. Netz's testimony at paras. 131-64 of his reasons. Microsoft's criticisms pertained to her alleged failure to take Canadian context into account, the lack of an evidentiary basis for her findings, alleged flaws in the benchmark products she selected, and a lack of workability in her proposed methodology. Myers J. found that despite these criticisms, Dr. Netz had demonstrated a plausible methodology for proving class-wide loss. He therefore did not proceed to address Professor Brander's proposed methods (para. 164).

126 It is indeed possible that at trial the expert evidence presented by Microsoft will prove to be stronger and more credible than the evidence of Dr. Netz and Professor Brander. However, resolving conflicts between the experts is an issue for the trial judge and not one that should be engaged in at certification (see *Infineon*, at para. 68; *Irving*, at para. 143). The trial judge will have the benefit of a full record upon which to assess the appropriateness of any damages award that may be made pursuant to the proposed methodology. For the purposes of certification and having regard to the deference due the applications judge on this issue, I would not interfere with the findings of Myers J. as to the commonality of the loss-related issues.

### Aggregate Assessment of Damages

127 The issue raised here is whether the question of aggregate assessment of damages is properly certified as a common issue. The aggregate damages provisions in the *CPA* provide for the quantification of the monetary award on a class-wide basis. Sections 29(1) and 29(2) of the *CPA* are relevant:

**29** (1) The court may make an order for an aggregate monetary award in respect of all or any part of a defendant's liability to class members and may give judgment accordingly if

- (a) monetary relief is claimed on behalf of some or all class members,
- (b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability, and
- (c) the aggregate or a part of the defendant's liability to some or all class members can reasonably be determined without proof by individual class members.

(2) Before making an order under subsection (1), the court must provide the defendant with an opportunity to make submissions to the court in respect of any matter touching on the proposed order including, without limitation,

- (a) submissions that contest the merits or amount of an award under that subsection, and
- (b) submissions that individual proof of monetary relief is required due to the individual nature of the relief.

128 In this case, the common issues that were certified are whether damages can be determined on an aggregate basis and if so, in what amount. For the reasons below, I would not disturb the applications judge's decision to certify these common issues. However, while the aggregate damages common issues certified by Myers J. deal only with the assessment of damages and not proof of loss, there is some confusion in his reasons about whether the aggregate damages provisions of the *CPA* may be relied on to establish proof of loss where proof of loss is an essential element of proving liability. That question has been resolved differently by various courts in Ontario and British Columbia, where the aggregate damages provisions are sufficiently similar to allow comparison.

129 In this case, Myers J. concluded that the aggregate damages provisions can be used to establish what I interpret to be the proof of loss element of proving liability. He stated that: "... the aggregate damages section of the *Class Proceedings Act* allow the harm to be shown in the aggregate to the class as a whole" (para. 126), and also that "the Court of Appeal must be taken to have accepted that for certification of the damage claims, a method of showing harm to all class members need not be demonstrated and, further, that the aggregate damages sections can be used to establish liability" (BCSC, at para. 125).

130 In finding that the aggregate damages provisions of the *CPA* can be used to establish proof of loss to the class as a whole, Myers J. followed a line of jurisprudence of the British Columbia Court of Appeal. This reasoning appears in *Infineon*:

In *Knight*, this Court affirmed the certification of an aggregate monetary award under the *CPA* as a common issue in a claim for disgorgement of the benefits of the defendants' wrongful conduct without an antecedent liability finding — rather, the aggregate assessment would establish concurrently both that the defendant benefited from its wrongful conduct and the extent of the benefit. [para. 39]

(see also *Steele v. Toyota Canada Inc.*, 2011 BCCA 98, 329 D.L.R. (4th) 389 (B.C. C.A.), at paras. 50-52).

131 With respect, I do not agree with this reasoning. The aggregate damages provisions of the *CPA* relate to remedy and are procedural. They cannot be used to establish liability (*2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp.*, 2010 ONCA 466, 100 O.R. (3d) 721 (Ont. C.A.), at para. 55). The language of s. 29(1)(b) specifies that no question of fact or law, other than the assessment of damages, should remain to be determined in order for an aggregate monetary award to be made. As I read it, this means that an antecedent finding of liability is required before resorting to the aggregate damages provision of the *CPA*. This includes, where required by the cause of action such as in a claim under s. 36 of the *Competition Act*, a finding

of proof of loss. I do not see how a statutory provision designed to award damages on an aggregate basis can be said to be used to establish any aspect of liability.

132 I agree with Feldman J.A.'s holding in *Chadha* that aggregate damages provisions are "applicable only once liability has been established, and provid[e] a method to assess the quantum of damages on a global basis, but not the fact of damage" (para. 49). I also agree with Masuhara J. of the BCSC in *Infineon* that "liability requires that a pass-through reached the Class Members", and that "that question requires an answer before the aggregation provisions, which are only a tool to assist in the distribution of damages, can be invoked" (2008 BCSC 575 (B.C. S.C.), at para. 176). Furthermore, I agree with the Ontario Court of Appeal in *Quizno's*, that "[t]he majority clearly recognized that s. 24 [of the Ontario *Class Proceedings Act*, 1992, S.O. 1992, c. 6] is procedural and cannot be used in proving liability" (para. 55).

133 This reasoning reflects the intention of the Attorney General of British Columbia. When he introduced the *CPA* in the British Columbia legislature, he stated that the goal of the legislation was to allow individuals who have similar claims to come together and pursue those individual claims collectively: "In simple terms, all we are doing here is finding a way to enable the access that individuals have to the court to be an access that individuals combining together can have to the court" (Hon. C. Gabelmann, *Official Report of Debates of the Legislative Assembly (Hansard)*, vol. 20, No. 20, 4th Sess., 35th Parl., June 6, 1995, 15078). The *CPA* was not intended to allow a group to prove a claim that no individual could. Rather, an important objective of the *CPA* is to allow individuals who have provable individual claims to band together to make it more feasible to pursue their claims.

134 The question of whether damages assessed in the aggregate are an appropriate remedy can be certified as a common issue. However, this common issue is only determined at the common issues trial after a finding of liability has been made. The ultimate decision as to whether the aggregate damages provisions of the *CPA* should be available is one that should be left to the common issues trial judge. Further, the failure to propose or certify aggregate damages, or another remedy, as a common issue does not preclude a trial judge from invoking the provisions if considered appropriate once liability is found.

135 However, as stated above, the determination that the aggregate damages provisions cannot be used to establish proof of loss does not affect Myers J.'s decision to certify aggregate damages as a common issue. Despite his erroneous finding that aggregate damages provisions may be invoked to establish liability, he stated that invoking these provisions for that purpose was not necessary in this case (see paras. 119-20 and 127). The aggregate damages questions he certified relate solely to whether damages can be determined on an aggregate basis and if so in what amount. Having not actually relied on the proposition that aggregate damages provisions can be used to determine liability, Myers J.'s decision to certify questions related to aggregate damages should not be disturbed.

#### *Is a Class Action the Preferable Procedure?*

136 The provision of the *CPA* relevant to the preferable procedure requirement is s. 4(2). It reads:

(2) In determining whether a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues, the court must consider all relevant matters including the following:

- (a) whether questions of fact or law common to the members of the class predominate over any questions affecting only individual members;
- (b) whether a significant number of the members of the class have a valid interest in individually controlling the prosecution of separate actions;
- (c) whether the class proceeding would involve claims that are or have been the subject of any other proceedings;
- (d) whether other means of resolving the claims are less practical or less efficient;
- (e) whether the administration of the class proceeding would create greater difficulties than those likely to be experienced if relief were sought by other means.

137 In *Hollick*, this Court said that preferability must be examined in reference to the three principal aims of the class action regime: "... judicial economy, access to justice, and behaviour modification" (para. 27).

138 Microsoft argues that the lack of commonality between the class members and the abundance of individual issues signifies that a class proceeding will not be a "fair, efficient and manageable method of advancing the claim" as required by *Hollick* (R.F., at para. 84, citing *Hollick*, at para. 28). It argues that the access to justice function of class actions will not be served by certifying the action because it will inevitably break down into numerous individual trials, subjecting the class members to delays. It also argues that the tendency of indirect purchaser action to result in *cy-près* awards — made where it would be impractical to distribute the award to the individual plaintiffs — further frustrates the access to justice aim. As to the objective of behaviour modification, Microsoft contends that it is more properly a concern for the Competition Commissioner and that the procedures that can be initiated by that body are the preferable forum in which to deal with the wrongs alleged in this case.

139 I am unable to accept these arguments. In *Hollick*, McLachlin C.J. was of the view that the plaintiff had not satisfied the certification requirements on the grounds that a class proceeding was not the preferable procedure. In that case, she found that the question of whether or not the defendant had unlawfully emitted methane gas and other pollutants was common to all class members. However, as to whether loss could be established on a class-wide basis, she found too many differences among the class members to consider loss a common issue. In other words, while she found that there was a common issue related to the existence of the cause of action, she did not consider the loss-related issues to be common to all the class members. She dismissed the class action on the basis that "[o]nce the common issue is seen in the context of the entire claim, it becomes difficult to say that the resolution of the common issue will significantly advance the action" (*Hollick*, at para. 32).

140 In the present case, there are common issues related to the existence of the causes of action, but there are also common issues related to loss to the class members. Unlike *Hollick*, here the loss-related issues can be said to be common because there is an expert methodology that has been found to have a realistic prospect of establishing loss on a class-wide basis. If the common issues were to be resolved, they would be determinative of Microsoft's liability and of whether passing on of the overcharge to the indirect purchasers has occurred. Because such determinations will be essential in order for the class members to recover, it can be said, in this case, that a resolution of the common issues would significantly advance the action. While it is possible that individual issues may arise at the trial of the common issues, it is implicit in the reasons of Myers J. that, at the certification stage, he found the common issues to predominate over issues affecting only individual class members. I would agree. In the circumstances, I would not interfere with his finding that the class action is the preferable procedure.

141 It is also premature to assume that the award in this case will result in *cy-près* distribution or that the objective of access to justice will be frustrated on this account. Further, while under the *Competition Act* the Competition Commissioner is the primary organ responsible for deterrence and behaviour modification, the Competition Bureau in this case has said that it will not be pursuing any action against Microsoft. Accordingly, if the class action does not proceed, the objectives of deterrence and behaviour modification will not be addressed at all. On this issue, the class action is not only the preferable procedure but the only procedure available to serve these objectives.

### ***Conclusion on the Certification of the Action***

142 I would restore the orders of the applications judges allowing for certification of this action as a class proceeding with the exception that the pleadings based on constructive trust be struck.

### **Conclusion**

143 For the above reasons, I would allow the appeal with costs throughout.

*Appeal allowed.*

*Pourvoi accueilli.*

### **Appendix**

**Common Issues Certified by Myers J.**

Breach of *Competition Act*, R.S.C. 1985, c. C-34

- (a) Did the Defendants, or either of them, engage in conduct which is contrary to s. 45 and or s. 52 of the *Competition Act*?
- (b) Are the Class Members entitled to losses or damages pursuant to section 36 of the *Competition Act*, and, if so, in what amount?
- (c) Can the amount of damages be determined on an aggregate basis and if so, in what amount?

Conspiracy

- (d) Did the Defendants, or either them, conspire to harm the Class Members?
- (e) Did the Defendants, or either of them, act in furtherance of the conspiracy?
- (f) Was the predominant purpose of the conspiracy to harm the Class Members?
- (g) Did the conspiracy involve unlawful acts?
- (h) Did the Defendants, or either of them, know that the conspiracy would likely cause injury to the Class Members?
- (i) Did the Class Members suffer economic loss?
- (j) What damages, if any, are payable by the Defendants, or either of them, to the Class Members?
- (k) Can the amount of damages be determined on an aggregate basis and if so, in what amount?

Tortious Interference with Economic Interests

- (l) Did the Defendants, or either of them, intend to injure the Class Members?
- (m) Did the Defendants, or either of them, interfere with the economic interests of the Class Members by unlawful or illegal means?
- (n) Did the Class Members suffer economic loss as a result of the Defendants' interference?
- (o) What damages, if any, are payable by the Defendants, or either of them, to the Class Members?
- (p) Can the amount of damages be determined on an aggregate basis and if so, in what amount?

Unjust Enrichment, Waiver of Tort and Constructive Trust

- (q) Have the Defendants, or either of them, been unjustly enriched by the receipt of an Overcharge? "Overcharge" means the difference between the prices the Defendants actually charged for Microsoft Operating Systems and Microsoft Applications Software in the PC market in Canada and the prices that the Defendants would have been able to charge in the absence of their wrongdoing.
- (r) Have the Class Members suffered a corresponding deprivation in the amount of the Overcharge?
- (s) Is there a juridical reason why the Defendants, or either of them, should be entitled to retain the Overcharge?

- (t) What restitution, if any, is payable by the Defendants, or either of them, to the Class Members based on unjust enrichment?
- (u) Should the Defendants, or either of them, be constituted as constructive trustees in favour of the Class Members for the Overcharge?
- (v) What is the quantum of the Overcharge, if any, that the Defendants, or either of them, hold in trust for the Class Members?
- (w) What restitution, if any, is payable by the Defendants to the Class Members based on the doctrine of waiver of tort?
- (x) Are the Defendants, or either of them, liable to account to the Class Members for the wrongful profits, if any, that they obtained on the sale of Microsoft Operating Systems or Microsoft Applications Software to the Class Members based on the doctrine of waiver of tort?
- (y) Can the amount of restitution be determined on an aggregate basis and if so, in what amount?

Punitive Damages

- (z) Are the Defendants, or either of them, liable to pay punitive or exemplary damages having regard to the nature of their conduct and if so, in what amount and to whom?

Interest

- (aa) What is the liability, if any, of the Defendants, or either of them, for court order interest?

Distribution of Damages and/or Trust Funds

- (bb) What is the appropriate distribution of damages and/or trust funds and interest to the Class Members and who should pay for the cost of that distribution? [A.R., vol. I, at pp. 167-69.]

**Headnote**

Criminal Law --- Evidence — Expert evidence — Purpose of testimony

Evidence --- Opinion evidence — Expert evidence — Admissibility

Evidence — Opinion evidence — Expert witnesses — Expert opinion having to be necessary in sense of providing information likely to be outside experience and knowledge of judge or jury — Expert evidence advancing novel scientific theory or technique to be subjected to special scrutiny.

Evidence — Character evidence — Bad character — Evidence of defence psychiatrist that perpetrator of sexual offence would be of limited and unusual group of individuals in which accused did not belong rightly excluded by trial judge — Person committing sexual assaults on young women could not be said to belong to group possessing sufficiently distinctive behavioural characteristics — Expert's group profiles not sufficiently reliable to be considered helpful.

The accused, a practising paediatrician, was charged with four counts of sexual assault on four of his female patients, aged 13 to 16 years old at the relevant time. The alleged sexual assaults were perpetrated during the course of medical examinations.

Counsel for the accused sought to call a psychiatrist who would testify that the perpetrator of the offences alleged to have been committed would be one of a limited and unusual group of individuals, and that the accused did not fall within that narrow

class because he did not possess the characteristics belonging to that group. The trial judge held a voir dire and ruled that the evidence tendered on the voir dire would not be admitted.

The jury found the accused guilty as charged. The Court of Appeal allowed the accused's appeal, quashed the convictions and ordered a new trial, upon a finding that the rejected evidence was admissible on two bases. On the first basis, given that similar fact evidence was admitted showing that the acts compared were so unusual and strikingly similar that their similarities could not be attributed to coincidence, the testimony was admissible to show that the offences alleged were unlikely to have been committed by the same person. On the second basis, it was admissible to show that the accused was not a member of either of the unusual groups of aberrant personalities that could have committed the offences alleged. The Crown appealed.

**Held:**

The appeal was allowed and the convictions were restored.

On the basis of the principles relating to exceptions to the character evidence rule and the principles governing the admissibility of expert evidence, the limitations on the use of this type of evidence required that the evidence in this case be excluded.

To be admissible, an expert's opinion must be necessary in the sense that it provide information that is likely to be outside the experience and knowledge of a judge or jury. However, the need for the evidence must be assessed in light of its potential to distort the fact-finding process. Presented in scientific language that the jury does not easily understand and submitted through a witness of impressive antecedents, this evidence is apt to be accepted by the jury as being virtually infallible and as having more weight than it deserves. There is also a concern inherent in the application of this criterion that experts not be permitted to usurp the functions of the trier of fact. Too liberal an approach could result in a trial becoming nothing more than a contest of experts with the trier of fact acting as referee in deciding which expert to accept. Expert evidence that advances a novel scientific theory or technique is subjected to special scrutiny to determine whether it meets a basic threshold of reliability and whether it is essential in the sense that the trier of fact will be unable to come to a satisfactory conclusion without the assistance of the expert. The closer the evidence approaches an opinion on an ultimate issue, the stricter the application of this principle. The Crown cannot lead expert evidence in the first instance unless it is relevant to an issue and is not being used merely as evidence of disposition. In order to be relevant on the issue of identity, the evidence must tend to show that the accused shared a distinctive and unusual behavioural trait with the perpetrator of the crime. The trait must be sufficiently distinctive that it operates virtually as a badge or mark identifying the perpetrator. When, however, the evidence is tendered by the accused, other considerations apply. The accused is permitted to adduce evidence as to disposition both in his or her own evidence or by calling witnesses. The general rule is that evidence as to character is limited to evidence of the accused's reputation in the community with respect to the relevant trait or traits. The accused in his or her own testimony, however, may rely on specific acts of good conduct. Evidence of an expert witness that the accused, by reason of his or her mental make-up or condition of the mind, would be incapable of committing or disposed to commit the crime does not fit either of these categories.

A further exception, however, has developed that is limited in scope. An expert's opinion may be admitted as evidence, if the trial judge is satisfied that either the perpetrator of the crime or the accused has distinctive behavioural characteristics such that a comparison of one with the other will be of material assistance in determining innocence or guilt. The trial judge should consider the opinion of the expert and whether the expert is merely expressing a personal opinion or whether the behavioural profile that the expert is putting forward is in common use as a reliable indicator of membership in a distinctive group. Where the scientific community has developed a standard profile for the offender who commits this type of crime, the criteria of relevance and necessity will be satisfied. Not only will the expert evidence tend to prove a fact in issue, but it will also provide the trier of fact with assistance that is needed. Such evidence will have passed the threshold test of reliability that will generally ensure that the trier of fact does not give it more weight than it deserves.

The findings of the trial judge in this case were that a person who committed sexual assaults on young women could not be said to belong to a group possessing behavioural characteristics that are sufficiently distinctive to be of assistance in identifying the perpetrator of the offences charged. Moreover, the fact that the alleged perpetrator was a physician did not advance the matter because there is no acceptable body of evidence that doctors who commit sexual assaults fall into a distinctive class with identifiable characteristics. There was no material in the record to support a finding that the profile of a paedophile or psychopath has been standardized to the extent that it could be said that it matched the supposed profile of the offender depicted in the charges. The expert's group profiles were not seen as sufficiently reliable to be considered helpful. In the absence of these indicia of reliability, the evidence would not be necessary to clarify a matter otherwise inaccessible, nor would any value it may

have had be outweighed by its potential for misleading or diverting the jury. Given these findings and applying the principles referred, the trial judge had rightly decided as a matter of law that the evidence was inadmissible.

s. 693

Appeal from judgment reported at (1992), 13 C.R. (4th) 292, 8 O.R. (3d) 173, 55 O.A.C. 309, 71 C.C.C. (3d) 321 (C.A.) allowing appeal from conviction on four counts of sexual assault and ordering new trial.

**The judgment of the court was delivered by *Sopinka J.*:**

1 In this appeal we are required to determine under what circumstances expert evidence is admissible to show that character traits of an accused person do not fit the psychological profile of the putative perpetrator of the offences charged. Resolution of this issue involves an examination of the rules relating to expert and character evidence.

**I. Facts**

**A. The Events**

2 The respondent, a practising paediatrician in North Bay, was charged with four counts of sexual assault on four of his female patients, aged thirteen to sixteen at the relevant time. The alleged sexual assaults were perpetrated during the course of medical examinations of the patients conducted in the respondent's office. The complainants had been referred to the respondent for conditions which were, in part, psychosomatic in nature.

3 Evidence relating to each complaint was admitted as similar fact evidence with respect to the others. The complainants did not know one another. Three of them came forth independently. Following a mistrial, which was publicized, the fourth victim came forward, having heard about the other charges. Three of the four complainants had been victims of prior sexual abuse. With respect to two of them, the respondent knew about their sexual abuse at the hands of others. The alleged assaults consisted of fondling of the girls' breasts and digital penetration and stimulation of their vaginal areas, accompanied by intrusive questioning of them as to their sexual activities. All of the complainants testified that the respondent did not wear gloves while examining them internally. The respondent, who testified in his own defence, denied the complainants' evidence.

4 At the conclusion of the respondent's examination in chief, counsel for the respondent indicated that he intended to call a psychiatrist who would testify that the perpetrator of the offences alleged to have been committed would be part of a limited and unusual group of individuals and that the respondent did not fall within that narrow class because he did not possess the characteristics belonging to that group. The Crown sought a ruling on the admissibility of that evidence. The trial judge held a voir dire and ruled that the evidence tendered on the voir dire would not be admitted.

5 The jury found the respondent guilty as charged on November 16, 1990. He was sentenced to nine months' imprisonment on each of the four counts, to be served concurrently, and to two years' probation. The respondent appealed his convictions and the Crown appealed the sentence. The Court of Appeal allowed the respondent's appeal, quashed the convictions and ordered a new trial. Accordingly, the Court of Appeal found it was not necessary to deal with the Crown's sentence appeal and refused the Crown leave to appeal.

6 The appellant sought leave to appeal to this court against the decision of the Ontario Court of Appeal pursuant to s. 693 of the *Criminal Code*, R.S.C. 1985, c. C-46. On December 10, 1992 leave to appeal was granted by this court.

**B. The Excluded Evidence**

7 In the voir dire, Dr. Hill, the expert, began his testimony by explaining that there are three general personality groups that have unusual personality traits in terms of their psychosexual profile perspective. The first group encompasses the psychosexual who suffers from major mental illnesses (e.g. schizophrenia) and engages in inappropriate sexual behaviour occasionally. The second and largest group contains the sexual deviation types. This group of individuals shows distinct abnormalities in terms of the choice of individuals with whom they report sexual excitement and with whom they would like to engage in some type of sexual activity. The third group is that of the sexual psychopaths. These individuals have a callous disregard for people around them, including a disregard for the consequences of their sexual behaviour towards other individuals. Another group would include paedophiles who gain sexual excitement from young adolescents, probably pubertal or post-pubertal.

8 Dr. Hill identified paedophiles and sexual psychopaths as examples of members of unusual and limited classes of persons. In response to questions hypothetically encompassing the allegations of the four complainants, the expert stated that the psychological profile of the perpetrator of the first three complaints would likely be that of a paedophile, while the profile of the

perpetrator of the fourth complaint would likely be that of a sexual psychopath. Dr. Hill also testified that, if but one perpetrator was involved in all four complaints described in the hypothetical questions, he would uniquely categorize that perpetrator as a sexual psychopath. He added that such a person would belong to a very small, behaviourally distinct category of persons. Dr. Hill was asked whether a physician who acted in the manner described in the hypothetical questions would be a member of a distinct group of aberrant persons. His answer was that such behaviours could only flow from a significant abnormality of character and would be part of an unusual and limited class. In cross-examination, Dr. Hill said: "You bring an extra abnormal, extra component for the abnormality when you talk about a physician in his or her office." According to Dr. Hill, physicians who were also sexual offenders would be a small group because not only would they be breaking the usual norms of society, but they would also be breaking out against the norms of the medical profession which are very strict given the intimate contact necessary to treat patients. It was contemplated that Dr. Hill would go on to testify "to the effect that Doctor Mohan does not have the characteristics attributable to any of the three groups in which most sex offenders fall."

## II. Judgments Below

### A. Ontario Court of Justice (Ruling on Voir Dire) (Bernstein J.)

9 In ruling on the admissibility of Dr. Hill's evidence, the trial judge stated the issues as follows:

One: Did the offences alleged to have been committed by the accused have unusual features which would indicate that anyone who committed them was a member of a limited and distinguishable group?

Two: Did the psychiatrist have the necessary qualifications and expertise to venture an opinion on the first issue so as to be helpful to the jury?

10 The trial judge noted that Dr. Hill had personally interviewed and treated three doctors who engaged in criminal sexual misconduct with their patients. He also noted that Dr. Hill admitted that he was not aware of any scientific study or literature related to the psychiatric make-up of doctors who sexually abuse their patients and that his experience with three admitted offenders who were doctors was not a sufficient basis to allow him to make any generalizations on the subject. Dr. Hill acknowledged that he, as a psychiatrist, is unable to diagnose individuals as having the distinct characteristics of a paedophile or of a homosexual until the patient has performed an overt act which suggests the existence of the characteristic.

11 The trial judge reviewed the case law in which the use of such psychiatric evidence had been discussed (i.e., *R. v. Lupien*, [1970] S.C.R. 263; *R. v. Robertson* (1975), 21 C.C.C. (2d) 385 [29 C.R.N.S. 141] (Ont. C.A.); *R. v. McMillan* (1975), 23 C.C.C. (2d) 160 [29 C.R.N.S. 191] (Ont. C.A.); *R. v. Lavallee*, [1990] 1 S.C.R. 852; *R. v. French* (1977), 37 C.C.C. (2d) 201 (Ont. C.A.); *R. v. T. (S.)* (1986), 31 C.C.C. (3d) 1 [55 C.R. (3d) 321] (Ont. C.A.)). From these cases, the trial judge concluded that the use of psychiatric evidence has been greatly expanded since *Lupien*. He cited the following words of Martin J.A. in *Robertson* (at p. 423 [C.C.C., p. 183 C.R.N.S.]):

Evidence that the offence had distinctive features which identified the perpetrator as a person possessing unusual personality traits constituting him a member of an unusual and limited class of persons would render admissible evidence that the accused did not possess the personality characteristics of the class of persons to which the perpetrator of the crime belonged.

The trial judge also relied on the following passage of *McMillan* (at p. 175 [C.C.C., p. 207 C.R.N.S.]):

I leave open, until the question is required to be decided, whether when the crime is one assumed to be committed by normal persons, e.g., rape, psychiatric evidence is admissible to show that the accused is a member of an abnormal group, possessing characteristics which make it improbable that he committed the offence, e.g., that he is a homosexual with an aversion to heterosexual relations. I am disposed, however, to think that such evidence is admissible.

After relying on *McMillan*, the trial judge held:

Doctor Hill is of the opinion that sexual assault is a crime committed by a distinguishable group. As I read the cases, I came to the conclusion that it is the size and the degree of distinctiveness of the "unusual and limited class of persons" which determines whether expert opinion will be helpful in defining the class and categorizing accused persons within or without the group. These days it is trite to say that a large number of men from all walks of life commit sexual offences on young women. While all may have some type of character disorder, I doubt that expert evidence regarding the normality of any given accused would be of assistance to a trier of fact absent some more distinguishing within the wide spectrum of sexual assault.

The evidence of Doctor Hill is not sufficient, I believe, to establish that doctors who commit sexual assaults on patients are in a significantly more limited group in psychiatric terms than are other members of society. There is no scientific data available to warrant that conclusion. A sample of three offenders is not a sufficient basis for such a conclusion. Even the allegations of the fourth complainant ... are not so unusual, as sex offenders go, to warrant a conclusion that the perpetrator must have belonged to a sufficiently narrow class.

I conclude that if the evidence was received as proposed, it would merely be character evidence of a type that is inadmissible as going beyond evidence of general reputation, and does not fall within the proper sphere of expert evidence.

**B. Ontario Court of Appeal (1992), 8 O.R. (3d) 173**

12 It was apparent for Finlayson J.A., who wrote the court's judgment, that the trial judge's conclusions were based on a misapprehension of the evidence of Dr. Hill. Finlayson J.A. stated that Dr. Hill did not base his opinion on case studies of the three physicians he had as patients who were accused of sexual crimes. Rather, Finlayson J.A. was of the view at p. 177 that, in concluding that the perpetrators in the hypothetical examples would fall into an unusual and limited class of persons, and that, if the perpetrator were a physician, the class into which he would fall would be even narrower, Dr. Hill based his opinion on all of his experience:

With respect, I think the learned trial judge was in error, in that he ruled on the sufficiency of the evidence of Dr. Hill, not its admissibility. It was up to the jury to consider what weight should be given to the expert opinion. Crown counsel suggested on appeal that the trial judge was ruling on the qualifications of the expert witness to give the opinion that he did. I do not think that is a correct interpretation of the trial judge's reasons. Dr. Hill's qualifications are outstanding and no attempt was made at trial to challenge them. I think the trial judge was saying that Dr. Hill's personal experience in dealing with sex-offending physicians and the lack of scientific literature specific to such physicians did not justify Dr. Hill giving the opinion that he did. In my opinion, in restricting his interpretation of Dr. Hill's testimony to "doctors who commit sexual assaults on patients", the trial judge misapprehended the opinion of Dr. Hill and the broad psychiatric experience upon which it was based.

13 Finlayson J.A. went on to say that the evidence of Dr. Hill was admissible on two bases. On the first basis, given that similar fact evidence was admitted showing that the acts compared are so unusual and strikingly similar that their similarities cannot be attributed to coincidence, Dr. Hill's testimony was admissible to show that the offences alleged were unlikely to have been committed by the same person (*R. v. C. (M.H.)*, [1991] 1 S.C.R. 763).

14 On the second basis, it was admissible to show that the respondent was not a member of either of the unusual groups of aberrant personalities which could have committed the offences alleged. Referring to *R. v. Lupien*, supra, at pp. 275-78, *R. v. Robertson*, supra, at p. 425 [C.C.C., pp. 184-85 C.R.N.S.], and *R. v. McMillan*, supra, Finlayson J.A. held that it is settled law that opinion evidence showing that the accused did or did not possess the distinguishing characteristics of an abnormal group is admissible in a criminal case, where it would appear that the perpetrator of the crime alleged is a person with an abnormal propensity or disposition which stamps him or her as being a member of that special and extraordinary class (or group). In this case, the psychiatrist showed that paedophiles and sexual psychopaths are members of special and extraordinary classes. Considering also the issues put to the jury in the case at bar (complex psychological issues, testimonial trustworthiness), Finlayson J.A. held that evidence of persons with professional psychiatric experience in dealing with sexual offences would

be of assistance (based on: *R. v. Lyons*, (sub nom. *R. v. L. (T.P.)*) [1987] 2 S.C.R. 309; *R. v. Abbey*, [1982] 2 S.C.R. 24; *R. v. Lavallee*, supra; *R. v. B.(G.)*, [1990] 2 S.C.R. 30).

15 The court allowed the respondent's appeal, quashed the convictions and ordered a new trial. Accordingly, the Court of Appeal refused leave to the Crown's sentence appeal.

### III. Analysis

16 The admissibility of the rejected evidence was analyzed in argument under two exclusionary rules of evidence: (1) expert opinion evidence, and (2) character evidence. I have concluded that, on the basis of the principles relating to exceptions to the character evidence rule and under the principles governing the admissibility of expert evidence, the limitations on the use of this type of evidence require that the evidence in this case be excluded.

#### (1) Expert Opinion Evidence

17 Admission of expert evidence depends on the application of the following criteria:

18 (a) relevance;

19 (b) necessity in assisting the trier of fact;

20 (c) the absence of any exclusionary rule;

21 (d) a properly qualified expert.

##### *(a) Relevance*

22 Relevance is a threshold requirement for the admission of expert evidence as with all other evidence. Relevance is a matter to be decided by a judge as question of law. Although *prima facie* admissible if so related to a fact in issue that it tends to establish it, that does not end the inquiry. This merely determines the logical relevance of the evidence. Other considerations enter into the decision as to admissibility. This further inquiry may be described as a cost-benefit analysis, that is "whether its value is worth what it costs." See *McCormick on Evidence* (3rd ed. 1984), at p. 544. Cost in this context is not used in its traditional economic sense but rather in terms of its impact on the trial process. Evidence that is otherwise logically relevant may be excluded on this basis, if its probative value is overborne by its prejudicial effect, if it involves an inordinate amount of time which is not commensurate with its value or if it is misleading in the sense that its effect on the trier of fact, particularly a jury, is out of proportion to its reliability. While frequently considered as an aspect of legal relevance, the exclusion of logically relevant evidence on these grounds is more properly regarded as a general exclusionary rule (see *R. v. Morris*, [1983] 2 S.C.R. 190). Whether it is treated as an aspect of relevance or an exclusionary rule, the effect is the same. The reliability versus effect factor has special significance in assessing the admissibility of expert evidence.

23 There is a danger that expert evidence will be misused and will distort the fact-finding process. Dressed up in scientific language which the jury does not easily understand and submitted through a witness of impressive antecedents, this evidence is apt to be accepted by the jury as being virtually infallible and as having more weight than it deserves. As La Forest J. stated in *R. c. Béland*, [1987] 2 S.C.R. 398, at p. 434, with respect to the evidence of the results of a polygraph tendered by the accused, such evidence should not be admitted by reason of "human fallibility in assessing the proper weight to be given to evidence cloaked under the mystique of science". The application of this principle can be seen in cases such as *R. v. Melaragni* (1992), 73 C.C.C. (3d) 348 (Ont. Gen. Div.), in which Moldaver J. applied a threshold test of reliability to what he described, at p. 353, as "a new scientific technique or body of scientific knowledge". Moldaver J. also mentioned two other factors, *inter alia*, which should be considered in such circumstances (at p. 353):

- (1) Is the evidence likely to assist the jury in its fact-finding mission, or is it likely to confuse and confound the jury?

(2) Is the jury likely to be overwhelmed by the "mystic infallibility" of the evidence, or will the jury be able to keep an open mind and objectively assess the worth of the evidence?

24 A similar approach was adopted in *R. v. Bourguignon*, [1991] O.J. No. 2670 (Q.L.), where, in ruling upon a voir dire concerning the admissibility of DNA evidence, Flanigan J. admitted most of the evidence but excluded statistical evidence about the probability of a match between the DNA contained in samples taken from the accused and those taken from the scene of a crime. The learned judge explained:

This Court does not think that the criminal jurisdiction of Canada is yet ready to put such an additional pressure on a jury, by making them overcome such fantastic odds and asking them to weigh it as just one piece of evidence to be considered in the overall picture of all the evidence presented. There is a real danger that the jury will use the evidence as a measure of the probability of the accused's guilt or innocence and thereby undermine the presumption of innocence and erode the value served by the reasonable doubt standard. As said in the Schwartz case: "dehumanize our justice system".

I would therefore, rule admissible the DNA testing evidence but not the statistic probabilities. This restriction can be easily overcome by evidence that "such matches are rare" or "extremely rare" or words to the same effect, which will put the jury in a better position to assess such evidence and protect the right of the accused to a fair trial.

It should be noted that, subsequently, other courts have rejected the distinction drawn by Flanigan J. and have admitted both DNA evidence and the evidence regarding statistical probabilities of a match. (See, e.g., *R. v. Lafferty*, [1993] N.W.T.J. No. 17 (Q.L.) [reported at [1993] 4 W.W.R. 74]). I rely on *R. v. Bourguignon*, supra, simply to illustrate the mode of approach adopted there and leave the specific issue decided by Flanigan J. to be considered when it arises.

**(b) Necessity in Assisting the Trier of Fact**

25 In *R. v. Abbey*, supra, Dickson J., as he then was, stated, at p. 42:

With respect to matters calling for special knowledge, an expert in the field may draw inferences and state his opinion. An expert's function is precisely this: to provide the judge and jury with a ready-made inference which the judge and jury, due to the technical nature of the facts, are unable to formulate. "An expert's opinion is admissible to furnish the Court with scientific information which is likely to be outside the experience and knowledge of a judge or jury. If on the proven facts a judge or jury can form their own conclusions without help, then the opinion of the expert is unnecessary" (*Turner* (1974), 60 Crim. App. R. 80, at p. 83, per Lawton L.J.).

26 This precondition is often expressed in terms as to whether the evidence would be helpful to the trier of fact. The word "helpful" is not quite appropriate and sets too low a standard. However, I would not judge necessity by too strict a standard. What is required is that the opinion be necessary in the sense that it provide information "which is likely to be outside the experience and knowledge of a judge or jury": as quoted by Dickson J. in *R. v. Abbey*, supra. As stated by Dickson J., the evidence must be necessary to enable the trier of fact to appreciate the matters in issue due to their technical nature. In *Kelliher (Village) v. Smith*, [1931] S.C.R. 672, at p. 684, this court, quoting from *Beven on Negligence* (4th ed. 1928), p. 141, stated that in order for expert evidence to be admissible, "[t]he subject-matter of the inquiry must be such that ordinary people are unlikely to form a correct judgment about it, if unassisted by persons with special knowledge." More recently, in *Lavallee*, supra, the above passages from *Kelliher* and *Abbey* were applied to admit expert evidence as to the state of mind of a "battered" woman. The judgment stressed that this was an area that is not understood by the average person.

27 As in the case of relevance, discussed above, the need for the evidence is assessed in light of its potential to distort the fact-finding process. As stated by Lawton L.J. in *R. v. Turner*, [1975] Q.B. 834, at p. 841, and approved by Lord Wilberforce in *Director of Public Prosecutions v. Jordan*, [1977] A.C. 699 at 708, at p. 718:

An expert's opinion is admissible to furnish the court with scientific information which is likely to be outside the experience and knowledge of a judge or jury. If on the proven facts a judge or jury can form their own conclusions without help, then

the opinion of an expert is unnecessary. In such a case if it is given dressed up in scientific jargon it may make judgment more difficult. The fact that an expert witness has impressive scientific qualifications does not by that fact alone make his opinion on matters of human nature and behaviour within the limits of normality any more helpful than that of the jurors themselves; but there is a danger that they may think it does.

The possibility that evidence will overwhelm the jury and distract them from their task can often be offset by proper instructions.

28 There is also a concern inherent in the application of this criterion that experts not be permitted to usurp the functions of the trier of fact. Too liberal an approach could result in a trial's becoming nothing more than a contest of experts with the trier of fact acting as referee in deciding which expert to accept.

29 These concerns were the basis of the rule which excluded expert evidence in respect of the ultimate issue. Although the rule is no longer of general application, the concerns underlying it remain. In light of these concerns, the criteria of relevance and necessity are applied strictly, on occasion, to exclude expert evidence as to an ultimate issue. Expert evidence as to credibility or oath-helping has been excluded on this basis. See *R. v. Marquard*, [1993] 4 S.C.R. 223, per McLachlin J.

#### **(c) The Absence of any Exclusionary Rule**

30 Compliance with criteria (a), (b) and (d) will not ensure the admissibility of expert evidence if it falls afoul of an exclusionary rule of evidence separate and apart from the opinion rule itself. For example, in *R. v. Morin*, [1988] 2 S.C.R. 345, evidence elicited by the Crown in cross-examination of the psychiatrist called by the accused was inadmissible because it was not shown to be relevant other than as to the disposition to commit the crime charged. Notwithstanding, therefore, that the evidence otherwise complied with the criteria for the admission of expert evidence it was excluded by reason of the rule that prevents the Crown from adducing evidence of the accused's disposition unless the latter has placed his or her character in issue. The extent of the restriction when such evidence is tendered by the accused lies at the heart of this case and will be discussed hereunder.

#### **(d) A Properly Qualified Expert**

31 Finally the evidence must be given by a witness who is shown to have acquired special or peculiar knowledge through study or experience in respect of the matters on which he or she undertakes to testify.

32 In summary, therefore, it appears from the foregoing that expert evidence which advances a novel scientific theory or technique is subjected to special scrutiny to determine whether it meets a basic threshold of reliability and whether it is essential in the sense that the trier of fact will be unable to come to a satisfactory conclusion without the assistance of the expert. The closer the evidence approaches an opinion on an ultimate issue, the stricter the application of this principle.

### **(2) Expert Evidence as to Disposition**

33 In order to decide what principles should govern the admissibility of this kind of evidence, it is necessary to consider the limitations imposed by the rules relating to character evidence, having regard to the restrictions imposed by the criteria in respect of expert evidence.

34 I have already referred to *R. v. Morin*, supra, wherein a unanimous court decided that the Crown cannot lead such evidence in the first instance unless it is relevant to an issue and is not being used merely as evidence of disposition. As I stated, at p. 371:

In my opinion, in order to be relevant on the issue of identity the evidence must tend to show that the accused shared a distinctive unusual behavioural trait with the perpetrator of the crime. The trait must be sufficiently distinctive that it operates virtually as a badge or mark identifying the perpetrator. The judgment of Lord Hailsham in *Boardman*, quoted above, provides one illustration of the kind of evidence that would be relevant.

Conversely, the fact that the accused is a member of an abnormal group some of the members of which have the unusual behavioural characteristics shown to have been possessed by the perpetrator is not sufficient. In some cases it may, however,

be shown that all members of the group have the distinctive unusual characteristics. If a reasonable inference can be drawn that the accused has those traits then the evidence is relevant subject to the trial judge's obligation to exclude it if its prejudicial effect outweighs its probative value. The greater the number of persons in society having these tendencies, the less relevant the evidence on the issue of identity and the more likely that its prejudicial effect predominates over its probative value.

35 When, however, the evidence is tendered by the accused, other considerations apply. The accused is permitted to adduce evidence as to disposition both in his or her own evidence or by calling witnesses. The general rule is that evidence as to character is limited to evidence of the accused's reputation in the community with respect to the relevant trait or traits. The accused in his or her own testimony, however, may rely on specific acts of good conduct. See *R. v. McNamara (No. I)* (1981), 56 C.C.C. (2d) 193 (Ont. C.A.), at p. 348; leave to appeal refused, [1981] 1 S.C.R. xi. Evidence of an expert witness that the accused, by reason of his or her mental make-up or condition of the mind, would be incapable of committing or disposed to commit the crime does not fit either of these categories. A further exception, however, has developed that is limited in scope. I propose to examine the extent of this exception.

36 In England, with the exception of non-insane automatism, expert psychiatric and psychological evidence is not admissible to show the accused's state of mind unless it is contended that the accused is abnormal in the sense of suffering from insanity or diminished responsibility. In *R. v. Chard* (1971), 56 Cr. App. R. 268 (C.A.), the trial judge refused to allow medical evidence that the accused who was not alleged to be suffering from a disease of the mind lacked the necessary mens rea. In the Court of Appeal, Roskill L.J. stated at p. 271 that it was "not permissible to call a witness, whatever his personal experience, merely to tell the jury how he thinks an accused man's mind — assuming a normal mind — operated at the time of the alleged crime ..."

37 In *Lowery v. R.*, [1974] A.C. 85 (P.C.), such evidence was admitted when tendered by one co-accused against another. It was a case involving the sadistic murder of a young girl. Lowery and King were both charged, and it was obvious that one, the other, or both of them were guilty. In this context, King sought to prove that he feared Lowery and that Lowery dominated him. The Privy Council held that the trial judge acted properly in allowing King to call a psychiatrist to swear that he was less likely to have committed the crime than Lowery. That is, character evidence tendered by a psychiatrist was held to be admissible. Lord Morris of Borth-y-Gest of the Privy Council stated, at p. 103:

Lowery and King were each asserting that the other was the completely dominating person at the time Rosalyn Nolte was killed: each claimed to have been in fear of the other. In these circumstances it was most relevant for King to be able to show, if he could, that Lowery had a personality marked by aggressiveness whereas he, King, had a personality which suggested that he would be led and dominated by someone who was dominant and aggressive ... Not only however was the evidence which King called relevant to this case: its admissibility was placed beyond doubt by the whole substance of Lowery's case.

Moreover, in *R. v. Turner*, supra, the accused unsuccessfully pleaded provocation in answer to a charge of murder of his girlfriend whom he alleged that he had killed in a fit of rage caused by her sudden confession of infidelity. He appealed on the grounds that the trial judge had wrongly refused to admit the evidence of a psychiatrist. That psychiatrist was to testify to the effect that the accused was not mentally ill, that he had a great affection toward the victim and that he deeply regretted his act of murder. The evidence was rejected on the basis that it was not the proper subject of expert evidence. As for *Lowery*, it was confined to its own facts.

38 C. Tapper in *Cross on Evidence* (7th ed. 1990), at p. 492, reconciled *Lowery* and *Turner* using a principled approach:

Juries do not need to be told that normal men are liable to lose control of themselves when their women admit to infidelity, but they require all the expert assistance they can get to help them determine which of two accused has the more aggressive personality.

Tapper then proceeded to reconcile the two cases using a more technical approach:

Another way of reconciling the cases would be to treat the fact that Lowery had put his character in issue as crucial to the decision of the Privy Council, the psychiatric evidence then being admissible to impugn the credibility of his testimony. Unfortunately we are left without any guidance on the subject from the Court of Appeal who contented themselves with saying that *Lowery's* case was decided on its special facts.

39 With respect to the development of the exception in Canada, *R. v. Lupien*, supra, is a good starting point. It involved a respondent who was convicted of attempting to commit an act of gross indecency, and whose defence was that he lacked the requisite intent to commit the act because he thought his companion was a woman. He sought to prove his "lack of intent" by tendering psychiatric evidence which showed that he reacted violently against any type of homosexual activity and, therefore, could not have knowingly engaged in an act of gross indecency. Ritchie J. concluded, at pp. 277-78, that the evidence was admissible for the following reasons:

I am far from saying that as a general rule psychiatric evidence of a man's disinclination to commit the kind of crime with which he is charged should be admitted, but the present case is concerned with gross indecency between two men and I think that crimes involving homosexuality stand in a class by themselves in the sense that the participants frequently have characteristics which make them more readily identifiable as a class than ordinary criminals. See *Reg. v. Thompson* [(1917), 13 Cr. App. R. 61 at 81]. In any event, it appears to me that the question of whether or not a man is homosexually inclined or otherwise sexually perverted is one upon which an experienced psychiatrist is qualified to express an opinion and that if such opinion is relevant it should be admitted at a trial such as this even if it involves the psychiatrist in expressing his conclusion that the accused does not have the capacity to commit the crime with which he is charged.

It is this passage that created the abnormal group exception which is often sought to be applied to various contexts other than the homosexual context.

40 The Ontario Court of Appeal, and specifically Martin J.A., further looked into this exception of proving the disposition of the accused through psychiatric evidence in the following two cases: *R. v. McMillan*, supra, affirmed [1977] 2 S.C.R. 824, and *R. v. Robertson*, supra.

41 *R. v. McMillan* involved an accused who was charged with the murder of his infant child and whose defence was that it was in fact his wife and not he who killed the child. The trial judge allowed the accused to call a psychiatrist who testified that the accused's wife had a psychopathic personality disturbance with brain damage. This psychiatric evidence showed that a third party, the accused's wife, was more likely to have committed the crime because of her abnormal personality/disposition. Martin J.A., speaking for the court, found that disposition to commit a crime is generally relevant since it goes to the probability/propensity of the person doing or not doing the act charged. He then referred to *R. v. Lupien*, at p. 169 [C.C.C., p. 201 C.R.N.S.], as creating the following exception:

One of the exceptions to the general rule that the character of the accused, in the sense of disposition, when admissible, can only be evidenced by general reputation, relates to the admissibility of psychiatric evidence where the particular disposition or tendency in issue is characteristic of an abnormal group, the characteristics of which fall within the expertise of the psychiatrist.

After having noted the applicability of *R. v. Lupien*, Martin J.A. engaged in a lengthy discussion of the exception and in fact extended *R. v. Lupien*. This extension, at pp. 173-75 [C.C.C., pp. 205-207 C.R.N.S.], was affirmed by the Supreme Court of Canada:

I do not consider that, because the crime under consideration was not one that could only be committed by a person with a special or abnormal propensity, psychiatric evidence with respect to Mrs. McMillan's disposition, was, therefore, inadmissible, in the circumstances of this case.

All evidence to be admissible must, of course, be relevant to some issue in the case. Psychiatric evidence with respect to the personality traits or disposition of a person, whether of the accused or another, may be admissible for different purposes. While those purposes are not mutually exclusive, evidence which is relevant for one purpose may not be for another.

Psychiatric evidence with respect to the personality traits or disposition of an accused, or another, is admissible provided:

- (a) the evidence is relevant to some issue in the case;
- (b) the evidence is not excluded by a policy rule;
- (c) the evidence falls within the proper sphere of expert evidence.

One of the purposes for which psychiatric evidence may be admitted is to prove identity when that is an issue in the case, since psychical as well as physical characteristics may be relevant to identify the perpetrator of the crime.

Where the offence is of a kind that is committed only by members of an abnormal group, for example, offences involving homosexuality, psychiatric evidence that the accused did or did not possess the distinguishing characteristics of that abnormal group is relevant either to bring him within, or to exclude him from, the special class of which the perpetrator of the crime is a member. In order for psychiatric evidence to be relevant for that purpose, the offence must be one which indicates that it was committed by a person with an abnormal propensity or disposition which stamps him as a member of a special and extraordinary class.

Psychiatric evidence with respect to the personality traits or disposition of the accused, or another, if it meets the three conditions of admissibility above set out, is also admissible, however, as bearing on the *probability* of the accused, or another, having committed the offence.

It would appear that it was upon this latter ground that the psychologist's evidence was held to be admissible in *Lowery v. The Queen, supra*, although the features of the offence in that case were sufficiently indicative of the possession of an abnormal propensity by the perpetrator, that the expert evidence might have been relevant to the issue of identity as well. Since in that case the evidence was offered by the accused King, it was not excluded by the policy rule which prevents the prosecution from introducing evidence to prove that the accused by reason of his criminal propensities is likely to have committed the crime charged. Both accused in *Lowery v. The Queen* had psychopathic personalities (although the features of King's psychopathic personality were less severe than Lowery's) and hence their personality traits fell within the proper sphere of expert evidence.

Where the crime under consideration does not have features which indicate that the perpetrator was a member of an abnormal group, psychiatric evidence that the accused has a normal mental make-up but does not have a disposition for violence or dishonesty or other relevant character traits frequently found in ordinary people is inadmissible. The psychiatric evidence in the circumstances postulated is not relevant on the issue of identity to exclude the accused as the perpetrator any more than the possession of violent or dishonest tendencies by the accused or a third person would be admissible to identify the accused or the third person as the perpetrator of the crime.

"So common a characteristic is not a recognisable mark of the individual." (*Per Lord Sumner in Thompson v. Director of Public Prosecutions (1918)*, 26 Cox C.C. 189 at p. 199.)

While such evidence is relevant as bearing on the probability of the accused having committed the crime, the psychiatric evidence proffered in such circumstances really amounts to an attempt to intro duce evidence of the accused's good character, as a normal person, through a psychiatrist. Such evidence does not fall within the proper sphere of expert evidence and is subject to the ordinary rule applicable to character evidence which, in general, requires the character of the accused to be evidenced by proof of general reputation.

I leave open, until the question is required to be decided, whether when the crime is one assumed to be committed by normal persons, *e.g.*, rape, psychiatric evidence is admissible to show that the accused is a member of an abnormal group, possessing characteristics which make it improbable that he committed the offence, *e.g.*, that he is a homosexual with an aversion to heterosexual relations. I am disposed, however, to think that such evidence is admissible. [Emphasis in original.]

The evidence of the psychiatrist was held to be admissible.

42 Martin J.A. elaborated on the reasoning set out above in *R. v. Robertson*, *supra*. That case involved a 16-year-old accused charged with brutally murdering a nine-year-old girl by kicking her. The defence sought to introduce expert psychiatric evidence to show that a propensity for violence or aggression was not a part of the accused's psychological make-up. This tended to rebut evidence led by the Crown as to the accused's violent character. Martin J.A. summed up, at p. 426 [C.C.C., p. 186 C.R.N.S.]:

While the judgment of Ritchie J. deals only with the admissibility of psychiatric evidence with respect to disposition in offences involving homosexuality, there would appear to be no logical reason why such evidence should not be admitted on the same principle in other cases where there is evidence tending to show that, by reason of the nature of the offence, or its distinctive features, its perpetrator was a person who, in the language of Lord Sumner, was member of "a specialized and extraordinary class", and whose psychological characteristics fall within the expertise of the psychiatrist, for the purpose of showing that the accused did not possess the psychological characteristics of persons of that class. Obviously, where such evidence is adduced by the accused, the prosecution is entitled to call psychiatric evidence in order to rebut the evidence introduced by the defence.

In my view, however, the judgment of Ritchie J. in *Regina v. Lupien* provides no support for a conclusion that, in the case of ordinary crimes of violence, psychiatric evidence is admissible to prove that the accused's psychological makeup does not include a tendency or disposition for violence.

Martin J.A. further stated, at pp. 429-30 [C.C.C., pp. 189-90 C.R.N.S.]:

In my view psychiatric evidence with respect to disposition or its absence is admissible on behalf of the defence, if relevant to an issue in the case, where the disposition in question constitutes a characteristic feature of an abnormal group falling within the range of study of the psychiatrist, and from whom the jury can, therefore, receive appreciable assistance with respect to a matter outside the knowledge of persons who have not made a special study of the subject. A *mere* disposition for violence, however, is not so uncommon as to constitute a feature characteristic of an abnormal group falling within the special field of study of the psychiatrist and permitting psychiatric evidence to be given of the absence of such disposition in the accused. [Emphasis in original.]

Given this reasoning, Martin J.A. concluded that the crime was not specially marked and so the conditions for the admissibility of psychiatric evidence were not met.

43 A useful summary of the principles that emerge from the cases is made by Alan W. Mewett, "Character as a Fact in Issue in Criminal Cases" (1984-85) 27 Crim. L.Q. 29, at pp. 35-36 of his article, where he points out the various contexts in which an accused can tender character evidence by way of an expert:

There are thus three basic requirements that must be met before such psychiatric evidence can even be considered as potentially admissible. First, it must be relevant to an issue. Second, it must be of appreciable assistance to the trier of fact and third, it must be evidence that would otherwise be unavailable to the ordinary layman without specialized training, but these requirements only set forth the general requirements for the admissibility of expert testimony.

Once these hurdles have been passed, a number of different scenarios may be postulated. The crime may be an "ordinary" one (which I take to mean a crime for which no special mental characteristics on the part of the perpetrator would be required) and the accused is an "ordinary" person; the crime may be an "ordinary" one, but the accused an "extraordinary" person (*i.e.*, having some peculiar mental make-up that would tend to show that he would not commit that "ordinary"

crime); the crime may be "extraordinary", but the accused "ordinary"; or the crime may be "extraordinary" and the accused "extraordinary", in a different direction.

In the first scenario, the evidence is irrelevant because it is simply not probative of anything. In the second it is probative and admissible but only if the extraordinary characteristic of the accused tends to show that he would not commit an ordinary crime of that nature (such as a homosexual being charged with a heterosexual offence). In the third, if it is shown that the crime is such that it could only, or in all probability would only, be committed by a person having identifiable peculiarities that the accused does not possess, it would be admissible. In the last scenario, the situation is the same provided that the difference in the abnormalities tends to exclude the accused from the probable group of perpetrators.

44 I question whether use of the terms "abnormal" and "normal" is the best way to describe the concept that underlies their use. The term "abnormal" is derived from the English cases in which it usually connotes the mental state of insanity or diminished responsibility. See *R. v. Chard*, *supra*, at p. 270. The basic rationale of these cases is that "normal" human behaviour is a matter which a judge or jury can assess without the assistance of expert evidence. Canadian cases have extended the exception to include what has been described as sexually deviant behaviour. See Rosemary Pattenden, "Conflicting Approaches to Psychiatric Evidence in *Criminal Trials: England, Canada and Australia*" [1986] *Crim. L.R.* 92, at p. 100. The rationale underlying this extension is the relevance of the evidence based on the distinctiveness of the behavioural traits of either the putative perpetrator of the crime or the accused. This distinctiveness tends to exclude the accused from the category of persons that could or would likely commit the crime.

45 There are other reasons why the use of the term "abnormal" is no longer satisfactory. Even in medical circles there are differing views as to what constitutes abnormality. See Pattenden, *supra*, at p. 100, and David C. Rimm and John W. Sommerville, *Abnormal Psychology* (1977), at pp. 31 and 32. Moreover, it imports a value judgment on the lifestyle of some groups in society. This is aptly illustrated by considering the statement of Lord Sumner in *Thompson v. R.*, [1918] *A.C.* 221, at p. 235:

The evidence tends to attach to the accused a peculiarity which, though not purely physical, I think may be recognized as properly bearing that name. Experience tends to show that these offences against nature connote an inversion of normal characteristics which, while demanding punishment as offending against social morality, also partake of the nature of an abnormal physical property. A thief, a cheat, a coiner, or a house-breaker is only a particular specimen of the genus rogue, and, though no doubt each tends to keep to his own line of business, they all alike possess the by no means extraordinary mental characteristic that they propose somehow to get their livings dishonestly. So common a characteristic is not a recognizable mark of the individual. Persons, however, who commit the offences now under consideration seek the habitual gratification of a particular perverted lust, which not only takes them out of the class of ordinary men gone wrong, but stamps them with the hall-mark of a specialized and extraordinary class as much as if they carried on their bodies some physical peculiarity.

46 The difficulty in defining what is abnormal was recently referred to by McCarthy J.A. in *R. v. Garfinkle* (1992), 15 C.R. (4th) 254 (Que. C.A.). At pp. 256-57, speaking for the court, he stated:

What dispositions are to be classified as abnormal, as outside ordinary human experience, for the purpose of admitting psychiatric evidence may be a difficult question. A disposition for sadism is clearly abnormal. Dispositions for violence (short of sadism or something akin thereto), or for dishonesty, are clearly too common to be classified as abnormal. In sexual offences, classification is less easy. However, it seems to me that, whether it be called pedophilia or something else, a disposition in an adult to use boys of 10 and 11 for sexual gratification must be classified as abnormal. Accordingly, in the present case, psychiatric evidence is admissible to show that Garfinkle does not have such a disposition.

47 In my opinion, the term "distinctive" more aptly defines the behavioural characteristics which are a precondition to the admission of this kind of evidence.

48 How should the criteria for the admission of this type of evidence be applied? I find the following statement of Professor Mewett, *supra*, at p. 36, to be an apt characterization of the nature of the decision which the trial judge must make:

The categorization of crimes into the "ordinary" and the "extraordinary" is therefore a legal question to be determined by the judge, as is the "normality" or "abnormality" of the accused — to the despair, no doubt, of psychiatrists. But admissibility of evidence is a legal question and depends primarily upon relevance, that is, upon its assistance to the trier of fact in his inference-drawing process, and this is governed, not by expertise, but by common sense and experience; words like "ordinary", "extraordinary" or "abnormal" are not meant to be scientific expressions but assessments of relevance and are thus clearly within the domain of the judge.

49 Before an expert's opinion is admitted as evidence, the trial judge must be satisfied, as a matter of law, that either the perpetrator of the crime or the accused has distinctive behavioural characteristics such that a comparison of one with the other will be of material assistance in determining innocence or guilt. Although this decision is made on the basis of common sense and experience, as Professor Mewett suggests, it is not made in a vacuum. The trial judge should consider the opinion of the expert and whether the expert is merely expressing a personal opinion or whether the behavioural profile which the expert is putting forward is in common use as a reliable indicator of membership in a distinctive group. Put another way: Has the scientific community developed a standard profile for the offender who commits this type of crime? An affirmative finding on this basis will satisfy the criteria of relevance and necessity. Not only will the expert evidence tend to prove a fact in issue but it will also provide the trier of fact with assistance that is needed. Such evidence will have passed the threshold test of reliability which will generally ensure that the trier of fact does not give it more weight than it deserves. The evidence will qualify as an exception to the exclusionary rule relating to character evidence provided, of course, that the trial judge is satisfied that the proposed opinion is within the field of expertise of the expert witness.

### (3) Application to This Case

50 I take the findings of the trial judge to be that a person who committed sexual assaults on young women could not be said to belong to a group possessing behavioural characteristics that are sufficiently distinctive to be of assistance in identifying the perpetrator of the offences charged. Moreover, the fact that the alleged perpetrator was a physician did not advance the matter because there is no acceptable body of evidence that doctors who commit sexual assaults fall into a distinctive class with identifiable characteristics. Notwithstanding the opinion of Dr. Hill, the trial judge was also not satisfied that the characteristics associated with the fourth complaint identified the perpetrator as a member of a distinctive group. He was not prepared to accept that the characteristics of that complaint were such that only a psychopath could have committed the act. There was nothing to indicate any general acceptance of this theory. Moreover, there was no material in the record to support a finding that the profile of a paedophile or psychopath has been standardized to the extent that it could be said that it matched the supposed profile of the offender depicted in the charges. The expert's group profiles were not seen as sufficiently reliable to be considered helpful. In the absence of these indicia of reliability, it cannot be said that the evidence would be necessary in the sense of usefully clarifying a matter otherwise unaccessible, or that any value it may have had would not be outweighed by its potential for misleading or diverting the jury. Given these findings and applying the principles referred to above, I must conclude that the trial judge was right in deciding as a matter of law that the evidence was inadmissible.

51 The Court of Appeal also supported the admissibility of the evidence on the basis that Dr. Hill's evidence tended to rebut alleged similarities between the evidence on the respective counts. On this point, Finlayson J.A. stated at p. 178:

Where, as here, the Crown alleges that the probative value of the similar fact evidence arises from the circumstance that the acts compared are so unusual and strikingly similar that their similarities cannot be attributed to coincidence, the defence is equally entitled to lead evidence as to features of the alleged acts which demonstrate dissimilarities ...

The judgment of the Court of Appeal was not supported on this ground either in the respondent's factum or in the oral argument.

52 The use to which the jury could put the evidence was explained by the trial judge in his charge to the jury. The key passage in the charge in this respect was the following:

If you conclude when considering any of the specific counts that evidence relating to any or all of the other counts is *so similar that common sense dictates the relevancy of such evidence* to one or more of the issues I mentioned earlier, then you may, not must, draw the inferences to which I have referred. [Emphasis added.]

The similarities, which were detailed by the judge, were with respect to the modus operandi of the perpetrator of the acts which were the subject of the individual counts. No objection was taken to this aspect of the charge. This use of the similar fact evidence relates to a different issue from the subject matter of the proposed evidence of Dr. Hill. As discussed above, the dissimilarities addressed in Dr. Hill's proposed evidence are not as to modus operandi but rather with respect to the comparative psychological make-up of the respondent on the one hand and the alleged perpetrator of the acts charged, on the other. Furthermore, whether a crime is committed in a manner that identifies the perpetrator by reason of striking similarities in the method employed in the commission of other acts is something that a jury can, generally, assess without the aid of expert evidence. As stated by the trial judge, it is a matter of common sense.

53 I would allow the appeal, set aside the judgment of the Court of Appeal, restore the convictions and remit the matter to the Court of Appeal for disposition of the sentence appeal.

*Appeal allowed.*

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiffs alleged that defendants manufactured and sold defective leads, which were operative part of defibrillators, conspired to conceal defect, and failed to warn doctors and persons implanted with defibrillators — Plaintiffs brought action, pleading negligence, conspiracy, waiver of tort, derivative claims under family law legislation, and subrogated claims of provincial health insurers — Plaintiffs proposed main class of all persons implanted in Canada with specified leads, and family law class of all family members of implant class entitled to assert claim under Family Law Act and related legislation — Plaintiffs brought motion to certify action as class proceeding under Class Proceedings Act, 1992 — Action partially and conditionally certified — Plaintiffs pleaded cause of action in negligence for product liability and failure to warn — Current pleading was adequate to advance claims of members of family law class — With respect to claim of provincial health insurers, while it may be true that plaintiffs could not assert "subrogated" claim for Alberta pursuant to Alberta Hospitals Act, plaintiffs could still assert claim on behalf of province of Alberta or other provincial health insurers — Additional class for claims of provincial health insurers should be added, and leave was granted to amend statement of claim accordingly — Claim of waiver of tort was satisfactorily pleaded — With respect to claim in conspiracy, motion was adjourned sine die, and plaintiffs granted 20 days to amend statement of claim to plead claim of conspiracy — Special damages were necessary ingredient of conspiracy plea and had to be expressly pleaded, and plaintiffs failed to identify special damages.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiffs alleged defendants manufactured and sold defective leads, which were operative part of defibrillators, conspired to conceal defect, and failed to warn doctors and those implanted with defibrillators — Plaintiffs brought action for negligence, conspiracy, waiver of tort, derivative claims under family law legislation, and subrogated claims of provincial health insurers — Plaintiffs proposed main class of all persons implanted in Canada with specified leads, and family law class of all family members of implant class entitled to assert claim under Family Law Act and related legislation — Plaintiffs brought motion to certify action as class proceeding under Class Proceedings Act, 1992 (CPA) — Action partially and conditionally certified — Proposed class definitions satisfied requirements of CPA, but additional class for provincial health insurers should be added, and leave granted to amend statement of claim accordingly — Since Medical Devices Regulations required manufacturers, importers and distributors of medical devices to maintain records of patients implanted with device, defendants had records to determine number and identity of individuals implanted with leads in Canada — All proposed implant class members had defibrillators that were subject matter of product recall with respect to life-saving medical device and there was basis in fact for proposed class definitions — Whether or not implant class members met threshold for emotional distress claims was matter for trial — All persons implanted with allegedly defective leads ought to be bound by outcome of class action unless they opted out — There was no operative conflict of interest and alleged conflicts of interest were merely speculative.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiffs alleged defendants manufactured and sold defective leads, which were operative part of defibrillators, conspired to conceal defect, and failed to warn doctors and persons implanted with defibrillators — Plaintiffs brought action for negligence, conspiracy, waiver of tort, derivative claims under family law legislation, and subrogated claims of provincial health insurers — Plaintiffs brought motion to certify action as class proceeding under Class Proceedings Act, 1992 — Action partially

and conditionally certified — With regard to conspiracy claim, motion adjourned sine die, so consideration of conspiracy questions adjourned — With exclusion of punitive damages question, common issues for negligence, waiver of tort, costs of administration, and pre-judgment interest raised common issues of fact or law — Examinations for discovery and trial of two common issues concerning quantification of waiver of tort claim should be divided from and follow trial of other common issues — With individual issues of causation and damages outstanding, determination of common issues regarding negligence would not determine liability, but would substantially advance proceedings and avoid duplication of fact finding and legal analysis — With respect to waiver of tort, if wrongdoing was proven, availability of disgorgement was common issue of law for all victims of wrongdoing — Proposed common issue with respect to punitive damages should not be certified as common issue — Preconditions to determining liability for punitive damages would not be satisfied until after individual assessments of causation and damages — Punitive damages could not be determined until after individual trials.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiffs alleged that defendants manufactured and sold defective leads, which were operative part of defibrillators, conspired to conceal defect, and failed to warn doctors and persons implanted with defibrillators — Plaintiffs brought action, pleading negligence, conspiracy, waiver of tort, derivative claims under family law legislation, and subrogated claims of provincial health insurers — Plaintiffs brought motion to certify action as class proceeding under Class Proceedings Act, 1992 — Action partially and conditionally certified — Conditional upon certain amendments being made to litigation plan, class proceeding was preferable procedure — Certifying action and trial of common issues would significantly advance litigation and advance policy objectives underlying class action legislation, namely, access to justice, judicial economy and behaviour modification — Defendants' submission that substance and complexity of individual issues of causation and damages overwhelmed common issues and that certification would result in unmanageable proceeding was rejected — Common issues trial would achieve efficiencies in adjudication that would justify effort — For many class members, there was no viable alternative to class proceeding — Many would not have resources to commence individual actions — Holding that it would be preferable for each class member to initiate separate proceedings would have practical effect of denying access to justice to most or all class members and would not promote judicial economy or behaviour modification purposes of Act — Plaintiffs satisfied preferable procedure criterion of Act.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Fair and adequate representation

Plaintiffs alleged that defendants manufactured and sold defective leads, which were operative part of defibrillators, conspired to conceal defect, and failed to warn doctors and persons implanted with defibrillators — Plaintiffs brought action, pleading negligence, conspiracy, waiver of tort, derivative claims under family law legislation, and subrogated claims of provincial health insurers — Plaintiffs brought motion to certify action as class proceeding under Class Proceedings Act, 1992 — Action partially and conditionally certified — Proposed representative plaintiffs were representative plaintiffs who would adequately represent interests of class without conflict of interest.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Litigation plan

Plaintiffs alleged that defendants manufactured and sold defective leads, which were operative part of defibrillators, conspired to conceal defect, and failed to warn doctors and persons implanted with defibrillators — Plaintiffs brought action, pleading negligence, conspiracy, waiver of tort, derivative claims under family law legislation, and subrogated claims of provincial health insurers — Plaintiffs brought motion to certify action as class proceeding under Class Proceedings Act, 1992 — Action partially and conditionally certified — Litigation plan was deficient with respect to its treatment of individual issues that would follow common issues trial — As matter of access to justice, it was not adequate to provide that class members would be entitled to retain personal lawyer to conduct assessment if so desired — Many class members might not have resources to retain lawyer to prosecute individual claims — Class members required, at least, assurances that they would have representation of class counsel and willingness to provide services pursuant to contingency fee agreement — Litigation plan should be amended accordingly — Other amendments would make for better litigation plan, but deficiencies did not go so far as to establish that plaintiffs had not produced workable litigation plan — Deficiencies could be addressed by adding provision that within 60 days of certification, parties would make best efforts to establish timetable for action and discovery plan, failing which parties could move for order

establishing timetable and discovery plan — With these amendments, and amendment recognizing bifurcation of two common issue questions, litigation plan satisfactory.

MOTION by plaintiffs to certify action as class proceeding under *Class Proceedings Act, 1992*.

**Perell J.:**

**Introduction and Overview**

1 The Plaintiffs, Sherry Marie Robinson, Gregory Robert Horning, Dan Austen, and Glenda Austen make a motion to certify an action as a class proceeding under the *Class Proceedings Act, 1992*, S.O. 1992, c.6 and for incidental relief including their appointment as Representative Plaintiffs.

2 The Plaintiffs allege that the Defendants, Medtronic, Inc. and Medtronic of Canada Ltd., (collectively "Medtronic") manufactured and sold defective electronic wires known as "Leads," which are an operative part of implantable heart defibrillators. It is alleged that the Leads were prone to fracture causing the defibrillators to malfunction. It is alleged that the failure rate is accelerating. The Plaintiffs allege that the Defendants conspired to conceal the defect from regulators and that they failed to warn doctors and the persons implanted with heart defibrillators.

3 The Plaintiffs claim damages for negligence and conspiracy. They advance a plea of waiver of tort claiming disgorgement of the Defendants' gains from the sale of the defective Leads.

4 The Plaintiffs propose that there be two classes; (1) the Implant Class; and (2) the Family Law Class, defined as follows:

Implant Class - All persons implanted in Canada with one of the following Medtronic Spirit Fidelis Leads: 6949, 6948, 6931, and 6930.

Family Law Class - All family members of the Implant Class who are entitled to assert a claim pursuant to the *Family Law Act*, R.S.O. 1990, c. F.3, and related provincial and territorial legislation.

5 It is estimated that there are approximately 6,000 Implant Class Members.

6 It is proposed that Kim Orr Barristers PC and Rochon Genova LLP be appointed as Class Counsel.

7 Medtronic submits that although other defective medical device actions have been certified as class proceedings, the Plaintiffs in this case have not met the evidentiary burden for certification and a class proceeding is not the preferable procedure. In particular, Medtronic submits: (1) several causes of action have not been properly pleaded; (2) the plea of conspiracy is redundant and makes the action inefficient and unmanageable as a class proceeding; (3) the class definition is overbroad and contains inherent conflicts amongst class members; (4) the necessity for complex individual damage assessments will overwhelm the common issues; (5) the class action is not a preferable proceeding; and (6) the Litigation Plan is not workable.

8 As an alternative submission, Medtronic submits that the common issues about the quantification and allocation (but not the entitlement) of the waiver of tort claim be severed from the other common issues with a divided discovery and a bifurcated common issues trial.

9 Here, it should be mentioned that in *Peter v. Medtronic Inc.* (which is a different action, which I will discuss below), Medtronic made a motion for a similar bifurcation order. Its motion was heard at the same time as this certification motion. Reasons for Decision in *Peter v. Medtronic Inc.* are being released contemporaneously with these Reasons. In the *Peter v. Medtronic Inc.* action, I make a bifurcation order.

10 For the Reasons that follow, I conclude that this action should be partially and conditionally certified as a class proceeding under the *Class Proceedings Act, 1992*. In particular, I conclude that:

- In so far as the Plaintiffs' motion seeks to certify a claim in conspiracy, the motion should be adjourned *sine die* to be brought on again by either party, and the plaintiffs shall be granted 20 days to amend their statement of claim to properly plead a claim in conspiracy failing which the claim for conspiracy is struck out.
- The Plaintiffs' statement of claim discloses causes of action in negligence, waiver of tort, and claims of Family Law Class Members and provincial health insurers.
- The proposed class definitions satisfy the requirements of the Act, but an additional class for the claims of provincial health insurers should be added, and leave is granted to amend the statement of claim accordingly.
- With the revisions noted later in these Reasons for Decision, the common issues for negligence, waiver of tort, the costs of administration, and pre-judgment interest raise common issues of fact or law. (The common issues for conspiracy are deferred by the adjournment.)
- Examinations for discovery and the trial of the two common issues with respect to the quantification of the waiver of tort claim should be divided from and follow the common issues trial of the other common issues.
- The proposed common issue with respect to punitive damages should not be certified as a common issue.
- Conditional upon the Litigation Plan being amended, as set out later in these Reasons for Decision, a class proceeding is the preferable procedure.
- There are Representative Plaintiffs who would adequately represent the interests of the class without conflict of interest.
- Conditional upon the Litigation Plan being amended, as set out later in these Reasons for Decision, the Representative Plaintiffs have produced a workable litigation plan.
- The amended Litigation Plan should provide, among other things, for a divided discovery and a bifurcated common issues trial with respect to the quantification and allocation (but not the entitlement) of the waiver of tort claim.

11 By way of general organization of these Reasons for Decision, after this introduction, I shall describe the factual background and then I shall discuss the various elements of the test for certification found in s.5 (1) of the *Class Proceedings Act, 1992*, along with the arguments of the parties about the various elements of the test.

### **Factual Background-Introduction**

12 In this and the following two parts of my Reasons for Decision, I shall describe most of the factual background that is necessary to decide this motion for certification. I, however, shall defer the discussion of several factual matters, including the discussion of *Peter v. Medtronic Inc.*, until later in these Reasons, when I discuss the five elements of the test of certification.

13 In this first part of the discussion of the factual background, I will describe the nature of the evidence relied on by the parties for the certification motion. In the second part, I shall describe some background medical information about the functioning of the heart and the operation of implanted defibrillators and Leads. In the third part, I shall describe the background to the claims of the plaintiffs as individuals and as representatives of the classes for the proposed class proceeding.

14 By way of evidence for the certification motion, the Plaintiffs relied on the affidavit evidence of:

- the proposed Representative Plaintiffs, Sherry Marie Robinson, Gregory Robert Horning, Dan Austen, and Glenda Austen, who I shall refer to collectively as the Plaintiffs;
- Sakie Tambakos, who is a lawyer at Rochon Genova LLP, one of the proposed Class Counsel. Mr. Tambakos produced court judgments, academic articles, documents from the U.S. Food and Drug Administration, medical research studies or reports, and newspaper articles;
- Dr. Geddes Frank Owen Tyers, a cardiovascular, thoracic, and general surgeon from Vancouver, British Columbia. He is Professor Emeritus at the University of British Columbia. Previously, he has held posts at the University of Texas, the Pennsylvania State University, and the University of Pennsylvania. Dr. Tyers deposes to having had extensive experience with the implementation of pacemakers, defibrillators, and all types of Leads. His affidavit provided information on seven topics: (1) the heart and heart failure; (2) heart rhythm disorders; (3) ICDs and Leads; (4) Sprint Fidelis Leads; (5) Implementation of replacement Leads with or without prior extraction; (6) risks of device failure; and (7) reporting of device failures.

15 By way of evidence for the certification motion, Medtronic delivered an affidavit from James McAuley, who is a partner with KPMG LLP. Mr. McAuley provided a report with respect to what would be involved in quantifying a disgorgement of Medtronic's gains. Mr. McAuley's evidence was directed to the issue of whether there should be divided discovery and a divided common issues trial for the quantification of Medtronic's disgorgement. Mr. McAuley's affidavit was also filed for the bifurcation motion in *Peter v. Medtronic Inc.*.

16 Medtronic also delivered an affidavit from Kelly Hearnden who is a legal administrative assistant at Stikeman Elliott LLP, the lawyers for Medtronic. She attaches as an exhibit to her affidavit, a copy of the decision of Justice Kyle of the United States District Court District of Minnesota dated January 5, 2009 in the Multidistrict Litigation *Medtronic Inc. v. Sprint Fidelis Leads Product Liability Litigation* [(January 5, 2009), Kyle (U.S. Dist. Ct. D. Minn.)]. During argument, Medtronic's counsel indicated that for the purposes of the motion now before the court, Justice Kyle's judgment was just background information. There is no reason for me to comment further about this judgment or the situation in the United States litigation.

17 As will shortly appear, in their affidavit evidence, the Plaintiffs make very serious allegations of wrongdoing by Medtronic, but for the most part, Medtronic has restrained itself from responding to the allegations and apart from general denials and directing the court's attention to particular matters supportive of its innocence, Medtronic has not attempted to prove the falsity of the allegations and has confined itself to arguments about whether the conditions for certification have been satisfied.

18 In my opinion, it was appropriate for Medtronic to proceed in this way. A motion for certification is not the place for the Plaintiffs to prove their allegations or for the Defendants to disprove them or for the court to make any determination of the merits of the Plaintiffs' claim or the Defendants' defence.

19 It should be noted that it follows from the nature of a certification motion that my description of the factual background goes no farther than necessary to decide the certification motion and my statements are not and should not be taken as a binding determination of any factual matter.

#### ***Heart Function and Defibrillator and Lead Operation***

20 The heart is a muscular organ composed of four chambers. The function of the heart is to circulate blood throughout the body. The upper two chambers of the heart are atria and the lower two chambers are ventricles. The right atrium receives partially deoxygenated blood and pumps it into the right ventricle. The right ventricle pumps the deoxygenated blood to the lungs where oxygen is added and carbon dioxide removed. The left atrium receives the newly oxygenated blood and pumps it into the left ventricle, which then pumps the blood through the body.

21 The heart has an electrical system that keeps the pumping of blood regular and that helps to keep the cardiac chambers contracting in a coordinated fashion.

22 An irregularity in the heart's electrical system is called an arrhythmia, or heart rhythm disorder. When the heart beats too quickly, it is called a tachycardia or a tachyarrhythmia. When the heart beats too slowly, it is called a bradycardia or bradyarrhythmia. Both types of abnormal heart rhythms can decrease the delivery of blood and can cause death.

23 An implantable cardioverter defibrillator (ICD) is a life-saving medical device for persons with heart problems. It consists of two parts: (1) the defibrillator; and (2) one or more Leads. The defibrillator is approximately the size and shape of an old-fashioned pocket watch and is usually surgically implanted within the upper front chest wall of a patient.

24 The Leads perform two functions: (1) they send information about heart rhythm to the defibrillator; and (2) they convey electrical energy pulses from the defibrillator to the heart as medical therapy to correct or prevent heart malfunction or failure. A Lead is a complex insulated wire that runs from the defibrillator to a location in the heart. Leads must be extremely flexible to withstand the twisting and bending caused by body movement and by the movement of the heart itself.

25 The defibrillator and its Lead(s) are designed to detect and correct arrhythmia. When the heart is afflicted by a dysrhythmia, the function of an implanted pacemaker or defibrillator is to deliver through the Leads corrective electrical energy to the heart.

26 Medtronic's Sprint Fidelis Leads are among the thinnest Leads available, with a diameter of 2.2 millimeters. Over 270,000 people worldwide have implants with these Leads.

27 Implanting or explanting a Lead is surgery with attendant risks, including the risk of injury to blood vessels, nerves or organs, infection, and even death.

#### **The Claims of the Proposed Representative Plaintiffs**

28 The Plaintiff Sherrie Marie Robinson was born on March 7, 1973. She has three children and a spousal relationship with the Plaintiff Gregory Robert Horning. They live in Sechelt, British Columbia.

29 The Plaintiff Dan Austen was born on March 6, 1946. He is married to the Plaintiff Glenda Austen. They have two children. The Austens live in Hastings, Ontario.

30 Medtronic, Inc., which employs 38,000 people, and carries on business throughout the world, is a medical technology company. Medtronic of Canada Ltd. is a wholly-owned subsidiary. Among other products, Medtronic manufactures Leads for implantable heart defibrillators, including Sprint Fidelis Leads.

31 In June 2004, in the United States, the Food and Drug Administration ("FDA") approved for patient use the Sprint Fidelis Leads that are the subject of this action.

32 In or around July and November 2004, the Leads were approved by Health Canada for commercial sale in accordance with the licensing application and amendment processes under the *Medical Device Regulations SOR/98-282*, which is a regulation of the *Food and Drugs Act*, R.S.C. 1985, c. F-27 as amended.

33 In April 2005, Ms. Robinson was implanted with a defibrillator. One of the defibrillators Leads was a Medtronic Lead, the Sprint Fidelis 6949.

34 By the summer of 2005, Medtronic had knowledge of four instances where Sprint Fidelis Leads had fractured or malfunctioned. During the months that followed, additional information about the performance of the Leads came to the attention of Medtronic.

35 On January 10, 2007 and for the following days, Ms. Robinson's defibrillator malfunctioned both while she was at home and also while she was undergoing emergency medical treatment at several hospitals.

36 Just a part of her agonizing experience at several hospitals is described in paragraphs 21 and 24 of her affidavit where she deposes:

21. [W]hile I was in St. Mary's again hooked up to a heart monitor, my ICD fired six consecutive times. However, on each occasion, the shocks were determined to be inappropriate as the heart monitor detected no arrhythmia. The doctors had no idea why my ICD was firing. Furthermore, they did not know how to deactivate it. I remember the hospital room being very chaotic, with the doctors and nurses yelling, and everyone appeared to be panicking, as was I. ....

24. When I arrived at St. Paul's Hospital [she was transported by air ambulance], I was taken into a room in the Intensive Care Unit. ... [T]he doctor simply placed an ICD programmer on top of the magnet previously taped to my chest [the magnet turned off the defibrillator]. A programmer, which is normally kept at the hospital is a specialized computer used to monitor and change the instructions of the implanted ICD. Almost immediately, the ICD began to fire, giving me several more shocks in quick succession. The doctor was unable to shut off the ICD. He began to yell for assistance. He seemed to be panicking. While this was happening, Greg was holding me to cushion the impact of the shocks.

37 As a response to the ongoing malfunctioning of her defibrillator, on January 10, 2007, Ms. Robinson's defibrillator was shut down, and it was determined that its Lead was the cause of her problems. Two weeks later, on January 24, 2007, Ms. Robinson underwent surgery, and the Sprint Fidelis 6949 Lead was replaced.

38 It was replaced with another Sprint Fidelis 6949 Lead.

39 In February 2007, doctors at the Minneapolis Heart Institute informed Medtronic that Sprint Fidelis Leads implanted in six patients had fractured and misfired within two years of implant. Doctors from other medical centres communicated concerns to Medtronic, and a Dr. Hauser from the Minneapolis Heart Institute conducted a study that indicated that the Sprint Fidelis Leads were ten times more likely to fail than the Medtronic Quattro Lead.

40 In March 2007, Medtronic advised physicians that it had received reports from several physicians that indicated higher than expected fracture rates with Sprint Fidelis Leads and that Medtronic had investigated these reports and reviewed them with its Independent Physician Quality Panel and wished to share the information. Medtronic advised that overall, Sprint Fidelis performance was consistent with other Leads.

41 From March 2007 to October 2007, Medtronic monitored the performance of the Sprint Fidelis Leads. Among other things, Medtronic used a proprietary algorithm to analyze data from over 25,000 devices enrolled on Medtronic's CareLink Network, a remote monitoring system, which is used to determine the integrity of Leads implanted in patients.

42 In May 2007, Medtronic sought and received approval from the FDA for design and manufacturing changes to the Sprint Fidelis Leads. The Plaintiffs allege that the changes were to fix defects to the Leads but that this information was not disclosed to the regulator or to patients already implanted with Leads.

43 On July 31, 2007, Mr. Austen underwent surgery at the Kingston General Hospital in Kingston, Ontario, and he was implanted with a defibrillator with a Medtronic Sprint Fidelis 6949 Lead.

44 On October 15, 2007, the following happened:

- Medtronic voluntarily suspended sales of the Sprint Fidelis Leads and it issued a statement advising that the Leads might fracture and cause a defibrillator to not function or to malfunction by sending unnecessary electrical pulses to the heart. The statement disclosed a 2.3% failure rate over a 30-month period. Medtronic recommended that physicians not use the Leads.
- Medtronic released a letter to Heart Device Patients, which stated in part:

We have found that there is a small chance of fractures in particular locations on the Sprint Fidelis Lead. If you have a Sprint Fidelis Lead, the chance there is a problem with your lead is small. Patients with a Sprint Fidelis Lead are more likely to experience complications from removal than from a problem with a Sprint Fidelis Lead. However, doctors may choose to change the way a device is programmed to help reduce any potential problems. An independent panel of physician experts recommends against removing Sprint Fidelis Leads except in very unusual circumstances.

- The director of the Center for Devices and Radiological Health of the FDA issued a statement stating that the FDA considered Medtronic's action to be a product recall, as defined by FDA regulations. The statement, however, indicated that the FDA recognized that some patients and health care professionals might inappropriately interpret the word "recall" to mean that the devices must be surgically removed and returned to the manufacturer. The statement indicated that the FDA did not mean to imply that the Leads should be surgically removed.

- The action now before the court was commenced by the issuance of a notice of action.

45 On October 17, 2007, The U.S. Food and Drug Administration (FDA) classified the suspension of sales of the Leads as a "Class I Recall." This is the most serious type of recall, reserved for situations in which there is a reasonable probability that use of the product will cause serious injury or death.

46 On October 17, 2007, Ms. Robinson received a letter from St. Paul's Hospital advising her of the potential problem with the Lead in her defibrillator.

47 On October 25, 2007, Mr. Austin received a letter from the Kingston General Hospital advising him that the Lead in his defibrillator had a risk of fracturing.

48 On November 3, 2007, Ms. Robinson attended an information session at St. Paul's Hospital where she was advised that: (1) there was a small chance of the Lead fracturing; (2) the risks associated with removing the Lead were greater than the risks associated with the Lead malfunctioning; and (3) the defibrillator would be reprogrammed so that it would warn of an imminent problem.

49 On November 27, 2007, Mr. Austen underwent surgery to remove and replace the Sprint Fidelis 6949 Lead. It was replaced with a Medtronic Bipolar Dual-coil Lead (model No. 6947). There were complications that necessitated further surgery.

50 Ms. Robinson and Mr. Austen both allege that they would not have had the original Leads implanted if they had known the Leads were defective. They both allege that as a consequence of the Leads' defects, they have suffered personal injuries, damages and loss, including mental anguish, pain and suffering. They each claim special damages including medical costs and lost income.

51 It was Dr. Tyers' evidence that every person with one of the recalled Leads was at increased risk of sudden failure of a life-sustaining device including an increased risk of permanent injury and death. It was further his view that there was also a greater health risk to patients because of possible complications during any procedures to replace the Leads.

52 Relying on the information provided by Dr. Tyers and Mr. Tambakos and relying on their own personal experiences, the Plaintiffs submit that there is some basis in fact for their allegations that the Defendants engaged in a conspiracy to submit false, inaccurate, incomplete, and misleading information to Health Canada and the FDA, to conceal the defects from patients, physicians and regulators, and to mislead the Class Members and others about the safety of the Leads. Similarly, the Plaintiffs submit that there is some basis in fact for their allegations of negligence and conspiracy and the allegations that Medtronic intentionally did not disclose and did not act upon its knowledge of the dangerous defect in the Leads in order to maintain its market share.

53 Relying on the affidavit evidence, the Plaintiffs allege that: (a) Medtronic knew of Lead failures but failed to report them to the regulators and the class members in accordance with FDA requirements; (b) Medtronic failed to warn the regulators and the class members of the risks of Lead failure even after several failure modes were identified; (c) Medtronic blamed the fracture problem on physician technique rather than acknowledging design and manufacturing defects; (d) Medtronic implemented design and manufacturing changes to the Leads without obtaining the proper approvals from the FDA; (e) Medtronic continued to sell its inventory of defective Leads despite having made design and manufacturing changes, and failed to inform the regulators and the class members that their Leads were defective, and, (f) Medtronic under-reported the failure rates of the Leads.

54 Medtronic denies the Plaintiffs' allegations and intends to vigorously defend its reputation and the action. Its position is that it was not negligent in the manufacturing and distribution of the Leads and that it responded responsibly to the information provided to it about the performance of its product. It denies any conspiracy. However, at this juncture of the proceeding, it has not attempted to disprove the allegations and rather has focused its attention of whether the criteria for the certification of this action as a class proceeding have been satisfied.

55 The Plaintiffs, of course, submit that the action must be certified as a class proceeding and Medtronic, not surprisingly, submits that the action does not qualify to be a class proceeding.

56 The proposed class proceeding includes claims brought on behalf of family members pursuant to Ontario's *Family Law Act* and similar legislation from other provinces, and subrogated claims are brought on behalf of provincial and territorial health insurers in respect of past and future medical expenses incurred in the treatment of Implant Class Members.

57 The Plaintiffs seek compensation for both physical and emotional injury. As a class proceeding, the Plaintiffs seek general and punitive damages in the amount of \$750,000,000, and damages for mental anguish and pain and suffering in the amount of \$50,000,000.

58 Alternatively, relying on waiver of tort, the Plaintiffs seek damages equal to the gross revenue, or in the further alternative, the net income received by the Defendants as a result of the sale of the Leads.

59 I end this account of the factual background with three factual observations that are pertinent to several of the issues that I must address.

60 The first observation is that while the predicament of the Class Members is the same in so far as they all have been implanted with the Sprint Fidelis Leads and they all have been advised that the Sprint Fidelis Leads have been recalled, nevertheless, the Implant Class Members' individual experiences may differ. Some class members have not experienced Lead malfunctions.

Some class members have experienced malfunctions. Some class members have not replaced the Leads. Other class members have had surgery to replace the Leads. The current health of Class Members and their recovery and complications, if any, from surgery will, of course, be unique to each class member.

61 The second observation, which is related to the first, is that the intensity of any physical or emotional harm from their predicament will vary from class member to class member. Where class members have suffered physical or psychological injury, the range of harm would range from modest to very serious, including possibly death, although I was not told of any deaths occurring in Canada. The Plaintiffs submit that all Implant Class Members satisfy the standard set by the Supreme Court of Canada in *Mustapha v. Culligan of Canada Ltd.*, [2008] 2 S.C.R. 114 (S.C.C.) for compensable damages for stress and anxiety. Medtronic submits that some class members would not satisfy the standard.

62 The third observation is that the predicament of the class members is dynamic. Leads were never perfect. Even apart from any negligence, if any, in the manufacture of the Leads that would exacerbate their failure rate, some class members might experience malfunctions between now and the time of any trial.

### **The Criteria for Certification**

63 I turn now to an analysis of whether the proposed class action satisfies the criteria for certification set out in the Act.

64 Pursuant to s. 5(1) of the *Class Proceedings Act, 1992*, the court shall certify a proceeding as a class proceeding if: (a) the pleadings disclose a cause of action; (b) there is an identifiable class; (c) the claims of the class members raise common issues of fact or law; (d) a class proceeding would be the preferable procedure; and (e) there is a representative plaintiff who would adequately represent the interests of the class without conflict of interest and who has produced a workable litigation plan.

65 For an action to be certified as a class proceeding, there must be a cause of action, shared by an identifiable class from which common issues arise that can be resolved in a fair, efficient, and manageable way that will advance the proceeding and achieve access to justice, judicial economy, and the modification of behaviour of wrongdoers: *Sauer v. Canada (Minister of Agriculture)*, [2008] O.J. No. 3419 (Ont. S.C.J.) at para. 14, leave to appeal to Div. Ct. refused, (Ont. Div. Ct.).

66 On a certification motion, the question is not whether the plaintiff's claims are likely to succeed on the merits but whether the claims can appropriately be prosecuted as a class proceeding: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 16.

67 The purpose of a certification motion is to determine how the litigation is to proceed and not to address the merits of the plaintiff's claim; there is to be no preliminary review of the merits of the claim: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at paras. 28-9.

68 Motions for certification are procedural in nature and are not intended to provide the occasion for an exhaustive inquiry into factual questions that would be determined at a trial when the merits of the claims of class members are in issue: *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.) at para. 82.

69 For certification, the plaintiff in a proposed class proceeding must show "some basis in fact" for each of the certification requirements, other than the requirement that the pleading discloses a cause of action: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 25; *Taub v. Manufacturers Life Insurance Co.* (1998), 40 O.R. (3d) 379 (Ont. Gen. Div.), aff'd (1999), 42 O.R. (3d) 576 (Ont. Div. Ct.).

### **Disclose Cause of Action**

70 For certification, the Plaintiffs' statement of claim must disclose a cause of action. The "plain and obvious" test for disclosing a cause of action from *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), discussed further below, is used to determine whether the proposed class proceeding discloses a cause of action; thus, a claim will be satisfactory unless it has a radical defect or it is plain and obvious that it could not succeed: *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.) at p. 679, leave to appeal to S.C.C. ref'd, (2000) (S.C.C.); *1176560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.* (2002), 62

O.R. (3d) 535 (Ont. S.C.J.) at para. 19, leave to appeal granted, (2003), 64 O.R. (3d) 42 (Ont. S.C.J.), aff'd (2004), 70 O.R. (3d) 182 (Ont. Div. Ct.).

71 In a proposed class proceeding, in determining whether the pleading discloses a cause of action, no evidence is admissible, and the material facts pleaded are accepted as true, unless patently ridiculous or incapable of proof. The pleading is read generously and a pleading will be struck out only if it is plain, obvious, and beyond a reasonable doubt that the plaintiff cannot succeed: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 25; *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 41, leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'g (2003), 65 O.R. (3d) 492 (Div. Ct.); *Abdoor v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) at p. 469.

72 The Plaintiffs' Amended Amended Statement of Claim purports to plead causes of action in: (1) negligence; (2) derivative claims under to the *Family Law Act* and similar statutes; (3) subrogated claims of provincial health insurers; (4) waiver of tort; and (5) conspiracy.

### **Claims in Negligence**

73 Medtronic does not dispute, and I find as a fact, that the Plaintiffs have pleaded a cause of action in negligence both for product liability and for failure to warn.

### **Claims of Family Law Class**

74 The Plaintiffs bring the action "on behalf of all family members who are entitled to assert a claim pursuant to the *Family Law Act* and related provincial and territorial legislation."

75 Medtronic challenges this claim because only Class Members in Ontario have a derivative claim under the *Family Law Act*, R.S.O. 1990, c. F.3, ss. 61-63. Class members in other jurisdictions would have claims under their respective jurisdiction's *Fatal Accidents Acts*, but those claims are restricted to family members of deceased persons for wrongful death, and the amended statement of claim does not plead that any Class Members have died. (See: *Fatal Accidents Act*, R.S.P.E.I. 1988 c. F-5, s. 2; *Fatal Accidents Act*, R.S.A. 2000, c. F-8, s. 2; *Fatal Accidents Act*, R.S.S. 1978, c. F-11, s. 3; *Fatal Accidents Act*, C.C.S.M. c. F50, s. 2; *Fatal Accidents Act*, R.S.N.B. 1973, c. F-7, s. 2; *Fatal Accidents Act*, R.S.N.L. 1990, c. F-6, s. 3; *Fatal Injuries Act*, R.S.N.S. 1989, c. 163, s. 3; *Fatal Accidents Act*, R.S.N.W.T 1988, c. F-3, s. 2; *Fatal Accidents Act*, R.S.Y. 2002, c. 86I, s. 2.)

76 I reject Medtronic's challenge for the same reason that Justice Cullity rejected a similar argument in *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) at paras. 53-58. The question of whether an individual member of the Family Law Class qualifies for a claim pursuant to the *Family Law Act* and related provincial and territorial legislation is an individual issue to be determined after a common issues trial. The current pleading is adequate to advance the claims of the members of the Family Law Class.

### **Claim of Provincial Health Insurers**

77 Medtronic challenges the Plaintiffs' claim on behalf of the Province of Alberta.

78 The Plaintiffs bring their action "on behalf of all provincial and territorial health insurers." Medtronic, however, submits that the Plaintiffs cannot assert a subrogated claim pursuant to the *Alberta Hospitals Act*, R.S.A. 2000, c. H-12, s. 62, which provides that "the Crown has the right to recover from the wrongdoer the Crown's costs of health services."

79 It may be true that the Plaintiffs cannot assert a "subrogated" claim for Alberta, but I see no reason why the Plaintiffs cannot still assert a claim on behalf of the Province of Alberta or the other provincial health insurers.

80 Provided that the Representative Plaintiff has his or her own cause of action, the Representative Plaintiff can assert a cause of action against a defendant on behalf of other class members that he or she does not assert personally, provided that the causes of action all share a common issue of law or of fact: *Boulanger v. Johnson & Johnson Corp.*, [2002] O.J. No. 1075 (Ont. S.C.J.) at para. 22, leave to appeal granted, (Ont. S.C.J.), varied (2003), 64 O.R. (3d) 208 (Ont. Div. Ct.) at paras. 41, 48, varied

(Ont. C.A.); *Matoni v. C.B.S. Interactive Multimedia Inc.*, [2008] O.J. No. 197 (Ont. S.C.J.) at paras. 71-77; *Voutour v. Pfizer Canada Inc.*, [2008] O.J. No. 3070 (Ont. S.C.J.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) at para. 55. Thus, the Representative Plaintiffs in the case at bar may assert a claim on behalf of the Province of Alberta, which may opt-out if it does not wish to participate in the class action.

81 As a technicality, to assert a claim on behalf of Alberta, an additional class is required for the purposes of the class proceedings as follows:

Health Insurer Class - All provincial or territorial health insurers who are entitled to assert a claim pursuant to the *Alberta Hospitals Act*, R.S.A. 2000, c. H-12, s. 62 and related provincial and territorial legislation.

82 I grant leave for the statement of claim to be amended accordingly. The Representative Plaintiffs may stand as the Representative Plaintiffs for this additional class.

### **Claim of Waiver of Tort**

83 In its factum, Medtronic submits that the claim for recovery under restitutionary principles; namely, the claim of waiver in tort, is not properly pleaded. However, at the oral argument, Medtronic did not press this point, and it rather focused its argument on the significance of the claim of waiver of tort on the other certification criteria, which are matters that I will discuss below.

84 I am satisfied from my review of the statement of claim that its claim of waiver of tort has been satisfactorily pleaded. I note that similar pleas have passed muster in the medical device cases of: *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) and (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.) and *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.); *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (Ont. S.C.J.), aff'd (Ont. Div. Ct.); *Serhan Estate v. Johnson & Johnson* (2004), 72 O.R. (3d) 296 (Ont. S.C.J.), leave to appeal granted (Ont. Div. Ct.), aff'd (2006), 85 O.R. (3d) 665 (Ont. Div. Ct.), leave to appeal to C.A. ref'd Oct. 16, 2006 [(October 16, 2006), Doc. M33963 (Ont. C.A.)], leave to appeal to S.C.C. ref'd, (2007) (S.C.C.)

### **Claim of Conspiracy**

85 In its factum, Medtronic submitted that the Plaintiffs have not pleaded a cause of action in conspiracy, and in oral argument, Medtronic drilled down on the point that the Plaintiffs had failed to plead the special damages caused by the alleged conspiracy, which it was submitted is a fatal defect.

86 Relying on the proximate circumstance that in the case at bar the Plaintiffs' pleading has had three iterations and on the extraneous circumstance that in *Peter v. Medtronic Inc.*, which is an action with the same legal counsel as in the case at bar, a similar pleading about defects in a defibrillator had undergone seven iterations, Medtronic submitted that the conspiracy pleadings should be struck out without leave to amend.

87 For their part, the Plaintiffs defended their conspiracy pleading by relying on the doctrine of *stare decisis* and on: *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) and (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); and *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.). Based on these authorities, the Plaintiffs submitted that I had no choice and must certify the conspiracy pleading.

88 As I advised the parties at the outset of the oral argument, my initial view was that there were problems with the conspiracy pleading, but I thought that they could be resolved by ordering the Plaintiffs to provide particulars so that Medtronic could plead its statement of defence.

89 I was, however, persuaded by Medtronic's oral argument that the problems with the conspiracy pleading were more serious and that they could not be addressed simply by ordering particulars. For the Reasons that follow, I came to the view that in so far as this motion seeks to certify a claim in conspiracy, the motion should be adjourned *sine die* to be brought on by again by

either party and the plaintiffs shall be granted 20 days to amend their statement of claim to plead a claim in conspiracy, failing which the claim for conspiracy should be struck out.

90 I begin my explanation of this conclusion by saying that before I consider Medtronic's submission and also *Peter v. Medtronic Inc.*, *supra*, *LeFrancois v. Guidant Corp.*, *supra*, and *Lambert v. Guidant Corp.*, *supra*, I shall make my own analysis of the statement of claim and of the law of conspiracy, and I shall measure the adequacy of the Plaintiffs' conspiracy pleading using authorities that are undoubtedly binding on me, beginning with the Supreme Court of Canada's decision in *Canada Cement Lafarge Ltd. v. British Columbia Lightweight Aggregate Ltd.*, [1983] 1 S.C.R. 452 (S.C.C.).

91 *Canada Lafarge Ltd.* is authority that there are two types of civil conspiracy: (1) conspiracy to injure; and (2) conspiracy to perform an unlawful act.

92 The elements of conspiracy to injure are: (1) the defendants acted in combination; (2) the defendants intended to harm the plaintiff; and (3) the defendants' conduct caused harm to the plaintiff.

93 The elements of conspiracy to perform an unlawful act are (1) the defendants acted in combination; (2) the defendants committed an unlawful act, i.e. a crime, tort, or breach of statute; (3) the defendants knew or should have known that injury to the plaintiffs was likely to occur from their misconduct; and (4) the defendants' misconduct in furtherance of the conspiracy caused harm to the plaintiff.

94 I pause here to say that there is no pleading in the case at bar that Medtronic, Inc. and Medtronic of Canada Ltd. conspired to injure. The allegations are that they conspired to perform unlawful acts.

95 In *Canada Lafarge Ltd.*, in breach of the *Combines Investigation Act*, the defendants, Canada Lafarge and Ocean Construction Supplies Ltd., combined together to control the concrete and concrete product market in British Columbia. The plaintiff, British Columbia Lightweight Aggregate Ltd., which had gone out of business, sued the defendants for the tort of conspiracy to perform an unlawful act, the unlawful act being the breach of the *Combines Investigation Act*. The Supreme Court of Canada dismissed the action because the acts of the defendants, admittedly contrary to the *Act*, were not the cause of the Plaintiff going out of business. The action was dismissed because the conspiracy had not caused the plaintiff to suffer damages.

96 Following *Canada Lafarge Ltd.*, in *Lombardo v. Caiazzo*, [2006] O.J. No. 2286 (Ont. C.A.), the Ontario Court of Appeal dismissed a conspiracy action because the plaintiffs had not proven any special damages from the defendants unlawful conduct of breaching the *Fraudulent Conveyances Act*. In *Lombardo*, the plaintiffs led no evidence to show that they would have been in a different position had the wrongful acts not occurred.

97 The Supreme Court of Canada considered both types of civil conspiracy in *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.). In this case, between 1940 and 1967, the defendants mined asbestos and produced a variety of asbestos products. The plaintiff, Mr. Hunt, alleged that from exposure to asbestos fibres over the course of his employment, he had contracted cancer. Mr. Hunt alleged that the defendants had conspired with each other with the predominant purpose of injuring him. In the alternative, he alleged that the defendants had conspired to prevent by unlawful means their knowledge of the dangers of asbestos from becoming public in circumstances where the defendants knew or ought to have known that injury to the plaintiff and others would result from the defendants' acts. Mr. Hunt alleged, among other things, that the defendants' acts in furtherance of the conspiracy included fraudulently, deceitfully, or negligently suppressing, distorting, and misrepresenting the results of medical and scientific research on the health effects of asbestos and fraudulently, deceitfully, or negligently attempting to discredit doctors and scientists who claimed that exposure to asbestos caused disease.

98 Arguing that the tort of conspiracy did not extend beyond the area of commercial harm to the area of personal injuries, several of the defendants made a motion to have Mr. Hunt's action dismissed for not showing a reasonable cause of action. The Supreme Court of Canada held that it was not plain and obvious that the law of conspiracy would not develop to encompass Mr. Hunt's personal injury claim.

99 Justice Wilson, who wrote the judgment of the Court, was careful to leave it open to the trial court to develop the law on conspiracy on a full factual record. She, however, commented about the state of the law of conspiracy in Canada. She stated at para. 43 of her judgment:

.... Fridman goes on to observe at pp. 265-66

In modern Canada, therefore, conspiracy as a tort comprehends three distinct situations. In the first place there will be an actionable conspiracy if two or more persons agree and combine to act unlawfully with the predominating purpose of injuring the plaintiff. Second, there will be an actionable conspiracy if the defendants combine to act lawfully with the predominating purpose of injuring the plaintiff. Third, an actionable conspiracy will exist if defendants combine to act unlawfully, their conduct is directed towards the plaintiff (or the plaintiff and others), and the likelihood of injury to the plaintiff is known to the defendants or should have been known to them in the circumstances.

In my view, this passage provides a useful summary of the current state of the law in Canada with respect to the tort of conspiracy. Whether it is "good law", it seems to me, it is not for the Court to consider in this proceeding where the issue is simply whether the plaintiff's pleadings disclose a reasonable cause of action. I agree completely with Esson J.A. that it is not appropriate at this stage to engage in a detailed analysis of the strengths and weaknesses of Canadian law on the tort of conspiracy.

100 In *Hunt v. T & N plc*, Justice Wilson also commented about the doctrine of merger, which posits that when a tort has been committed by two or more persons, a conspiracy to commit the tort merges in the nominate tort: *Ward v. Lewis* (1954), [1955] 1 All E.R. 55 (Eng. C.A.) at p. 56.

101 In *Hunt v. T & N plc*, the defendants submitted that the doctrine of merger precluded the plaintiff's conspiracy claim. Justice Wilson, however, held that there were problems with this submission. In para. 54 of her judgment, she stated that it was not possible to decide whether merger had taken place without first deciding whether Mr. Hunt had proved that the other tortious acts had been committed, which would only occur after a trial. In para. 55 of her judgment, she held that it was inappropriate on a motion to strike out a statement of claim to get into the question whether the plaintiff's allegations concerning other nominate torts would be successful. She also stated:

If the plaintiff is successful with respect to the other nominate torts, then the trial judge can consider the defendants' arguments about the unavailability of the tort of conspiracy. If the plaintiff is unsuccessful with respect to the other nominate torts, then the trial judge can consider whether he might still succeed in conspiracy. Regardless of the outcome, it seems to me inappropriate at this stage in the proceedings to reach a conclusion about the validity of the defendants' claims about merger. I believe that this matter is also properly left for the consideration of the trial judge.

102 The Ontario Court of Appeal considered several aspects of the tort of conspiracy in *Knoch Estate v. Jon Picken Ltd.* (1991), 4 O.R. (3d) 385 (Ont. C.A.). For present purposes, it is not necessary to say much about the facts of this case other than that the plaintiff, Knoch Estate, entered into a conditional agreement to sell a property to a developer, Mantella Limited, for \$2.1 million unless a better offer was received before court approval of the estate sale. While the agreement was conditional, Mantella Ltd.'s real estate agents arranged to resell the property for \$3.5 to Caterpillar Ltd., for whom the real estate agents had also been retained to find a property for a factory. The real estate agents did not tell Knoch Estate about Caterpillar Ltd.'s and did not tell Caterpillar Ltd. that the agents were taking a share of the resale of the property or that it would have been possible to purchase the property directly from Knoch Estate. After both transactions closed, Knoch Estate sued the real estate agents and Mantella Ltd. A plea of conspiracy was advanced for the first time during the appeal from the trial judgment.

103 The Court of Appeal saw no merit in the conspiracy claim because the conduct of the real estate agents and Mantella Ltd. was directed at exploiting Caterpillar Ltd., not Knoch Estate. Justice Griffith stated that "where the conduct of the defendants is "unlawful", it must be unlawful in the sense that the conduct is directed towards the plaintiff and the defendant should know in the circumstances that the plaintiff is likely to be injured." Moreover, Justice Griffith was of the view that Knoch Estate had not demonstrated that it suffered a pecuniary loss. Justice Griffith reasoned that if the availability of the property had been disclosed

to Caterpillar Ltd., it might not have offered to pay more to Knoch Estate than had Mantella Ltd. For present purposes, the point to note is that proof of damages is fundamental to a conspiracy claim.

104 The Ontario Court of Appeal considered whether the tort of conspiracy had been properly pleaded against the directors of two corporations in *Normart Management Ltd. v. West Hill Redevelopment Co.* (1998), 37 O.R. (3d) 97 (Ont. C.A.). In this case, the plaintiff Normart had a 25% interest in a joint venture to develop lands along with two other corporations. A mortgage on the lands went into default, and when the mortgagee exercised its power of sale, the defendants purchased the lands to the exclusion of Normart. In response, Normart sued the two corporations for breach of fiduciary duty and the directors of the two corporations for conspiracy. The Court of Appeal struck out the pleading of conspiracy against the corporate directors with leave to amend.

105 The claim for conspiracy was struck out on the grounds that the wrongful acts alleged against the directors were no more than the acts of their corporations. Justice Finlayson, who wrote the judgment of the court stated at p. 105: "This bare allegation of a conspiracy involving the directing minds of the respondent corporations is an impermissible legal proposition" and thus the *Normart* case is an important case about the liability of corporate directors acting in the course of their role, which is not an issue in the case at bar.

106 What is helpful from *Normart* is that before he granted leave to Normart to deliver an amended statement of claim, Justice Finlayson provided guidance about a proper pleading of conspiracy. Justice Finlayson stated at p. 104 of the judgment:

In *H.A. Imports of Canada Ltd. v. General Mills Inc.* (1983), 42 O.R. (2d) 645, 150 D.L.R. (3d) 574 (H.C.J.), O'Brien J., dealing with the civil action of conspiracy as pleaded, quoted from *Bullen, Leake and Jacob's Precedents of Pleadings*, 12th ed. (London: Sweet & Maxwell, 1975), as follows at pp. 646-47:

The statement of claim should describe who the several parties are and their relationship with each other. It should allege the agreement between the defendants to conspire, and state precisely what the purpose or what were the objects of the alleged conspiracy, and it must then proceed to set forth, with clarity and precision, the overt acts which are alleged to have been done by each of the alleged conspirators in pursuance and in furtherance of the conspiracy; and lastly, it must allege the injury and damage occasioned to the plaintiff thereby.

The above is still good law.

107 As a matter of pleadings, numerous cases have held that special damages are a necessary ingredient in a cause of action based upon conspiracy and must be expressly pleaded: *Cineplex Corp. v. Viking Rideau Corp.*, [1985] O.J. No. 304 (Ont. H.C.); *Harcourt v. Solloway Mills & Co.* (1931), 40 O.W.N. 214 (Ont. H.C.); *McLaughlin v. Solloway Mills & Co.* (1931), 40 O.W.N. 149 (Ont. H.C.). In *Dionisio v. Lucas*, [2006] O.J. No. 1212 (Ont. S.C.J.) and in *Elliott v. Canadian Broadcasting Corp.* (1993), 16 O.R. (3d) 677 (Ont. Gen. Div.), aff'd (1995), 125 D.L.R. (4th) 534 (Ont. C.A.), leave to appeal to S.C.C. ref'd (1996) (S.C.C.), a conspiracy pleading was struck out for failure to plead the constituent element of damages.

108 With this review of the law about conspiracy and about pleading a claim of conspiracy, I come now to consider the conspiracy pleading in the case at bar. The Plaintiffs' pleading of conspiracy is set out in paragraphs 74 to 82 of the Amended Amended Statement of Claim and their claim to damages is set out in paragraphs 83 to 85.

109 In paragraphs 74 to 82, the Plaintiffs plead that Medtronic conspired to mislead and mis-inform patients, physicians, and regulators and to conceal from them the defects in the Leads. The Plaintiffs plead the following unlawful conduct: (1) concealing the defects in the Leads from patients, physicians, and regulators; (2) failing to recall the Leads; (3) failing to take steps to cure the defects in the Leads; (4) failing to warn patients, physicians, and regulators that the Leads were defective; (5) breaching the Canadian *Food and Drugs Act* and the *Medical Devices Regulations* (6) breach of the and (7) breaching U.S. legislation and regulations, including the *Food, Drug and Cosmetic Act* and related medical device reporting regulation.

110 I am satisfied from my review of these paragraphs that apart from some want of particularity in a few instances, the Plaintiffs have adequately pleaded an agreement to conspire and the objects of the conspiracy and unlawful acts in furtherance of the conspiracy. However, in my opinion, the Plaintiffs have not identified the special damage caused by the conspiracy.

111 For example, the special damage suffered by Implant Class Members from the alleged breaches of the Canadian and American legislation is not identified. The Plaintiffs' description of their damages treats the damages for negligence and for the conspiracy as if they were one and the same thing. As mentioned above, special damages are a necessary ingredient of a conspiracy plea and must be expressly pleaded. Breaching the U.S. legislation may be wrongful conduct, but what special damage this caused to the Plaintiffs is not identified.

112 It is important to point out that the deficiency in the Plaintiffs' pleading is not a matter arising from the doctrine of merger, where the tort of conspiracy might merge into a judgment for the tort of negligence. It is possible to have a conspiracy that will not merge because it is based on a wrong that is not a tort. Thus, the problem here is with the pleading of conspiracy as such, because the Plaintiffs do not plead what special damages they suffered as a result of the alleged conspiracy, which may or may not be the same as the damages suffered from other torts. The scope of the wrongful acts of the alleged conspiracy would not appear to be commensurate with the scope of the alleged negligence and it remains necessary to plead the constituent elements of both torts.

113 As Justice Wilson noted in *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), if the Plaintiffs are unsuccessful with respect to their nominate tort claims, then the trial judge can consider whether they might still succeed in conspiracy, which observation makes the point that it becomes important to determine whether the conspiracy itself caused any special damages.

114 It is also important to note that the question of whether Medtronic ought to have known that by concealing information from Health Canada and by violating the *Medical Devices Regulations* it would likely cause injury to the Class Members is proposed as a common issue for the conspiracy claim. Again, it becomes important to identify the special damages alleged to have been caused by this conspiracy.

115 Further, it is also important to identify the special damages from the conspiracy because the scope of the tort of conspiracy is not settled and the court may be confronted with the situation of having to determine whether it extends to provide redress for the injuries suffered by the Plaintiffs. The scope of the tort of conspiracy was left undecided in the cases, discussed above, about the adequacy of the plaintiff's pleading of conspiracy. In *Canada Cement Lafarge Ltd. v. British Columbia Lightweight Aggregate Ltd.*, [1983] 1 S.C.R. 452 (S.C.C.), Justice Estey stated at p.473:

In fact, the action [for conspiracy] may have lost much of its usefulness in our commercial world, and survives in our law as an anomaly. Whether that be so or not, it is now too late in the day to uproot the tort of conspiracy to injure from the common law. No doubt the reaction of the courts in the future will be to restrict its application for the very reasons that some now advocate its demise.

In *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), Justice Wilson stated at para. 48:

In my view, it would be highly inappropriate for this Court to deny a litigant who is capable of fitting his allegations into Estey J.'s two-pronged summary of the law on civil conspiracy the opportunity to persuade a court that the facts are as alleged and that the tort of conspiracy should be held to apply on these facts. While courts should pause before extending the tort beyond its existing confines, careful consideration might conceivably lead to the conclusion that the tort has a useful role to play in new contexts.

116 Finally, it is important to plead the special damages because once they are made visible, it may appear that the court will not be asked to extend the tort of conspiracy to new contexts. A clear pleading will notify the defendant of the claim it must meet, and a clear pleading may encourage the parties to settle their dispute.

117 My reading of *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) and (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.) and *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.), which are medical devices cases where claims for conspiracy were certified is that the above points were not brought home and I would, if necessary, distinguish those cases on this basis, but, in any event,

I am bound by the higher authorities that hold that damages caused by the conspiracy is a fundamental element of the tort of civil conspiracy and that the Plaintiff must plead his or her special damages.

118 In the context of a class proceeding, the Representative Plaintiffs should plead the categories of special damages that they have individually suffered and they should plead the heads or categories of special damages that may be provable by class members. The particulars and the quantification of each class member is a matter for the individual issues trial and it is *not* necessary for the Representative Plaintiffs to plead beyond the bare material facts of a constituent element of the tort of civil conspiracy. If they are not up to this task, then the defendants should not be put up to the task of defending a conspiracy claim that wants for a constituent element.

119 Since it is not beyond doubt that the Plaintiffs will not be able to perfect their pleading in conspiracy, I have concluded that the proper course is to adjourn the request to certify the conspiracy claim *sine die* to be brought on again by either party and the plaintiffs shall have 20 days from the Release of these Reasons for Decision to amend their statement of claim to plead a claim in conspiracy, failing which the claim for conspiracy should be struck out.

120 If the Plaintiffs decide to amend their pleading, they should also consider providing particulars of some of their allegations. For example, in paragraph 77 (b) the Plaintiffs plead that "In furtherance of the conspiracy ... Defendants directed their servants, agents and employees to perform wrongful or unlawful acts in furtherance of the conspiracy." The Defendants need to know what were the wrongful or unlawful acts in order to respond to this paragraph.

### **Identifiable Class**

121 I turn now to the matter of the class definition. The definition of an identifiable class serves three purposes: (1) it identifies the persons who have a potential claim against the defendant; (2) it defines the parameters of the lawsuit so as to identify those persons bound by the result of the action; (3) it describes who is entitled to notice: *Bywater v. Toronto Transit Commission*, [1998] O.J. No. 4913 (Ont. Gen. Div.).

122 The class must be defined without elements that require a determination of the merits of the claim: *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.) at para. 19, rev'd (2005), 78 O.R. (3d) 39, which aff'd (2004), 71 O.R. (3d) 741, leave to appeal to S.C.C. ref'd, (S.C.C.); *Ragoonian Estate v. Imperial Tobacco Canada Ltd.* (2005), 78 O.R. (3d) 98 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.).

123 Class membership identification is not commensurate with the elements of the cause of action; there simply must be a rational connection between the class member and the common issue(s): *Sauer v. Canada (Minister of Agriculture)*, [2008] O.J. No. 3419 (Ont. S.C.J.) at para. 32, leave to appeal to Div. Ct. refused, (Ont. Div. Ct.).

124 There must be a rational relationship between the class, the causes of action, and the common issues, and the class must not be unnecessarily broad or over-inclusive: *Pearson v. Inco Ltd.* (2005), 78 O.R. (3d) 641 (Ont. C.A.) at para. 57, rev'd (Ont. Div. Ct.), which had aff'd (Ont. S.C.J.).

125 A proposed class is not overbroad because it may include persons who ultimately will not have a claim against the defendants: *Bywater v. Toronto Transit Commission*, [1998] O.J. No. 4913 (Ont. Gen. Div.) at para. 10; *Boulanger v. Johnson & Johnson Corp.*, [2007] O.J. No. 179 (Ont. S.C.J.) at para. 22, leave to appeal ref'd (Ont. Div. Ct.); *Ragoonian Estate v. Imperial Tobacco Canada Ltd.* (2005), 78 O.R. (3d) 98 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.).

126 As already noted in the introduction to these Reasons for Decision, the Plaintiffs' proposed main class consists of all persons implanted in Canada with one of the following Spring Fidelis Leads: 6949, 6948, 6931 and 6930. The Plaintiffs also propose a class of Family Law Claimants, which comprises all family members who are entitled to assert a claim pursuant to the *Family Law Act*, *Family Law Act*, R.S.O. 1990, c.F.3 and related provincial and territorial legislation. (As discussed above, I have granted leave to add a class for provincial health insurers.)

127 The *Medical Device Regulations* require manufacturers, importers and distributors of medical devices to maintain records with respect to patients who are implanted with a device: *Medical Devices Regulations*, ss. 52-56, 66-68. Thus, Medtronic has records to determine the exact number and identity of individuals who were implanted with Leads in Canada.

128 Medtronic submits that the main class definition is overbroad and that it contains inherent conflicts of interest amongst class members.

129 Medtronic's argument against the proposed class definition is set out in detail in paragraph 74 of its factum, which states:

74. A class definition which includes "all persons implanted in Canada with one or more of the Leads" is fundamentally flawed for the following reasons:

(a) The proposed class definition is overly broad.

(i) As indicated above, only a small fraction of individuals with the Leads may experience any damage or may have a claim under the Amended Claim. .... As a vast majority of class members will continue to receive the benefit of the Leads, the proposed class definitions include a large number of individuals who will never have a claim and will never share an interest in the resolution of the proposed common issues.

(ii) To the extent the Plaintiffs propose that persons whose Leads are functioning properly and who have suffered no injury should be included as part of the class on the basis that such persons may have suffered "stress and anxiety" there is no basis in fact provided to support that such alleged stress and anxiety reaches the requisite standard set by the Supreme Court of Canada in *Mustapha v. Culligan of Canada Ltd.*, [2008] 2 S.C.R. 114 so as to form the basis of a claim for damages. ....

(iii) Any suggestion by the Plaintiffs that the proposed class definition should include all persons who received the Leads regardless of whether they have suffered damages to address the possibility that such persons could subsequently develop a claim for damages does not warrant certifying an overly-broad class.

(iv) At a minimum, the class definition should be "claim-based" and limited to those individuals who claim personal injuries or an entitlement to disgorgement as a result of having the Leads as opposed to including all persons with the Leads. There is considerable support in the case law for claims-based class definitions. .... *Wheadon v. Bayer Inc.*, [2004] N.J. No. 147 (S.C.), leave to appeal denied, [2005] N.J. No. 124 (S.C.) and *Walls v. Bayer Inc. Walls v. Bayer Inc.*, [2005] M.J. No. 4 (Q.B.), leave to appeal denied, [2005] M.J. No. 286 (C.A.), .... See also *Attis v. Canada*, [2007] O.J. No. 1744 (S.C.J.) at paras. 54-59 in which Justice Winkler (as he then was) commented that the use of "claims made" limiters is acceptable. .... *Merck Frosst Canada Ltd. v. Wuttunee*, [2009] S.J. No. 179 (C.A.) at para. 102.

(b) The proposed class definition when viewed in connection with the common issues intended to be resolved in the proposed class proceeding, creates an untenable conflict amongst members of the class.

(i) There is a clear conflict between members of the proposed class who allege they have sustained personal injury as a result of the Leads and those who have sustained no personal injury. .... Any decision by the class to pursue disgorgement on the basis of waiver of tort as opposed to damages stands to adversely impact the interests of any injured class members who could perceive it to be in their interests to pursue individual damages for their personal injuries. ....

(ii) Similarly, if the implant class of Lead recipients proceeds by waiver of tort, they may also be in a position of conflict with Family Law class members and other affected persons including the provincial health insurers, who are only entitled to statutory remedies for damages and who under their statutory causes of action have no statutory ability to relinquish those remedies in lieu of an accounting or disgorgement. ....

130 A critical element of Medtronic's argument is that although all class members have now been alerted to the possibility of Lead fractures, only a percentage of the class members have actually experienced fractures and any physical injury from the operation of the Leads. Put somewhat differently, Medtronic submits that only a small percentage of the class members *now* have claims and many of the class will never experience any problem with their defibrillator. Therefore, to include as class members persons with inchoate claims is to define the class over-broadly.

131 Relying on the Supreme Court of Canada decision in *Mustapha v. Culligan of Canada Ltd.*, [2008] 2 S.C.R. 114 (S.C.C.), Medtronic also argues that the Plaintiffs have failed to show a basis in fact for emotional distress claims existing for all persons within the proposed definition of the class.

132 Medtronic's ultimate submission is that the class definition criteria has not been satisfied or alternatively that the definition should be amended with a claims-based qualifier.

133 My opinion, however, is that the proposed class definitions satisfy the requirements of the Act. I begin my explanation for my conclusion with several general observations about the dynamics of class proceedings that help explain the role of the class definition.

134 By way of an observation, on a contested certification motion, it is not uncommon for defendants, as they do in the case at bar, to submit that the class definition is overbroad and to seek to have it narrowed. However, if the class proceeding moves to a motion to approve a settlement, it is also not uncommon for both parties to seek to expand the previously disputed class definition.

135 For the present purposes of analyzing the appropriateness of the class definitions, it is informative to question why these phenomena occur, and the answer is that one of the most significant aspects of a class definition is that it identifies and hence quantifies the numbers of persons who will be bound by the court's determination of the common issue or be bound by the court's approval of a settlement. The above phenomena occur because there is power in increasing or decreasing the number of persons who are bound by the class proceedings.

136 Increasing or decreasing the number of persons who will be bound by the determinations in a class proceeding has a powerful effect. The Representative Plaintiffs may have little choice about how to define the class, but when there are choices, it is not surprising that Representative Plaintiffs will submit a broad definition that increases the defendant's exposure to liability, and it is not surprising that a defendant would seek to reduce the number of persons to whom it may be liable. Further, it is not surprising that if the action settles that the defendant seeks to increase the number of persons who will be bound by releases in exchange for their receiving a share of the distribution of the settlement proceeds.

137 The Court's concern in all this, however, is to ensure that the class definition accords with the design and purposes of the *Class Proceedings Act, 1992*. The court's concern about a class definition is that it binds the persons who ought to be bound (a concern about under-inclusiveness) and that it does not bind persons who ought not to be bound (a concern about over-inclusiveness). Viewed from the court's perspective, an over-inclusive class definition will bind persons who ought not to be bound by judgment or by settlement, be that judgment or settlement favourable or unfavourable. It is to be remembered that until individual trials, if necessary, class members are not direct participants in the action, but they will be bound by the common issues trial and the settlement if approved by the court. The court is concerned about a proper class definition both as a matter of procedural and substantive justice.

138 Turning now to the case at bar, I add the particular observation that if, as may be anticipated, Medtronic takes the position that it did not breach any duty of care or conspire to injure the class members then, as a matter of access to justice, judicial economy, and behaviour modifications, all of the persons who have defibrillators with Sprint Fidelis Leads *ought to be* bound by the adjudication or settlement of this case and this is true regardless of whether the outcome favours the Plaintiffs or Medtronic.

139 All of the proposed class members have defibrillators that are the subject matter of a product recall with respect to a life-saving medical device and in my view in the circumstances of this case, there is a basis in fact for the proposed class definitions.

140 Whether or not Implant Class Members meet the threshold of *Mustapha v. Culligan of Canada Ltd.*, [2008] 2 S.C.R. 114 (S.C.C.) is a matter for trial. It is open to Medtronic to deny liability and to deny that the criteria for an emotional distress claim by those who have not yet experienced any Lead malfunction, but as a matter of access to justice, judicial economy, and behaviour modifications, all persons with defibrillators with Sprint Fidelis Leads ought to have the opportunity to prove their claims to the extent that they are able and desirous of doing so.

141 During oral argument, Medtronic indicated that if the action was certified, it envisioned that all persons who had been implanted with the Leads would be given notice of the class action including notice of the claims-based qualifier in the class definition. For me, this expectation exposed the inutility and paradox of a claims-based qualifier. If all the class members who have been implanted with the Leads are to be given notice, then they ought not to receive a notice that they are not a class member unless they have a claim. Such a notice would be akin to Bertrand Russell's paradox of set theory of answering the question of who shaves the barber in a town where the law was that those who don't shave themselves are shaved by the barber.

142 The simple point is that all persons implanted with allegedly defective Leads ought to be bound by the outcome of the class action unless they exercise their right to opt-out.

143 I turn now to Medtronic's objection to the class definition based on their being alleged conflicts of interest: (a) between Class Members in whose interest it would be to recover damages and Class Members in whose interest it would be to recover a share of the disgorgement of Medtronic's profits pursuant to a waiver of the tort compensation; (b) between Class Members electing disgorgement and members of the Family Law Class; and (c) between Class Members electing disgorgement and provincial health insurers.

144 The substance of the alleged conflict of interest is the prospect that if the class recovers a disgorgement of Medtronic's profits as its remedy for Medtronic's wrongdoing, then some members of the class, including especially class members with derivative or statutory claims, will not be entitled to a share of the disgorgement or their share of the disgorgement will be less than if the remedy was compensatory damages.

145 At this juncture of the class proceeding, there is no operative conflict of interest and the alleged conflicts of interest are entirely speculative. At this time, it is unknown whether the waiver of tort choice of disgorgement even will be available. At this juncture, assuming that the waiver of tort choice would be available, the effect of that choice is unknown. It is at least conceivable that all class members may be advantaged and or at least not disadvantaged by the availability of disgorgement as an alternative to the traditional compensatory remedies for wrongdoing.

146 The alleged (and speculative) conflicts of interest do not change my opinion that the proposed class definitions in the case at bar are satisfactory.

## Common Issues

147 I turn now to the matter of the common issues criterion.

148 For an issue to be a common issue, it must be a substantial ingredient of each class member's claim and its resolution must be necessary to the resolution of each class member's claim: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 18.

149 The focus of the analysis of whether there is a common issue is not on how many individual issues there might be but whether there are issues the resolution of which would be necessary to resolve each class member's claim and which could be said to be a substantial ingredient of those claims: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 55, leave to appeal to the S.C.C. ref'd, (S.C.C.) rev'g, (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.).

150 The underlying question of a common issue is whether the resolution of the common issue will avoid duplication of fact-finding or legal analysis: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 39.

151 For an issue to be common, it is not essential that the class members be identically situated vis-à-vis the opposing party or benefit from the successful prosecution of the action to the same extent: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at paras. 39-40.

152 The comparative extent of individual issues is not a consideration in the commonality inquiry, although it is a factor in the preferability assessment: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 65, leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'g, (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.); *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.) at para. 33.

153 After several adjustments made during the course of the argument, the Plaintiffs propose the following common issues:

#### **Negligence**

- (i) Did the Defendants, or either of them, owe a duty of care to the Class in respect of the design, development, testing, manufacturing, licensing, assembling, distribution and sale of the Leads?
- (ii) If so, did the Defendants, or either of them, breach such duty? If so, what was the nature of the breach?
- (iii) Did the Defendants, or either of them, owe a duty to the Class to warn of the risk of fracture associated with the Leads, and if so, when did such duty arise?
- (iv) If so, did the Defendants, or either of them, fail to warn the Class of the existence of the risk of fracture associated with the Leads?

#### **Conspiracy**

- (v) Did Medtronic, Inc. and Medtronic of Canada Ltd., act in combination to conceal information from Health Canada relating to the risk of fracture associated with the Leads?
- (vi) Did the Defendants' conduct violate the *Medical Devices Regulations* promulgated pursuant to the *Food and Drugs Act*?
- (vii) Should the Defendants have known that, in the circumstances, injury to the Class was likely to occur as a result of the Defendants' actions described in subparagraphs (v) and (vi) above?

#### **Waiver of Tort**

- (viii) Does the law permit the Class in whole or in part to elect disgorgement of Medtronic's gains instead of damages for negligence or conspiracy?
- (ix) If part, but not all, of the Class can so elect, which part or parts of the Class can so elect?
- (x) Is the consent of the Ontario Health Insurance Plan ("OHIP") or any other provincial health insurer required to any such an election?
- (xi) If an election of elections may be made, what is the amount and how is it to be allocated?
- (xii) If an election or elections may be made, what share, if any is the OHIP or other provincial health insurer's entitlement?
- (xiii) If an election or election may be made, (a) is the consent of the Family Law Class required and (b) if made, are the Family Law Class Members, precluded from recovery?

#### **Miscellaneous**

(xiv) Should one or both of the Defendants pay punitive damages to the Class?

(xv) Should one or both of the Defendants pay the costs of administering and distributing any recovery? If so, in what amount?

(xvi) Should one or both of the Defendants be ordered to pay prejudgment interest? If so, who should pay, and at what annual rate? Should the payment be simple or compound interest? How is the prejudgment interest to be calculated?

154 In light of my decision about the pleading of the conspiracy claim, I am adjourning the consideration of the conspiracy questions.

155 With respect to the remaining proposed common issues, subject to one exclusion - the punitive damages question - I am satisfied that the claims of the class members raise common issues of fact or law and satisfy the third part of the test for certification.

156 In their factum, much of Medtronic's argument about the common issues is that they would not be dispositive of Medtronic's culpability for negligence or conspiracy and that a multitude of individual issues would arise in order to determine causation and the quantum of damages. Medtronic sets out at some length the reasons why causation and the experience of injury and damages are individual and idiosyncratic issues. Medtronic argues that "Any theoretical common issues relating to negligence or conspiracy would be overwhelmed by the necessity to resolve these individual issues for each individual with an alleged claim, before any finding of liability could be made."

157 Although, it is true that causation and damages are individual issues and with these issues outstanding, the determination of the common issues associated with negligence will not determine Medtronic's liability, nevertheless, the determination of the common issues would substantially advance the proceedings and avoid duplication of fact finding and legal analysis, and it should be noted that several common issues, if they went Medtronic's way, would exonerate them from liability and end the litigation.

158 Most of Medtronic's arguments about the intensity, subjectivity, and diversity of the individual issues are pertinent to the issue of whether a class proceeding is the preferable procedure, but they do not stand against my conclusion that the resolution of these questions would serve the purposes of the *Class Proceedings Act, 1992*.

159 Medtronic's argument against the waiver of tort questions is somewhat different, and it submits that the waiver of tort questions lack commonality because the class members are differently situated with respect to the potential bases of Medtronic's liability, of which there are numerous combinations; visualize Medtronic might be liable for some combination of: (1) products liability; (2) failure to warn; and (3) conspiracy. There are also differences because of the different legal status of class members, with members of the Implant Class having direct claims against Medtronic and members of the Family Law Class and the Health Insurer Class having derivative or statutory claims.

160 In my opinion, notwithstanding this argument that there is no real commonality, the waiver of tort questions remain common questions, because whatever the combination of wrongdoing (with the exception of the combination that yields no liability), the issue will be whether or not the victim of the wrongdoing can elect disgorgement instead of the remedy provided by the common-law or statute. If wrongdoing is proven, then the availability of disgorgement is a common issue of law for all the victims of the wrongdoing.

161 In *Peter v. Medtronic Inc.*, *supra*, Justice Hoy stated at para. 59, "In my view, it is not plain and obvious that the plaintiffs' claim in waiver of tort cannot succeed because subrogated claims are advanced." See also *LeFrancois v. Guidant Corp.*, *supra*, at paras. 59-60. The claims for damages asserted by the Family Class include claims under the *Family Law Act* for loss of guidance, care and companionship. Any argument that these claims conflict with the Plaintiffs' ability to elect waiver of tort should be determined on a full evidentiary record as part of the common issues trial. This approach was confirmed in: *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); *LeFrancois v. Guidant Corp.*, [2008]

O.J. No. 1397 (Ont. S.C.J.) and (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.) and *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.).

162 The amount to be disgorged if waiver of tort is available has been certified as a common issue in a number of Ontario class proceedings. See: *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) and (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.) and *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.); *Serhan Estate v. Johnson & Johnson* (2004), 72 O.R. (3d) 296 (Ont. S.C.J.), leave to appeal granted (Ont. Div. Ct.), aff'd (2006), 85 O.R. (3d) 665, leave to appeal to C.A. ref'd Oct. 16, 2006, leave to appeal to S.C.C. ref'd, (2007) (S.C.C.); *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (Ont. S.C.J.), aff'd (Ont. Div. Ct.); and *Griffin v. Dell Canada Inc.*, [2009] O.J. No. 418 (Ont. S.C.J.). However, as I will indicate, the questions associated with the quantification of the disgorgement should be bifurcated from the other common issue.

163 For these reasons, I conclude that the Plaintiffs have shown common issues with respect to negligence and waiver of tort. The miscellaneous questions are also satisfactory with the exception of the question about punitive damages, which I discuss below.

### **The Common Issue Question about Punitive Damages**

164 Proposed Common Question (xiv) is: Should one or both of the Defendants pay punitive damages to the Class?

165 The question of whether a defendant's conduct justifies an award of punitive damages has been accepted as a common issue in other class actions, including the following cases relied on by the Plaintiffs: *Boulanger v. Johnson & Johnson Corp.*, [2007] O.J. No. 179 (Ont. S.C.J.) at para. 22, leave to appeal ref'd (Ont. Div. Ct.); *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.), leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'd (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.); *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (Ont. S.C.J.), aff'd (Ont. Div. Ct.); *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd [ (Ont. Div. Ct.); *Andersen v. St. Jude Medical Inc.*, [2003] O.J. No. 3556 (Ont. S.C.J.) at para. 81, leave to appeal ref'd (Ont. Div. Ct.); and *Serhan Estate v. Johnson & Johnson* (2004), 72 O.R. (3d) 296 (Ont. S.C.J.), leave to appeal granted (Ont. Div. Ct.), aff'd (2006), 85 O.R. (3d) 665, leave to appeal to C.A. ref'd Oct. 16, 2006, leave to appeal to S.C.C. ref'd, (2007) (S.C.C.).

166 Given this impressive list of cases, it would seem that the defendant's liability to pay punitive damages is inevitably a suitable common issue. However, as I will explain, that view is incorrect, and the correct position is that punitive damages only sometimes have the commonality necessary for a common issue.

167 In explaining my reasons for this opinion, I repeat at the outset that the entitlement to and the quantification of punitive damages may be a common issue in some cases. However, it is my opinion that the case at bar is not one of those cases because in the case at bar the entitlement and quantification of punitive damages requires a quantification of the compensatory damages and an appreciation of the extent of the harm caused by the defendant's misconduct, if proven. Therefore, in the case at bar, the pre-conditions to determining liability for punitive damages will not be satisfied until after individual assessments of causation and damages.

168 Justice Binnie examined the liability for and the quantification of punitive damages in the leading case of *Whiten v. Pilot Insurance Co.*, [2002] 1 S.C.R. 595 (S.C.C.). In this case, the Supreme Court of Canada restored a punitive damages award of \$1 million made by a jury in an action against an insurer who had breached its duty of good faith and fair dealing to its insured.

169 Justice Binnie's judgment is a *tour de force* analysis of the law of punitive damages, but for present purposes, the points I wish to make can be extracted in his advice about how to charge a jury about punitive damages. This advice is found in para. 94 of his judgment, where Justice Binnie stated (with my emphasis added):

[I]t would be helpful if the trial judge's charge to the jury included words to convey an understanding of the following points, even at the risk of some repetition for emphasis. (1) Punitive damages are very much the exception rather than the rule, (2) imposed only if there has been high-handed, malicious, arbitrary or highly reprehensible misconduct that departs

to a marked degree from ordinary standards of decent behaviour. (3) Where they are awarded, punitive damages should be assessed in an amount reasonably proportionate to such factors as the harm caused, the degree of the misconduct, the relative vulnerability of the plaintiff and any advantage or profit gained by the defendant, (4) having regard to any other fines or penalties suffered by the defendant for the misconduct in question. (5) Punitive damages are generally given only where the misconduct would otherwise be unpunished or where other penalties are or are likely to be inadequate to achieve the objectives of retribution, deterrence and denunciation. (6) Their purpose is not to compensate the plaintiff, but (7) to give a defendant his or her just desert (retribution), to deter the defendant and others from similar misconduct in the future (deterrence), and to mark the community's collective condemnation (denunciation) of what has happened. (8) Punitive damages are awarded only where compensatory damages, which to some extent are punitive, are insufficient to accomplish these objectives, and (9) they are given in an amount that is no greater than necessary to rationally accomplish their purpose. (10) While normally the state would be the recipient of any fine or penalty for misconduct, the plaintiff will keep punitive damages as a "windfall" in addition to compensatory damages. (11) Judges and juries in our system have usually found that moderate awards of punitive damages, which inevitably carry a stigma in the broader community, are generally sufficient.

170 It follows from Justice Binnie's remarks that an assessment of punitive damages requires an appreciation of: (a) the degree of misconduct; (b) the amount of harm caused; (c) the availability of other remedies; (d) the quantification of compensatory damages; and (e) the adequacy of compensatory damages to achieve the objectives of retribution, deterrence, and denunciation. These factors must be known to ensure that punitive damages are rational and to ensure that the amount of punitive damages is not greater than necessary to accomplish their purposes.

171 In order to rationally determine whether punitive damages should be awarded and to determine the quantum of them, the court needs to know the quantum of compensation that will be awarded. Earlier in his judgment, at para. 74, Justice Binnie stated: "[T]he governing rule for quantum is proportionality. The overall award, that is to say compensatory damages plus punitive damages plus any other punishment related to the same misconduct, should be rationally related to the objectives for which the punitive damages are awarded (retribution, deterrence and denunciation)." Later in his judgment, at para. 100, he stated: "The rationality test applies both to the question of whether an award of punitive damages should be made at all, as well as to the question of quantum."

172 In the case at bar, the common issues associated with negligence and with conspiracy (assuming that the conspiracy questions eventually are certified) will *not* be dispositive of Medtronic's liability because proof of causation and proof of damages will depend on individual trials that will follow the common issues trial. Whether Medtronic caused any harm and the amount of it will not be known until the individual issues are determined.

173 I appreciate that if the court determines at the common issues trial that Medtronic breached its duty of care or committed wrongful acts that the Plaintiffs would be well on their way to proving the torts of negligence and conspiracy; however, some of the Class Members might not succeed in proving that the negligence or conspiratorial conduct caused them injury.

174 Turning to the case law, in *Chace v. Crane Canada Inc.*, [1997] B.C.J. No. 2862 (B.C. C.A.), the British Columbia Court of Appeal upheld the certification as common issues the questions of whether the defendant, who allegedly negligently manufactured toilet tanks, should be liable for punitive damages and, if so, what amount of punitive damages should be awarded. In *Chace*, the court accepted that the amount of punitive damages could not be assessed until compensatory damages were determined, but noted at para. 27 that the trial judge would have the "entire picture before him" and would be in a position to determine whether punitive damages are warranted. *Chace* is thus distinguishable from the case at bar where the whole picture will not be before the judge at the common issues trial.

175 In *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.), the Supreme Court of Canada upheld as a common issue whether the defendant should be liable for punitive damages. In this case, the plaintiff sued the province for systemic negligence in its failure to have in place procedures that would have prevented abuse at a residential school for deaf children. On the common issue of punitive damages, Chief Justice McLachlin stated at para. 34:

As noted above, Mackenzie J.A. certified as common not only the standard-of-care issue but also the punitive damages issues. Here, too, I agree with his reasoning. In this case resolving the primary common issue — whether JHS breached a duty of care or fiduciary duty to the complainants — will require the court to assess the knowledge and conduct of those in charge of JHS over a long period of time. .... Clearly, the appropriateness and amount of punitive damages will not always be amenable to determination as a common issue. Here, however, the respondents have limited the possible grounds of liability to systemic negligence — that is, negligence not specific to any one victim but rather to the class of victims as a group. In my view the appropriateness and amount of punitive damages is, in this case, a question amenable to resolution as a common issue: see *Chace, supra*, at para. 30 (certifying punitive damages as a common issue on the grounds that the plaintiffs' negligence claim was "advance[d] ... as a general proposition" rather than by reference to conduct specific to any one plaintiff).

176 As may be noted from the Chief Justice's comments, both *Rumley* and Chace are different from the case at bar, where it will be necessary to determine causation and damages of individual class members in order to determine punitive damages.

177 The pattern that for the court to certify punitive damages as a common issue, the court must have a means to determine the compensatory damages holds for *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.), leave to appeal to the S.C.C. ref'd, (S.C.C.), rev'g (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.), which, like *Rumley*, was a case of systemic negligence at a residential school. The Court of Appeal upheld Justice Cullity's judgment certifying the action as a class proceeding. On the issue of punitive damages, in the Court of Appeal, Justice Goudge stated at para. 70 of his judgment (with emphasis added):

I also agree with Cullity J. that in a trial of these common issues the claims for an aggregate assessment of damages and punitive damages are properly included as common issues. The trial judge should be able to make an aggregate assessment of the damages suffered by all class members due to the breaches found, if this can reasonably be done without proof of loss by each individual member. Indeed, this is consistent with s. 24 of the CPA. As well, given that the common trial will be about the way the respondents ran the School and their alleged purpose in doing so, it can also properly assess whether this conduct towards the members of the three classes as a whole should be sanctioned by means of punitive damages.

178 In *Boulanger v. Johnson & Johnson Corp.*, [2007] O.J. No. 179 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.), Justice Macdonald certified punitive damages as a common issue. On this issue, she stated at para. 48 of her judgment:

The defendants assert that it would be unfair to determine the entitlement to and quantum of punitive damages at a common issues trial before compensatory damages have been assessed, since punitive damages require a finding of compensatory damages. It is the defendants' position that if punitive damages are to be certified as a common issue, it should be certified for a second common issues trial that would follow the individual issues trial. The representative plaintiff concedes that it may be appropriate to assess the quantum of punitive damages following an assessment of compensatory damages, but that a *prima facie* entitlement to punitive damages can be certified as a common issue for the first common issues trial. I accept the submission of the representative plaintiff in this regard, though I emphasize that I make no finding on the merits of the claim for punitive damages.

179 As appears, in *Boulanger*, the representative plaintiff conceded that the quantification of punitive damages should follow the assessment of compensatory damages, a point with which I agree, but successfully argued that the issue of the entitlement to punitive damages could be severed and certified as a common issue, which for the reasons set out above is a point with which I disagree, because it is contrary to the leading case of *Whiten v. Pilot Insurance Co.*, [2002] 1 S.C.R. 595 (S.C.C.), which does not appear to have been argued in *Boulanger*.

180 *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (Ont. S.C.J.), aff'd (Ont. Div. Ct.) is another case where punitive damages was certified as a common issue, and *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.) adopts the *Heward* judgment on this point.

181 In *Heward*, the action was against a drug manufacturer for the failure to disclose serious side effects from the drug. A claim for punitive damages was certified as a common issue. In certifying the claim, Justice Cullity stated at para. 98 of his judgment:

I believe that reasoning is equally applicable to the claims, and the facts pleaded, in this case and that common issue #7 should be included in any order certifying the proceedings. I note, also, that in *Rumley*, the Chief Justice contemplated the possibility that the quantum of - as well as the liability to pay - punitive damages might properly be determined at the trial of common issues. The possibility that, because of the requirement that compensatory damages have been found to be inadequate, the inquiry might be bifurcated between a preliminary consideration by the trial judge of the defendants' conduct and a subsequent final determination of the liability for, and the quantum of, punitive damages after the individual issues had been decided was accepted by the British Columbia Court of Appeal in *Fakhri v. Alfalfas Construction Inc.*, [2004] B.C.J. No. 2200.

182 As I read this passage, although Justice Cullity accepts that liability for punitive damages may be determined at a common issues trial, he recognizes that the quantification of punitive damages would not be possible until the individual issues had been decided. Based on my reading of *Whiten v. Pilot Insurance Co.*, [2002] 1 S.C.R. 595 (S.C.C.), my opinion is that the determinations of liability and quantum cannot be severed and both should occur after the compensatory damages are ascertained.

183 In *Andersen v. St. Jude Medical Inc.*, [2003] O.J. No. 3556 (Ont. S.C.J.) at para. 81, leave to appeal ref'd (Ont. Div. Ct.), Justice Cullity certified liability for punitive damages as a common issue. This negligence action was against a manufacturer of mechanical heart valves. Although causation and damages for individual class members would require individual trials, Justice Cullity noted at para. 56 of his judgment that "if the common issues relating to causation are answered in accordance with the plaintiff's submissions, there would be immediate damage to all members of the class." On the certification of the punitive damages question, Justice Cullity stated:

I accept the submission of plaintiff's counsel that the issue relating to punitive damages can properly be included as a common issue as had been done in several previous cases. The issue depends exclusively on the conduct of the defendants and the answers given to the other common issues, and it should not be affected by individual issues - including the assessment of general or special damages - for each class member.

184 *Andersen v. St. Jude Medical Inc.* may be distinguishable from the case at bar because the common issues judge would determine causation and compensatory damages for the whole class and thus would have a basis to determine punitive damages for the whole class. If the case is not distinguishable on this basis, I would not follow it, because it would be inconsistent with the directives from *Whiten v. Pilot Insurance Co.*, [2002] 1 S.C.R. 595 (S.C.C.) as to how both liability and quantum of punitive damages should be determined.

185 In *Serhan Estate v. Johnson & Johnson* (2004), 72 O.R. (3d) 296 (Ont. S.C.J.), leave to appeal granted (Ont. Div. Ct.), aff'd (2006), 85 O.R. (3d) 665, leave to appeal to C.A. ref'd Oct. 16, 2006, leave to appeal to S.C.C. ref'd, (2007) (S.C.C.), Justice Cullity certified punitive damages as a common issue in the context of a case in which the plaintiffs had no claim for compensatory damages but were relying on waiver of tort to obtain a disgorgement of the defendants' profits from the sale of a defective medical device designed to monitor blood glucose levels. Four questions were certified as common issues, and all of the questions were premised on the availability of the remedy of a constructive trust or the remedy of an accounting and disgorgement of profits. The common questions were designed to quantify the disgorgement.

186 Justice Cullity's judgment was appealed to the Divisional Court. Justice Epstein (Justice Jennings concurring, Justice Chapnik dissenting) wrote the majority judgment, and she discussed the claim for punitive damages in paragraphs 126-127, 129-130, which I will set out below. However, before I do, it should be noted that Justice Epstein's ultimate decision in para. 130 was that punitive damages could be certified as a common issue because the defendant's possible liability was not specific to any one victim but was rather to the class of victims as a group. Justice Epstein stated:

126. [The defendants] raise the issue of the identification of punitive damages as a common issue. Mr. Barrack essentially argues that the issue of punitive damages is premature and for this reason should not have been certified as a common issue. He says that punitive damages may only be awarded where they serve a rational purpose and

represent a proportionate response to the defendants' behaviour and the harm caused. They therefore can only be determined after a court has decided whether a tort has been committed and whether the objectives of punishment and deterrence have been accomplished. The defendants contend that the effect of the decision is to avoid the requirements for awarding punitive damages since it would determine the issue without reference to the underlying liability and damages.

127. The claim for punitive damages is based on allegations that include the defendants' conduct in the development and marketing of the System, the delayed recall, and disregard of and indifference toward the plaintiffs' rights and safety — conduct that the plaintiffs assert was economically motivated.

129. Common issues relating to punitive damages have been accepted in a number of cases including *Rumley v. British Columbia*, [2001] 3 S.C.R. 184, [2001] S.C.J. No. 39, *Cloud, supra*, *Carom v. Bre-X Minerals Ltd., supra*, and *Chace v. Crane Canada Inc.*, [1996] B.C.J. No. 1606, 26 B.C.L.R. (3d) 339 (S.C.), affd [1997] B.C.J. No. 2862, 44 B.C.L.R. (3d) 264 (C.A.). One author speaks approvingly of these cases, noting that an award of punitive damages to the class as a whole furthers the objective of behaviour modification without giving a punitive damages windfall to a single plaintiff. (Michael A. Eizenga et al., *Class Actions Law and Practice*, looseleaf (Markham, Ont.: LexisNexis Canada, 2005) at para. 3.37.) He states further that in *Rumley, supra*, the Supreme Court of Canada has "explicitly stated that punitive damages are appropriately addressed as a common issue in a class proceeding" At para. 34, McLachlin C.J., writing for the court, stated as follows:

Clearly, the appropriateness and amount of punitive damages will not always be amenable to determination as a common issue. Here, however, the respondents have limited the possible grounds of liability to systemic negligence — that is, negligence not specific to any one victim but rather to the class of victims as a group. In my view the appropriateness and amount of punitive damages is, in this case, a question amenable to resolution as a common issue: see *Chace*, at para. 30 (certifying punitive damages as a common issue on the grounds that the plaintiffs' negligence claim was "advance[d] . . . as a general proposition" rather than by reference to conduct specific to any one plaintiff). [page 696]

130. In my view, the possible grounds of liability in this case are not specific to any one victim, but rather to the class of victims as a group. Based on these observations, in addition to the deference owed to the motion judge in determining the common issues, I see no reason to interfere with this aspect of the motion judge's decision.

187 As appears, Justice Epstein viewed the *Serhan* case as a case like *Rumley* and *Chace* where the question of punitive damages was amenable to resolution as a common issue. The case at bar, however, is different from *Rumley* and *Chace* and the extent of the culpable harm caused by Medtronic remains to be determined after individual trials to determine causation and damages.

188 In my opinion, the fact that the Class Members' entitlement to elect waiver of tort instead of compensatory damages may be determined at the common issues trial does not change the situation that punitive damages in the case at bar cannot be determined until after the individual trials.

189 Indeed, if the Class Members are entitled to the remedy of a disgorgement of Medtronic's profits, it is arguable that it would not be rational, proportionate, or just to award punitive damages because the disgorgement by itself would (as it is designed to do) accomplish the purposes of retribution, deterrence, and denunciation. In other words, the doctrinal rationale for disgorgement is the same as for punitive damages and it would not be rationale or fair for the defendant to disgorge and also pay punitive damages. These are matters for a trial court to determine, but the point remains that in the case at bar, both the entitlement to punitive damages and the quantification of the punitive damages depends upon an appreciation of matters that will be determined at common issues trials.

190 I see no unfairness in this conclusion. Class members are not denied access to justice nor are they being denied what Justice Binnie described as the "windfall" of punitive damages. Just as it cannot be said that class members are being denied

compensatory damages because they must prove causation and damages individually, it cannot be said that they are being denied punitive damages in a case in which punitive damages are not amenable to being proven as a common issue.

191 There may be cases where at the common issues trial, the court is in a position to rationally and proportionately decide the questions of whether a defendant should pay punitive damages to the class and the amount of those punitive damages. In my opinion, however, this is not one of those cases.

### **The Bifurcation of the Quantification of the Disgorgement**

192 In the event that the waiver of tort questions are certified as common issues, Medtronic asks that two questions be bifurcated for the purposes of discovery and for the purposes of the common issues trial. The two questions are:

- (xi) If an election of elections may be made, what is the amount and how is it to be allocated?"
- (xii) If an election or elections may be made, what share, if any is the OHIP or other provincial health insurer's entitlement?

193 In a motion made in *Peter v. Medtronic Inc.*, Medtronic sought an order to bifurcate the identical questions in an already certified class proceeding. As I have mentioned above, the motion in *Peter v. Medtronic Inc.* was argued at the same time as this certification motion, and for the purposes of the certification motion, both parties relied on but did not repeat the arguments that they had made in the companion motion.

194 I am releasing my Reasons for Decision *Peter v. Medtronic Inc.*, which I incorporate here by reference, at that same time as these Reasons.

195 In *Peter v. Medtronic Inc.*, I order bifurcation. For the same reasons (but without the added difficulty of the action already having been certified as a class proceeding), I order bifurcation for questions (xi) and (xii) in the case at bar.

### **Preferable Procedure**

196 I move on to the preferable procedure criterion.

197 The Plaintiffs submit that certifying the action and a trial of the common issues will significantly advance the litigation and will also advance the policy objectives underlying class action legislation, namely, access to justice, judicial economy and behaviour modification. I agree.

198 Further, the Plaintiffs submit that certifying this action as a class proceeding will be in keeping with similar recent decisions: *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) and (Ont. S.C.J.), leave to appeal ref'd (Ont. Div. Ct.) and *Lambert v. Guidant Corp.*, [2009] O.J. No. 1910 (Ont. S.C.J.); *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (Ont. S.C.J.), aff'd (Ont. Div. Ct.); *Tiboni v. Merck Frosst Canada Ltd.*, [2008] O.J. No. 2996 (Ont. S.C.J.), leave to appeal ref'd (Ont. S.C.J.).

199 Medtronic submits that in the case at bar, the substance and complexity of the individual issues of causation and damages overwhelm the common issues and that certification would result in an unmanageable and inefficient proceeding. Although some amendments, discussed below, are required to the litigation plan to address the individual issue trials, I disagree with Medtronic's submission. In my opinion, this is a case where the common issues trial would achieve efficiencies in adjudication that would justify the effort. If Medtronic succeeds, there will not be individual issues trials and if the Representative Plaintiffs succeed the individual class members will be well advanced to achieving access to justice.

200 For many Class Members there is no viable alternative to a class proceeding. Many will not have the resources to commence individual actions. Ms. Robinson and Mr. Austen testified that that the vast majority of Class Members do not have the resources to prosecute individual actions against Medtronic. Further, they testified that many Class Members, who it should be recalled are already suffering from a heart condition, do not have the fortitude to undertake litigation individually.

201 In the case at bar, as a matter of the preferable procedure criterion, holding that it would be preferable for each of the approximately 6,000 Class Members to initiate separate proceedings would have the practical effect of denying access to justice to most or all Class Members and would not promote judicial economy or the behaviour modification purposes of the *Class Proceedings Act, 1992*.

202 In my opinion, the Plaintiffs have satisfied the preferable procedure criterion of the Act.

### **Representative Plaintiffs**

203 Medtronic raised no objection to the suitability of the Plaintiffs as Representative Plaintiffs, and I find as a fact that Sherry Marie Robinson, Gregory Robert Horning, Dan Austen, and Glenda Austen are Representative Plaintiffs who would adequately represent the interests of the class without conflict of interest.

### **Litigation Plan**

204 Medtronic submits, however, that the Plaintiffs have not satisfied the requirement of producing a workable litigation plan. It submits that the Plaintiffs' plan is inadequate in several ways. More particularly, Medtronic submits that the plan fails to address the steps the Plaintiffs would take to gather evidence from witnesses and from documents and that the plan is deficient in addressing the necessary and inevitable individual issues, determinations of causation, and damages that would follow the common issues trial.

205 Medtronic says that the Plaintiffs' plan fails to address: (a) who would preside over such hearings; (b) will there be individual discovery of each claimant; (c) will there be an appeals procedure; (d) the location and forum of the proceedings; and the cost of administrating such proceedings.

206 I agree with Medtronic that the litigation is deficient with respect to its treatment of the individual issues that would follow the common issues trial. To these deficiencies, I add what I regard as a very serious matter not identified by Medtronic, which is the matter of the representation of class members at any common issues trial.

207 The current Litigation Plan contains the following provision with respect to the Resolution of Individual Issues:

51. The findings of fact and conclusions on the common issues will allow the common issues trial judge to give directions and establish procedures, pursuant to section 25 of the *CPA* to resolve remaining individual issues not determined at the common issues trial, including any related to causation.

52. Class Members who require individual assessments or otherwise participate in a mini-hearing process will be entitled to retain a personal lawyer to conduct the assessment if so desired.

208 In my opinion, as a matter of access to justice, it is not adequate to provide as a part of the litigation plan that class members "will be entitled to retain a personal lawyer to conduct the assessment if so desired."

209 In the context of the preferable procedure debate, the Plaintiffs submitted that many Class Members will not have the resources to commence individual actions, and similarly, they may not have the resources to retain a lawyer to prosecute their individual claims. Class Members require, at least, the assurances that they will have the representation of Class Counsel and a willingness to provide services pursuant to a contingency fee agreement. In *Glover v. Toronto (City)*, [2009] O.J. No. 1523 (Ont. S.C.J.), Justice Lax stated at para. 94:

In a class proceeding, a client does not have a right to choose his or her lawyer or have a right to terminate the retainer. If a class member is dissatisfied with counsel of record, he or she may opt out of the class, but by the time this proceeding reaches the stage of individual assessments, that time will have long passed. In my opinion, class counsel cannot unilaterally choose to terminate representation, but is bound to represent those class members who wish to pursue individual claims on the same basis as the retainer agreement provides until the class member or the court directs otherwise. It seems to me that

the proposed abandonment of class members following the determination of common issues is completely at odds with the fiduciary duty that a lawyer has to a client, which includes the duty of loyalty: *R. v. Neil*, [2002] 2 S.C.R. 631 (S.C.C.). It is also completely at odds with the goals of class proceedings. Earlier I made reference to Chief Justice Winkler's remarks in *Cassano* and I repeat them here: "the resolution of individual issues is an essential element of many class proceedings and is crucial if there is to be an advancement of the goal of access to justice.".

210 The Litigation Plan should be amended accordingly.

211 There are other amendments that would make for a better Litigation Plan, including amendments that would address the deficiencies identified by Medtronic. The deficiencies, however, do not go so far as to establish that the Plaintiffs have not produced a workable litigation plan, and the deficiencies can be addressed by adding a provision to the plan that within 60 days of the certification of the action as a class proceeding, the parties will make their best efforts to establish a timetable for the action and a discovery plan, failing which the Representative Plaintiffs or the Defendants may move for an order from the case management judge establishing a timetable and a discovery plan.

212 I conclude that with the above amendments, and also with an amendment recognizing the bifurcation of the two common issue questions, the litigation plan is satisfactory.

### **Conclusion**

213 For the above reasons and with the qualifications and conditions set out above, the motion for certification is granted.

214 If the parties cannot agree about the matter of costs, then they may make submissions in writing beginning with the Plaintiffs within 20 days of the release of these Reasons for Decision followed by the Defendants within a further 20 days.

215 Order accordingly.

*Order accordingly.*

**Headnote**

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiffs brought action against promoters of gift program and law firm as result of determination by Canada Revenue Agency that program was sham, and that resulted in disallowance of tax benefits — Plaintiffs brought motion for certification of action as class proceeding, program promoters brought cross-motion to stay action, and law firm brought cross-motion to dismiss claims against it — Law firm disputed existence of cause of action against it since plaintiffs did not read or rely on its opinion about legitimacy of gift program — Motion granted; cross-motions dismissed; action certified as class proceeding — Law firm provided legal opinion with intention that gift program promoters use it to market program to plaintiffs who expected to receive charitable tax receipt — Claim was properly pleaded in negligence, not negligent misrepresentation — Law firm ought

reasonably to have foreseen that its tax opinion would be used to market gift program and that its participants would suffer damages if firm was negligent in giving opinion — Other requirements for certification were met.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiffs brought action against promoters of gift program and law firm as result of determination by Canada Revenue Agency (CRA) that program was sham, and that resulted in disallowance of tax benefits — Plaintiffs brought motion for certification of action as class proceeding, program promoters brought cross-motion to stay action, and law firm brought cross-motion to dismiss claims against it — Defendants' main objection was that insufficient commonality existed to permit class proceeding — Motion granted; cross-motions dismissed; action certified as class proceeding — There was sufficient evidentiary basis raising common issues that law firm's tax opinion was considered part of gift program and was necessary to launch it — It was also common issue that participants entered into common contracts on express or implied terms expecting to receive charitable tax receipt recognized by CRA — Certified common issues would not determine liability for compensatory damages since individual determinations would be needed to assess damages — However, whether award of punitive damages was justified was appropriate common issue since it focused on defendants' conduct — Resolution of common issues would be substantially determinative of defendants' liability, and other requirements for certification were met.

MOTION by plaintiffs seeking certification of action as class proceeding; CROSS-MOTION by defendants seeking to dismiss or stay action.

**Lax J.:**

1 The plaintiffs bring this proposed class proceeding on behalf of 2,825 individuals who participated in the Banyan Tree Foundation Gift Program (the "gift program") for the taxation years 2003 through 2007. The action is brought claiming damages and declaratory relief against the promoters of the gift program (collectively, the "gift program defendants") and the law firm, Fraser Milner Casgrain LLP ("FMC") as a result of the disallowance by the Canada Revenue Agency ("CRA") of the tax benefits that the plaintiffs allege they were to have received. CRA has determined that the gift program was a sham and proposed class members have been or will be reassessed and required to pay taxes and interest on tax arrears arising from the reassessments.

2 The plaintiffs allege that the gift program defendants are in breach of contract and were negligent in failing to provide a charitable donation receipt recognized by CRA and in failing to ensure that class members would not be at risk to repay the loans that were obtained in order to facilitate their participation in the program. They allege that FMC's tax opinions were necessary and instrumental to the marketing of the gift program and the law firm was negligent in the preparation of these opinions.

3 Before the court are three motions: (1) the plaintiffs move for certification of the action as a class proceeding under the *Class Proceedings Act*, 1992, S.O. 1992, c. 6 ("CPA"); (2) the gift program defendants move for a stay of the action under sections 106 and 138 of the *Courts of Justice Act*, R.S.O. 1990, c. C.43; (3) FMC moves to dismiss the claims against it under rule 51.06 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194. For the reasons that follow, I conclude that the defendants' motions for stay and for dismissal of the claims against FMC should be dismissed and the plaintiffs' motion for certification granted.

**Background**

**The Parties**

4 The gift program was structured as a mechanism to provide donations to various charities and to enable taxpayers to obtain charitable tax receipts. Banyan Tree Foundation is a private charitable foundation registered December 18, 1987, and formerly known as the Ronald and Joan Ball Foundation. In 2002, Robert Thiessen, a chartered accountant, became president and director of Banyan Tree. Promittere Capital Group Inc. ("Promittere Capital"), Promittere Asset Management Ltd ("Promittere Asset") and Rochester Financial Limited ("Rochester") are Ontario corporations. Mr. Thiessen is also an officer and director of these corporations. FMC is a limited liability partnership of lawyers with offices in Toronto and elsewhere who provided legal opinions in 2002 and 2003 that the gift program complied with applicable tax rules for charitable donations.

5 The plaintiffs, Kathryn and Rick Robinson, are husband and wife. Kathryn participated in the gift program in 2003, 2004 and 2005. Rick participated indirectly through Kathryn in 2003 and directly in 2004 and 2005.

### ***The Gift Program***

6 The gift program was marketed to Canadians who had taxable income in excess of \$75,000 and was offered in each of the taxation years 2003 through 2007. Of the 2,825 proposed class members, 2,291 or the vast majority participated in 2003 and 2004. A significant number of individuals, including the plaintiffs, participated in more than one year. The structure of the gift program remained essentially unchanged over the course of its life. Participants were solicited by a network of financial advisors who promoted and sold the program to individuals. Each participant completed a pledge, loan application, power of attorney and promissory note. Each made a pledge of a donation in a specified amount to Banyan Tree and received a charitable donation receipt for the full amount of the pledge. Approximately 85 per cent of the pledge was borrowed from Rochester and evidenced by a promissory note. The participant contributed the remaining amount in cash and paid Rochester a security deposit in respect of the loan, which was to be invested and used to pay interest, income taxes and principal due at the end of the loan period.

### ***The Claims***

7 The plaintiffs allege that the gift program was structured as a mechanism to provide donations to various charities and to enable taxpayers to obtain charitable tax receipts. They claim that it was developed, promoted and administered by Thiessen on behalf of Promittere Capital, Promittere Asset, Rochester and Banyan Tree with the advice and assistance of FMC. The plaintiffs allege that it was an express or implied term of the contracts between the participants and the gift program defendants that the participants would receive a charitable tax receipt that would be recognized by CRA and that they would not be at risk to repay the loans obtained from Rochester. As against these defendants, the plaintiffs plead breach of contract and negligence and seek a declaration that the promissory notes in favour of Rochester are void and unenforceable.

8 As against FMC, the plaintiffs allege that the FMC legal opinions were a necessary prerequisite for the promotion and sale of the gift program, without which the gift program could not have been launched. They plead that FMC intended participants to rely on the existence of the opinions in deciding whether or not to participate in the gift program, that FMC owed participants a duty of care and that it was negligent in the preparation of the opinions. The plaintiffs seek damages on their own behalf and on behalf of class members for interest paid or payable arising from CRA's reassessments, for the security deposits and cash donations paid by participants to gift program defendants and for out-of-pocket expenses incurred by participants to retain professional advisors.

### ***Evidence on the Motions***

9 Mr. and Mrs. Robinson provided their own evidence on the motions as well as producing evidence from several other gift program participants who, like them, each participated in one or more years and either has been reassessed or expects to be reassessed for the years they participated. The plaintiffs also produced evidence from John Loukidelis, a tax lawyer and partner with Simpson Wigle LLP. He represents approximately 200 gift program participants and proposed class members. His evidence was mainly tendered in response to the motion for stay. The plaintiffs and their witnesses were cross-examined. As well, the plaintiffs produced an opinion from Professor Vern Krishna, a senior tax expert at the law firm of Borden Ladner Gervais LLP, but as it was not relied on, I do not propose to refer to it.

10 The gift program defendants filed two affidavits of Robert Thiessen. FMC produced the opinion of Margaret Sanderson, an economics expert, with respect to the approach to determining damages in this action. Neither was cross-examined.

11 I will discuss this in more detail below, but by way of overview, the gift program defendants oppose certification on a number of fronts, but their main attack is the assertion that there is insufficient commonality to make this action one that is suitable for class treatment. They submit that the distinguishing factors pertaining to the gift program on both an individual and year to year basis makes it necessary to look to the particular circumstances of each class member, including the circumstances of the point-of-sale representations of the agents who sold the gift program to individual participants. They also submit that

the action is premature and should be stayed pending the disposition of tax proceedings, which if successful, will render the action moot.

12 Neither the plaintiffs nor the witnesses they put forward on the motion claim to have read the FMC opinions. FMC submits that this is fatal to certification. FMC asserts that a duty of care cannot be created based on the fact that an opinion was prepared when its contents were never read or relied upon and therefore the claim as pleaded fails to disclose a cause of action. FMC brings a cross-motion to dismiss the claim against it based on the admissions under rule 51.06(1) and (2) of the *Rules of Civil Procedure*.

### **The Test for Certification**

13 Section 5(1) of the CPA sets out the criteria for the certification of a class proceeding. The language is mandatory. The court is required to certify the action as a class proceeding where the following five-part test for certification is met:

- (a) the pleadings or the notice of application discloses a cause of action;
- (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff;
- (c) the claims of the class members raise common issues;
- (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
- (e) there is a representative plaintiff who,
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

14 These requirements are linked: "There must be a cause of action, shared by an identifiable class, from which common issues arise that can be resolved in a fair, efficient and manageable way that will advance the proceeding and achieve access to justice, judicial economy and the modification of behaviour of wrongdoers": *Sauer v. Canada (Minister of Agriculture)*, [2008] O.J. No. 3419, 169 A.C.W.S. (3d) 27 (Ont. S.C.J.) at para. 14.

#### **5(1)(a) - Cause of action**

15 The test under s. 5(1)(a) is well settled and identical to the test under rule 21.01(1)(b) of the *Rules of Civil Procedure*. The following principles apply to the determination of the issue of whether the pleadings disclose a cause of action under s. 5(1)(a):

- no evidence is admissible for the purposes of determining the s. 5(1)(a) criterion: *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.) at para. 25.
- all allegations of fact pleaded, unless patently ridiculous or incapable of proof, must be accepted as proven and thus assumed to be true;
- the pleading will be struck out only if it is plain, obvious and beyond doubt that the plaintiff cannot succeed and only if the action is certain to fail because it contains a radical defect: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 41, leave to appeal to S.C.C. refused, [2005] 1 S.C.R. vi (note) (S.C.C.).
- matters of law not fully settled in the jurisprudence must be permitted to proceed: *Ford v. F. Hoffmann-La Roche Ltd.* (2005), 74 O.R. (3d) 758 (Ont. S.C.J.) at para. 17(e).

- the pleading must be read generously to allow for inadequacies due to drafting frailties and the plaintiffs' lack of access to key documents and discovery information: *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), at 980; *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.), at 679.

16 The gift program defendants do not dispute that the statement of claim discloses causes of action against them in contract and negligence, and I am satisfied that it does. The contested issue is whether the pleading discloses a cause of action in negligence against FMC.

17 The plaintiffs plead that the opinion letters were a necessary prerequisite to the promotion and sale of the gift program, without which, the gift program could not have been launched. They plead that all class members were advised of their existence, that some received copies, that the opinion letters were referred to in promotional materials marketing the program and that they were an express term of the loan arrangements between the gift program participants and Rochester. The particulars of the claim in negligence against FMC are pleaded in paragraph 69(B) of the statement of claim:

### **Negligence**

69. The plaintiffs and class members state that the defendants were negligent, particulars of which are as follows:

(B) FMC,

(i) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program Defendants, without due care and consideration, when it knew or ought to have known that the Gift Program Defendants would rely upon and publish the existence of the Opinion Letters in promoting the Gift Program;

(ii) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program Defendants, without due care and consideration, when it knew or ought to have known that the Gift Program Defendants would rely upon the accuracy and reliability of the Opinion Letters in promoting the Gift Program;

(iii) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program participants as well as their authorized representatives, without due care and consideration, when it knew or ought to have known that the Gift Program participants would rely upon the existence of the Opinion Letters in deciding whether to participate in the Gift Program;

(iv) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program participants as well as their authorized representatives, without due care and consideration, when it knew or ought to have known that the Gift Program participants would rely upon the accuracy and reliability of the Opinion Letters in deciding whether to participate in the Gift Program;

(v) failed to properly investigate and consider the income tax consequences of participation in the Gift Program;

(vi) was negligent in the preparation of the Opinion Letters;

(vii) knew or ought to have known that the Opinion Letters were a necessary prerequisite for the promotion and sale of the Gift Program and that but for the Opinion Letters the Gift Program could not be undertaken, yet it failed to fully and properly investigate and accurately opine;

(viii) knew or ought to have known that the Opinion Letters were no longer accurate or reliable following: the issuance by Canada Revenue Agency of its Fact Sheets in November and December, 2003, and November, 2005, the legislative changes announced on December 5, 2003; and, the Canada Revenue Agency issued Taxpayer Alerts in November, 2005 and October, 2006;

(ix) failed to notify the Gift Program Defendants, prospective donors and existing participants in the Gift Program that its Opinion Letters were no longer accurate and reliable; and

(x) knew or ought to have known that the Gift program Defendants continue to rely upon and publish the existence and content of the Opinion Letters for the promotion and sale of the Gift Program to prospective donors and participants despite its knowledge that these Opinion Letters are no longer accurate or reliable.

18 The plaintiffs also plead in the following paragraphs that

70. FMC was negligent in the issuance of the Opinion Letters, the issuance of which was a necessary prerequisite for the promotion of the Gift Program by the Gift Program Defendants. Accordingly, the FMC's issuance of the Opinion Letters was the proximate cause of damages to Class Members.

71. FMC owed a duty of care to those whom it intended to, or knew or ought to have known would, rely upon the existence and/or accuracy and reliability of the content of the Opinion Letters it issued.

78. FMC had a duty to warn the Gift Program Defendants and Class Members and to make full disclosure to them as to the facts and circumstances set out above and failed to do so. Particularly, FMC failed to notify the Gift Program Defendants and Class members that the Opinion Letters were no longer accurate or reliable.

81. All defendants failed to take proper steps to fully investigate the Gift Program to ensure that the Canada revenue Agency would in fact recognize the charitable donation receipts issued and tax credits claimed.

19 On a motion under rule 21 and in considering s. 5(1)(a) of the CPA, no evidence is admissible. However, a motions judge may have regard to documents specifically referred to and incorporated by reference into the pleading in order to assess the substantive adequacy of the claim: *Web Offset Publications Ltd. v. Vickery* (1999), 43 O.R. (3d) 802 (Ont. C.A.); *Corktown Films Inc. v. Ontario* (1996), 18 O.T.C. 308, 66 A.C.W.S. (3d) 868 (Ont. Gen. Div.); *Montreal Trust Co. of Canada v. Toronto Dominion Bank* (1992), 40 C.P.C. (3d) 389 (Ont. Gen. Div.). As the opinion letters are specifically referred to and relied on in the pleading, I may consider them.

20 The opinion letters are dated October 23, 2002, and September 5, 2003, and are addressed to the attention of Mr. Thiessen as President of Promiterre Asset. FMC did not structure the gift program, but the program's structure was integral to the opinion FMC rendered that the donation made partly in cash from the participant's own resources and partly from a loan from Rochester would qualify as a valid charitable donation for tax purposes. If that opinion was given negligently as is alleged, it could, subject to the arguments discussed below, support the plaintiffs' claim in negligence against FMC.

21 FMC submits that a duty of care cannot be created based on the fact that an opinion was prepared, when its contents were never read or relied upon by anyone. They say that the allegations against FMC arise from the existence and the contents of the letters and that, in substance, the claim is made for negligent misrepresentation. I disagree. The claim is not pleaded on the basis that the plaintiffs read or relied upon the FMC letters, but on the basis that FMC issued the opinion letters with the expressed intention that they be relied upon by the gift program defendants and knowing that the gift program defendants would rely upon and publish the existence of the opinions in promoting the gift program.

22 FMC points out that the letters contained express qualifications on the opinion and authorized reliance by a very limited category of individuals and disclaimed reliance by any other person, without FMC's prior written consent. The letters state:

The opinions expressed in this letter may be relied upon by you, and by a Donor who is provided a copy of this letter by you, or the Donor's authorized representative, and may not be relied on by anyone else without our written permission.

23 FMC submits that, given this language, it could not be reasonably foreseeable to FMC that individuals like the plaintiffs who did not receive or read the FMC letters would sustain damages as a result of the opinions expressed in them. It says that the result is that there was no relationship between FMC and the plaintiffs sufficiently close to satisfy the first part of the *Anns* test

for duty of care (*Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.)). This submission overlooks that the limitation on reliance does not qualify in any way Promiterre's ability to rely on the opinions expressed in the letters. In fact, the letters specifically permit Promiterre's reliance and it is alleged that the gift program defendants did rely on the opinions to launch and sell the program.

24 The allegation is not that FMC provided the letters intending that they be read and relied upon by the plaintiffs and proposed class members, although some may have done so, but rather that FMC provided the letters (1) with the intention that they be used by the gift program defendants in the manner the plaintiffs allege, namely to market the program as one in which proposed class members would receive a charitable tax receipt recognized by CRA; and (2) with the intention and knowledge that the existence of a tax opinion would inform the decision of class members about whether or not to participate in the gift program. If these allegations are made out at trial, it is not plain and obvious that they could not support a duty to take care that the opinions expressed in the letters were accurate and reliable and that a failure to take such care or a failure to warn was the proximate cause of the losses the plaintiffs allege they suffered.

25 To put this in a different way, the reliance the plaintiffs allege is not on the tax opinion *per se*, but on there being a tax opinion that FMC intended and knew would be used by the gift program defendants to support the legitimacy of the gift program for income tax purposes and would be relied upon by the class members in deciding whether or not to participate. I would therefore not give effect to FMC's argument that this is a negligent misrepresentation claim "dressed up" as a negligence claim. It is properly pleaded as a negligence claim and the essential elements of the cause of action - duty, foreseeability, proximity, breach, and damage - are present. The express qualifications on the opinion are not matters to be considered at the certification stage.

26 The question then is whether it is plain and obvious that a claim in negligence against FMC cannot possibly succeed. The plaintiffs have not pleaded and cannot plead any direct relationship with FMC, but there is precedent, as discussed below, for advancing a class action claim in negligence against a law firm even though generally, a lawyer owes a duty of care only to the lawyer's client: *Baypark Investments Inc. v. Royal Bank* (2002), 57 O.R. (3d) 528 (Ont. S.C.J.) at paras. 23 and 33, aff'd, [2002] O.J. No. 4377 (Ont. C.A.); *Elms v. Laurentian Bank of Canada*, 2004 BCSC 1013, 35 B.C.L.R. (4th) 373 (B.C. S.C.) at paras. 63-65, aff'd, 2006 BCCA 86 (B.C. C.A.).

27 In *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, 18 B.L.R. (3d) 240, [2001] O.J. No. 4622 (Ont. S.C.J.) ["YBM"], the plaintiffs advanced claims in both negligent misrepresentation and negligence against a law firm and one of its lawyers for alleged misrepresentations in a prospectus. Cumming J. rejected the negligent misrepresentation claim because the plaintiffs' investment preceded the public offering negating any reliance on the prospectus. However, applying the principles set out in *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.) and *Anns v. Merton London Borough Council*, he held that the pleading disclosed sufficient facts to give rise to a *prima facie* duty of care and that by enabling the public offering to come to fruition through the prospectus, it was arguable that the law firm and the lawyer could be found negligent. He concluded that a factual record was necessary to decide whether there were policy considerations that ought to negative or limit the scope of any duty of the law firm and lawyer in question.

28 In the earlier decision of *Delgrosso v. Paul* (1999), 45 O.R. (3d) 605 (Ont. Gen. Div.), Sharpe J. (now, Sharpe J.A.), similarly found that a negligence claim in a class action brought against a solicitor on behalf of investors disclosed a cause of action. In doing so, he reviewed the "developing line of authority" holding that a solicitor may place himself or herself in a sufficient relationship of proximity to a third party to owe that party a duty of care: *Filipovic v. Upshall* (1998), 19 R.P.R. (3d) 88 (Ont. Gen. Div.); *Whittingham v. Crease & Co.*, [1978] 5 W.W.R. 45 (B.C. S.C.); *Tracy v. Atkins* (1979), 105 D.L.R. (3d) 632 (B.C. C.A.); *Linsley v. Kirstiuk* (1986), 28 D.L.R. (4th) 495 (B.C. S.C.).

29 In *Elms v. Laurentian Bank of Canada*, 2001 BCCA 429, 90 B.C.L.R. (3d) 195 (B.C. C.A.), affirming (2000), 73 B.C.L.R. (3d) 366 (B.C. S.C. [In Chambers]), which was also a class action brought by investors against a solicitor and relied upon by Cumming J. in *YBM*, the British Columbia Court of Appeal affirmed the decision of the motions judge to certify the action. The court also reviewed the so-called "disappointed beneficiary" cases such as *Whittingham* and *Tracy* and quoted liberally from Justice Sharpe's reasons in *Delgrosso* in concluding that although the investors' argument was novel, it could not be said that it was plain and obvious that it would fail.

30 Notwithstanding the efforts of counsel for FMC to confine these cases to their facts and to distinguish them, there is clearly a developing line of authority in Ontario and elsewhere that have permitted claims of this kind to proceed. FMC pointed to no authority that rejected a third party negligence claim against lawyers at the certification stage. I regard *Hurst v. PriceWaterhouseCoopers (PWC) LLP, Canada*, [2009] O.J. No. 1415 (Ont. S.C.J.) on which FMC relies as entirely distinguishable. This was a claim for negligent misrepresentation, reckless misrepresentation, and negligence in which the allegedly wrongful act by PWC amounted only to having its name appear as auditor on an offering memorandum. This was found insufficient to establish a relationship giving rise to a *prima facie* duty of care.

31 Whether or not the plaintiffs and proposed class members are akin to disappointed beneficiaries, it is certainly arguable that FMC ought reasonably to have foreseen that its tax opinion would be used to market the gift program and that the participants would be "disappointed" and suffer damages if FMC was negligent in giving that opinion. In my view, FMC placed itself in a relationship of sufficient proximity to owe a *prima facie* duty of care to the plaintiffs and proposed class members and I would leave to trial the question of whether policy considerations ought to negative that duty.

#### **FMC's Cross-Motion under Rule 51.06**

32 In cross-examination, the plaintiffs and their witnesses admitted that they did not read the FMC letters. FMC submits that it is entitled to judgment dismissing the action against it based on these admissions. FMC is unable to rely on this evidence for the purposes of s. 5(1)(a) of the CPA, but under rule 51.06, the court may grant an order based on a clear admission of facts.

33 There are at least three reasons to reject this submission and dismiss FMC's motion. First, as I have already discussed, the claim is not advanced on the basis of a direct relationship with FMC and whether or not the plaintiffs read and relied on the letters is irrelevant to the claim that is pleaded. Second, the evidence that is relied upon was obtained in cross-examination on a pending certification motion and goes only to whether the certification criteria are met. It cannot be used for a collateral purpose as evidence that goes to the merits of the action. Third, according to the Ontario Court of Appeal, it would appear that rule 51.06 and Rule 20 serve a similar purpose and are used in combination to obtain summary judgment for part of a claim if there is an admission that satisfies the no genuine issue for trial test and, in the language of rule 51.06, the order sought (a partial summary judgment consistent with the admission) is an order to which "the party may be entitled without waiting for the determination of any question between the parties" (rule 51.06(2)): *Ford Motor Co. of Canada v. Ontario (Municipal Employees Retirement Board)* (1997), 36 O.R. (3d) 384, 153 D.L.R. (4th) 33 (Ont. C.A.) at para. 50. FMC has not brought a motion for summary judgment and the admissions cannot be used in the manner proposed to obtain a dismissal of the action.

34 The plaintiffs have therefore satisfied the first requirement for certification.

#### **5(1)(b) - Identifiable class**

35 Section 5(1)(b) requires that "there be an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant." The purpose of a class definition is (a) to identify persons with a potential claim; (b) define who will be bound by the result; and (c) describe who is entitled to notice: *Bywater v. Toronto Transit Commission*, [1998] O.J. No. 4913, 27 C.P.C. (4th) 172 (Ont. Gen. Div.) at para. 10. Class members are not required to have identical claims and class membership identification is not commensurate with the elements of the causes of action advanced on behalf of the class: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 45, leave to appeal to S.C.C. refused, [2005] 1 S.C.R. vi (note) (S.C.C.). However, the class definition must be rationally connected to the common issues raised by the cause of action as an issue will be common only where its resolution is necessary to the resolution of each class member's claim: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 39.

36 The plaintiffs propose and the gift program defendants do not dispute the following class definition: "all individuals who participated in the Banyan Tree Gift Program for the taxation years 2003, 2004, 2005, 2006, and 2007." FMC accepts that the definition is satisfactory for those who participated in 2003 and possibly also 2004, but suggests that it is "over-inclusive" with respect to subsequent years as FMC provided no tax opinion after September 2003. I would not give effect to this objection. For

one thing, the vast majority of class members participated in 2003 and 2004. As well, the 2003 tax opinion does not state that it is limited to any particular taxation year. In any event, the court has the power to create sub-classes where this is necessary.

37 I am satisfied that the class definition meets the requirement of s. 5(1)(b) of the CPA in that it is clear, defined by objective criteria and rationally connected to the common issues to which I turn next.

**5(1)(c) - Common Issues**

38 The core of a class action is commonality. For an issue to be common, it must be a substantial ingredient of each class member's claim and its resolution must be necessary to the resolution of each class member's claim: *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.) at para. 18. An issue will not be common if its resolution is dependent upon individual findings of fact that have to be made with respect to each individual claimant. *Fehringer v. Sun Media Corp.*, [2002] O.J. No. 4110, 27 C.P.C. (5th) 155 (Ont. S.C.J.), aff'd, [2003] O.J. No. 3918, 39 C.P.C. (5th) 151 (Ont. Div. Ct.). The underlying question is whether the resolution of a proposed common issue will avoid duplication of fact-finding or legal analysis: *Western Canadian Shopping* at para. 39.

39 Section 6 of the CPA is clear that where the relief claimed includes a claim for damages, certification should not be refused because this would require individual assessment after the determination of the common issues or because the relief claimed relates to separate contracts involving different class members or because different remedies are sought for different class members. Common issues need not determine liability, but need only be issues of fact or law that will move the litigation forward. Many individual issues may remain to be decided after the resolution of a common issues trial: *Hollick* at para. 16; *Cloud* at para. 52; *Cassano v. Toronto Dominion Bank* (2007), 87 O.R. (3d) 401 (Ont. C.A.) at paras. 60-63, leave to appeal to S.C.C. refused, [2008] S.C.C.A. No. 15 (S.C.C.). The common issues requirement is not a high legal hurdle, but a plaintiff must adduce some evidence to show that there is a basis in fact that issues are common: *Hollick* at para. 25.

40 The plaintiffs propose the following common issues:

**Relating to Gift Program Defendants**

- (a) Was it a term of the contract of participation in the Gift Program that participants would receive a charitable donation receipt that would be recognized by Canada Revenue Agency for tax credit purposes?
- (b) Was it a term of the contract of participation in the Gift Program that participants would not be at risk to repay loans obtained from Rochester?
- (c) If the answer to (a) and/or (b) is yes, has the contract been breached by the Gift Program Defendants?
- (d) Did the Gift Program Defendants owe a duty of care to participants?
- (e) If the answer to (d) is yes, what was the nature and extent of that duty?
- (f) Has the duty of care owed by the Gift Program Defendants to participants been breached?
- (g) Are all promissory notes executed by Class Members in favour of Rochester in connection with participation in the Gift Program void and unenforceable?

**Relating to FMC**

- (h) Did FMC owe a duty of care to participants in the Gift Program?
- (i) If the answer to (h) is yes, what was the nature and extent of that duty?
- (j) Has FMC breached its duty of care to participants in the Gift Program?

### Relating to Relief Claimed

- (k) Are the defendants or any of them liable to Class Members for damages?
- (l) If the answer to (k) is yes, what is the amount of that liability?
- (m) Does the conduct of the defendants, or any of them, justify an award of punitive damages in the circumstances?
- (n) If the answer to (m) is yes, what is the amount of punitive damages to be awarded?

41 The gift program defendants argue that this is a point-of-sale representation case as in *Williams v. Mutual Life Assurance Co. of Canada* (2000), 51 O.R. (3d) 54 (Ont. S.C.J.); *Kumar v. Mutual Life Assurance Co. of Canada*, [2003] I.L.R. I-4181 (Ont. C.A.), and *Bellaire v. Independent Order of Foresters* (2004), 5 C.P.C. (6th) 68 (Ont. S.C.J.). See also, *Controltech Engineering Inc. v. Ontario Hydro*, [1998] O.J. No. 5350, 72 O.T.C. 351 (Ont. Gen. Div.).

42 In each of these cases, certification was refused. *Williams* and *Kumar* were pleaded on the basis of negligent misrepresentation, which the plaintiffs acknowledge can be problematic in a class action. *Controltech* was also a misrepresentation case. In *Bellaire*, the plaintiffs alleged breach of contract and sought to certify common issues on contractual interpretation, but Nordheimer J. found that the claims, at their heart, were claims of negligent misrepresentation. In coming to that conclusion, he referred to the plaintiff's evidence that the plaintiff had been "induced" to purchase the life insurance policy in question based on representations made to him by the defendant's agent. As well, the draft litigation plan explicitly stated that the "the substantive and determinative common issue turns on whether or not there was a misrepresentation which induced the plaintiff to enter the contract." Nordheimer J. found that the case suffered from the same problem which Cumming J. found to exist in *Kumar* and with which Rosenberg J.A. expressly agreed when he referred with approval at para. 48 of *Kumar* to Cumming J.'s statement:

While the theories of liability can be phrased commonly the actual determination of liability for each class member can only be made upon an examination of the unique circumstances with respect to each class member's purchase of a policy (at para.39).

43 Although certification of misrepresentation claims can present obstacles for plaintiffs, these kinds of claims are not fatal to certification. As Sharpe J. pointed out in *Controltech* at paras. 9-11 and 14, it is possible to imagine claims resting on various misrepresentations being certified as was the case in *Peppiatt v. Nicol* (1993), 16 O.R. (3d) 133 (Ont. Gen. Div.) and *Maxwell v. MLG Ventures Ltd.* (1995), 7 C.C.L.S. 155 (Ont. Gen. Div.). In *Peppiatt*, the claims of all class members rested on misrepresentations contained in an information package developed to promote the sale of equity shares in a golf club. In *Maxwell*, the claims rested on alleged misrepresentations in a securities offering circular. In *Abdoole v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.), all members of the court were of the opinion that the need to prove individual reliance did not preclude certification of a class proceeding involving a claim of misrepresentation, although certification in that case was refused on other grounds. It may be possible in some cases to move the litigation forward by deciding certain elements of the misrepresentation claim common to all class members, leaving the element of individual reliance to be determined on an individual basis (*per* Sharpe J. at para. 10 in *Controltech*). Justice Sharpe gives this example in para. 14 in *Controltech*:

... For example, it may be that a common issue would be found where a defendant developed and deployed a standard deceptive sales pitch for a consumer product, repeated time and again in nearly identical circumstances to various consumers by various sales people: see, eg. *Dabbs v. Sun Life Assurance Co. of Canada* (1998), 40 O.R. (3d) 429 (Ont. Gen. Div.), appeal quashed (1998) 165 D.L.R. (4<sup>th</sup>) 482 (Ont. C.A.), leave to appeal dismissed (October 22, 1998), Doc. 26855 (S.C.C.).

44 The plaintiffs do not plead misrepresentation (presumably to avoid the pitfalls of *Kumar* and *Bellaire*), but the defendants urge me to see this as a misrepresentation case that will require evidence as to who said what to whom in respect to each and every transaction. The plaintiffs rely only upon the contractual documents and the evidence of Robert Thiessen on behalf of

the gift program defendants as to what they say the terms of the contract were. They submit they can satisfy the commonality requirement on the basis of this evidence. Whether a defendant was in a contractual relationship with members of the class, the terms of that contract, and whether the defendant breached the contract may constitute common issues: *Hickey-Button v. Loyalist College of Applied Arts & Technology*, [2006] O.J. No. 2393 (Ont. C.A.).

45 According to Mr. Thiessen, the structure of the gift program was "essentially unchanged" from its inception in 2003 through and including 2007 whereby participants executed standard prescribed documents in order to participate in it. The documents are linked and comprise the contract between a class member and the gift program defendants. Each participant was required to execute a loan application, power of attorney, promissory note and pledge. The pledge expressly provides for an income tax receipt. Class members used the receipt in filing their income tax returns and have now been reassessed for 2003 and 2004. CRA has disallowed the full donation credit and it is anticipated that this will apply to subsequent years. Under Schedule "A" to the loan application, Rochester agreed to retain competent financial advisors to invest and manage the security deposits given by participants, but there is evidence that the security deposits have been severely compromised and also that they have proved to be insufficient to pay interest and taxes.

46 The gift program defendants produced the brochures and gift program information that they prepared and that were used to market and sell the gift program as well as the 2003 FMC tax opinion. The FMC opinion is based on a transaction that contemplates that the lender will acquire an insurance policy that will insure the risk that the security deposits given by participants will not be sufficient to repay the loan. It is also based on a transaction that contemplates a charitable donation tax receipt recognized by CRA. Mr. Thiessen deposes that the FMC opinion was made available for inspection by the various participants. The plaintiffs and their witnesses were aware of it. In December 2003, full documentation respecting the gift program, including the FMC opinion and the brochure, was available online. The 2003 brochure expressly states that the loan terms include performance insurance and a tax opinion from FMC. The 2004 brochure refers to "the favourable legal opinion" of FMC. When CRA began its investigation of the gift program, Banyan Tree communicated with participants on a uniform basis with suggested responses to the inquiries from CRA, including the suggestion that participants provide CRA with the brochures they received.

47 The gift program was sold through a network of "Donor Representatives" with whom the gift program defendants contracted for a finders' fee and by "Sub-Donor Representatives." The defendants assert that they did not control what was said at point-of-sale and point to the evidence of the plaintiffs and their witnesses who, on cross-examination, agreed they relied on their respective financial advisors to explain the gift program. However, Mr. Thiessen deposes that he was frequently involved in presenting information to professional financial advisors, many of whom became Sub-Donor Representatives. These presentations drew on gift program information that was prepared by Banyan Tree and used in the promotion of the program.

48 Appended to Mr. Thiessen's March 30, 2009 affidavit is the gift program information for 2003 through 2007. The 2003 gift program information expressly states that an insurance policy will be arranged by the lender (*i.e.* Rochester) to cover any deficit that may exist if the security deposit is not sufficient to retire the loan at the end of ten years. It also refers to the FMC legal opinion that "clarifies" that "GAAR is not an issue."<sup>1</sup> Although neither the insurance policy nor the FMC opinion is explicitly referred to in the gift program information in subsequent years, these documents as well as the brochures for these years provide examples that purport to demonstrate to proposed donors that they will not be at risk to repay the loans and that the tax credit they received would produce a net positive cash position.

49 In coming to the conclusion that the gift program was a sham and the tax credit should be disallowed, CRA, in its detailed letter to proposed class members explaining the reasons for the reassessment, commented:

In addition, the participants were never at risk to repay the loan. Participants entered into the Program on the condition that they were not at risk for any more than their cash outlay. In fact, it was promoted to the participants that, if they participated in the Program and provided the cash portion of the donation and the security deposit, participants would receive a tax credit that would produce a net positive cash position.

50 This evidence, together with the brochures and program information that were distributed, the contract language, and the evidence of the plaintiffs and their witnesses, is sufficient to provide the minimum evidential basis for the existence of class members' claims that raise common issues that the tax opinion was considered to be part of the gift program, that it was necessary to launch the program, and that participants entered into common contracts on express or implied terms that they would receive a charitable donation tax receipt recognized by CRA and a risk-free loan.

51 While misrepresentation is not pleaded, this action could be seen as one that is similar to *Peppiatt* in that there is evidence to support a class-wide representation as to the contractual terms and a class-wide breach of contract, resulting in loss to all class members. *Peppiatt* was founded upon allegations of breach of contract, misrepresentation and negligence against the developer of a golf course and one of the fundamental allegations was that class members purchased memberships in the club in reliance on the written representations contained in the membership information package. After the golf course was constructed, the developer could not meet its financial commitment and the bank assumed ownership of the golf club. The claim was amended to allege that the bank was at all times aware of the representations and subject to the same contractual and other obligations as the developer.

52 It is of interest that after certification and during the course of discovery in *Peppiatt*, evidence emerged that there were substantial differences in the membership information package that contained the alleged misrepresentations, that different versions had been distributed and that some class members had applied for membership in the club before the information packages were distributed. The bank moved to decertify the action, arguing that it was not a party to the individual dealings between the developers and the members and that the evidence obtained on discovery demonstrated that the claims did not raise common issues. The court accepted that there were at least 140 members of the certified class who received no version of the membership information package and that different versions had been distributed. As a result, there may have been no common issue of fact as to the nature and content of the alleged representations. This raised significant individual issues of reliance. Nonetheless, the court refused to decertify the action and instead created sub-classes to take account of the different factual circumstances of class members.<sup>2</sup>

53 The gift program in this case was marketed in common to all class members and sold by agents, many of whom were trained in a standardized way and who were provided with program information that the defendants prepared and intended be used in promoting and selling the gift program. Any variations from year to year do not detract from commonality, particularly in light of Mr. Thiessen's evidence that the structure remained the same and the documents that constitute the contract were the same. On the basis of the record before me, I am satisfied that proposed common issues (a), (b), (c) and (g) are appropriate common issues to certify. As the gift program defendants did not raise any different arguments with respect to the common issues in negligence, I am also satisfied that common issues (d), (e) and (f) are appropriate. These issues are common to all class members and meet the requirements for certification in that they are substantial ingredients of the claims of each class member, their resolution is necessary to resolve each claim and a resolution of these common issues would significantly advance the litigation.

54 By and large, FMC opposed certification of the common issues against it by relying on the submissions that were made in opposing certification of a cause of action in negligence and by adopting the submissions of the gift program defendants with respect to certification of the common issues against it. I have already addressed these arguments. For reasons already given, the proposed common issues in negligence relating to FMC, common issues (h), (i) and (j), are appropriate for certification.

55 This brings me to the proposed common issues on damages. It is clear that there will need to be individual determinations to assess the damages of class members and although the fact of loss could possibly be addressed in common, it would not sufficiently advance the litigation. I would therefore not certify proposed common issues (k) and (l).

56 With respect to the proposed common issues on punitive damages, in *Whiten v. Pilot Insurance Co.*, [2002] 1 S.C.R. 595 (S.C.C.), the Supreme Court of Canada held that punitive damages are awarded "if, but only if" all other penalties, including compensatory damages are likely to be inadequate to achieve the objectives of retribution, deterrence and denunciation.

57 The certified common issues in this action will not determine liability for compensatory damages. In certifying common issues in respect of punitive damages in cases where it is foreseeable that individual proceedings might be necessary to quantify compensatory damages, courts have recognized the potential for a future bifurcation at trial of the punitive damages issue. So, for example, in *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404, 47 C.C.L.T. (3d) 114 (Ont. S.C.J.); leave to appeal granted, [2007] O.J. No. 2709 (Ont. S.C.J.); appeal dismissed, (2008), 91 O.R. (3d) 691 (Ont. Div. Ct.), Justice Cullity, relying on *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.) included a common issue on punitive damages in the certification order, but said at para. 98:

... The possibility that, because of the requirement that compensatory damages have been found to be inadequate, the inquiry might be bifurcated between a preliminary consideration by the trial judge of the defendants' conduct and a subsequent final determination of the liability for, and the quantum of, punitive damages after the individual issues had been decided was accepted by the British Columbia Court of Appeal in *Fakhri v. Alfalfa's Canada Inc.* [2004] B.C.J. No. 2200 (B.C.C.A.).

58 The same approach, namely the certification of a common issue on *prima facie* entitlement to punitive damages with quantification and final determination following an assessment of compensatory damages, was accepted in *Boulanger v. Johnson & Johnson Corp.* (2007), 40 C.P.C. (6th) 170 (Ont. S.C.J.) at para. 48, leave to appeal refused, [2007] O.J. No. 1991 (Ont. Div. Ct.); *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.); leave to appeal denied, [2008] O.J. No. 1916 (Ont. Div. Ct.) at para. 105; *MacKinnon v. National Money Mart Co.*, 2007 BCSC 348, [2007] B.C.J. No. 520 (B.C. S.C.) at paras. 67-68; *Bodnar v. Payroll Loans Ltd.*, 2006 BCSC 1132, [2006] B.C.J. No. 1705 (B.C. S.C.) at para. 45 and *Tracy v. Instaloans Financial Solutions Centres (B.C.) Ltd.*, 2006 BCSC 1018, [2006] B.C.J. No. 1639 (B.C. S.C.) at paras. 55-56.

59 In her certification reasons in *Peter*, Justice Hoy accepted the defendants' submission, relying on *Heward* and *Boulanger* on this point, that the punitive damages inquiry could be bifurcated between a preliminary consideration of the defendants' conduct and plaintiffs' entitlement, and a subsequent and final determination of liability for, and quantum of, punitive damages after an assessment of the compensatory damages. In her view, the common issue as phrased did no more than speak to entitlement and would also determine entitlement to punitive damages in the event the plaintiffs were successful in the waiver of tort claim and elected disgorgement. The punitive damages question that was certified in that case was: "Should one or both of the defendants pay punitive damages to the class?"

60 However, in the recent decision in *Robinson v. Medtronic Inc.*, [2009] O.J. No. 4366 (Ont. S.C.J.), Justice Perell, relying on *Whiten*, refused to certify punitive damages as a common issue on the basis that it was not an appropriate common issue in circumstances in which individual causation and damages issues will not be resolved at the common issues trial. He acknowledged the "impressive list of cases" in which it had been held that punitive damages were a suitable common issue, but declined to follow them either because they were distinguishable or had been wrongly decided on his interpretation of *Whiten*.

61 The above discussion on punitive damages is drawn from my reasons in *Andersen v. St. Jude Medical Inc.*, [2010] O.J. No. 8 (Ont. S.C.J.) where the defendants moved to bifurcate the certified common issue on punitive damages, which was: "Does the defendants' conduct merit an award of punitive damages, and if so, in what amount?" In this case, proposed common issue (m) asks: "Does the conduct of the defendants, or any of them, justify an award of punitive damages in the circumstances?" In my view, this is an appropriate common issue to certify as it focuses on the defendants' conduct and the plaintiffs' presumptive entitlement to an award. Proposed common issue (n) asks: "If the answer to (m) is yes, what is the amount of punitive damages to be awarded?" I would slightly amend proposed common issue (m) to read: "Should an award of punitive damages be made against the defendants? If so, in what amount?" This issue can be certified, but it can only be answered after the conclusion of all proceedings by individual class members and the quantification of compensatory damages. In my view, this approach, which is the one I adopted in *St. Jude*, is consistent with the approach contemplated by Ontario courts in *Heward*, *Boulanger* and *Peter* and by the courts of British Columbia and is the one that should be followed here.

#### 5(1)(d) - Preferable Procedure

62 In *Hollick*, Chief Justice McLachlin, said that the CPA is to be construed generously and directed lower courts to avoid taking an overly restrictive approach to its interpretation at the certification stage. The court found that the preferability requirement can be met even where there are substantial individual issues. At least since the 2004 decision of the Ontario Court of Appeal in *Cloud*, it has been recognized that determining preferability requires a qualitative and not quantitative inquiry and that it is essential to assess the importance of the common issues in relation to the claim as a whole. The *Hollick* principles were summarized by Rosenberg J.A. in *Markson v. MBNA Canada Bank*, 85 O.R. (3d) 321, [2007] O.J. No. 1684 (Ont. C.A.) at paras. 69 - 70:

- a) The preferability inquiry should be conducted through the lens of the three principal advantages of a class proceeding: judicial economy, access to justice and behaviour modification;
- b) "Preferable" is to be construed broadly and is meant to capture the two ideas of whether the class proceeding would be a fair, efficient and manageable method of advancing the claim and whether a class proceeding would be preferable to other procedures such as joinder, test cases, consolidation and any other means of resolving the dispute; and,
- c) The preferability determination must be made by looking at the common issues in context, meaning, the importance of the common issues must be taken into account in relation to the claims as a whole.

As I read the cases from the Supreme Court of Canada and appellate and trial courts, these principles do not result in separate inquiries. Rather, the inquiry into the questions of judicial economy, access to justice and behaviour modification can only be answered by considering the context, the other available procedures and, in short, whether a class proceeding is a fair, efficient and manageable method of advancing the claim.

63 This is a case where the resolution of the common issues is substantially determinative of the liability of the defendants to the class and would achieve each of the above objectives of a class proceeding. The defendants' objections essentially reprise the arguments I have already rejected, namely that the claims are overwhelmingly individual rather than common. Individual proceedings to resolve the claims would be unnecessarily duplicative, expensive and inefficient. The only other procedure that is proposed is to stay the class proceeding until such time as the tax appeals in the Tax Court have been finally determined. In support of this submission, the defendants rely on my decision in *Hester v. Canada*, [2007] O.J. No. 4719, [2008] 3 C.T.C. 44 (Ont. S.C.J.), leave to appeal refused, [2008] O.J. No. 634 (Ont. Div. Ct.), aff'd, [2008] O.J. No. 3557, 2008 ONCA 634 (Ont. C.A.). Reliance on this decision is misplaced.

64 The claims in *Hester*, which is a proposed class action not yet certified, related to the availability of tax exemption rights for aborigines under s. 87 of the *Indian Act*, R.S.C. 1985, C. I-5. Initially, these claims were joined in an individual action brought by Roger Obonsawin. In 2002, an order was made severing these actions. The actions had their genesis in a decision of CRA in 1993 that it intended to change the manner in which it administered s. 87 of the *Indian Act*, following the decision of the Supreme Court of Canada in *Williams v. R.*, [1992] 1 S.C.R. 877 (S.C.C.). In 1994, CRA issued new guidelines effective for the 1995 taxation year. The change affected the availability of tax exemption rights for some members of the aboriginal community. Members of the community protested, but an agreement was reached between them and CRA to, among other things, expedite the consideration by the courts of challenges to the 1994 guidelines. Between 1998 and 2007, four test cases made their way to the Federal Court and some of them, through various appeals, to the Supreme Court of Canada. The cases resulted in the tax exemption claims being denied. Appeals in two of the test cases may still be pending in the Federal Court of Appeal.

65 Beginning in February 2006, CRA sent letters to those aboriginal taxpayers who were affected by CRA's 1994 guidelines on the understanding that they intended to be governed by the outcome of the test cases. They were asked to advise which of the test cases was reflective of their situation. When they declined to do so, CRA issued Notices of Confirmation that confirmed the income tax assessments to Mr. Hester and about 1200 other aboriginal taxpayers. This resulted in the taxpayers filing Notices of Appeal. The Chief Justice of the Tax Court is case managing all of these appeals, which were proceeding at the time of the hearing of the motions in *Hester*.

66 In *Hester*, the plaintiff moved to amend the statement of claim as a result of the severance of the class action from the Obansawin action. The defendants objected to certain of the amendments and moved to stay the action on the basis that the matters covered in the claim were the subject of the other proceedings that I have referred to. In granting the motion for stay until the tax appeals in the Tax Court and any appeals arising from them were finally determined, it was my finding that each of the causes of action asserted in the *Hester* action was founded on the entitlement of the plaintiff and class members to tax exemption rights and that the tort and equitable claims had no independent foundation, but were derivative of the determination of liability for tax. I said at para. 59:

In my view, this action represents an attempt by Hester [and class members] to turn a question of tax liability into a mass tort claim against the Crown and 15 of its employees when two other courts - the Federal Court and the Tax Court - are already adjudicating the real dispute between the parties.

67 This is a completely different case. For one thing, there are no tax appeals pending before the Tax Court of Canada, although class members were entitled to file Notices of Appeal 90 days after receiving a notice of reassessment and could have pursued tax appeals, with or without the assistance of Banyan Tree more than two years ago. Banyan Tree has taken some initial steps to assist class members with the filing of Notices of Objection, including retaining counsel, but has made no commitment to assist class members financially with the legal costs of individual appeals once the fund it established for legal expenses is exhausted. In September 2008, Banyan Tree's charitable status was revoked. Rochester admits and informed donors that the security deposit account investments were subject to a fraud resulting in a significant loss on these investments. This raises concerns about staying this action in favour of a lengthy and uncertain outcome in another forum that has not yet begun and that Banyan Tree has told donors will be litigated all the way to the Supreme Court of Canada and "will take years to clear the courts." *Hester* illustrates that this prospect is not far-fetched

68 While class actions may not be speedy, they do have the advantage of case management and the ongoing supervision of a dedicated judge. More fundamentally, the ultimate disposition of any tax appeals will not be determinative of the causes of action or compensate class members for the damages they seek. Clearly, the Tax Court cannot adjudicate the enforceability of the promissory notes that class members executed. It cannot adjudicate claims for damages for negligence and breach of contract or for punitive damages. Unlike *Hester*, these are independent causes of action and remedies that are not derivative of entitlement to a tax exemption. Contrary to the submission of the defendants, it is not the class action that is premature. Rather, it is the motion for stay that is premature.

69 The issues in this action do not become moot if the Tax Court determines that the reassessments are proper and that CRA's determination that the gift program is a sham is correct. If, on the other hand, tax appeals are pursued and finally determined in favour of class members, it is possible that some aspects of this action may be resolved through that process. In that event, the motion for stay can be renewed, but at this point, that prospect is sufficiently speculative and uncertain that a class action is very clearly the preferable procedure for resolving the claims of class members. Even if I were to accept that the outcome of the tax appeals is determinative of the claims advanced in this action (which I do not), a class action achieves judicial economy by make binding determinations affecting the rights of 2,825 individuals in one proceeding. It achieves behaviour modification by holding corporations and law firms accountable for the promotion of allegedly sham investments and it facilitates access to justice for litigants who would not bring individual claims.

70 The plaintiffs have therefore satisfied this requirement for certification.

*5(1)(e) - A representative plaintiff with a workable litigation plan*

71 The final requirement for certification is that there be a representative plaintiff who would fairly and adequately represent the interest of class members, has produced a suitable litigation plan and does not have a conflict of interest, on the common issues, with other class members.

72 There are two objections to the adequacy of the proposed representative plaintiffs: (1) that they did not participate in the gift program in 2006 and 2007; and (2) alleged conflicts between their evidence and the evidence of their witnesses as

to representations that were made concerning the liability for repayment of the loans. As to the first objection, Mr. Thiessen acknowledged that there were no material differences in the gift program during the years it was sold or in the contracts between class members and the gift program defendants. A finding in the plaintiffs' favour on the common issues on breach of contract and/or negligence would resolve these issues for all years of the program. As to the second objection, the trial of this action will focus on the conduct of the defendants - whether they were negligent, and whether the gift program defendants entered into contracts with class members on the express or implied terms that are alleged. The so-called differences arising from the evidence does not impact on the common issues that will resolve these claims and therefore does not affect the plaintiffs' ability to adequately and fairly represent the class. If I am wrong, sub-classes can be created as in *Peppiatt* or the defendants can bring a motion to decertify the action.

73 In my view, the main purpose of a litigation plan at certification is to demonstrate to the court that the plaintiffs have turned their minds to how the action will proceed and be managed. Defendants frequently raise arguments on manageability as an obstacle to certification both under the preferable procedure requirement and also as a deficiency in the litigation plan. A deficient litigation plan that cannot be remedied can reveal that the action is unmanageable and therefore is not the preferable procedure. In *Bellaire* at para. 53, Nordheimer J. provided a non-exhaustive "shopping list" of matters that ought to be addressed in a litigation plan. The litigation plan attached as an exhibit to the affidavit of Kathryn Robinson addresses many of these matters and provides a reasonable framework for the prosecution of this action. A litigation plan is not intended to determine the procedures that will be actually employed in resolving individual issues. The litigation plan is sufficient so long as it provides enough detail to satisfy the court that the plaintiffs have given the procedures some thought and that the plan's suggestions are workable. The litigation plan here provides an adequate proposal for the efficient, fair and manageable prosecution of this action. The plaintiffs have therefore met the final requirement for certification.

#### *Conclusion*

74 As I am satisfied that the plaintiffs have met each of the requirements of s. 5 of the CPA, this action will be certified as a class proceeding on such terms as these reasons provide. The motions for stay and for an order under rule 51.06 are dismissed. If the parties are unable to agree on the costs of the motions, they are to agree on a schedule for the exchange of written submissions and arrange to have these delivered to me within 60 days.

*Motion granted; cross-motions dismissed; action certified as class proceeding.*

**Headnote**

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiffs brought action against promoters of gift program and law firm as result of determination by Canada Revenue Agency that program was sham, and that resulted in disallowance of tax benefits — Plaintiffs brought motion for certification of action as class proceeding, program promoters brought cross-motion to stay action, and law firm brought cross-motion to dismiss claims against it — Law firm disputed existence of cause of action against it since plaintiffs did not read or rely on its opinion about legitimacy of gift program — Motion was granted and cross-motions were dismissed; action was certified as class proceeding — Defendants brought application for leave to appeal certification — Application dismissed — No reason to doubt correctness of orders in issue — Further, mere decision to let action stand and to certify as class action should not unduly trouble profession.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiffs brought action against promoters of gift program and law firm as result of determination by Canada Revenue Agency (CRA) that program was sham, and that resulted in disallowance of tax benefits — Plaintiffs brought motion for certification of action as class proceeding, program promoters brought cross-motion to stay action, and law firm brought cross-motion to dismiss claims against it — Defendants' main objection was that insufficient commonality existed to permit class proceeding — Motion was granted and cross-motions were dismissed; action was certified as class proceeding — Defendants brought application for leave to appeal certification — Application dismissed — No reason to doubt correctness of orders in issue — Further, mere decision to let action stand and to certify as class action should not unduly trouble profession.

#### ***M. Dambrot J.:***

1 The defendants (the "gift program defendants") other than Fraser Milner Cosgrain ("Fraser") seek leave to appeal to the Divisional Court the order of Lax J. dated January 19, 2010 granting the plaintiffs' motion to certify an action pursuant to s. 5 of the *Class Proceedings Act, 1992* (the "CPA"). Fraser brings a motion for the identical relief, and also for leave to appeal the order of Lax J. of the same date dismissing Fraser's motions to dismiss the action under rules 21 and 51.06 of the *Rules of Civil Procedure*.

#### **Background**

2 The plaintiffs brought the proposed class proceedings on behalf of 2,855 individuals who participated in a charitable gift program for the taxation years 2003 to 2007. They seek damages and declaratory relief against the promoters of the program and Fraser as a result of the disallowance by the Canada Revenue Agency ("CRA") of the tax benefits that the plaintiffs allege

they were to have received. CRA has determined that the gift program was a sham. As a result, proposed class members have been or will be reassessed and required to pay taxes and interest on arrears arising from the reassessment.

3 The plaintiffs allege that the gift program defendants are in breach of contract and were negligent in failing to provide a charitable donation receipt that would be recognized by CRA and in failing to ensure that class members would not be at risk to repay the loans that were obtained in order to facilitate their participation in the program. They allege that Fraser's tax opinions were necessary and instrumental to the marketing of the gift program and that the law firm was negligent in the preparation of these opinions.

4 The program was structured as a mechanism for Banyan Tree, which was a charitable foundation, to provide donations to various charities using donations from participants in the gift program. The program was marketed and promoted by Promittere Capital and Promittere Asset.

5 Participants were solicited by a network of financial advisors who promoted and sold the gift program to individuals on behalf of Banyan Tree. Each year, Banyan Tree produced information about the program which it provided to soliciting agents. It did not instruct the soliciting agents to distribute the information documents to potential participants. In fact, some participants did not receive any such documents.

6 Each participant in the program executed a pledge, loan application, power of attorney and promissory note which set out the terms and conditions of the program. Through these documents, the participant would pledge a donation of a specified amount to Banyan Tree, and would borrow approximately 85% of the pledge from Rochester. The pledge would be evidenced by the promissory note. The participant would also pay a "security deposit" in respect of the loan to Rochester. The security deposit would be invested to create growth. The growth of the security deposit, if any and if sufficient, would be used to pay interest and income taxes owed on the growth and to reduce the principal amount of the loan. It was contemplated that Rochester would acquire an insurance policy that would insure the risk that the security deposit would not be sufficient to repay the loans. The participant would receive a charitable donation tax receipt for the full amount of the pledge.

7 Fraser delivered opinion letters dated October 23, 2002 and September 5, 2003 to Promittere Asset relating to the tax status of the program for 2003. According to the opinion letters, Fraser was permitting Promittere Asset and prospective participants who were provided a copy of the letter by Promittere Asset or by the participant's authorized representative, and no one else, to rely on the letters. After describing the proposed transactions and summarizing its assumptions, Fraser stated its opinion in each letter as follows:

### **Opinion**

Although the matter is not free from doubt, in our opinion, as of the date hereof, the Cash Donation will constitute a gift to a registered charity for purposes of the Act and will entitle the Donor to a tax credit in respect of the Cash Donation under section 118.1 of the Act.

8 Fraser then proceeded to explain the basis of its position in each letter.

9 Fraser warned readers of the letter that no assurances were being given, that CRA might not agree with its opinion, that CRA might change its practices retroactively, that no advanced ruling had been obtained, that the opinion was based on assumptions of fact and law that Fraser had not verified, and that each participant should review the opinion and their circumstances with their professional tax advisor.

10 Fraser gave no opinions in respect of the 2004 to 2007 gift programs.

11 The Robinsons admitted in cross-examination that they did not obtain or read the Fraser opinions. They relied on their financial advisor's advice about the program. Their advisor did show them a copy of one of Fraser's letters, but only in 2003, and told them that "a large lawyer company" had signed it saying that they believed that the program was a safe way to go, and

there would be no problems. They were not told that there were limitations or qualifications in the letter. Other potential class members who swore affidavits in support of the certification motion gave similar evidence during cross-examination.

12 It is the position of CRA that the program involved no valid gift; that the program is a tax shelter; that the loan is a limited-recourse loan; that the program avoids the General Anti-Avoidance Rules; that the participants agreed to participate on the understanding that they were not at risk for more than their cash outlay; that the program was promoted on the basis that the participants would receive a tax credit that would result in a net positive cash position; that the *gift program defendants* acted in concert and not at arms length; that they had a common intention to deceitfully give the appearance of legal relations that masked the true purpose of the scheme: to sell tax credits at a profit and that the program was a sham involving a circular flow of funds that occurred on the same day calculated to give the appearance of a legitimate loan and donation when in fact this did not occur.

## The Issues

13 The gift program defendants raised numerous issues in their factum. In argument, however, they took a much more limited approach. In essence, they argued that Lax J. erred in concluding that this was an appropriate case for certification because the five part test for certification was not met. Specifically, they argued that s. 5(1)(c) was not met: the claims of the class members did not raise common issues. The fundamental basis for their submission was the argument that there was uncontradicted evidence of significant divergent practices by multiple advisors at the point of sale and no evidence to support an inference of the development and deployment of a standard sales pitch. The plaintiffs' effort to repackage a point-of-sale misrepresentation scheme as a uniform breach of contract case must fail.

14 The core of Fraser's argument related to the question whether the pleadings raised a cause of action against them. They submitted that Lax J. erred in concluding that they did. They argued that no facts were pleaded to support either reasonable foreseeability or sufficient proximity between the plaintiffs and Fraser to justify the imposition of a duty of care by Fraser to the plaintiffs. They further argued that since the plaintiffs neither read nor relied on their opinions, causation cannot be established. This is really a negligent misrepresentation claim that founders for lack of reliance on the shoals of causation.

## Analysis

### *The gift program defendants*

15 Lax J. well understood the argument raised by the gift program defendants. She began by discussing the law in relation to the requirement of commonality in class actions. She said:

38 The core of a class action is commonality. For an issue to be common, it must be a substantial ingredient of each class member's claim and its resolution must be necessary to the resolution of each class member's claim: *Hollick v. Toronto (City)*, 2001 SCC 68, [2001] 3 S.C.R. 158 at para. 18. An issue will not be common if its resolution is independent upon individual findings of fact that have to be made with respect to each individual claimant. *Fehringer v. Sun Media Corp.*, [2002] O.J. No. 4110, 27 C.P.C. (5th) 155 (Sup. Ct.), aff'd, [2003] O.J.No. 3918, 39 C.P.C. (5th) 151 (Div. Ct.). The underlying question is whether the resolution of a proposed common issue will avoid duplication of fact-finding or legal analysis: *Western Canadian Shopping* at para. 39.

39 Section 6 of the CPA is clear that where the relief claimed includes a claim for damages, certification should not be refused because this would require individual assessment after the determination of the common issues or because the relief claimed relates to separate contracts involving different class members or because different remedies are sought for different class members. Common issues need not determine liability, but need only be issues of fact or law that will move the litigation forward. Many individual issues may remain to be decided after the resolution of a common issues trial: *Hollick* at para. 16; *Cloud* at para. 52; *Cassano v. Toronto-Dominion Bank* (2007), 87 O.R. (3d) 401 (C.A.) at paras. 60-63, leave to appeal to S.C.C. refused, [2008] S.C.C.A. No. 15. The common issues requirement is not a high legal hurdle, but a plaintiff must adduce some evidence to show that there is a basis in fact that issues are common: *Hollick* at para. 25.

16 After listing the proposed common issues, she identified the argument made by the gift program defendants, stating:

41 The gift program defendants argue that this is a point-of-sale representation case as in *Williams v. Mutual Life Assurance Co. of Canada* (2000), 51 O.R. (3d) 54 (Sup. Ct.); *Kumar v. The Mutual Life Assurance Co. of Canada et al.*, [2003] O.J. No. 1160, [2003] I.L.R. I-4181 (Ont. C.A.) and *Bellaire v. Independent Order of Foresters* (2004), 5 C.P.C. (6th) 68 (Ont. Sup. Ct.). See also, *Controltech Engineering Inc. v. Ontario Hydro*, [1998] O.J. No. 5350, 72 O.T.C. 351 (Sup. Ct.).

42 In each of these cases, certification was refused. *Williams* and *Kumar* were pleaded on the basis of negligent misrepresentation, which the plaintiffs acknowledge can be problematic in a class action. *Controltech* was also a misrepresentation case. In *Bellaire*, the plaintiffs alleged breach of contract and sought to certify common issues on contractual interpretation, but Nordheimer J. found that the claims, at their heart, were claims of negligent misrepresentation. In coming to that conclusion, he referred to the plaintiff's evidence that the plaintiff had been "induced" to purchase the life insurance policy in question based on representations made to him by the defendant's agent. As well, the draft litigation plan explicitly stated that the "the substantive and determinative common issue turns on whether or not there was a misrepresentation which induced the plaintiff to enter the contract." Nordheimer J. found that the case suffered from the same problem which Cumming J. found to exist in *Kumar* and with which Rosenberg J.A. expressly agreed when he referred with approval at para. 48 of *Kumar* to Cumming J.'s statement:

While the theories of liability can be phrased commonly the actual determination of liability for each class member can only be made upon an examination of the unique circumstances with respect to each class member's purchase of a policy (at para.39).

17 She then explained, with great care, and with a detailed examination of the evidence, why she did not accept the argument of the gift program defendants, and concluded that the proposed common issues in both contract and negligence relating to the gift program defendants were appropriate for certification. (See paragraphs 43-53 of her reasons.)

18 The gift program defendants dispute her conclusions. They say that she erred in her appreciation of critical facts, distinguished analogous and applicable cases and inappropriately relied on *obiter* comments in other cases. I do not propose to rehearse the details of this argument. It is sufficient to say that I am not satisfied that there is good reason to doubt the correctness of her analysis, or that the cases she distinguished are necessarily in conflict with her decision. More importantly, I do not believe that it is desirable that leave to appeal this highly fact-driven judgment be granted, or that the proposed appeal, again bearing in mind its highly fact-driven nature, involves matters of such importance that leave to appeal should be granted.

#### ***Fraser***

19 Lax J. had a clear understanding of Fraser's argument as well. She summarized it as follows:

16 The gift program defendants do not dispute that the statement of claim discloses causes of action against them in contract and negligence, and I am satisfied that it does. The contested issue is whether the pleading discloses a cause of action in negligence against FMC.

17 The plaintiffs plead that the opinion letters were a necessary prerequisite to the promotion and sale of the gift program, without which, the gift program could not have been launched. They plead that all class members were advised of their existence, that some received copies, that the opinion letters were referred to in promotional materials marketing the program and that they were an express term of the loan arrangements between the gift program participants and Rochester. The particulars of the claim in negligence against FMC are pleaded in paragraph 69(B) of the statement of claim:

#### **Negligence**

69. The plaintiffs and class members state that the defendants were negligent, particulars of which are as follows:

**(B) FMC**

- (i) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program Defendants, without due care and consideration, when it knew or ought to have known that the Gift Program Defendants would rely upon and publish the existence of the Opinion Letters in promoting the Gift Program;
- (ii) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program Defendants, without due care and consideration, when it knew or ought to have known that the Gift Program Defendants would rely upon the accuracy and reliability of the Opinion Letters in promoting the Gift Program;
- (iii) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program participants as well as their authorized representatives, without due care and consideration, when it knew or ought to have known that the Gift Program participants would rely upon the existence of the Opinion Letters in deciding whether to participate in the Gift Program;
- (iv) issued the Opinion Letters with the expressed intention that the Opinion Letters be relied upon by the Gift Program participants as well as their authorized representatives, without due care and consideration, when it knew or ought to have known that the Gift Program participants would rely upon the accuracy and reliability of the Opinion Letters in deciding whether to participate in the Gift Program;
- (v) failed to properly investigate and consider the income tax consequences of participation in the Gift Program;
- (vi) was negligent in the preparation of the Opinion Letters;
- (vii) knew or ought to have known that the Opinion Letters were a necessary prerequisite for the promotion and sale of the Gift Program and that but for the Opinion Letters the Gift Program could not be undertaken, yet it failed to fully and properly investigate and accurately opine;
- (viii) knew or ought to have known that the Opinion Letters were no longer accurate or reliable following: the issuance by Canada Revenue Agency of its Fact Sheets in November and December, 2003, and November, 2005, the legislative changes announced on December 5, 2003; and, the Canada Revenue Agency issued Taxpayer Alerts in November, 2005 and October, 2006;
- (ix) failed to notify the Gift Program Defendants, prospective donors and existing participants in the Gift Program that its Opinion Letters were no longer accurate and reliable; and
- (x) knew or ought to have known that the Gift program Defendants continue to rely upon and publish the existence and content of the Opinion Letters for the promotion and sale of the Gift Program to prospective donors and participants despite its knowledge that these Opinion Letters are no longer accurate or reliable.

18 The plaintiffs also plead in the following paragraphs that

70. FMC was negligent in the issuance of the Opinion Letters, the issuance of which was a necessary prerequisite for the promotion of the Gift Program by the Gift Program Defendants. Accordingly, the FMC's issuance of the Opinion Letters was the proximate cause of damages to Class Members.

71. FMC owed a duty of care to those whom it intended to, or knew or ought to have known would, rely upon the existence and/or accuracy and reliability of the content of the Opinion Letters it issued.

78. FMC had a duty to warn the Gift Program Defendants and Class Members and to make full disclosure to them as to the facts and circumstances set out above and failed to do so. Particularly, FMC failed to notify the Gift Program Defendants and Class members that the Opinion Letters were no longer accurate or reliable.

81. All defendants failed to take proper steps to fully investigate the Gift Program to ensure that the Canada revenue Agency would in fact recognize the charitable donation receipts issued and tax credits claimed.

19 On a motion under rule 21 and in considering s. 5(1)(a) of the CPA, no evidence is admissible. However, a motions judge may have regard to documents specifically referred to and incorporated by reference into the pleading in order to assess the substantive adequacy of the claim: *Web Offset Publications Ltd. v. Vickery* (1999), 43 O.R. (3d) 802 (Ont. C.A.); *Corktown Films Inc. v. Ontario* (1996), 18 O.T.C. 308, 66 A.C.W.S. (3d) 868 (Ont. Gen. Div.); *Montreal Trust Co. of Canada v. Toronto Dominion Bank* (1992), 40 C.P.C. (3d) 389 (Ont. Gen. Div.). As the opinion letters are specifically referred to and relied on in the pleading, I may consider them.

20 The opinion letters are dated October 23, 02, and September 5, 03, and are addressed to the attention of Mr. Thiessen as President of Promiterre Asset. FMC did not structure the gift program, but the program's structure was integral to the opinion FMC rendered that the donation made partly in cash from the participant's own resources and partly from a loan from Rochester would qualify as a valid charitable donation for tax purposes. If that opinion was given negligently as is alleged, it could, subject to the arguments discussed below, support the plaintiffs' claim in negligence against FMC.

21 FMC submits that a duty of care cannot be created based on the fact that an opinion was prepared, when its contents were never read or relied upon by anyone. They say that the allegations against FMC arise from the existence and the contents of the letters and that, in substance, the claim is made for negligent misrepresentation. I disagree. The claim is not pleaded on the basis that the plaintiffs read or relied upon the FMC letters, but on the basis that FMC issued the opinion letters with the expressed intention that they be relied upon by the gift program defendants and knowing that the gift program defendants would rely upon and publish the existence of the opinions in promoting the gift program.

22 FMC points out that the letters contained express qualifications on the opinion and authorized reliance by a very limited category of individuals and disclaimed reliance by any other person, without FMC's prior written consent. The letters state:

The opinions expressed in this letter may be relied upon by you, and by a Donor who is provided a copy of this letter by you, or the Donor's authorized representative, and may not be relied on by anyone else without our written permission.

23 FMC submits that, given this language, it could not be reasonably foreseeable to FMC that individuals like the plaintiffs who did not receive or read the FMC letters would sustain damages as a result of the opinions expressed in them. It says that the result is that there was no relationship between FMC and the plaintiffs sufficiently close to satisfy the first part of the *Anns* test for duty of care (*Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.)). This submission overlooks that the limitation on reliance does not qualify in any way Promiterre's ability to rely on the opinions expressed in the letters. In fact, the letters specifically permit Promiterre's reliance and it is alleged that the gift program defendants did rely on the opinions to launch and sell the program.

20 In response to this submission, in addition to what she said in paragraphs 21 and 23 in the course of summarizing Fraser's argument, Lax J. stated:

24 The allegation is not that FMC provided the letters intending that they be read and relied upon by the plaintiffs and proposed class members, although some may have done so, but rather that FMC provided the letters (1) with the intention that they be used by the gift program defendants in the manner the plaintiffs allege, namely to market the program as one in which proposed class members would receive a charitable tax receipt recognized by CRA; and (2) with the intention and knowledge that the existence of a tax opinion would inform the decision of class members about whether or not to participate in the gift program. If these allegations are made out at trial, it is not plain and obvious that they could not support a duty to take care that the opinions expressed in the letters were accurate and reliable and that a failure to take such care or a failure to warn was the proximate cause of the losses the plaintiffs allege they suffered.

25 To put this in a different way, the reliance the plaintiffs allege is not on the tax opinion *per se*, but on there being a tax opinion that FMC intended and knew would be used by the gift program defendants to support the legitimacy of the gift program for income tax purposes and would be relied upon by the class members in deciding whether or not to participate. I would therefore not give effect to FMC's argument that this is a negligent misrepresentation claim "dressed up" as a negligence claim. It is properly pleaded as a negligence claim and the essential elements of the cause of action - duty, foreseeability, proximity, breach, and damage - are present. The express qualifications on the opinion are not matters to be considered at the certification stage.

26 The question then is whether it is plain and obvious that a claim in negligence against FMC cannot possibly succeed. The plaintiffs have not pleaded and cannot plead any direct relationship with FMC, but there is precedent, as discussed below, for advancing a class action claim in negligence against a law firm even though generally, a lawyer owes a duty of care only to the lawyer's client: *Baypark Investments Inc. v. Royal Bank* (2002), 57 O.R. (3d) 528 at paras. 23 and 33 (Sup. Ct.), aff'd, [2002] O.J. No. 4377 (C.A.); *Elms v. Laurentian Bank of Canada*, 2004 BCSC 1013, 35 B.C.L.R. (4th) 373 (S.C.) at paras. 63-65, aff'd, 2006 BCCA 86.

27 In *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman* (2001), 18 B.L.R. (3d) 240, [2001] O.J. No. 4622 (Sup. Ct.) ["YBM"], the plaintiffs advanced claims in both negligent misrepresentation and negligence against a law firm and one of its lawyers for alleged misrepresentations in a prospectus. Cumming J. rejected the negligent misrepresentation claim because the plaintiffs' investment preceded the public offering negating any reliance on the prospectus. However, applying the principles set out in *Hercules Managements Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 and *Anns v. Merton*, he held that the pleading disclosed sufficient facts to give rise to a *prima facie* duty of care and that by enabling the public offering to come to fruition through the prospectus, it was arguable that the law firm and the lawyer could be found negligent. He concluded that a factual record was necessary to decide whether there were policy considerations that ought to negative or limit the scope of any duty of the law firm and lawyer in question.

28 In the earlier decision of *Delgrossio v. Paul* (1999), 45 O.R. (3d) 605 (Gen. Div.), Sharpe J. (now, Sharpe J.A.), similarly found that a negligence claim in a class action brought against a solicitor on behalf of investors disclosed a cause of action. In doing so, he reviewed the "developing line of authority" holding that a solicitor may place himself or herself in a sufficient relationship of proximity to a third party to owe that party a duty of care: *Filipovic v. Upshall* (1998), 19 R.P.R. (3d) 88 (Ont. Gen. Div.); *Whittingham v. Crease & Co.*, [1978] 5 W.W.R. 45 (B.C.S.C.); *Tracy v. Atkins* (1979), 105 D.L.R. (3d) 632 (B.C.C.A.); *Linsley v. Kirstiuk* (1986), 28 D.L.R. (4th) 495 (B.C.S.C.).

29 In *Elms v. Laurentian Bank of Canada*, 2001 BCCA 429, 90 B.C.L.R. (3d) 195, affirming (2000), 73 B.C.L.R. (3d) (S.C.), which was also a class action brought by investors against a solicitor and relied upon by Cumming J. in *YBM*, the British Columbia Court of Appeal affirmed the decision of the motions judge to certify the action. The court also reviewed the so-called "disappointed beneficiary" cases such as *Whittingham* and *Tracy* and quoted liberally from

Justice Sharpe's reasons in *Delgrosso* in concluding that although the investors' argument was novel, it could not be said that it was plain and obvious that it would fail.

30 Notwithstanding the efforts of counsel for FMC to confine these cases to their facts and to distinguish them, there is clearly a developing line of authority in Ontario and elsewhere that have permitted claims of this kind to proceed. FMC pointed to no authority that rejected a third party negligence claim against lawyers at the certification stage. I regard *Hurst v. Price Waterhouse Coopers (PWC) LLP, Canada*, [2009] O.J.No. 1415 on which FMC relies as entirely distinguishable. This was a claim for negligent misrepresentation, reckless misrepresentation, and negligence in which the allegedly wrongful act by PWC amounted only to having its name appear as auditor on an offering memorandum. This was found insufficient to establish a relationship giving rise to a *prima facie* duty of care.

31 Whether or not the plaintiffs and proposed class members are akin to disappointed beneficiaries, it is certainly arguable that FMC ought reasonably to have foreseen that its tax opinion would be used to market the gift program and that the participants would be "disappointed" and suffer damages if FMC was negligent in giving that opinion. In my view, FMC placed itself in a relationship of sufficient proximity to owe a *prima facie* duty of care to the plaintiffs and proposed class members and I would leave to trial the question of whether policy considerations ought to negative that duty.

21 I confess to having difficulty in the understanding the rationale relied on by Lax J. for her conclusion that this is not a negligent misrepresentation case dressed up as a negligence case. I have reference, in particular, to the following:

To put this in a different way, the reliance the plaintiffs allege is not on the tax opinion *per se*, but on there being a tax opinion that FMC intended and knew would be used by the gift program defendants to support the legitimacy of the gift program for income tax purposes and would be relied upon by the class members in deciding whether or not to participate.

22 I find it impossible to separate reliance on the opinion, and reliance on there being an opinion. In the circumstances of this case, one can only take comfort from the existence of an opinion if one is told, or reasonably infers, that the opinion is a positive one, that is, one that supports the appropriateness of the scheme. This takes us full circle in short order. Reliance on there being an opinion can only mean reliance on the assumed content of the opinion.

23 That said, I do not believe that the passage in the reasons of Lax J. that concerns me is determinative of this application. In the end, I think that my quibble is probably mere semantics. It does not undermine her conclusion that this is not a negligent misrepresentation case dressed up as a negligence case. It is arguable that reliance by the plaintiffs on the existence of a positive opinion given by Fraser to the gift program defendants supports their claim against Fraser in negligence. In my view, the words of Sharpe J., as he then was, at paragraph 10 of his judgment in *Delgrosso v. Paul* (1999), 45 O.R. (3d) 605 (Ont. Gen. Div.), one of the many cases relied on by Lax J., are apposite:

The defendant also submits that there can be no cause of action for breach of duty, whether as a solicitor or as a fiduciary, absent a plea of reliance by the plaintiff on his advice. While the plaintiff does not allege direct reliance on the solicitor, it seems to me at least arguable that where a party invests money in an RRSP to be invested in mortgages, the reliance the party places on the trustee or other advisors to ensure that adequate steps are taken to protect his interests may be adequate to support a claim against the solicitor retained by the trustee or advisor, particularly where the solicitor is aware of the identity of the party and the nature of the party's interest: see *White v. Jones*, [1995] 1 All E.R. 691 (H.L.).

24 Here, equally, the absence of direct reliance by the plaintiffs on the solicitor's advice may not be determinative. Even without direct reliance on the advice, it remains arguable that when the plaintiffs entered the scheme, they were relying on the legal advisors of the architects of the scheme to ensure that their pledges would qualify as valid charitable donations for tax purposes. If the legal advisors acted negligently in giving their advice to the gift plan defendants, the plaintiffs could have a claim in negligence against those legal advisors.

25 While it may be, particularly taking into account the qualifications and reservations expressed in Fraser's opinion, that the claim against Fraser will ultimately fail, I cannot say that there is good reason to doubt the correctness of the orders in issue,

namely, the order to certify as against Fraser, the order to decline to strike the pleadings against Fraser and the order refusing to strike the claim against Fraser.

26 What is more, and in any event, I am not of the view that this appeal involves matters of such importance that leave to appeal should be granted. Fraser raised the concern that this judgment is dismaying to lawyers. It signals to them that they may be in greater jeopardy of being sued by persons who are not their clients, and have not read their opinions, than by clients who have read their opinions. While I have some sympathy for this concern, I do not think that the mere decision to let this action stand, and to certify it as a class action should unduly trouble the profession.

### **Disposition**

27 The motions for leave to appeal are dismissed. The respondents will have 15 days from the date of release of this decision to serve and file brief written submissions as to costs. The respondents will have 15 days from the receipt of those submissions to serve and file their brief written submissions.

*Application dismissed.*

Practice --- Parties — Representative or class actions — General

Plaintiffs met requirements for certification of class proceeding by former students in provincial residential school under s. 4 of Class Proceedings Act — Both commonality and preferability requirements were satisfied — All class members shared interest in question of whether province breached duty of care — Appropriateness and amount of punitive damages was amenable to resolution as common issue — Class proceeding would be fair and efficient method of advancing claim — Common issues predominated over those affecting individual class members, and individual actions would require proof of common elements — Individual compensation program established by province did not provide adequate alternative — Class Proceedings Act, R.S.B.C. 1996, c. 50, ss. 4, 4(1)(c), 4(1)(d).

Practice --- Parties — Representative or class actions — Procedural requirements

Plaintiffs met requirements for certification of class proceeding by former students in provincial residential school under s. 4 of Class Proceedings Act — Both commonality and preferability requirements were satisfied — All class members shared interest in question of whether province breached duty of care — Appropriateness and amount of punitive damages was amenable to resolution as common issue — Class proceeding would be fair and efficient method of advancing claim — Common issues predominated over those affecting individual class members, and individual actions would require proof of common elements — Individual compensation program established by province did not provide adequate alternative — Class Proceedings Act, R.S.B.C. 1996, c. 50, ss. 4, 4(1)(c), 4(1)(d).

Procédure --- Parties — Recours collectifs — En général

Demandeurs d'un recours collectif intenté par les anciens étudiants d'un pensionnat respectaient les exigences de la certification en vertu de l'art. 4 de la Class Proceedings Act — Tant le critère de la question commune que celui de la meilleure procédure étaient respectés — Tous les membres du groupe avaient un intérêt commun dans la question de savoir si la province avait manqué à son obligation de diligence — L'octroi et le montant des dommages-intérêts exemplaires sont des questions susceptibles d'être résolues en tant que questions communes — Recours collectif représenterait une façon juste et efficace de faire progresser la réclamation — Questions communes l'emportaient sur celles touchant les membres individuels du groupe, et des poursuites individuelles exigeraient la preuve des éléments communs — Programme d'indemnisation individuelle mis sur pied par la province ne constituait pas une mesure de rechange adéquate — Class Proceedings Act, R.S.B.C. 1996, c. 50, art. 4, 4(1)c), 4(1)d).

Procédure --- Parties — Recours collectifs — Exigences procédurales

Demandeurs d'un recours collectif intenté par les anciens étudiants d'un pensionnat respectaient les exigences de la certification en vertu de l'art. 4 de la Class Proceedings Act — Tant le critère de la question commune que celui de la meilleure procédure étaient respectés — Tous les membres du groupe avaient un intérêt commun dans la question de savoir si la province avait manqué à son obligation de diligence — L'octroi et le montant des dommages-intérêts exemplaires sont des questions susceptibles d'être résolues en tant que questions communes — Recours collectif représenterait une façon juste et efficace de faire progresser la réclamation — Questions communes l'emportaient sur celles touchant les membres individuels du groupe, et des poursuites individuelles exigeraient la preuve des éléments communs — Programme d'indemnisation individuelle mis sur pied par la province ne constituait pas une mesure de rechange adéquate — Class Proceedings Act, R.S.B.C. 1996, c. 50, art. 4, 4(1)c), 4(1)d).

From the early 1950s until 1992, British Columbia operated a residential school for deaf children and, until 1979, blind children. Investigations by the provincial Ombudsman and a special counsel subsequently established that sexual, physical, and emotional abuse of children by staff and other students was widespread at the school over a period of many years. The province acknowledged responsibility for the abuse that occurred and established an individual compensation scheme for those who had

suffered abuse while under its care, awarding compensation to current and former students in three tiers, with a minimum of \$3,000 and a maximum of \$60,000.

The plaintiffs commenced a class proceeding against the province for compensatory and punitive damages on behalf of a class consisting of current and former students who suffered abuse or failed to receive a proper education; family members of students who suffered damage as a result of abuse; and family members and others who were abused by students who had been abused. The chambers judge found that there were no issues common to the proposed class and denied certification. The Court of Appeal disagreed, holding that whether the defendant was negligent or in breach of fiduciary duty in failing to take reasonable measures to protect students from sexual misconduct and punitive damages were common issues to all those who alleged that they had been sexually abused at the school, and certified the claims relating to sexual abuse of the students only. The province appealed the certification of this narrow class. The sole issue on appeal was whether, given the Court of Appeal's redefinition of the class and common issues, the class certification requirements in s. 4 of the *Class Proceedings Act* were met.

**Held:** The appeal was dismissed.

Under s. 4 of the *Class Proceedings Act*, the court must certify a proceeding as a class proceeding if the pleadings disclose a cause of action; if there is an identifiable class of two or more persons; if the claims of the class members raise common issues, whether or not those common issues predominate over issues affecting only individual members; and if a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues. The issues in dispute were whether there were questions common to the class, as required by s. 4(1)(c); and whether a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues, as required by s. 4(1)(d).

Both the commonality and preferability requirements were satisfied in this case. The issues of duty and breach were common to the class. On claims of negligence and breach of fiduciary duty, no class member can prevail without showing duty and breach. Accordingly, all class members shared an interest in the question of whether the province had breached a duty of care. In framing commonality, the guiding question should be whether allowing the suit to proceed as a representative one would avoid duplication of fact-finding or legal analysis. The plaintiffs' argument based on alleged systemic negligence — that is, negligence not specific to any one victim but rather to the class of victims as a group — was not overly broad, since it could be determined without reference to the circumstances of individual class members. Moreover, the necessary inquiry was not inescapably individualistic. That the relevant standard of care, if framed at the appropriate level of specificity, might have varied over time was not an obstacle to proceeding as a class action. It simply meant that the court might find it necessary to provide a nuanced answer to the common question. The report of the special counsel suggested that it was feasible to divide the years into discrete subperiods; and the Act, which specifically contemplates the possibility of subclasses, provides ample flexibility for dealing with limited differences between class members. In any event, the commonality requirement may be satisfied whether or not the common issues predominate over issues affecting only individual members. The Court of Appeal's finding with respect to the issue of punitive damages was also upheld. Assessing the knowledge and conduct of those in charge of the school over a long period of time was the kind of fact-finding necessary to determine whether punitive damages were justified, and was required to resolve the primary common issue. While the appropriateness and amount of punitive damages is not always amenable to determination as a common issue, the fact that the plaintiffs had limited the possible grounds of liability to systemic negligence rendered the appropriateness and amount of punitive damages a question amenable to resolution as a common issue. The preferability inquiry is directed at two questions: first, whether the class proceeding would be a fair, efficient and manageable method of advancing the claim; and second, whether the class proceeding would be preferable to other procedures. It was likely that there would be relevant differences between class members. However, since the plaintiffs were claiming "systemic negligence," the central issue was whether the school should have prevented the abuse or responded to it differently. This was amenable to resolution in a class proceeding. While the issues of injury and causation would have to be litigated in individual proceedings following resolution of the common issues in favour of the class, this would be a relatively minor aspect of the case. The essential question was whether the school should have prevented the abuse which occurred at the school or responded to it differently. Thus, the common issues predominated over those affecting only individual class members. Since no class member could prevail without an individual showing of injury and causation, it could not be said that allowing the suit to proceed as a class action would force complainants into a passive role. Each class member would retain control over his or her individual action, and his or her ultimate recovery would be determined by the outcome of the individual proceedings on injury and causation. There was little evidence to suggest that a significant number of class members would prefer to proceed individually.

With respect to other means of resolving the claims, individual actions would be less practical and less efficient than a class proceeding. Issues related to school policy and administration, the qualification and training of staff, and dormitory conditions would likely have common elements, and the overall history and evolution of the school would likely be important. It would be needlessly expensive to require proof in separate cases. Moreover, the individual compensation program, which limited the recovery of individual complainants to \$60,000 and did not permit them to be represented by counsel before the panel, did not provide an adequate alternative to a class proceeding. Finally, it could not be said that the administration of the class proceeding would create greater difficulties than if relief were sought by other means. On this point it was necessary to emphasize the particular vulnerability of the plaintiffs. The individual class members were deaf and/or blind, and litigation would be an extraordinarily difficult process for them. Allowing the suit to proceed as a class action might help mitigate the difficulties that they would face. The communications barriers faced by the students, at the time of the alleged assaults and in the litigation process, favoured a common process to explain the significance of those barriers and to elicit relevant evidence.

À partir du début des années 50 et jusqu'en 1992, la Colombie-Britannique exploitait un pensionnat pour enfants sourds; jusqu'en 1979, le pensionnat comptait également des enfants aveugles. Des enquêtes faites par l'ombudsman de la province et par un conseiller juridique spécial ont subséquemment établi que les enfants avaient fait l'objet d'agressions sexuelles, physiques et émotionnelles de la part du personnel et de certains autres étudiants, et que ces agressions avaient été généralisées dans le pensionnat pendant plusieurs années. La province a reconnu qu'elle était responsable de ces agressions et a mis sur pied un régime d'indemnisation individuelle à l'intention de ceux qui avaient subi des agressions alors qu'ils étaient à la charge de la province. L'indemnisation était accordée aux anciens étudiants et aux étudiants actuels en fonction de trois niveaux, allant d'un minimum de 3 000 \$ à un maximum de 60 000 \$.

Les demandeurs ont intenté un recours collectif contre la province, sollicitant des dommages-intérêts compensatoires et exemplaires, au nom d'un groupe composé comme suit: des étudiants actuels et d'anciens étudiants ayant subi des agressions ou n'ayant pas reçu une éducation adéquate; des membres de la famille des étudiants qui avaient subi des dommages en raison des agressions; et des membres de la famille ainsi que d'autres personnes qui avaient été agressés par des étudiants eux-mêmes ayant été agressés. La juge a conclu que le groupe suggéré n'avait aucune question en commun et a refusé la certification. La Cour d'appel n'était pas d'accord et a statué que les questions de savoir si la défenderesse avait été négligente ou avait manqué à son obligation fiduciaire lorsqu'elle avait fait défaut de prendre des mesures raisonnables pour protéger les étudiants d'une inconduite sexuelle, ainsi que la question des dommages-intérêts exemplaires, constituaient toutes des questions communes à tous ceux qui alléguait avoir fait l'objet d'agressions sexuelles au pensionnat. La Cour n'a certifié que les réclamations se rapportant à l'agression sexuelle des étudiants. La province a interjeté appel à l'encontre de la certification pour ce groupe restreint. La seule question qui faisait l'objet de l'appel était celle de savoir si, vu la nouvelle définition de la Cour d'appel quant au groupe et aux questions communes, les exigences de l'art. 4 de la *Class Proceedings Act* relatives à l'octroi de la certification étaient respectées.

**Arrêt:** Le pourvoi a été rejeté.

En vertu de l'art. 4 de la *Class Proceedings Act*, le tribunal ne doit certifier un recours en tant que recours collectif que : si les procédures écrites révèlent une cause d'action; s'il existe un groupe identifiable de deux personnes ou plus; si les réclamations des membres du groupe soulèvent des questions communes, que ces questions communes l'emportent sur des questions touchant des membres individuels ou non; et si une poursuite collective s'avère la meilleure procédure pour en arriver à une résolution juste et efficace des questions communes. Les questions en litige étaient celle de savoir s'il y avait des questions communes au groupe, comme le requiert l'art. 4(1)c), et celle de savoir si le recours collectif constituait la meilleure procédure pour la résolution juste et efficace des questions communes, comme l'exige l'art. 4(1)d).

Tant l'exigence de la question commune que celle de la meilleure procédure étaient respectées en l'espèce. Le groupe avait en commun les questions relatives à l'obligation et à la violation. Dans le cadre de réclamations pour négligence et manquement à une obligation fiduciaire, aucun des membres du groupe ne peut obtenir gain de cause sans avoir démontré l'existence de l'obligation et de la violation. Par conséquent, tous les membres du groupe avaient un intérêt commun dans la question de savoir si la province avait manqué à son obligation de diligence. Lorsqu'il s'agit de formuler les questions communes, la question directrice devrait être celle de savoir si le fait d'autoriser la poursuite à titre de recours collectif permettrait d'éviter de répéter l'appréciation des faits et l'analyse juridique. Les arguments des demandeurs, fondés sur une allégation de négligence systémique, soit que la négligence ne visait pas une victime spécifiquement mais plutôt le groupe des victimes en tant que groupe, n'avaient pas une trop grande portée puisque la négligence pouvait être déterminée sans faire de référence aux circonstances des

membres individuels du groupe. De plus, l'examen nécessaire n'était pas inévitablement de nature individuelle. Le fait que la norme de diligence pertinente, si elle était formulée au niveau voulu de spécificité, ait pu varier à travers le temps ne constituait pas un obstacle au recours collectif. Cela voulait simplement dire que le tribunal pourrait décider qu'il était nécessaire de donner une réponse nuancée à la question commune. Le rapport du conseiller spécial suggérait qu'il était possible de diviser les années en sous-périodes distinctes, et la loi, qui envisage spécifiquement la possibilité de sous-groupes, permet assez de souplesse pour traiter des différences réduites entre les membres du groupe. De toute façon, le critère de la question commune peut être respecté, que les questions communes l'emportent ou non sur les questions touchant uniquement les membres individuels. La conclusion de la Cour d'appel en ce qui a trait à la question des dommages-intérêts exemplaires a elle aussi été maintenue. L'appréciation de la connaissance et de la conduite de ceux qui étaient responsables du pensionnat pendant une longue période de temps constituait le genre d'appréciation des faits qui était nécessaire pour déterminer si des dommages-intérêts exemplaires étaient justifiés et s'il était nécessaire de résoudre la question commune principale. Même si l'octroi et le montant des dommages-intérêts exemplaires ne sont pas toujours des questions susceptibles d'être résolues en tant que questions communes, le fait que les demandeurs avaient limité les motifs possibles de responsabilité à la négligence systémique faisait que l'octroi et le montant des dommages-intérêts exemplaires étaient des questions susceptibles d'être résolues en tant que questions communes.

L'examen relatif à la meilleure procédure porte sur deux questions: premièrement, le recours collectif constitue-t-il le moyen le plus juste, efficace et le plus facile à administrer pour faire progresser la réclamation? Deuxièmement, le recours constitue-t-il le meilleur moyen par rapport à d'autres? Il était fort probable qu'il y aurait des différences pertinentes entre les membres du groupe. Cependant, puisque les demandeurs invoquaient la « négligence systémique », la question centrale était celle de savoir si le pensionnat aurait pu empêcher les agressions ou y répondre différemment. Cette question était susceptible d'être résolue dans le cadre d'un recours collectif. Même si les questions relatives au préjudice et au lien de causalité devraient faire l'objet de poursuites individuelles à la suite de la résolution des questions communes en faveur du groupe, cela ne représenterait qu'un élément relativement mineur de l'affaire. La question essentielle était celle de savoir si le pensionnat eût pu prévenir les agressions qui avaient eu lieu dans l'école ou s'il aurait pu y répondre différemment. Par conséquent, les questions communes l'emportaient sur celles touchant seulement les membres individuels du groupe. Puisque aucun membre du groupe ne pourrait obtenir gain de cause sans démontrer individuellement le préjudice et le lien de causalité, on ne pouvait dire qu'autoriser la poursuite à titre de recours collectif forcerait les plaignants à occuper un rôle passif. Chaque membre du groupe garderait le contrôle sur sa poursuite, et l'indemnité éventuellement touchée dépendrait de l'issue de l'instance individuelle relativement au préjudice et au lien de causalité. Rien dans la preuve n'indiquait qu'un nombre important des membres du groupe préférerait poursuivre individuellement.

En ce qui a trait à d'autres moyens de résoudre les réclamations, des poursuites individuelles seraient un moyen moins pratique et efficace que ne le serait le recours collectif. Les questions relatives à la politique et à l'administration du pensionnat, aux compétences et à la formation du personnel et aux conditions de vie du dortoir auraient probablement des éléments en commun et l'historique ainsi que l'évolution de l'école seraient probablement importants. Exiger cette preuve dans le cadre d'affaires distinctes serait inutilement dispendieux. De plus, le programme d'indemnisation individuelle, lequel limitait l'indemnisation des plaignants individuels à 60 000 \$ et ne leur permettait pas d'être représenté par avocat devant le comité, ne constituait pas une solution de rechange adéquate au recours collectif. Finalement, on ne pouvait dire que l'administration du recours collectif créerait de plus grandes difficultés que si la réparation était recherchée par d'autres moyens. Sur ce point, il était nécessaire de mettre l'accent sur la vulnérabilité particulière des plaignants. Les membres individuels du groupe étaient soit sourds, soit aveugles ou les deux à la fois, et une poursuite serait un processus extrêmement difficile pour eux. Autoriser l'action à titre de recours collectif pourrait aider à atténuer les difficultés qu'ils pourraient éprouver. L'obstacle de la communication auquel faisaient face les étudiants lors des agressions alléguées et pendant le processus judiciaire militait en faveur d'une procédure commune afin d'expliquer l'importance de cet obstacle et de recueillir de la preuve pertinente.

No. 2588](#) (B.C. S.C. [En chambre]) qui avait refusé d'accorder la certification du recours collectif.

**The judgment of the court was delivered by *McLachlin C.J.C.*:**

1 Like *Hollick v. Metropolitan Toronto (Municipality)*, [2001 SCC 68](#) (S.C.C.), this case raises the question of whether the plaintiffs below (respondents here) meet the certification requirements set out in provincial class action legislation. In this case the respondents seek to represent current and former students who were abused at the Jericho Hill School, a residential school for the deaf and blind operated by the province of British Columbia. At the end of the hearing, the Court concluded that the respondents had satisfied the certification requirements set out in s. 4 of the British Columbia *Class Proceedings Act*, R.S.B.C. 1996, c. 50, and dismissed the appeal, reasons to follow. These are those reasons.

**I. Facts**

2 From the early 1950s until 1992, Jericho Hill School operated as a residential school for deaf children. Until 1979, the school also enrolled blind children. Whereas most schools in British Columbia are managed by district school boards, JHS was a "provincial school" under British Columbia's governing legislation, currently the *School Act*, R.S.B.C., 1996, c. 42, and was operated and maintained by British Columbia's Ministry of Education. It is now clear that sexual and physical abuse of children took place at the school throughout its history. The first thorough investigation of abuse at the school was conducted by the British Columbia Ombudsman in 1992. His report, issued in 1993, concluded that sexual, physical and emotional abuse of students by staff and peers occurred over a period of many years. In response to the Ombudsman's report and to lawsuits initiated against the province after the report was issued, the Attorney General appointed Thomas Berger, Q.C., as special counsel. Berger's report was issued in March 1995. The Berger report concluded that "sexual abuse was at times widespread at the residence at Jericho Hill School, and ... it went on over a period of many years" (p. 14).

3 The findings of the Berger report are disturbing, to say the least. Berger interviewed 35 students who were at JHS in the 1950s, 1960s, 1970s, and 1980s. He found that "[m]any of these persons allege[d] that they were sexually abused or witnessed sexual abuse by staff or other students" (p. 13). Berger focussed principally on abuse that took place after 1980. According to the Berger report, two male students complained separately about abuse at the school in the early 1980s. The first complained that he had been sexually abused by a female child care counsellor and that students at the school were encouraged and even forced to have sex with one another; the second alleged that two male child care counsellors had abused him. After the second complaint, a social worker with the Ministry of Human Resources conducted interviews with a number of boys resident at the schools. Some of the boys admitted having abused girls at the school, some as young as seven years old. The boys also alleged that they had been abused by two male child care counsellors.

4 According to the Berger report, there is compelling evidence that abuse was rampant throughout the 1980s. Some of the abuse took place at the residence associated with the school, but there were also indications of abuse in a group home run by a psychologist hired by JHS in 1983. In 1984 one student at group the group home stabbed another to death. At the subsequent trial, the judge expressed concern about the adequacy of supervision in the group home, stating that the accused "was receiving what I can only characterize as the most inappropriate form of care and guidance in that foster home". In 1986 one of the male students at JHS who had resided in the group home committed suicide after sexually abusing his niece at home.

5 The Berger report speaks separately about the period between 1987 and 1990. In January 1987 the student who had brought the first complaint in the early 1980s attempted suicide after abusing his younger siblings. After his suicide attempt, the student repeated his allegation of abuse at the hands of a female counsellor. He also admitted that he and other boys had abused elementary-age girls at the school. Around the same time, another male student was arrested for molesting a young boy. He stated that he himself had been abused by a child care worker at JHS and stated that he had engaged in sexual activity with boys and girls at the residence. He listed ten female students whom he had sexually abused and named three other boys who he said had alleged female students. After these new allegations, the Ministries of Education and Social Services conducted an investigation, interviewing some 35 students beginning in early 1987. The students interviewed provided names of other children who they said had been forced to have sex or had forced others to have sex. One member of the investigative team, in reviewing the findings, identified "a pervasive culture at the residence that required students to submit to a sexual rite of passage if they were to successfully cohabit with their peers".

6 The Berger report did not go into detail about individual cases; its principal goal was to determine the prevalence of abuse at the school, not to determine whether any particular resident had been abused. The report stated (at p. 14):

I make no findings here regarding individual cases. I am instead confining myself to stating my finding, applying generally to the state of affairs at Jericho Hill School, that from the 1950s, extending over about a 35-year period, there was sexual abuse by some child care staff, sexual abuse by some older children against younger children, and that some of these younger children (once they became senior students) sexually abused new entrants.

The case histories can be shocking. There is no need to go into them in detail. But they do indicate that sexual abuse at the school may not entirely have come to an end even in 1987. One former student states that she was assaulted by a female child care worker from 1981 to 1990. Another former student states she was sexually assaulted many times, from 1980 to 1991. It remains to be seen whether these particular allegations will be made out, but they do indicate that the possibility of incidents of sexual abuse even after 1987 cannot be dismissed.

In this report I do not go into detail about individual cases. ... I am not ... engaged in determining the impact of abuse in any individual case, but rather setting out the whole picture.

7 The Berger report found that JHS's response to allegations of abuse was often inadequate, noting, for example, that "[e]xcept in a few cases, Jericho Hill School failed to report the disclosures to the parents of the boys or the girls, failed to identify the student offenders and to remove them from the school, and failed to ensure that the students who had been abused received appropriate therapy" (p. 9). The report found that "[a]lthough it had responsibility for the management of the school, the Ministry of Education had no policies and procedures laid down for running a residence for deaf children" (p. 15). It also noted that in 1978, all students — boys and girls of all ages — were placed together in a single dormitory and observed that "[i]t is certainly arguable that these arrangements were not in keeping with reasonable standards of care at the time" (p. 16).

8 The Berger report also emphasized the exceptional vulnerability of the children at the school. The report stated (at p. 7):

[T]he vulnerability of the children at Jericho Hill School was the product of their failure to acquire language early; this meant that they did not have values instilled in them in the same way as hearing children do; it often meant increased vulnerability to any staff at the school who may have been disposed to abuse the children; it meant that the institution was more susceptible to the development of a culture of abuse; and it meant that the children usually did not have the ability or the means to communicate with or complain effectively to parents, teachers, physicians, police or social workers about sexual abuse.

9 The recommendations of the Berger report were that the province accept responsibility for the abuse that occurred at JHS; that the province establish a scheme to compensate those who had suffered abuse at the school; and that the compensation scheme should award compensation, for those claims accepted, in three tiers, with a minimum of \$3,000 and a maximum of \$60,000.

10 The government responded to the Berger report by acknowledging responsibility for abuse that occurred at JHS. In a ministerial statement made in June 1995, the Attorney General acknowledged the allegations of sexual abuse at the school, acknowledged that "[t]he province was responsible for the care and well-being of these people when they were children", and stated that "[t]o the extent that the province failed them, [it] must see that they are now compensated". The province also established the Jericho Individual Compensation Program (JICP), which is structured according to the recommendations of the Berger report. The program is open to students and former students who allege abuse as a result of attending or having attended the school, and provides for awards according to the three-tier system. As of March 31, 1998, the JICP had heard 49 claims.

11 The respondents commenced this action in January 1998. The suit seeks compensatory and punitive damages on behalf of a class consisting of:

- all current and former JHS students who have suffered abuse or who failed to receive a proper education while students of the school
- all family members of current or former JHS students who suffered damage as a result of the abuse of a JHS student
- all family members or others who were themselves abused by current or former JHS students as a result of the prior abuse of the JHS student

The respondents asserted that the following issues are common to the class:

- whether the defendant breached the standard of care it owed to the plaintiffs between 1950 and 1992
- whether the defendant made negligent, reckless and/or fraudulent misrepresentations regarding the school
- whether the defendant's conduct justified an award of punitive damages and, if so, what amount of punitive damages is appropriate

(Initially the respondents also asserted that vicarious liability constituted a common issue, but the respondents abandoned their vicarious liability argument early in the proceedings.)

12 The only issue on this appeal is whether the respondents have satisfied the class certification requirements set out in s. 4 of British Columbia's *Class Proceedings Act*.

## **II. Judgments**

13 In the Supreme Court of British Columbia, Kirkpatrick J. denied certification: ([1998](#), [65 B.C.L.R. \(3d\) 382](#) (B.C. S.C. [In Chambers]). First addressing s. 4(1)(a), Kirkpatrick J. found that the statement of claim did not disclose a cause of action based on misrepresentation, emotional harm and mental suffering, breach of fiduciary duty owed to parents or other third parties, or educational malpractice. She found, however, that the statement of claim did disclose causes of action based on the claims of abuse of students, the claims of "secondary" abuse committed by students against other students or third parties, and breach of fiduciary duty owed to the students. Kirkpatrick J. also found that respondents had stated an identifiable class, as required by s. 4(1)(b).

14 Kirkpatrick J. rejected the contention, however, that there were issues common to the class as required by s. 4(1)(c). She addressed each of the asserted common issues in turn. As to the negligence issues, she reasoned that the standard of care owed by the defendant would not have been constant over the 42-year period identified in the statement of claim and, while this problem could be partially addressed by subdividing the 42-year period and determining the standard of care for each subdivision, "[s]uch an approach would not resolve the anticipated problems of individuals who spanned one or more periods, or whose own individual circumstances changed along with the standard of care during the times in question" (p. 402). Further, variations in the standard of care would "not necessarily relate only to when the claim is alleged to have arisen, but will likely

depend also on who advances the claim, who is alleged to have perpetrated the wrong, and, perhaps, the nature of the abuse alleged" (p. 403).

15 Kirkpatrick J. rejected the misrepresentation issues as common to the class for similar reasons, writing that these issues were "individualistic in the sense that each plaintiff must demonstrate that [he or she] relied upon the defendant's alleged misrepresentation such that the representation had a real and substantial effect on the individual plaintiff's decision to enrol and continue to enrol the student at the school" (p. 404).

16 Finally, Kirkpatrick J. rejected the punitive damages issue as common to the class, reasoning that assessing punitive damages would require an individualized showing on the part of each plaintiff and noting that "the conduct of the defendant in relation to individual plaintiffs may aggravate or mitigate the assessment of punitive damages, which would fail to be considered in the determination of entitlement to punitive damages as a common issue" (p. 406). Kirkpatrick J. noted that even if punitive damages were certified as a common issue, the amount of punitive damages could not be a common issue because traditionally "[p]unitive damages are [awarded only] if compensatory damages are insufficient to deter or punish the defendant" (p. 406). The amount of punitive damages, therefore, could not be assessed until individual proceedings were completed.

17 Kirkpatrick J. determined that there were no common issues as required by s. 4(1)(c) and, as there were no common issues, a class action could not be "the preferable procedure for the fair and efficient resolution of the common issues", as required by s. 4(1)(d). She conceded, however, that the JICP is not an adequate alternative to judicial resolution of the dispute. She noted that the JICP limits awards to \$60,000, does not compensate family members, and does not provide compensation for loss of income, opportunity, or future care. Further, the JICP prohibits applicants from being represented by counsel before the compensation panel. In Kirkpatrick J.'s view, however, the absence of common issues meant that individual litigation was nonetheless preferable to a class proceeding.

18 The Court of Appeal for British Columbia, *per* Mackenzie J.A., allowed the appeal, disagreeing with the chambers judge with respect to commonality and preferability: ([1999](#), 72 B.C.L.R. (3d) 1 (B.C. C.A.). In Mackenzie J.A.'s view, the chambers judge had erred in failing to recognize the "limited grounds" on which the respondents sought certification. While he conceded that there were relevant differences amongst the class members, Mackenzie J.A. reasoned that the "duty of the school to reasonably protect its students from sexual abuse is clear and immutable throughout the period that the school was in operation" (p. 8). He wrote (at pp. 8-9):

It is true that the claims of class members may span a period of 42 years and that standards of operation and management of the school may have changed several times over that lengthy period. Nevertheless, ... the duty of the school to reasonably protect its students from sexual abuse is clear and immutable throughout the period that the school was in operation. ...

Claimants will not have to prove that the abuse was caused by a particular staff member or other student in the absence of a claim for vicarious liability. In essence the claims will be based on systemic negligence, the failure to have in place management and operations procedures that would reasonably have prevented the abuse.

Mackenzie J.A. concluded that the standard-of-care issue — an aspect of both the negligence claim and the fiduciary duty claim — was common to all those who alleged that they had been sexually abused at JHS. He also found that the preferability requirement had been satisfied, holding that the JICP was an inadequate alternative.

19 The issue of punitive damages was also common to all those who alleged that they had themselves been abused at JHS, Mackenzie J.A. concluded. "Any award for punitive damages," he wrote, "should reflect the overall culpability of the defendant. It does not have to be linked to the harm caused to any particular claimant and does not require individualized assessment." He continued: "[a] global award can be assessed for the successful class members as a group, and allocated among them as the trial judge considers appropriate" (p. 17).

20 Mackenzie J.A. rejected, however, the other common issues asserted by the respondents. He rejected abuse claims of a non-sexual nature, finding that non-sexual abuse was not a central concern of the pleadings and that there was some uncertainty as to whether non-sexual abuse falls within the definition of assault. He also rejected "secondary" abuse claims — that is, abuse by a

JHS student who had himself or herself been abused at the school. On this issue he agreed with the chambers judge that questions of duty, foreseeability, and proximity rendered secondary-abuse claims prohibitively complicated and individualized. Mackenzie J.A. also rejected the educational malpractice claims, finding no precedent suggesting that such claims could be prosecuted successfully and stating that "any attempt to litigate these issues in the same class proceedings as the sexual abuse claims would complicate the proceedings immensely" (p. 15). Finally he rejected claims for family members' emotional harm and suffering — claims that relied in part on an allegation of negligent misrepresentation, reasoning that the claims were "amorphous" and in any event "[i]ssues of reliance and causation linking representations to the harm alleged will undoubtedly vary from claimant to claimant" (p. 16).

21 Ultimately Mackenzie J.A. defined the class as follows:

Students at the Jericho Hill School between 1950 and 1992 who reside in British Columbia and claim to have suffered injury, loss or damage as a result of misconduct of a sexual nature occurring at the school.

He certified the following questions as common issues:

1. Was the defendant negligent or in breach of fiduciary duty in failing to take reasonable measure in the operation or management of the school to protect students from misconduct of a sexual nature by employees, agents or other students at the school?
2. If the answer to common issue no. 1 is "yes", was the defendant guilty of conduct that justifies an award of punitive damages?
3. If the answer to common issue no. 2 is "yes", what amount of punitive damages is awarded?

22 The appellant now challenges Mackenzie J.A.'s decision, contending that he erred in certifying even the narrower class.

### III. Legislation

23 *Class Proceedings Act*, R.S.B.C. 1996, c. 50

4(1) The court must certify a proceeding as a class proceeding on an application under section 2 or 3 if all of the following requirements are met:

- (a) the pleadings disclose a cause of action;
- (b) there is an identifiable class of 2 or more persons;
- (c) the claims of the class members raise common issues, whether or not those common issues predominate over issues affecting only individual members;
- (d) a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues;

.....

(2) In determining whether a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues, the court must consider all relevant matters including the following:

- (a) whether questions of fact or law common to the members of the class predominate over any questions affecting only individual members;
- (b) whether a significant number of the members of the class have a valid interest in individually controlling the prosecution of separate actions;
- (c) whether the class proceeding would involve claims that are or have been the subject of any other proceedings;

- (d) whether other means of resolving the claims are less practical or less efficient;
- (e) whether the administration of the class proceeding would create greater difficulties than those likely to be experienced if relief were sought by other means.

7 The court must not refuse to certify a proceeding as a class proceeding merely because of one or more of the following:

- (a) the relief claimed includes a claim for damages that would require individual assessment after determination of the common issues;
- (b) the relief claimed relates to separate contracts involving different class members;
- (c) different remedies are sought for different class members;
- (d) the number of class members or the identity of each class member is not known;
- (e) the class includes a subclass whose members have claims that raise common issues not shared by all class members.

#### IV. Issues

24 Have the respondents satisfied the certification requirements set out in British Columbia's *Class Proceedings Act*?

#### V. Analysis

25 The only issue in this case is whether the Court of Appeal erred in granting certification. As the respondents do not cross-appeal from the decision of Mackenzie J.A., we need not consider whether certification could have been granted on a *broader* basis than was recognized by the Court of Appeal. The only question is whether, given the Court of Appeal's redefinition of the class and common issues, the certification requirements were met. Those requirements are set out in s. 4 of the British Columbia *Class Proceedings Act* and are similar to the certification requirements set out in Ontario's class action legislation, which I discuss at some length in [Hollick](#). These reasons discuss the specifics of the British Columbia certification requirements only insofar as they differ materially from those set out in s. 5 of the Ontario *Class Proceedings Act, 1992*, S.O. 1992, c. 6, and only to the extent that those differences bear directly on my analysis in this case.

26 Not all of the certification requirements are at issue on this appeal. The appellant does not dispute that the respondents have met the requirements of s. 4(1)(a), (b), and (e) — that is, the appellant does not dispute that the pleadings disclose a cause of action, that the respondents have stated an identifiable class, and that the respondents would serve as satisfactory representatives of the class. The issues in dispute are whether there are questions common to the class, as required by s. 4(1)(c), and whether a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues, as required by s. 4(1)(d).

27 In my view, both the commonality and preferability requirements are satisfied in this case. With regard to commonality, I agree with Mackenzie J.A. that all class members share an interest in the question of whether the appellant breached a duty of care. On claims of negligence and breach of fiduciary duty, no class member can prevail without showing duty and breach. Resolving those issues, therefore, is "necessary to the resolution of each class member's claim": *Western Canadian Shopping Centres Inc. v. Dutton*, [2001 SCC 46](#) (S.C.C.), at para. 39. Accordingly I would conclude that Mackenzie J.A. was correct to find that the issues of duty and breach are common to the class.

28 The appellant concedes that none of the class members can prevail without showing that the appellant's conduct fell below an acceptable standard, but contends that the nature of the required showing is inescapably individualistic and not amenable to resolution in general terms applicable to all class members. The appellant does not dispute Mackenzie J.A.'s statement that

the "duty of the school to reasonably protect its students from sexual abuse is clear and immutable throughout the period that the school was in operation". However in the appellant's view, "[t]he result of this litigation depends not on the definition of the standard of care, but rather the *application* of that standard to the facts found in respect of the circumstances of each claimant" (Appellant's factum, at para. 64 (emphasis in original)). The appellant argues that in this case "[l]iability turns not on the breach of a standard of care in the abstract, but on whether the standard of care was breached with respect to the school's supervision of the particular class member in a way that contributed materially to his/her abuse" (Appellant's factum, at para. 64). The theory of the appellant is essentially that the Court of Appeal was able to find a common issue within the meaning of s. 4(1)(c) only by framing the commonality between the class members in overly general terms.

29 There is clearly something to the appellant's argument that a court should avoid framing commonality between class members in overly broad terms. As I discussed in *Western Canadian Shopping Centres Inc.*, *supra*, at para. 39, the guiding question should be the practical one of "whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis". It would not serve the ends of either fairness or efficiency to certify an action on the basis of issues that are common only when stated in the most general terms. Inevitably such an action would ultimately break down into individual proceedings. That the suit had initially been certified as a class action could only make the proceeding less fair and less efficient.

30 I cannot agree, however, that such are the circumstances here. As Mackenzie J.A. noted, the respondents' argument is based on an allegation of "systemic" negligence — "the failure to have in place management and operations procedures that would reasonably have prevented the abuse". The respondents assert, for example, that JHS did not have policies in place to deal with abuse, and that JHS acted negligently by placing all residential students in one dormitory in 1978. These are actions (or omissions) whose reasonability can be determined without reference to the circumstances of any individual class member. It is true that the respondents' election to limit their allegations to systemic negligence may make the individual component of the proceedings more difficult; clearly it would be easier for any given complainant to show causation if the established breach were that JHS had failed to address her *own* complaint of abuse (an individualized breach) than it would be if, for example, the established breach were that JHS had *as a general matter* failed to respond adequately to some complaints (a "systemic" breach). As Mackenzie J.A. wrote, however, the respondents "are entitled to restrict the grounds of negligence they wish to advance to make the case more amenable to class proceedings if they choose to do so" (p. 9).

31 In arguing that the necessary inquiry is inescapably individualistic, the appellant's principal contention is that the relevant standard of care, if framed at the appropriate level of specificity, would have varied over time. I am not persuaded that this should be an obstacle to the suit's proceeding as a class action. It is true that there has been a "dramatic ... evolution" in law relating to sexual abuse between 1950 and 1992 and it is quite possible that the nature of a school's obligations to its students has changed over time. However, courts have often allowed class actions to proceed in similar circumstances: see, e.g., *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.) (certifying class action for medical malpractice even though the action "concern[ed] allegations of a general practice over a number of years falling below acceptable standards" (p. 683)); *Chace v. Crane Canada Inc.* (1996), 26 B.C.L.R. (3d) 339 (B.C. S.C. [In Chambers]) (certifying class action for negligent manufacture and sale over 11-year period on grounds that, if the defendant were "partially successful in its defence and ultimately found to have been negligent over part of the period only, that result c[ould] be accommodated in the answer to the common question" (p. 347)); *Endean v. Canadian Red Cross Society* (1997), 148 D.L.R. (4th) 158 (B.C. S.C.) (certifying class action for negligence and spoliation over four-year period notwithstanding defendant's argument that "the standard of care would have been in flux throughout the material time" (p. 168)).

32 That the standard of care may have varied over the relevant time period simply means that the court may find it necessary to provide a nuanced answer to the common question. The structure of the Berger report, which explicitly divides the years between 1982 and 1991 into three discrete subperiods, suggests that such an approach would not be infeasible. I further note that the *Class Proceedings Act* contemplates the possibility of subclasses and that the court may amend the certification order at any time: see s. 6(1) (permitting court to recognize subclasses under certain conditions); s. 7(e) (stating that the court "must not refuse to certify a proceeding as a class proceedings merely because ... the class includes a subclass whose members have claims that raise common issues not shared by all class members"); s. 8(3) (stating that "[t]he court, on the application of a

party or class member, may at any time amend a certification order"); s. 10(1) (stating that "[w]ithout limiting section 8(3), at any time after a certification order is made ..., the court may amend the certification order"). In my view the *Class Proceedings Act* provides the court with ample flexibility to deal with limited differentiation amongst the class members as and if such differentiation becomes evident.

33 As the Court of Appeal noted (at p. 9), it is in fact quite likely that there will be relevant differences between the class members:

Limiting the ground of liability to systemic negligence does not eliminate all differences among class members. As the Berger report noted, the duty owed may vary over time depending upon the state of knowledge of those in charge of the school, the reasonably informed educational standards and policies of the day, the measures implemented to prevent abuse and other factors. At the end of the case, liability could be imposed for abuse during certain periods of the school's operation and not in others. It is conceivable that liability might be differentiated in other ways, for example abuse inflicted by staff but not by other students.

For the reasons stated above, however, I agree with Mackenzie J.A. that these differences are not insurmountable. In any event I question the extent to which differences between the class members should be taken into account at this stage. The British Columbia *Class Proceedings Act* explicitly states that the commonality requirement may be satisfied "whether or not [the] common issues predominate over issues affecting only individual members": s. 4(1)(c). (This distinguishes the British Columbia legislation from the corresponding Ontario legislation, which is silent as to whether predominance should be a factor in the commonality inquiry.) While the British Columbia *Class Proceedings Act* clearly contemplates that predominance will be a factor in the preferability inquiry (a point to which I will return below), it makes equally clear that predominance should not be a factor at the commonality stage. In my view the question at the commonality stage is, at least under the British Columbia *Class Proceedings Act*, quite narrow.

34 As noted above, Mackenzie J.A. certified as common not only the standard-of-care issue but also the punitive damages issues. Here, too, I agree with his reasoning. In this case resolving the primary common issue — whether JHS breached a duty of care or fiduciary duty to the complainants — will require the court to assess the knowledge and conduct of those in charge of JHS over a long period of time. This is exactly the kind of fact-finding that will be necessary to determine whether punitive damages are justified: see, e.g., *Endean*, *supra*, at para. 48 ("An award of punitive damages is founded on the conduct of the defendant, unrelated to its effect on the plaintiff."). Clearly, the appropriateness and amount of punitive damages will not always be amenable to determination as a common issue. Here, however, the respondents have limited the possible grounds of liability to systemic negligence — that is, negligence not specific to any one victim but rather to the class of victims as a group. In my view the appropriateness and amount of punitive damages is, in this case, a question amenable to resolution as a common issue: see *Chace*, *supra*, at para. 30 (certifying punitive damages as a common issue on the grounds that the plaintiffs' negligence claim was "advance[d] ... as a general proposition" rather than by reference to conduct specific to any one plaintiff).

35 The question remains whether a class action would be the preferable procedure. Here I would begin by incorporating my discussion in *Hollick* as to the meaning of preferability: see *Hollick*, *supra*, at paras. 28-31. While the legislative history of the British Columbia *Class Proceedings Act* is of course different from that of the corresponding Ontario legislation, in my view the preferability inquiry is, at least in general terms, the same under each statute. The inquiry is directed at two questions: first, "whether or not the class proceeding [would be] a fair, efficient and manageable method of advancing the claim", and second, whether the class proceedings would be preferable "in the sense of preferable to other procedures": *Hollick*, at para. 28. I would note one difference, however, between the British Columbia *Class Proceedings Act* and the corresponding Ontario legislation. Like the British Columbia legislation, the Ontario legislation requires that a class action be "the preferable procedure" for the resolution of the common issues: see Ontario *Class Proceedings Act*, 1992, s. 5(1)(d); British Columbia *Class Proceedings Act*, s. 4(1)(d). Unlike the Ontario legislation, however, the British Columbia legislation provides express guidance as to how a court should approach the preferability question, listing five factors that the court must consider: see s. 4(2). I turn, now, to these factors.

36 The first factor is "whether questions of fact or law common to the members of the class predominate over any questions affecting only individual members": s. 4(2)(a). As I noted above, it seems likely that there will be relevant differences between class members here. It should be remembered, however, that as the respondents have limited their claims to claims of "systemic" negligence, the central issues in this suit will be the nature of the duty owed by JHS to the class members and whether that duty was breached. Those issues are amenable to resolution in a class proceeding. While the issues of injury and causation will have to be litigated in individual proceedings following resolution of the common issue (assuming the common issue is decided in favour of the class, or at least in favour of some segment of the class), in my view the individual issues will be a relatively minor aspect of this case. There is no dispute that abuse occurred at the school. The essential question is whether the school should have prevented the abuse or responded to it differently. I would conclude that the common issues predominate over those affecting only individual class members.

37 The second factor is "whether a significant number of the members of the class have a valid interest in individually controlling the prosecution of separate actions", and the third is "whether the class proceeding would involve claims that are or have been the subject of any other proceedings": s. 4(2)(b), (c). On these factors I would note again that no class member will be able to prevail without making an individual showing of injury and causation. Thus it cannot be said that allowing this suit to proceed as a class action will force complainants into a passive role. Each class member will retain control over his or her individual action, and his or her ultimate recovery will be determined by the outcome of the individual proceedings on injury and causation (assuming, again, that the common issue is resolved in favour of the class). Further there is little evidence here to suggest that any significant number of class members would prefer to proceed individually.

38 I turn next to the fourth factor, which asks "whether other means of resolving the claims are less practical or less efficient": s. 4(2)(d). On this point I would agree with the Court of Appeal that individual actions would be less practical and less efficient than would be a class proceeding. As Mackenzie J.A. noted (at pp. 9-10), "[i]ssues related to policy and administration of the school, qualification and training of staff, dormitory conditions and so on are likely to have common elements". Further, "[t]he overall history and evolution of the school is likely to be important background for the claims generally and it would be needlessly expensive to require proof in separate cases" (p. 10). I would also agree with Mackenzie J.A. (and indeed with Kirkpatrick J.) that the JICP does not provide an adequate alternative to a class action. Amongst other limitations, the JICP program limits the recovery of any one complainant to \$60,000, and it does not permit complainants to be represented by counsel before the panel. The JICP simply cannot be said to be an adequate alternative to a class proceeding.

39 The final factor is "whether the administration of the class proceeding would create greater difficulties than those likely to be experienced if relief were sought by other means": s. 4(2)(e). On this point it is necessary to emphasize the particular vulnerability of the plaintiffs in this case. The individual class members are deaf or blind or both. Litigation is always a difficult process but I am convinced that it will be extraordinarily so for the class members here. Allowing the suit to proceed as a class action may go some way toward mitigating the difficulties that will be faced by the class members. I am in full agreement, therefore, with Mackenzie J.A.'s conclusion that "[t]he communications barriers faced by the students both at the time of the assaults alleged and currently in the litigation process favour a common process to explain the significance of those barriers and to elicit relevant evidence." As he wrote, "[a] group action should assist in marshalling the expertise required to assist individual students in communicating their testimony effectively" (p. 9).

40 I conclude that the respondents have satisfied the certification requirements set out in s. 4 of the British Columbia *Class Proceedings Act*.

41 The appeal is dismissed. The respondents shall have costs throughout.

*Appeal dismissed.*

*Pourvoi rejeté.*

## Headnote

Securities --- Trading in securities — Civil liability for secondary market disclosure

Representative or class proceedings under class proceedings legislation — Public company sold and leased theatre systems — Company issued press release in 2006 stating that it completed 14 theatre installations in fourth quarter of 2005 and expected to meet its full year earnings guidance for 2005 — Company filed 2005 Form 10-K and issued press release announcing decision to explore sale or merger — Company issued another press release that no buyer interested in acquiring company at valuation sought by board of directors and that company was responding to informal inquiry from US Securities and Exchange Commission regarding timing of revenue recognition — Company stated that it had recognized revenue in fourth quarter of 2005 on ten installations in theatres which did not open in that quarter, but that this was in accordance with generally accepted

accounting principles (GAAP) — Company's share price dropped 40 per cent — In 2007, company restated 2005 financial statements, acknowledging it erred in recognizing revenue for theatre systems that were not completely installed and that it had not complied with GAAP — Shareholders brought action under s. 138.3 of Securities Act for misrepresentation in secondary market and for common law claims — Shareholders brought motion for certification of action as class proceeding — Company acknowledged that statutory claims were suitable for certification but opposed certification of common law claims — Company brought motion to strike out part of common law claims — Shareholders' motion granted; company's motion granted in part — Cause of action pleaded in respect of statutory claim and certain common law claims — Identifiable class — Appropriate to certify global class — Common issues included misrepresentations in Form 10-K and press releases, defendants' personal involvement, and statutory defences — Class proceeding preferable procedure — Leave granted to amend statement of claim and to provide revised litigation plan.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders brought motion for certification of action as class proceeding — Company acknowledged that pleadings disclosed cause of action under s. 138.3 of Securities Act for misrepresentation in secondary market but opposed certification of common law claims — Motion granted — Not plain and obvious that *prima facie* duty, if any, of company to investing public regarding secondary market disclosure was negated or limited by policy considerations — Not inconsistent to pursue statutory remedy for secondary market misrepresentation which imposed liability without proof of reliance, and to pursue claim for common law duty of care for negligent misrepresentation arising out of same circumstances where reliance is element of tort — Failure to plead individual and direct reliance not fatal — Pleadings adequate for claims of fraudulent misrepresentation, conspiracy, and vicarious liability — Concern as to indeterminate liability not applying to claim of fraudulent misrepresentation — Negligence simpliciter claims required amendment.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Proposed global class included persons who acquired company's securities on stock exchanges on or after February 17, 2006 and held some or all of those securities at close of trading on August 9, 2006 — Shareholders brought motion for certification of action as class proceeding — Motion granted — Class members identified by objective and readily verifiable criteria — Class not over-broad for including persons who may have no claims — Commonality of interest existed between class members and proposed representative plaintiffs as core of common law misrepresentation was that defendants made single misrepresentation affecting share price — Real and substantial connection between Ontario and claims of foreign class members — Asserting justice consistent with principles of order and fairness — Certification of global class not precluded by pending application to certify foreign class action.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005

revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Proposed common issues included circumstances in which representations made and knowledge and participation of company and defendant individuals; whether statutory defences to statutory claim shown; whether shares' trading price incorporated and reflected misrepresentation; whether there was conspiracy to deceive class members — Proposed common issues also included what procedure was to be used to determine damages for common law liability; whether there was vicarious liability; whether damages could be assessed in aggregate; whether company and defendant individuals liable for punitive damages, costs of administering and distributing any monetary judgment and/or costs of determining eligibility, and prejudgment and post-judgment interest — Shareholders brought motion for certification of action as class proceeding — Motion granted — Common issues existed that would advance litigation — Claim was single defined representation communicated in different ways — Potential for different statutory regimes or varying standards of care applying to claims of different class members not impede certification.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders brought motion for certification of action as class proceeding — Motion granted — Class proceeding would be fair, efficient, and manageable means to advance claims and would be only viable means to advance claims of class members — Certification would avoid duplication of fact finding and legal analysis and potential for inconsistent results — Deterring misrepresentation in public company disclosures would be enhanced by permitting aggregated claims to proceed — Costs and time to litigate individual claims would greatly exceed potential individual recoveries.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Fair and adequate representation

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders brought motion for certification of action as class proceeding — Motion granted — Shareholders put forth as proposed representative plaintiffs shared attributes with proposed class as at relevant time they purchased and continued to hold shares — Disposition of several common issues would affect them and other class members — Potential differences between legal regimes applying to common law claims of representative plaintiffs and other class members, as well as question of application of statutory claim to nonresident members not being disabling conflict of interest if it was asserted in statement of defence that laws of different legal jurisdictions apply to class members depending on where they had lived or had purchased their shares.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Litigation plan

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders brought motion for certification of action as class proceeding — Motion granted on other grounds — Litigation plan failed to address issues specific to global class — Plan did not include form, substance, and steps for distribution of notice to both resident and nonresident class members — Plan did not propose time for opting out of proceedings or any additional measures or steps in litigation that might be contemplated to address interests of nonresident class members.

Civil practice and procedure --- Pleadings — Statement of claim — Striking out for absence of reasonable cause of action — Plain and obvious

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for statutory and common law damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Company and defendant individuals brought motion under R. 21 of Rules of Civil Procedure to strike out part of common law claims — Motion granted in part — Substance of negligence pleading was pleading of negligent misrepresentation without reliance but as there was no pleading that alleged negligence caused damage to shareholders and no separate claim for remedy based on negligence, claims in negligence simpliciter required amendment.

Torts --- Conspiracy — Practice and procedure — Pleadings

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that it was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for statutory and common law damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders pleaded that company vicariously liable as alleged acts or omissions were authorized, ordered, and done by individual defendants while engaged in management, direction, control and transaction of company's business — Shareholders also alleged that actions of individual defendants were independently tortious and that such defendants were personally liable — Company and individual defendants objected that as conspiracy was alleged to have occurred between company and individual defendants who were directors and/or officers at relevant time, it was impossible for company to conspire with itself — Company and individual defendants brought motion under R. 21 of Rules of Civil Procedure to strike out portions of statement of claim — Motion granted in part on other grounds — All necessary elements of cause of action of conspiracy were pleaded as allegations may, if true, give rise to personal liability on part of individual defendants because their conduct was in issue both as agents for company and in their personal capacities.

Torts --- Fraud and misrepresentation — Pleadings — Pleading fraud and fraudulent misrepresentation — Sufficiency — Miscellaneous

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its

revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for statutory and common law damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders alleged that defendants made misrepresentation recklessly, not caring whether it was true or false — Shareholders brought motion for certification of action as class proceeding — Motion granted — All elements of fraudulent misrepresentation pleaded — Substance of claim for reckless misrepresentation being pleading of fraudulent misrepresentation — If company and defendant individuals acted recklessly in making representation with intention that class members rely upon it, there was no policy reason to limit liability.

Torts --- Fraud and misrepresentation — Pleadings — Pleading innocent or negligent misrepresentation — Sufficiency — Miscellaneous

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for statutory and common law damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders brought motion for certification of action as class proceeding — Motion granted — Prima facie duty of care, if any, owed by company to investing public in respect of negligent misrepresentation in secondary market disclosure not negated or limited by policy considerations — Continuous disclosure obligations of company as reporting issuer were prescribed by statute and intended recipients of such disclosure were investing public — Pursuing statutory remedy for secondary market misrepresentation imposing liability without proof of reliance not inconsistent with pursuing claim alleging common law duty of care for negligent misrepresentation arising out of same circumstances where reliance is element of tort — Failure to plead individual and direct reliance by each shareholder not fatal to claims of misrepresentation.

Torts --- Negligence — Vicarious liability — Miscellaneous

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Shareholders alleged that company was vicariously liable for acts and omissions of individual defendants that were authorized, ordered, and done by individual defendants and company's other agents, employees, and representatives while engaged in management, direction, control, and transaction of its business affairs — Company and individual defendants acknowledged that pleadings disclosed cause of action under s. 138.3 of Securities Act for misrepresentation in secondary market and that those claims were suitable for certification but opposed certification of common law claims — Company and individual defendants brought motion under R. 21 of Rules of Civil Procedure to strike out portions of statement of claim — Motion granted in part on other grounds — When read in context of entire pleading, claim for vicarious liability was adequately pleaded.

Torts --- Negligence — Practice and procedure — Pleadings — Amendment — Adding or striking out claim

Public company sold and leased theatre systems — Shareholders alleged that company's Form 10-K and 2006 press releases contained misrepresentations regarding compliance with generally accepted accounting principles (GAAP) and as to 2005 revenues meeting or exceeding company's previously issued earnings guidance — Company issued another press release in 2006 that company was responding to informal inquiry from US Securities Exchange Commission regarding timing of its revenue recognition for theatre systems that were not yet open — Share price dropped 40 per cent following day — Company restated 2005 financial statements in 2007, acknowledging noncompliance with GAAP and error in recognizing revenue for theatre systems that were not completely installed — Shareholders brought proposed class action for statutory and common law

damages for negligence, negligent and fraudulent misrepresentation, and conspiracy — Company and individual defendants brought motion under R. 21 of Rules of Civil Procedure to strike out part of common law claims — Motion granted in part — Substance of negligence pleading was pleading of negligent misrepresentation without reliance but as there was no pleading that alleged negligence caused damage to shareholders and no separate claim for remedy based on negligence, claims in negligence simpliciter required amendment.

MOTION by plaintiff shareholders for certification as class proceeding of action for negligence, negligent and fraudulent misrepresentation, and conspiracy; MOTION by defendant company and defendant individuals for order pursuant to R. 21 of Rules of Civil Procedure striking out parts of common law claims as failing to disclose cause of action.

**K. van Rensburg J.:**

**The Motions and The Proceedings**

1 The plaintiffs have commenced a proposed class proceeding for misrepresentation in the secondary market. The defendant IMAX Corporation ("IMAX" or the "Company") is a reporting issuer whose securities are listed on the TSX and NASDAQ. The action arises out of the statement of IMAX's financial results for 2005 in its Form 10-K (which included its audited financial statements) released and filed with the Ontario Securities Commission ("OSC") and the U.S. Securities and Exchange Commission ("SEC") in March 2006. It is alleged that the Form 10-K, as well as press releases issued by IMAX in February and March 2006, contained misrepresentations as to IMAX's compliance with GAAP<sup>1</sup> and that its revenues for 2005 met or exceeded IMAX's previously issued earnings guidance.

2 On August 9, 2006, IMAX issued another press release in which it noted in part that the Company was in the process of responding to an informal inquiry from the SEC regarding the timing of its revenue recognition, and in particular its use of multiple element arrangement accounting to recognize revenue on theatre systems that were not yet open, including theatres where the 3D screen had not yet been installed. The following day IMAX's share price dropped 40%.

3 In 2007 IMAX restated its financial statements for a number of years, including 2005 (the "Restatement"). The Restatement acknowledged that the Company had erred in recognizing revenue for theatre systems that were not completely installed, and that the Company had not complied with GAAP in prematurely recording theatre system revenues in fiscal 2005.

4 The plaintiffs are Ontario residents who purchased shares in IMAX on the TSX. They are suing for the devaluation in their shares which they allege was due to the alleged misrepresentations. They allege that the defendants IMAX, its chief executive officers Richard Gelfond ("Gelfond") and Bradley Wechsler ("Wechsler") and its chief financial officer at the relevant time, Francis Joyce ("Joyce") (together the "Individual Defendants") are liable for common law damages.

5 The plaintiffs also sought leave to pursue a statutory claim under Part XXIII.1 of the Ontario *Securities Act*, R.S.O. 1990, c. S.5 (the "OSA") against the defendants and certain proposed defendants (the remaining members of the board of directors of IMAX at the relevant time and Kathryn Gamble, who was Vice-President, Finance and Controller). This is the first action to proceed under these provisions, which came into force on December 31, 2005,<sup>2</sup> and leave of the Court is required under s. 138.8 of the OSA to pursue the statutory claim (the "Leave Motion").

6 The plaintiffs seek certification of this action (including the common law and the statutory claims) as a class proceeding pursuant to s. 5(1) of the *Class Proceedings Act*, 1992, S.O. 1992, c. 6 (the "CPA"). The plaintiffs propose a global class, consisting of persons who acquired securities of IMAX on the TSX and on NASDAQ on or after February 17, 2006 and held some or all of those securities at the close of trading on August 9, 2006.

7 The defendants also brought a motion under Rule 21 of the Rules of Civil Procedure, R.R.O. 1990, Reg. 194, as amended, seeking to strike parte of the common law claims as pleaded by the plaintiffs. This motion is properly considered part of the determination of the sufficiency of the pleading of the cause of action under s. 5(1)(a) of the CPA in the certification motion.

8 All three motions (the Leave Motion and the motions for class action certification and under Rule 21) were argued together. These reasons address the certification and Rule 21 motions. Separate reasons have been released contemporaneously with these reasons, granting leave to the plaintiffs to proceed with the statutory claims against all defendants and all but two of the proposed defendants.<sup>3</sup> Reference should be made to the reasons on the Leave Motion for the background and context of the action, including a detailed description of the facts giving rise to these motions and the statutory cause of action.

#### A. The Test for Certification

9 Section 5(1) of the CPA requires the court to certify a proceeding as a class proceeding if:

- (a) the pleadings or the notice of application discloses a cause of action;
- (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff;
- (c) the claims or defences of the class members raise common issues;
- (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
- (e) there is a representative plaintiff who:
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

10 Class actions offer three important advantages. They serve judicial economy by avoiding unnecessary duplication in fact-finding and legal analysis. By allowing fixed litigation costs to be divided over a large number of plaintiffs, access to justice is improved by making economical the prosecution of claims that would otherwise be too costly to prosecute individually. Class actions serve efficiency and justice by ensuring that actual and potential wrongdoers do not ignore their obligations to the public (this is the "behaviour modification" element) (*Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.), paras. 27-29). See also *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at paras. 14-16.

11 The certification motion is a procedural motion focusing on the form of the action rather than on whether the action is likely to succeed on the merits. The plaintiffs must establish a minimum evidentiary basis for a certification order. It is necessary that the plaintiffs show some basis in fact for each of the certification requirements, other than the requirement in s. 5(1)(a) to plead a proper cause of action (*Hollick*, paras. 16 and 25). On this motion, which was argued with the Leave Motion (in which the preliminary merits of the statutory claim were examined), there was before the court substantial evidence touching on all requirements of ss. 5(1)(b) to 5(1)(e).

#### B. The Principal Issues on the Certification Motion

12 There was little argument in this case directed toward the question of certification of the statutory cause of action. Rather, the focus was on whether leave should be granted to advance such a claim. In respect of the statutory claims, there is clearly a cause of action pleaded, and an identifiable class consisting of IMAX shareholders during the proposed class period. There are common issues as to the making of the misrepresentations in the Form 10-K and press releases, the personal involvement of the defendants and the application of the statutory defences (which, if available, would defeat the statutory claims of the entire class). A class proceeding is the preferable procedure, particularly where there is no requirement for the participation of individual class members in establishing liability, as reliance on the misrepresentation is not an element of the statutory claim. In oral argument counsel for the defendants indicated that they would not be opposing certification of the statutory claims subject to the court granting leave under the OSA to pursue such claims.

13 The acknowledgment that the statutory claims are suitable for certification is an important concession in this case. The remaining issues facing the court are the scope of the claims to be certified as a class action and the identification of the class members; that is, whether the claims will include common law claims relating to misrepresentation on the secondary market by IMAX and tine Individual Defendants, and whether it is appropriate to certify a global class.

14 The defendants assert that there are fatal deficiencies in the alleged causes of action that should prevent the court from certifying a common law claim for misrepresentation in the secondary market in this case. In particular they take issue with the recognition of a duty of care between IMAX, its directors and officers and the investing public. They also argue that reliance is an essential element of a misrepresentation claim, and that the claim as pleaded is deficient for not alleging individual reliance by each member of the proposed class.

15 The defendants contend that the common issues are of limited significance (i.e. they will not significantly advance the action) and that the individual issues (which they contend should include the question of reliance by each class member) are both numerous and significant, rendering a class proceeding not the preferable procedure. They argue against the certification of a global class where there are parallel proceedings pending in a U.S. Court<sup>4</sup> (the "U.S. Proceedings") and based on potential conflict of laws concerns (anticipating that the substantive laws of different jurisdictions may apply to the common law claims of various class members. The defendants also contend that the proposed representative plaintiffs are not in fact representative of the proposed class of investors and that their litigation plan is inadequate.

16 For the reasons that follow I have decided to certify these proceedings, including the statutory claims as pleaded and certain of the common law claims, as a class proceeding. I have also decided that the case is appropriate for a global class.

17 These reasons will address each of the five parts of the test for certification under the CPA, although as will become apparent, and, as is often the case in certification motions, some of the arguments of the parties applied to more than one part of the test.

#### **C. Section 5(1)(a) of the CPA: Do the pleadings disclose a cause of action?**

18 It is acknowledged that the pleadings disclose a cause of action under s. 138.3 of the OSA, that is for the statutory claim of misrepresentation in the secondary market. The focus for the application of section 5(1)(a) and the Rule 21 motion was on the common law claims. Whether the pleadings disclose a cause of action was addressed by the parties in their facts on certification as well as separate facts filed in support of the defendants' Rule 21 motion. The issues addressed in the Rule 21 motion are relevant to s. 5(1)(a) of the CPA and accordingly are addressed in this section of the reasons.

19 In their Fresh Statement of Claim (the "Claim")<sup>5</sup>, the plaintiffs assert common law claims sounding in negligence *simpliciter*, negligent and "reckless" misrepresentation and conspiracy, against IMAX and the Individual Defendants. They also claim that IMAX is vicariously liable for the acts and omissions of the Individual Defendants.

20 In determining whether pleadings disclose a cause of action, the court is required to examine the allegations in the Claim, which are assumed to be true. The test is whether it is plain, obvious and beyond doubt that the plaintiff cannot succeed with the claim (*Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.)). A cause of action which is novel may nevertheless be permitted to proceed, however the claim must "have some elements of a cause of action recognized in law and be a reasonably logical and arguable extension of established law" (*Silber v. DDJ High Yield Fund*, [2006] O.J. No. 2503 (Ont. S.C.J.)).

21 If there is a deficiency in the pleading, the court may grant leave to amend (*Normart Management Ltd. v. West Hill Redevelopment Co.* (1998), 37 O.R. (3d) 97 (Ont. C.A.)).

22 The defendants argue the following with respect to the "cause of action" issue:

1. The pleadings of negligence and negligent misrepresentation are not distinct, and the former is completely subsumed by the latter. Regardless of whether or not these claims are treated as separate causes of action, they suffer from the same fatal defect, that the defendants did not owe a duty of care to the class members, and the plaintiffs have failed to plead any basis on which the court could find a duty to exist. Such a duty is novel, would result in indeterminate liability for pure economic loss, and is inconsistent with the tests enunciated by the Supreme Court of Canada in the context of both negligence *simpliciter* and negligent misrepresentation;

2. The Claim fails to properly plead reliance by any of the plaintiffs or the class members, although reliance is an essential element of misrepresentation. Instead, the Claim invokes the "fraud on the market" theory, which has been rejected by Ontario courts;

3. The pleading of conspiracy cannot succeed since the plaintiffs assert that IMAX's directors and officers conspired with (MAX itself, despite the fact that those directors and officers constitute the very directing mind of IMAX; and

4. The Claim also fails to plead facts which support personal liability against the individual directors and officers, and similarly facts to plead a basis for imposing vicarious liability against IMAX itself.

*1. The Misrepresentation Claims*

23 The plaintiffs plead that there was a "Representation" that "Imax's revenues for the 2005 fiscal year were reported in accordance with GAAP and that such revenues met or exceeded the earnings guidance previously issued by Imax." The Plaintiffs also plead that the Representation was false and, therefore, a misrepresentation (Claim, paras. 1(y) and 2(b)).

24 Negligent misrepresentation and "reckless" misrepresentation are pleaded in paras. 67 to 75 of the Claim as follows:

67. The February Press Release, the Form 10-K, the Annual Report and the March 9, 2006 press releases were prepared, in part, for the purpose of attracting investment and with the intention that members of the investing public would rely upon the documents in making the decision to purchase Imax securities.

68. Each of the documents referred to in paragraph 67 above contained the Representation. The Representation was untrue, inaccurate and misleading.

69. Imax and the Individual Defendants knew that by making the Representation, the price of Imax's publicly-traded securities would rise and remain at artificially high levels and that investors would rely upon the Representation in making their decisions to purchase Imax shares.

70. Imax made the Representation by issuing the:

- (a) February Press Release;
- (b) Form 10-K;
- (c) Annual Report; and
- (d) March 9, 2006 press releases.

71. The Individual Defendants made the Representation by authorizing, permitting and/or acquiescing in:

- (a) the February Press Release; and
- (b) signing the Form 10-K, the Annual Report and the March 9, 2006 press releases.

72. Imax and the Individual Defendants made the Representation negligently or, alternatively, recklessly, caring not whether it was true or false, intending that Neil, Cliff and the other Class Members would rely upon it, which they did to their detriment by purchasing Imax securities during the Class Period and holding the securities beyond the Class Period.

73. Neil relied upon the Representation by reading and relying upon the documents referred to in paragraph 70 above, which contained the Representation. Cliff relied upon the Representation by reading the Form 10-K and an article published by the Globe and Mail dated February 17, 2006 which stated that, "*Imax Corp. jumped 83 cents or 9.13 per cent to 9.92. Large screen movie maker said Friday it expects to meet or beat its 2005 earnings forecast between 35 and 38 cents a share after*

*a record number of installations in the fourth quarter. In the quarter, the company completed 14 theatre installations.*" Cliff also understood and relied on the fact that in preparing its financial statements, Imax was required to follow the applicable rules of accounting, in this, GAAP.

74. Given the relationship as pleaded between Imax's financial results and its publicly-traded securities, Neil, Cliff and each other Class Member relied upon the Representation and the other misstatements alleged herein by the act of purchasing or [acquiring] Imax securities.

75. Neil, Cliff and each other Class Member suffered damages and loss, as particularized below, as a result of relying on the Representation and purchasing the Imax shares.

#### (a) Negligent Misrepresentation and The Duty of Care

25 Generally, a defendant is liable in damages for negligent misrepresentation if (a) the defendant owed a duty of care to the plaintiff based on a "special relationship"; (b) the defendant made an untrue, inaccurate or misleading representation; (c) the misrepresentation was made negligently; (d) the plaintiff reasonably relied on the misrepresentation; and (e) the plaintiff suffered damages as a result of the misrepresentation (*Queen v. Cognos Inc.*, [1993] 1 S.C.R. 87 (S.C.C.), at 110).

26 The defendants contend that there is no proper cause of action in negligent misrepresentation in this case. They ask the court to find that the Company and the Individual Defendants did not owe a duty of care to the plaintiffs, where this would be an improper extension of the existing law of misrepresentation. Whether or not a duty of care is pleaded, the existence of a duty of care is a question of law; if it is plain and obvious that no such duty of care can be recognized, the cause of action must be struck.

27 In *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.), the Supreme Court of Canada held that the two part test in *Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.) applies in the context of all negligence actions, including claims for different forms of economic loss, such as negligent misrepresentation. The first step is to determine whether a *prima facie* duty of care could be owed and the second is to consider whether that duty, if it exists, is negated or limited by policy considerations (*Hercules Management* at para. 21).

28 The defendants acknowledge for the purpose of the motion, that the first part of the *Anns* test is satisfied. They assert that the court should strike the negligent misrepresentation claims on the second part of the test, based on the policy considerations that (a) to recognize a duty of care between the Company and the Individual Defendants and the investing public would lead to indeterminate liability to an unlimited number of persons, and (b) the recognition of a statutory duty of care is unnecessary in light of the statutory remedy for secondary market misrepresentation, and may conflict with that remedy.

29 While earlier cases suggested that a full factual record would be necessary to engage in the second part of the *Anns* test, such that its determination was inappropriate in a Rule 21 motion, (see, for example, *Anger v. Berkshire Investment Group Inc.* (2001), 141 O.A.C. 301 (Ont. C.A.)), the Supreme Court in *Cooper v. Hobart*, [2001] 3 S.C.R. 537 (S.C.C.) had no difficulty considering the second part of the *Anns* test in the appeal of a pleadings motion. The issue to be determined at this stage in the present case accordingly is whether it is plain and obvious that there are policy reasons for refusing to recognize a duty of care between IMAX, its directors and officers and the investing public in respect of negligent misrepresentations in secondary market disclosure.

30 In *Cooper*, at issue was whether a statutory regulator (the registrar of mortgage brokers) would owe a private law duty of care to members of the investing public for negligence in failing to properly oversee the conduct of an investment company licensed by the regulator.

31 McLachlin C.J. and Major J., for a unanimous Court, noted (at para. 36) the categories in which proximity has been recognized, including liability for negligent misstatement. With respect to the second stage of the *Anns* test, they stated (at para. 37):

These [residual policy considerations] are not concerned with the relationship between the parties, but with the effect of recognizing a duty of care on other legal obligations, the legal system and society more generally. Does the law already provide a remedy? Would recognition of the duty of care create the spectre of unlimited liability to an unlimited class? Are there other reasons of broad policy that suggest that the duty of care should not be recognized?

32 The Supreme Court noted that the second stage of *Anns* generally arises only in cases where the duty of care asserted does not fall within an established or analogous category of recovery. Where a duty of care in a novel situation is alleged, it is necessary to consider both stages of the *Anns* test to ensure that before a duty of care is imposed in a new situation, not only are foreseeability and relational proximity present, but there are no broader considerations that would make the imposition of a duty of care unwise (*Cooper* at para. 37).

33 In *Cooper* the Court disposed of the issue under the first branch of the *Anns* test, but went on to conclude that policy considerations would also preclude the recognition of a duty of care by the mortgage brokers regulators, under the second branch of the test.

34 In *Haskett v. Trans Union of Canada Inc.* (2003), 63 O.R. (3d) 577 (Ont. C.A.), the plaintiff, who was the subject of an inaccurate credit report, asserted a claim of negligence against the credit agency that had prepared the report. The defendant moved successfully before the motions judge to have the action dismissed for failure to disclose a cause of action.

35 On appeal Feldman J.A. (for a unanimous court) noted that in *Cooper* (and *Edwards v. Law Society of Upper Canada*, [2001] 3 S.C.R. 562 (S.C.C.), a decision released the same day), the Supreme Court had restricted the application of the second part of the *Anns* test to situations where a new category is asserted. The second stage would not apply where the case falls within either an established or analogous category (*Haskett* at para. 42).

36 Although she viewed the cause of action pleaded in that case as analogous to the recognized category of negligent misrepresentation, so that it was unnecessary to consider the second part of the *Anns* test, Feldman J.A. considered and weighed the policy issues that concerned the motions judge, on the basis that the circumstances could be viewed as a new category.

37 Feldman J.A. concluded that recognizing a duty of care by a credit agency to the subject of a credit report would not create the spectre of unlimited liability to an unlimited class, that the legislation did not already provide an effective alternative remedy, and that at this stage of the proceedings, the recognition of such a duty would not encroach on the law of defamation (paras. 44 to 54). The negligence claim was permitted to proceed.

38 Applying the principle in *Cooper* and *Haskett*, that the second part of the *Anns* test applies only to truly novel categories of negligence and not to "analogous" categories, it may not be necessary in the present case to engage in the second stage of the *Anns* test in considering the common law claim of misrepresentation in the secondary market as pleaded against IMAX and the Individual Defendants.

39 The claim is based on negligent misrepresentation, which is a recognized cause of action, although the plaintiffs propose to extend the claim in circumstances the defendants contend are novel. The representations in question are alleged to have been contained in press releases and the Company's Form 10-K, documents that are prepared under the Company's continuous disclosure obligations, for the purpose of informing the investing public and to put into the public domain the information that permits sellers and buyers to have equal information on which to properly trade in the securities marketplace. It is alleged that the members of the class (who are shareholders who acquired and held their shares in IMAX during a defined period) relied on the representations through their actions in purchasing their shares on an efficient market (Claim, para. 74).

40 While there are no reported cases in Ontario where a common law claim of misrepresentation in the secondary market has been considered at trial, such claims have been permitted to proceed under a Rule 21 or class proceeding certification motion in *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236 (Ont. C.A.) ("Carom [Rule 21-C.A.]"); *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2001] O.J. No. 4620 (Ont. S.C.J.) ("Mondor [Rule 21]"), *Lawrence v. Atlas Cold Storage Holdings Inc.*, [2006] O.J. No. 3748 (Ont. S.C.J.) and *McCann v CP Ships Limited* (3 June 2009) London 46098 (S.C.).<sup>6</sup> These

cases will be considered below, together with certain authorities argued by the defendants in support of their argument that the court should refuse to recognize a duty of care or special relationship between the Company and the Individual Defendants and the investing public.

41 In *Mondor* [Rule 21], the proposed representative plaintiffs brought a class proceeding against a number of defendants, including auditors and financial advisors (the "intermediaries"), for losses suffered through the purchase of shares of YBM Magnex International Inc. on the TSE. The claim, among other matters, alleged negligent misrepresentation at common law, including, as against the auditors, in respect of Bre-X's audited financial statements. The defendants moved to strike the claim on the ground that it failed to disclose a reasonable cause of action. Cumming J. applied the two stage analysis from *Hercules Managements* and refused to strike the claim against the intermediaries.

42 The defendants rely on *Menegon v. Philip Services Corp.*, [2001] O.J. No. 5547 (Ont. S.C.J.) as authority that a duty of care to the secondary market should not be recognized on the second part of the *Anns* test where it would result in the prospect of indeterminate liability, and conflict with an existing statutory remedy.

43 In *Menegon*, Gans J. dismissed a motion to certify a shareholder class action and allowed the defendants' Rule 21 motion to strike, finding that there was no cause of action by purchasers in the secondary market against underwriters and auditors for negligent misrepresentation for errors and omissions contained in a prospectus.

44 The Court held that there was no "special relationship" between the underwriters and investors in the secondary market in circumstances where the underwriters had agreed specifically to assume liability to those who purchased shares offered under the prospectus. Applying the second branch of the *Anns* test, Gans J. found that the recognition of a duty of care in the circumstances would result in the exposure of the underwriters and auditors to liability of an indeterminate amount, for an indeterminate time, in respect to, theoretically, an indeterminate class. He also held that the extension of a duty of care to purchasers of shares in the secondary market would extend liability beyond what was recognized (at that time) in the OSA, and would accordingly be inconsistent with the statutory remedy already provided.

45 *Menegon* was appealed to the Court of Appeal (reported at [2003] O.J. No. 8 (Ont. C.A.)). The appellant asserted that the respondents' duty of care should not have been ruled out at the pleadings stage on the basis of policy concerns, relying on the reasoning of Cumming J. in *Mondor* [Rule 21]. In dismissing the appeal, the Court of Appeal explained the decision in *Mondor* as follows at paras. 13 and 14:

Cumming J. noted that whether a duty of care does or does not exist is a factual enquiry and concluded that "the plaintiff has pleaded material facts in support of the claim of proximity such as to give rise to a *prima facie* duty of care." On the second branch of the test in *Anns*, Cumming J. recognized that something more had to be shown, before imposing a duty on one party to care for the purely economic interest of another, than simply foreseeability that the conduct might cause loss or damage to those interests. He was satisfied, in the case at hand, that the case was sufficiently pleaded. Among other things, he noted that it was pleaded that the defendants intended that the public would rely upon the audited financial statements when making investment decisions.

On the issue of reliance, Cumming J. referred to the American "fraud on the market theory" which "has been described as a legal fiction which has the effect of overcoming the need to prove reliance." He noted that this theory was not part of the law of Canada and that proof of reliance is a necessary ingredient of actions based upon negligent misrepresentation. He noted further that the question of whether a plaintiff has actually relied upon a misrepresentation is a question of fact that may be inferred from all the circumstances and, hence, concluded that "it would be premature to foreclose the consideration of this issue in the case at hand beyond the pleading stage." Consequently, Cumming J. dismissed the motion to strike the pleading.

46 The Court of Appeal concluded that the motions judge in *Menegon* had followed essentially the same analytical framework as the court in *Mondor*. The different results in the two cases were warranted by differences in the pleadings, in particular, the absence of a proper pleading of negligent misrepresentation in *Menegon* against the underwriters and auditors, as opposed to other allegations of misrepresentation against the issuer and its directors, which were not the subject of the certification and

Rule 21 motions. (In fact, certification of the action as a class proceeding as against the issuer for settlement purposes had already taken place: *Menegon v. Philip Services Corp.*, [1999] O.J. No. 4080 (Ont. S.C.J. [Commercial List])).

47 The present case is similar to *Mondor* [Rule 21] and can be distinguished from *Menegon*. The Claim concerns representations made as part of a reporting issuer's continuous disclosure obligations, and not, as in *Menegon*, representations intended for the primary market that were made in a prospectus. The continuous disclosure obligations of a reporting issuer are prescribed by and under the OSA, and the intended recipients of such disclosure are the investing public.

48 Section 138.3 of the OSA provides for liability of issuers, their directors and in certain circumstances their officers and intermediaries to persons who acquired or disposed of an issuer's securities between the time a material misrepresentation in secondary market disclosure was made and its correction. While there is a specific statutory remedy, s. 138.13 of the OSA provides that the statutory right of action for damages and the defences to an action "are in addition to and without derogation from, any other rights or defences the plaintiff or defendant may have in an action brought otherwise than under this Part."

49 There is no inconsistency or conflict between the pursuit of a statutory remedy for secondary market misrepresentation that imposes liability without proof of reliance but subject to a damages cap and other limitations, and a claim alleging a common law duty of care for negligent misrepresentation arising out of the same circumstances, where reliance is an element of the tort. The public policy concern of conflict with an existing statutory regime or remedy does not arise in this case.

50 Concerns about potential indeterminate liability are also not obvious at the pleadings stage of this case. In both *Mondor* and *Menegon* the plaintiffs were suing intermediaries. It is such claims that typically raise the prospect of indeterminate liability to an indeterminate class of persons. In *Hercules Managements*, the Court found that the purpose of an auditor's report was typically to assist the collectivity of shareholders in overseeing management. Any duty of care was owed to the corporation, and not to individual shareholders. The Court refused to extend a duty of care to individual shareholders in respect of their investment decisions (at para. 54) as this would raise the spectre of indeterminate liability. The Court specifically anticipated however that a duty to shareholders in their individual capacity in respect of their investment decisions could arise in circumstances where an auditor knowingly provided to shareholders a negligent report for a specified purpose (at para. 63).

51 In the present case the allegation is that the issuer and the Individual Defendants made the Representation to the investing public with the intention that it would be relied upon to make decisions to purchase IMAX securities. That is, the plaintiffs allege that the intended recipients of the documents containing the Representation, were in fact the investing public, which would include the plaintiffs and the class members.

52 The defendants relied on two other cases that are not directly applicable. In *Alvi v. Misir* (2004), 73 O.R. (3d) 566 (Ont. S.C.J. [Commercial List]), claims by shareholders against certain directors of a corporation were based on fiduciary and statutory duties owed to the corporation. This was not a case involving allegations of misrepresentation; rather the shareholders alleged that certain decisions of the directors on behalf of the corporation had devalued their shares. The Court concluded that the claims were derivative (that is a claim of the corporation that could only be pursued by a shareholder or other party with leave under the applicable corporations statute).

53 In *NPV Management Ltd. v. Anthony*, 2003 NLCA 41 (N.L. C.A.), the Newfoundland Court of Appeal reversed the decision of a motions judge and struck a number of claims against individual directors of a corporation, Compak. Again, the principal reason for striking the claims was that they were derivative and involved harm to the corporation as a result of alleged breaches of fiduciary and other duties owed by the directors to the corporation. With respect to an alleged personal claim (that NPV had purchased more shares in Compak in reliance on certain representations by its directors) the Court of Appeal held that there was a prospect of indeterminate liability, where the statements had been made to the public at large, presumably pursuant to continuous disclosure obligations. The Court noted (at para. 57) that the statement of claim had not alleged that the representations were made for the purpose of providing information on which personal investment decisions could be made. The absence of such a pleading was fatal (para. 61).

54 In the present case there is no question of a derivative claim. The allegations in the Claim are with respect to duties alleged to have been owed by the Company and the Individual Defendants directly to the investing public. In contrast to the pleading in *NPV Management*, the Claim specifically alleges at para. 67 that the IMAX press releases, the Form 10-K and the Annual Report "were prepared in part for the purpose of attracting investment and with the intention that members of the investing public would rely upon the documents in making the decision to purchase IMAX securities".

55 I am not satisfied that it is plain and obvious that the claim of negligent misrepresentation against IMAX and the Individual Defendants would fail to meet the second part of the *Anns* test. Again, the defendants do not argue that there is no duty of care under the first stage of the test; rather they assert that there are policy reasons for not recognizing a duty of care by the Company and its directors with respect to a misrepresentation to the secondary market. In my view, it is not plain and obvious that the policy reasons asserted by the defendants should preclude the common law claims of misrepresentation in the secondary market from being pursued at this stage in the litigation.

#### **(b) Reliance as an Element of Misrepresentation**

56 The Claim pleads individual reliance on the Representation by the representative plaintiffs Silver and Cohen, in the case of Silver by reading and relying upon the Form 10-K and press releases and in the case of Cohen by reading the 10-K and a newspaper article (at para. 73). There is no allegation that other class members individually relied upon the alleged misrepresentations after reading documents in which they were contained. The Claim pleads however that Silver, Cohen and each other class member relied upon the Representation and the other misstatements "by the act of purchasing or [acquiring] IMAX securities" (at para. 74).

57 The defendants assert that the failure to plead individual and direct reliance by each of the plaintiffs is fatal to the claims of misrepresentation. The plaintiffs submit that they have properly pleaded reliance by each class member through the act of purchasing or acquiring IMAX securities, and that paras. 57 to 62 of the Claim are a pleading of the "efficient market theory", which has been accepted as a sufficient pleading of reliance in securities cases alleging misrepresentation to the investing public.

58 The defendants assert that the "efficient market" theory as pleaded by the plaintiffs is the same as the fraud on the market theory which was rejected by Winkler J. in *Carom v. Bre-X Minerals Ltd.* (1998), 41 O.R. (3d) 780 (Ont. Gen. Div.) "*Carom [Motion to Amend]*" and in subsequent cases.

59 Paras. 57 to 62 and 74 of the Claim are as follows:

57. The price of Imax's publicly-traded securities was directly affected by the periodic disclosures regarding Imax's financial results. Imax and the individual Defendants were at all material times aware of the effect of Imax's disclosures about its financial results upon the price of its publicly-traded securities.

58. The February Press Release, the Form 10-K, the Annual Report, the March 9, 2006 press releases, each of which contained the Representation, were filed with SEDAR, the TSX and the NASDAQ and thereby became immediately available to, were reproduced for inspection by and were used by the Class Members, the public, financial analysts and the financial press through the internet and financial publications.

59. Imax and the Individual Defendants routinely transmitted the documents referred to above to the financial press, financial analysts and certain prospective and actual holders of the Imax securities.

60. Imax and the Individual Defendants regularly communicated with the public investors and financial analysts via established market-communication mechanisms, including through regular dissemination of press releases on newswire services in Canada and the United States. The price of Imax's publicly-traded securities were directly affected each time Imax and the Individual Defendants communicated new, material information about its financial results to the public.

61. Imax was the subject of analysts' reports that incorporated the material financial information in the documents referred to above, with the effect that any recommendation in such reports during the Class Period were based, in whole or in part, upon material over-statements of Imax's financial results.

62. Imax's securities were traded on the TSX and NASDAQ, which are efficient and automated markets. The price at which Imax securities traded on the TSX and NASDAQ incorporated material information about Imax's financial results which was disseminated to the public through the documents referred to above, distributed by Imax and the Individual Defendants as well as by other means.

.....  
74. Given the relationship as pleaded between Imax's financial results and its publicly-traded securities, Neil, Cliff and each other Class Member relied upon the Representation and the other misstatements alleged herein by the act of purchasing or [acquiring] Imax securities.

60 In *Carom [Motion to Amend]*, Winkler J. dismissed a motion by the plaintiffs, shareholders in Bre-X Minerals Ltd. ("Bre-X"), seeking to amend their statements of claim in seven intended class proceedings to add the "fraud on the market" theory from American law to their claims. The causes of action were framed in negligence, negligent and fraudulent misrepresentation, conspiracy, breach of fiduciary duty, and breach of the *Competition Act*

61 Winkler J. described the fraud on the market theory as creating a rebuttable presumption of reliance on certain misrepresentations, thus obviating the need to prove such reliance on an individual basis. Reliance is presumed when there is proof that the market price of the shares under consideration reflected the pleaded misrepresentations (at pp. 785-786). Winkler J. extensively reviewed the development of the fraud on the market theory in U.S. jurisprudence, and found that the conditions for recognizing such a theory in certain U.S. cases (procedural restrictions of limitations and the class action certification test requiring a "predominance of common issues") did not apply in Ontario.

62 Winkler J. held (at p. 790) that it is settled law in Canada that actual reliance is essential to a common law cause of action in fraudulent or negligent misrepresentation (citing *Parna v. G. & S. Properties Ltd.* (1970), [1971] S.C.R. 306 (S.C.C.), at 316; *Queen v. Cognos Inc.*, at 110 and *Hercules Managements* at para. 18). He noted (at p. 792) that the fraud on the market theory was rejected by the British Columbia Supreme Court in *Kripps v. Touche Ross & Co.* (1990), 52 B.C.L.R. (2d) 291 (B.C. S.C. [In Chambers]), at 307 (although the Court of Appeal left the issue open at (1992), 69 B.C.L.R. (2d) 62 (B.C. C.A.)), and that the common law provides no examples of the application of the fraud on the market theory in Canadian law.

63 *Carom [Motion to Amend]* was followed in *Shaw v. BCE Inc.*, [2003] O.J. No. 2695 (Ont. S.C.J.), striking out a claim for negligent misrepresentation in a prospectus where the plaintiff had not pleaded reliance on any public document issued by the defendants, and in *Deep v. M.D. Management*, [2007] O.J. No. 2392 (Ont. S.C.J.), aff'd [2008] O.J. No. 961 (Ont. C.A.) where the Court dismissed a misrepresentation claim by a Nortel shareholder where reliance on the alleged statements had not been pleaded.

64 *Carom* was also followed in *Mondor [Rule 21]*. In that case, Cumming J. held in *obiter* that the fraud on the market theory is not recognized under Canadian securities law, and that actual reliance is a necessary component under Canadian law concerning negligent and fraudulent misrepresentation.

65 In *Mondor [Rule 21]*, however, Gumming J. permitted the claims for negligent and fraudulent misrepresentation to proceed, notwithstanding the defendants' argument that individual reliance could not be proven. He referred to case law to the effect that whether or not a person relied on a misrepresentation may be inferred from all the circumstances (*NBD Bank, Canada v. Dofasco Inc.* (1999), 46 O.R. (3d) 514 (Ont. C.A.) and *Kripps v. Touche Ross & Co.* (C.A.)), and noted at para. 68:

The plaintiffs claim that if one were to assume for the purposes of this motion that the market price of YBM shares, from time to time, reflected the "Representation", it is open to a trial judge to infer that as a question of fact a putative class member relied on the "Representation" made by Parente, Deloitte and others when a class member purchased YBM shares in the secondary market.

66 Cumming J. concluded that it would be premature to foreclose the consideration of this issue at the pleadings stage. While rejecting the "deemed reliance" approach of the fraud on the market theory, Cumming J. permitted the claim to proceed. It would be open to the plaintiffs to attempt at trial to establish reliance by class members as a fact by reference to the efficient market theory. Later, when certifying the class for settlement in *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2002] O.J. No. 1855 (Ont. S.C.J.), at para. 22 ("Mondor [Settlement]"), Cumming J. noted, as part of his analysis in approving the certification and proposed settlement, that there was uncertainty whether reliance could be established "by the simple act of purchase of the shares or whether each shareholder would have to establish individually that he or she relied upon a misrepresentation".

67 In *Lawrence v. Atlas Cold Storage Holdings Inc.* [2006 CarswellOnt 5716 (Ont. S.C.J.)], Hoy J. permitted an "efficient market" misrepresentation claim to proceed in a pleadings motion in a proposed class proceeding. The action was based on allegations of misrepresentation in prospectuses under which units of Atlas Cold Storage Income Trust were sold to the public and in financial statements and a press release.

68 Hoy J. noted that the plaintiffs did not specifically plead that they received, read or relied on any of the prospectuses, the financial statements or a related press release. Instead, they pleaded that each class member relied on certain reports, opinions and statements by their conduct in purchasing units. These allegations were supplemented by various particulars in support of a direct factual inference of reliance.

69 Relying on Cumming J.'s analysis in *Mondor [Rule 21]*, Hoy J. concluded that whether or not a plaintiff has reasonably relied on a misrepresentation is a question of fact. The pleading that units were purchased and the plaintiffs' position that they would prove reliance by satisfying the trial judge that in all of the circumstances actual reliance on the alleged misrepresentation should be inferred, were sufficient to save the reliance-based claims.

70 In the present case, following the decisions of Cumming J. in *Mondor [Rule 21]* and Hoy J. in *Lawrence*, I find that the Claim discloses a cause of action in negligent misrepresentation against the Company and the Individual Defendants, notwithstanding the absence of a pleading of direct individual reliance by each class member. As Wilson J. stated in *Hunt v. T & N plc* at pp. 990-991:

The fact that a pleading reveals "an arguable, difficult or important point of law" cannot justify striking out part of the statement of claim. Indeed, I would go so far as to suggest that where a statement of claim reveals a difficult and important point of law, it may well be critical that the action be allowed to proceed. Only in this way can we be sure that the common law in general, and the law of torts in particular, will continue to evolve to meet the legal challenges that arise in our modern industrial society.

71 I do not find it necessary to consider in detail the plaintiffs' alternative argument that negligent misrepresentation may be made out without proof of reliance where the plaintiff can prove that the defendants' conduct caused the plaintiff damages by some means other than reliance.

72 The plaintiffs rely on a number of cases, beginning with a statement of McLachlin J. (as a trial judge) in *Yorkshire Trust Co. v. Empire Acceptance Corp.* (1986), 24 D.L.R. (4th) 140 (B.C. S.C.), at p. 147:

It is my view that in the appropriate case, where proximity and the necessary causal connection between the negligence and the loss can be established apart from reliance, recovery may be had for a negligent statement without reliance whether on the basis of simple negligence or an extension of the doctrine propounded by *Hedley Byrne*.

73 Other cases where claims were permitted to proceed without the element of reliance involving what might be characterized as a negligent misstatement, are more properly examples of negligence and not negligent misrepresentation claims: In *Spring v. Guardian Assurance plc*, [1994] 3 All E.R. 129 (U.K. H.L.) and *Haskett*, the courts recognized that a duty of care could be owed by the defendants to the subjects of inaccurate reference letters and credit checks, notwithstanding that the statements contained in the documents were intended for other audiences and not to be relied upon by the plaintiffs. In *Lowe v. Guarantee Co. of*

*North America* (2005), 80 O.R. (3d) 222 (Ont. C.A.) the court recognized a duty of care owed by health care professionals in a designated assessment centre to the subject of an evaluation. In *Collette v. Great Pacific Management Co.*, 2004 BCCA 110 (B.C. C.A.), leave to appeal to S.C.C. refused [2004] S.C.C.A. No. 174 (S.C.C.), the B.C. Court of Appeal held that reliance was not a necessary element in establishing a duty of care of financial advisers/investment brokers in respect of the plaintiffs' investments, where the tort alleged was a breach of duty in undertaking due diligence before offering the units for sale, and ultimately the claims in negligence (and not negligent misrepresentation) were certified.

74 Rady J. followed this line of cases in permitting claims of negligent misrepresentation and negligence to proceed in her certification decision in *McCann*, also involving common law claims for misrepresentation in the secondary market following a restatement of the defendant corporation's financial results. Rady J. held that it was not plain and obvious that the plaintiff had to plead reliance in order to advance a claim in negligent misrepresentation. She adopted the same approach as Rooke J. adopted in *Eaton v. HMS Financial Inc.*, 2008 ABQB 631 (Alta. Q.B.), where he held that a trial on the common issues would be necessary to determine whether, and to what extent, individual reliance would need to be proven.

75 While I do not find the cases relied on by the plaintiffs persuasive as to the ability of a court to find liability for negligent misrepresentation without proof of reliance in light of the repeated statements by our courts (including the Supreme Court of Canada in *Queen v. Cognos Inc.*) that reliance is an essential element of negligent misrepresentation, it is unnecessary to specifically rule on this issue at this stage in the proceedings. For the purpose of certification, the question is whether the Claim discloses a cause of action in negligent misrepresentation. I have concluded that it does disclose such a cause of action, notwithstanding the absence of a pleading of direct individual reliance by each class member. In the event that the plaintiffs are unable to prove reliance, it will remain open for them to argue at trial that reliance is not required.

### (c) "Reckless" Misrepresentation

76 Liability for fraudulent misrepresentation requires that (a) the defendant made the misrepresentation knowing that it was false, or recklessly, caring not whether it was true or false, (b) the defendant intended the plaintiff, or a class of persons including the plaintiff, to rely upon the misrepresentation, (c) the plaintiff and the other class members relied upon the representation to their detriment, suffering loss or damage (*Carom v. Bre-X Minerals Ltd.*, [1998] O.J. No. 1428 (Ont. Gen. Div.) ("Carom [Rule 21-Gen. Div.]") at paras. 24-25 and *Mondor*[Rule 21] at para. 33).

77 The Claim pleads all of the required elements for fraudulent misrepresentation. Although the plaintiffs assert a claim for "reckless" misrepresentation, it is in substance a pleading of fraudulent misrepresentation, alleging the second branch of the knowledge element, that the defendants made the misrepresentation recklessly, not caring whether it was true or false.

78 In *Canadian Imperial Bank of Commerce v. Deloitte & Touche*, [2003] O.J. No. 2069 (Ont. Div. Ct.), the Divisional Court concluded that the motions judge had erred in dismissing a claim for reckless misrepresentation (which was in substance a claim of fraudulent misrepresentation) on the grounds that the claim was bald, the plaintiff had failed to plead fraud with particularity, and where negligent and reckless misrepresentation were pleaded disjunctively on the same allegations of fact. The Court concluded that, given the low threshold to sustain a pleading at this stage, the motions judge erred in striking the claim for reckless misrepresentation (at para. 23). In *Mondor* [Rule 21] at para. 70, Cumming J. considered a claim of "reckless misrepresentation" to be tantamount to fraudulent misrepresentation, and permitted that claim to proceed. Rady J. adopted the same approach in *McCann* (at para. 43).

79 The concern as to indeterminate liability expressed in *Hercules Managements* has no application to a claim of fraudulent misrepresentation. If the defendants acted recklessly in making the Representation, with the intention that class members rely upon it, there is no policy reason to limit liability (*Mondor* [Rule 21], at para. 70; *Hercules Managements*, at paras. 40-41).

80 Accordingly, the Claim discloses a cause of action which is properly pleaded in fraudulent misrepresentation.

### 2. Negligence simpliciter

81 Negligence is pleaded in paras. 63 to 66 of the Claim as follows:

63. Imax and the Individual Defendants owed a duty to Neil, Cliff and the Class Members, at law and under the provisions of the *Securities Act*, to disseminate promptly, or to ensure the prompt dissemination of complete and accurate statements regarding Imax's business and affairs, and promptly to correct previously-issued, materially inaccurate information, to permit, Imax's publicly-traded securities to trade upon complete and accurate information.

64. The reasonable standard of care expected in the circumstances required Imax and the Individual Defendants to act fairly, reasonably, honestly, and candidly in fulfilling the duty described in paragraph 63.

65. Imax and the Individual Defendants failed to meet the standard of care required for the reasons particularized in the following paragraphs.

66. Imax and the Individual Defendants were negligent in that:

- (a) they failed to exercise the degree of care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances as required by law;
- (b) they signed the Form 10-K and the Annual Report when they knew or reasonably ought to have known that the documents contained the Representation which was false;
- (c) they authorized statements, announcements, press releases, filings and other public documents containing the Representation;
- (d) they failed to maintain appropriate internal policies, controls and procedures to ensure that the financial statements adequately and fairly presented the financial position of Imax;
- (e) they knew or ought to have known that the 2005 reported revenue, gross earnings, net earnings, retained earnings and earnings per share of Imax were not fairly stated;
- (f) they failed to properly consider all available information and reports respecting the revenue and net earnings of Imax; and
- (g) they failed to comply with the principles of GAAP, including the following:
  - (i) interim financial reporting should be based upon the same accounting principles and practices used to prepare annual financial statements;
  - (ii) financial reporting should provide information that is useful to present to potential investors and creditors and other users in making rational investment, credit, and similar decisions;
  - (iii) financial reporting should provide information about the economic resources of an enterprise, the claims to those resources, and effects of transactions, events, and circumstances that change resources and claims to those resources;
  - (iv) financial reporting should provide information about an enterprise's financial performance during a period;
  - (v) completeness, meaning that relevant information necessary to ensure the fair presentation of underlying events and conditions is provided;
  - (vi) consistency in the application of financial accounting and reporting policies;
  - (vii) financial reporting should be reliable in that it represents what it purports to represent; and

(viii) conservatism be used as a prudent reaction to uncertainty to try to ensure that uncertainties and risks inherent in business situations are adequately considered.

82 The defendants contend that there is no proper cause of action for negligence based on the pleadings in the Claim. The allegations of negligence are in relation to the same alleged disclosure of false information that underlies the misrepresentation claims. The pleading cannot proceed as a claim of negligence, as that would avoid the requirement in a negligent misrepresentation claim to prove reliance.

83 In *Deep*, D. Brown J. struck out pleadings of negligent misrepresentation and negligence by the plaintiff, a Nortel shareholder, for damages for losses sustained in his registered retirement investment plan resulting from the decline in the price of Nortel stock. Allegations in the statement of claim had already been struck, with leave to amend, and the Divisional Court had provided specific direction as to the pleading of misrepresentation and the need to assert reliance (*Deep v. M.D. Management*, [2006] O.J. No. 221 (Ont. Div. Ct.)). The claim was amended and expanded, and the Nortel defendants moved again to strike the pleading.

84 The negligence pleading was that the Nortel defendants owed a duty of care based on a special relationship between the parties - "they stood in a special relationship of proximity between the purchaser and holders of Nortel securities". The duty of care was "to accurately represent Nortel's financial situation and disclose any material changes promptly and truthfully". The alleged nature of the breach of this duty was twofold: (i) misrepresentation of Nortel's situation by the non-disclosure of facts and (ii) misrepresentations "by way of lack of disclosure in the second and third quarter and statements which were forward looking or projections were made for the specific purpose of inducing shareholders and investors to purchase shares, hold their shares and/or acquire more shares". The amended claim also relied in support of the negligence claim on the obligation imposed by s. 75(1) of the OSA on a reporting issuer to report material changes.

85 D. Brown J. struck the pleading of negligent misrepresentation, based on the failure of the plaintiff once again to plead reliance. He also struck the claim of negligence, finding that such pleading was in fact an alternative pleading of the same cause of action, negligent misrepresentation.

86 In *McCann*, Rady J. permitted claims of negligence and negligent misrepresentation to proceed notwithstanding that there was overlap in the pleadings. In that case, she found that a duty of care had been pleaded that was distinct from the duty to provide accurate information (that the defendants failed to properly integrate CP Ships' disparate lines and failed to acquire and use appropriate information technology). Rady J. would also have permitted the negligence claim to proceed in any event, as a novel claim.

87 In the present case I find that the pleadings of negligence are in substance a pleading of negligent misrepresentation. The duty of care is framed as a duty at law and under the OSA owed by IMAX and the Individual Defendants to the plaintiffs and class members to "disseminate promptly, or to ensure the prompt dissemination of complete and accurate statements regarding IMAX's business and affairs, and promptly to correct previously issued, materially inaccurate information, to permit IMAX's publicly-traded shares to trade upon complete and accurate information" (para. 63). The standard of care is pleaded as requiring IMAX and the Individual Defendants "to act fairly, reasonably, honestly, and candidly" in fulfilling the aforesaid duty. While some of the seven particulars of negligence pleaded in para. 66 appear to cast the net more broadly beyond negligent misrepresentation (for example, the pleading of a failure to maintain appropriate internal policies and procedures to ensure that the financial statements adequately and fairly presented the financial position of IMAX), they nevertheless are pleaded as particulars of the breach of duty of care to disseminate accurate information to the securities market.

88 The negligence pleading in this case is in substance a pleading of negligent misrepresentation without the ingredient of reliance. There is also no pleading that the alleged negligence caused damage to the plaintiffs and no separate claim for a remedy based on negligence. Accordingly, the claims sounding in negligence *simpliciter* (paras. 63 to 66 of the Claim) will not be permitted to proceed and the Claim shall be amended accordingly.

### 3. Conspiracy

89 Conspiracy is pleaded in paras. 52 to 56 of the Claim as follows:

52. From on or about October 1, 2005 to on or about August 9, 2006, at Mississauga, Ontario, New York, New York and elsewhere Imax, Gelfond, Wechsler and Joyce, wrongfully, unlawfully, maliciously and lacking bona fides, agreed together, the one with the other and with persons unknown, to, among other things, overstate the revenues and net earnings of Imax for the fourth quarter and fiscal year ending on December 31, 2005.

53. Some, but not all of Imax's, Gelfond's, Wechsler's and Joyce's predominant purposes, concerns and motivation were to:

- (a) injure the plaintiffs and the Class Members by causing them to purchase Imax shares at inflated prices;
- (b) attract an acquirer or merger partner;
- (c) inflate the price of Imax's shares;
- (d) obtain an artificially high purchase price for Imax; and
- (e) increase the value of their own holdings in Imax.

54. In furtherance of the conspiracy, the following are some, but not all of the acts carried out or caused to be carried out by Imax, Gelfond, Wechsler and Joyce, or some of them:

- (a) they recognized revenue in the fourth quarter of 2005 on ten theatre systems even though sufficient and appropriate evidence did not exist that such systems had been substantially installed as operational Imax facilities, that Imax had fulfilled its obligations as vendor or that revenues had been "earned" in accordance with GAAP;
- (b) they inappropriately implemented revenue recognition procedures that allowed Imax to segregate revenues from different elements of an Imax theatre system, and recognize those revenues in different quarters, even though the customer transactions were not suited to such accounting treatment;
- (c) they deviated from GAAP in the preparation of the financial statements;
- (d) they deviated from the accounting principle of consistency in the preparation of financial statements;
- (e) they authorized statements, announcements, press releases, filings and other public documents containing the Representation;
- (f) they engaged in a pattern of categorizing Imax theatre systems as being installed in circumstances when the location was not fit for installation;
- (g) they engaged in a pattern of categorizing Imax theatre systems as being installed in circumstances when essential components of the Imax system were absent;
- (h) they permitted Imax and the Individual Defendants to make the Representation which was false;
- (i) they made, or failed to take any steps to prevent Imax from making the Representation in statements, announcements, press releases, filings and other public documents;
- (j) they made, or caused Imax to make, announcements about its revenue and net earnings when they knew there was no reasonable foundation, in fact, for these net earnings;
- (k) they falsely stated that Imax had revenue of US\$49,310,000 for the fourth quarter of the fiscal year ended 2005;
- (l) they falsely stated that Imax had revenue of US\$144,930,000 for the fiscal year ended 2005;

- (m) they prepared and issued the February Press Release falsely stating that it expected to meet or exceed 2005 earnings guidance;
- (n) they prepared and issued the Form 10-K and the Annual Report falsely stating that Imax's revenue was US \$49,310,000 for the fourth quarter of fiscal 2005; and
- (o) they prepared and issued the Form 10-K and the Annual Report falsely stating that Imax's net earning was US \$0.29 per share for the fourth quarter of fiscal 2005 and US\$0.40 per share for the fiscal year 2005.

55. The conspiracy was unlawful because Imax, Gelfond, Wechsler and Joyce knowingly and intentionally overstated the revenue and net earnings of Imax and in doing so violated ss. 77(1) and 78(1) of the *Securities Act* and similar regulatory legislation in other jurisdictions, including ss. 12, 13 and 18 of the [*U.S. Securities Exchange Act of 1934*], and the reporting requirements of the NASDAQ and the TSX including Part IV(F) of the TSX Company Manual and Rule 4-201 of the TSX Rule Book.

56. The conspiracy was directed towards Neil, Cliff and the other Class Members. Imax, Gelfond, Wechsler and Joyce knew in the circumstances that the conspiracy would, and it did, cause loss to Neil, Cliff and the Class Members.

90 In *Normart Management Ltd. v. West Hill Redevelopment Co.* (1998), 37 O.R. (3d) 97 (Ont. C.A.), at p. 98, Finlayson J.A. for the Court of Appeal described the requirements for pleading the tort of conspiracy (citing *Bullen & Leake and Jacob's Precedents of Pleadings*<sup>7</sup>) as follows:

[T]he statement of claim should describe who the several parties are and their relationship with each other. It should allege the agreement between the defendants to conspire, and state precisely what the purpose or what were the objects of the alleged conspiracy, and it must then proceed to set forth, with clarity and precision, the overt acts which are alleged to have been done by each of the alleged conspirators in pursuance and in furtherance of the conspiracy; and lastly, it must allege the injury and damage occasioned to the plaintiff thereby.

91 The defendants' principal objection with respect to the pleading of conspiracy<sup>8</sup> is that the conspiracy is alleged to have occurred between IMAX and the Individual Defendants, each of which is identified as a director and/or officer at the time. It is impossible for a person (in this case the Company) to conspire with itself. See *Accord Business Credit Inc. v. Bank of Nova Scotia*, [1997] O.J. No. 2562 (Ont. Gen. Div.), at para. 34, where Cumming J. noted:

When an officer is acting within the scope of his authority in the best interests of the corporation such that the actions complained of are the actions of the corporation itself and not the actions of the officer, then it is not logical to say that there can be a civil conspiracy between the officer and his corporation.

92 The plaintiffs contend that the conspiracy allegations in the Claim are against IMAX and the Individual Defendants acting in an independently tortious manner; that is, for which they would be held personally liable. In *Normart Management* at p. 102, Finlayson J.A. set out the test for civil liability of directing minds as follows:

It is well established that the directing minds of corporations cannot be held civilly liable for the actions of the corporations they control and direct unless there is some conduct on the part of those directing minds that is either tortious in itself or exhibits a separate identity or interest from that of the corporations such as to make the acts or conduct complained of those of the directing minds.

93 An action may proceed against employees and officers of a corporation, for acts and omissions which occurred in the course of their employment, if the conduct alleged amounts to "fraud, deceit, dishonesty or want of authority on the part of [the] employees or officers.": *Montreal Trust Co. of Canada v. ScotiaMcLeod Inc.* (1995), 26 O.R. (3d) 481 (Ont. C.A.), at para. 25.

94 In the present case, while the plaintiffs have alleged that the acts or omissions alleged in the Claim were authorized, ordered and done by the Individual Defendants while engaged in the management, direction, control and transaction of its business affairs and are therefore acts and omissions for which IMAX is vicariously liable (paras. 85 and 86), the plaintiffs have also alleged that the actions of the Individual Defendants are independently tortious and that such defendants are personally liable (para. 87).

95 The allegations against the Individual Defendants in the Claim include the assertion that they were acting "wrongfully, unlawfully, maliciously and lacking bona fides" (para. 52) and that they were motivated to increase the value of their own holdings in IMAX (para. 53(e)).

96 The Claim pleads all of the necessary elements of the cause of action of conspiracy. There are allegations in the Claim that may, if true, give rise to personal liability on the part of the Individual Defendants. Their conduct is at issue both as agents for the Corporation and in their personal capacities. It is not therefore plain and obvious that the conspiracy claim is deficient, and accordingly such claim will not be struck.

#### *4. Vicarious Liability*

97 In paragraphs 85 and 86 of the Claim, the plaintiffs plead that IMAX is vicariously liable for the acts and omissions of the Individual Defendants, that were authorized, ordered and done by the Individual Defendants and IMAX's other agents, employees and representatives while engaged in the management, direction, control and transaction of its business affairs. This pleading, when read within the Claim as a whole, is a sufficient pleading of vicarious liability, and accordingly such claim will not be struck.

### **D. Section 5(1)(b) of the CPA: Is there an identifiable class represented by the representative plaintiffs?**

#### *1. The Proposed Class Definition*

98 The plaintiffs propose the following worldwide class definition:

"Class" or "Class Members" means all persons, other than Excluded Persons, who acquired securities of Imax during the Class Period on the TSX and on NASDAQ and held some or all of those securities at the close of trading on August 9, 2006.

"Class Period" is defined in the Claim as "the period from and including the opening of trading on the TSX and NASDAQ on February 17, 2006 to and including the close of trading on the TSX and NASDAQ on August 9, 2006".

#### *2. The "Identifiable Class" Requirement*

99 Class definition "identifies the individuals entitled to notice, entitled to relief (if relief is awarded), and bound by the judgment." The definition should state objective criteria by which members of the class can be identified and should not depend on the outcome of the litigation (*Western Canadian Shopping Centres* at para. 38).

100 A class may be identifiable even if the identities of all of the prospective members are unknown to the representative plaintiffs. Indeed, s. 6 of the CPA provides that the court shall not refuse to certify a proceeding as a class proceeding solely on the ground that "the number of class members or the identity of each class member is not known".

101 Section 5(3) of the CPA requires each party to provide by affidavit its best information on the number of members in the class. I was unable to find any such statements in the affidavit materials filed in this case. The identity of IMAX shareholders as at specific dates may be ascertained from the Company's records, recognizing that shares may be held by brokers or other intermediaries.<sup>9</sup>

102 There is no question that the proposed class meets the requirement for an identifiable class under s. 5(1)(b). The proposed class members are identified by objective and readily verifiable criteria; that is, that they purchased on the TSX and on NASDAQ and held IMAX shares during the Class Period.

*3. Is the proposed class over-inclusive as including claims of persons who may have no claims?*

103 The defendants assert that the proposed class is over-inclusive because the class as proposed, of all shareholders of IMAX who acquired and held their shares during the Class Period, may include persons who have no claim because they may not have known of or relied upon the alleged misrepresentation or they may not have suffered damages as a result.

104 The defendants rely on *Mouhteros v. DeVry Canada Inc.* (1998), 41 O.R. (3d) 63 (Ont. Gen. Div.). In that case, Winkler J. refused to certify a proposed class consisting of all students who had attended the defendant's college within a period of six years in part because it would include people who had no claim against the defendant as they had not received or relied upon the alleged misrepresentations that formed the basis of the action. Underlying the court's decision however was the fact that there were numerous alleged representations published in a variety of different television commercials and newspaper advertisements, and communicated verbally by admissions officers during the six year period. The nature of the representations and whether they were made negligently or fraudulently would vary with the individual students' programs and the conditions existing at each campus. As such, there were no common issues respecting misrepresentation.

105 In this case, by contrast, the core of the common law misrepresentation claim is that a single misrepresentation (the "Representation") was made by the Defendants (albeit through four communications) that affected the market price of all IMAX securities during the Class Period, and that in all of the circumstances, reliance by all class members should be inferred as a question of fact. This is not a case where multiple misrepresentations in varied circumstances are alleged. There is clearly a commonality of interests between the class members in this case, that is shared by the proposed representative plaintiffs.

106 In any event, a proposed class will not be overbroad simply because it may include persons who ultimately will not have a claim against the defendants (*Bywater v. Toronto Transit Commission*, [1998] O.J. No. 4913 (Ont. Gen. Div.), at paras. 10-11; *Boulanger v. Johnson & Johnson Corp.*, [2007] O.J. No. 179 (Ont. S.C.J.), at para. 22, leave to appeal to the Divisional Court refused (Ont. Div. Ct.)).

107 The submission by the defendants in this case that the class is overbroad because some of the class members may not have claims depends on their contention that there will be individual issues (such as reliance and damages) to be decided after the common issues have been determined. While the plaintiffs assert that reliance (based on the efficient market theory) and damages (contending that an aggregate assessment will be appropriate) will not be individual issues in this case, even if they are wrong and individual issues remain after the determination of the common issues, this is not an impediment to certification. As Cullity J. noted in *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (Ont. S.C.J.), at para. 69, "whenever, because of the existence of individual issues, a judgment on the common issues in favour of the plaintiffs will not determine a defendant's liability, it will always be possible - and invariably likely - that an acceptable class will include persons who will not have valid claims".

*4. Certification of a Global Class*

108 The principal challenge by the defendants to the proposed class definition is that it is overbroad because it includes non-residents of Canada, the resolution of whose claims may depend on the application of the laws of other jurisdictions. The question of whether a global class should be certified raises issues of the jurisdiction that may be exercised by an Ontario court over nonresident class members, and whether, as a matter of discretion, such jurisdiction should be exercised by certifying a global class. The defendants argued the question as part of the "preferable procedure" analysis<sup>10</sup>, and indeed the discussion that follows addresses the considerations relevant to both ss. 5(1)(a) and (d) of the CPA. For convenience, the issue of whether a global class can and should be certified will be addressed at this point in these reasons.

**(a) Positions of the Parties**

109 The plaintiffs assert that the Ontario court has clear jurisdiction over the subject matter of the litigation. IMAX is a Canadian corporation with its registered office in Mississauga. The alleged misconduct relates to the accuracy of the Company's financial statements which were prepared and audited in Ontario. The claims of all class members are related to claims that are properly asserted by the representative plaintiffs in Ontario. The class proceedings objectives of judicial economy, access to justice and behaviour modification would best be met by certifying a class defined to include all persons, including non-residents, who acquired IMAX securities on the TSX and NASDAQ and held such securities during the class period.

110 The defendants, while acknowledging the authority of the court to certify a class with non-resident members, submit that it would be wrong to certify a global class in the present case. According to IMAX's records as of February 14, 2005, there were 39,511,959 shares outstanding. Approximately 10-15% of the shareholders were Canadian residents, with the balance of outstanding common shares held by American or other non-Canadian residents.<sup>11</sup> From this, the defendants infer that the proposed global class would contain a similar percentage of non-Canadian resident shareholders. The defendants suggest that it would be extraordinary for the court to recognize a class where most members are from outside the jurisdiction.

111 The defendants propose that if a class is certified, it should consist of TSX purchasers of IMAX shares resident in Canada, and that it would be premature to certify a worldwide class, particularly where there is an existing proceeding in the U.S. They argue that it would be better to certify the Canadian class only, with leave to the plaintiffs to return to the court, depending on what may occur in the U.S. Proceedings (presumably if the U.S. court refuses certification).

112 The final argument of the defendants in opposition to the certification of a global class is based on anticipated conflict of laws concerns. A worldwide class would include class members who individually would have received and relied upon the misrepresentation, and suffered the consequences of the misrepresentation, in places other than Ontario. Their claims may be subject to the laws of various jurisdictions, adding complexity to the proceedings. As a result, a class proceeding including U.S. residents would not be the "preferable procedure".

113 The position taken by the defendants in this motion with respect to certification of a global class contradicts their arguments made in opposition to certification in the U.S. Proceedings.<sup>12</sup> (IMAX's brief and other documents in the U.S. Proceedings were filed on consent in these proceedings, and were the subject of argument in April 2009).

114 Relying on the fact that IMAX is a Canadian corporation organized under the laws of Canada with its principal place of business in Canada, IMAX asserted in the U.S. Proceedings that the Ontario court would have jurisdiction over the claims of a global class, and that the connection between the dispute and this jurisdiction is at least as strong as the connection between the dispute and the United States.<sup>13</sup> IMAX argued that it would be preferable to litigate the issues in dispute in the pending Ontario proceedings. IMAX asserted, "only the Canadian court is in a position to grant full relief to all purchasers of IMAX stock", implying that the statutory claim under the OSA, which does not require proof of reliance, would be available to all class members.<sup>14</sup>

115 IMAX appended to its argument against certification in the U.S. Proceedings the expert report of Professor Poonam Puri, of Osgoode Hall Law School<sup>15</sup>, that addressed among other things, the inherent authority of the Ontario court to certify a global class, and cited examples of cases where Ontario courts had exercised such jurisdiction to certify class actions comprising international class members. Professor Puri's report also detailed the statutory claim available to plaintiffs under the OSA, without discussion of whether the remedy would be available to class members resident outside Ontario or those who had purchased their shares on NASDAQ.<sup>16</sup>

116 While the contradiction in the positions taken by IMAX in responding to the certification motions in the two jurisdictions is not determinative of whether this court should certify a global class in these proceedings, it is nonetheless revealing. If IMAX is successful in the position it has taken in the U.S. Proceedings, the U.S. court may decide not to certify a global class or may decline certification altogether on the basis that a more effective remedy is available to the class in the Ontario proceedings. The inconsistency in the defendants' submissions in the two jurisdictions suggests that their opposition to certification of a global

class in Ontario is not in fact based on *bona fide* concerns about the appropriateness of this court determining the claims of non-residents. Rather, their objective appears to be to limit the size of the class and so reduce their potential liability for damages.

### (b) The Court's Authority to Certify National and international Classes

117 When national or international classes are proposed in class actions, the certifying court must consider whether it has jurisdiction *simpliciter* and whether it would be appropriate to assume jurisdiction over the claims of class members who reside outside the province. This issue has attracted significant attention in recent years and remains contentious. In a recent decision of the Supreme Court of Canada, *Lépine v. Société Canadienne des postes*, [2009] 1 S.C.R. 549 (S.C.C.) (at para. 57), LeBel J. urged the provinces to address through legislation the jurisdictional issues raised by national and international class actions.<sup>17</sup>

118 Class proceedings involving non-resident class members present challenges for both the assumption of jurisdiction (that is the decision to certify a class that includes non-residents) and the recognition and enforcement of judgments of other courts where jurisdiction over non-resident class members has been assumed. The issue has been described by Craig Jones and Angela Baxter as follows:

The unique aspect of opt-out class actions is that courts purport to take jurisdiction over absent *plaintiffs*. A certification binds a class of such persons to a decision of the court, or a settlement approved by the court, and it does it according to provincial law. In an opt-out action, it does so without their active consent, and in many cases without their actual knowledge that a proceeding affecting their rights is underway.<sup>18</sup> (Emphasis in original.)

119 The decision to certify a class with non-residents does not of course determine whether a settlement or other disposition within Ontario will be recognized outside the jurisdiction to bind non-resident class members. As Brockenshire J. noted at first instance in *Nantais v. Electronics Proprietary (Canada) Ltd.* (1995), 25 O.R. (3d) 331 (Ont. Gen. Div.), in certifying a class proceeding against a pacemaker manufacturer on behalf of a national class, the "potential problem" of recognition was "something to be resolved in another action [by a non-resident class member] before another court in another jurisdiction": at p. 346. In dismissing the application for leave to appeal, at 25 O.R. (3d) 331 at 347 (Ont. Gen. Div.), Zuber J. noted at p. 350: "whether the result reached in an Ontario court in a class proceeding will bind members of the class in other provinces who remained passive and simply did not opt out, remains to be seen".

120 Nevertheless, as recent decisions in Ontario demonstrate, the issues of certification and recognition of class proceedings including non-resident members involve consideration of the same factors. The court must have jurisdiction over the class members (through a "real and substantial connection" between the jurisdiction and their claims) and the court must find that the assertion of jurisdiction is consistent with the principles of "order and fairness".

121 Numerous national classes have been certified in Ontario. In *Carom v. Bre-X Minerals Ltd.* (1999), 44 O.R. (3d) 173 (Ont. S.C.J.) ("Carom [Certification]"), aff'd 46 O.R. (3d) 315 (Ont. Div. Ct.), rev'd on other grounds 51 O.R. (3d) 236 (Ont. C.A.), Winkler J. certified a national class consisting of shareholders and former shareholders of various corporate defendants whose investment value had declined after it was revealed that the defendants had disseminated false information. The Court applied the "real and substantial connection" test from *Morguard Investments Ltd. v. De Savoye*, [1990] 3 S.C.R. 1077 (S.C.C.), finding that such a connection to Ontario existed on the basis of the incorporation and/or operation of the various corporate defendants in Ontario, the trading of their shares on the TSE, and the generation, public dissemination, and allegedly negligent verification of the false information in Ontario. Winkler J. also found that the notice requirements and opt-out provisions of the CPA prevented any prejudice to non-resident class members, thus making the assumption of jurisdiction consistent with the principles of order and fairness.

122 In *Wilson v. Servier Canada Inc.* (2000), 50 O.R. (3d) 219 (Ont. S.C.J.), Cumming J. certified a national class of patients who suffered from heart disease after being prescribed a weight loss drug. He cited, at para. 92, Professor Castel's *Canadian Conflict of Laws*, 4th ed.:<sup>19</sup>

[T]he test for determining whether a real and substantial connection exists is not demanding or rigid. The court needs to find only a real and substantial connection, not the *most* real and substantial connection, to assume jurisdiction."

[Emphasis in original].

123 Even in cases where the only connection between a non-resident class member and the jurisdiction is the sharing of common issues with resident class members, jurisdiction may be assumed. In *McCutcheon v. Cash Store Inc.* (2006), 80 O.R. (3d) 644 (Ont. S.C.J.), Cullity J. certified a national class of claimants in a payday loan class action, after conducting a comprehensive review of the authorities. Cullity J. observed that Ontario courts (in contrast to the courts of Saskatchewan and Québec) have taken an expansive approach to jurisdiction, even in cases where non-resident class members had no connection to the jurisdiction except their sharing of common issues with resident class members. His decision was consistent with a number of Ontario authorities, including *Baxter v. Canada (Attorney General)*, [2005] O.J. No. 2165 (Ont. S.C.J.), where Winkler J. observed that where a class action involving intra-provincial plaintiffs could be certified, and the common issues forming the basis for the certification are shared by both the resident class and extra-provincial non-residents against the defendant, the existence of such common issues provides a "real and substantial connection" of the non-residents to the forum in relation to the action.

124 Classes including international members have been certified by Ontario courts without any detailed consideration of the jurisdictional issues in *Bendall v. McGhan Medical Corp.* (1993), 14 O.R. (3d) 734 (Ont. Gen. Div.) (breast implant case — no territorial limitation on class members); *Robertson v. Thomson Corp.* (1999), 43 O.R. (3d) 161 (Ont. Gen. Div.) (class comprised of creators and/or owners of copyright in and to certain works published in Canada in print media); *Cheung v. Kings Land Developments Inc.* (2001), 55 O.R. (3d) 747 (Ont. S.C.J.), leave to appeal refused [2002] O.J. No. 336 (Ont. Div. Ct.) (class included Hong Kong residents); *Brimner v. VIA Rail Canada Inc.* (2000), 50 O.R. (3d) 114 (Ont. S.C.J.) (class comprised of all persons traveling on a Windsor-Toronto train). International classes have been certified for settlement purposes in *Nutech Brands Inc. v. Air Canada*, [2008] O.J. No. 1065 (Ont. S.C.J.) and *Mondor [Settlement]*.

125 While there are no reported Ontario appeal court decisions reviewing a decision to certify a global class, the issue of when a domestic court can assert jurisdiction over the claims of non-residents was addressed by the Court of Appeal in the context of the recognition and enforcement in Ontario of a foreign judgment incorporating a settlement of a class action: *Parsons v. McDonald's Restaurants of Canada Ltd.* (2005), 74 O.R. (3d) 321 (Ont. C.A.).

126 *Currie* involved the enforcement in Ontario of a settlement of an international class proceeding from Illinois. The defendants moved to stay parallel class proceedings in Ontario based on the settlement that included Ontario residents. Sharpe J.A. affirmed the importance of national and international classes at paras. 14 and 15:

Ontario residents frequently engage in cross-border activities that may become the subject of class action litigation in Ontario, in another province or in a foreign jurisdiction. Several Ontario trial courts have authorized national and international classes: *Robertson v. Thomson Corp.* (1999), 43 O.R. (3d) 161 (S.C.J.) (international class), *Carom v. Bre-X Minerals Ltd.* (1999), 44 O.R. (3d) 173 (S.C.J.) (national class) and *Wilson v. Servier* (2000), 50 O.R. (3d) 219 (S.C.J.) (national class). In *Mondor v. Fisherman; CC & L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2002] O.T.C. 317, Cumming J. approved a settlement in a class action where the class included American and other foreign plaintiffs. Legislation in several provinces specifically contemplates the inclusion of nonresident class members: *Class Proceedings Act*, S.A. 2003, c. C-16.5, ss. 7(1)(3) and 17(1)(b); *Class Proceedings Act*, R.S.B.C. 1996, c. 50, ss. 6(2) and 16(2); *Class Proceedings Act*, C.C.S.M., c. C130, s. 6(3); Newfoundland and Labrador Class Actions Act, S.N.L 2001, c. C-18.1, ss. 7(2) and 17(2)-(5); *Class Actions Act*, S.S. 2001, c. C-12.01, ss. 8(2) and 18(2).

There are strong policy reasons favouring the fair and efficient resolution of interprovincial and international class action litigation: *Vitapharm Canada Ltd. v. F. Hoffman-LaRoche Ltd.* (2001), 6 C.P.C. (5th) 245 at para. 27 (Ont. S.C.J.), aff'd (2002), 20 C.P.C. (5th) 65 (Ont. Div. Ct.), aff'd (2003), 30 C.P.C. (5th) 107 (Ont. C.A.); *Wilson v. Servier Canada Inc.*, above at 243-4 (S.C.J.); *Wilson v. Servier Canada Inc.* (2002), 59 O.R. (3d) 656 (S.C.J.) at 664-670. Conflict of law rules

should recognize, in appropriate cases, the importance of having claims finally resolved in one jurisdiction. In some cases, Ontario courts will render judgments affecting the rights of non-residents and in other cases, Ontario residents will be affected by class action proceedings elsewhere. Ontario expects its judgments to be recognized and enforced, provided its courts assert jurisdiction in a proper manner and comity requires that, in appropriate cases, Ontario law should give effect to foreign class action judgments.

127 Sharpe J.A. went on to recognize three pre-conditions for the recognition of a judgment binding an unnamed plaintiff who has not opted out of an international class: (a) the existence of a real and substantial connection linking the cause of action to the foreign jurisdiction, (b) adequate representation of the rights of non-resident class members, and (c) procedural fairness to nonresident class members, including adequate notice (at para. 30).

128 The Court found that a "real and substantial connection" to the Illinois jurisdiction existed by reason of the facts that the defendant's head office was located in that state and that the alleged wrongful conduct, the manipulation of the random selection of winners of high-value prizes to ensure that no such prizes would be awarded to contestants in Canada, had occurred there. Recognition of the Illinois judgment failed however on the third part of the test, procedural fairness, by reason of inadequacies in the notice given to the Canadian resident class members.

129 There is accordingly no doubt that this court has the authority to certify an international class if there is a "real and substantial connection" between the claims asserted on behalf of the foreign class members and this jurisdiction.

130 Such connection exists in this case. IMAX is a CBCA corporation with its head office in Ontario. It is a reporting issuer under the OSA and its shares are traded on the TSX. The alleged Representation was made in Ontario through the issuance of the Company's Form 10-K and press releases from IMAX's Mississauga head office (although arguably it may have been made in IMAX's offices in New York as well). The alleged wrongful actions of the Individual Defendants in connection with the preparation and reporting of IMAX's financial statements are alleged to have taken place in Ontario as well as New York. The proposed common issues respecting liability that concern the conduct of the defendants accordingly have a substantial connection to this jurisdiction.

#### **(c) Considerations of "Order and Fairness" — Should a global class be certified in this case?**

131 The next question is whether the principles of "order and fairness" would weigh against the certification of a global class in the present case. These factors are also relevant to the question of whether certification of a global class would be the "preferable procedure", that is "a fair, efficient and manageable method of advancing the claim" that is "preferable to other reasonably available means of resolving the claims of class members" (*Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.), at para. 69, leave to appeal to S.C.C. refused [2007] S.C.C.A. No. 346 (S.C.C.)).

132 The defendants assert in opposition to certification of a global class: (1) that a comprehensive proceeding has been commenced in the U.S. that would be more appropriate for the pursuit of claims by U.S. residents and (2) that a global class should not be certified because of the likelihood that different laws will apply to the claims of class members depending on where they acquired their shares and where they reside, which will make the proceedings unduly complex and inefficient.

##### **(i) The Relevance of the U.S. Proceedings**

133 The fact that there is a pending application for certification in another jurisdiction is not an obstacle to certification of a class that includes non-resident members. It is not unusual for class proceedings to be commenced contemporaneously in different jurisdictions. Even where a class proceeding has been certified elsewhere, parallel proceedings may be permitted to continue. In *Tiboni v. Merck Frosst Canada Ltd.* (2009), 95 O.R. (3d) 269 (Ont. Div. Ct.) the Divisional Court dismissed an appeal from an order of Cullity J. refusing to stay a class action that had been certified in Ontario, where an action involving the same claims and the same class had been certified in Saskatchewan. The Court concluded that it would not be an abuse of process to permit two multi-jurisdictional class actions to proceed. The Court recognized that certification orders are not final judgments, but "interlocutory procedural orders that may be amended at any time as the cases proceed" (at para. 39).

134 There has been no determination to date of the certification issue in the U.S. Proceedings, and if the defendants are successful in their opposition, the U.S. Proceedings may never be certified. At this stage, the prospect that a similar proceeding might be certified in another jurisdiction is not sufficient to prevent the court from certifying a global class in Ontario.

**(ii) Conflict of Laws and Complexity**

135 The defendants argue that the claims of the various non-resident class members may be subject to the laws of various jurisdictions, and as such a global class proceeding will be unduly complex. In their Certification Factum, the defendants identify the problems that may arise in the following terms at paras. 16 and 17:

The Plaintiffs' common law claims, as pleaded, fail to note the multi-jurisdictional nature of the tortious misconduct of which the Defendants are accused. If established, this misconduct will almost certainly be found to have occurred partially (and perhaps primarily) in New York, and partially in Ontario, with the tort in question being directed towards, or "completed" in, each and every jurisdiction (that is, in each province, state or foreign country) where an individual investor felt the consequences of the Defendants' alleged misconduct.

These realities underline a fundamental complication which the Plaintiffs have entirely ignored in asserting common law tort claims on behalf of this proposed worldwide investor class. This complication is the necessity for this Court — **following** the certification of any of the Plaintiffs' tort-based "common issues," but **before** any common issue trial can be held — to undertake individual determinations of which body of substantive law (*i.e.*, the laws of which province, state or foreign county) properly governs each of the causes of action (*i.e.*, negligence *simpliciter*, negligent misrepresentation, fraudulent misrepresentation, conspiracy, vicarious liability, *etc.*) being asserted on behalf of each putative class member, or on behalf of each of the numerous geographically-defined subclasses which will need to be established.

[Emphasis in original.]

136 The defendants are correct in observing that the plaintiffs at the certification stage have not addressed the potential for conflict of laws issues. Indeed the defendants ignored such issues in their own submissions on certification in the U.S. Proceedings, and all parties appear to have proceeded on the assumption that the OSA statutory claim will be available to all class members in the Ontario proceedings.

137 There is authority that a court may refuse to certify a class containing non-resident members where the resolution of their claims would clearly involve the application of the statutory laws of multiple jurisdictions.

138 *McNaughton Automotive Ltd. v. Co-operators General Insurance Co.* (2003), 66 O.R. (3d) 466 (Ont. S.C.J.) involved a proposed class proceeding by the plaintiff insureds against defendant insurers alleging breach of a statutory condition in their policies of automobile Insurance concerning the calculation of salvage costs. In refusing certification, Haines J. observed that the claims of the proposed members of the class would entail the consideration of statutory provisions that differed between provinces, including different processes prescribed thereunder for the resolution of claims. While acknowledging that it would be open to an Ontario court to interpret and apply the laws of other jurisdictions, Haines J. concluded that the administration of justice would not be served by certifying a national class where: (1) the contract was made outside of Ontario pursuant to the laws of another jurisdiction that are materially different; (2) the defendant is licensed under and subject to the laws of the other jurisdiction; (3) the alleged breach occurred outside Ontario; (4) the claimants reside outside of Ontario; (5) the events which gave rise to the claim occurred outside Ontario; and (6) the damages were sustained outside Ontario. As such, he concluded that there was a demonstrated absence of any real connection between potential out-of-province class members and the Ontario forum and that order and fairness would not be served by assuming jurisdiction over claims of persons in those provinces and territories where the relevant statutory provisions were materially different from those in Ontario.

139 In *McNaughton* the claims asserted by the representative plaintiffs clearly relied on statutory provisions. It was manifest from the outset of the action (that is in the way that the plaintiffs had pleaded their action in reliance on statutory terms) that

the statutes of the various provinces differed in material ways that would affect the resolution of the claims of various members of a national class.

140 *Risorto v. State Farm Mutual Automobile Insurance Co.*, [2007] O.J. No. 676 (Ont. S.C.J.) was also a case involving different provincial statutory regimes. Although he ultimately refused certification of the class proceeding for other reasons, Cullity J. would have addressed differences between provincial statutory defences by identifying subclasses of persons insured in New Brunswick and Alberta and including as an additional common issue the question whether the claims of such persons are precluded by the statutory conditions incorporated in their policies pursuant to the laws of those provinces. The existence of the special defence that the defendant insurer might have to the claims of such persons would not outweigh the values of order, fairness and access to justice that would militate in favour of the inclusion of non-resident members in the class.

141 *Pearson v. Boliden Ltd.*, 2002 BCCA 624 (B.C. C.A.), is a case where the conflict of laws question, that is, what statutes would apply to the determination of class members' claims, was considered at the certification stage in order to properly define the class.

142 In *Pearson*, the defendant corporation appealed the class definition in a shareholder class action. The plaintiffs alleged misrepresentation in a prospectus which had been filed with provincial securities regulators across Canada, asserting claims on behalf of shareholders who had purchased shares in the initial distribution as well as in the secondary market. By the time the case reached the Court of Appeal the plaintiffs had abandoned their common law claims, relying only on a statutory claim for prospectus misrepresentation.

143 At issue was whether the class should include (a) purchasers of shares from Alberta, where the securities legislation contained a limitation period, New Brunswick, which had no statutory cause of action, and the Territories, which had no securities legislation; and (b) persons resident outside Canada or who purchased their shares abroad not on the basis of the prospectus filed in Canada but on the basis of a different document prepared in accordance with U.S. or European securities laws.

144 The B.C. Court of Appeal held that the claims of shareholders for prospectus misrepresentation would be determined under the statutory laws that applied where the "distribution" of securities had occurred. Shareholders who purchased their shares pursuant to distributions occurring in New Brunswick, the Territories, Alberta and outside Canada were excluded. Since the prospectus misrepresentation provisions of the Manitoba legislation might permit claims by purchasers on the secondary market in that province, such persons would be included in the class, but other shareholders who had acquired their shares on the secondary market were excluded. The Court placed the secondary market purchasers in a separate subclass.

145 In contrast to the challenge by the defendants in *Pearson*, which was based on arguments respecting the proper law applicable to the claims of nonresident class members, the defendants in the present case did not argue for a narrower class or for a subclass of plaintiffs who might rely on the statutory cause of action under the OSA. As previously noted, the parties did not address any arguments as to whether and to what extent only Ontario residents or persons who had purchased IMAX shares on the TSX could properly assert such a claim.<sup>20</sup>

146 The defendants' submissions about potential differences in the applicable laws, and the anticipated complexity that would result in this litigation, were confined to the common law claims of the class members. They argued that the common law claims would be subject to the laws of different jurisdictions depending on where the Representation was received and acted upon.

147 The potential for the application of different common law principles to the determination of class member claims has received little attention in class action proceedings where national or international classes are proposed. As Patricia Jackson notes in "The National Class under the *Class Proceedings Act, 1992*: Unsettled Issues", The Law Society of Upper Canada, *Special Lectures 2004*, pp. 471-479, at p. 478:

One of the circumstances in which there has been restraint in the willingness to certify a national class is where significantly different statutory regimes apply to the questions raised by the proposed class proceeding [noting *McNaughton*]. However, there has been no evidence of such restraint in the face of potential differences in the common law. This is especially

significant because of the extent to which class actions are frequently brought in respect of matters where the law is significantly in transition.

148 According to the Supreme Court decision in *Tolofson v. Jensen*, [1994] 3 S.C.R. 1022 (S.C.C.) as a general rule, the substantive law governing a common law tort claim is the law of the place where the wrongful conduct occurred, that is, the *lex loci delicti*. *Tolofson* recognizes that the determination of the place of the wrongful conduct can present challenges in cross-border litigation. At p. 1050 LaForest J. for the majority of the Court noted:

There are situations, of course, notably where an act occurs in one place but the consequences are directly felt elsewhere, when the issue of where the tort takes place itself raises thorny issues. In such a case, it may well be that the consequences would be held to constitute the wrong. Difficulties may also arise where the wrong directly arises out of some transnational or interprovincial activity. There territorial considerations may become muted; they may conflict and other considerations may play a determining role.

149 The defendants submit that, following *Tolofson*, where the alleged wrongdoing crossed borders the "most appropriate solution" is to identify the jurisdiction where the consequences of the wrongdoing were felt, and to apply the laws of that jurisdiction. They argue that where there are multiple plaintiffs who suffered harm in different jurisdiction, there are accordingly multiple governing laws.

150 The defendants also rely on certain cases in which the courts have found that the *lex loci delicti* for the tort of misrepresentation is the place where the representation was received and caused harm to the plaintiff (*ABN Amro Bank N.V. v. BCE Inc.*, [2003] O.J. No. 5418 (Ont. S.C.J. [Commercial List]) and *Kvaerner U.S. Inc. v. Amec E & C Services Ltd.*, 2004 BCSC 635 (B.C. S.C.)).

151 Rather than supporting the defendants' position, *Tolofson* clearly recognizes the complexities of trans-border torts and refrains from making a definitive statement that the place of the tort is always where the harm was suffered. As for the two cases relied upon by the defendants, these simply illustrate the willingness of Canadian courts to find that the place of the tort is the place where the representation was received and relied upon, in order to assert jurisdiction over a non-resident defendant, in the context of a *forum non conveniens* motion.

152 It is not obvious, in the context of a class action involving a global class and misrepresentations communicated from a single source, that the applicable law will be that of the place where each individual class member sustained damage. Such an approach would ignore the fact that a class proceeding is an aggregate action and not a collection of individual claims.<sup>21</sup> It is also not obvious that the applicable common law principles and defences would vary from place to place such that the court would have to consider the potential application of multiple laws.

153 The choice of law issue in any event is premature. Unless or until the defendants plead the laws of other jurisdictions in their statement of defence, the assumption at this stage of the proceedings is that the law of Ontario will apply to the determination of the common law claims. As T. Ducharme J. noted in *Caglar v. Moore*, [2005] O.J. No. 4606 (Ont. S.C.J.), at para. 15:

The approach of the courts to foreign law is well established. The existence of a foreign law is treated as a fact and the party seeking to rely upon it must both plead it and prove it. If the foreign law is not pleaded or not properly proven, the court will apply the *lex fori* as "it is the only law available." The existence of an applicable foreign law is a material fact, which must be pleaded under rule 25.06(1). Moreover, where, as in this case, the foreign law is the basis for an affirmative defence, rule 25.07(4) also requires that it be pleaded. The need to plead foreign law is a requirement of longstanding in Ontario that has been consistently applied. [Footnotes omitted.]

154 The defendants may well assert in their statement of defence that the laws of jurisdictions other than Ontario apply to the determination of the claims of various class members. At this stage however one can only speculate as to what arguments may be made and toward the claims of which class members they may be directed. For example, is the statutory cause of action

restricted to Ontario shareholders? Does it apply to non-resident shareholders who purchased their shares on the TSX? Does it apply to Ontario shareholders who purchased their shares on NASDAQ? As for the common law claims, what law would apply to the misrepresentation claims of class members residing outside of Ontario, or Canada? Would this depend on where they purchased their shares, reside or suffered damages? What particular defences would the defendants rely upon that would not be available to them under Ontario law? Are there in fact substantial differences between the common law principles and defences applicable in the other jurisdictions?

155 There is certainly the potential for greater complexity in this litigation as a result of potential conflicts of laws issues. This need not however constitute a bar to certification.

156 Our courts have identified similar challenges in cases where different standards of care may apply over time to members of a class which has been broadly defined. In *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.), leave to appeal to the S.C.C. refused at [2005] S.C.C.A. No. 50 (S.C.C.), the proposed class was comprised of former students of residential schools over a period of 16 years. The Court of Appeal, in determining that certification was appropriate, concluded that the class action proceeding was sufficiently flexible to deal with whatever variation in the applicable standard of care over the 16 year period might arise on the evidence (at para. 59).

157 The Court in *Cloud* referred to the decision of the Supreme Court of Canada in *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.), where an analogous claim covered a period of 42 years. In *Rumley*, McLachlin C.J. for a unanimous court concluded (at para. 31) that the fact that the relevant standard of care would have varied over time was not an obstacle to the suit proceeding as a class action: "That the standard of care may have varied over the relevant time period simply means that the court may find it necessary to provide a nuanced answer to the common question" (at para. 32). McLachlin C.J. noted that class proceedings legislation, in contemplating the possibility of subclasses and permitting the amendment of the certification order at any time, "provides the court with ample flexibility to deal with limited differentiation amongst the class members as and if such differentiation becomes evident".

158 In *Nantais*, the first Ontario case in which a national class was certified, there was no existing certification in another jurisdiction, although certification motions were pending elsewhere. The defendants argued that a court attempting to try the class proceeding would face a multiplicity of laws from all of the provinces, which might confuse the matter. While Zuber J. discounted the likelihood of differences between the applicable provincial laws, he observed at p. 350:

It is also argued that other class proceedings may be certified in other provinces relating to the matter which is the subject of this class proceeding. In my respectful view any of these practical difficulties which may develop as the matter proceeds can be met by amending the order in question to adjust the size of the class. If it is shown that the law of another province is so substantially different as to make the trial with respect to class members from that province very difficult, the class can be redefined. Additionally, if a class is certified in another province that group can be deleted from the Ontario class.

159 The approach in *Nantais* has been described as "wait and see" in relation to potential conflict of laws concerns.<sup>22</sup>

160 In the present case it is far from certain that a multiplicity of laws will apply to the determination of class members' claims or that any conflicting laws will affect the determination of the common issues. While the defendants have suggested that varying laws will apply, creating complexity, until they plead to the Claim, their position remains speculative. In respect of the one issue where the court might have been invited to make a determination limiting the scope of the class or to identify a subclass, that is in connection with the statutory claim, the defendants have not yet taken a position that the scope of the statutory remedy should be limited.

161 The decision to certify a global class requires the court to ensure fair treatment of non-resident class members in the litigation. This is part of the "order and fairness" requirement, which can be enhanced by paying careful attention to the notice and communications with non-resident class members, and to the potential need for subclasses as the action proceeds.

162 As Jones and Baxter have observed:

When asserting jurisdiction over a defendant, either in an individual or class proceeding, "order and fairness" will usually be satisfied by the demonstration of a "real and substantial" connection with the forum. But in the interjurisdictional class action context, "order and fairness" towards foreign plaintiffs imports further requirements. Just as defendants cannot be bound by a court's process and decision unless served and given an opportunity to answer the case against them, so too plaintiffs cannot be bound unless they also have an opportunity to "participate", at least as that word is understood in the world of opt-out class actions; that is, that there be notice adequate to serve the interests of justice.<sup>23</sup>

163 LeBel J. in *Lépine v. Société Canadienne des postes*, emphasized the importance of protection for the rights and interests of non-resident class members both through the notice procedure and through the recognition of subclasses where appropriate at paras. 42 and 56:

A class action takes place outside the framework of the traditional duel between a single plaintiff and a single defendant. In many class proceedings, the representative acts on behalf of a very large class. The decision that is made not only affects the representative and the defendants, but may also affect all claimants in the classes covered by the action. For this reason, adequate information is necessary to satisfy the requirement that individual rights be safeguarded in a class proceeding. The notice procedure is indispensable in that it informs members about how the judgment authorizing the class action or certifying the class proceeding affects them, about the rights — in particular the possibility of opting out of the class action — they have under the judgment, and sometimes, as here, about a settlement in the case.

...

The formation of a national class can lead to the delicate problem of creating subclasses within it and determining what legal system will apply to them. In the context of such proceedings, the court hearing an application also has a duty to ensure that the conduct of the proceeding, the choice of remedies and the enforcement of the judgment effectively take account of each group's specific interests, and it must order them to ensure that clear information is provided.

164 Accordingly, I have concluded that it would be appropriate to certify the global class as proposed by the plaintiffs. The prospect that the claims of nonresident class members may be subject to different laws adds complexity to the litigation, but does not weigh against certification. The appropriate approach in this litigation is to "wait and see" how the conflict of law issues may develop, and as noted below in the discussion under "common issues", the court can deal with any differences in the law that might arise by adjusting the common issues or recognizing subclasses as appropriate.

165 The court will also need to ensure that the interests of non-resident class members are protected by the form, content and distribution of the notice that is provided to them (this issue is addressed later in these reasons in considering the plaintiffs' proposed litigation plan.)

#### **E. Section 5(1)(c) of the CPA: Do the claims of the class members raise common issues?**

##### *1. General Principles*

166 Section 1 of the CPA defines "common issues" as "(a) common but not necessarily identical issues of fact, or (b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts". Common issues, whether of law or fact, are those issues to be decided through the vehicle of the common issues trial such that the findings in the trial on such issues will be binding on all class members.

167 This definition "represents a conscious attempt by the Ontario legislature to avoid setting the bar for certification too high." The common issues need only "advance the litigation." "Resolution through the class proceeding of the entire action, or even resolution of particular legal claims ... is not required." (*Carom /Rule 21 — C.A.J* at paras. 40-42).

168 The common issues question should be approached purposively. There is no formulaic approach that determines this requirement. The underlying question is whether, if the action continues as a class proceeding, will "duplication of fact-finding

or legal analysis" be avoided? (*Western Canadian Shopping Centres* at para. 39). If necessary, the list of common issues can be further refined as the litigation moves forward (*Robertson v. Thomson Corp.*, at p. 173).

169 A class proceeding resolution of the common issues need not be determinative of the issue of liability for some or even all class members. As Goudge J.A. observed in *Cloud* (at para. 53):

[A]n issue can constitute a substantial ingredient of the claims and satisfy s. 5(1)(c) even if it makes up a very limited aspect of the liability question and even though many individual issues remain to be decided after its resolution. In such a case the task posed by s. 5(1)(c) is to test whether there are aspects of the case that meet the commonality requirement rather than to elucidate the various individual issues which may remain after the common trial. This is consistent with the positive approach to the *CPA* urged by the Supreme Court as the way to best realize the benefits of that legislation as foreseen by its drafters.

170 There is a requirement for a minimal evidentiary foundation for the proposed common issues. In the present case, where the certification motion proceeded together with the Leave Motion (in which the parties filed voluminous affidavits and transcripts), there is no question that the evidentiary basis for the common issues is present.

## 2. The Proposed Common Issues

171 The plaintiffs have proposed a list of common issues as follows:

1. Did IMAX or the Individual Defendants, or any of them, represent that IMAX's revenues for the 2005 fiscal year were reported in accordance with GAAP and that such revenues met or exceeded earnings guidance previously issued by Imax? If so, who made the Representation, when, where and how?
2. Did IMAX or the Individual Defendants, or any of them make the Representation negligently, or recklessly, caring not whether it was true or false? If so, who made the Representation, when and how?
3. Did IMAX or the Individual Defendants, or any of them, make the Representation intending that the class members rely upon it and acquire IMAX shares?
4. Did some or all of IMAX's February 17, 2006 Press Release, Annual Report for the year ending December 31, 2005 or its two March 9, 2006 press releases contain a misrepresentation within the meaning of the OSA?
5. If the answer to (4) is yes, have the defendants (including the proposed defendants), or some of them, established a reasonable investigation or expert reliance defence under the OSA?
6. Did the traded price of IMAX shares during the Class Period incorporate and reflect the Representation?
7. If the answer to (6) is yes, did the acquisition of IMAX shares by the class members, on the TSX and NASDAQ, during the Class Period, constitute reliance upon the Representation?
8. Did IMAX or the Individual Defendants, or some of them, owe the class members a duty of care? If so, what was the standard of care? Did any of the defendants breach the standard of care?
9. If the answer to (8) is yes, were IMAX or the Individual Defendants, or some of them, negligent? If so, who, when and why?
10. Did IMAX or the Individual Defendants, or some of them, conspire one with the other, and with persons unknown to deceive the class members for the purpose of maintaining and increasing the price of Imax securities? If so, who conspired with whom, when, where, why and for what purpose?
11. If IMAX or the Individual Defendants, or some of them, are liable to the class for conspiracy, negligence, negligent or fraudulent misrepresentation, what is the procedure for assessing damages?

12. Can the court assess damages in the aggregate, in whole or in part, for the class? If so, what is the amount of the aggregate damage assessment and who should pay it to the class?

13. Is IMAX vicariously liable or otherwise responsible for the acts of the other defendants?

14. Should one or more of the defendants pay punitive damages to the Class? If so, who, why, in what amount and to whom?

15. Should the defendants, or any of them, pay the costs of administering and distributing any monetary judgment and/or the cost of determining eligibility and/or the individual issues? If so, who should pay what costs, why, in what amount and to what extent?

16. If the court determines that the defendants are liable to the class, and if the court considers that participation of individual class members is required to determine individual issues:

(a) are any directions necessary?

(b) should any special procedural steps be authorized?

(c) should any special rules relating to admission of evidence and means of proof be made?

(d) what directions, procedural steps or evidentiary rules ought to be given or authorized?

17. Should the defendants, or any of them, pay prejudgment and post-judgment interest, at what annual interest rate, and should the interest be compounded interest?

172 The defendants acknowledge that the issues regarding liability and damages under the OSA, if leave to proceed with such claims is granted, are properly the subject of a class action that is, that issues 1 and 2, only in so far as they relate to the statutory claim, and issues 4 and 5 would be properly certified as common issues.

173 The defendants also acknowledge that issues 11 and 13 to 17 as they relate to the common law claims are either strictly procedural or ancillary to the main allegations of liability. Such issues should be certified as common issues if the court is satisfied that other main issues respecting liability are properly certified.

174 The defendants assert that the balance of the common issues are "not sufficiently significant" to justify certification, and raise certain specific arguments in opposition to the recognition of such issues as common issues.

### *3. Proposed Common Issues - Common Law and Statutory Misrepresentation*

175 The defendants oppose the certification of issues 1, 2 and 3, as they relate to the common law claims of misrepresentation, as common issues. They submit that, since the plaintiffs have pleaded a number of statements in which the misrepresentations are alleged to have occurred, individual inquiries will be required to determine which of the class members received each individual representation. Some class members may not have read any of the representations; some may have received the information contained in the representations through sources other than IMAX.

176 In *Carom [Rule 21 — C.A.]* the court was faced with 160 alleged representations. It was recognized that individual determinations of which representations were received and relied upon by class members would be required. Nevertheless, it was appropriate to certify the negligent misrepresentation claims, including the issues of whether the defendants had made the alleged representations. MacPherson J.A., for the Court of Appeal, held that it was a mistake to overemphasize the number and diversity of the defendant's representations, and that resolution of the common issues would "move the litigation forward" and might serve to significantly reduce the number of relevant representations that the court would have to consider in the individual determinations (at para. 49). He stated (at para. 51): "The focus of these common issues is the knowledge and conduct of the defendants...the conduct, especially the reliance, of the plaintiffs stays on the sidelines at this juncture in the litigation."

177 In the present case, the plaintiffs' common law claims concern a single defined Representation that is alleged to have occurred in each of the February and March press releases and in the Company's Form 10-K. This is not a case where numerous different misrepresentations are alleged; rather, the plaintiffs allege a single misrepresentation, that was communicated to the public in different ways. The fact that class members may have received the misrepresentation in different ways, or may not have relied on the misrepresentation, is not relevant to whether issues 1, 2 and 3 would be common to the class.

178 Another concern raised by the defendants in opposition to the certification of the misrepresentation issues as common issues is the prospect that different legal regimes may apply to the determination of the common law claims of various class members.

179 As discussed above (at paras. 135 to 165), the potential for the application of different statutory regimes or varying standards of care applying to the claims of different class members is not an impediment to certification. In *Rumley* the potential for varying standards of care did not prevent the Court from certifying whether the defendants were negligent as a common issue. The Court anticipated the identification of subclasses later in the proceedings to address such issues as they might arise (at para. 32). See also *Tiboni v. Merck Frosst Canada Ltd.*, [2008] O.J. No. 2996 (Ont. S.C.J.) (at paras. 84 and 92) where Cullity J. in a product liability case certified common issues that included whether the defendants owed a duty of care, the standard of care and whether the defendants were negligent, noting the potential for subclasses later in the proceedings if the defendants were to establish that different laws might apply to various members of the class.

180 More recently, in *Glover v. Toronto (City)*, [2009] O.J. No. 1523 (Ont. S.C.J.), concerning a class proceeding arising out of an outbreak of Legionnaires' disease at a City-owned and operated care facility, the proposed class included those who lived in, worked at, or visited the facility, as well as those living near the facility that contracted the disease. Lax J. rejected the defendants' arguments that questions of duty and standard of care could not be addressed on a class-wide basis. Citing *Rumley*, Lax J. noted at para. 46:

[The defendants] say that different duties may be owed at different times to different class members or may not be owed at all. I do not find this argument persuasive. Common issues include common but not necessarily identical issues of law that arise from common but not necessarily identical facts. The Class Proceedings Act gives the court the flexibility to deal with differentiation among class members. The trial judge has the power to adopt a nuanced approach and create subclasses when this is necessary.

181 Lax J. observed that the focus of the common issues respecting duty and standard of care was on the conduct of the defendants, which would not depend on evidence specific to each class member. She certified the common issues to include a reference to whether a duty of care was owed to the class members "or any subclass or subclasses" (at para. 61).

182 Ultimately, the question when determining the common issues is to distinguish between issues that might be common to the class (or a subclass) and individual issues, and to ensure that issues that will require individual determinations are not included in the list of common issues. The fact that not all members of the class may be affected in the same way by the determination does not prevent the issue from being included as a common issue. Again, the cases emphasize that a common issue is not necessarily one where success for one member of the class necessarily results in success for all members. An issue may still be a common issue, although the defendants may argue that the claims of some members of the class are subject to a different legal regime. The list of common issues may have to be amended to accommodate such a development, and subclasses may need to be identified.

183 Common issues 1 through 4 deal with the circumstances in which the alleged misrepresentations were made and the knowledge and participation of the various defendants. An evaluation of the conduct of the defendants is common to the class members, whether they are able to rely on the statutory cause of action (which is pleaded as applying to all members) or whether the common law causes of action are available to them. These issues will accordingly be included in the list of issues certified for the common issues trial.

184 In addition, I would include as common issues in relation to the misrepresentation claims the following common issues:

1(a). Was the Representation false?

1(b). Was the Representation publicly corrected? If so, when?

2(a). Did the Individual Defendants or any of them authorize, permit or acquiesce in the making of the Representation while knowing it to be a misrepresentation?

4(a). Did the defendants Joyce and Gamble or either of them authorize, permit or acquiesce in the release of any or all such documents?

185 Common issue 5 involves a consideration of whether the statutory defences to the OSA claim are made out. While the courts will often not certify defences as common issues, out of a concern that this would be premature and potentially limit the defences a defendant might assert (see for example the decision of the Court of Appeal in *Cassano v. Toronto Dominion Bank* (2007), 87 O.R. (3d) 401 (Ont. C.A.); leave to appeal to the SCC refused [2008] S.C.C.A. No. 15 (S.C.C.)), in the present case, it would be appropriate to certify this question, where the OSA has prescribed the statutory defence and it is clear that this will be a common issue to be determined if issue 4 is answered in the affirmative.

186 The plaintiffs propose as common issues 6 and 7 whether the traded price of IMAX shares during the Class Period incorporated and reflected the Representation, and, if so, whether the acquisition of IMAX shares by the class members, on the TSX and NASDAQ, during the Class Period, constituted reliance on the Representation. These issues deal with the "efficient market" theory that has been pleaded by the plaintiffs as part of their common law misrepresentation claims.

187 The defendants oppose the certification of these issues, even if the court accepts that such a claim may proceed at the pleadings stage. They rely on the decision of Cullity J. in *Serhan Estate v. Johnson & Johnson* (2004), 72 O.R. (3d) 296 (Ont. S.C.J.). *Serhan* was a products liability case in which the plaintiffs proposed to certify the question of whether the members of the class relied upon a misrepresentation by acquiring the products in question. Plaintiffs' counsel had argued that this was a proper common issue as *Mondor [Settlement]* stood for the principle that reliance could be inferred from the conduct of a class member in making a purchase. Cullity J. properly noted that the inference of reliance could be rebutted through an inquiry into the circumstances of each individual, so that reliance would of necessity remain an individual and not a common issue.

188 In my view the reasoning in *Serhan* would not preclude the certification of proposed issues 6 and 7 in this case. *Serhan* did not involve an "efficient market" claim; that is, there was no allegation that the price of the product incorporated the misrepresentations and that accordingly the act of purchasing constituted reliance.

189 In *O.P.S.E.U. v. Ontario*, [2005] O.J. No. 1841 (Ont. S.C.J.), it was argued in a case involving alleged misrepresentations by the province to individuals whose employment had been transferred to Community Care Access Centre resulting in the loss of pensionable service, that of necessity reliance would be an individual issue, so that liability for negligent misrepresentation could not be determined in a trial of the common issues. Cullity J. (at para. 68), relying on *Mondor [Rule 21]* referred to the possibility that "group reliance" might in some circumstances be inferred from the facts. The question of whether reliance occurred could, on the facts alleged, be dealt with at a trial of the common issues.

190 In the present case the plaintiffs have pleaded that the individual class members relied on the Representation through their conduct in purchasing shares. It should be open to the plaintiffs to attempt to establish in the common issues trial that, as a factual matter, reliance has been established for all members of the class through proof of the common action of purchasing shares. It may be that the defendants will persuade the court that at best any inference of reliance is rebuttable through evidence that is individual to each class member. It may be that any inference of reliance is rebuttable through evidence applicable to the class at large. The question I need to determine is not whether the issues will be determined in the plaintiffs' favour, but whether they are "common" and not "individual" issues. I find that the issues as framed are common issues, and will be certified as such for the common issues trial.

#### 4. Proposed Common Issues — Negligence Simpliciter

191 Proposed common issues 8 and 9 relate to the claim of negligence *simpliciter* which I have already determined is not a cause of action on the facts pleaded in this case. Accordingly, they will not be certified as common issues in this case.

*5. Proposed Common Issue — Conspiracy*

192 Proposed common issue 10 deals with the pleading of conspiracy. No objection was taken to the certification of this issue as a common issue. Similar formulations of the issue were certified as common issues in *Smith v. National Money Mart Co., [2007] O.J. No. 46* (Ont. S.C.J.), Appendix A, para. 7 and *Carom Certification*] at p.195. Common issue 10 will be certified in the terms proposed by the plaintiffs.

*6. Proposed Common Issues — Damages*

193 Proposed common issue 11 deals with the procedure for determining damages if common law liability is established. This issue will be certified as a common issue, removing the reference to "negligence".

194 Common issue 12 addresses the question of whether aggregate damages should be assessed. Section 24 of the CPA provides for an aggregate assessment of damages as follows:

- (1) The court may determine the aggregate or a part of a defendant's liability to class members and give judgment accordingly where,
  - (a) monetary relief is claimed on behalf of some or all class members;
  - (b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability; and
  - (c) the aggregate or a part of the defendant's liability to some or all class members can reasonably be determined without proof by individual class members.
- (2) The court may order that all or a part of an award under subsection (1) be applied so that some or all individual class members share in the award on an average or proportional basis.
- (3) In deciding whether to make an order under subsection (2), the court shall consider whether it would be impractical or inefficient to identify the class members entitled to share in the award or to determine the exact shares that should be allocated to individual class members.

195 Whether aggregate damages should be assessed and their determination is a typical common issue in class proceedings, which should be certified in the absence of compelling evidence that aggregate damages would not be available in a given case. The court must be satisfied only that there is a "reasonable likelihood" that the conditions specified in s. 24(1) of the CPA will be satisfied (*Markson* at paras. 44 and 45. See also *Cassano* at paras. 39-53.) Provided that there is evidence that an aggregate assessment would be warranted, the determination of whether this should occur is for the trial judge. It is not for the judge hearing the certification motion to weigh conflicting expert evidence on this issue (*2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp. (2009)*, 96 O.R. (3d) 252 (Ont. Div. Ct.), at para. 102.

196 As Cullity J. noted in *Vezina v. Loblaw Cos.*, [2005] O.J. No. 1974 (Ont. S.C.J.), at para. 25:

As the question of an aggregate assessment is one for the trial judge to decide, it is not the function of a motions judge to determine whether an aggregate award would be made. It is, I believe, sufficient at this stage if there is a reasonable likelihood that the preconditions in section 24(1) of the CPA would be satisfied and an aggregate assessment made if the plaintiffs are otherwise successful at a trial for common issues. I believe that is the case here. The appropriate methods of distributing any such award are, again, for the trial judge to determine pursuant to section 26.

197 In the present case, if the plaintiffs are successful in their statutory claim, damages will be assessed according to the formulas provided in s. 138.5 of the OSA. The OSA provides a relatively straightforward approach to the determination of damages and individual assessments are contemplated. A plaintiff is not required to prove that the misrepresentation caused a decline in the share value; rather the defendant may prove that all or part of a change in the market price of securities is unrelated to the misrepresentation (OSA, s. 138.5(3)). In their litigation plan, the plaintiffs propose a procedure for the efficient determination of such claims using a court-appointed administrator who will calculate the damages of each class member who makes a claim by reference to his or her share purchase and sale data.<sup>24</sup>

198 In contrast to the statutory measure of damages, the assessment of damages for common law misrepresentation on the secondary market is more complex. The parties have filed competing expert reports prepared by financial economists. The plaintiffs rely on the expert reports of Lawrence Kryzanowski<sup>25</sup> and Robert Comment<sup>26</sup>, while the defendants rely on the expert opinion of Denise Neumann Martin<sup>27</sup>. The experts offer opinions as to the extent to which the Representation affected the price of IMAX shares. The Kryzanowski report proposes an approach to the assessment of damages that is critiqued by the Neumann Martin report. The Comment report offers an alternative approach. Both of the plaintiffs' experts are of the opinion that an assessment of the class members' aggregate losses is feasible.

199 The defendants contend that there is no reasonable likelihood that the plaintiffs will satisfy s. 24 (1)(b) of the CPA. They argue that, after the determination of the common issues, individual issues will in fact remain to be determined, even if reliance is determined on a class basis, as to whether individual class members suffered any damage or loss.

200 An authority relied upon by the defendants (*2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp.* (2008), 89 O.R. (3d) 252 (Ont. S.C.J.)) was reversed on appeal to the Divisional Court 96 O.R. (3d) 252 (Ont. Div. Ct.), Swinton J. dissenting; leave to appeal to the Court of Appeal granted September 24, 2009. At first instance certification was denied, in part on the basis that the determination of whether class members who were franchise owners had suffered damages would of necessity be an individual issue.

201 In their discussion of whether aggregate damages could be available, Hennessey and Karakatsanis JJ., for the majority of the Divisional Court, stated at para. 102:

A motions judge is entitled to review the evidentiary foundation to determine whether there is some basis in fact to find that proof of aggregate damages on a class wide basis is a common issue. While that might require some review of the evidence, the assessment should not relate to the merits of the claim or the resolution of conflicting expert reports.

202 The motions judge had concluded that the plaintiffs could not rely on expert reports respecting aggregate damages to establish the fact of loss, which would of necessity be an individual issue. He rejected aggregate damages as a common issue primarily because he concluded that s. 24(1)(b) would not be met in that, after determination of the common issues, the question of whether each member of the class had suffered a loss would need to be determined on an individual basis.

203 The Divisional Court disagreed with this analysis, concluding that the motions judge erred in principle in failing to consider whether, quite apart from the expert opinion evidence, there was some basis in fact in the record that the fact of loss, if not the quantum of loss, could be a common issue with respect to liability. The majority noted at para. 95:

The relationship between the franchisor, the distributor and each class member was the same; the class members purchased the same products, at the same prices within each region, pursuant to the same franchise contracts and distribution agreement. The class members did not have separate individual relationships with the respondents. Although there will be a differential impact on the class members depending on the specific products each ordered, if the plaintiffs ultimately prove overcharging, the fact of loss or damage must be common to all.

204 In the present case, there is also "some basis in fact in the record" that the fact of loss could be a common issue with respect to liability. As in *Quizno's*, each class member is similarly situated in relation to the defendants. The loss or damage that

is alleged is a devaluation of their shares on the secondary market. There is evidence that the price of IMAX's shares fell on the TSX and NASDAQ on August 9, 2006 when the Representation was allegedly corrected. As in *Quizno's*, if the plaintiffs prove the misrepresentation, the fact of loss or damage will be common to all, although the impact on individual shareholders will differ.

205 Accordingly, there is a reasonable likelihood that s. 24(1)(b) will be met, that is that no questions of fact or law other than those relating to the assessment of monetary relief will remain to be determined after the common issues trial in order to establish the amount of the defendants' monetary liability.

206 With respect to s. 24(1)(c), the requirement that the aggregate or a part of the defendants' liability to some or all class members can reasonably be determined without proof by individual class members, I am satisfied that the plaintiffs' expert reports provide a sufficient evidentiary foundation to conclude that there is a "reasonable likelihood" that such an aggregate determination may be made without proof by individual class members.

207 Accordingly proposed common issue 12 will be certified as a common issue in these proceedings.

#### 7. Other Proposed Common Issues

208 Issues 13 (vicarious liability) and 14 (punitive damages) involve considerations of the conduct of the defendants and will not entail evidence from individual class members. They are properly certified as common issues in these proceedings.

209 Issues 15 and 16 deal with the procedure for determining individual issues. Such issues have been certified recently in other cases as common issues, and in my view are proper common issues to be certified in this case. Similarly, issue 17 concerning prejudgment and post-judgment interest flows from the determination of any damages award and is a proper common issue for certification.

#### F. Section 5(1)(d) of the CPA: Is a class proceeding the preferable procedure for the resolution of the common issues?

210 The preferability requirement has two concepts at its core — the first is whether or not the class action would be a fair, efficient and manageable method of advancing the claim and the second is whether the class action would be preferable to other reasonably available means of resolving the claims of class members (*Markson* at para. 69).

211 The determination of whether a proposed class action is a fair, efficient and manageable method of advancing the claim requires an examination of the common issues in their context, taking into account the importance of the common issues in relation to the claim as a whole. The preferability requirement can be met even where there are substantial individual issues and it is not necessary that the common issues predominate over the individual issues in order for the class action to be the preferable procedure. Nevertheless, the common issues cannot be negligible. The critical question is whether, viewing the common issues in the context of the entire claim, their resolution will significantly advance the action (*Hollick* and *Cloud*).

212 In *Carom [Certification]*, Winkler J. outlined the conditions present whenever a class proceeding is the preferable procedure at p. 239:

A class proceeding is the preferable procedure where it presents a fair, efficient and manageable method of determining the common issues which arise from the claims of multiple plaintiffs and where such determination will advance the proceeding in accordance with the goals of judicial economy, access to justice and the modification of behaviour of wrongdoers.

213 The defendants have the burden of proving a preferable alternative process for resolving the common issues. They have not done so in this case, except to argue that litigation of the non-Ontario claims should proceed in the U.S. Proceedings, which is addressed above. "Arguments that no litigation is preferable to a class proceeding cannot be given effect." (*1176560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.* (2002), 62 O.R. (3d) 535 (Ont. S.C.J.), at para. 45, aff'd (Ont. Div. Ct.).

214 The plaintiffs contend that, if this action is not certified as a class proceeding, access to justice for many potential claimants will be thwarted because the costs to prosecute an individual action will be prohibitively expensive and is beyond the

reach of virtually all class members. According to Mr. Cohen's affidavit, the plaintiffs' counsel has estimated that the cost of litigating this matter through to a trial of the common issues will exceed \$750,000, exclusive of disbursements.<sup>28</sup>

215 In *Marcantonio v. TVI Pacific Inc.*, [2009] O.J. No. 3409 (Ont. S.C.J.), Lax J., in certifying a class action for the purpose of settlement (which included claims under s. 138.8 of the OSA) noted the advantages of class proceedings in cases involving secondary market misrepresentation at para. 9:

Individual litigation of securities cases can be difficult, time-consuming and expensive. Many claims would never be advanced because they are uneconomic for an individual investor to pursue. A class action is the optimal method of procuring a remedy for a group of investors who allege they have been harmed in similar ways as a single determination of the defendants' liability eliminates duplication of fact-finding and legal analysis. Further, a class action has the potential to act as an essential and useful supplement to the deterrent effects of regulatory oversight. It enhances the incentive for directors and officers to ensure that their disclosures to the investing public are materially accurate, thereby enhancing investor protection. Consequently, a class proceeding is the preferable procedure because it provides a fair, efficient and manageable method of determining the common issue, and advances the proceeding in accordance with the goals of access to justice, judicial economy and behaviour modification.

216 Such observations apply in the present case. Certifying the class proceeding, including a global class, would serve judicial economy by permitting common issues to be determined on a single occasion, thereby avoiding duplication of fact-finding and legal analysis, as well as the potential for inconsistent results if litigation were pursued individually or by groups of investors in various jurisdictions. The goal of behaviour modification (in this case to deter misrepresentations in public company disclosures) is enhanced by permitting aggregated claims to proceed. As evidenced by the proceedings to date, including the exchange of expert reports, the voluminous materials exchanged in the Leave Motion and various complex issues that have been raised by the defence even at this stage, the anticipated costs and time required to litigate individual claims would greatly exceed the potential individual recoveries. A class proceeding is the only viable method of advancing the claims in this action.

**G. Section 5(1)(e) of the CPA: Are the representative plaintiffs appropriate? Have they produced a workable litigation plan?**

217 Under s. 5(1)(e) of the CPA, the court must consider whether the proposed representative plaintiff (i) would fairly and adequately represent the interests of the class, (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding; and (iii) does not have, on the common issues for the class, an interest in conflict with interests of other class members.

218 The court must be satisfied that the representative plaintiff will vigorously and capably prosecute the interests of the class, although he need not be "typical" of the class or the "best" possible representative (*Western Canadian Shopping Centres* at para. 41). The representative plaintiff does not have to have claims that are identical to those of all other members of the class; it is sufficient if the representative plaintiff has a cause of action against the defendant and that the causes of action all share a common issue of law or fact (Lax J. in *Griffin v. Dell Canada Inc.*, [2009] O.J. No. 418 (Ont. S.C.J.), at para. 97, citing *Healey v. Lakeridge Health Corp.*, [2006] O.J. No. 4277 (Ont. S.C.J.) and *Boulanger v. Johnson & Johnson Corp.*, [2002] O.J. No. 1075 (Ont. S.C.J.), aff'd 64 O.R. (3d) 208 (Ont. Div. Ct.)).

219 There is no merit to the submission of the defendants that the plaintiffs Silver and Cohen would not adequately represent the interests of the class, and would have a conflict of interest because they do not share a common interest with the class. Silver and Cohen share the attributes of the proposed class in that they purchased shares in IMAX after February 17, 2006 and continued to hold shares on August 9, 2006. There are a number of issues that have been approved as common issues, the disposition of which will affect Silver and Cohen as well as the other class members.

220 At this stage the potential differences between the legal regimes applicable to the common law claims of representative plaintiffs and other class members, as well as the question of the application of the statutory claim to nonresident members do not constitute a disabling "conflict of interest". If the defendants assert in their statement of defence that the laws of different

legal jurisdictions apply to class members depending on where they purchased their shares or where they live, the court can consider the need for subclasses and additional representative plaintiffs at that time.

221 Accordingly, Marvin Neil Silver and Cliff Cohen shall be appointed representative plaintiffs in these proceedings.

222 The final requirement under this part of the certification test is that the plaintiffs have produced a plan that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding.

223 In *Griffin v. Dell Canada Inc.*, Lax J. identified the purposes and requirements for a workable litigation plan (at para. 100):

The production of a workable litigation plan serves a two-fold purpose: (a) it assists the court in determining whether the class proceeding is the preferable procedure; and (b) it allows the court to determine if the litigation is manageable: *Carom v. Bre-X Minerals Ltd.* (1999), 44 O.R. (3d) 173 (Sup. Ct.), aff'd (1999), 46 O.R. (3d) 315 (Div. Ct.), rev'd on other grounds (2000), 51 O.R. (3d) 236 (C.A.). The plan must provide sufficient detail that corresponds to the complexity of the litigation. The litigation plan will not be workable if it fails to address how the individual issues that remain after the determination of the common issues are to be addressed: *Caputo v. Imperial Tobacco Ltd.* (2004), 236 D.L.R. (4th) 348 (Sup. Ct.) at para. 76.

224 At the certification motion, the litigation plan must necessarily be preliminary. Not all procedural details need to be particularized. The purpose of the litigation plan at the certification motion is to assist the motions judge to determine whether the action is manageable and whether the goals of the *CPA* will be served by certification of the action as a class proceeding. As the litigation progresses, the litigation plan can be modified as required (*Andersen v. St. Jude Medical Inc.*, [2004] O.J. No. 132 (Ont. S.C.J.)).

225 "The finding that a litigation plan is satisfactory for the purpose of certification does not bind the defendants to accept it after a trial of the common issues and, of course, it does not in any way bind the trial judge. Nor is it cast in stone before the trial as it can be amended from time to time with the approval of the court." (*Hedley v. Lakeridge Health Corp.*, at para. 4).

226 The plaintiffs' proposed litigation plan<sup>29</sup> was prepared as of February 22, 2007 and has not been revised. The plan details the proposed steps in the litigation, including the leave and certification motions, notice to class members, the opt-out procedure, and the trial of the common issues. The plan proposes a method to determine any remaining individual issues, including specifically the determination of damages under the OSA claim.

227 The defendants contend that the litigation plan is inadequate because it does not propose a mechanism for determining the governing law applicable to individual members' claims, or even contemplate that such determinations will be required.

228 In *Carom [Certification]*, Winkler J. rejected a litigation plan that was not sufficiently comprehensive and detailed, in particular where the plan did not disclose a method for dealing with the claims of extra-provincial plaintiffs (at para. 101).

229 I agree that the litigation plan is not sufficient because it fails to address issues specific to a global class. The plan, while reasonably detailed, is *pro forma*, except for the provisions dealing with the statutory claim. The plan does not advert to any steps that might need to be taken or measures that should be put in place in the litigation to address the interests of non-resident class members, and in this regard, lacks detail in particular in the area of the form, substance and distribution of notice to non-resident class members.

230 Until the defendants have pleaded, it will likely not be possible for the potential conflict of law issues to be fully explored, and for the parties and the court to consider whether subclasses and additional representative plaintiffs will be necessary. While the determination of these issues, including the specific procedures to be followed, is something that will need to be addressed between counsel and the court as the matter proceeds, the litigation plan should provide a roadmap of how the plaintiffs propose to proceed with all aspects of the proceedings. The litigation plan requires amendment to indicate how the plaintiffs propose to address the global aspects of the class certification. In particular, the plaintiffs should address the form and substance of notice to both resident and non-resident class members, the proposed time periods for opting out of the proceedings, as well any additional measures or steps in the litigation that may be contemplated to address the interests of non-resident class members.

231 Accordingly, the certification of these proceedings will be subject to the plaintiffs' delivery of an acceptable amended litigation plan.

## Conclusion

232 I have concluded that the plaintiffs have met the test for certification of a global class to assert the claims under s. 138.3 of the OSA, as well as certain of the common law claims as pleaded in the Claim.

233 Leave is granted to the plaintiffs to amend the Statement of Claim in the form of the Fresh as Amended Statement of Claim, without underlining, subject to the qualifications provided for in these reasons.

234 Subject to the submission of a revised litigation plan by the plaintiffs, this action will be certified as a class proceeding. The specific terms of the order (to be consistent with these reasons) and of the form, content and method of notice to class members, as well as any directions necessary to implement the orders in this motion and the Motion for Leave, shall be settled at an attendance of counsel to be arranged with the trial co-ordinator. If the parties are unable to agree on costs, this can also be addressed in the attendance.

*Order accordingly.*

## Footnotes

- <sup>1</sup> IMAX adopted U.S. GAAP; all references to GAAP in these reasons relate to U.S. GAAP.
- <sup>2</sup> While all of the other provincial and territorial jurisdictions in Canada have now incorporated the statutory cause of action into their securities legislation, Ontario was the only province to have such provisions in force when these proceedings were commenced.
- <sup>3</sup> Leave was granted to proceed with the s. 138.3 claim against IMAX Corporation, Gelfond, Wechsler, Joyce and Gamble, as well as members of the IMAX audit committee at the time (Copland, Lebron and Braun) and board member Girvan, but not against the two remaining external directors, Utay and Fuchs.
- <sup>4</sup> There is a parallel proceeding pending against IMAX, Gelfond, Wechsler, Joyce and Gamble, as well as PriceWaterhouseCoopers (both the Delaware and Ontario limited liability partnerships) in the United States District Court, Southern District of New York (the "U.S. Proceedings"). Initially several proceedings were commenced in the U.S., which were consolidated. A Consolidated Amended Class Action Complaint was filed in October 2007. The amended complaint, while alleging substantially the same facts as are pleaded in the Ontario proceedings, is broader in scope, dealing with IMAX's revenue recognition on theatre systems from 2002 to 2006. The defendants' motion to dismiss the claim was dismissed in September 2008 ([587 F.Supp.2d 471 \(U.S. Dist. Ct. S.D. N.Y., 2008\)](#).

The proposed class in the U.S. Proceedings is shareholders who purchased the Company's common stock between February 27, 2003 and July 20, 2007 on both NASDAQ and the TSX. In the U.S. Proceedings, the lead plaintiff Westchester Capital Management, Inc. ("Westchester") filed a motion seeking certification of a class encompassing both NASDAQ and TSX purchasers of IMAX securities, which motion was opposed by the defendants. By order dated March 13, 2009, the U.S. court denied the certification motion without prejudice," pending the resolution of the proposed motion of another purported class member, Snow Capital Investment Partners, L.P. ("Snow") for the court to reconsider its January 17, 2007 order appointing Westchester Capital Management, Inc. as lead plaintiff in the U.S. Proceedings. By order dated June 30, 2009, Snow replaced Westchester as the lead plaintiff. The certification issue remains to be determined in the U.S. Proceedings.

- <sup>5</sup> The Statement of Claim was issued in September 2006. There have been several changes to the pleading, resulting in a Fresh Statement of Claim (the "Claim") that was delivered shortly before the hearing of the motions. While the Claim has not been formally amended (an amendment is part of the relief sought in the motions), the allegations in the proposed pleading, that include both the common law claims against the named defendants and the statutory claims against the defendants and proposed defendants, were considered for the purpose of the leave, Rule 21 and certification motions.
- <sup>6</sup> Class proceedings based on misrepresentation to the secondary market have also been certified for the purpose of settlement in [CC&L Dedicated Enterprise Fund \(Trustee of\) v. Fisherman](#); [CC&L Dedicated Enterprise Fund \(Trustee of\) v. Fisherman](#), [2002] O.J. No.

1855 (Ont. S.C.J.), *Frohlinger v. Nortel Networks Corp.*, [2007] O.J. No. 148 (Ont. S.C.J.), *Gould v. BMO Nesbitt Burns Inc.*, [2007] O.J. No. 1095 (Ont. S.C.J.), *Marcantonio v. TVI Pacific Inc.*, [2009] O.J. No. 3409 (Ont. S.C.J.) and *Charles Trust (Trustee of) v. Atlas Cold Storage Holdings Inc.*, [2009] O.J. No. 4067 (Ont. C.A.).

- 19 Castel's *Canadian Conflict of Laws*, 4th ed. (Toronto: Butterworths, 1997).
- 20 Philip Anisman and Garry Watson have suggested that, on the authority of the *Pearson* case, the statutory cause of action for secondary market misrepresentation under the OSA would be available only to investors who traded on the TSX In Ontario. (P. Anisman and G. Watson, "Some Comparisons Between Class Actions in Canada and the U.S.: Securities Class Actions, Certification and Costs", 3 *The Canadian Class Action Review* 467 at 522). *Pearson* however clearly depended on the court's finding that prospectus requirements are tied to the place of distribution, and that the shareholder's statutory right of action depended on the law of the province where the prospectus obligations arose. The "distribution" took place in each province where the prospectus was filed. The determination of the scope of persons who might assert a claim under s. 138.3 of the OSA does not fit neatly into the *Pearson* analysis.
- 21 Jones and Baxter, note 18, at p. 420. In a critique of the decision of the Québec Superior Court in *HSBC Bank Canada c. Hocking*, [2006] J.Q. No. 507 (C.S. Que.), refusing to bind Québec residents to a settlement reached on their behalf in Ontario, the authors comment on an "all-too-familiar application to the class action context of rules established in individual civil litigation", where "the court treats the class as a collection of individual claims, not as a truly aggregate action; as a result it does not consider the consequences of parsing the class into smaller and smaller units, and gives no weight to the real advantages that accrue to individual class members from participation in a larger, more efficient action."

III.4.c Contracting out

**Headnote**

Labour and employment law --- Employment standards legislation — Applicability of legislation — Contracting out D and ATD, whose assets D acquired provided document review services undertaken by lawyers — Proposed class action was launched by S alleging that putative class members were entitled to benefits under Employment Standards Act, 2000 such as overtime, vacation pay, and holiday pay — S was disqualified as representative class plaintiff and class counsel recruited P as representative class plaintiff — D argued that P was not qualified to be representative plaintiff as showing inadequate attention to responsibilities as representative plaintiff and that no avoiding conflict because right to opt out or the right to not opt into settlement were illusory because s. 5(1) of Act prohibited employee contracting out of or waiving any employment standard — Class action certified with P as representative plaintiff — Major qualities of representative plaintiff are independence and loyalty to class — Major responsibility to ensure that class counsel does not improvidently settle action — P worked for D for approximately 16 months and had personal interest in succeeding with declaratory and monetary claims — Given P's legal background, he had more than layman-plaintiff's knowledge of nature of employment law claims underlying common issues of proposed class action — For class members that opted out, there would be no determination whether or not they were employees, prerequisite for s. 5(1) of Act to operate — On certification motion court should not find conflict of interest because of what administrators of Act might do in future in response to court ruling not binding on class members that opted out — Uncertain how many class members would opt out and number of opt outs would not in itself provide basis for decertification.

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Conflicts of interest

D and ATD, whose assets D acquired provided document review services undertaken by lawyers — Proposed class action was launched by S alleging that putative class members were entitled to benefits under Employment Standards Act, 2000 such as overtime, vacation pay, and holiday pay — S was disqualified as representative class plaintiff and class counsel recruited P as representative class plaintiff — D argued that P was not qualified to be representative plaintiff as showing inadequate attention to responsibilities as representative plaintiff and that no avoiding conflict because right to opt out or the right to not opt into settlement were illusory because s. 5(1) of Act prohibited employee contracting out of or waiving any employment standard — Class action certified with P as representative plaintiff — Major qualities of representative plaintiff are independence and loyalty to class — Major responsibility to ensure that class counsel does not improvidently settle action — P worked for D for approximately 16 months and had personal interest in succeeding with declaratory and monetary claims — Given P's legal background, he had more than layman-plaintiff's knowledge of nature of employment law claims underlying common issues of proposed class action — For class members that opted out, there would be no determination whether or not they were employees, prerequisite for s. 5(1) of Act to operate — On certification motion court should not find conflict of interest because of what administrators of Act might do in future in response to court ruling not binding on class members that opted out — Uncertain how many class members would opt out and number of opt outs would not in itself provide basis for decertification.

#### Table of Authorities

##### Cases considered by *Perell J.*:

*Allen v. Aspen Group Resources Corp.* (2009), 2009 CarswellOnt 7620, 81 C.P.C. (6th) 298, 67 B.L.R. (4th) 99 (Ont. S.C.J.) — referred to

MOTION in certification of class proceeding.

**Perell J.:**

'The time has come,' the Walrus said,  
    'To talk of many things;  
        Of shoes — and ships — and sealing wax —

Of cabbages — and kings —  
And why the sea is boiling hot —  
And whether pigs have wings.'

[Louis Carroll, *The Walrus and the Carpenter in Through the Looking Glass*, 1872]

## A. Introduction

1 The time has come to talk about putative class members that want nothing to do with a proposed class action under the *Class Proceedings Act, 1992*<sup>1</sup> and are likely to opt out.

2 The motion now before the court is a continuation of a certification motion in a proposed class proceeding. By decision released on April 13, 2017,<sup>2</sup> Justice Belobaba ruled that Ms. Sondhi was not suitable to be the representative plaintiff, and Class Counsel now seeks to have Tarrie Phillip substituted. However, the Defendants, Deloitte Management Services LP and Deloitte & Touche LLP (collectively "Deloitte"), submit that Mr. Phillip is also unsuitable, because he allegedly does not care that the putative Class Members want nothing to do with a class action that they believe will actually cause them financial harm. Deloitte asks that the certification motion be dismissed without waiting to see if any of the 418 putative Class Members will opt out.

3 However, for the reasons that follow, I find that all the certification criteria have been satisfied and accordingly, I substitute Mr. Phillip as the representative plaintiff and certify the action as a class proceeding.

## B. Factual and Procedural Background

4 Deloitte and ATD Legal Services, whose assets Deloitte acquired in January 2014, provided document review services undertaken by lawyers. Deloitte retained Procom Consultants Group Limited to provide payroll services for Deloitte.

5 Ms. Sondhi was one of the document reviewers. She worked less than 70 hours over a two-month period. She never worked more than 44 hours per week, and she never worked on a statutory holiday.

6 On March 9, 2015, Ms. Sondhi commenced a proposed class action.<sup>3</sup>

7 Landy Marr Kats LLP and Monkhouse Law are the proposed Class Counsel.

8 In her Statement of Claim, Ms. Sondhi seeks, among other things, a declaration that the individuals who provided document review services to Deloitte and ATD Legal Services; *i.e.*, the putative Class Members, were employees of Deloitte and or Procom Consultants. Ms. Sondhi alleges that the putative Class Members were entitled to the benefits provided under the *Employment Standards Act, 2000*<sup>4</sup> such as overtime, vacation pay, and holiday pay.

9 Justice Belobaba heard her certification motion. On the certification motion, but for Ms. Sondhi's singular evidence, the evidence was that the putative Class Members deliberately and calculatedly contracted with Deloitte to be independent contractors because of the perceived advantages to them personally of being an independent contractor and the perceived disadvantages of being an employee.

10 The certification motion was heard on March 28, and 29, 2017. Justice Belobaba refused to certify the class action as against Procom Consultants, finding that there was no basis in fact for the allegation that the document reviewers were employees of Procom. He refused to certify the proposed common issue that sought to make Deloitte liable for document reviewers who had provided services to ATD, finding that there was no basis in fact for the allegation that Deloitte was a common employer with ATD.

11 As against Deloitte, Justice Belobaba held that three of the five certification criteria (cause of action, common issues, and preferable procedure) had been satisfied. In his decision, Justice Belobaba certified the following common issues as against Deloitte:

1. Did the actual circumstances of the relationship between Deloitte and the class members constitute an employer/employee relationship such that class members were in fact employees of Deloitte and not "independent contractors"?
2. If the answer to 1) is "yes", is Deloitte liable to the class for employee benefits pursuant to the *Employment Standards Act* (including unpaid vacation pay and public holiday pay and overtime) and for compensation for improper remittances?
3. If liability is established, are aggregate damages available?

12 Justice Belobaba, however, decided that two criteria (prerequisites for certification), the class definition and the representative plaintiff criterion, had not been satisfied. Justice Belobaba adjourned the motion to allow Class Counsel to amend the class definition and to find a replacement representative plaintiff within 60 days.

13 Justice Belobaba rejected Ms. Sondhi's proposed class definition, which included document reviewers who had worked only at ATD, and ordered that the class definition be narrowed to include only document reviewers who provided their services to Deloitte.<sup>5</sup>

14 Class Counsel and Ms. Sondhi now propose the following revised proposed class definition, which they submit responds to Justice Belobaba's suggestions:

All persons having performed or currently performing document review or e-discovery services at Deloitte pursuant to an independent contractor agreement since January 16, 2014 to the date of certification, exclusive of any person who has only ever performed the duties of a Project Manager.

15 Deloitte does not dispute that this definition would satisfy the class definition criterion for certification. Deloitte estimates that the putative class comprises 418 individuals.

16 As already noted, Justice Belobaba was not satisfied that Ms. Sondhi was qualified to be the representative plaintiff; he stated:

37. The final requirement set out in s. 5(1)(e) of the CPA, a representative plaintiff who can "fairly and adequately represent the interests of the class" may be more difficult to satisfy.

38. My concern here is not that Ms. Sondhi never worked more than 44 hours per week and is not entitled to overtime. Other class members can make this claim. And all class members can claim for statutory and vacation pay as already noted. The fact that different remedies are sought for different class members is not a bar to certification. And there is no conflict of interest under s. 5(1)(e)(ii) just because some class members may not agree with the action or otherwise may decide to opt out.

39. I am also not overly concerned that Ms. Sondhi has moved to an island in British Columbia and no longer practices law. She is still entitled to pursue this action as the representative plaintiff if she can "fairly and adequately represent the interests of the class." The Supreme Court has described the qualities required of a representative plaintiff as follows:

The proposed representative need not be "typical" of the class, nor the "best" possible representative. The court should be satisfied however, that the proposed representative will vigorously and capably prosecute the interests of the class.

40. The problem for me is this. I am not satisfied on the record before me that Ms. Sondhi will vigorously and capably prosecute the interests of the class. Or that she will do so in a diligent and responsible fashion.

41. Ms. Sondhi's evidence on this motion was at best unreliable and at worst untruthful. The affidavit provided by Ms. Sondhi in support of this motion, and sworn to be true, contains a number of significant misstatements that were recanted on cross-examination. For example, that every document reviewer worked the same number of hours and that Ms. Sondhi's work hours were pre-determined (she admitted on cross-examination that neither of these points was true); or that she was subject to quotas of documents to review (she admitted on cross-examination that this was not true.) Having recanted this incorrect evidence on cross, Ms. Sondhi nonetheless proceeded to repeat the same misstatements in her factum on this motion.

42. Even if her affidavit and factum were drafted by class counsel, as is often the case, it is obvious that neither document was reviewed by the plaintiff before it was sworn or filed with the court. Ms. Sondhi also chose not to review the defendants' responding motion records or the timetable for the certification motion. I find in all of this a disturbing level of unreliability, disinterest and even indifference on the part of the proposed representative plaintiff. The proposed class members are entitled at the very least to a representative plaintiff who can be counted on to take her job seriously, review key documents and demonstrate an appropriate level of interest in a class action that is being brought in her name and that is claiming hundreds of millions of dollars in damages.

43. In sum, I am not persuaded that Ms. Sondhi will "fairly and adequately represent the interests of the class." I direct that the proposed representative plaintiff must be replaced with another within 60 days.

17 Significant to the discussion below, it should be noted that Justice Belobaba would not have disqualified Ms. Sondhi for the reason that she did not inquire, canvass, or poll the putative Class Members to determine whether they supported the proposed class action. Justice Belobaba stated:

31. The fact that several document reviewers filed affidavits saying that they are not employees and prefer to work as independent contractors is not determinative of anything. As the Court of Appeal noted in [*Keatley Surveying Ltd. v. Teranet Inc., 2015 ONCA 248*] "the representative plaintiff does not have to conduct a referendum to determine how many class members want to sue." If document reviewers wish to disassociate themselves from Ms. Sondhi's allegations and opt out of the class action, they will have every right to do so. In any event, the views or intentions of any given worker, or even a majority of workers, however credible or heart-felt, do not decide the applicability of the ESA.

18 After the release of Justice Belobaba's decision, Class Counsel recruited Mr. Phillip to replace Ms. Sondhi.

19 Mr. Phillip is a lawyer. Between June 2015 and September 2016, Mr. Phillip worked as a document reviewer for Deloitte. During this time, he also provided document review services to another document review provider.

20 Before agreeing to be a representative plaintiff, Mr. Phillip read Justice Belobaba's decision and some material about the responsibilities of a representative plaintiff. He subsequently, before being cross-examined, read the pleadings and the material filed for the certification motion.

21 On cross-examination, Mr. Phillip revealed that he has not communicated with any putative Class Member. He made no attempt to communicate despite his understanding that there are numerous document reviewers who provided evidence on the certification motion that they do not want to be declared to be employees. Mr. Phillip stated that he had not considered making inquiries into how the relief sought in the claim would impact him or the putative Class Members. His view was that the proposed class action was in the best interests of the class. He formed this view based on his own assessment of the merits of the claim being advanced.

22 During his cross-examination, Mr. Phillip testified:

Q. 147. In your own words, sir, what are you seeking to accomplish in the action?

A. So I think I briefly kind of glossed over this earlier when you asked a previous question. I do think it's important for, especially for young lawyers coming out, to know exactly where they stand, and I don't think that there's enough clarity

around the issue. So, I really want this to be set out in such a manner that we can figure out exactly where we stand, like, if we're employed or what the case is, where does the law stand on that. So . . .

Q. 148. And do you have a position with respect to whether or not the lawyers and document reviewers for Deloitte are employees or independent contractors?

A. Yes, I have a position and that's part of the motivation for me coming forward. I do think that the nature it's very similar to, like, what I do now, for instance, like, you know, the flexibility you have, but where I am now, I am an employee, right? So, I can understand that, you know, at that time I was an employee, but throughout the whole process of just coming out of law school and you're desperate, you need a job, you just kind of go with what they tell you. But, you know, looking at the circumstances, I do think at the time I was an employee with Deloitte. So that's where I stand on that.

Q. 149. And at the time that you were providing services to Deloitte, did you think you were an independent contractor or an employee?

A. I wasn't thinking about that, to be honest. I was just trying to get a job to be employed to take care of my, you know, my wife and, you know, for us to take care of each other, that kind of thing.

Q. 150. And what order do you hope the Court will make in this action?

A. I hope the Court would make a favourable order for our side and certify this and, you know, I hope it can go forward and . . .

Q. 151. And at trial what order do you hope the Court would make?

A. Again, a favourable order for the plaintiff. I don't know specifically, like, what phraseology I want the Court to make but, you know, something favourable for the plaintiffs that, you know, they — the classes, you're considered an employee based on the nature of the work and the nature of the conditions around the employment with Deloitte.

Q. 152. And why do you think that would be — that order would be in the best interests of the class that you represent or that you seek to represent?

A. Because I think it's right. That's why.

Q. 153. Can you elaborate on that?

A. It might sound a bit abstract or like — I think it is the right thing. I think if you're — for example, if you have to work, right, and you have to be — you can only work between certain hours, for example, I think that's one of the things that I see as leaning towards you being, you know, an employee. Even though you have flexibility to take, like, lunches and things like that, I can do that right now with my employment. I'm not there now, like, but I'm a salaried employee. So, looking at those things, it makes me feel like, yeah, maybe Deloitte was trying to, you know, take advantage of some young lawyers just coming out, like, so — and that is why.

Q. 154. And you think on balance, that it would be in the class members' interest to be retroactively treated as employees rather than as independent contractors?

A. So based on what I said in the previous answer, I think that the right decision would be for them to be labelled as employees, you know, and, yeah, and I think that kind of answers this as well. It would be the right decision, I think.

. . .

Q. 156. Why are you willing to take on the role of representative plaintiff?

A. I don't want an important decision like this to just fall by the wayside.

Q. 157. Is your understanding that if you weren't putting yourself forward, that there would be no one else who would be prepared to do that?

A. I don't know how many — I don't know that, the details of that, like, how many people are willing to come forward or whatever the case may be, but I think there would be other people because I know when I was at Deloitte, for instance, a few of my coworkers, they would say, you know, they think it's a good case. They see — like, people that would be sitting next to me, and so I think there would be other people coming forward for a case like this.

....

Q. 165. You agree that if you are appointed as representative plaintiff, you would be required to fairly and adequately represent the interest of the class?

A. Yes.

Q. 166. And what do you perceive to be the interests of the class?

A. So just to kind of touch on something that I said before, I think the interests of the class is to have this solved so they can understand where they stand as employees and also, to have a favourable sediment in the sense of determining that at that time they were employees based on the nature of the circumstances around the work.

Q. 167. How do you know that is the interest of the class?

A. I don't know, because that's my perception. You asked what I perceived, right? So . . .

Q. 168. You are aware that a number of current or former document reviewers swore affidavits in the proceeding stating that they did not want to be held to be employees?

A. I read some of the affidavits, yeah.

Q. 169. And how do you reconcile those class members' affidavits with the claims being advanced by your counsel?

A. I reconcile it with it's just a fact of life. You never get any situation where a hundred percent of people agree, and the most popular person is never — so that's how I see it. Like, you'll always — they'll always get someone to say that can say otherwise and we can get people that, you know, believe otherwise, but it is my view and I think the view of a lot of the class that, you know, we were employees.

....

Q. 172. You had indicated that you believe that it is the view of a lot of the class that they are employees or were employees and I had asked you what was the basis of your view.

A. Yeah.

Q. 173. Have you given me the full extent of your answer?

A. I mean, there's a lot around that, but I think that is my answer. Like, that's why I think. If you look at the full circumstances of, like, how we are employed as in addition to things like on weekends, for instance, if it's a very busy project, you would be encouraged to, you know, come in on the weekends and things like that. The fact that, you know, the office was open, like, from eight till, like, six and you can only, like, work in that time period, things like that, in addition to what I said before, I think that lends to my view on the matter.

Q. 174. So your view is that this action is in the best interests of the class is based on your assessment of relative merits of the claim being advanced by counsel?

A. Yes, I think that's a fair summary.

23 There is no third-party funding or funding from the Ontario Law Foundation's Class Proceedings Fund, and Mr. Phillip refused to disclose whether he has an indemnity agreement from Class Counsel. He deposed that he has the financial means to be responsible for an adverse costs award but refused to answer any questions about his financial assets or resources.

## C. Positions of the Parties

### 1. Deloitte's Argument

24 Deloitte argues that Mr. Phillip has failed to conduct reasonable due diligence, agreed to being recruited with little understanding of the litigation and his responsibilities, does not appear to take the job of representative plaintiff seriously, has not properly instructed Class Counsel who have been dilatory in posting or disseminating information about the proposed class action, and has not demonstrated an appropriate level of interest in the action. Further, Deloitte submits that Mr. Phillip has not demonstrated that he has the financial resources to pay costs and prosecute the class action in the best interests of the putative Class Members.

25 Deloitte submits that Mr. Phillip has failed to ascertain the interests of the putative Class Members and made no inquiries in this regard. Deloitte submits that Mr. Phillip has a conflict with most if not all of the putative Class Members (with the exception of the disqualified Ms. Sondhi) and that Mr. Phillip is indifferent to the facts that: the overwhelming evidence from the putative Class Members is that the class action was not in their best interests; and that the putative Class Members cannot escape being impacted by the proposed class action, because, even if they opt out, they will be bound by the result, since the *Employment Standards Act, 2000* prohibits contracting out.

26 Deloitte submits that although a proposed representative need not conduct a referendum to determine how many Class Members want to sue, in the face of the evidence adduced on this certification motion, Mr. Phillip ought to have made some inquiry to satisfy himself that there are some proposed Class Members who are in favour of the relief sought.

27 Deloitte's attack against Mr. Phillip can be categorized under four headings: (1) inadequate attention to responsibilities; (2) inadequate litigation plan; (3) want of financial resources; and (4) conflict of interest, including a conflict of interest between the Class Members and the Class Members that opt out. Deloitte submits that Mr. Phillip is not qualified to be representative plaintiff and, therefore, the certification motion should immediately be dismissed.

### 2. Mr. Phillip's Argument

28 Mr. Phillip argues that as a factual matter Deloitte's submissions are false. He submits that he is eminently qualified to be a representative plaintiff being knowledgeable, motivated, committed, and keenly interested in pursuing the action with or without Ms. Sondhi. He submits that he has the necessary financial resources to prosecute the action, and, in any event, the financial wherewithal of the representative plaintiff is just a factor among other factors to be weighed.

29 As a legal matter, Mr. Phillip denies that he has any conflict with Class Members and he submits that putative Class Members do not decide the applicability of the *Employment Standards Act, 2000*, and, thus, any argument that Mr. Phillip has a conflict of interest is, as a legal matter, wrong.

30 Mr. Phillip argues that if some putative Class Members have expressed a desire not to be classified as employees, they can opt out.

31 Mr. Phillip submits that all of the certification criteria have been satisfied and therefore the court must certify the action as a class proceeding.

## D. Discussion and Analysis

### 1. Introduction

32 Deloitte takes no objection to the competence of the Class Counsel that recruited Mr. Phillip. Landy Marr Kats LLP has more than adequate class action expertise and Monkhouse Law has expertise in employment law matters. Deloitte does object to Mr. Phillip as a suitable representative plaintiff.

33 As noted above, Deloitte's attack against Mr. Phillip as a representative plaintiff can be categorized under four headings. In this section of my Reasons for Decision, I shall address Deloitte's attacks on Mr. Phillip's qualifications one by one. However, before doing so, I shall first describe the general law about the representative plaintiff criterion and also the general law about the decertification of a class action.

34 As will appear from the discussion below, the matter of decertification is a matter related to Deloitte's arguments about the representative plaintiff criterion and to the circumstance that putative Class Members predominately may opt out of the action if it were certified.

35 After the discussion of the background law and the four grounds of attack, I will conclude the discussion with an analysis of the significance, if any, should it happen that a preponderance of Class Members opt out of the class action.

### 2. The Representative Plaintiff Criterion

36 The sole remaining issue on this certification motion is whether Mr. Phillip satisfies the representative plaintiff criterion, which is set out in s. 5(1)(e) of the *Class Proceedings Act, 1992*, which states:

- 5 (1) The court shall certify a class proceeding on a motion under section 2, 3 or 4 if, . . . .
- (e) there is a representative plaintiff or defendant who,
    - (i) would fairly and adequately represent the interests of the class,
    - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
    - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

37 The representative plaintiff must be a member of the class asserting claims against the defendant, which is to say that the representative plaintiff must have a claim that is a genuine representation of the claims of the members of the class to be represented or that the representative plaintiff must be capable of asserting a claim on behalf of all of the class members as against the defendant.<sup>6</sup> Provided that the representative plaintiff has his or her own cause of action, the representative plaintiff can assert a cause of action against a defendant on behalf of other class members that he or she does not assert personally, provided that the causes of action all share a common issue of law or of fact.<sup>7</sup>

38 Section 5(1)(e) of the Ontario *Class Proceedings Act, 1992*, the representative plaintiff criterion, is derived from Rule 23(a)(4) of the *United States Federal Rules of Civil Procedure*. In the United States, section 1 of the 14<sup>th</sup> Amendment to the U.S. Constitution provides, among other things, that no state shall deprive any person of life, liberty, or property, without due process of law. Since class actions involve so called "absent plaintiffs"; i.e., the class members who are represented by the representative plaintiff, United States legislators were concerned that to be constitutionally *infra vires*, class action legislation must ensure that class members received due process; i.e., that they were adequately represented.<sup>8</sup> Thus, Rule 23(a)(4) provides as one of the criterion for certification that "the representative parties will fairly and adequately protect the interests of the class."

39 This idea from the United States about the adequacy of representation in class proceedings was adopted by the Ontario legislators. The Ontario Law Reform Commission, in its *Report on Class Actions* describes the operation of Rule 23(a)(4) as follows:<sup>9</sup>

Although the case law in respect of Rule 23(a)(4) is abundant, the principles to be applied thereunder are relatively straightforward. For example, it is generally agreed that, before a court can conclude that the named plaintiff will fairly and adequately represent the class, it must be satisfied that his interests are not antagonistic to those of the class that he seeks to represent. In addition, because of the binding effect of a class action judgment, a court must be convinced that the suit is not the result of collusion between the plaintiff and the defendant. A third ingredient of the adequacy of representation requirement of Rule 23 upon which the courts would seem to be in agreement is a showing that counsel for the class is competent to conduct the litigation on behalf of the class. It even has been suggested by some that the adequacy of the representative plaintiff's counsel is of greater import than the adequacy of the representative plaintiff, since "in fact it is class counsel who protects the interests of the class". On the other hand, there are many cases in which the presence of competent counsel has not been sufficient to satisfy the requirements of Rule 23(a)(4); in these cases, the courts have emphasized the importance of a representative plaintiff capable of playing an active role in the litigation, although the level of understanding required of the representative plaintiff may vary from case to case.

40 The jurisprudence in Ontario and across Canada is similar to the American case law. The Canadian case law establishes that whether the representative plaintiff can provide adequate representation depends on such factors as: (a) his or her motivation to prosecute the claim; *i.e.*, the court must be satisfied that the proposed representative will vigorously and capably prosecute the interests of the class; (b) the competence of his or her counsel to prosecute the claim; and (c) his or her ability to bear the costs of the litigation.<sup>10</sup>

41 Adequate representation is based on the notion that the representative plaintiff has a sufficient common interest with the class members and also the motivation and ability to pursue the action for their mutual benefit; however, a representative plaintiff need not share every characteristic of every member of the putative class or be typical of the class.<sup>11</sup>

42 However, because the plaintiff will have the advice of competent counsel, one should not expect too much or be too demanding in evaluating whether a person can properly serve as a representative plaintiff.<sup>12</sup> If the access to justice concerns of the *Class Proceedings Act, 1992* are to be accomplished, the court should not subject the proposed representative plaintiff to some sort of Class Action Aptitude Test and should be skeptical of the defendant's arguments based on the personality of the candidate.<sup>13</sup>

43 The court should be skeptical because the defendant's crocodile tears' argument about the adequacy of the representative plaintiff is made out of a desire to devour the class action and have the certification motion dismissed. As I noted in *Berg v. Canadian Hockey League*, defendants are not genuinely interested in ensuring that class members are adequately represented; rather, defendants are genuinely interested in ensuring that there is no class action.<sup>14</sup>

44 While the court should be skeptical of the defendant's attacks against the qualifications of the representative plaintiff, the court must nevertheless ensure that the proposed representative plaintiff is not a string-puppet of an entrepreneurial chameertous class counsel. The proposed representative plaintiff must be a genuine plaintiff with a real role to play and not a placeholder plaintiff recruited to cater to the entrepreneurial interests of class counsel.<sup>15</sup> A proposed representative plaintiff must demonstrate autonomy and a minimum level of general knowledge about the nature of class proceedings and his or her responsibilities to give instructions on behalf of the class.<sup>16</sup> Thus, while not necessarily a disqualifying factor, the recruitment of the plaintiff is a relevant factor to be considered in determining whether the proposed representative plaintiff has the necessary interest, independence, and incentive to fulfill his or her duties to the class members.<sup>17</sup>

45 The proposed representative plaintiff must present a workable litigation plan. The quality of the litigation plan reveals something about the competence of class counsel, although over the years, the profession has developed more or less boilerplate litigation plans. The production of a workable litigation plan assists the court in determining whether the class proceeding is the preferable procedure, and it allows the court to determine whether the litigation itself is manageable in its constituted form.<sup>18</sup> Litigation plans are a work in progress; they are meant to be malleable and subject to revision and adjustment as the litigation progresses.<sup>19</sup>

46 The financial ability of the representative plaintiff to bear the expense that is necessarily involved for the proper prosecution of a class action is a relevant factor in determining whether he or she is qualified to be a representative plaintiff.<sup>20</sup>

47 A plaintiff with an interest in conflict with the interests of other class members does not qualify as a representative plaintiff.<sup>21</sup> However, a conflict in interest is not the same thing as there being differences in the circumstances of the representative plaintiff and the class members. To be a disqualifying conflict, the differences between the situation of the representative plaintiff and the class members must impact on the outcome of common issues and the differences must affect the representative plaintiff's ability to adequately and fairly represent the class.<sup>22</sup>

48 It may be possible to address the possibility of a conflict developing between a representative plaintiff and the members of a class by creating a subclass or it may be necessary to decertify the proceeding if the conflict cannot be resolved.<sup>23</sup>

### **3. Decertification**

49 The *Class Proceedings Act, 1992* provides for decertification where it appears that the conditions for certification are not satisfied. Section 10 of the *Act* provides:

*Where it appears conditions for certification not satisfied*

10. (1) On the motion of a party or class member, where it appears to the court that the conditions mentioned in subsections 5 (1) and (2) are not satisfied with respect to a class proceeding, the court may amend the certification order, may decertify the proceeding or may make any other order it considers appropriate.

*Proceeding may continue in altered form*

(2) Where the court makes a decertification order under subsection (1), the court may permit the proceeding to continue as one or more proceedings between different parties.

....

50 Where the conditions for certification no longer exist because of changed circumstances a party may apply to have the action decertified or to have the certification order amended.<sup>24</sup> The same criteria relate to certification and decertification, and the question is whether the conditions for certification have been satisfied or not.<sup>25</sup>

51 If further evidence demonstrates that the litigation would be unmanageable, or that issues previously held to have commonality cannot in fact be decided on a class-wide basis; the statutory objectives of the *Class Proceedings Act, 1992* — access to justice, judicial economy and behavioural modification — would not be advanced by allowing the action to continue under the *CPA* in such cases, and the action may be decertified.<sup>26</sup> In *Pearson v. Inco Ltd.*,<sup>27</sup> Justice Cullity stated:

.... [Section 10] recognizes that the case-managed procedure under the CPA is necessarily somewhat fluid and that certification motions are decided at an early stage of the proceeding and before discoveries. In consequence, certification orders are not intended to be cast in stone and, whether or not they have been entered, they can be, in effect, revoked, or amended from time to time. It is not in the public interest - or in that of the litigants or the class - that a case should

be permitted to proceed to trial if further evidence demonstrates that the litigation would be unmanageable, or that issues previously held to have commonality cannot in fact be decided on a class-wide basis. The statutory objectives of the CPA — access to justice, judicial economy and behavioural modification — would not be advanced by allowing the action to continue under the CPA in such cases.

52 Except perhaps in an extreme case, the size of the class does not undermine the evidence satisfying the certification criteria and the class proceeding will continue regardless of the diminished size of the class.<sup>28</sup>

#### ***4. Inadequate Attention to Responsibilities***

53 I now turn to Deloitte's arguments that Mr. Phillip is not qualified to be representative plaintiff beginning with the argument that he has shown inadequate attention to his responsibilities as a representative plaintiff.

54 With respect to Ms. Sondhi, the case at bar is one of the rare examples, where a defendant is able to show that the proposed representative plaintiff's promise to do right by the class is a hollow promise and that the proposed representative plaintiff is no genuine representative of the class or is incapable of adequately representing the class. *Sullivan v. Golden Intercapital (GIC) Investments Corp.*,<sup>29</sup> *Frey v. BCE Inc.*,<sup>30</sup> *Wilkinson v. Coca-Cola Ltd.*,<sup>31</sup> and *Horse Lake First Nation v. R.*,<sup>32</sup> are other examples of an essentially clueless representative plaintiff candidate not qualifying to be a representative for the class.

55 Justice Belobaba disqualified Ms. Sondhi, but he gave Class Counsel the opportunity to recruit an adequate representative plaintiff. The issue then is whether Mr. Phillip is to suffer the same fate as Ms. Sondhi because, among other things, he has allegedly demonstrated a disinterest and a lack of due diligence for the class he is to represent.

56 The representative plaintiff does play a very important role in class actions, but, truth be told, the faraway greater responsibility to fairly and adequately represent the interests of the class by vigorously and capably prosecuting the action falls on class counsel. In some cases, truth be told, a representative plaintiff is a fungible, because there will be many potential candidates to be a plaintiff seeking compensation for a mass wrongdoing. Sometimes a proposed class action is the pure invention of class counsel and sometimes the proposed class action is class counsel's opportunistic response to a disaster, a product recall, a corrective disclosure, or a regulator's discovery of a conspiracy. While there is an air of ambulance chasing, there is also an air of class counsel being the champion for access to justice for the many victims of a mass wrongdoing, and thus in the case at bar neither proposed Class Counsel nor Mr. Phillip need be embarrassed by the circumstance that a representative plaintiff has been recruited.

57 At the beginning of a class action, there is little for the representative plaintiff to do but give the instruction to prosecute the action invented or opportunistically discovered by class counsel for the benefit of the victims of a mass wrongdoing. In the case at bar, Mr. Phillip was recruited, but he cannot be faulted for any want of due diligence or disinterest at the outset of this proposed class action.

58 And, if further truth be told, for the certification hearing, in order to satisfy the representative plaintiff criterion, class counsel prepares a standard form template affidavit attaching a standard form litigation plan where the plaintiff deposes to his or her virtues as a representative plaintiff and the virtues of his or her champion, class counsel. Truth be told, the affidavit is a kind of a standard form promise or ritual more than a proof of anything. In the case at bar, Mr. Phillip has made the ritualistic promises and the truth of those promises will be in the doing not the telling at the time of the certification motion.

59 And if the truth be told, the major qualities of the representative plaintiff are independence and loyalty to the class and the major responsibility of the representative plaintiff is to ensure that class counsel does not improvidently settle the action sacrificing access to justice and behaviour modification to the entrepreneurial motivations that encouraged class counsel in the first place to take on the enormous risks attendant on class action litigation. At this juncture, there is no reason to doubt that Mr. Phillip will be loyal to the putative Class Members that do not opt out of the action.

60 Given these truths, it is understandable that it is rare that a plaintiff will be disqualified from being a representative plaintiff for alleged inadequate attention to his or her responsibilities. Turning again to the case at bar, in my opinion, Deloitte has not succeeded in showing that Mr. Phillip cannot or will not fulfill his responsibilities as a representative plaintiff.

61 Mr. Phillip is not a placeholder plaintiff. He has a genuine claim that he wishes to pursue. He worked for Deloitte for approximately 16 months and has a personal interest in succeeding with his declaratory and monetary claims. He believes in the merits of his claims, and given his legal background, he has more than a layman-plaintiff's knowledge of the nature of the employment law claims that underlie the common issues of the proposed class action.

62 It is crocodile tears to denigrate him for not studying up before agreeing to be Ms. Sondhi's replacement. Clients are not expected to study their own cases; that's what lawyers are supposed to do. Clients just need to believe that they may be entitled to legal redress for having suffered some harm.

63 If one takes a step back and compares class actions to regular litigation, it is an oddity or aberration of the test for certification, which is not designed to be a merits test, that a defendant gets to test the sincerity of a plaintiff in his or her belief that they have a meritorious claim. In any event, in my opinion, Deloitte has not proven that Mr. Phillip has not nor that he will not keep his promise to adequately carry out his responsibilities as a representative plaintiff.

### **5. Inadequate Litigation Plan**

64 There is no merit to Deloitte's argument about the litigation plan, which argument largely focuses on the delay it took Class Counsel to update the class about the status of the certification motion and Mr. Phillip's failure to supervise the implementation of the plan.

65 In my opinion, any questions about the adequacy of the litigation plan that could be raised by Deloitte were spent once Justice Belobaba determined that the cause of action, common issues, and preferable procedure criteria were satisfied and the class definition criterion could be satisfied. Thereafter, the litigation plan became a work in progress whose inadequacies, if any, will be addressed by the court's case management of the action.

### **6. Want of Financial Resources**

66 That a representative plaintiff needs to demonstrate some financial capability to prosecute a class action — which is not the same thing as demonstrating that he or she is capable of paying costs — is another oddity of class action procedure in contrast to regular litigation, where save for the defined circumstances where security for costs may be ordered, a plaintiff is not required to show their ability to pay for the litigation or to pay an adverse costs award.

67 In the case at bar, if Mr. Phillip does not have an indemnity agreement from Class Counsel, then, no doubt, he understands that he may be responsible for an adverse costs award if the class action fails or is decertified.

68 The conventional wisdom is that class counsel do agree to indemnify representative plaintiffs, but there is nothing in the *Class Proceedings Act, 1992* that requires it, although it would be professionally irresponsible and negligent to not advise a representative plaintiff of the risks he, she, or it is exposed to by taking on the role of a representative plaintiff. I say "or it" because more frequently large institutions act as representative plaintiff, and I see no reason why they should expect an indemnity agreement from their lawyers, but like all clients, the institutional client should be advised about the downsides of litigation.

69 But even in the class action context, a plaintiff's want of financial resources is just a factor and not a determinative one as to whether a plaintiff qualifies to be a representative plaintiff. And, in the context of a class action, examining the financial resources of the plaintiff is more about protecting the class members' interest in access to justice than it is about protecting the defendant from a judgment-proof plaintiff unable to pay costs.

70 With these thoughts in mind, in my opinion, for the immediate case, there are no grounds for disqualifying Mr. Phillip based on any want of financial resources to adequately prosecute the class action. In the case at bar, Mr. Phillip need not undergo

a judgment debtor examination about his financial resources. Class Counsel will bear the brunt of marshaling the resources to prosecute the action.

### ***7. Conflict of Interest with the Class Members that Opt Out***

71 The most serious knock against Mr. Phillip is Deloitte's argument that Mr. Phillip has a disqualifying conflict of interest.

72 Under s. 5(1)(e) of the *Class Proceedings Act, 1992*, to qualify as a representative plaintiff, the plaintiff must "not have, on the common issues for the class, an interest in conflict with the interests of other class members." In the immediate case, Deloitte submits that Ms. Sondhi and Mr. Phillip have a conflict of interest because most of the putative Class Members do not wish to be declared to be employees, which is the thrust and purpose of Mr. Phillip's class action.

73 Now, typically, it is not a conflict for the representative plaintiff that some of the class members may not desire to pursue the claim because they will have the right to opt out of the action,<sup>33</sup> and even class members that do not opt out are not compelled to take-up their share of any settlement fund. However, Deloitte submits that in the case at bar, there is no avoiding a conflict because the right to opt out or the right to not opt into a settlement are illusory because s. 5(1) of the *Employment Standards Act, 2000* provides that an employee cannot contract out of or waive any employment standard. Section 5(1) states:

#### *No contracting out*

5 (1) Subject to subsection (2), no employer or agent of an employer and no employee or agent of an employee shall contract out of or waive an employment standard and any such contracting out or waiver is void.

74 Deloitte's argument that the putative Class Members' rights to opt out or to not opt into a settlement are illusory, however, is mistaken. The fallacy of the argument follows from the legal fact that the determination of the common issues is only binding on the class members who do not opt out.

75 Under the *Class Proceedings Act, 1992*, there are no positive or negative issue estoppels with respect to class members that opt out. A person who has opted out is not bound by the judgment on the common issues, and a person who has opted out cannot claim the benefit of a judgment against the class action defendant. In the case at bar, both Deloitte and the putative Class Members that opt out are lawfully entitled to carry on as independent contractors.

76 That a common issues decision is binding only on class members who do not opt out is made clear by s. 27 of the *Class Proceedings Act, 1992*, which states:

#### *Judgment on common issues*

27 (1) A judgment on common issues of a class or subclass shall,

- (a) set out the common issues;
- (b) name or describe the class or subclass members;
- (c) state the nature of the claims or defences asserted on behalf of the class or subclass; and
- (d) specify the relief granted.

#### *Effect of judgment on common issues*

(2) A judgment on common issues of a class or subclass does not bind,

- (a) a person who has opted out of the class proceeding; or

(b) a party to the class proceeding in any subsequent proceeding between the party and a person mentioned in clause (a).

*Idem*

(3) A judgment on common issues of a class or subclass binds every class member who has not opted out of the class proceeding, but only to the extent that the judgment determines common issues that,

(a) are set out in the certification order;

(b) relate to claims or defences described in the certification order; and

(c) relate to relief sought by or from the class or subclass as stated in the certification order.

77 In the case at bar, for the class members that opt out, there will be no determination whether or not they are employees, which is a prerequisite for s. 5(1) of the *Employment Standards Act, 2000*, to operate. There will be no declaration of the status of the persons who opt out, be that status employee or independent contractor. Thus, the premise of Deloitte's conflict argument is false, and this argument is not a reason to disqualify Mr. Phillips. The general rule is that it is not a conflict for the representative plaintiff that some of the class members may not desire to pursue the claim applies.

78 The general rule is that the proposed representative plaintiff need not conduct a referendum to determine how many class members support the class action. In *Keatley Surveying Ltd. v. Teranet Inc.*,<sup>34</sup> Justice Sharpe stated for the Court of Appeal:

72. . . . It is in the very nature of class actions that many, if not most, individual class members lack the motivation or the will to commence proceedings. The access to justice and behavior modification goals of class proceedings will often depend upon a representative plaintiff taking the initiative in circumstances where other members of the class would be ignorant of their loss or acquiesce because of disinterest, lack of resources or fear of an adverse costs award. If multiple claims exist, the representative plaintiff does not have to conduct a referendum to determine how many class members want to sue. Ontario's class action regime features an opt-out procedure which affords class members who do not wish to have their claims advanced the right to disassociate themselves from the action. There is no corresponding requirement to establish a willing class.

79 In *1250264 Ontario Inc. v. Pet Valu Canada Inc.*,<sup>35</sup> discussed below, Chief Justice Winkler stated that once a class member has opted out of the class proceeding, he or she is a stranger to the lawsuit and has no standing before the court, and thus, the person who has opted out has no say about how the action is conducted or whether or not it will continue to go forward.

80 Nevertheless, relying on *Boucher v. P.S.A.C.*,<sup>36</sup> *MacDougall v. Ontario Northland Transportation Commission*,<sup>37</sup> and *Paron v. Alberta (Minister of Environmental Protection)*,<sup>38</sup> Deloitte, however, argues that Mr. Phillip has a conflict of interest because the putative Class Members predominately do not wish a class action declaring them to be employees.

81 In the immediate case, in my opinion, there are no conflicts of the type that existed in *Boucher*, *MacDougall*, and *Paron*. In the immediate case, the interests of Mr. Phillip are precisely the same as the interests of the Class Members that do not opt out. He is not a representative for the putative Class Members that opt out and has no relationship with those Class Members.

82 In *Boucher*, the plaintiffs sought to certify an action against their employer who administered a pension plan. The plaintiffs alleged that the defendant employer had wrongfully appropriated the surplus by taking a contribution holiday and providing new retirees early retirement incentives including pay equity payments while excluding the plaintiffs and others from the benefits. Justice Charbonneau, for a variety of reasons, refused to certify the action as a class proceeding, including the reason that the plaintiffs proposed to represent claimants with a conflicting interest because they were differently affected depending on what relief the plaintiffs sought. In the case at bar, all the Class Members are similarly situated; if the class action is successful, they

will all receive the benefits of the employment standards legislation. The putative Class Members that opt out will receive no benefits and they are not bound by the outcome of the class action.

83 In *MacDougall*, the plaintiffs sought to certify an action to challenge, among other things, amendments to a pension plan that provided for a contribution holiday, an early retirement program and enhanced retirement benefits. Justice Hennessy refused certification. She held that if the litigation was successful and the amendments were invalidated, the active employees *in the class* could face adverse consequences since the amendments actually benefited them and they would lose the contribution holiday, the early retirement program, and the enhanced retirement amendments. There was a direct link between the successful outcome of the litigation and the adverse consequences to the active employees. In the immediate case, a successful outcome of the litigation is not adverse to the Class Members that do not opt out because these Class Members support being classified as employees. The Class Members that do opt out are not affected at all by the class proceeding.

84 *Paron* was a class action about the water level of a lake. In *Paron*, the plaintiffs sought an order to raise the water level of the lake by 18 inches, which would permanently submerge portions of the lands of the putative class members who owned lower-lying properties. In that case, some putative class members would be helped and others would be harmed by the remedy sought regardless of whether they opted in or opted out of the litigation. In the immediate case, the remedy of the minimum protections of employment standards legislation causes no harm at all to the Class Members who do not opt out and the outcome of the litigation does not bind the putative Class Members who do opt out.

85 Deloitte, however, argues that whatever the legal reality may be about the non-binding effect of a judgment on the common issues, nevertheless, the practical reality is that if Mr. Phillip succeeds at the common issues trial and the Class Members are declared to be employees, then Deloitte and apparently the administrators of the *Employment Standards Act, 2000*, will have no choice in the future but to treat the putative Class Members that opted out as employees. Thus, Deloitte submits that, practically speaking, Mr. Phillip has a conflict of interest with the putative Class Members that opt out and therefore he is disqualified as a representative plaintiff.

86 Deloitte submits that practically speaking the conflict of interest is inherent and unavoidable. Although the relationship between a worker and his or her manager, be it an employment relationship or an independent contractor relationship, is a contractual relationship, where freedom of contract governs. Deloitte submits that in the case at bar, there is nothing more that can be done to create an independent contractor relationship with document reviewers. Deloitte submits that if Mr. Phillip succeeds, then all the document reviewers must be treated as employees in the future and there is nothing that they or Deloitte can do about this.

87 I do not accept this *in terrorem* argument. Assuming that the court were to determine in the case at bar that the Class Members are employees, it is likely that the court will also explain why the Class Members are classified as employees and this explanation will infuse Deloitte with the knowledge of what they need to do in the future to amend their retainer contracts. Standard form contracts and boilerplate provisions in contracts are frequently amended to respond to court rulings. I certainly do not accept the notion that a court ruling in the case at bar will declare *in rem* that all document reviewers are employees or that Deloitte's adroit lawyers will be unable to fashion the bullet proof independent contractor contract.

88 I also do not accept the notion that on a certification motion, the court should find the representative plaintiff has a conflict of interest because of what the administrators of the *Employment Standards Act, 2000* may do in the future in response to a court ruling that does not bind negatively or positively the putative Class Members that opted out of the class action.

89 In short, in the case at bar, Deloitte has not established that Mr. Phillip has a disqualifying conflict of interest.

## **8. The Significance of a Preponderance Opt Outs**

90 The conclusion that Mr. Phillip does not have a conflict of interest, however, begs the question of whether there is any significance to the feature of the immediate case that a preponderance of Class Members may opt out. The discussion so far reveals that the potential of many opt outs is not a bar to certification, but the discussion leaves open the question of what

significance, if any, there is to the circumstance that there may be a preponderance of opt outs. The answer to this question lies in the territory of decertification.

91 In the immediate case the answer is that it is premature to consider the significance of a preponderance of opt outs. If this action is certified and it turns out that the preponderance of the Class Members do opt out that in and of itself would not be a basis for decertifying the action. The Class Members who do not opt out are entitled to access to justice and the representative plaintiff is duty bound to advance their common interest.

92 However, a large number of opt outs may expose the action to decertification if the certification criteria are no longer satisfied. In the case at bar, it remains to be seen how many Class Members will opt out and the point to emphasize and to clarify is that the number of opt outs *does not in itself* provide a basis for decertifying a class action. And the potentiality of opt outs is not a reason to not certify an action in the first place.

93 In *1250264 Ontario Inc. v. Pet Valu Canada Inc.*,<sup>39</sup> Chief Justice Winkler explained that certification is not akin to labour arbitration nor is it a political process of voting for or against the class action. It that case, the case management judge, Justice Strathy, as he then was, out of concern that the opt out process had been politicized, invalidated the opt-out notices. The Court of Appeal, however, reversed the decision, and Chief Justice Winkler explained that the class action would proceed notwithstanding a diminished class size. He stated at paragraphs 48, 51:

48. If by the survival of the class action the motion judge was referring to the prospect of de-certification, he did not explain why the number of class opt-outs could undermine the evidence satisfying the certification criteria. Indeed, other than perhaps in the most extreme cases, I fail to see any reason why the number of opt-outs would be a basis for decertification. Alternatively, if he meant the viability of the class action somehow depends on the number of remaining class members, there is no basis for this concern. A certified class proceeding will continue regardless of the diminished size of the class and the correspondingly diminished damages award or settlement amount that might follow therefrom.

....

51. Given these misconceptions about the nature of the opt-out process, I think it is important to emphasize that the *CPA* does not contemplate the politicization of the opt-out process. The opt-out process is not analogous to the labour context where majority support or opposition is required to certify or decertify a union. Within the statutory framework of the *CPA*, there is no legitimate purpose that can be achieved by politicizing the opt-out process. As explained in *A&P [1176560 Ontario Limited v. Great Atlantic & Pacific Co. of Canada Ltd. (2002), 62 O.R. (3d) 535 (S.C.J.), aff'd (2004), 70 O.R. (3d) 182 (Div. Ct.)]* at para. 32, certification motions are not determined through a referendum of the class members. Nor is the viability of the class action dependent on majority support. Just as the percentage of support amongst class members is not an element of certification, opting out cannot stop a class action. The number of opt-outs does not in itself provide a basis for decertifying a class action.

94 In *1176560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.*,<sup>40</sup> the proposed representative plaintiffs were franchisees, and the franchisor argued that they were disqualified because certification of the action would upset the existing arrangements with the franchisees and cause the franchisor to revisit each of these arrangements. On the certification motion, the franchisor proffered evidence from franchisors that opposed certification because they felt they had more to lose than to gain and they did not want a class proceeding brought that would upset the existing relationship between them and the franchisor. Justice Winkler, as he then was, rejected the argument and stated at paragraphs 32, 45-46:

32. .... To adduce evidence from individual class members as to the desirability of a class proceeding is to assume, as an underlying proposition, that certification motions are somehow determined through a referendum of the class members. Such is not the case. The legislature has spoken with respect to class proceedings in this province. The provisions dealing with opt outs and de-certification show that it was clearly alive to the prospect that not all members of a proposed class would wish to participate in a class proceeding or, alternatively, that a sufficient number of defections from the class would

render a class proceeding unnecessary. Conversely, there are no provisions that expressly or implicitly mandate, or even suggest, that the suitability of a class proceeding is to be determined by a polling of the class prior to the certification motion.

....

45. I find no merit in the contention that the independence of the plaintiffs disqualifies them as representatives. The fact that their circumstances may be different from some or all of the balance of the class does not represent a conflict "on the common issues" as that term is used in s. 5(1)(e) of the *CPA*. Nor do their different circumstances mean that they cannot fairly and adequately represent the class. In fact, the evidence is to the contrary.

46. A&P also contended that there is a conflict because certification of the action would upset the existing arrangements with the franchisees and cause A&P to revisit each of these arrangements. In my view, this is effectively an argument that there should be no litigation at all rather than an attack on either the adequacy of the plaintiffs as representatives or the preferability of a class proceeding as opposed to individual actions. Through this argument, A&P implies that if the plaintiffs are successful, that success entails a risk for the other franchisees. However, as counsel for A&P candidly admitted, a successful individual action would have the same effect with respect to the existing arrangements. The purpose of class proceedings legislation is to make the justice system accessible. To this end, the court must consider alternative procedures. However, as noted in [*Hollick v. Toronto (City)*, 2001 SCC 68] at para. 16, the certification analysis is concerned with the "form of the action". Arguments that no litigation is preferable to a class proceeding cannot be given effect. If there is any basis to this argument, it is subsumed in the cause of action element of the test for certification.

95 In the case at bar, as already noted several times above, the points to emphasize are that the potential number of opt outs is not a reason not to certify an action and the actual number of opt outs *does not in itself* provide a basis for decertifying a class action. The number of opt outs, however, may reveal that the class action no longer satisfies the certification criteria, which is the true basis for the decertification of a class action. For instance, in the case at bar, it remains to be seen whether a class action would remain the preferable procedure to the alternatives of individual actions or a joinder of claims or test cases if some large proportion of the 418 Class Members opted out. A large number of opt outs may mean that the synergies of the common issues are lost or that a class action is not the preferable procedure. On the other hand, a large number of opt outs may have no effect on whether the certification criteria remain satisfied.

96 This said, the question now before the court is that of certification, not decertification, and Mr. Phillip's action satisfies all the certification criteria.

## E. Conclusion

97 For the above reasons, I certify this action as a class proceeding.

98 If the parties cannot agree about the matter of costs, they may make submissions in writing beginning with Mr. Phillip's submissions within 20 days of the release of these Reasons for Decision followed by Deloitte's submissions within a further 20 days.

*Proceeding certified.*

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiff consumers and purchasers alleged that defendant corporation fixed prices of corn syrup, which was used in numerous food products — Corporation submitted that individual purchasers could not claim for overcharge and could not be certified as class — Corporation stated that purchasers were using constructive trust to avoid limitation period which had expired for damages remedy — Corporation claimed that there was no property in which plaintiffs could find constructive trust — Lower court certified class — Corporation appealed and appeal was allowed in part, with indirect purchasers' claim dismissed and direct purchasers' claim permitted to move forward — Matter was remitted to reconsider certification of direct purchasers alone — Indirect purchasers appealed finding that they had no cause of action, while corporation cross-appealed, requesting dismissal of purchasers' claim in constructive trust — Appeal dismissed and cross-appeal allowed — Identifiable class could not be established for indirect purchasers and thus class action as it related to indirect purchasers could not be certified — Pleadings did not disclose cause of action in constructive trust and thus claim of direct purchasers could not succeed and should be dismissed — Given findings, cross-appeal should be allowed with costs.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiff consumers and purchasers alleged that defendant corporation fixed prices of corn syrup, which was used in numerous food products — Corporation submitted that individual purchasers could not claim for overcharge and could not be certified as class — Corporation stated that purchasers were using constructive trust to avoid limitation period which had expired for damages remedy — Corporation claimed that there was no property in which plaintiffs could find constructive trust — Lower court certified class — Corporation appealed and appeal was allowed in part, with indirect purchasers' claim dismissed and direct purchasers' claim permitted to move forward — Matter was remitted to reconsider certification of direct purchasers alone — Indirect purchasers appealed finding that they had no cause of action, while corporation cross-appealed, requesting dismissal of purchasers' claim in constructive trust — Appeal dismissed and cross-appeal allowed — Identifiable class could not be established for indirect purchasers and thus class action as it related to indirect purchasers could not be certified — Pleadings did not disclose cause of action in constructive trust and thus claim of direct purchasers could not succeed and should be dismissed — Given findings, cross-appeal should be allowed with costs.

Estates and trusts --- Trusts — Constructive trust — Profit from criminal wrongdoing

Plaintiff consumers and purchasers alleged that defendant corporation fixed prices of corn syrup, which was used in numerous food products — Corporation submitted that individual purchasers could not claim for overcharge and could not be certified

as class — Corporation stated that purchasers were using constructive trust to avoid limitation period which had expired for damages remedy — Corporation claimed that there was no property in which plaintiffs could find constructive trust — Lower court certified class — Corporation appealed and appeal was allowed in part, with indirect purchasers' claim dismissed and direct purchasers' claim permitted to move forward — Matter was remitted to reconsider certification of direct purchasers alone — Indirect purchasers appealed finding that they had no cause of action, while corporation cross-appealed, requesting dismissal of purchasers' claim in constructive trust — Appeal dismissed and cross-appeal allowed — Identifiable class could not be established for indirect purchasers and thus class action as it related to indirect purchasers could not be certified — Pleadings did not disclose cause of action in constructive trust and thus claim of direct purchasers could not succeed and should be dismissed — Given findings, cross-appeal should be allowed with costs.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiff consumers and purchasers alleged that defendant corporation fixed prices of corn syrup, which was used in numerous food products — Corporation submitted that individual purchasers could not claim for overcharge and could not be certified as class — Corporation stated that purchasers were using constructive trust to avoid limitation period which had expired for damages remedy — Corporation claimed that there was no property in which plaintiffs could find constructive trust — Lower court certified class — Corporation appealed and appeal was allowed in part, with indirect purchasers' claim dismissed and direct purchasers' claim permitted to move forward — Matter was remitted to reconsider certification of direct purchasers alone — Indirect purchasers appealed finding that they had no cause of action, while corporation cross-appealed, requesting dismissal of purchasers' claim in constructive trust — Appeal dismissed and cross-appeal allowed — Identifiable class could not be established for indirect purchasers and thus class action as it related to indirect purchasers could not be certified — Pleadings did not disclose cause of action in constructive trust and thus claim of direct purchasers could not succeed and should be dismissed — Given findings, cross-appeal should be allowed with costs.

Procédure civile --- Parties — Recours collectifs intentés en vertu d'une loi relative aux recours collectifs — Autorisation — Recours collectif du demandeur — Groupe identifiable

Consommateurs et acheteurs demandeurs alléguaien que la société défenderesse fixait le prix du sirop de maïs à haute teneur en fructose, un composant de diverses denrées alimentaires — Société a fait valoir que les acheteurs ne pouvaient pas invoquer la surcharge sur une base individuelle et ne pouvaient pas être autorisés à déposer un recours collectif en tant que groupe — Société a déclaré que les demandeurs avaient eu recours à une fiducie par interprétation pour éviter le délai de prescription, lequel était échu en ce qui concernait la demande de dommages-intérêts — Société a fait valoir que les demandeurs ne pouvaient pas fonder la fiducie par interprétation sur un bien — Recours collectif a été autorisé par un tribunal d'instance inférieure — Société a interjeté appel et l'appel a été accueilli en partie, le recours des acheteurs indirects ayant été rejeté et le recours des acheteurs directs ayant été autorisé — Affaire a été renvoyée au tribunal aux seules fins de réexaminer l'autorisation des acheteurs directs — Acheteurs indirects ont formé un pourvoi à l'encontre de la conclusion selon laquelle ils n'avaient aucune cause d'action, tandis que la société a formé un pourvoi incident demandant le rejet de la demande des acheteurs concernant la fiducie par interprétation sur un bien — Pourvoi rejeté et pourvoi incident accueilli — Il n'était pas possible de réunir les acheteurs indirects en un groupe identifiable de sorte que les acheteurs indirects ne pouvaient pas être autorisés à déposer un recours collectif — Actes de procédure ne révélaient pas de cause d'action en imposition d'une fiducie par interprétation et la réclamation des acheteurs directs devait également échouer — Compte tenu de ces conclusions, le pourvoi incident devrait être accueilli avec frais.

Procédure civile --- Parties — Recours collectifs intentés en vertu d'une loi relative aux recours collectifs — Autorisation — Recours collectif du demandeur — Cause commune ou intérêt commun

Consommateurs et acheteurs demandeurs alléguaien que la société défenderesse fixait le prix du sirop de maïs à haute teneur en fructose, un composant de diverses denrées alimentaires — Société a fait valoir que les acheteurs ne pouvaient pas invoquer la surcharge sur une base individuelle et ne pouvaient pas être autorisés à déposer un recours collectif en tant que groupe — Société a déclaré que les demandeurs avaient eu recours à une fiducie par interprétation pour éviter le délai de prescription, lequel était échu en ce qui concernait la demande de dommages-intérêts — Société a fait valoir que les demandeurs ne pouvaient pas fonder la fiducie par interprétation sur un bien — Recours collectif a été autorisé par un tribunal d'instance inférieure — Société a interjeté appel et l'appel a été accueilli en partie, le recours des acheteurs indirects ayant été rejeté et le recours des acheteurs directs ayant été autorisé — Affaire a été renvoyée au tribunal aux seules fins de réexaminer l'autorisation des

acheteurs directs — Acheteurs indirects ont formé un pourvoi à l'encontre de la conclusion selon laquelle ils n'avaient aucune cause d'action, tandis que la société a formé un pourvoi incident demandant le rejet de la demande des acheteurs concernant la fiducie par interprétation sur un bien — Pourvoi rejeté et pourvoi incident accueilli — Il n'était pas possible de réunir les acheteurs indirects en un groupe identifiable de sorte que les acheteurs indirects ne pouvaient pas être autorisés à déposer un recours collectif — Actes de procédure ne révélaient pas de cause d'action en imposition d'une fiducie par interprétation et la réclamation des acheteurs directs devait également échouer — Compte tenu de ces conclusions, le pourvoi incident devrait être accueilli avec frais.

Successions et fiducies --- Fiducies — Fiducie par interprétation — Profits réalisés à la suite d'une activité criminelle Consommateurs et acheteurs demandeurs alléguent que la société défenderesse fixait le prix du sirop de maïs à haute teneur en fructose, un composant de diverses denrées alimentaires — Société a fait valoir que les acheteurs ne pouvaient pas invoquer la surcharge sur une base individuelle et ne pouvaient pas être autorisés à déposer un recours collectif en tant que groupe — Société a déclaré que les demandeurs avaient eu recours à une fiducie par interprétation pour éviter le délai de prescription, lequel était échu en ce qui concernait la demande de dommages-intérêts — Société a fait valoir que les demandeurs ne pouvaient pas fonder la fiducie par interprétation sur un bien — Recours collectif a été autorisé par un tribunal d'instance inférieure — Société a interjeté appel et l'appel a été accueilli en partie, le recours des acheteurs indirects ayant été rejeté et le recours des acheteurs directs ayant été autorisé — Affaire a été renvoyée au tribunal aux seules fins de réexaminer l'autorisation des acheteurs directs — Acheteurs indirects ont formé un pourvoi à l'encontre de la conclusion selon laquelle ils n'avaient aucune cause d'action, tandis que la société a formé un pourvoi incident demandant le rejet de la demande des acheteurs concernant la fiducie par interprétation sur un bien — Pourvoi rejeté et pourvoi incident accueilli — Il n'était pas possible de réunir les acheteurs indirects en un groupe identifiable de sorte que les acheteurs indirects ne pouvaient pas être autorisés à déposer un recours collectif — Actes de procédure ne révélaient pas de cause d'action en imposition d'une fiducie par interprétation et la réclamation des acheteurs directs devait également échouer — Compte tenu de ces conclusions, le pourvoi incident devrait être accueilli avec frais.

Procédure civile --- Parties — Recours collectifs intentés en vertu d'une loi relative aux recours collectifs — Autorisation — Recours collectif du demandeur — Procédures écrites révèlent une cause d'action

Consommateurs et acheteurs demandeurs alléguent que la société défenderesse fixait le prix du sirop de maïs à haute teneur en fructose, un composant de diverses denrées alimentaires — Société a fait valoir que les acheteurs ne pouvaient pas invoquer la surcharge sur une base individuelle et ne pouvaient pas être autorisés à déposer un recours collectif en tant que groupe — Société a déclaré que les demandeurs avaient eu recours à une fiducie par interprétation pour éviter le délai de prescription, lequel était échu en ce qui concernait la demande de dommages-intérêts — Société a fait valoir que les demandeurs ne pouvaient pas fonder la fiducie par interprétation sur un bien — Recours collectif a été autorisé par un tribunal d'instance inférieure — Société a interjeté appel et l'appel a été accueilli en partie, le recours des acheteurs indirects ayant été rejeté et le recours des acheteurs directs ayant été autorisé — Affaire a été renvoyée au tribunal aux seules fins de réexaminer l'autorisation des acheteurs directs — Acheteurs indirects ont formé un pourvoi à l'encontre de la conclusion selon laquelle ils n'avaient aucune cause d'action, tandis que la société a formé un pourvoi incident demandant le rejet de la demande des acheteurs concernant la fiducie par interprétation sur un bien — Pourvoi rejeté et pourvoi incident accueilli — Il n'était pas possible de réunir les acheteurs indirects en un groupe identifiable de sorte que les acheteurs indirects ne pouvaient pas être autorisés à déposer un recours collectif — Actes de procédure ne révélaient pas de cause d'action en imposition d'une fiducie par interprétation et la réclamation des acheteurs directs devait également échouer — Compte tenu de ces conclusions, le pourvoi incident devrait être accueilli avec frais.

The plaintiff consumers and purchasers alleged that the defendant corporation fixed the prices of high-fructose corn syrup, which was used in numerous food products. The corporation submitted that the individual purchasers could not make a claim for overcharge and could not be certified as a class. The corporation stated that the purchasers were using a constructive trust to avoid the limitation period which had expired for a damages remedy. The corporation claimed that there was no property in which the plaintiffs could find constructive trust.

The lower court certified the class. The corporation appealed and the appeal was allowed in part, with the indirect purchasers' claim dismissed and the direct purchasers' claim permitted to move forward. The matter was remitted to the court to reconsider the certification of the direct purchasers alone. The indirect purchasers appealed the finding that they had no cause of action, while the corporation cross-appealed, requesting a dismissal of the purchasers' claim in constructive trust.

**Held:** The appeal was dismissed and the cross-appeal was allowed.

Per Rothstein J. (McLachlin C.J.C., LeBel, Fish, Abella, Moldaver, Wagner JJ. concurring): An identifiable class could not be established for the indirect purchasers and thus the class action as it related to the indirect purchasers could not be certified. The pleadings did not disclose a cause of action in constructive trust and thus the claim of the direct purchasers also could not succeed. Given the findings, the cross-appeal should properly be allowed with costs.

Per Karakatsanis J. (dissenting) (Cromwell J. concurring): The evidentiary difficulties relied upon by the majority opinion were not fatal to certification application. There was some basis in the fact that there was an identifiable class in accordance with s. 4(1)(b) of the Class Proceedings Act. The appeal should be allowed with costs and the matter remitted for trial.

Les consommateurs et acheteurs demandeurs alléguent que la société défenderesse fixait le prix du sirop de maïs à haute teneur en fructose, un composant de diverses denrées alimentaires. La société a fait valoir que les acheteurs ne pouvaient pas invoquer la surcharge sur une base individuelle et ne pouvaient pas être autorisés à déposer un recours collectif en tant que groupe. La société a déclaré que les demandeurs avaient eu recours à une fiducie par interprétation pour éviter le délai de prescription, lequel était échu en ce qui concernait la demande de dommages-intérêts. La société a fait valoir que les demandeurs ne pouvaient pas fonder la fiducie par interprétation sur un bien.

Le recours collectif a été autorisé par un tribunal d'instance inférieure. La société a interjeté appel et l'appel a été accueilli en partie, le recours des acheteurs indirects ayant été rejeté et le recours des acheteurs directs ayant été autorisé. L'affaire a été renvoyée au tribunal aux seules fins de réexaminer l'autorisation des acheteurs directs. Les acheteurs indirects ont formé un pourvoi à l'encontre de la conclusion selon laquelle ils n'avaient aucune cause d'action, tandis que la société a formé un pourvoi incident demandant le rejet de la demande des acheteurs concernant la fiducie par interprétation sur un bien.

**Arrêt:** Le pourvoi a été rejeté et le pourvoi incident a été accueilli.

Rothstein, J. (McLachlin, J.C.C., LeBel, Fish, Abella, Moldaver, Wagner, JJ., souscrivant à son opinion) : Il n'était pas possible de réunir les acheteurs indirects en un groupe identifiable de sorte que les acheteurs indirects ne pouvaient pas être autorisés à déposer un recours collectif. Les actes de procédure ne révélaient pas de cause d'action en imposition d'une fiducie par interprétation et la réclamation des acheteurs directs devait également échouer. Compte tenu de ces conclusions, le pourvoi incident devrait être accueilli avec frais.

Karakatsanis, J. (dissident) (Cromwell, J., souscrivant à son opinion) : Les difficultés soulevées par les juges majoritaires en ce qui avait trait à la preuve n'étaient pas fatales à la demande d'autorisation. Il était possible de démontrer l'existence d'un groupe identifiable en vertu de l'art. 4(1)b) de la Class Proceedings Act. Le pourvoi devrait être accueilli avec frais et le dossier renvoyé à procès.

## Table of Authorities

### Cases considered by Rothstein J.:

*British Columbia v. Imperial Tobacco Canada Ltd.* (2006), 2006 BCCA 398, 2006 CarswellBC 2273, 56 B.C.L.R. (4th) 263, 31 C.P.C. (6th) 243, [2006] 11 W.W.R. 191, 273 D.L.R. (4th) 711, 232 B.C.A.C. 17, 385 W.A.C. 17 (B.C. C.A.) — referred to

*Bywater v. Toronto Transit Commission* (1998), 27 C.P.C. (4th) 172, 1998 CarswellOnt 4645, 83 O.T.C. 1 (Ont. Gen. Div.) — followed

*Elder Advocates of Alberta Society v. Alberta* (2011), [2011] 6 W.W.R. 191, 81 C.C.L.T. (3d) 1, 416 N.R. 198, 331 D.L.R. (4th) 257, 499 A.R. 345, 514 W.A.C. 345, (sub nom. *Alberta v. Elder Advocates of Alberta Society*) [2011] 2 S.C.R. 261, 2011 CarswellAlta 763, 2011 CarswellAlta 764, 2011 SCC 24, 2 C.P.C. (7th) 1, 41 Alta. L.R. (5th) 1 (S.C.C.) — referred to

*Fairhurst v. Anglo American PLC* (2012), 2012 BCCA 257, 2012 CarswellBC 1732, 24 C.P.C. (7th) 179, 323 B.C.A.C. 50, 550 W.A.C. 50, [2012] 11 W.W.R. 301, 35 B.C.L.R. (5th) 45, 351 D.L.R. (4th) 168 (B.C. C.A.) — referred to

*Hollick v. Metropolitan Toronto (Municipality)* (2001), (sub nom. *Hollick v. Toronto (City)*) 56 O.R. (3d) 214 (headnote only), (sub nom. *Hollick v. Toronto (City)*) 205 D.L.R. (4th) 19, (sub nom. *Hollick v. Toronto (City)*) [2001] 3 S.C.R. 158, (sub nom. *Hollick v. Toronto (City)*) 2001 SCC 68, 2001 CarswellOnt 3577, 2001 CarswellOnt 3578, 24 M.P.L.R. (3d) 9, 13 C.P.C. (5th) 1, 277 N.R. 51, 42 C.E.L.R. (N.S.) 26, 153 O.A.C. 279 (S.C.C.) — considered

*Hunt v. T & N plc* (1990), 1990 CarswellBC 216, 43 C.P.C. (2d) 105, 117 N.R. 321, 4 C.O.H.S.C. 173 (headnote only), (sub nom. *Hunt v. Carey Canada Inc.*) [1990] 6 W.W.R. 385, 49 B.C.L.R. (2d) 273, (sub nom. *Hunt v. Carey Canada Inc.*) 74 D.L.R. (4th) 321, [1990] 2 S.C.R. 959, 1990 CarswellBC 759, 4 C.C.L.T. (2d) 1 (S.C.C.) — considered

*Kerr v. Baranow* (2011), 14 B.C.L.R. (5th) 203, [2011] 3 W.W.R. 575, 64 E.T.R. (3d) 1, 93 R.F.L. (6th) 1, 300 B.C.A.C. 1, 509 W.A.C. 1, 274 O.A.C. 1, [2011] 1 S.C.R. 269, 2011 SCC 10, 2011 CarswellBC 240, 2011 CarswellBC 241, 328 D.L.R. (4th) 577, 411 N.R. 200, (sub nom. *Vanasse v. Seguin*) 108 O.R. (3d) 399 (S.C.C.) — considered

*Kingstreet Investments Ltd. v. New Brunswick (Department of Finance)* (2007), 2007 CarswellNB 6, 2007 CarswellNB 7, 2007 SCC 1, 355 N.R. 336, 25 B.L.R. (4th) 1, 51 Admin. L.R. (4th) 184, (sub nom. *Kingstreet Investments Ltd. v. New Brunswick*) [2007] 1 S.C.R. 3, 2007 D.T.C. 5041 (Fr.), 2007 D.T.C. 5029 (Eng.), 276 D.L.R. (4th) 342, 309 N.B.R. (2d) 255, 799 A.P.R. 255 (S.C.C.) — considered

*Lau v. Bayview Landmark Inc.* (1999), 1999 CarswellOnt 3442, 40 C.P.C. (4th) 301, 31 O.T.C. 220 (Ont. S.C.J.) — followed  
*Option consommateurs v. Infineon Technologies AG* (2011), 2011 CarswellQue 12645, 2011 QCCA 2116 (Que. C.A.) — referred to

*Option consommateurs v. Infineon Technologies AG* (2013), 2013 CarswellQue 10520, 2013 CarswellQue 10521, 2013 SCC 59 (S.C.C.) — referred to

*Peel (Regional Municipality) v. Canada* (1992), (sub nom. *Peel (Regional Municipality) v. Ontario*) 144 N.R. 1, 1992 CarswellNat 15, 55 F.T.R. 277 (note), 12 M.P.L.R. (2d) 229, 98 D.L.R. (4th) 140, [1992] 3 S.C.R. 762, 59 O.A.C. 81, 1992 CarswellNat 659 (S.C.C.) — considered

*Pro-Sys Consultants Ltd. v. Infineon Technologies AG* (2009), [2010] 4 W.W.R. 273, 81 C.P.C. (6th) 9, 469 W.A.C. 271, 277 B.C.A.C. 271, 312 D.L.R. (4th) 419, 98 B.C.L.R. (4th) 272, 2009 BCCA 503, 2009 CarswellBC 3035 (B.C. C.A.) — considered

**Rothstein J. (McLachlin C.J.C. and LeBel, Fish, Abella, Moldaver and Wagner JJ. concurring):**

## I. Introduction

1 In price-fixing cases, indirect purchasers are customers who did not purchase a product directly from the alleged price-fixers/overchargers but who purchased it indirectly from a party further down the chain of distribution. Those who say indirect purchasers should not be able to bring actions against their alleged overchargers cite complexities in tracing the overcharge, risks of double or multiple recovery and failure to deter anti-competitive behaviour as reasons why they should not be permitted in Canada. These were some of the issues before the Court in the companion case of *Pro-Sys Consultants Ltd. v. Microsoft Corp.*, 2013 SCC 57 (S.C.C.) ("Pro-Sys"). In that case, a proposed indirect purchaser class action, those arguments were found to be insufficient bases upon which to deny indirect purchasers the right to bring an action against the alleged overcharger.

2 In this case, both the indirect and direct purchasers are class members. Having decided in *Pro-Sys* that indirect purchasers have the right to bring an action, a question in this case is whether the additional challenges that arise where the class is made up of indirect and direct purchasers are sufficient to warrant dismissing the action. If the Court finds that the action may proceed, it must then consider whether the class action should have been certified by the applications judge.

3 For the reasons that follow, I would find that the inclusion of indirect and direct purchasers in the proposed class does not produce difficulties that would warrant dismissing the action. However, I find this case cannot meet the certification requirements because there is not an identifiable class of indirect purchasers as required for certification under the British Columbia *Class Proceedings Act*, R.S.B.C. 1996, c. 50 ("CPA"). I would dismiss the appeal on that basis. The case of the direct purchasers, which is restricted to constructive trust, is dismissed as I find there is no cause of action. The cross-appeal is therefore allowed.

## II. Background

4 Sun-Rype Products Ltd., a juice manufacturer, is the direct purchaser representative plaintiff and Wendy Bredin (formerly Wendy Weberg) is the indirect purchaser representative plaintiff in this action. The representative plaintiffs (referred to collectively as the "appellants"), brought the class action pursuant to the *CPA*. They allege that Archer Daniels Midland Company and ADM Agri-Industries Company (the "ADM respondents"), Cargill, Incorporated, Cerestar USA, Inc., formerly known as American Maize-Products Company, and Cargill Limited (the "Cargill respondents"), and Corn Products International, Inc., Bestfoods, Inc., formerly known as CPC International, Inc., Casco Inc. and Unilever PLC doing business as Unilever Bestfoods North America (the "Casco respondents") (collectively, the "respondents"), engaged in an illegal conspiracy to fix the price of high-fructose corn syrup ("HFCS") resulting in harm to manufacturers, wholesalers, retailers and consumers.

5 HFCS is a sweetener used in various food products, including soft drinks and baked goods. The respondents are the leading producers of HFCS in North America. The appellants claim that between January 1, 1988, and June 30, 1995, the respondents engaged in an "intentional, secret and illegal conspiracy to fix the price of HFCS", which allowed them to charge the class members more for HFCS than they would have charged but for the alleged illegal conduct (A.F., at paras. 9 and 11).

## III. Summary of the Proceedings Below

### A. Commencement of the Action

6 The appellants commenced this class action in June 2005 on behalf of "all persons resident in British Columbia and elsewhere in Canada who purchased HFCS or products containing HFCS manufactured by the [respondents] (collectively, the 'class') from January 1, 1988 to June 30, 1995 (the 'Class Period')" ([2010 BCSC 922](#) (B.C. S.C.), at para. 2). It alleged the following causes of action (*ibid.*, at para. 27):

- a) contravention of s. 45(1) of Part VI of the *Competition Act* giving rise to a right of damages under s. 36(1) of that Act;
- b) tortious conspiracy and intentional interference with economic interests;
- c) unjust enrichment, waiver of tort and constructive trust; and
- d) punitive damages.

### B. Pre-certification Motion to Strike

7 The respondents brought a pre-certification motion to strike the appellants' claims on the basis that they were statute-barred. In an order dated May 10, 2007, the motions judge only allowed the claim for a remedial constructive trust because it was subject to a longer (10-year) limitation period than the other claims ([2007 BCSC 640, 72 B.C.L.R. \(4th\) 163](#) (B.C. S.C.)). The respondents appealed the order to the British Columbia Court of Appeal ("BCCA") and the appellants cross-appealed ([2008 BCCA 278, 81 B.C.L.R. \(4th\) 199](#) (B.C. C.A.)). The result was that the BCCA found that the direct purchaser representative plaintiff, Sun-Rype, could maintain only its cause of action in remedial constructive trust and that all of its claims for damages, including damages under the *Competition Act*, R.S.C. 1985, c. C-34, were statute-barred. As to the indirect purchaser representative plaintiff, Wendy Bredin, the BCCA found that she could maintain all of her causes of action because the limitation period on her claims did not begin until "she received the telephone call from her lawyer advising her of the proposed class action" (para. 138).

### C. Certification Proceedings in the British Columbia Supreme Court, 2010 BCSC 922 (B.C. S.C.)

8 The British Columbia Supreme Court ("BCSC") dealt with the appellants' application for certification by its decision dated June 30, 2010. As to the issue of whether indirect purchasers could bring actions against their alleged overchargers, Rice J. found that it was "not plain and obvious" that indirect purchaser claims were unavailable as a matter of law in Canada (para. 58).

9 Rice J. then addressed the requirement under s. 4(1)(a) of the *CPA* that the pleadings disclose a cause of action. Excluding the portions of the claim struck by the pre-certification decision on the limitation periods, Rice J. found that the pleadings disclosed causes of action for the direct purchasers in constructive trust and for the indirect purchasers under s. 36 of the *Competition Act*, in tort and in restitution. Rice J. also found that the remaining certification requirements, namely (i) whether there were common issues; (ii) whether there was an identifiable class; (iii) whether the class action was the preferable procedure; and (iv) whether Sun-Rype and Wendy Bredin could adequately represent the class, were met. He certified the action identifying common issues relating to the indirect purchasers' claims seeking statutory, common law and equitable damages and restitution based on allegations that the respondents engaged in an international and unlawful conspiracy to fix the price of HFCS during the class period. The common issues certified by Rice J. are listed in the appendix to these reasons.

**D. Appeal of the Certification to the British Columbia Court of Appeal, 2011 BCCA 187, 305 B.C.A.C. 55 (B.C. C.A.)**

10 The majority of the BCCA (*per* Lowry J.A., Frankel J.A. concurring) held that it was "plain and obvious" that indirect purchasers did not have a cause of action (para. 97). The majority reached this conclusion for the same reasons as in its decision in *Pro-Sys Consultants Ltd. v. Microsoft Corp.*, 2011 BCCA 186, 304 B.C.A.C. 90 (B.C. C.A.): it held that the rejection of the passing on defence in Canada carried as its necessary corollary a corresponding rejection of the offensive use of passing on in the form of an indirect purchaser action. The majority found Canadian law "to be consistent with American federal law as established by the Supreme Court of the United States in *Hanover Shoe ... and Illinois Brick*" (*Pro-Sys*, at para. 74).

11 With respect to the indirect purchasers, the majority allowed the appeal and found that the pleadings did not disclose a cause of action on their part (para. 98). However, with respect to direct purchasers, the majority found that the appeal should be dismissed (para. 74). The BCCA set aside the certification order of Rice J. and remitted the matter to the BCSC to reconsider the certification of the action of the direct purchasers alone.

12 Donald J.A., dissenting as he did in *Pro-Sys*, would have found that indirect purchaser actions were permitted as a matter of law in Canada and would have certified the action for both direct and indirect purchasers, finding that all of the requirements in s. 4(1) of the *CPA* were met.

**IV. Analysis**

13 This appeal was brought concurrently with the appeal in the companion case of *Pro-Sys*. Counsel for the appellants are the same in both cases, and the appellants in this case rely heavily on the appellants' submissions in *Pro-Sys* to support their arguments. In view of the significant overlap in issues, these reasons will frequently refer to the reasons in *Pro-Sys*.

14 In this Court, the three groups of respondents filed separate factums. However, each adopt the pleadings of the others in the appeal and the cross-appeal. In the appeal, the respondents argue first and foremost that indirect purchasers do not have a cause of action. They also argue that the class action should be decertified in respect of the indirect purchasers because the class is not identifiable as required by s. (4)(1)(b) of the *CPA*. On the cross-appeal, the respondents request dismissal of the direct purchasers' claim in constructive trust on the grounds that the elements required to establish a constructive trust are not present. They also seek decertification of the class action on the basis that Rice J. applied the wrong standard of proof in his analysis of the certification requirements.

15 As indicated, I am unable to find an identifiable class as it relates to the indirect purchasers and would dismiss the appeal on that basis. Nonetheless, for completeness, the various arguments presented in this case are assessed below. I turn first to the indirect purchaser question and then consider the arguments pertaining to the certification of the class action.

**A. Indirect Purchaser Actions (the "Passing On" Issue)**

16 The appellants largely adopt the submissions of Pro-Sys Consultants Ltd. on the passing-on issue. As the offensive use of passing on has been analysed in the reasons in *Pro-Sys*, it is unnecessary to repeat it in its entirety here. I add only the

following to address the differences that arise with regard to passing on where indirect purchasers and direct purchasers are part of the same class.

#### (1) Double or Multiple Recovery as Between Indirect and Direct Purchasers

17 The respondents argue that the "fundamental difficulty with the case of the indirect purchasers is that they seek recovery of amounts to which the direct purchasers have a valid claim, such that, to recognize the claim of the indirect purchasers would be to recognize an overlapping claim to the same amount and the prospect of double recovery" (Cargill factum, at para. 54). They argue that, because the passing-on defence has been rejected in Canada, the direct purchasers are entitled to 100 percent of the amount of the overcharge. Consequently they say that indirect purchasers "make a duplicative and overlapping claim to an overcharge to which the direct purchasers are entitled based on settled principles" (Cargill factum, at para. 61).

18 For the reasons given in the *Pro-Sys* appeal, this argument is insufficient to deny indirect purchasers the right to be included in the class action. I agree with Rice J. that, by including both direct and indirect purchasers in the class and by using economic methodologies to ascertain the aggregate amount of the loss, there will be no over-recovery from the respondents (BCSC, at para. 53).

19 In this case, the appellants seek recovery of a defined sum equal to the aggregate of the overcharge. Where indirect and direct purchasers are included in the same class and the evidence of the experts at the trial of the common issues will determine the aggregate amount of the overcharge, there will be no double or multiple recovery. Recovery is limited to that aggregate amount, no matter how it is ultimately shared by the direct and indirect purchasers. This was the view of the BCCA in *Pro-Sys Consultants Ltd. v. Infineon Technologies AG*, 2009 BCCA 503, 98 B.C.L.R. (4th) 272 (B.C. C.A.) ("Infineon"), at para. 78, and of the Quebec Court of Appeal in *Option consommateurs v. Infineon Technologies AG*, 2011 QCCA 2116 (Que. C.A.), at para. 114. The appeal of the latter decision was heard together with *Pro-Sys* and this case. See *Option consommateurs v. Infineon Technologies AG*, 2013 SCC 59 (S.C.C.).

20 To the extent that there is conflict between the class members as to how the aggregate amount is to be distributed upon the awarding of a settlement or upon a successful action, this is not a concern of the respondents and is not a basis for denying indirect purchasers the right to be included in the class action.

#### (2) Over-Recovery as Between Jurisdictions

21 In addition to concern of double recovery as between indirect and direct purchasers, the respondents also express concerns of over-recovery arising from actions in the U.S. Specifically, the respondents state that in the U.S. direct purchasers of HFCS have already reached a settlement with the respondents for the entire overcharge. They claim that if the rights of the indirect purchasers to bring an action are recognized in Canada, this will create "overlapping claims to the same loss between direct purchasers in the U.S. and indirect purchasers in British Columbia" (Cargill factum, at para. 70). As stated in the *Pro-Sys* reasons, the court is equipped to deal with these risks. The court possesses the power to modify settlement and damage awards in accordance with awards already received by plaintiffs in other jurisdictions if the respondents are able to satisfy them that double recovery may occur. If the respondents adduce relevant evidence, the court will be able to ensure that double recovery does not occur.

#### (3) Restitutionary Law Principles

22 The majority of the BCCA rejected the offensive use of passing on based on the theory that once the passing-on *defence* is rejected, the direct purchasers would be entitled to the whole amount by which they were overcharged:

... I am unable to see why the [direct purchasers] would not as a matter of law be entitled to the whole of the amount they overpaid regardless of any amount that may have been passed on to the [indirect purchasers] in the same way they would if they were the only plaintiffs in the action. Anything less would serve to disadvantage them because of the nature of the proceedings such that they would be deprived of what they would legally be entitled to recover. [para. 84]

23 I would agree that absent an action by indirect purchasers or absent the inclusion of indirect purchasers in the action, the direct purchasers would be able to recover the entire amount of the overcharge because the overcharger would be unable to invoke the passing-on defence. However, this is not the same as saying the direct purchasers are *entitled* to the entire amount of the overcharge. The disgorgement of amounts obtained through wrongdoing is one of the fundamental principles of restitutive law (P.D. Maddaugh and J.D. McCamus, *The Law of Restitution* (loose-leaf), at p. 3-1). Restitutive law is "a tool of corrective justice" that seeks to take money away from the party who has unjustly taken it and return it to the party who unjustly lost it (*Kingstreet Investments Ltd. v. New Brunswick (Department of Finance)*, 2007 SCC 1, [2007] 1 S.C.R. 3 (S.C.C.), at paras. 32 and 47). While a defendant cannot invoke the passing-on defence, the direct purchasers cannot deny that they have passed on the overcharge to the indirect purchasers. Where indirect purchasers are able to demonstrate that overcharges were passed on to them they are entitled to claim those overcharges.

#### (4) Deterrence and Compensation

24 As part of their argument that indirect purchaser actions should not be allowed, the respondents make much of the fact that in many other price-fixing cases in Canada, awards to indirect purchasers have been disbursed in the form of *cy-près* payments because the amounts in question were so small as to make identification of and distribution to each individual class member impractical. They claim that *cy-près* distributions do not advance the deterrence objective of the Canadian competition laws because any deterrence function could be achieved to an equal extent by a claim made solely by direct purchasers. They also argue that because the award would be distributed to a not-for-profit entity in place of the class members, the compensation goal of the Canadian competition laws is also frustrated.

25 There is merit to these arguments; however, the precedent for *cy-près* distribution is well established (see M.A. Eizenga et al., *Class Actions Law and Practice* (loose-leaf), at § 9.19). While *cy-près* distributions may not appeal to some on a policy basis, this method of distributing settlement proceeds or damage awards is contemplated by the *CPA*, at s. 34(1):

**34 (1)** The court may order that all or any part of an award under this Division that has not been distributed within a time set by the court be applied in any manner that may reasonably be expected to benefit class or subclass members, even though the order does not provide for monetary relief to individual class or subclass members.

26 It is also a method the courts have used in indirect purchaser price-fixing cases, as demonstrated by the respondents' summary of nine cases in which distribution of the settlement funds was made on a *cy-près* basis. And, while its very name, meaning "as near as possible", implies that it is not the ideal mode of distribution, it allows the court to disburse the money to an appropriate substitute for the class members themselves (see D. Lynn, "[Cy Pres Distributions: Ethics & Reform](#)" (2012), *25 Geo. J. Legal Ethics* 435, at p. 435).

27 As such, while the compensation objective is not furthered by a *cy-près* distribution, it cannot be said that deterrence is reduced by the possibility that a settlement will eventually be distributed in that manner. These factors do not preclude indirect purchasers from bringing an action or from being included in the class.

#### B. The Certification of the Class Action

28 Having determined that indirect purchasers may pursue actions against their alleged overchargers, the issue is now whether this action should be certified. The analysis of the certification requirements was carried out by the applications judge, Rice J., but was not addressed by the majority of the BCCA. The majority of the BCCA disposed of the action based solely on its finding that passing on could not be used offensively to allow indirect purchasers to bring an action.

29 The requirements for certification under the *CPA* are set forth in s. 4(1):

**4 (1)** The court must certify a proceeding as a class proceeding on an application under section 2 or 3 if all of the following requirements are met:

- (a) the pleadings disclose a cause of action;

- (b) there is an identifiable class of 2 or more persons;
- (c) the claims of the class members raise common issues, whether or not those common issues predominate over issues affecting only individual members;
- (d) a class proceeding would be the preferable procedure for the fair and efficient resolution of the common issues;
- (e) there is a representative plaintiff who
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues, an interest that is in conflict with the interests of other class members.

30 The respondents contest only three of the certification criteria. The first is whether the pleadings disclose a cause of action as required under s. 4(1)(a). They argue that the remaining cause of action of the direct purchasers in constructive trust should be struck and that the indirect purchaser causes of action in restitution and under s. 36 of the *Competition Act* should fail. They do not contest the indirect purchasers' causes of action in tort. Second, they say that the requirement under s. 4(1)(c) that the claims raise common issues is not met. Third, they argue that the class is not identifiable as it relates to the indirect purchasers as required under s. 4(1)(b).

*(1) Do the Pleadings Disclose a Cause of Action?*

31 Section 4(1)(a) of the *CPA* requires that the pleadings disclose a cause of action. This requirement is judged on the standard of proof applied in *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), at p. 980, namely that a plaintiff satisfies this requirement unless, assuming all facts pleaded to be true, it is plain and obvious that the plaintiff's claim cannot succeed (*Elder Advocates of Alberta Society v. Alberta*, 2011 SCC 24, [2011] 2 S.C.R. 261 (S.C.C.), at para. 20 ("Alberta Elders"); *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.), at para. 25).

32 I first consider the respondents' arguments in relation to the causes of action in restitution for both the indirect and direct purchasers (remedial constructive trust) and then turn to the arguments against the cause of action of the indirect purchasers under s. 36 of the *Competition Act*.

**(a) Restitution — Indirect Purchasers**

33 In the alternative, the appellants claim that the respondents have been unjustly enriched as a result of the alleged overcharge on the sale of HFCS and that the class members have suffered a deprivation in the amount of the overcharge attributable to the sale of HFCS in B.C. and in Canada. They plead that this overcharge resulted from wrongful or unlawful acts and that there can thus be no juristic reasons for the enrichment. The appellants seek the disgorgement of the alleged overcharge paid to the respondents by the class members.

34 The respondents argue that "both the benefit conferred and deprivation (or loss) suffered was that of the direct purchasers alone" and as such, it is the direct purchasers alone who can bring a claim for restitution for wrongful conduct. They submit that no benefit was conferred directly by the indirect purchaser to the overcharger and that the deprivation in question was suffered by the direct purchasers and *not* the indirect purchasers, because the passing on of losses is not recognized at law (Cargill factum, at para. 30).

35 I understand the respondents to be making two separate points: one, that a direct relationship between a plaintiff and a defendant is needed to ground a claim in unjust enrichment; and two, that because indirect purchasers cannot base a claim

on passed-on losses, they have no cause of action in unjust enrichment. Both of these arguments have been addressed in the reasons in *Pro-Sys*.

36 The requirement that there be a direct relationship between the defendant and the plaintiff for a claim in unjust enrichment is not settled. As indicated in the *Pro-Sys* reasons, *Peel (Regional Municipality) v. Canada*, [1992] 3 S.C.R. 762 (S.C.C.), states only that "[t]he cases in which claims for unjust enrichment have been made out generally deal with benefits conferred directly and specifically on the defendant" (p. 797 (emphasis added)). *Peel* requires only that a claim in unjust enrichment must be based on "more than an incidental blow-by" and that "[a] secondary collateral benefit will not suffice" (p. 797). These words would appear not to necessarily foreclose a claim where the relationship between the parties is indirect. However, as in *Pro-Sys*, this does not resolve the issue. First, it is not apparent here that the benefit received by the respondents was mere "incidental blow-by" or "collateral benefit". Second, the appellants in *Pro-Sys* argue that *Alberta Elders* is an example of a case where an unjust enrichment was found absent a direct relationship, calling the requirement into question. Accordingly, it cannot be said that it is plain and obvious that a claim in unjust enrichment should fail at the certification stage on this ground alone.

37 As to the recognition of passed-on losses, that question has been answered conclusively: the injury suffered by indirect purchasers is recognized at law as is their right to bring actions to recover for those losses. For the reasons previously explained, no insurmountable problem is created by allowing the claims in restitution to be brought by a class comprised of both direct and indirect purchasers. Unjustly obtained amounts are recoverable on the basis that they have been extracted at the plaintiffs' expense (Maddaugh and McCamus, at p. 3-9). That is what is alleged to have occurred in this case. The appellants allege that the respondents committed wrongful acts that were directed at both the direct *and the indirect purchasers* and as such both groups should be able to recover their losses.

38 It is true that, absent indirect purchasers, the rejection of the passing-on defence entitles direct purchasers to 100 percent of the amount of the overcharge. However, this entitlement is altered when indirect purchasers are included in the action. As explained above, this does not mean, as the respondents suggest, that to allow indirect purchasers to join the action would be "to admit of the possibility that a plaintiff could recover twice — once from the person who is the immediate beneficiary of the payment or benefit ... and again from the person who reaped an incidental benefit" (*Cargill* factum, at para. 32, citing *Peel*, at p. 797). Rather, it means that the indirect and direct purchasers will share the aggregate amount recovered in the event that the action is successful. To the extent that there are competing claims among the direct and indirect purchasers, I agree with Rice J. that this may be sorted out at a later stage of the proceeding (BCSC, at para. 195). At this stage, both groups share the common interest of maximizing the amount recoverable from the respondents. The indirect purchasers' cause of action in restitution should therefore not be struck out.

### **(b) Constructive Trust — Direct Purchasers**

39 On cross-appeal, with respect to the one cause of action remaining to the direct purchasers, the respondents argue that the cause of action in constructive trust should fail.

40 The respondents claim that neither the requirement of a "proprietary nexus" nor the requirement that the constructive trust be imposed only where a monetary remedy was found to be inadequate were met in this case: As such it is plain and obvious that the direct purchaser claim in constructive trust has no chance of succeeding (See Casco cross-appeal factum, at para. 28, citing *Tracy (Guardian ad litem of) v. Instaloans Financial Solution Centres (B.C.) Ltd.*, 2010 BCCA 357, 320 D.L.R. (4th) 577 (B.C. C.A.), for the requirements of a constructive trust). I agree.

41 In *Pro-Sys*, noting that *Kerr v. Baranow*, 2011 SCC 10, [2011] 1 S.C.R. 269 (S.C.C.), was the relevant controlling authority, I found that the claim in constructive trust must fail because there was no referential property and no explanation by the appellants why a monetary remedy would be inappropriate or insufficient. For the same reasons, I find it plain and obvious that Sun-Rype's claim in constructive trust in this case must fail and should be struck.

### **(c) Section 36 of the Competition Act — Indirect Purchasers**

#### **(i) Passed-On Losses Recognized at Law**

42 Section 36 of the *Competition Act* provides a cause of action to "[a]ny person who has suffered loss or damage as a result of (a) conduct that is contrary to any provision of Part VI". The respondents, basing their argument on their fundamental position that passed-on losses are not recognized at law, assert that s. 36 was not intended to provide a right of action to indirect purchasers.

43 For the reasons explained in *Pro-Sys*, this argument is rejected. It is not plain and obvious that a cause of action for the indirect purchasers under s. 36 of the *Competition Act* cannot succeed.

#### **(ii) Jurisdiction Over Extraterritorial Conduct**

44 The respondents argue that "an alleged conspiracy entered into outside Canada, among foreign defendants, to fix prices of products sold to foreign direct purchasers does not constitute an offence under the *Competition Act* giving rise to a right of civil action" (ADM factum, at para. 54). They claim that the jurisdiction of Canadian courts over violations of the *Competition Act* by foreign defendants "will have to be determined by reference to the presumptive connecting factors identified in *Club Resorts*, which determination is beyond the scope of the present appeal" (ADM factum, at para. 53) and that conduct cannot be contrary to Part VI of the *Competition Act* "unless there is a real and substantial link between that conduct and Canada" (para. 60).

45 I agree with the respondents that the framework proposed in *Van Breda v. Village Resorts Ltd.*, 2012 SCC 17, [2012] 1 S.C.R. 572 (S.C.C.), will need to be applied in establishing whether there is "real and substantial connection" sufficient to find that Canadian courts have jurisdiction in this case. However, I would question the respondents' characterization of the factual situation.

46 The conduct in question, while perpetrated by foreign defendants, allegedly involved each respondent's Canadian subsidiary acting as its agent. The sales in question were made in Canada, to Canadian customers and Canadian end-consumers. There is at least some suggestion in the case law that where defendants conduct business in Canada, make sales in Canada and conspire to fix prices on products sold in Canada, Canadian courts have jurisdiction (see *VitaPharm Canada Ltd. v. F. Hoffmann-La Roche Ltd.* (2002), 20 C.P.C. (5th) 351 (Ont. S.C.J.), at paras. 58, 63-86 and 101-02 ("It is arguable that a conspiracy that injures Canadians gives rise to liability in Canada, even if the conspiracy was formed abroad": para. 58); *Fairhurst v. Anglo American PLC*, 2012 BCCA 257, 35 B.C.L.R. (5th) 45 (B.C. C.A.), at para. 32 (BCCA refusing to deny certification of a class action based on the argument that Canadian courts had no jurisdiction over *Competition Act* violations occurring outside of Canada); *British Columbia v. Imperial Tobacco Canada Ltd.*, 2006 BCCA 398, 56 B.C.L.R. (4th) 263 (B.C. C.A.), at paras. 32-45 ("A conspiracy occurs in British Columbia if the harm is suffered here, regardless of where the 'wrongful conduct' occurred. On that basis, the court has jurisdiction over the *ex juris* defendants who are alleged to be parties to the conspiracy": para. 41)).

47 The respondents have not demonstrated that it is plain and obvious that Canadian courts have no jurisdiction over the alleged anti-competitive acts committed in this case. The cause of action under s. 36 of the *Competition Act* should not be struck out.

#### **(2) Are There Common Issues?**

48 Section 4(1)(c) of the *CPA* requires that the claims of the class members raise common issues. The respondents' arguments as to the commonality requirement centre on the standard of proof to be applied to this and the other certification requirements other than the requirement that the pleadings disclose a cause of action. Here, as in *Pro-Sys*, the respondents urge the Court to resolve the remainder of the certification requirements on a balance of probabilities. They say the Court should adopt the U.S. approach of weighing conflicting evidence at the certification stage. For the reasons set out in *Pro-Sys*, the standard to be applied here is "some basis in fact" and not a balance of probabilities.

49 As to the standard to be applied to the expert evidence, the respondents do not argue that it is insufficient to demonstrate commonality, rather they submit that Rice J. erred in that he applied the wrong standard of proof to the expert methodologies that he examined.

50 The reasons in *Pro-Sys* have set out that the standard to be applied to expert evidence is one requiring a credible and plausible methodology capable of proving harm on a class-wide basis.

51 It is evident that on the certification application, Rice J. analysed the significant amount of expert evidence that was before him and that he applied the correct standard to both the certification requirements ("plain and obvious" for s. 4(1)(a) and "some basis in fact" for s. 4(1)(b) to (e)) and the expert methodology required to establish some basis in fact (whether the expert evidence consisted of a credible and plausible model capable of proving harm on a class-wide basis). There is no basis upon which to interfere with his common issues determination.

*(3) Is There an Identifiable Class?*

52 Section 4(1)(b) of the *CPA* provides that the court must certify a proceeding if, among other requirements, there is an identifiable class of two or more persons. *Hollick* provides that this certification requirement will be satisfied by demonstrating "some basis in fact" to support it (para. 25).

53 The class definition proposed by the appellants is "all persons resident in British Columbia and elsewhere in Canada who purchased HFCS or products containing HFCS manufactured by the defendants (collectively, the 'class') from January 1, 1988 to June 30, 1995 (the 'Class Period')" (BCSC, para. 2).

54 The respondents take issue with the inclusion of indirect purchasers in the class. They acknowledge that while impracticability or impossibility in distributing class action proceeds to indirect purchasers does not necessarily preclude finding an "identifiable class", the facts of this particular case are such that the class cannot be found to be "identifiable" to the extent that it includes indirect purchasers (ADM factum, at para. 85). The respondents argue that the inclusion of indirect purchasers in the class in the present case runs contrary to the purpose of the "identifiable class" requirement because indirect purchasers are not able, based on the class definition, to determine if they are members of the class. Relying on *Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46, [2001] 2 S.C.R. 534 (S.C.C.), the respondents argue that the identifiable class requirement should allow for class membership to be determinable.

55 They argue that the proposed class definition does not allow for indirect purchasers to determine if they are in fact members of the class as defined. Contrary to the *Infineon* and *Pro-Sys* cases where there was evidence that class membership could likely be determined, here "it is simply impossible to make a determination of the presence, or lack of presence, of HFCS in particular products a consumer in British Columbia may have purchased between 1988 and 1995" (ADM factum, at para. 97). They argue that prominent direct purchasers such as Coke, Pepsi, Vitality Foodservice Canada Inc., Ocean Spray Cranberries and George Weston Limited have used both HFCS and liquid sugar in their products. In many cases, the labels on the products sold in Canada by these direct purchasers did not reflect which sweetener was used. They also point out that on cross-examination on her affidavit, the representative plaintiff Wendy Bredin stated that "she did not know whether any product she purchased during the class period actually contained HFCS" (ADM factum, at para. 18); They state that "[i]f the proposed representative Plaintiff in this action is unable to say whether any product she bought in the class period contained HFCS, it is difficult to see how any other potential class member could be aware of this fact" (ADM factum, at para. 103).

56 This is not a typical ground on which the "identifiable class" requirement is challenged. Here, there is no question whether the class definition is too narrow or too broad, whether the definition contains subjective criteria or whether the class definition creates a need to consider the merits. However, when the purpose for which there must be a class definition that designates an "identifiable class" is examined, the problems with the appellants' case become evident.

57 I agree with the courts that have found that the purpose of the class definition is to (i) identify those persons who have a potential claim for relief against the defendants; (ii) define the parameters of the lawsuit so as to identify those persons who are bound by its result; (iii) describe who is entitled to notice of the action (*Lau v. Bayview Landmark Inc. (1999)*, 40 C.P.C. (4th) 301 (Ont. S.C.J.), at paras. 26 and 30; *Bywater v. Toronto Transit Commission (1998)*, 27 C.P.C. (4th) 172 (Ont. Gen. Div.), at para. 10; Eizenga et al., at § 3.31). *Dutton* states that "[i]t is necessary ... that any particular person's claim to membership in

the class be determinable by stated, objective criteria" (para. 38). According to Eizenga et al., "[t]he general principle is that the class must simply be defined in a way that will allow for a later determination of class membership" (§ 3.33).

58 I do not take issue with the class definition on its face. It uses objective criteria, it does not turn on the merits of the claim, and it cannot be narrowed without excluding members who may have a valid claim. Where the difficulty lies is that there is insufficient evidence to show some basis in fact that two or more persons will be able to determine if they are in fact a member of the class.

59 The appellants claim that the respondents "attempt to use the complexity inherent in claims arising from a large-scale price-fixing conspiracy to deny those injured by the alleged conduct a legal remedy" and that "courts have found that class definitions similar or identical to that proposed in this case were appropriate" (response factum, at paras. 58 and 61). The appellants rely on the instruction in *Dutton*, at para. 38, that "[i]t is not necessary that every class member be named or known". They cite *Sauer v. Canada (Minister of Agriculture)* [2008 CarswellOnt 5081] (Ont. S.C.J.), 2008 CanLII 43774, in support of the proposition that courts can engage in a "relatively elaborate factual investigation in order to determine class membership" and that "[t]he fact that particular persons may have difficulty in proving that they satisfy the conditions for membership is often the case in class proceedings and is not, by itself, a reason for finding that the class is not identifiable" (response factum, at para. 67, citing *Sauer*, at para. 28).

60 However, in *Sauer* the passage relied upon pertained to the issue of the objectivity of the criteria used in the class definition. In that case, a class action involving cows infected with bovine spongiform encephalopathy ("BSE") or "mad cow disease", the class was defined to include "all cattle farmers in Canada", except Quebec (para. 11). The representative plaintiff adduced evidence of his own personal losses as well as those of others in the community as a result of the BSE crisis. The defendants challenged the term "cattle farmers" as being too broad and creating a problem for those farmers seeking to self-identify. Lax J. of the Ontario Superior Court of Justice held that in such situations the court could engage in a factual investigation to determine class membership.

61 That is not the situation in this case. Here, there is no basis in fact to demonstrate that the information necessary to determine class membership is possessed by any of the putative class members. The appellants have an obligation at the certification stage to introduce evidence to establish some basis in fact that at least two class members can be identified. Here, they have not met even this relatively low evidentiary standard.

62 This is not a case of mere difficulty in proving membership in a defined class. That is what distinguishes this case from *Pro-Sys*. In *Pro-Sys*, even if class membership is not immediately evident to potential class members based on the class definition, records of purchase or the presence of the application software or operating systems that form the subject of the appeal on the computers of the putative class members would serve to identify them as part of the identifiable class. Further, in *Pro-Sys*, Sam Leung, president and director of Pro-Sys Consultants Ltd., one of the representative plaintiffs, offered proof that he had purchased the product in question in the form of the invoice for the purchase of the computer. That evidence demonstrated that class membership was determinable and established some basis in fact that there was an identifiable class.

63 Conversely, in this case, the respondents' evidence is that HFCS and liquid sugar had been used interchangeably by direct purchasers during the class period. They also claim that

Canadian labelling requirements during the class period were such that food and beverage producers were not required to specify which of the two sweeteners was contained in their products. A generic label indicating "sugar/glucose-fructose" could be used for either liquid sugar or HFCS. The result is that a consumer who purchased such a product during the class period would have had no way of determining whether that product contained HFCS, even if they had bothered to check the label. [ADM factum, at para. 100]

64 The appellants say only that "hundreds of millions of dollars of HFCS was sold to Canadian direct purchasers during the Class Period" and that this HFCS was used in "products such as soft drinks, baked goods and other food products which are purchased by restaurants, grocery wholesalers, supermarkets, convenience stores, movie theatres and others" (response

factum, at para. 69). Their expert offers evidence that the amount of HFCS used and the specific products which contained it are identifiable (para. 69, citing Leitzinger Report, at paras. 10-11, 18-20 and 27 (A.R., vol. II, at pp. 85-86, 89-91 and 95-96)).

65 The question, however, is not one of whether the identified products contained HFCS, or even whether the overcharge would have reached the indirect purchaser level (i.e. whether passing on had occurred). The problem in this case lies in the fact that indirect purchasers, even knowing the names of the products affected, will not be able to know whether the particular item that they purchased did in fact contain HFCS. The appellants have not offered evidence that could help to overcome the identification problem created by the fact that HFCS and liquid sugar were used interchangeably.

66 Even Ms. Bredin testified that she is unable to state whether the products she purchased contained HFCS. This fact will remain unchanged because, as noted above, liquid sugar and HFCS were used interchangeably and a generic label indicating only "sugar/glucose-fructose" could be used for either type of sweetener. Ms. Bredin presented no evidence to show that there is some basis in fact that she would be able to answer this question. On the evidence presented on the application for certification, it appears impossible to determine class membership.

67 The appellants' claim that "although some class members may not be able to self-identify, class membership is determinable by reference to the nature of the purchases made by each individual and the quantity of HFCS in the products purchased" (response factum, at para. 71). However, this is no answer to the self-identification problem. While there may have been indirect purchasers who were harmed by the alleged price-fixing, they cannot self-identify using the proposed definition. Allowing a class proceeding to go forward without identifying two or more persons who will be able to demonstrate that they have suffered loss at the hands of the alleged overchargers subverts the purpose of class proceedings, which is to provide a more efficient means of recovery for plaintiffs *who have suffered harm* but for whom it would be impractical or unaffordable to bring a claim individually. In this case, class membership is not determinable.

68 Built into the class certification framework is the requirement that the class representative present sufficient evidence to support certification and to allow the opposing party to respond with its own evidence (*Hollick*, at para. 22). The goal at the certification stage is to ensure that this is an appropriate matter to proceed as a class proceeding (*Pro-Sys*, at para. 104). And while the certification stage is not a preliminary trial of the merits, "the judge must be satisfied of certain basi[c] facts required by [the CPA] as the basis for a certification order" (*Taub v. Manufacturers Life Insurance Co.* (1998), 40 O.R. (3d) 379 (Ont. Gen. Div.), at p. 381).

69 In this case, the appellants argue that denying that there is an identifiable class is to confuse the ability to identify a class with the ability to identify each individual member of that class (response factum, at para. 72). I agree that it is not necessary for each individual class member to be identified at the outset of the litigation in order for the class to be certified. However, as set out in the legislation, the matter will only be certified if, *inter alia*, "there is an identifiable class of 2 or more persons" (s. 4(1)(b)). In this case, the problem is that the indirect purchaser plaintiff did not offer any evidence to show some basis in fact that two or more persons could prove they purchased a product actually containing HFCS during the class period and were therefore identifiable members of the class.

70 Justice Karakatsanis says that there is some basis in fact to conclude that some indirect purchasers could prove that they probably purchased products containing HFCS (para. 115). With respect, no evidence was provided to establish some basis in fact that any individual indirect purchasers could do so. Allowing the class to be certified in such circumstances would be to lower the evidentiary standard necessary to satisfy the criteria at the certification stage from some basis in fact to mere speculation.

71 Justice Karakatsanis also states that "expert evidence may provide a credible and plausible method offering a realistic prospect of establishing loss on a class-wide basis" (para. 108). However, even if expert evidence satisfies the certification judge that the class as a whole was harmed, that does not obviate the need for the certification judge to be satisfied that there is some basis in fact indicating that at least two persons can prove they incurred a loss.

72 A key component in any class action is that at least two or more persons fit within the class definition. If, as in this case, there is no basis in fact to show that at least someone can prove they fit within the class definition, the class cannot be certified because the criteria of "an identifiable class of 2 or more persons" is not met. No amount of expert evidence establishing that the defendants have harmed the class as a whole does away with this requirement.

73 This is not to say that an identifiable class could never be found in similar circumstances as appear in this case. An identifiable class could be found if evidence was presented that provided some basis in fact that at least two persons could prove they had suffered individual harm. The problem in this case is that no such evidence was tendered.

74 Justice Karakatsanis writes that "if no individual seeks an individual remedy, it will not be necessary to prove individual loss" (para. 97), and that the aggregate damages provisions of the *CPA* allow class actions to proceed "where *liability to the class* has been proven but individual membership in the class is difficult or impossible to determine" (para. 102 (emphasis in original)).

75 As I understand it, Justice Karakatsanis's point is that where liability to the class has been proven there is no requirement to prove any person is a member of a class or that any person has suffered individual damage. The necessary implication is that class proceeding legislation alters existing causes of action. For example, s. 36 of the *Competition Act* creates a cause of action for "[a]ny person who has suffered loss or damage". My colleague's approach would suggest a class action claim could proceed under s. 36 of the *Competition Act* without any person establishing that they had suffered loss or damage. However, the *CPA* neither creates a new cause of action nor alters the basis of existing causes of action. Rather, it allows claimants with causes of action to unite and pursue their claims as a class.

76 The aggregate damages provisions of the *CPA* allow the court to dispense with the need to calculate the quantum of damages for each individual class member and permits distribution of the proceeds on a *cy-près* basis rather than to individual members of the class. However, where the proposed certified causes of action require proof of loss as a component of proving liability, the certification judge must be satisfied that there is some basis in fact that at least two persons can prove they incurred a loss. Establishing that the class as a whole has suffered loss does not obviate this requirement.

#### (4) Conclusion on Identifiable Class

77 The goal of the certification stage, as indicated by McLachlin C.J. in *Hollick* is to determine if, procedurally, the action is best brought in the form of a class action (para. 16). In this case, given that the appellants did not show that there was some basis in fact to believe that at least two persons can establish they are members of the class, I am unable to answer that question in the affirmative.

78 An advantage of a class proceeding is that it serves judicial economy by allowing similar individual actions to be aggregated (*Hollick*, at para. 15; *Dutton*, at para. 27). In my view, implicit in this objective is that the foundation upon which an individual action could be built must be equally present in the class action setting. That foundation is lacking here.

79 I do not disagree with Justice Karakatsanis that behaviour modification can be an objective of class proceedings. However, the circumstances here demonstrate that class proceedings are not always the appropriate means of addressing behaviour modification. In cases in which loss or damage due to price-fixing cannot be proven, the appropriate recourse may be for the Commissioner of Competition to charge the defendants under the *Competition Act*. A process commenced by the Commissioner requires only proof of price-fixing. There is no need to prove passing on or that any particular consumer overpaid for a particular product. Whether the Competition Bureau intends to prosecute the respondents in this case is not known. Regardless, it does not change the fact that in a case such as this, where certification criteria cannot be met, such prosecutions may have to be considered if behaviour modification is the objective.

## V. Conclusion

80 Given the finding that an identifiable class cannot be established for the indirect purchasers, the class action as it relates to the indirect purchasers cannot be certified. I would dismiss the appeal with costs. Given the finding that the pleadings do not

disclose a cause of action in constructive trust, the claim of the direct purchasers cannot succeed and should be dismissed. The class action as it relates to the direct purchasers cannot be certified. The cross-appeal is allowed with costs.

**Karakatsanis J. (dissenting) (Cromwell J. concurring):**

**VI. Overview**

81 I disagree with my colleague's conclusion that the claim by the indirect purchasers fails to meet the certification requirement under s. 4(1)(b) of the *Class Proceedings Act*, R.S.B.C. 1996, c. 50 (*CPA*). In my view, there is "some basis in fact" to find "an identifiable class of 2 or more persons". Accordingly, I would allow the appeal and remit the matter to the British Columbia Supreme Court for trial.

82 The appellants' proposed class definition includes "all persons resident in British Columbia and elsewhere in Canada who purchased HFCS or products containing HFCS manufactured by the defendants (collectively, the 'class') from January 1, 1988 to June 30, 1995 (the 'Class Period')" ([2010 BCSC 922](#) (B.C. S.C.), at para. 2).

83 This class includes both the direct and indirect purchasers of high-fructose corn syrup (HFCS) — the subject of alleged price fixing. At issue is the identification of a class which would include indirect purchasers — the retailers and consumers — who purchased products containing HFCS.

84 Justice Rothstein notes that this definition of the class appears to satisfy the requirements of an identifiable class on its face. It uses objective criteria; it does not turn on the merits of the claim; and it cannot be narrowed without excluding members who may have a valid claim (*Western Canadian Shopping Centres Inc. v. Dutton*, [2001 SCC 46](#), [2001] 2 S.C.R. 534 (S.C.C.), at para. 38). However, the class of indirect purchasers is challenged on the basis that individuals will be unable to determine whether they purchased a product containing HFCS and thus whether they are a member of the class. The issue of the appropriateness of the representative plaintiff is not before the Court.

85 Justice Rothstein concludes that there is no basis in fact to identify a class because there is no or insufficient evidence that class members can be identified or can self-identify (paras. 58 and 65-67). He concludes that it is impossible for the indirect purchasers to prove they purchased a product containing HFCS and thus suffered loss.

86 I have two objections to this conclusion. First, I am not persuaded that the requirement that the class be identifiable includes the requirement that individual members of the class be capable of proving individual loss. Indeed, as discussed below, the *CPA* provides for remedies when the *class* has suffered harm that are available without proof of individual loss. Such an approach best serves the purposes of class proceedings, which are designed not only to provide enhanced access to justice and judicial economy, but also to motivate behaviour modification.

87 Second, even if proof of individual loss is necessary to establish an identifiable class under the *CPA*, I do not agree that, on this record, it will be impossible to determine whether an individual is a member of the class.

88 The application judge, Rice J., held that the appellants satisfied the requirement that there is an identifiable class ([2010 BCSC 922](#) (B.C. S.C.)). The Court of Appeal did not address this issue ([2011 BCCA 187](#), [305 B.C.A.C. 55](#) (B.C. C.A.)). For the reasons that follow, I conclude that there is no basis to set aside the decision of the application judge.

**VII. Class Requirements — General Principles**

89 Section 4(1)(b) of the *CPA* requires that there be "an identifiable class of 2 or more persons".

90 In *Dutton*, this Court addressed the specific certification requirement that there be an identifiable class (para. 38):

First, the class must be capable of clear definition. Class definition is critical because it identifies the individuals entitled to notice, entitled to relief (if relief is awarded), and bound by the judgment. It is essential, therefore, that the class be defined clearly at the outset of the litigation. The definition should state objective criteria by which members of the class

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Purchaser acquired business and became new sponsor of employees' pension plan — Purchaser told plan's beneficiaries that it would be making several changes to plan that were adverse to their interests — Representative of beneficiaries applied for authorization to institute class action against purchaser, claiming that amendments were not valid — Motion judge dismissed motion on basis that there were no questions that were identical, similar or related for all members of group — Motion judge

held that, consequently, requirement set out in art. 1003(a) of Code of Civil Procedure was not met — Representative appealed — Quebec Court of Appeal unanimously found that validity of amendments was question common to all members of group, and it authorized institution of class action — Purchaser appealed — Appeal dismissed — Court noted that, at authorization stage, motion judge should only determine whether applicant has established *prima facie* case and should not deal with merits of case — In context of art. 1003(a) of Code, it was sufficient if claims of members raise some questions of law or of fact that were sufficiently similar or sufficiently related to justify class action — Here, Court found that motion judge erred in ruling on merits of case and by seeking common answers rather than merely identifying one or more questions that were common to claims of all members of proposed group — Court acknowledged that differences existed between members of proposed group — However, Court held that there was common question to claims of all members of proposed group, although common question may require nuanced and varied answers based on situations of individual members — Therefore, Court concluded that errors made by motion judge warranted intervention of Court of Appeal.

Pensions --- Private pension plans — Practice in pension actions — Miscellaneous

Purchaser acquired business and became new sponsor of employees' pension plan — Purchaser told plan's beneficiaries that it would be making several changes to plan that were adverse to their interests — Representative of beneficiaries applied for authorization to institute class action against purchaser, claiming that amendments were not valid — Motion judge dismissed motion on basis that there were no questions that were identical, similar or related for all members of group — Motion judge held that, consequently, requirement set out in art. 1003(a) of Code of Civil Procedure was not met — Representative appealed — Quebec Court of Appeal unanimously found that validity of amendments was question common to all members of group, and it authorized institution of class action — Purchaser appealed — Appeal dismissed — Court noted that, at authorization stage, motion judge should only determine whether applicant has established *prima facie* case and should not deal with merits of case — In context of art. 1003(a) of Code, it was sufficient if claims of members raise some questions of law or of fact that were sufficiently similar or sufficiently related to justify class action — Here, Court found that motion judge erred in ruling on merits of case and by seeking common answers rather than merely identifying one or more questions that were common to claims of all members of proposed group — Court acknowledged that differences existed between members of proposed group — However, Court held that there was common question to claims of all members of proposed group, although common question may require nuanced and varied answers based on situations of individual members — Therefore, Court concluded that errors made by motion judge warranted intervention of Court of Appeal.

Procédure civile --- Parties — Recours collectifs intentés en vertu d'une loi relative aux recours collectifs — Autorisation — Recours collectif du demandeur — Cause commune ou intérêt commun

Acheteur a acquis une entreprise et est devenu le nouveau promoteur du régime de retraite des employés — Acheteur a annoncé aux bénéficiaires du régime qu'il apportait à celui-ci plusieurs changements qui leur étaient défavorables — Représentant des bénéficiaires a demandé l'autorisation d'exercer un recours collectif contre l'acheteur, faisant valoir que les modifications n'étaient pas valides — Juge d'autorisation a rejeté la requête au motif qu'il n'y avait pas de questions identiques, similaires ou connexes pour l'ensemble des membres du groupe — Juge d'autorisation a ainsi estimé que l'exigence de l'art. 1003a) du Code de procédure civile n'était pas respectée — Représentant a interjeté appel — Cour d'appel du Québec a unanimement conclu que la question de la validité des modifications était une question commune à l'égard de tous les membres du groupe et a autorisé le dépôt d'un recours collectif — Acheteur a formé un pourvoi — Pourvoi rejeté — Cour a fait remarquer qu'à l'étape de l'autorisation, le juge d'autorisation devrait se limiter à déterminer si le requérant a, à première vue, établi qu'il avait une cause à défendre et ne devrait pas se prononcer sur le fond de l'affaire — Dans le cadre d'une analyse portant sur l'art. 1003a) du Code, il suffit que les réclamations des membres soulèvent certaines questions de droit ou de fait suffisamment similaires ou suffisamment connexes pour justifier un recours collectif — En l'espèce, la Cour a conclu que le juge d'autorisation avait commis une erreur en se prononçant sur le fond du litige et en cherchant des réponses communes au lieu de se limiter à cerner une ou plusieurs questions communes aux réclamations de l'ensemble des membres du groupe proposé — Cour a reconnu qu'il existait des différences entre les membres du groupe proposé — Toutefois, la Cour a conclu à l'existence d'une question commune aux réclamations de l'ensemble des membres du groupe proposé, bien que la réponse à cette question pourrait devoir être nuancée et adaptée en fonction des circonstances propres à chacun d'eux — Par conséquent, la Cour a conclu que les erreurs commises par le juge d'autorisation justifiaient l'intervention de la Cour d'appel.

Régimes de retraite --- Régimes de retraite privés — Procédure dans le cadre d'actions concernant des régimes de retraite — Divers

Acheteur a acquis une entreprise et est devenu le nouveau promoteur du régime de retraite des employés — Acheteur a annoncé aux bénéficiaires du régime qu'il apportait à celui-ci plusieurs changements qui leur étaient défavorables — Représentant des bénéficiaires a demandé l'autorisation d'exercer un recours collectif contre l'acheteur, faisant valoir que les modifications n'étaient pas valides — Juge d'autorisation a rejeté la requête au motif qu'il n'y avait pas de questions identiques, similaires ou connexes pour l'ensemble des membres du groupe — Juge d'autorisation a ainsi estimé que l'exigence de l'art. 1003a) du Code de procédure civile n'était pas respectée — Représentant a interjeté appel — Cour d'appel du Québec a unanimement conclu que la question de la validité des modifications était une question commune à l'égard de tous les membres du groupe et a autorisé le dépôt d'un recours collectif — Acheteur a formé un pourvoi — Pourvoi rejeté — Cour a fait remarquer qu'à l'étape de l'autorisation, le juge d'autorisation devrait se limiter à déterminer si le requérant a, à première vue, établi qu'il avait une cause à défendre et ne devrait pas se prononcer sur le fond de l'affaire — Dans le cadre d'une analyse portant sur l'art. 1003a) du Code, il suffit que les réclamations des membres soulèvent certaines questions de droit ou de fait suffisamment similaires ou suffisamment connexes pour justifier un recours collectif — En l'espèce, la Cour a conclu que le juge d'autorisation avait commis une erreur en se prononçant sur le fond du litige et en cherchant des réponses communes au lieu de se limiter à cerner une ou plusieurs questions communes aux réclamations de l'ensemble des membres du groupe proposé — Cour a reconnu qu'il existait des différences entre les membres du groupe proposé — Toutefois, la Cour a conclu à l'existence d'une question commune aux réclamations de l'ensemble des membres du groupe proposé, bien que la réponse à cette question pourrait devoir être nuancée et adaptée en fonction des circonstances propres à chacun d'eux — Par conséquent, la Cour a conclu que les erreurs commises par le juge d'autorisation justifiaient l'intervention de la Cour d'appel.

The former employer's pension plan covered the employees and their dependents. In December 2000, a purchaser acquired the former employer's business and became the successor of the former employer and the new plan's sponsor. In September 2008, the purchaser told the plan's beneficiaries that it would be making several changes to the plan that were adverse to their interests. As a result, the representative of the beneficiaries applied for authorization to institute a class action against the purchaser, claiming that the amendments were not valid.

The motion judge dismissed the motion on the basis that there were no questions that were identical, similar or related for all the members of the group. The motion judge held that, because there was a range of individual recourses, the requirement set out in art. 1003(a) of the Code of Civil Procedure was not met. The representative appealed.

The Quebec Court of Appeal unanimously authorized the institution of a class action. It found that the validity of the amendments was a question common to all the members of the group. The Court of Appeal noted that questions that are common to all the members of the group can coexist with questions that concern individuals. The purchaser appealed.

**Held:** The appeal was dismissed.

Per LeBel, Wagner JJ. (Abella, Rothstein, Cromwell, Moldaver, Karakatsanis JJ. concurring): Article 1003(a) of the Code provides that a class action may be authorized only if the court concludes that the recourses of the members raise identical, similar or related questions of law or fact. According to decisions rendered under the common law system and recognized in Quebec law, a question will be considered common if it can serve to advance the resolution of every class member's claim. The Court noted that the Quebec courts' approach to the commonality requirement has often been broader and more flexible than the one taken in the common law provinces.

The Court of Appeal stated on many occasions that it should intervene in a decision on a motion for authorization to institute a class action only if the motion judge erred in law or if the judge's assessment with respect to the criteria of art. 1003 of the Code is clearly wrong. The Court noted that, at the authorization stage, the motion judge should only determine whether the applicant has established a *prima facie* case and should not deal with the merits of the case. In the context of art. 1003(a) of the Code, it is sufficient if the claims of the members raise some questions of law or of fact that are sufficiently similar or sufficiently related to justify a class action.

Here, the Court found that the motion judge erred in ruling on the merits of the case and by seeking common answers rather than merely identifying one or more questions that were common to the claims of all the members of the proposed group. The Court acknowledged that differences existed between the members of the proposed group. However, the Court held that there was a common question to the claims of all the members of the proposed group, although the common question may require nuanced and varied answers based on the situations of individual members. Therefore, the Court concluded that the errors made by the motion judge warranted the intervention of the Court of Appeal.

Le régime de retraite de l'ex-employeur offrait une protection aux employés et les personnes à leur charge. En décembre 2000, un acheteur a acquis l'entreprise de l'ex-employeur et est devenu le successeur de l'ex-employeur et le nouveau promoteur du régime. En septembre 2008, l'acheteur a annoncé aux bénéficiaires du régime qu'il apportait à celui-ci plusieurs changements qui leur étaient défavorables. En réponse à cette annonce, le représentant des bénéficiaires a demandé l'autorisation d'exercer un recours collectif contre l'acheteur, faisant valoir que les modifications n'étaient pas valides.

Le juge d'autorisation a rejeté la requête au motif qu'il n'y avait pas de questions identiques, similaires ou connexes pour l'ensemble des membres du groupe. Le juge d'autorisation a estimé qu'en raison de la présence d'un faisceau de recours individuels, l'exigence de l'art. 1003a) du Code de procédure civile n'était pas respectée. Le représentant a interjeté appel.

La Cour d'appel du Québec a unanimement autorisé le dépôt d'un recours collectif. Elle a conclu que la question de la validité des modifications était une question commune à l'égard de tous les membres du groupe. La Cour d'appel a fait remarquer que des questions communes à tous les membres du groupe peuvent coexister avec des questions individuelles. L'acheteur a formé un pourvoi.

**Arrêt:** Le pourvoi a été rejeté.

LeBel, Wagner, JJ. (Abella, Rothstein, Cromwell, Moldaver, Karakatsanis, JJ., souscrivant à leur opinion) : L'article 1003a) du Code prévoit qu'un recours collectif ne peut être autorisé que si le tribunal conclut que les recours des membres soulèvent des questions de droit ou de fait identiques, similaires ou connexes. Selon la jurisprudence rendue sous le régime de la common law et reconnue en droit québécois, une question sera considérée comme commune si elle permet de faire progresser le règlement de la réclamation de chacun des membres du groupe. La Cour a fait remarquer que l'approche préconisée par les tribunaux québécois à l'égard du critère de la communauté de questions a souvent été plus large et plus flexible que celle des tribunaux des provinces de common law.

La Cour d'appel a affirmé à maintes reprises qu'elle ne devrait intervenir dans une décision sur une requête en autorisation d'exercer un recours collectif que si le juge d'autorisation a commis une erreur de droit ou si son appréciation des critères énoncés à l'art. 1003 du Code est manifestement non fondée. La Cour a fait remarquer qu'à l'étape de l'autorisation, le juge d'autorisation devrait se limiter à déterminer si le requérant a, à première vue, établi qu'il avait une cause à défendre et ne devrait pas se prononcer sur le fond de l'affaire. Dans le cadre d'une analyse portant sur l'art. 1003a) du Code, il suffit que les réclamations des membres soulèvent certaines questions de droit ou de fait suffisamment similaires ou suffisamment connexes pour justifier un recours collectif.

En l'espèce, la Cour a conclu que le juge d'autorisation avait commis une erreur en se prononçant sur le fond du litige et en cherchant des réponses communes au lieu de se limiter à cerner une ou plusieurs questions communes aux réclamations de l'ensemble des membres du groupe proposé. La Cour a reconnu qu'il existait des différences entre les membres du groupe proposé. Toutefois, la Cour a conclu à l'existence d'une question commune aux réclamations de l'ensemble des membres du groupe proposé, bien que la réponse à cette question pourrait devoir être nuancée et adaptée en fonction des circonstances propres à chacun d'eux. Par conséquent, la Cour a conclu que les erreurs commises par le juge d'autorisation justifiaient l'intervention de la Cour d'appel.

**I. Overview**

1 The class action, which was introduced into Quebec law in 1979, is "the procedure which enables one member to sue without a mandate on behalf of all the members" of a group: *art. 999(d), Code of Civil Procedure*, R.S.Q., c. C-25 ("C.C.P."). This procedural vehicle has several objectives, including facilitating access to justice, modifying harmful behaviour and conserving judicial resources: *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.), at para. 15; *Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46, [2001] 2 S.C.R. 534 (S.C.C.), at paras. 27-29.

2 In *art. 1003 C.C.P.*, the Quebec legislature has laid down the essential conditions that must be met for a court to authorize the bringing of a class action. One of these conditions is that there be one or more questions of law or fact that are "identical, similar or related" for all the members of the group. It is this criterion that is at the heart of this appeal. More specifically, a court hearing an application for authorization must decide whether *art. 1003(a) C.C.P.* requires a common answer, for all the members of the group in question, to the common question raised by their claims.

3 The litigation in this case arises out of a unilateral amendment made by Vivendi Canada Inc. to the health insurance plan ("Plan") of which it is the sponsor for its retirees and their surviving spouses. Mr. Dell'Aniello, the respondent in this appeal, filed a motion for authorization to institute a class action, on behalf of all the beneficiaries of the Plan, in order to challenge the validity of the amendment. The Superior Court dismissed the motion on the basis that the claims of all the members of the proposed group did not raise questions that were "identical, similar or related", having regard to each member's particular situation. The Court of Appeal concluded that the judge who heard the motion for authorization had erred in his assessment with respect to the criterion set out in *art. 1003(a) C.C.P.*, and that there was a question common to the claims of all the members of the group.

4 For the reasons that follow, we are of the opinion that the appeal must be dismissed. The Court of Appeal was right to intervene, as the motion judge had erred in inquiring into the possibility that the class action would lead to a common answer to the questions raised by the claims of all the members of the group. The *C.C.P.* requires not a common answer, but a common question that can serve to advance the resolution of the litigation with respect to all the members of the group. Moreover, by considering the merits of the dispute, the motion judge had also overstepped the bounds of his role of screening motions at the authorization stage.

## II. Facts

5 Seagram Ltd. was established in 1857 and over time became Canada's leading producer and distributor of wine and spirits. Seagram's employees had generous conditions of employment, including the Plan.

6 According to a description set out in a document dated 1977, the Plan covered Seagram's employees, and their dependents, both during the employees' working lives and after they retired. The employees were required to contribute to the Plan while they were working, but Seagram paid all the costs after they retired.

7 Over the years, the Plan was revised several times. In particular, in July 1985, Seagram inserted a unilateral amendment clause in a footnote in the document that set out the details of the Plan. This clause read as follows:

While Seagram expects to continue this Supplementary Health Insurance Plan indefinitely, future conditions cannot be foreseen, thus it necessarily reserves the right to modify or suspend the Plan at any time. [A.R., vol. II, at p. 104]

8 In December 2000, Vivendi S.A. acquired Seagram, which had about 700 employees at the time. In December 2001, Seagram's assets related to the production and distribution of wine and spirits were sold. As part of that transaction, Seagram became Vivendi Universal Canada Inc., which in turn became Vivendi Canada Inc. ("Vivendi"). Vivendi is therefore Seagram's successor and the Plan's sponsor.

9 Seagram, and later Vivendi, complied fully with the terms of the Plan for many years. In September 2008, however, Vivendi told the Plan's beneficiaries that it would be making several changes to the Plan that were adverse to their interests. These changes took effect on January 1, 2009 ("2009 amendments"). As of that date, the Plan's only remaining members were

retirees and surviving spouses, since Vivendi no longer had any operations in Canada related to the production and distribution of wine and spirits.

10 As a result of the 2009 amendments, the respondent applied to the Quebec Superior Court for authorization to institute a class action against Vivendi and asked that court to ascribe to him the status of representative of the following persons:

[TRANSLATION]

All retired officers and employees of the former Seagram Company Limited who are eligible for post-retirement medical care under Vivendi Canada Inc.'s health care plan ("Plan") and eligible dependents within the meaning of the Plan ("beneficiaries"), as well as, with regard to the damages claimed, the successors of any such officers, employees or beneficiaries who have died since January 1, 2009. [A.R., vol. II, at p. 2]

11 The identical, similar or related questions of law or fact for which the respondent seeks a decision through the class action are as follows:

[TRANSLATION]

- (a) For group members who are retirees, do the Plan's benefits constitute deferred compensation that is paid today in the form of benefits but was earned when they were active employees?
- (b) From the date of their retirement, pursuant to the Plan and other documents cited herein, did the group members who are retirees have rights with respect to health care under the Plan that had vested or crystallized as of their retirement date and that could not be diminished without their consent?
- (c) From the date of their retirement, in accordance with a general legal principle or a principle developed by the courts, did the group members who are retirees have rights with respect to health care under the Plan that had vested or crystallized as of their retirement date and that could not be diminished without their consent?
- (d) Is the clause unilaterally inserted into the Plan in 1985 one whose purpose is to make it possible to harmonize the Plan with and adapt it to legislative changes, or does it instead authorize the respondent to unilaterally reduce the coverage of health care under the Plan for group members who are retirees in the absence of any legislative change obliging the respondent to do so?
- (e) Assuming that the clause unilaterally inserted into the Plan in 1985 permitted the respondent to unilaterally reduce the coverage of health care under the Plan for group members who are retirees in the absence of any legislative change obliging the respondent to do so,
  - (1) is the clause purely potestative, and is it null for that reason?
  - (2) does the clause make the Plan contract non-binding, and is it null for that reason? or
  - (3) does the clause make all the Plan's contractual obligations indeterminate or indeterminable, and is it null for that reason?
- (f) Is the Plan a contract of adhesion, and if so, in case of doubt, must it be interpreted in favour of the adhering parties, that is, the members of the group? [A.R., vol. II, at pp. 15-16]

The purpose of all these questions is to answer the more general question whether the 2009 amendments are valid or lawful.

### **III. Judicial History**

#### **A. Quebec Superior Court (Mayer J.), 2010 QCCS 3416, 83 C.C.P.B. 22 (C.S. Que.)**

12 As we mentioned above, Mayer J. dismissed the motion for authorization to institute a class action on the basis that there were no questions that were identical, similar or related for all the members of the group. This conclusion was based on his opinion that too many factors specific to each member had to be considered for one or more of the questions to be decided collectively. Moreover, not all the group's members had in their possession, at the time they retired, the documents the respondent had in his.

13 Mayer J. considered whether the questions raised in the motion for authorization to institute a class action were identical, similar or related, within the meaning of art. 1003(a) *C.C.P.*, for all the members of the group. After identifying the principles established by the courts, he concluded that because of the large number of questions requiring individualized analyses, the claims of the members of the proposed group did not lend themselves to a collective resolution.

14 Mayer J.'s conclusion that numerous individualized analyses would be necessary arose out of his interpretation of the rules governing the right of retirees to insurance benefits. He stated that it must be determined whether the right to insurance benefits during retirement has vested, because it is settled that an employer cannot modify or abolish a vested right without the retiree's consent. In his view, because the right to insurance benefits "crystallizes" at the time of retirement, the intention of the parties with respect to the vesting of rights must be determined as of that time. For this, the contract in effect at the time of retirement must be examined together with the communications between the employer and each employee in order to determine whether any rights have vested.

15 According to Mayer J., the respondent's premise that the question of vested rights could be considered collectively was wrong. The employees covered by the action had retired on different dates between 1971 and 2003, and the various groups of retirees had not all received the same communications from the employer. In addition, individual communications had been sent to the retirees. In Mayer J.'s opinion, it was essential to rule on the rights of the various members of the proposed group on the basis of the communications each of them had actually received. To proceed in any other way would be unfair to Vivendi.

16 In support of his conclusion that it was necessary to conduct individual analyses, Mayer J. identified five subgroups. Subgroup 1 consisted of the surviving spouses of employees who had retired before January 1, 1977. According to Mayer J., the rights of these members could not be governed by the documents applicable to the respondent, since those documents had not existed at the time the employees in question retired. To determine the scope of the rights of the members of subgroup 1, it was instead necessary to consider the communications between the deceased employees and the employer before or at the time of their retirement. Mayer J. found that, according to the documents in the record, a surviving spouse was no longer eligible for insurance benefits after the retired employee died.

17 Subgroup 2 was made up of employees who had retired between January 1, 1977 and July 14, 1985, and the surviving spouses of such employees. When the employees in question retired, they had the 1977 benefit guide in their possession as well as the insurance policy issued by Sun Life of Canada. Mayer J. stated that because Seagram had reserved the right to terminate the insurance contract, the rights of the members of this subgroup to insurance benefits had not crystallized.

18 Subgroup 3 consisted of employees who had retired between July 15, 1985 and December 31, 1995, and the surviving spouses of such employees. At the time they retired, the employees in question had in their possession a letter from Mr. Kosiuk, a representative of Seagram, and the benefit guide prepared in 1985, which contained the unilateral amendment clause. As a result, Mayer J. found, that clause, according to which Vivendi could modify the insurance benefits, prevented the rights of the members of subgroup 3 from crystallizing.

19 Subgroup 4 was made up of employees who had retired between January 1, 1996 and June 20, 2000, and the surviving spouses of such employees. The employees in question had in their possession a letter from Mr. Wilson dated November 20, 1995 and the 1996 benefit guide. As with the members of subgroups 2 and 3, Mayer J. concluded that because Vivendi had retained the right to modify the Plan unilaterally, the rights of the members of subgroup 4 had not crystallized.

20 Finally, the members of subgroup 5, which included the respondent, were employees who had retired after June 21, 2000. A number of documents relating to the Plan, namely three emails from Mr. Borgia and a letter from Mr. Wilson, were sent, the first dated June 21, 2000, but not all the members of this subgroup had them in their possession when they retired.

21 This division into five subgroups of the group covered by the motion for authorization to institute a class action showed that not all the group's members had in their possession, at the time they retired, the documents the respondent had in his. As a result, Mayer J. found that the various group members had different rights. He also asserted that individual analyses would be required within each subgroup, since each member of a subgroup could have received documents or communications that the others had not received.

22 Mayer J. also noted that the unilateral amendment clause did not apply to those who had retired before July 15, 1985, who made up 20 percent of the group. It was therefore irrelevant to the analysis on the vesting of the rights of those retirees, and a decision concerning the interpretation or the validity of the clause would not serve to advance the resolution of the litigation with respect to those individuals.

23 Mayer J. also stated that the injury allegedly suffered by the group's members could be established only on an individual basis. This was another factor that weighed against authorizing the class action.

24 Finally, given that the proposed group's members had worked in six different provinces, this lack of homogeneity was, in Mayer J.'s view, another relevant factor that supported a refusal to authorize the class action. The law of the common law provinces would apply to the retirees who had worked in those provinces, whereas Quebec law would apply to those who had worked in Quebec. In light of the number of subgroups and different legislative schemes that would apply to the various questions, he concluded that a minimum of 22 separate analyses would be needed to answer the questions the respondent said to be "common".

25 Mayer J. therefore found that, because of this [TRANSLATION] "range of individual recourses", the requirement set out in art. 1003(a) C.C.P. was not met (para. 137). As a result, he dismissed the respondent's motion for authorization to institute a class action.

***B. Quebec Court of Appeal (Chamberland, Rochon and Léger JJ.A.), 2012 QCCA 384, 95 C.C.P.B. 165 (C.A. Que.)***

26 The Court of Appeal unanimously allowed the appeal, authorized the institution of a class action and ascribed the status of representative to the respondent. It held that Mayer J. had erred in finding that the condition set out in art. 1003(a) C.C.P. was not met. It also concluded that the question whether the 2009 amendments were valid or lawful was common to all the members of the group.

27 The Court of Appeal found that the motion judge had erred in law by ruling on the merits on the question whether the 2009 amendments were valid in relation to the members of the group. All the Superior Court had to do at the authorization stage was decide whether the questions relating to the validity or the legality of the 2009 amendments were identical, similar or related for the claims of all the members of the proposed group.

28 According to the Court of Appeal, Mayer J. had instead focused on the individual questions that might arise in light of the different rules governing each member's right to insurance benefits. In so doing, Mayer J. had ruled on the merits of the arguments raised by the appellant and the respondent, thereby overstepping the bounds of his function of screening motions at the authorization stage.

29 The Court of Appeal concluded that, [TRANSLATION] "by taking the fragmentation of the subgroups too far and deciding the question of vested rights, [Mayer J.] disregarded the *prima facie* case requirement and, without saying so, indirectly ruled on the validity of the 1985 clause in which the employer reserved the right to modify the Plan in the future": para. 53.

30 The Court of Appeal then considered whether the validity or the legality of the 2009 amendments was a question common to all the members of the group for the purposes of art. 1003(a) C.C.P. The court held that it was. First of all, the court stated

on the basis of this Court's decision in *Dutton* that questions that are common to all the members of the group can coexist with questions that concern individuals; all that is needed is that there be a common, related or similar question. In the context of the case at bar, the Court of Appeal accepted that the main question at issue was whether the 2009 amendments were valid or lawful and that this question applied to all the members of the group. The members had all entered into a contract of employment with Seagram, and subsequently Vivendi, that provided for certain benefits, including the Plan. According to the Court of Appeal, the main question raised by the motion could give rise to serious argument. If the analysis with respect to the criterion set out in art. 1003(a) C.C.P. is based on the questions actually at issue rather than on factual differences that are not relevant at the preliminary stage, it is inappropriate for the judge hearing the motion for authorization to create subgroups in order to decide the motion.

31 The Court of Appeal also stated that the *prima facie* case requirement of art. 1003(b) C.C.P. was met. Therefore, since the criteria of art. 1003(a) and (b) C.C.P. were met and the appellant had admitted that the motion met the criteria set out in art. 1003(c) and (d), the Court of Appeal set aside the motion judge's judgment and authorized the class action.

#### IV. Analysis

##### A. Issues

32 In this appeal, the Court must resolve two issues. First, did the motion judge make an error that justified the Court of Appeal's intervention? Second, if the motion judge erred, we will decide whether the respondent's questions are identical, similar or related within the meaning of art. 1003(a) C.C.P.

##### B. Did the Motion Judge Make an Error That Justified the Court of Appeal's Intervention?

33 Article 1003 C.C.P., which establishes the conditions for authorizing a class action, confers significant discretion on the court hearing a motion for authorization. In its opening words, the expression "if of opinion that" introduces an enumeration of the criteria to be met:

**1003.** The court authorizes the bringing of the class action and ascribes the status of representative to the member it designates if of opinion that:

- (a) the recourses of the members raise identical, similar or related questions of law or fact;
- (b) the facts alleged seem to justify the conclusions sought;
- (c) the composition of the group makes the application of article 59 or 67 difficult or impracticable; and
- (d) the member to whom the court intends to ascribe the status of representative is in a position to represent the members adequately.

34 The Quebec Court of Appeal, mindful of the importance of the motion judge's discretion with respect to the criteria set out in art. 1003 C.C.P., has stated on many occasions that its power to intervene in this regard is limited and that it must show deference to the motion judge's decision. It will therefore intervene in an appeal from a decision on a motion for authorization to institute a class action only if the motion judge erred in law or if the judge's assessment with respect to the criteria of art. 1003 C.C.P. is clearly wrong: *Bouchard c. Agropur coopérative*, 2006 QCCA 1342, [2006] R.J.Q. 2349 (C.A. Que.), at para. 42; *Union des consommateurs c. Bell Canada*, 2012 QCCA 1287, [2012] R.J.Q. 1243 (C.A. Que.), at paras. 45-46; *Harmegnies c. Toyota Canada*, 2008 QCCA 380 (C.A. Que.), at paras. 25-26; *Union des consommateurs c. Bell Canada*, 2010 QCCA 351 (C.A. Que.), at para. 23.

35 A class action may be authorized only if the four criteria of art. 1003 C.C.P. are met. If the motion judge errs in law or if his or her assessment with respect to any criterion of art. 1003 C.C.P. is clearly wrong, the Court of Appeal can substitute its own assessment, but only for that criterion and not for the others. An error in relation to one criterion does not give the Court of Appeal carte blanche to reconsider all the other criteria to be met before the bringing of a class action may be authorized.

36 In the instant case, the appellant argues that the Court of Appeal erred in substituting its own assessment for that of the Superior Court on the basis that the Superior Court had decided certain aspects of the case on the merits. The appellant further argues that even if the motion judge did make such an error, the error did not authorize the Court of Appeal to substitute its own analysis with respect to the identical, similar or related question criterion of art. 1003(a) for that of the motion judge. For the reasons that follow, we are of the opinion that the Court of Appeal was right to intervene.

*i. Role of a Judge Hearing an Application for Authorization to Institute a Class Action*

37 The judge's function at the authorization stage is one of screening motions to ensure that defendants do not have to defend against untenable claims on the merits: *Option consommateurs c. Infineon Technologies AG*, 2013 SCC 59 (S.C.C.), at paras. 59 and 61. However, the law does not impose an onerous burden on the applicant at this stage, as he or she need only establish a "prima facie case", or an "arguable case": *Infineon*, at paras. 61-67; *Marcotte c. Longueuil (Ville)*, 2009 SCC 43, [2009] 3 S.C.R. 65 (S.C.C.), at para. 23. Thus, all the judge must do is decide whether the applicant has shown that the four criteria of art. 1003 C.C.P. are met. If the answer is yes, the class action will be authorized. The Superior Court will then consider the merits of the case. In considering whether the criteria of art. 1003 are met at the authorization stage, the judge is therefore deciding a procedural question. The judge must not deal with the merits of the case, as they are to be considered only after the motion for authorization is granted: *Infineon*, at para. 68; *Marcotte*, at para. 22.

38 Article 1003(a) C.C.P. provides that a class action may be authorized only if the court concludes that "the recourses of the members raise identical, similar or related questions of law or fact". This commonality requirement applies not only in Quebec law, but also in that of all the common law provinces of Canada.

39 We will therefore turn now to the principles to be applied in deciding whether a class action raises a common question that meets the criterion of art. 1003(a). These principles can be found, *inter alia*, in the decisions of this Court and of the Quebec Court of Appeal.

**(a) Principles From Dutton and Rumley**

40 We must consider a few important decisions of this Court. Although they were rendered in cases based on the common law, they are nevertheless often relied on and discussed in decisions of the Quebec courts. However, a few caveats are in order as regards their application in Quebec civil procedure. We will return to this point below.

41 In *Dutton*, this Court laid down certain principles to be applied in deciding whether a class action raises one or more issues that are common to the claims of all the members of a class. McLachlin C.J., writing for the Court, stated the following:

Commonality tests have been a source of confusion in the courts. The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be "common" only where its resolution is necessary to the resolution of each class member's claim. It is not essential that the class members be identically situated *vis-à-vis* the opposing party. Nor is it necessary that common issues predominate over non-common issues or that the resolution of the common issues would be determinative of each class member's claim. However, the class members' claims must share a substantial common ingredient to justify a class action. Determining whether the common issues justify a class action may require the court to examine the significance of the common issues in relation to individual issues. In doing so, the court should remember that it may not always be possible for a representative party to plead the claims of each class member with the same particularity as would be required in an individual suit.

[Emphasis added; para. 39.]

42 Although *Dutton* was based on the procedural law of Alberta, the principles laid down by this Court with respect to the commonality requirement have been applied by the Quebec Court of Appeal on many occasions. In *Collectif de défense des droits de la Montérégie (C.D.D.M.) c. Centre hospitalier régional du Suroît du Centre de santé & des services sociaux du*

*Suroît, 2011 QCCA 826* (C.A. Que.), for example, the Court of Appeal noted that an issue will be considered common for the purposes of art. 1003(a) C.C.P. if addressing the issue enables all the claims to move forward:

[TRANSLATION]

A single common, related or similar issue of law suffices to meet the condition in article 1003(a) CCP if it is significant enough to affect the outcome of the class action; however, it need not be determinative of the final resolution of the case: *Comité d'environnement de la Baie inc. v. Société de l'électrolyse et de chimie de l'Alcan ltée*, [1990] R.J.Q. 655 (CA) at paragraphs 22 and 23. It is sufficient that it allows the claims to move forward without duplication of the judicial analysis (Pierre-Claude Lafond, *Le recours collectif, le rôle du juge et sa conception de la justice* (Cowansville, Que: Yvon Blais, 2006) at 92; *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 at para 39).

It is quite possible that the determination of common issues does not lead to the complete resolution of the case, but that it results instead in small trials at the stage of the individual settlement of the claims. This does not preclude a class action suit. Professor Lafond, *supra*, writes at pages 88-89:

[TRANSLATION]

Differences in members' claims and the possible need for each member to prove the personal damages suffered no longer bar a class action suit. As pragmatically stated by a court magistrate: [TRANSLATION] "In the event of a monetary award, some accounting work would be inevitable, at the most." [paras. 22-23]

See also *Union des consommateurs* (2012), at paras. 67-68.

43 In *Dutton*, this Court also stated that, for there to be a "common issue", success for one member of the class must bring with it a benefit for all the others:

All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent. A class action should not be allowed if class members have conflicting interests. [para. 40]

44 In *Rumley v. British Columbia*, 2001 SCC 69, [2001] 3 S.C.R. 184 (S.C.C.), this Court confirmed the principles from *Dutton*. In the case of the commonality requirement, the purpose of the analysis is to determine "whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis": para. 29, quoting *Dutton*, at para. 39. The Court also stated that a question can remain common even though the answer to the question could be nuanced to reflect individual claims: para. 32.

45 Having regard to the clarifications provided in *Rumley*, it should be noted that the common success requirement identified in *Dutton* must not be applied inflexibly. A common question can exist even if the answer given to the question might vary from one member of the class to another. Thus, for a question to be common, success for one member of the class does not necessarily have to lead to success for all the members. However, success for one member must not result in failure for another.

46 *Dutton* and *Rumley* therefore establish the principle that a question will be considered common if it can serve to advance the resolution of every class member's claim. As a result, the common question may require nuanced and varied answers based on the situations of individual members. The commonality requirement does not mean that an identical answer is necessary for all the members of the class, or even that the answer must benefit each of them to the same extent. It is enough that the answer to the question does not give rise to conflicting interests among the members.

47 There is nothing new about this flexible approach to the commonality requirement. It was adopted by the Saskatchewan Court of Appeal in *Frey v. Bell Mobility Inc.*, 2011 SKCA 136, 377 Sask. R. 156 (Sask. C.A.):

Having regard for these authorities, the common issue requirement, "success for one is success for all", may in appropriate cases be met in circumstances where different results may be possible for different class members, provided there is no

conflict among the class members, in the sense that success for one class member must not mean failure for another. [para. 60]

**(b) Application of the Principles in Light of the C.C.P.**

48 Caution must be exercised when applying the principles from *Dutton* and *Rumley* to the rules of Quebec civil procedure relating to class actions. Although those decisions have now been recognized in Quebec law and have been cited and applied many times by Quebec courts, the issue that is central to this appeal nonetheless shows that it is necessary to clarify the relevance and scope of the principles in question in the context of Quebec procedural law. *Dutton* and *Rumley* certainly provide a general framework for analyzing the application of the commonality requirement, but it must be borne in mind that tests established in a common law context cannot necessarily be imported without adaptation into Quebec civil procedure.

49 To determine how the principles from *Dutton* and *Rumley* apply in Quebec law, we will analyze the wording of the *C.C.P.* first, before considering the principles developed by the Quebec courts.

50 The source of the commonality requirement in Quebec civil procedure is art. 1003 *C.C.P.*, which requires that "the recourses of the members raise identical, similar or related questions of law or fact".

51 Two observations are in order with respect to the wording of art. 1003(a) *C.C.P.* First, this paragraph provides that a class action can be authorized only if the *questions* are common. Nowhere has the legislature stated that there must be common *answers*.

52 Second, if art. 1003(a) is compared with the legislation of the common law provinces, it can be seen that the wording used to establish the commonality requirement is different in the latter. For example, the requirement is expressed in broader and more flexible terms in Quebec's *C.C.P.* than in Ontario's legislation, which requires the existence not merely of similar or related questions, but of "common issues": *Class Proceedings Act*, 1992, S.O. 1992, c. 6, s. 5(1)(c). Moreover, the wording of the Ontario statute is used in the legislation of all the other common law provinces of Canada that have legislated with respect to class actions: *Class Proceedings Act*, S.A. 2003, c. C-16.5, s. 5(1)(c); *Class Proceedings Act*, R.S.B.C. 1996, c. 50, s. 4(1)(c); *The Class Actions Act*, S.S. 2001, c. C-12.01, s. 6(1)(c); *Class Proceedings Act*, C.C.S.M. c. C130, s. 4(c); *Class Proceedings Act*, S.N.S. 2007, c. 28, s. 7(1)(c); *Class Proceedings Act*, R.S.N.B. 2011, c. 125, s. 6(1)(c); *Class Actions Act*, S.N.L. 2001, c. C-18.1, s. 5(1)(c).

53 Although the expression "common issues" is frequently used by Quebec judges and authors, its content is not exactly the same as that of the expression "identical, similar or related questions of law or fact". It would be difficult to argue that a question that is merely "related" or "similar" could always meet the "common issue" requirement of the common law provinces. The test that applies in Quebec law therefore seems to be less stringent. Because of the differences in the wording of the applicable legislation, the case law on class actions from the common law provinces is not determinative where the application of the criterion of art. 1003(a) is concerned.

54 In addition, it can be seen from the Quebec courts' interpretation of art. 1003(a) *C.C.P.* that their approach to the commonality requirement has often been broader and more flexible than the one taken in the common law provinces. The Quebec courts propose a flexible approach to the common interest that must exist among the group's members: P.-C. Lafond, *Le recours collectif comme voie d'accès à la justice pour les consommateurs* (1996), at p. 408.

55 As this Court noted in *Marcotte*, at para. 22, the courts have, by interpreting and applying the criteria of art. 1003 *C.C.P.* broadly, favoured easier access to the class action: see also *Infineon*, at para. 60.

56 In the specific case of the commonality requirement, the Quebec Court of Appeal has consistently favoured a broad definition of the conditions that make it possible to satisfy the requirement of art. 1003(a). It laid the groundwork for this approach in *Comité d'environnement de La Baie Inc. c. Société d'électrolyse & de chimie Alcan Ltée*, [1990] R.J.Q. 655 (C.A. Que.), in which it made the following comment:

But Article 1003 (a) does not require that *all* of the questions of law or of fact in the claims of the members be identical or similar or related. Nor does the article even require that the majority of these questions be identical or similar or related. From the text of the article, it is sufficient if the claims of the members raise *some* questions of law or of fact that are sufficiently similar or sufficiently related to justify a class action. [Italics in original; underlining added; p. 659.]

57 Thus, the Quebec approach to authorization is more flexible than the one taken in the common law provinces, although the latter provinces do generally subscribe to an interpretation that is favourable to the class action. The Quebec approach is also more flexible than the current approach in the United States: *Wal-Mart Stores, Inc. v. Dukes*, 131 S.Ct. 2541 (U.S. Sup. Ct. 2011). As Professor Lafond says, [TRANSLATION] "Quebec procedure surpasses in this regard the procedure of the other Canadian provinces, and of England and the United States, which struggle with the rigid concepts of 'same interest' or 'common interest', and of 'predominance of the common issues'": *Le recours collectif comme voie d'accès à la justice pour les consommateurs*, at p. 408.

58 There is one common theme in the Quebec decisions, namely that the C.C.P.'s requirements for class actions are flexible. As a result, even where circumstances vary from one group member to another, a class action can be authorized if some of the questions are common: *Riendeau c. Cie de la Baie d'Hudson* [2000 CarswellQue 224 (C.A. Que.)], 2000 CanLII 9262, at para. 35; *Comité d'environnement de la Baie*, at p. 659. To meet the commonality requirement of art. 1003(a) C.C.P., the applicant must show that an aspect of the case lends itself to a collective decision and that once a decision has been reached on that aspect, the parties will have resolved a not insignificant portion of the dispute: *Harmegnies*, at para. 54; see also *Lallier c. Volkswagen Canada inc.*, 2007 QCCA 920, [2007] R.J.Q. 1490 (C.A. Que.), at paras. 17-21; *Del Guidice c. Honda Canada inc.*, 2007 QCCA 922, [2007] R.J.Q. 1496 (C.A. Que.), at para. 49; *Kelly c. Communauté des Soeurs de la Charité de Québec*, [1995] J.Q. No. 3377 (C.S. Que.), at para. 33. All that is needed in order to meet the requirement of art. 1003(a) C.C.P. is therefore that there be an identical, related or similar question of law or fact, unless that question would play only an insignificant role in the outcome of the class action. It is not necessary that the question make a complete resolution of the case possible: *Collectif de defense des droits de la Montérégie (CDDM)*, at paras. 22-23.

59 In short, it can be concluded that the common questions do not have to lead to common answers. At the authorization stage, the approach taken to the commonality requirement in Quebec civil procedure is a flexible one. As a result, the criterion of art. 1003(a) may be met even if the common questions raised by the class action require nuanced answers for the various members of the group.

60 In light of these principles, we are of the opinion that the motion judge was mistaken in emphasizing the possibility that numerous individual questions would ultimately have to be analyzed. He should instead have inquired into whether the condition provided for in art. 1003(a) was met, that is, whether the applicant had established the existence of a common question that would serve to advance the resolution of the litigation with respect to all the members of the group, and that would not play an insignificant role in the outcome of the case.

### (c) Places of Residence of the Group's Members

61 The group proposed by the respondent includes 250 retirees or surviving spouses of employees who worked in six provinces: Quebec (134 members), Ontario (82 members), Alberta (3 members), British Columbia (16 members), Saskatchewan (2 members) and Manitoba (13 members). Since no applicable law was designated in the contracts of employment of the various employees, the law of the province where each employee worked would have to apply to that employee's case (art. 3118 of the *Civil Code of Québec*, S.Q. 1991, c. 64 ("C.C.Q.")). According to the motion judge, the multitude of legal schemes applicable to the individual claims is an additional difficulty that demonstrates the proposed group's lack of homogeneity.

62 However, the fact that the employees worked in six different provinces is not in itself a bar to the authorization of the class action. In a class action, the court can accept proof of the law applicable in the common law provinces or take judicial notice of that law: art. 2809 C.C.Q. Only substantial differences between the applicable legal schemes would cause a class action to lose its collective nature: *Union des consommateurs* (2012), at paras. 120 and 123.

63 In the case at bar, the fact that members of the group live in different Canadian provinces should not prevent the court from authorizing the class action. There are common questions in the claims of the members of the proposed group with respect to the legality or the validity of the 2009 amendments.

#### (d) Principle of Proportionality

64 The principle of proportionality, which is recognized in Quebec civil procedure, is set out in art. 4.2 C.C.P.:

**4.2** In any proceeding, the parties must ensure that the proceedings they choose are proportionate, in terms of the costs and time required, to the nature and ultimate purpose of the action or application and to the complexity of the dispute; the same applies to proceedings authorized or ordered by the judge.

65 The appellant submits that an interpretation of art. 1003(a) that encourages a multiplicity of substantive analyses is contrary to the principle of proportionality. It bases its position primarily on the reasons of the majority in *Marcotte*, in which LeBel J. stated that the principle of proportionality must not be limited "to a principle of interpretation that confers no real power on the courts in respect of the conduct of civil proceedings in Quebec": para. 42.

66 In our view, the approach proposed by the appellant is wrong. *Marcotte* confirmed the importance of the principle of proportionality in civil procedure, and as a source of the courts' power to intervene in the management of a case: paras. 42 and 43. In the class action context, however, the judge's discretion in respect of the application of the four criteria of art. 1003 C.C.P. must be reconciled with the power provided for in art. 4.2 C.C.P.: *Bouchard*, at paras. 37, 41 and 44; *Harmegnies*, at paras. 20-22. In our view, insofar as the four criteria set out in art. 1003 C.C.P. are exhaustive, and it is our opinion that they are, the principle of proportionality must be considered in the assessment with respect to each of these criteria. The proportionality of the class action is not a separate fifth criterion.

67 This conclusion is supported by the wording of the legislation and by the case law. In enacting the class action provisions of the C.C.P., the Quebec legislature did not consider it appropriate to require that a class action be the "preferable" procedure for the resolution of the dispute or the common issues, which is the criterion found in the legislation of other provinces. Caution therefore dictates that such a criterion not be introduced indirectly into Quebec's rules of civil procedure. Article 1003 is clear: the motion judge must authorize the class action if he or she is of the opinion that the four criteria are met. The judge does not have to ask whether a class action is the most appropriate procedural vehicle.

68 The Quebec case law leads to the same conclusion. As Baudouin J.A. stated in *Harmegnies*, the judge's discretion [TRANSLATION] "is exercised in the context, and only in the context, of the four requirements established by the legislature": para. 22; see also *Brown c. Roy*, 2012 QCCA 900 (C.A. Que.), at para. 67; *Billette c. Toyota Canada inc.*, 2009 QCCA 2476, [2010] R.J.Q. 66 (C.A. Que.), at para. 44; *St-Germain c. Apple Canada inc.*, 2010 QCCA 1376 (C.A. Que.), at paras. 55-57; P.-C. Lafond, *Le recours collectif, le rôle du juge et sa conception de la justice: impact et évolution* (2006), at pp. 153-54; É. M. David, "La règle de proportionnalité de l'article 4.2 C.p.c. en matière de recours collectif — Premières interprétations jurisprudentielles", in Service de la formation continue du Barreau du Québec, *Développements récents en recours collectifs* (2007), 315, at p. 335. The effect of the principle of proportionality is to reinforce the discretion judges are already acknowledged to have when considering each of the four criteria of art. 1003 C.C.P.: *Marcotte*, at para. 85. However, the motion judge cannot rely on the principle of proportionality to refuse to authorize an action that otherwise meets the established criteria.

#### *ii. Errors Made by the Motion Judge*

69 In assessing the criterion of art. 1003(a) C.C.P., the motion judge made two errors. First, he ruled on the merits of the case by determining that the rights to insurance benefits of certain members of the group had not crystallized. Second, he adopted the wrong methodology by seeking common answers rather than merely identifying one or more questions that were common to the claims of all the members of the proposed group. We will consider each of these errors in turn.

70 It is clear from the motion judge's reasons that he ruled on the merits of the case. When discussing the reasons why the rules governing the retirees' right to insurance benefits would require an individualized analysis, he decided on the right of certain members to receive such benefits following the insertion of the unilateral amendment clause and the making of the 2009 amendments. It is clear from the following paragraphs from his reasons that he considered the merits on certain of the questions raised in the motion for authorization, thereby overstepping the bounds of the function of screening motions to which he should have limited himself:

[TRANSLATION]

The right of the members of Subgroup 2 to post-retirement insurance benefits did not crystallize, since the employer reserved the power to terminate the insurance coverage. A right to resiliate such as this is in fact inconsistent with an intention to confer a vested right.

The section of the 1977 benefit guide entitled "*Termination of Coverage*" / "*Cessation de l'assurance*" indicates clearly that the employer is free to terminate the insurance coverage at any time by resiliating the group insurance contract:

.....

The right of the members of Subgroup 3 to post-retirement insurance benefits did not crystallize, since the employer expressly reserved the right to modify or terminate the insurance coverage.

.....

The right of the members of Subgroup 4 to post-retirement insurance benefits did not crystallize, since the employer expressly reserved the right to modify or terminate the insurance coverage. [Emphasis added; paras. 92, 93, 98 and 103.]

71 The appellant argues that the motion judge expressly stated that he was not ruling on the *prima facie* case requirement of art. 1003(b) C.C.P. and that, as a result, the above-quoted passages cannot be interpreted as decisions on substantive questions. With respect, the appellant is confusing the conclusion required by art. 1003(b) — that the facts alleged in the motion for authorization seem to justify the conclusions being sought — with a ruling on the merits by the motion judge on certain questions. As we have already said, the motion judge performs a function of screening motions; this is a procedural stage that does not involve consideration of the questions on the merits. The motion judge must inquire into whether the four criteria of art. 1003 C.C.P. are met. The questions can be decided on the merits only by the trial judge, after authorization to institute the class action has been granted.

72 The motion judge also took the wrong approach in his analysis with respect to the criterion of art. 1003(a) C.C.P. Rather than determining whether the claims of all the members of the proposed group raised an identical, similar or related question that could serve to advance the resolution of the litigation, he asked whether there were common answers to the questions raised in the motion for authorization to institute a class action. This approach is clear from paras. 69 and 70 of his reasons:

[TRANSLATION]

In the case at bar, the Court finds that because of the large number of questions requiring an individualized analysis for each member of the proposed group, the Applicant's action does not lend itself to a collective resolution.

If the action is authorized, the trial judge will have to conduct a detailed review of a multitude of individual circumstances before he or she will be able to determine whether the 2009 amendments apply to each member of the group.

At the authorization stage, the judge must simply determine whether one or more questions exist that are common to the claims of all the members of the proposed group. As we mentioned above, at this stage, the threshold that must be met to find that there are common questions is a low one.

73 In this case, the errors made by the motion judge warranted the intervention of the Court of Appeal.

***C. Are the Questions Raised in the Motion for Authorization to Institute a Class Action Identical, Similar or Related Within the Meaning of Article 1003(a) C.C.P.?***

74 We have found that the motion judge erred in law in requiring answers that were common to the claims of all the members of the proposed group. As a result, this Court, like the Court of Appeal, must reopen the analysis under art. 1003(a) in light of the applicable principles.

75 In this case, the main question raised in the respondent's motion for authorization to institute a class action is whether the amendments made to the Plan in 2009 are valid or lawful. Those amendments had the effect of reducing, as of January 1, 2009, certain benefits promised to the retirees and surviving spouses. Since the claims of all the group's members are based on the Plan, the question of the validity or the legality of the 2009 amendments arises for all the members. The answer to this question can serve to advance the resolution of all the claims. Hence, there is a common question.

76 A few comments must be made about the existence of subgroups in light of the motion judge's conclusion that the large number of subgroups was a factor that supported the dismissal of the motion for authorization. With respect, that conclusion conflicts with the principles established by the courts regarding the relevance of subgroups at the authorization stage. In several Canadian provinces, including Quebec, the existence of subgroups within the proposed group does not on its own constitute a sufficient basis for refusing to authorize a class action: W. K. Branch, *Class Actions in Canada*, vol. 1 (loose-leaf), at p. 4-103; *Dutton*, at para. 54; *Rumley*, at para. 32. As we mentioned above, the circumstances of the various members of the group can differ as long as the members have no conflicting interests.

77 Moreover, as this Court stated in *Dutton*, if material differences emerge, the court will deal with them at trial: para. 54. The creation of subgroups will become relevant at that stage, when the judge answers the questions in light of the facts applicable to each member of the group. We therefore agree with the Court of Appeal that a subgroup analysis is neither necessary nor relevant at the authorization stage: para. 66.

78 In the instant case, if the review of the claims led to different outcomes for the different subgroups or for different members of the subgroups, that would not necessarily mean that their interests are in conflict. It is more likely that the success or failure of the claims will depend on a key date or a specific term in the subgroup's contract of employment. The possible answers are therefore not mutually exclusive. Success for one subgroup or one member does not mean failure for another. In other words, there are no conflicting interests among the members of the group.

79 In our opinion, there is in this case, as required by art. 1003(a) *C.C.P.*, a question common to the claims of all the members of the proposed group: whether the 2009 amendments are valid or lawful. The answer to this question may have to be nuanced on the basis of the retirement dates of the various members of the group, or of other circumstances specific to individual members.

#### **IV. Conclusion**

80 The validity or legality of the 2009 amendments and the other questions raised by the respondent in his motion for authorization to institute a class action are the type of questions referred to in art. 1003(a) *C.C.P.* Since Vivendi has admitted that the conditions of art. 1003(c) and (d) are met and has not contested the Court of Appeal's decision finding that the one set out in art. 1003(b) is met, all the criteria of art. 1003 *C.C.P.* are met.

81 We would therefore affirm the judgment of the Court of Appeal and dismiss the appeal with costs.

*Appeal dismissed.*

*Pourvoi rejeté.*

Practice --- Parties — Representative or class actions — Procedural requirements

Appeal of dismissal of defendants' application to strike representative action on grounds that plaintiffs failed to establish requisite conditions was dismissed — Defendants' further appeal was dismissed — Discretion was exercised to strike balance between efficiency and fairness — No countervailing considerations existed that outweighed benefits of allowing action to proceed.

Fraud and misrepresentation --- Negligent misrepresentation (Hedley Byrne principle) — Particular relationships — Fiduciary relationship

Appeal of dismissal of defendants' application to strike representative action by foreign investors on grounds they had failed to establish requisite conditions was dismissed — Defendants' further appeal was dismissed — Fiduciary duty issues raised by investors were common to all plaintiffs — Material differences between investors' rights could be dealt with if they arose — Class action was not foreclosed on ground that investors might be required to show individual reliance in order to establish breach of fiduciary duty.

Practice --- Discovery — Examination for discovery — Who may be examined — General

Appeal of dismissal of defendants' application to strike representative action by foreign investors on grounds they had failed to establish requisite conditions was dismissed on further appeal — Plaintiffs cross-appealed decision on appeal that defendants were allowed to discover each individual class member — Cross-appeal allowed — Individualized discovery was premature at this stage of proceeding — Defendants were allowed to discover representative plaintiffs — Discovery of other class members was only available by order of court, upon establishment of reasonable necessity.

Corporations --- Directors and officers — Fiduciary duties — General

Appeal of dismissal of defendants' application to strike representative action by foreign investors on grounds they had failed to establish requisite conditions was dismissed — Defendants' further appeal was dismissed — Fiduciary duty issues raised by investors were common to all plaintiffs — Material differences between investors' rights could be dealt with if they arose — Class action was not foreclosed on ground that investors might be required to show individual reliance in order to establish breach of fiduciary duty.

Procédure --- Parties — Recours collectif — Exigences procédurales

Pourvoi à l'encontre du rejet de la demande des défendeurs de radier le recours collectif parce que les plaignants n'avaient pas prouvé les conditions requises a été rejeté — Nouveau pourvoi des défendeurs a été rejeté — Pouvoir discrétionnaire a été utilisé pour concilier l'efficacité et l'équité — Il n'existe pas d'autres considérations défavorables qui l'emportaient sur les avantages d'autoriser le recours.

Fraude et assertion inexacte --- Assertion négligente et inexacte (principe Hedley Byrne) — Relations particulières — Relation fiduciaire

Pourvoi à l'encontre du rejet de la demande des défendeurs de radier le recours collectif intenté par des investisseurs étrangers sous prétexte que ces derniers n'avaient pas prouvé les conditions requises a été rejeté — Nouveau pourvoi des défendeurs

a été rejeté — Questions relatives à l'obligation fiduciaire soulevées par les investisseurs touchaient tous les demandeurs — Différences importantes entre les droits des investisseurs pouvaient être résolues si elles survenaient — Recours collectif n'a pas été interdit au motif qu'on exigerait peut-être des investisseurs qu'ils démontrent un lien de confiance individuel afin de prouver le manquement à l'obligation fiduciaire.

Procédure --- Communication préalable — Interrogatoire préalable — Qui peut être interrogé — En général  
Pourvoi à l'encontre du rejet de la demande des défendeurs de radier le recours collectif intenté par des investisseurs étrangers sous prétexte que ces derniers n'avaient pas prouvé les conditions requises a été rejeté — Demandeurs ont formé un appel incident à l'encontre de l'appel des défendeurs, lesquels voulaient interroger chaque membre du groupe individuellement — Pourvoi incident accueilli — À ce stade des procédures, l'interrogatoire préalable individuel était prématuré — Défendeurs ne pouvaient qu'interroger les représentants des demandeurs — L'interrogatoire des autres membres du groupe ne pouvait être autorisé que par ordonnance du tribunal, après avoir établi que c'était raisonnablement nécessaire.

Sociétés par actions --- Administrateurs et dirigeants — Obligations fiduciaires — En général

Pourvoi à l'encontre du rejet de la demande des défendeurs de radier le recours collectif intenté par des investisseurs étrangers sous prétexte que ces derniers n'avaient pas prouvé les conditions requises a été rejeté — Nouveau pourvoi des défendeurs a été rejeté — Questions relatives à l'obligation fiduciaire soulevées par les investisseurs touchaient tous les demandeurs — Différences importantes entre les droits des investisseurs pouvaient être résolues si elles survenaient — Recours collectif n'a pas été interdit au motif qu'on exigerait peut-être des investisseurs qu'ils démontrent un lien de confiance individuel afin de prouver le manquement à l'obligation fiduciaire.

The representative plaintiffs, together with 229 other investors, purchased debentures in a corporation under the federal government's business immigration program, in order to facilitate their qualification as Canadian permanent residents. They made their purchases at different times pursuant to different offering memoranda presented to them by different defendants. The corporation invested all of its proceeds into a gold mine, which failed. The plaintiffs lost all of their investment. The plaintiffs commenced a representative action pursuant to R. 42 of the *Alberta Rules of Court* against the defendants for breach of fiduciary duty. The defendants applied to strike the representative action on grounds that the plaintiffs as a group could not show the requisite element of reliance because they invested at different times under different offering memoranda. The application was dismissed on grounds that it was not plain and obvious that the plaintiffs failed to meet the requirements under R. 42 and that the existence of a fiduciary duty was an issue of fact that should be left for the trial judge. The defendants' appeal was dismissed. The defendants appealed.

**Held:** The appeal was dismissed and the cross-appeal was allowed.

Per McLachlin C.J.C. (Arbour, Binnie, Gonthier, Iacobucci, L'Heureux-Dubé and LeBel JJ. concurring): No comprehensive legislative framework currently exists in Alberta respecting class actions. Practice is governed by R. 42 of the *Alberta Rules of Court*, which allows representative actions where "numerous persons have a common interest in the subject of an intended action". Details of class action practice were left to the courts. The common law of Alberta identified four conditions in order for the class action to proceed. First, the class must be capable of clear definition. Secondly, there must be issues of fact or law common to all class members, and the resolution of those issues must be necessary to a resolution of each class member's claim. Thirdly, success for one class member must mean success for all, and no conflicting interests must exist. Finally, the class representatives must adequately represent the class. When these conditions are met, the court should then exercise its discretion to strike a balance between efficiency and fairness. Class actions should not be approached restrictively. The test was not whether it was plain and obvious that an action should not proceed as a class action, under R. 42. Denial of class status under R. 42 did not defeat the claim, it determined how the claim would proceed. No countervailing considerations outweighed the benefits of allowing the action to proceed in this case. The court retained the discretion to deal with any non-common issues among the plaintiffs. As the fiduciary duty issues raised were common to all the investors, the plaintiffs had satisfied the requirements of R. 42. If the court later determined that the investors were required to show individual reliance to establish breach of fiduciary duty, the court could consider at that time whether the action should continue as a class action.

Allowing individualized discovery at this stage of the proceedings was premature. One of the benefits of a class action was that discovery of the class representatives was usually sufficient. Individual discovery of all class members was the exception rather than the rule. The defendants were allowed to examine the representative plaintiffs as of right. Examination of other class members was only available by court order, upon the demonstration by the defendants of reasonable necessity.

Les demandeurs représentants, ainsi que 229 autres investisseurs, ont participé au programme d'immigration des gens d'affaires du gouvernement fédéral en achetant des débentures d'une compagnie, dans le but de faciliter leur obtention du statut de résident permanent du Canada. Ils ont effectué leurs achats à divers moments selon différentes notices d'offre qui leur ont été présentées par divers défendeurs. La compagnie a investi tous ses profits dans une mine d'or, qui a fait faillite. Les demandeurs ont tout perdu. Ils ont alors intenté un recours collectif, conformément à la règle 42 des *Alberta Rules of Court*, à l'encontre des défendeurs pour manquement à leur obligation fiduciaire. Les défendeurs ont demandé que le recours collectif soit radié sous prétexte que les demandeurs, en tant que groupe, ne pouvaient démontrer le lien de confiance requis parce qu'ils ont investi à divers moment selon différentes notices d'offre. La demande a été rejetée au motif qu'il n'était pas clair et évident que les demandeurs n'avaient pas satisfait à toutes les exigences de la règle 42 et aussi parce que l'existence d'une obligation fiduciaire constitue une question de fait qui devait être tranchée par le juge de première instance. Le pourvoi des défendeurs a été rejeté. Ils ont interjeté appel.

**Arrêt:** Le pourvoi a été rejeté et le pourvoi incident a été accueilli.

La juge en chef McLachlin (les juges Arbour, Binnie, Gonthier, Iacobucci, L'Heureux-Dubé et LeBel y souscrivant): À l'heure actuelle, il n'existe en Alberta aucun cadre législatif complet relatif aux recours collectifs. Cette procédure est régie par l'art. 42 des *Alberta Rules of Court* qui permet les recours collectifs lorsque « [traduction] de nombreuses personnes ont un intérêt commun dans l'objet de l'action projetée ». Les détails de la procédure à suivre pour les recours collectifs ont été laissés aux tribunaux. La common law de l'Alberta a identifié quatres conditions à respecter pour que le recours collectif puisse être exercé. Premièrement, le recours collectif doit pouvoir être clairement défini. Deuxièmement, tous les membres du groupe doivent avoir en commun des questions de fait ou de droit, et la résolution de ces questions doit être nécessaire pour résoudre la réclamation de chacun des membres du groupe. Troisièmement, le succès d'un membre du groupe doit se traduire par celui de tous les membres et il ne doit pas exister de conflits d'intérêts. En dernier lieu, les représentants du groupe doivent représenter adéquatement le groupe. Si toutes ces conditions sont réunies, le tribunal peut exercer son pouvoir discrétionnaire pour concilier l'efficacité et l'équité. Les recours collectifs ne devraient pas être abordés de façon restrictive. En vertu de la règle 42, le critère à respecter n'était pas de savoir s'il était clair et évident qu'une poursuite ne pouvait être intentée comme un recours collectif. Le refus du statut de recours collectif en vertu de la règle 42 n'empêchait pas la poursuite, cela ne faisait que déterminer de quelle façon la poursuite serait intentée. En l'espèce, il n'y avait aucune considération défavorable qui l'emportait sur les avantages que comportait l'autorisation du recours. Le tribunal conservait son pouvoir discrétionnaire lui permettant de trancher toutes questions qui n'étaient pas communes à tous les demandeurs. Les demandeurs avaient rempli toutes les conditions de la règle 42 parce que les questions soulevées relatives aux obligations fiduciaires étaient communes à tous les investisseurs. Si le tribunal venait à déterminer que les investisseurs doivent démontrer un lien de confiance individuel pour prouver le manquement à l'obligation fiduciaire, il pourrait, à ce moment-là, décider si le recours doit se poursuivre comme recours collectif.

À ce stade des procédures, il était prématuré de permettre des interrogatoires au préalable individuels. Un des avantages du recours collectif était que l'interrogatoire des représentants du groupe était habituellement suffisant. L'interrogatoire préalable individuel de tous les membres du groupe constitue l'exception et non la règle. Les défendeurs avaient l'autorisation, de plein droit, d'interroger les demandeurs représentants. L'interrogatoire des autres membres du groupe n'était possible que sur ordonnance du tribunal, une fois que les défendeurs auraient prouvé que cela était raisonnablement nécessaire.

## Table of Authorities

### Cases considered by/Jurisprudence citée par *McLachlin C.J.C.*:

- Bell v. Wood*, 38 B.C.R. 310, [1927] 1 W.W.R. 580, [1927] 2 D.L.R. 827 (B.C. S.C.) — referred to
- Bywater v. Toronto Transit Commission* (1998), 27 C.P.C. (4th) 172 (Ont. Gen. Div.) — referred to
- Chancey v. May* (1722), Prec. Ch. 592, 24 E.R. 265, 2 Eq. Ca. Abr. 168 (Eng. Ch.) — referred to
- City of London v. Richmond* (1701), 2 Vern. 421, 23 E.R. 870 (Eng. Ch.) — referred to
- Drummond-Jackson v. British Medical Assn.*, [1970] 1 All E.R. 1094, [1970] 1 W.L.R. 688 (Eng. C.A.) — considered
- Duke of Bedford v. Ellis* (1900), [1901] A.C. 1 (U.K. H.L.) — referred to
- Guarantee Co. of North America v. Caisse populaire de Shippagan Ltée* (1988), 86 N.B.R. (2d) 342, 219 A.P.R. 342 (N.B. Q.B.) — referred to
- Hodgkinson v. Simms*, [1994] 9 W.W.R. 609, 49 B.C.A.C. 1, 80 W.A.C. 1, 22 C.C.L.T. (2d) 1, 16 B.L.R. (2d) 1, 6 C.C.L.S. 1, 57 C.P.R. (3d) 1, 5 E.T.R. (2d) 1, [1994] 3 S.C.R. 377, 95 D.T.C. 5135, 97 B.C.L.R. (2d) 1, 117 D.L.R. (4th) 161, 171 N.R. 245 (S.C.C.) — referred to

*Horne v. Canada (Attorney General)* (1995), 39 C.P.C. (3d) 38, 129 Nfld. & P.E.I.R. 109, 402 A.P.R. 109 (P.E.I. T.D.) — referred to

*Hunt v. T & N plc*, 4 C.C.L.T. (2d) 1, 43 C.P.C. (2d) 105, 117 N.R. 321, 4 C.O.H.S.C. 173 (headnote only), (sub nom. *Hunt v. Carey Canada Inc.*) [1990] 6 W.W.R. 385, 49 B.C.L.R. (2d) 273, (sub nom. *Hunt v. Carey Canada Inc.*) 74 D.L.R. (4th) 321, [1990] 2 S.C.R. 959 (S.C.C.) — referred to

MOTIFS SUPPLÉMENTAIRES de la décision rendue le 13 décembre 2000, Doc. 27138 (C.S.C.), infirmant en partie l'arrêt publié à [228 A.R. 188, 188 W.A.C. 188, \[1998\] A.J. No 1364, 30 C.P.C. \(4th\) 1, 73 Alta. L.R. \(3d\) 227, 1998 ABCA 392](#) (Alta. C.A.) qui a confirmé le jugement publié à 41 Alta. L.R. (3d) 412, [191 A.R. 265, 3 C.P.C. \(4th\) 329, 1996 CarswellAlta 690, \[1996\] A.J. No 1165](#) (Alta. Q.B.), qui avait rejeté le demande des défendeurs de radier le recours collectif.

**The judgment of the court was delivered by McLachlin C.J.C.:**

1 This appeal requires us to decide when a class action may be brought. While the class action has existed in one form or another for hundreds of years, its importance has increased of late. Particularly in complicated cases implicating the interests of many people, the class action may provide the best means of fair and efficient resolution. Yet absent legislative direction, there remains considerable uncertainty as to the conditions under which a court should permit a class action to be maintained.

2 The claimants wanted to immigrate to Canada. To qualify, they invested money in Western Canadian Shopping Centres Inc., under the Canadian government's Business Immigration Program. They lost money and brought a class action. The defendants (appellants) claim the class action is inappropriate and ask the Court to strike it out. For the following reasons, I conclude that the claimants may proceed as a class.

**I. Facts**

3 The representative plaintiffs Muh-Min Lin and Hoi-Wah Wu, together with 229 other investors, became participants in the government's Business Immigration Program of Employment and Immigration Canada by purchasing debentures in Western Canadian Shopping Centres Inc. ("WCSC"). WCSC was incorporated by Joseph Dutton, its sole shareholder, for the purpose

of "facilitat[ing] the qualification of the Investors, their spouses, and their never-married children as Canadian permanent residents."

4 WCSC solicited funds through two offerings "to invest in land located in the Province of Saskatchewan for the purpose of developing commercial, non-residential, income-producing properties". The offering memoranda provided that the subscription proceeds would be deposited with an escrow agent, later designated as The Royal Trust Company ("Royal Trust"), and would be released to WCSC upon conditions, subsequently amended.

5 The dispute arises from events after the investors' funds had been deposited with Royal Trust. In May 1990, WCSC entered into a Purchase and Development Agreement ("PDA") with Claude Resources Inc. ("Claude") under which WCSC purchased from Claude, for \$5,550,000, the rights to a Crown surface lease adjacent to Claude's "Seabee" gold deposits in northern Saskatchewan. WCSC also agreed to commit a further \$16.5 million for surface improvements and for the construction of a gold mill, which would be owned by WCSC. A lease agreement executed in tandem with the PDA leased the not-yet-constructed gold mill and related facilities, together with the surface lands, back to Claude. The payments required of Claude under that lease agreement matched the semi-annual interest payments required of WCSC with respect to the investors.

6 To finance WCSC's obligations under the PDA with Claude, Dutton directed Royal Trust to issue debentures in an aggregate principal amount of \$22,050,000 to a subset of the investors who had subscribed by that point. Royal Trust did so by issuing "Series A" debentures to 142 investors. After the debentures were issued, WCSC distributed an update letter to its investors, describing the investment in Claude.

7 In a separate series of transactions executed around the same time, Dutton and Claude entered into an agreement by which (1) Dutton effectively conveyed to Claude 49 percent of his shares in WCSC; (2) Claude paid Dutton \$1.6 million in cash; (3) Claude advanced Dutton a \$1.6 million non-recourse loan; (4) Dutton entered into an employment contract with Claude for a salary of \$50,000 per year; and (5) Claude and Dutton's management company, J.M.D. Management Ltd., entered into a management contract for \$200,000 per year. It appears that WCSC did not distribute an update letter to its investors describing this series of transactions.

8 Over the next months, Dutton advanced more funds to Claude and directed Royal Trust to issue corresponding debentures. Of particular relevance to the instant dispute are the Series E debentures issued in December 1990 (aggregate principal of \$2.56 million), and the Series F debentures issued in May 1991 (aggregate principal of \$9.45 million). When the Series E debentures were issued, the Series A and E debentures were pooled, so that investors in those series became entitled to a *pro rata* claim on the total security pledged with respect to the two series. When the Series F debentures were issued, the security for that series was pooled with the security that had been pledged with respect to the Series A and E debentures. WCSC apparently distributed investor update letters after the issuance of the Series E and F debentures, just as it had done after the issuance of the Series A debentures.

9 In December 1991, Claude announced that it could not pay the interest due on the Series A, E, and F debentures and Mu-Hin and Hoi-Wah commenced this action. The gravamen of the complaint is that Dutton and various affiliates and advisors of WCSC breached fiduciary duties to the investors by mismanaging or misdirecting their funds.

## II. Statutory Provisions

10 *Alberta Rules of Court*, Alta. Reg. 390/68

**42** Where numerous persons have a common interest in the subject of an intended action, one or more of those persons may sue or be sued or may be authorized by the Court to defend on behalf of or for the benefit of all.

**129** (1) The court may at any stage of the proceedings order to be struck out or amended any pleading in the action, on the ground that

(a) it discloses no cause of action or defence, as the case may be, or

- (b) it is scandalous, frivolous or vexatious, or
- (c) it may prejudice, embarrass or delay the fair trial of the action, or
- (d) it is otherwise an abuse of the process of the court,

and may order the action to be stayed or dismissed or judgment to be entered accordingly.

(2) No evidence shall be admissible on an application under clause (a) of subrule (1).

(3) This Rule, so far as applicable, applies to an originating notice and a petition.

**187.** A person for whose benefit an action is prosecuted or defended or the assignor of a chose in action upon which the action is brought, shall be regarded as a party thereto for the purposes of discovery of documents.

**201** A member of a firm which is a party and a person for whose benefit an action is prosecuted or defended shall be regarded as a party for the purposes of examination.

### III. Decisions

11 The appellants applied to the Court of Queen's Bench of Alberta ([1996](#), [41 Alta. L.R. \(3d\)](#) [412](#) (Alta. Q.B.) for a declaration and order striking that portion of the Amended Statement of Claim in which the individual plaintiffs purport, pursuant to Rule 42 of the *Alberta Rules of Court*, to represent a class of 231 investors. The chambers judge identified four issues: (1) whether the court had the power under Rule 42 to strike the investors' claim to sue in a representative capacity; (2) whether the court was restricted to considering only the Amended Statement of Claim filed; (3) the standard of proof required to compel the court to exercise its discretion to strike the representative claim; and (4) whether, in this case, this standard was met.

12 On the first issue, the chambers judge relied on the decision of Master Funduk in *353850 Alberta Ltd. v. Horne & Pitfield Foods Ltd.* ([July 31, 1989](#)), [Doc. JDE 8803-26537](#) (Alta. Master), to conclude that the court has the power, under Rule 42, to strike a claim made by plaintiffs to sue in a representative capacity.

13 On the second issue, the chambers judge held that the court need not limit its inquiry to the pleadings, relying on *353850 Alberta, supra*, and on the decision of the British Columbia Supreme Court in *Shaw v. Vancouver Real Estate Board* ([1972](#)), [29 D.L.R. \(3d\)](#) [774](#) (B.C. S.C.). He concluded, however, that resolution of the case before him did not require resort to the affidavit evidence.

14 On the third issue, the chambers judge concluded that the court should strike a representative claim under Rule 42 only if it is "entirely clear" or "beyond doubt" or "plain and obvious" that the claim is deficient — the standard applied to applications to strike pleadings for disclosing no reasonable claim: *Hunt v. T & N plc*, [[1990](#)] [2 S.C.R. 959](#) (S.C.C.).

15 On the final issue, the chambers judge, applying the "plain and obvious" rule, concluded that the Amended Statement of Claim was not deficient under Rule 42 and met the requirements set out in *Korte v. Deloitte, Haskins & Sells* ([1993](#)), [8 Alta. L.R. \(3d\)](#) [337](#) (Alta. C.A.): (1) that the class be capable of clear and definite definition; (2) that the principal issues of law and fact be the same; (3) that one plaintiff's success would necessarily mean success for all members of the plaintiff class; and (4) that the resolution of the dispute not require any individual assessment of the claims of individual class members. However, he left the matter open to review by the trial judge.

16 The Alberta Court of Appeal, *per* Russell J.A. (for the majority), dismissed the appeal, Picard J.A., dissenting: ([1998](#)), [73 Alta. L.R. \(3d\)](#) [227](#) (Alta. C.A.). The majority rejected the argument that the chambers judge should have conclusively resolved the Rule 42 issue rather than left it open to the trial judge, citing *Pasco v. Canadian National Railway*, [[1989](#)] [2 S.C.R. 1069](#) (S.C.C.), in which this Court left to the trial judge the issue of whether the plaintiffs were authorized to sue on behalf of a broader class. The majority also rejected the argument that the investors must show individual reliance to succeed. However, it

granted the defendants the right to discovery from each of the 231 plaintiffs on the grounds that Rule 201, read with Rule 187, allows discovery from any person for whose benefit an action is prosecuted or defended and that the defendants should not be barred from developing an argument based on actual reliance merely because it was speculative.

17 Picard J.A., would have allowed the appeal. In her view, the Chambers judge erred in deferring the matter to the trial judge because, unlike *Pasco*, the case was narrow and "a great deal of relevant evidence was available to the court to allow it to make a decision" (p. 235). The need to show individual reliance was only one of many problems that the investors would face if allowed to proceed as a class. Citing this Court's decisions in *International Corona Resources Ltd. v. Lac Minerals Ltd.*, [1989] 2 S.C.R. 574 (S.C.C.), and *Hodgkinson v. Simms*, [1994] 3 S.C.R. 377 (S.C.C.), she concluded that "[t]he extent of fiduciary duties in a particular case requires a meticulous examination of the facts, particularly of any contract between the parties" (p. 237). She concluded that "[t]his responsibility of proof by the [investors] cannot possibly be met by a representative action nor by giving a right of discovery of the 229 other parties to the action" (*idem*).

#### IV. Issues

18

1. Did the courts below apply the proper standard in determining whether the investors had satisfied the requirements for a class action under Rule 42?
2. Did the courts below err in denying defendants' motion to strike under Rule 42?
3. If the class action is allowed, should the defendants have the right to full oral and documentary discovery of all class members?

#### V. Analysis

##### A. The History and Functions of Class Actions

19 The class action originated in the English courts of equity in the late seventeenth and early eighteenth centuries. The courts of law focussed on individual questions between the plaintiff and the defendant. The courts of equity, by contrast, applied a rule of compulsory joinder, requiring all those interested in the subject matter of the dispute to be made parties. The aim of the courts of equity was to render "complete justice" — that is, to "arrange[] all the rights, which the decision immediately affects": F. Calvert, *A Treatise Upon the Law Respecting Parties to Suits in Equity* (1837), at p. 3; see also C.A. Wright, A.R. Miller and M.K. Cane, *Federal Practice and Procedure* (2nd ed. 1986), § 1751; J. Story, *Equity Pleadings* (10th ed. 1892), at s. 76a. The compulsory-joinder rule "allowed the Court to examine every facet of the dispute and thereby ensure that no one was adversely affected by its decision without first having had an opportunity to be heard": J.A. Kazanjian, "Class Actions in Canada" (1973), 11 *Osgoode Hall L.J.* 397, at p. 400. The rule possessed the additional advantage of preventing a multiplicity of duplicative proceedings.

20 The compulsory-joinder rule eventually proved inadequate. Applied to conflicts between tenants and manorial lords or between parsons and parishioners, it closed the door to the courts where interested parties in such cases were too numerous to be joined. The courts of equity responded by relaxing the compulsory-joinder rule where strict adherence would work injustice. The result was the representative action. For example, in *Chancey v. May* (1722), Prec. Ch. 592, 24 E.R. 265 (Eng. Ch.), members of a partnership were permitted to sue on behalf of themselves and some 800 other partners for misapplication and embezzlement of funds by the partnership's former treasurer and manager. The court allowed the action because "it was in behalf of themselves, and all others the proprietors of the same undertaking, except the defendants, and so all the rest were in effect parties," and because "it would be impracticable to make them all parties by name, and there would be continual abatements by death and otherwise, and no coming at justice, if all were to be parties" (p. 265); see also Kazanjian, *supra*, at p. 401; G.T. Bispham, *The Principles of Equity* (8th ed. 1909), at para. 415; S.C. Yeazell, "[Group Litigation and Social Context: Toward a History of the Class Action](#)" (1977), 77 *Colum. L. Rev.* 866, at pp. 867 and 872; J.K. Bankier, "Class Actions for Monetary Relief in Canada: Formalism or Function?" (1984), 4 *Windsor Y.B. Access Just.* 229, at p. 236.

21 The representative or class action proved useful in pre-industrial English commercial litigation. The modern limited-liability company had yet to develop, and collectives of business people had no independent legal existence. Satisfying the compulsory-joinder rule would have required a complainant to bring before the court each member of the collective. The representative action provided the solution to this difficulty: see Kazanjian, *supra*, at p. 401; Yeazell, *supra*, at p. 867; *City of London v. Richmond* (1701), 2 Vern. 421, 23 E.R. 870 (Eng. Ch.) (allowing the plaintiff to sue trustees for rent owed, though the beneficiaries of the trust were not joined).

22 The class action required a common interest between the class members. Many of the early representative actions were brought in the form of "bills of peace," which could be maintained where the interested individuals were numerous, all members of the group possessed a common interest in the question to be adjudicated, and the representatives could be expected fairly to advocate the interests of all members of the group: see Wright, Miller and Kane, *supra*, at § 1751; Z. Chafee, *Some Problems of Equity* (1950), at p. 201, T.A. Roberts, *The Principles of Equity* (3rd ed. 1877), at pp. 389-92; Bispham, *supra*, at para. 417.

23 The courts of equity applied a liberal and flexible approach to whether a class action could proceed. They "continually sought a proper balance between the interests of fairness and efficiency": Kazanjian, *supra*, at p. 411. As stated in *Wallworth v. Holt* (1841), 4 My. & Cr. 619, 41 E.R. 238 (Eng. Ch. Div.), at p. 244, "it [is] the duty of this Court to adapt its practice and course of proceeding to the existing state of society, and not by too strict an adherence to forms and rules, established under different circumstances, to decline to administer justice, and to enforce rights for which there is no other remedy".

24 This flexible and generous approach to class actions prevailed until the fusion of law and equity under the *Supreme Court of Judicature Act, 1873* (U.K.), 36 & 37 Vict., c. 66, and the adoption of Rule 10 of the *Rules of Procedure*:

10. Where there are numerous parties having the same interest in one action, one or more of such parties may sue or be sued, or may be authorised by the Court to defend in such actions, on behalf or for the benefit of all parties so interested.

While early cases under the new rules maintained a liberal approach to class actions (see, e.g., *Duke of Bedford v. Ellis* (1900), [1901] A.C. 1 (U.K. H.L.); *Taff Vale Railway v. Amalgamated Society of Railway Servants*, [1901] A.C. 426 (U.K. H.L.)), later cases sometimes took a restrictive approach (see, e.g., *Markt & Co. v. Knight Steamship Co.*, [1910] 2 K.B. 1021 (Eng. K.B.)). This, combined with the widespread use of limited-liability companies, resulted in fewer class actions being brought.

25 The class action did not forever languish, however. Conditions emerged in the latter part of the twentieth century that once again invoked its utility. Mass production and consumption revived the problem that had motivated the development of the class action in the eighteenth century — the problem of many suitors with the same grievance. As in the eighteenth century, insistence on individual representation would often have precluded effective litigation. And, as in the eighteenth century, the class action provided the solution.

26 The class action plays an important role in today's world. The rise of mass production, the diversification of corporate ownership, the advent of the mega-corporation, and the recognition of environmental wrongs have all contributed to its growth. A faulty product may be sold to numerous consumers. Corporate mismanagement may bring loss to a large number of shareholders. Discriminatory policies may affect entire categories of employees. Environmental pollution may have consequences for citizens all over the country. Conflicts like these pit a large group of complainants against the alleged wrongdoer. Sometimes, the complainants are identically situated *vis-à-vis* the defendants. In other cases, an important aspect of their claim is common to all complainants. The class action offers a means of efficiently resolving such disputes in a manner that is fair to all parties.

27 Class actions offer three important advantages over a multiplicity of individual suits. First, by aggregating similar individual actions, class actions serve judicial economy by avoiding unnecessary duplication in fact-finding and legal analysis. The efficiencies thus generated free judicial resources that can be directed at resolving other conflicts, and can also reduce the costs of litigation both for plaintiffs (who can share litigation costs) and for defendants (who need litigate the disputed issue only once, rather than numerous times): see W.K. Branch, *Class Actions in Canada* (1998), at para. 3.30; M.A. Eizenga, M.J.

Peerless and C.M. Wright, *Class Actions Law and Practice* (1999), at § 1.6; Bankier, *supra*, at pp. 230-31; Ontario Law Reform Commission, *Report on Class Actions* (1982), at pp. 118-19.

28 Second, by allowing fixed litigation costs to be divided over a large number of plaintiffs, class actions improve access to justice by making economical the prosecution of claims that would otherwise be too costly to prosecute individually. Without class actions, the doors of justice remain closed to some plaintiffs, however strong their legal claims. Sharing costs ensures that injuries are not left unremedied: see Branch, *supra*, at para. 3.40; Eizenga, Peerless and Wright, *supra*, at § 1.7; Bankier, *supra*, at pp. 231-32; Ontario Law Reform Commission, *supra*, at pp. 119-22.

29 Third, class actions serve efficiency and justice by ensuring that actual and potential wrongdoers do not ignore their obligations to the public. Without class actions, those who cause widespread but individually minimal harm might not take into account the full costs of their conduct, because for any one plaintiff the expense of bringing suit would far exceed the likely recovery. Cost-sharing decreases the expense of pursuing legal recourse and accordingly deters potential defendants who might otherwise assume that minor wrongs would not result in litigation: see "Developments in the Law — The Paths of Civil Litigation: IV. Class Action Reform: An Assessment of Recent Judicial Decisions and Legislative Initiatives" (2000), 113 *Harv. L. Rev.* 1806, at pp. 1809-10; see Branch, *supra*, at para. 3.50; Eizenga, Peerless and Wright, *supra*, at § 1.8; Bankier, *supra*, at p. 232; Ontario Law Reform Commission, *supra*, at pp. 11 and 140-46.

### ***B. The Test for Class Actions***

30 In recognition of the modern importance of representative litigation, many jurisdictions have enacted comprehensive class action legislation. In the United States, Federal Rule of Civil Procedure 28 U.S.C.A. § 23 (introduced in 1938 and substantially amended in 1966) addressed aspects of class action practice, including certification of litigant classes, notice, and settlement. The English procedural rules of 1999 include detailed provisions governing "Group Litigation": United Kingdom, *Civil Procedure Rules 1998*, SI 1998/3132, rr. 19.10-19.15. And in Canada, the provinces of British Columbia, Ontario, and Quebec have enacted comprehensive statutory schemes to govern class action practice: see British Columbia *Class Proceedings Act*, R.S.B.C. 1996, c. 50; Ontario *Class Proceedings Act*, 1992, S.O. 1992, c. 6; Quebec *Code of Civil Procedure*, R.S.Q., c. C-25, Book IX. Yet other Canadian provinces, including Alberta and Manitoba, are considering enacting such legislation: see Manitoba Law Reform Commission, Report #100, *Class Proceedings* (January 1999); Alberta Law Reform Institute, Final Report No. 85, *Class Actions* (December 2000); see also R. Rogers, "A Uniform Class Actions Statute", Appendix O to the Proceedings of the 1995 Meeting of The Uniform Law Conference of Canada.

31 Absent comprehensive codes of class action procedure, provincial rules based on Rule 10, Schedule, of the English *Supreme Court of Judicature Act*, 1873 govern. This is the case in Alberta, where class action practice is governed by Rule 42 of the *Alberta Rules of Court*:

**42** Where numerous persons have a common interest in the subject of an intended action, one or more of those persons may sue or be sued or may be authorized by the Court to defend on behalf of or for the benefit of all.

The intention of the Alberta legislature is clear. Class actions may be brought. Details of class action practice, however, are largely left to the courts.

32 Alberta's Rule 42 does not specify what is meant by "numerous" or by "common interest". It does not say when discovery may be made of class members other than the representative. Nor does it specify how notice of the suit should be conveyed to potential class members, or how a court should deal with the possibility that some potential class members may desire to "opt out" of the class. And it does not provide for costs, or for the distribution of the fund should an action for money damages be successful.

33 Clearly, it would be advantageous if there existed a legislative framework addressing these issues. The absence of comprehensive legislation means that courts are forced to rely heavily on individual case management to structure class proceedings. This taxes judicial resources and denies the parties *ex ante* certainty as to their procedural rights. One of the main weaknesses of the current Alberta regime is the absence of a threshold "certification" provision. In British Columbia, Ontario,

and Quebec, a class action may proceed only after the court certifies that the class and representative meet certain requirements. In Alberta, by contrast, courts effectively certify *ex post*, only after the opposing party files a motion to strike. It would be preferable if the appropriateness of the class action could be determined at the outset by certification.

34 Absent comprehensive legislation, the courts must fill the void under their inherent power to settle the rules of practice and procedure as to disputes brought before them: *Bell v. Wood*, [1927] 1 W.W.R. 580 (B.C. S.C.), at pp. 581-82; *Langley v. North West Water Authority*, [1991] 3 All E.R. 610 (Eng. C.A.), leave denied, [1991] W.L.R. 711n (Eng. H.L.); *N.A.P.E. v. Newfoundland (Treasury Board)* (1995), 132 Nfld. & P.E.I.R. 205 (Nfld. T.D.); W.A. Stevenson and J.E. Côté, *Civil Procedure Guide*, 1996, at p. 4. However desirable comprehensive legislation on class action practice may be, if such legislation has not been enacted, the courts must determine the availability of the class action and the mechanics of class action practice.

35 Alberta courts moved to fill the procedural vacuum in *Korte*, *supra*. *Korte* prescribed four conditions for a class action: (1) the class must be capable of clear and definite definition; (2) the principal issues of fact and law must be the same; (3) success for one of the plaintiffs must mean success for all; and (4) no individual assessment of the claims of individual plaintiffs need be made.

36 The *Korte* criteria loosely parallel the criteria applied in other Canadian jurisdictions in which comprehensive class-action legislation has yet to be enacted: see, e.g., *Ranjoy Sales & Leasing Ltd. v. Deloitte, Haskins & Sells*, [1984] 4 W.W.R. 706 (Man. Q.B.); *International Capital Corp. v. Schafer* (1995), 130 Sask. R. 23 (Sask. Q.B.); *Guarantee Co. of North America v. Caisse populaire de Shippagan Ltée* (1988), 86 N.B.R. (2d) 342 (N.B. Q.B.); *Lee v. OCCO Developments Ltd.* (1994), 148 N.B.R. (2d) 321 (N.B. Q.B.); *Van Audenhove v. Nova Scotia (Attorney General)* (1994), 134 N.S.R. (2d) 294 (N.S. S.C.), at para. 7; *Horne v. Canada (Attorney General)* (1995), 129 Nfld. & P.E.I.R. 109 (P.E.I. T.D.), at para. 24.

37 The *Korte* criteria also bear resemblance to the class-certification criteria in the British Columbia, Ontario, and Quebec class action statutes. Under the British Columbia and Ontario statutes, an action will be certified as a class proceeding if (1) the pleadings or the notice of application disclose a cause of action; (2) there is an identifiable class of two or more persons that would be represented by the class representative; (3) the claims or defences of the class members raise common issues (in British Columbia, "whether or not those common issues predominate over issues affecting only individual members"); (4) a class proceeding would be the preferable procedure for the resolution of common issues; and (5) the class representative would fairly represent the interests of the class, has advanced a workable method of advancing the proceeding and notifying class members, and does not have, on the common issues for the class, an interest in conflict with other class members: see Ontario *Class Proceedings Act*, 1992, s. 5(1); British Columbia *Class Proceedings Act*, s. 4(1). Under the Quebec statute, an action will be certified as a class proceeding if (1) the recourses of the class members raise identical, similar, or related questions of law or fact; (2) the alleged facts appear to warrant the conclusions sought; (3) the composition of the group makes joinder impracticable; and (4) the representative is in a position to adequately represent the interests of the class members: see Quebec *Code of Civil Procedure*, art. 1003.

38 While there are differences between the tests, four conditions emerge as necessary to a class action. First, the class must be capable of clear definition. Class definition is critical because it identifies the individuals entitled to notice, entitled to relief (if relief is awarded), and bound by the judgment. It is essential, therefore, that the class be defined clearly at the outset of the litigation. The definition should state objective criteria by which members of the class can be identified. While the criteria should bear a rational relationship to the common issues asserted by all class members, the criteria should not depend on the outcome of the litigation. It is not necessary that every class member be named or known. It is necessary, however, that any particular person's claim to membership in the class be determinable by stated, objective criteria: see Branch, *supra*, at paras. 4.190-4.207; Friedenthal, Kane and Miller, *supra*, at pp. 726-27; *Bywater v. Toronto Transit Commission* (1998), 27 C.P.C. (4th) 172 (Ont. Gen. Div.), at paras. 10-11.

39 Second, there must be issues of fact or law common to all class members. Commonality tests have been a source of confusion in the courts. The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be "common" only where its resolution is necessary to the resolution of each class member's claim. It is not essential that the class

members be identically situated *vis-à-vis* the opposing party. Nor is it necessary that common issues predominate over non-common issues or that the resolution of the common issues would be determinative of each class member's claim. However, the class members' claims must share a substantial common ingredient to justify a class action. Determining whether the common issues justify a class action may require the court to examine the significance of the common issues in relation to individual issues. In doing so, the court should remember that it may not always be possible for a representative party to plead the claims of each class member with the same particularity as would be required in an individual suit.

40 Third, with regard to the common issues, success for one class member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent. A class action should not be allowed if class members have conflicting interests.

41 Fourth, the class representative must adequately represent the class. In assessing whether the proposed representative is adequate, the court may look to the motivation of the representative, the competence of the representative's counsel, and the capacity of the representative to bear any costs that may be incurred by the representative in particular (as opposed to by counsel or by the class members generally). The proposed representative need not be "typical" of the class, nor the "best" possible representative. The court should be satisfied, however, that the proposed representative will vigorously and capably prosecute the interests of the class: see Branch, *supra*, at paras. 4.210-4.490; Friedenthal, Kane and Miller, *supra*, at pp. 729-32.

42 While the four factors outlined must be met for a class action to proceed, their satisfaction does not mean that the court must allow the action to proceed. Other factors may weigh against allowing the action to proceed in representative form. The defendant may wish to raise different defences with respect to different groups of plaintiffs. It may be necessary to examine each class member in discovery. Class members may raise important issues not shared by all members of the class. Or the proposed class may be so small that joinder would be a better solution. Where such countervailing factors exist, the court has discretion to decide whether the class action should be permitted to proceed, notwithstanding that the essential conditions for the maintenance of a class action have been satisfied.

43 The class action codes that have been adopted by British Columbia and Ontario offer some guidance as to factors that would generally *not* constitute arguments against allowing an action to proceed as a representative one. Both state that certification should not be denied on the grounds that: (1) the relief claimed includes a demand for money damages that would require individual assessment after determination of the common issues; (2) the relief claimed relates to separate contracts involving different members of the class; (3) different class members seek different remedies; (4) the number of class members or the identity of every class member is unknown; or (5) the class includes subgroups that have claims or defences that raise common issues not shared by all members of the class: see Ontario *Class Proceedings Act*, 1992, s. 6; British Columbia *Class Proceedings Act*, s. 7; see also Alberta Law Reform Institute, *supra*, at pp. 75-76. Common sense suggests that these factors should no more bar a class action suit in Alberta than in Ontario or British Columbia.

44 Where the conditions for a class action are met, the court should exercise its discretion to disallow it for negative reasons in a liberal and flexible manner, like the courts of equity of old. The court should take into account the benefits the class action offers in the circumstances of the case as well as any unfairness that class proceedings may cause. In the end, the court must strike a balance between efficiency and fairness.

45 The need to strike a balance between efficiency and fairness belies the suggestion that a class action should be struck only where the deficiency is "plain and obvious", as the Chambers judge held. Unlike Rule 129, which is directed at the question of *whether* the claim should be prosecuted at all, Rule 42 is directed at the question of *how* the claim should be prosecuted. The "plain and obvious" standard is appropriate where the result of striking is to forever end the action. It recognizes that a plaintiff "should not be 'driven from the judgment seat' at this very early stage unless it is quite plain that his alleged cause of action has no chance of success": *Drummond-Jackson v. British Medical Assn.*, [1970] 1 All E.R. 1094 (Eng. C.A.), at pp. 1101-2 (quoted in *Hunt*, *supra*). Denial of class status under Rule 42, by contrast, does not defeat the claim. It merely places the plaintiffs in the position of any litigant who comes before the court in his or her individual capacity. Moreover, nothing in Alberta's rules suggests that class actions should be disallowed only where it is plain and obvious that the action should

not proceed as a representative one. Rule 42 and the analogous rules in other provinces merely state that a representative may maintain a class action *if* certain conditions are met.

46 The need to strike a balance between efficiency and fairness also belies the suggestion that class actions should be approached restrictively. The defendants argue that *Naken v. General Motors of Canada Ltd.*, [1983] 1 S.C.R. 72 (S.C.C.), precludes a generous approach to class actions. I respectfully disagree. First, when *General Motors of Canada Ltd.* was decided, the modern class action was very much an untested procedure in Canada. In the intervening years, the importance of the class action as a procedural tool in modern litigation has become manifest. Indeed, the reform that has been effected since *General Motors of Canada Ltd.* has been motivated in large part by the recognition of the benefits that class actions can offer the parties, the court system, and society: see, e.g., Ontario Law Reform Commission, *supra*, at pp. 3-4.

47 Second, *General Motors of Canada Ltd.* on its facts invited caution. The action was brought on behalf of all persons who purchased new 1971 or 1972 Firenza motor vehicles in Ontario. The complaint was that General Motors had misrepresented the quality of the vehicles and that the vehicles "were not reasonably fit for use." The statement of claim alleged breach of warranty and breach of representation, and sought \$1,000 in damages for each of approximately 4,600 plaintiffs. Estey J., writing for a unanimous Court, disallowed the class action. While each plaintiff raised the same claims against the defendant, the resolution of those claims would have required particularized evidence and fact-finding at both the liability and damages stages of the litigation. Far from avoiding needless duplication, a class action would have unnecessarily complicated the resolution of what amounted to 4,600 individual claims.

48 To summarize, class actions should be allowed to proceed under Alberta's Rule 42 where the following conditions are met: (1) the class is capable of clear definition; (2) there are issues of fact or law common to all class members; (3) success for one class member means success for all; and (4) the proposed representative adequately represents the interests of the class. If these conditions are met the court must also be satisfied, in the exercise of its discretion, that there are no countervailing considerations that outweigh the benefits of allowing the class action to proceed.

49 Other procedural issues may arise. One is notice. A judgment is binding on a class member only if the class member is notified of the suit and is given an opportunity to exclude himself or herself from the proceeding. This case does not raise the issue of what constitutes sufficient notice. However, prudence suggests that all potential class members be informed of the existence of the suit, of the common issues that the suit seeks to resolve, and of the right of each class member to opt out, and that this be done before any decision is made that purports to prejudice or otherwise affect the interests of class members.

50 Another procedural issue that may arise is how to deal with non-common issues. The court retains discretion to determine how the individual issues should be addressed, once common issues have been resolved: see Branch, *supra*, at para. 18.10. Generally, individual issues will be resolved in individual proceedings. However, as under the legislation of British Columbia, Ontario, and Quebec, a court may specify special procedures that it considers necessary or useful: see Ontario *Class Proceedings Act*, 1992, s. 25; British Columbia *Class Proceedings Act*, s. 27; Quebec *Code of Civil Procedure*, art. 1039.

51 The diversity of class actions makes it difficult to anticipate all of the procedural complexities that may arise. In the absence of comprehensive class-action legislation, courts must address procedural complexities on a case-by-case basis. Courts should approach these issues as they do the question of whether a class action should be allowed: in a flexible and liberal manner, seeking a balance between efficiency and fairness.

### C. Whether the Investors Have Satisfied Rule 42

52 The four conditions to the maintenance of a class action are satisfied here. First, the class is clearly defined. The respondents Lin and Wu represent themselves and "[229 other] immigrant investors ... who each invested at least the sum of \$150,000.00 into a fund totalling \$34,065,000.00, the said sum to be managed, administered and secured by ... Western Canadian Shopping Centres Inc.". Who falls within the class can be ascertained on the basis of documentary evidence that the parties have put before the court. Second, common issues of fact and law unite all members of the class. The essence of the investors' complaint is that the defendants owed them fiduciary duties which they breached. While the investors' Amended Statement of Claim alludes to

claims in negligence and misrepresentation, counsel for the investors undertook in argument before this Court to abandon all but the fiduciary duty claims. Third, at this stage of the proceedings, it appears that resolving one class member's breach of fiduciary claim would effectively resolve the claims of every class member. As a result of security-pooling agreements effected by WCSC, each investor now has an interest, proportional to his or her investment, in the same underlying security. Finally, the representative plaintiffs are appropriate.

53 The defendants argue that the proposed suit is not amenable to prosecution as a class action because: (1) there are in fact multiple classes of plaintiffs; (2) the defendants will raise multiple defences to different causes of action advanced against different defendants; and (3) in order to prevail, the investors must show actual reliance on the part of each class member. I find these arguments unpersuasive.

54 The defendants' contention that there are multiple classes of plaintiffs is unconvincing. No doubt, differences exist. Different investors invested at different times, in different jurisdictions, on the basis of different offering memoranda, through different agents, in different series of debentures, and learned about the underlying events through different disclosure documents. Some investors may possess rescissionary rights that others do not. The fact remains, however, that the investors raise essentially the same claims requiring resolution of the same facts. While it may eventually emerge that different subgroups of investors have different rights against the defendants, this possibility does not necessarily defeat the investors' right to proceed as a class. If material differences emerge, the court can deal with them when the time comes.

55 The defendants' contention that the investors should not be permitted to sue as a class because each must show actual reliance to establish breach of fiduciary duty also fails to convince. In recent decades fiduciary obligations have been applied in new contexts, and the full scope of their application remains to be precisely defined. The fiduciary duty issues raised here are common to all the investors. A class action should not be foreclosed on the ground that there is uncertainty as to the resolution of issues common to all class members. If it is determined that the investors must show individual reliance, the court may then consider whether the class action should continue.

56 The same applies to the contention that different defences will be raised with respect to different class members. Simply asserting this possibility does not negate a class action. If and when different defences are asserted, the court may solve the problem or withdraw leave to proceed as a class.

57 I conclude that the basic conditions for a class action are met and that efficiency and fairness favour permitting it to proceed.

#### **D. Cross-Appeal**

58 The investors take issue on cross-appeal with the Court of Appeal's allowance of individualized discovery from each class member. The Court of Appeal held that the defendants are entitled, under Rules 187 and 201, to examination and discovery of each member of the class. The investors argue that the question of whether discovery should be allowed from each class member is a question best left to a case management judge appointed pursuant to the Alberta Rules of Court Binder, Practice Note No. 7.

59 I agree that allowing individualized discovery at this stage of the proceedings would be premature. One of the benefits of a class action is that discovery of the class representatives will usually suffice and make unnecessary discovery of each individual class member. Cases where individual discovery is required of all class members are the exception rather than the rule. Indeed, the necessity of individual discovery may be a factor weighing against allowing the action to proceed in representative form.

60 I would allow the defendants to examine the representative plaintiffs as of right. Thereafter, examination of other class members should be available only by order of the court, upon the defendants showing reasonable necessity.

#### **VI. Conclusion**

61 For the foregoing reasons, I would dismiss the appeal and allow the investors to proceed as a class. I would allow the cross-appeal.

62 Costs of the appeal and cross-appeal are to the respondents.

*Appeal dismissed; cross-appeal allowed.*

*Pourvoi rejeté; pourvoi incident accueilli.*

Evidence --- Opinion — Experts — Expert reports — Admissibility

Shareholders brought professional negligence action against former auditors — Shareholders had retained different accounting firm which they claimed revealed problems with auditors' work — Auditors brought motion for summary judgment to have action dismissed — Shareholders retained forensic accounting partner from accounting firm to prepare report — Her affidavit set out opinion that auditors did not comply with professional obligations — Auditors applied successfully to strike out affidavit on grounds that affiant was not impartial witness — Majority of Court of Appeal concluded that motions judge erred in excluding affidavit — Auditors appealed — Appeal dismissed — Expert's lack of independence and impartiality goes to admissibility of evidence in addition to being considered in relation to weight to be given to evidence if admitted — Duty owed by expert witness is that expert must be fair, objective and non-partisan — Absent challenge to expert's independence and impartiality, expert's attestation or testimony recognizing and accepting duty will generally be sufficient to establish that threshold is met — Burden is then on party opposing admission of evidence to show that there is realistic concern that expert's evidence should not be received because expert is unable and/or unwilling to comply with that duty — If opponent does so, burden to establish on balance of probabilities this aspect of admissibility threshold remains on party proposing to call evidence — Record in this case amply sustained result reached by majority of Court of Appeal that affiant's evidence was admissible on summary judgment application.

Evidence --- Opinion — Experts — Qualification of expert — Miscellaneous

Shareholders brought professional negligence action against former auditors — Shareholders had retained different accounting firm which they claimed revealed problems with auditors' work — Auditors brought motion for summary judgment to have action dismissed — Shareholders retained forensic accounting partner from accounting firm to prepare report — Her affidavit set out opinion that auditors did not comply with professional obligations — Auditors applied successfully to strike out affidavit on grounds that affiant was not impartial witness — Majority of Court of Appeal concluded that motions judge erred in excluding affidavit — Auditors appealed — Appeal dismissed — Concerns related to expert's duty to court and willingness and capacity to comply with it are best addressed initially in "qualified expert" element of framework from case law — Proposed expert witness who is unable or unwilling to fulfill this duty to court is not properly qualified to perform role of expert — Situating this concern in "properly qualified expert" ensures courts will focus expressly on important risks associated with biased experts — If expert evidence is found to meet basic threshold, judge must still take concerns about expert's independence and impartiality into account in weighing evidence at gatekeeping stage — Relevance, necessity, reliability and absence of bias can helpfully be seen as part of sliding scale where basic level must first be achieved in order to meet admissibility threshold and thereafter continue

to play role in weighing overall competing considerations in admitting evidence — Potential helpfulness of evidence must not be outweighed by risk of dangers materializing that are associated with expert evidence — Record in this case amply sustained result reached by majority of Court of Appeal that affiant's evidence was admissible on summary judgment application.

Civil practice and procedure --- Summary judgment — Evidence on application — Affidavit evidence — Based on information and belief

Shareholders brought professional negligence action against former auditors — Shareholders had retained different accounting firm which they claimed revealed problems with auditors' work — Auditors brought motion for summary judgment to have action dismissed — Shareholders retained forensic accounting partner from accounting firm to prepare report — Her affidavit set out opinion that auditors did not comply with professional obligations — Auditors applied successfully to strike out affidavit on grounds that affiant was not impartial witness — Majority of Court of Appeal concluded that motions judge erred in excluding affidavit — Auditors appealed — Appeal dismissed — Motions judge hearing summary judgment application under Nova Scotia rules must be satisfied that proposed expert evidence meets threshold requirements for admissibility at first step of analysis, but generally should not engage in second step cost-benefit analysis — That cost-benefit analysis, in anything other than most obvious cases of inadmissibility, inevitably involves assigning weight or potential weight to evidence — Record in this case amply sustained result reached by majority of Court of Appeal that affiant's evidence was admissible on summary judgment application — There was no finding by motions judge that affiant was in fact biased or not impartial or that she was acting as advocate — To the extent motion judge was concerned about "appearance" of impartiality, this factor played no part in test for admissibility — There was agreement with majority of Court of Appeal that motions judge committed palpable and overriding error in determining that affiant was in conflict of interest that prevented her from giving impartial and objective evidence.

**Preuve --- Opinion — Experts — Rapports d'expert — Recevabilité**

Actionnaires ont intenté une action pour négligence professionnelle contre les anciens vérificateurs de leur compagnie — Actionnaires avaient engagé un autre cabinet comptable qui, selon eux, a révélé des erreurs par les vérificateurs précédents — Vérificateurs ont présenté une requête en jugement sommaire visant à faire rejeter l'action — Actionnaires ont fait appel à une associée en juricomptabilité du cabinet pour qu'elle rédige un rapport — Son affidavit exposait ses constatations que les vérificateurs ne se sont pas acquittés de leurs obligations professionnelles — Vérificateurs ont présenté avec succès une requête en radiation de l'affidavit au motif que l'associée en question n'était pas un témoin expert impartial — Juges majoritaires de la Cour d'appel ont conclu que le juge des requêtes avait eu tort d'exclure l'affidavit — Vérificateurs ont formé un pourvoi — Pourvoi rejeté — Manque d'indépendance et d'impartialité d'un expert joue au regard tant de l'admissibilité de son témoignage que de la valeur du témoignage, s'il est admis — Obligation du témoin expert est d'être juste, objectif et impartial — En l'absence d'une contestation concernant l'indépendance et l'impartialité de l'expert, le critère est généralement satisfait dès lors que l'expert, dans son attestation ou sa déposition, reconnaît son obligation et l'accepte — Il incombe alors à la partie qui s'oppose à l'admission du témoignage de l'expert de démontrer un motif réaliste de le juger inadmissible au motif que l'expert ne peut ou ne veut s'acquitter de son obligation — Si elle réussit, la charge de démontrer, selon la prépondérance des probabilités, qu'il a été satisfait à ce critère d'admissibilité incombe toujours à la partie qui entend présenter le témoignage — Dossier en l'espèce appuyait largement la conclusion à laquelle est parvenue la majorité de la Cour d'appel que le témoignage contenu dans l'affidavit était admissible pour l'instruction de la requête en jugement sommaire.

**Preuve --- Opinion — Experts — Compétence de l'expert — Divers**

Actionnaires ont intenté une action pour négligence professionnelle contre les anciens vérificateurs de leur compagnie — Actionnaires avaient engagé un autre cabinet comptable qui, selon eux, a révélé des erreurs par les vérificateurs précédents — Vérificateurs ont présenté une requête en jugement sommaire visant à faire rejeter l'action — Actionnaires ont fait appel à une associée en juricomptabilité du cabinet pour qu'elle rédige un rapport — Son affidavit exposait ses constatations que les vérificateurs ne se sont pas acquittés de leurs obligations professionnelles — Vérificateurs ont présenté avec succès une requête en radiation de l'affidavit au motif que l'associée en question n'était pas un témoin expert impartial — Juges majoritaires de la Cour d'appel ont conclu que le juge des requêtes avait eu tort d'exclure l'affidavit — Vérificateurs ont formé un pourvoi — Pourvoi rejeté — C'est sous le volet « qualification suffisante de l'expert » du cadre établi par la jurisprudence qu'il convient d'abord d'examiner les préoccupations concernant l'obligation de l'expert envers le tribunal et s'il peut ou veut s'en acquitter — Témoin expert proposé qui ne peut ou ne veut s'acquitter de cette obligation envers le tribunal ne possède pas la qualification suffisante pour exercer ce rôle — En abordant cette préoccupation sous le volet de la « qualification suffisante de l'expert », les tribunaux pourront s'attacher à évaluer les risques importants que présentent les experts qui ont un parti pris — Si le

témoignage de l'expert satisfait aux critères, le juge doit malgré tout tenir compte des réserves émises quant à l'indépendance et à l'impartialité de l'expert lorsqu'il évalue la preuve à l'étape où il exerce son rôle de gardien — Il peut être utile de concevoir la pertinence, la nécessité, la fiabilité et l'absence de parti pris comme autant d'éléments d'un examen en deux temps, qui entrent en ligne de compte à la première étape, celle qui sert à déterminer s'il est satisfait aux critères d'admissibilité, et jouent également un rôle à la deuxième, dans la pondération des considérations concurrentes globales relatives à l'admissibilité — Au bout du compte, le juge doit être convaincu que les risques liés au témoignage de l'expert ne l'emportent pas sur l'utilité possible de celui-ci — Dossier en l'espèce appuyait largement la conclusion à laquelle est parvenue la majorité de la Cour d'appel que le témoignage contenu dans l'affidavit était admissible pour l'instruction de la requête en jugement sommaire.

Procédure civile --- Jugement sommaire — Preuve en instance — Preuve par affidavit — Fondé sur des renseignements et sur une opinion

Actionnaires ont intenté une action pour négligence professionnelle contre les anciens vérificateurs de leur compagnie — Actionnaires avaient engagé un autre cabinet comptable qui, selon eux, a révélé des erreurs par les vérificateurs précédents — Vérificateurs ont présenté une requête en jugement sommaire visant à faire rejeter l'action — Actionnaires ont fait appel à une associée en juricomptabilité du cabinet pour qu'elle rédige un rapport — Son affidavit exposait ses constatations que les vérificateurs ne se sont pas acquittés de leurs obligations professionnelles — Vérificateurs ont présenté avec succès une requête en radiation de l'affidavit au motif que l'associée en question n'était pas un témoin expert impartial — Juges majoritaires de la Cour d'appel ont conclu que le juge des requêtes avait eu tort d'exclure l'affidavit — Vérificateurs ont formé un pourvoi — Pourvoi rejeté — Juge saisi d'une requête en jugement sommaire en vertu des règles de procédure de la Nouvelle-Écosse doit être convaincu que le témoignage de l'expert proposé satisfait aux critères d'admissibilité à la première étape de l'analyse; en règle générale, il doit toutefois se garder de passer à la seconde étape, celle de l'analyse coût-bénéfices — Cette analyse, sauf dans les cas d'inadmissibilité les plus manifestes, appelle inévitablement l'attribution d'une valeur, ou, à tout le moins, d'une valeur possible, à la preuve — Dossier en l'espèce appuyait largement la conclusion à laquelle est parvenue la majorité de la Cour d'appel que le témoignage contenu dans l'affidavit était admissible pour l'instruction de la requête en jugement sommaire — Juge des requêtes n'a pas conclu que le témoin avait un parti pris, qu'il n'était pas impartial ou qu'il se faisait le défenseur des actionnaires — Même si, selon le juge des requêtes, il fallait une « apparence » d'impartialité, ce facteur ne constituait pas un critère d'admissibilité — On s'entendait avec les juges majoritaires de la Cour d'appel que le juge des requêtes a commis une erreur manifeste et dominante en concluant que le témoin était dans une situation de conflit d'intérêts qui l'empêchait de rendre un témoignage objectif et impartial.

Shareholders brought a professional negligence action against the former auditors of their company. The shareholders started the action after retaining a different accounting firm to perform various accounting tasks and which they claimed revealed problems with the auditors' work. The auditors brought a motion for summary judgment to have the action dismissed. The shareholders retained a forensic accounting partner from the accounting firm to review materials and to prepare a report. Her affidavit set out her opinion that the auditors had not complied with their professional obligations. The auditors applied to strike out her affidavit on the grounds that she was not an impartial witness. The motions judge essentially agreed and struck out the affidavit. The majority of the Court of Appeal concluded that the motions judge erred in excluding the affidavit. The auditors appealed.

**Held:** The appeal was dismissed.

Per Cromwell J. (McLachlin C.J.C. and Abella, Rothstein, Moldaver, Wagner and Gascon JJ. concurring): Following the dominant view of Canadian cases, an expert's lack of independence and impartiality goes to the admissibility of evidence in addition to being considered in relation to the weight to be given to the evidence if admitted. Such an approach is more in line with the basic structure of the law relating to expert evidence and with the importance jurisprudence has attached to the gatekeeping role of trial judges.

The duty owed by an expert witness is that the expert must be fair, objective and non-partisan. The appropriate threshold flows from this duty. Absent challenge to the expert's independence and impartiality, the expert's attestation or testimony recognizing and accepting the duty will generally be sufficient to establish that the threshold is met. The burden is then on the party opposing the admission of the evidence to show that there is realistic concern that the expert's evidence should not be received because the expert is unable and/or unwilling to comply with that duty. If the opponent does so, the burden to establish on a balance of probabilities this aspect of the admissibility threshold remains on the party proposing to call the evidence. Exclusion at the threshold stage of the analysis should occur only in very clear cases in which the proposed expert is unable or unwilling to provide fair, objective and non-partisan evidence. Anything less should not lead to exclusion, but be taken into account in the

overall weighing of costs and benefits of receiving the evidence. The concept of apparent bias is not relevant to the question of whether an expert witness will be unable or unwilling to fulfill its primary duty to the court.

Concerns related to the expert's duty to the court and willingness and capacity to comply with it are best addressed initially in the "qualified expert" element of the framework from case law. A proposed expert witness who is unable or unwilling to fulfill this duty to the court is not properly qualified to perform the role of expert. Situating this concern in the "properly qualified expert" ensures courts will focus expressly on the important risks associated with biased experts. If the expert evidence is found to meet the basic threshold, the judge must still take concerns about the expert's independence and impartiality into account in weighing the evidence at the gatekeeping stage. Relevance, necessity, reliability and absence of bias can helpfully be seen as part of a sliding scale where a basic level must first be achieved in order to meet the admissibility threshold and thereafter continue to play role in weighing the overall competing considerations in admitting the evidence. The potential helpfulness of the evidence must not be outweighed by the risk of the dangers materializing that are associated with expert evidence.

A motions judge hearing a summary judgment application under the Nova Scotia rules must be satisfied that proposed expert evidence meets the threshold requirements for admissibility at the first step of the analysis, but generally should not engage in the second step cost-benefit analysis. That cost-benefit analysis, in anything other than the most obvious cases of inadmissibility, inevitably involves assigning weight or potential weight to the evidence.

The record amply sustained the result reached by the majority of the Court of Appeal that the affiant's evidence was admissible on the summary judgment application. There was no finding by the motions judge that the affiant was in fact biased or not impartial or that she was acting as an advocate. The motions judge recognized that the affiant was aware of the standards and requirements that experts be independent. The affiant testified that she owed an ultimate duty to the court in testifying as an expert witness. To the extent the motions judge was concerned about the "appearance" of impartiality, this factor played no part in the test for admissibility. The fact that one professional firm discovered what it thought was or may be professional negligence did not disqualify it from offering that opinion as an expert witness. There was no more than a speculative possibility of the accounting firm incurring liability if its opinion was not ultimately accepted by the court. An expert does not lack the threshold qualification in relation to the duty to give fair, objective and non-partisan evidence simply because the expert relies on the work of other professions in reaching his or her own opinion. There was agreement with the majority of the Court of Appeal that the motions judge committed a palpable and overriding error in determining that the affiant was in a conflict of interest that prevented her from giving impartial and objective evidence.

Les actionnaires ont intenté une action pour négligence professionnelle contre les anciens vérificateurs de leur compagnie. Les actionnaires ont intenté l'action après avoir engagé un autre cabinet comptable pour effectuer diverses tâches comptables, qui, selon eux, avaient révélé des erreurs par les vérificateurs précédents. Les vérificateurs ont présenté une requête en jugement sommaire visant à faire rejeter l'action. Les actionnaires ont fait appel à une associée en juricomptabilité du cabinet pour qu'elle examine tous les documents pertinents et rédige un rapport. Son affidavit exposait ses constatations que les vérificateurs ne se sont pas acquittés de leurs obligations professionnelles. Les vérificateurs ont présenté une requête en radiation de l'affidavit au motif que l'associée en question n'était pas un témoin expert impartial. Le juge des requêtes s'est dit d'accord avec les vérificateurs pour l'essentiel et a radié l'affidavit. Les juges majoritaires de la Cour d'appel ont conclu que le juge des requêtes avait eu tort d'exclure l'affidavit et ont accueilli l'appel. Les vérificateurs ont formé un pourvoi.

**Arrêt:** Le pourvoi a été rejeté.

Cromwell, J. (McLachlin, J.C.C., Abella, Rothstein, Moldaver, Wagner, Gascon, JJ., souscrivant à son opinion) : Conformément au courant prédominant dans la jurisprudence canadienne, le manque d'indépendance et d'impartialité d'un expert joue au regard tant de l'admissibilité de son témoignage que de la valeur du témoignage, s'il est admis. Cette façon de voir semble s'accorder davantage avec l'économie générale du droit en ce qui concerne les témoignages d'experts et l'importance que la jurisprudence accorde au rôle de gardien exercé par les juges de première instance.

L'obligation du témoin expert est d'être juste, objectif et impartial. Le critère d'admissibilité découle de cette obligation. En l'absence d'une contestation concernant l'indépendance et l'impartialité de l'expert, le critère est généralement satisfait dès lors que l'expert, dans son attestation ou sa déposition, reconnaît son obligation et l'accepte. Il incombe alors à la partie qui s'oppose à l'admission du témoignage de l'expert de démontrer un motif réaliste de le juger inadmissible au motif que l'expert ne peut ou ne veut s'acquitter de son obligation. Si elle réussit, la charge de démontrer, selon la prépondérance des probabilités, qu'il a été satisfait à ce critère d'admissibilité incombe toujours à la partie qui entend présenter le témoignage. La décision d'exclure le témoignage à la première étape de l'analyse pour non-conformité aux critères d'admissibilité ne devrait être prise que dans les

cas manifestes où l'expert proposé ne peut ou ne veut fournir une preuve juste, objective et impartiale. Dans les autres cas, le témoignage ne devrait pas être exclu d'office, et son admissibilité devrait être déterminée à l'issue d'une pondération globale du coût et des bénéfices de son admission. La notion d'apparence de parti pris n'est pas pertinente lorsqu'il s'agit de déterminer si le témoin expert pourra ou voudra s'acquitter de sa principale obligation envers le tribunal.

C'est sous le volet « qualification suffisante de l'expert » du cadre établi par la jurisprudence qu'il convient d'abord d'examiner les préoccupations concernant l'obligation de l'expert envers le tribunal et s'il peut ou veut s'en acquitter. Le témoin expert proposé qui ne peut ou ne veut s'acquitter de cette obligation envers le tribunal ne possède pas la qualification suffisante pour exercer ce rôle. En abordant cette préoccupation sous le volet de la « qualification suffisante de l'expert », les tribunaux pourront s'attacher à évaluer les risques importants que présentent les experts qui ont un parti pris. Si le témoignage de l'expert satisfait aux critères, le juge doit malgré tout tenir compte des réserves émises quant à l'indépendance et à l'impartialité de l'expert lorsqu'il évalue la preuve à l'étape où il exerce son rôle de gardien. Il peut être utile de concevoir la pertinence, la nécessité, la fiabilité et l'absence de parti pris comme autant d'éléments d'un examen en deux temps, qui entrent en ligne de compte à la première étape, celle qui sert à déterminer s'il est satisfait aux critères d'admissibilité, et jouent également un rôle à la deuxième, dans la pondération des considérations concurrentes globales relatives à l'admissibilité. Au bout du compte, le juge doit être convaincu que les risques liés au témoignage de l'expert ne l'emportent pas sur l'utilité possible de celui-ci.

Le juge saisi d'une requête en jugement sommaire en vertu des règles de procédure de la Nouvelle-Écosse doit être convaincu que le témoignage de l'expert proposé satisfait aux critères d'admissibilité à la première étape de l'analyse; en règle générale, il doit toutefois se garder de passer à la seconde étape, celle de l'analyse coût-bénéfices. Cette analyse, sauf dans les cas d'inadmissibilité les plus manifestes, appelle inévitablement l'attribution d'une valeur, ou, à tout le moins, d'une valeur possible, à la preuve.

Le dossier en l'espèce appuyait largement la conclusion à laquelle est parvenue la majorité de la Cour d'appel que le témoignage contenu dans l'affidavit était admissible pour l'instruction de la requête en jugement sommaire. Le juge des requêtes n'a pas conclu que le témoin avait un parti pris, qu'il n'était pas impartial ou qu'il se faisait le défenseur des actionnaires. Le juge des requêtes a reconnu que le témoin connaissait les normes et exigences voulant que l'expert soit indépendant. Le témoin était conscient à titre de témoin expert de sa principale obligation envers le tribunal. Même si, selon le juge des requêtes, il fallait une « apparence » d'impartialité, ce facteur ne constituait pas un critère d'admissibilité. Le cabinet professionnel qui découvre ce qu'il estime être une négligence professionnelle ou ce qui pourrait l'être n'est pas d'emblée interdit de donner son opinion en tant que témoin expert. Il n'y avait rien de plus qu'une hypothétique possibilité que le cabinet soit tenu responsable si, en fin de compte, le tribunal n'avait pas retenu son opinion. Un expert ne satisfait pas au critère de la qualification suffisante, dans la mesure où il est question de son obligation de rendre un témoignage juste, objectif et impartial, simplement parce qu'il se fonde sur le travail d'autres professionnels pour se faire une opinion. On s'entendait avec les juges majoritaires de la Cour d'appel que le juge des requêtes a commis une erreur manifeste et dominante en concluant que le témoin était dans une situation de conflit d'intérêts qui l'empêchait de rendre un témoignage objectif et impartial.

**Words and phrases considered:**

## impartiality

Expert witnesses have a special duty to the court to provide fair, objective and non-partisan assistance.

.....

Underlying the various formulations of the duty are three related concepts: impartiality, independence and absence of bias. The expert's opinion must be impartial in the sense that it reflects an objective assessment of the questions at hand. It must be independent in the sense that it is the product of the expert's independent judgment, uninfluenced by who has retained him or her or the outcome of the litigation. It must be unbiased in the sense that it does not unfairly favour one party's position over another. The acid test is whether the expert's opinion would not change regardless of which party retained him or her: P. Michell and R. Mandhane, "The Uncertain Duty of the Expert Witness" (2005), 42 *Alta. L. Rev.* 635, at pp. 638- 39.

### Termes et locutions cités:

#### impartialité

Le témoin expert a l'obligation particulière d'apporter au tribunal une aide juste, objective et impartiale.

(....)

Trois concepts apparentés sont à la base des diverses définitions de l'obligation de l'expert, à savoir l'impartialité, l'indépendance et l'absence de parti pris. L'opinion de l'expert doit être impartiale, en ce sens qu'elle découle d'un examen objectif des questions à trancher. Elle doit être indépendante, c'est-à-dire qu'elle doit être le fruit du jugement indépendant de l'expert, non influencée par la partie pour qui il témoigne ou l'issue du litige. Elle doit être exempte de parti pris, en ce sens qu'elle ne doit pas favoriser injustement la position d'une partie au détriment de celle de l'autre. Le critère décisif est que l'opinion de l'expert ne changerait pas, peu importe la partie qui aurait retenu ses services (P. Michell et R. Mandhane, « The Uncertain Duty of the Expert Witness » (2005) 42 *Alta. L. Rev.* 635, p. 638-639).

POURVOI formé par des vérificateurs à l'encontre d'un jugement publié à *Abbott and Haliburton Co. v. White Burgess Langille Inman* (2013), 2013 NSCA 66, 2013 CarswellNS 360, 36 C.P.C. (7th) 22, 1046 A.P.R. 301, 330 N.S.R. (2d) 301, 361 D.L.R. (4th) 659, [2013] N.S.J. No. 259 (N.S. C.A.), ayant accueilli un appel concernant l'exclusion en preuve d'un affidavit interjeté à l'encontre d'un jugement ayant radié l'affidavit.

### Comment

*White Burgess Langille Inman v. Abbott and Haliburton Co.* comprehensively restates the law on admissibility of expert evidence in civil and criminal cases. A unanimous Supreme Court adopts the key feature of the judgment of Doherty J. in *R. v. Abbey*, 2009 ONCA 624, 68 C.R. (6th) 201 (Ont. C.A.) by holding that the admissibility analysis has two stages — a set of threshold preconditions to admissibility and a discretionary gatekeeper stage (see para. 22, adopting *Abbey*). The Court also resolves a longstanding question in the Canadian case law by holding that defects in an expert witness's independence and impartiality can go to admissibility and not only to weight (para. 45). In fact, on examination, the Court's analysis indicates that problems of independence and impartiality may properly be considered at three separate stages in the analysis of expert evidence. First, the question whether proposed expert witnesses are able and willing to comply with their duties to the court can be addressed at the threshold stage of the admissibility analysis under the "qualified expert" requirement (para. 53). Second, even when the expert is qualified, questions about independence and impartiality can be taken into account at the gatekeeper stage (para. 54). But this too is a question of admissibility to be considered by the trier of law. What may be obscured by the Court's emphasis on admissibility is the third stage when these concerns enter the analysis: independence and impartiality can also be considered by the trier of fact where the evidence is admitted (para. 45).

Given that *White Burgess Langille Inman* will become the starting point for argument on the admissibility of expert evidence, it is somewhat disappointing that the Court did not provide an easily accessible summary of the admissibility analysis. Instead, one must carefully read through the judgment to piece together the features of the admissibility framework. One might attempt to summarize that framework as follows:

Expert evidence is admissible when

- 1) it meets the threshold requirements of admissibility, which are that
  - a. the evidence must be logically relevant;
  - b. the evidence must be necessary to assist the trier of fact;
  - c. there must be no other exclusionary rule;
  - d. the expert must be properly qualified, which includes the requirement that the expert be willing and able to fulfil the duty to the court to provide evidence that is
    - i. impartial,
    - ii. independent and
    - iii. unbiased; and
  - e. for opinions based on novel or contested science or science used for a novel purpose, the underlying science must be reliable for that purpose;

and

- 2) it passes scrutiny at the gatekeeper stage, and the trial judge determines that the benefits of admitting the evidence outweigh its potential risks, considering such factors as
  - a. relevance,
  - b. necessity,
  - c. reliability, and
  - d. absence of bias (see para. 54).

Certain features of this framework will require clarification and amplification in the future. For example, the Court's reference to reliability as a threshold requirement "in the case of an opinion based on novel or contested science or science used for a novel purpose" (para. 23) leaves open the status of the reliability tests for non-scientific evidence that were extensively discussed in *Abbey*. While some questions remain, the framework outlined in *White Burgess Langille Inman* renews and clarifies the structure of the admissibility analysis for expert evidence.

## **I. Introduction and Issues**

1 Expert opinion evidence can be a key element in the search for truth, but it may also pose special dangers. To guard against them, the Court over the last 20 years or so has progressively tightened the rules of admissibility and enhanced the trial judge's gatekeeping role. These developments seek to ensure that expert opinion evidence meets certain basic standards before it is admitted. The question on this appeal is whether one of these basic standards for admissibility should relate to the proposed expert's independence and impartiality. In my view, it should.

2 Expert witnesses have a special duty to the court to provide fair, objective and non-partisan assistance. A proposed expert witness who is unable or unwilling to comply with this duty is not qualified to give expert opinion evidence and should not be permitted to do so. Less fundamental concerns about an expert's independence and impartiality should be taken into account in the broader, overall weighing of the costs and benefits of receiving the evidence.

3 Applying these principles, I agree with the conclusion reached by the majority of the Nova Scotia Court of Appeal and would therefore dismiss this appeal with costs.

## **II. Overview of the Facts and Judicial History**

### **A. Facts and Proceedings**

4 The appeal arises out of a professional negligence action by the respondents (who I will call the shareholders) against the appellants, the former auditors of their company (I will refer to them as the auditors). The shareholders started the action after they had retained a different accounting firm, the Kentville office of Grant Thornton LLP, to perform various accounting tasks and which in their view revealed problems with the auditors' previous work. The central allegation in the action is that the auditors' failure to apply generally accepted auditing and accounting standards while carrying out their functions caused financial loss to the shareholders. The main question in the action boils down to whether the auditors were negligent in the performance of their professional duties.

5 The auditors brought a motion for summary judgment in August of 2010, seeking to have the shareholders' action dismissed. In response, the shareholders retained Susan MacMillan, a forensic accounting partner at the Halifax office of Grant Thornton, to review all the relevant materials, including the documents filed in the action and to prepare a report of her findings. Her affidavit set out her findings, including her opinion that the auditors had not complied with their professional obligations to the shareholders. The auditors applied to strike out Ms. MacMillan's affidavit on the grounds that she was not an impartial expert witness. They argued that the action comes down to a battle of opinion between two accounting firms — the auditors' and the expert witness's. Ms. MacMillan's firm could be exposed to liability if its approach was not accepted by the court and, as a partner, Ms. MacMillan could be personally liable. Her potential liability if her opinion were not accepted gives her a personal financial interest in the outcome of the litigations and this, in the auditors' submission, ought to disqualify her from testifying.

6 The proceedings since have been neither summary nor resulted in a judgment. Instead, the litigation has been focused on the expert evidence issue; the summary judgment application has not yet been heard on its merits.

### **B. Judgments Below**

(1) *Nova Scotia Supreme Court: 2012 NSSC 210, 317 N.S.R. (2d) 283 (N.S. S.C.) (Pickup J.)*

7 Pickup J. essentially agreed with the auditors and struck out the MacMillan affidavit in its entirety: at para. 106. He found that, in order to be admissible, an expert's evidence "must be, and be seen to be, independent and impartial": para. 99. Applying that test, he concluded that this was one of those "clearest of cases where the reliability of the expert ... does not meet the threshold requirements for admissibility": para. 101.

(2) *Nova Scotia Court of Appeal: 2013 NSCA 66, 330 N.S.R. (2d) 301 (N.S. C.A.) (Beveridge J.A., Oland J.A. Concurring; MacDonald C.J.N.S., Dissenting)*

8 The majority of the Court of Appeal concluded that the motions judge erred in excluding Ms. MacMillan's affidavit. Beveridge J.A. wrote that while the court has a discretion to exclude expert evidence due to actual bias or partiality, the test adopted by the motions judge — that an expert "must be, and be seen to be, independent and impartial" — was wrong in law. He ought not to have ruled her evidence inadmissible and struck out her affidavit.

9 MacDonald C.J.N.S., dissenting, would have upheld the motions judge's decision because he had properly articulated and applied the relevant legal principles.

### **III. Analysis**

#### **A. Overview**

10 In my view, expert witnesses have a duty to the court to give fair, objective and non-partisan opinion evidence. They must be aware of this duty and able and willing to carry it out. If they do not meet this threshold requirement, their evidence should not be admitted. Once this threshold is met, however, concerns about an expert witness's independence or impartiality should be considered as part of the overall weighing of the costs and benefits of admitting the evidence. This common law approach is, of course, subject to statutory and related provisions which may establish different rules of admissibility.

#### **B. Expert Witness Independence and Impartiality**

11 There have been long-standing concerns about whether expert witnesses hired by the parties are impartial in the sense that they are expressing their own unbiased professional opinion and whether they are independent in the sense that their opinion is the product of their own, independent conclusions based on their own knowledge and judgment: see, e.g., G. R. Anderson, *Expert Evidence* (3rd ed. 2014), at p. 509; S. N. Lederman, A. W. Bryant and M. K. Fuerst, *The Law of Evidence in Canada* (4th ed. 2014), at p. 783. As Sir George Jessel, M.R., put it in the 1870s, "[u]ndoubtedly there is a natural bias to do something serviceable for those who employ you and adequately remunerate you. It is very natural, and it is so effectual, that we constantly see persons, instead of considering themselves witnesses, rather consider themselves as the paid agents of the person who employs them": *Lord Abinger v. Ashton* (1873), L.R. 17 Eq. 358 at 373 (Eng. Rolls Ct.), at p. 374.

12 Recent experience has only exacerbated these concerns; we are now all too aware that an expert's lack of independence and impartiality can result in egregious miscarriages of justice: *R. v. D. (D.)*, 2000 SCC 43, [2000] 2 S.C.R. 275 (S.C.C.), at para. 52. As observed by Beveridge J.A. in this case, *The Commission on Proceedings Involving Guy Paul Morin: Report* (1998) authored by the Honourable Fred Kaufman and the *Inquiry into Pediatric Forensic Pathology in Ontario: Report* (2008) conducted by the Honourable Stephen T. Goudge provide two striking examples where "[s]eemingly solid and impartial, but flawed, forensic scientific opinion has played a prominent role in miscarriages of justice": para. 105. Other reports outline the critical need for impartial and independent expert evidence in civil litigation: *ibid.*, at para. 106; see the Right Honourable Lord Woolf, *Access to Justice: Final Report* (1996); the Honourable Coulter A. Osborne, *Civil Justice Reform Project: Summary of Findings & Recommendations* (2007).

13 To decide how our law of evidence should best respond to these concerns, we must confront several questions: Should concerns about potentially biased expert opinion go to admissibility or only to weight?; If to admissibility, should these concerns be addressed by a threshold requirement for admissibility, by a judicial discretion to exclude, or both?; At what point do these concerns justify exclusion of the evidence?; And finally, how is our response to these concerns integrated into the existing legal framework governing the admissibility of expert opinion evidence? To answer these questions, we must first consider the existing legal framework governing admissibility, identify the duties that an expert witness has to the court and then turn to how those duties are best reflected in that legal framework.

#### **C. The Legal Framework**

##### **(1) The Exclusionary Rule for Opinion Evidence**

14 To the modern general rule that all relevant evidence is admissible there are many qualifications. One of them relates to opinion evidence, which is the subject of a complicated exclusionary rule. Witnesses are to testify as to the facts which they perceived, not as to the inferences — that is, the opinions — that they drew from them. As one great evidence scholar put it long ago, it is "for the jury to form opinions, and draw inferences and conclusions, and not for the witness": J. B. Thayer, *A Preliminary Treatise on Evidence at the Common Law* (1898; reprinted 1969), at p. 524; see also C. Tapper, *Cross and Tapper on Evidence* (12th ed. 2010), at p. 530. While various rationales have been offered for this exclusionary rule, the most convincing is probably that these ready-formed inferences are not helpful to the trier of fact and might even be misleading: see, e.g., *R. v. Graat*, [1982] 2 S.C.R. 819 (S.C.C.), at p. 836; *Halsbury's Laws of Canada: Evidence* (2014 Reissue), at para. HEV-137 "General rule against opinion evidence".

15 Not all opinion evidence is excluded, however. Most relevant for this case is the exception for expert opinion evidence on matters requiring specialized knowledge. As Professor Tapper put it, "the law recognizes that, so far as matters calling for special knowledge or skill are concerned, judges and jurors are not necessarily equipped to draw true inferences from facts stated by witnesses. A witness is therefore allowed to state his opinion about such matters, provided he is expert in them": p. 530; see also *R. v. Abbey*, [1982] 2 S.C.R. 24 (S.C.C.), at p. 42.

## (2) The Current Legal Framework for Expert Opinion Evidence

16 Since at least the mid-1990s, the Court has responded to a number of concerns about the impact on the litigation process of expert evidence of dubious value. The jurisprudence has clarified and tightened the threshold requirements for admissibility, added new requirements in order to assure reliability, particularly of novel scientific evidence, and emphasized the important role that judges should play as "gatekeepers" to screen out proposed evidence whose value does not justify the risk of confusion, time and expense that may result from its admission.

17 We can take as the starting point for these developments the Court's decision in *R. v. Mohan*, [1994] 2 S.C.R. 9 (S.C.C.). That case described the potential dangers of expert evidence and established a four-part threshold test for admissibility. The dangers are well known. One is that the trier of fact will inappropriately defer to the expert's opinion rather than carefully evaluate it. As Sopinka J. observed in *Mohan*:

There is a danger that expert evidence will be misused and will distort the fact-finding process. Dressed up in scientific language which the jury does not easily understand and submitted through a witness of impressive antecedents, this evidence is apt to be accepted by the jury as being virtually infallible and as having more weight than it deserves. [p. 21]

(See also *D.D.*, at para. 53; *R. c. J. (J.-L.)*, 2000 SCC 51, [2000] 2 S.C.R. 600 (S.C.C.), at paras. 25-26; *R. v. Sekhon*, 2014 SCC 15, [2014] 1 S.C.R. 272 (S.C.C.), at para. 46.)

18 The point is to preserve trial by judge and jury, not devolve to trial by expert. There is a risk that the jury "will be unable to make an effective and critical assessment of the evidence": *R. v. Abbey*, 2009 ONCA 624, 97 O.R. (3d) 330 (Ont. C.A.), at para. 90, leave to appeal refused, [2010] 2 S.C.R. v (note) (S.C.C.). The trier of fact must be able to use its "informed judgment", not simply decide on the basis of an "act of faith" in the expert's opinion: *J. (J.-L.)*, at para. 56. The risk of "attornment to the opinion of the expert" is also exacerbated by the fact that expert evidence is resistant to effective cross-examination by counsel who are not experts in that field: *D. (D.)*, at para. 54. The cases address a number of other related concerns: the potential prejudice created by the expert's reliance on unproven material not subject to cross-examination (*D. (D.)*, at para. 55); the risk of admitting "junk science" (*J. (J.-L.)*, at para. 25); and the risk that a "contest of experts" distracts rather than assists the trier of fact (*Mohan*, at p. 24). Another well-known danger associated with the admissibility of expert evidence is that it may lead to an inordinate expenditure of time and money: *Mohan*, at p. 21; *D.D.*, at para. 56; *Masterpiece Inc. v. Alavida Lifestyles Inc.*, 2011 SCC 27, [2011] 2 S.C.R. 387 (S.C.C.), at para. 76.

19 To address these dangers, *Mohan* established a basic structure for the law relating to the admissibility of expert opinion evidence. That structure has two main components. First, there are four threshold requirements that the proponent of the evidence must establish in order for proposed expert opinion evidence to be admissible: (1) relevance; (2) necessity in assisting the trier of

fact; (3) absence of an exclusionary rule; and (4) a properly qualified expert (*Mohan*, at pp. 20-25; see also *Sekhon*, at para. 43). *Mohan* also underlined the important role of trial judges in assessing whether otherwise admissible expert evidence should be excluded because its probative value was overborne by its prejudicial effect — a residual discretion to exclude evidence based on a cost-benefit analysis: p. 21. This is the second component, which the subsequent jurisprudence has further emphasized: Lederman, Bryant and Fuerst, at pp. 789-90; *J. (J.-L.)*, at para. 28.

20 *Mohan* and the jurisprudence since, however, have not explicitly addressed how this "cost-benefit" component fits into the overall analysis. The reasons in *Mohan* engaged in a cost-benefit analysis with respect to particular elements of the four threshold requirements, but they also noted that the cost-benefit analysis could be an aspect of exercising the overall discretion to exclude evidence whose probative value does not justify its admission in light of its potentially prejudicial effects: p. 21. The jurisprudence since *Mohan* has also focused on particular aspects of expert opinion evidence, but again without always being explicit about where additional concerns fit into the analysis. The unmistakable overall trend of the jurisprudence, however, has been to tighten the admissibility requirements and to enhance the judge's gatekeeping role.

21 So, for example, the necessity threshold criterion was emphasized in cases such as *D. (D.)*. The majority underlined that the necessity requirement exists "to ensure that the dangers associated with expert evidence are not lightly tolerated" and that "[m]ere relevance or 'helpfulness' is not enough": para. 46. Other cases have addressed the reliability of the science underlying an opinion and indeed technical evidence in general: *J. (J.-L.)*; *R. v. Trochym*, 2007 SCC 6, [2007] 1 S.C.R. 239 (S.C.C.). The question remains, however, as to where the cost-benefit analysis and concerns such as those about reliability fit into the overall analysis.

22 *Abbey* (ONCA) introduced helpful analytical clarity by dividing the inquiry into two steps. With minor adjustments, I would adopt that approach.

23 At the first step, the proponent of the evidence must establish the threshold requirements of admissibility. These are the four *Mohan* factors (relevance, necessity, absence of an exclusionary rule and a properly qualified expert) and in addition, in the case of an opinion based on novel or contested science or science used for a novel purpose, the reliability of the underlying science for that purpose: *J. (J.-L.)*, at paras. 33, 35-36 and 47; *Trochym*, at para. 27; Lederman, Bryant and Fuerst, at pp. 788-89 and 800-801. Relevance at this threshold stage refers to logical relevance: *Abbey* (ONCA), at para. 82; *J. (J.-L.)*, at para. 47. Evidence that does not meet these threshold requirements should be excluded. Note that I would retain necessity as a threshold requirement: *D. (D.)*, at para. 57; see D. M. Paciocco and L. Stuesser, *The Law of Evidence* (7th ed. 2015), at pp. 209-10; *R. v. Boswell*, 2011 ONCA 283, 85 C.R. (6th) 290 (Ont. C.A.), at para. 13; *R. v. C. (M.)*, 2014 ONCA 611, 13 C.R. (7th) 396 (Ont. C.A.), at para. 72.

24 At the second discretionary gatekeeping step, the judge balances the potential risks and benefits of admitting the evidence in order to decide whether the potential benefits justify the risks. The required balancing exercise has been described in various ways. In *Mohan*, Sopinka J. spoke of the "reliability versus effect factor" (p. 21), while in *J. (J.-L.)*, Binnie J. spoke about "relevance, reliability and necessity" being "measured against the counterweights of consumption of time, prejudice and confusion": para 47. Doherty J.A. summed it up well in *Abbey*, stating that the "trial judge must decide whether expert evidence that meets the preconditions to admissibility is sufficiently beneficial to the trial process to warrant its admission despite the potential harm to the trial process that may flow from the admission of the expert evidence": para. 76.

25 With this delineation of the analytical framework, we can turn to the nature of an expert's duty to the court and where it fits into that framework.

#### **D. The Expert's Duty to the Court or Tribunal**

26 There is little controversy about the broad outlines of the expert witness's duty to the court. As Anderson writes, "[t]he duty to provide independent assistance to the Court by way of objective unbiased opinion has been stated many times by common law courts around the world": p. 227. I would add that a similar duty exists in the civil law of Quebec: J.-C. Royer and S. Lavallée, *La preuve civile* (4th ed. 2008), at para. 468; D. Béchard with the collaboration of J. Béchard, *L'expert* (2011) ch. 9;

An Act to establish the new Code of Civil Procedure, S.Q. 2014, c. 1, art. 22 (not yet in force); L. Chamberland, *Le nouveau Code de procédure civile commenté* (2014), at pp. 14 and 121.

27 One influential statement of the elements of this duty are found in the English case *National Justice Compania Naviera SA v. Prudential Assurance Co.*, [1993] 2 Lloyd's Rep. 68 (Eng. Comm. Ct.). Following an 87-day trial, Cresswell J. believed that a misunderstanding of the duties and responsibilities of expert witnesses contributed to the length of the trial. He listed in *obiter dictum* duties and responsibilities of experts, the first two of which have particularly influenced the development of Canadian law:

1. Expert evidence presented to the Court should be, and should be seen to be, the independent product of the expert uninfluenced as to form or content by the exigencies of litigation ....
2. An expert witness should provide independent assistance to the Court by way of objective unbiased opinion in relation to matters within his [or her] expertise .... An expert witness in the High Court should never assume the role of an advocate.

[Emphasis added; citation omitted; p. 81.]

(These duties were endorsed on appeal: [*"Ikarian Reefer" (The), Re*] [1995] 1 Lloyd's Rep. 455 (Eng. C.A.), at p. 496.)

28 Many provinces and territories have provided explicit guidance related to the duty of expert witnesses. In Nova Scotia, for example, the *Civil Procedure Rules* require that an expert's report be signed by the expert who must make (among others) the following representations to the court: that the expert is providing an objective opinion for the assistance of the court; that the expert is prepared to apply independent judgment when assisting the court; and that the report includes everything the expert regards as relevant to the expressed opinion and draws attention to anything that could reasonably lead to a different conclusion (r. 55.04(1)(a), (b) and (c)). While these requirements do not affect the rules of evidence by which expert opinion is determined to be admissible or inadmissible, they provide a convenient summary of a fairly broadly shared sense of the duties of an expert witness to the court.

29 There are similar descriptions of the expert's duty in the civil procedure rules in other Canadian jurisdictions: Anderson, at p. 227; *The Queen's Bench Rules (Saskatchewan)*, r. 5-37; *Supreme Court Civil Rules*, B.C. Reg. 168/2009, r. 11-2(1); *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194, r. 4.1.01(1); *Rules of Court*, Y.O.I.C. 2009/65, r. 34(23); *An Act to establish the new Code of Civil Procedure*, art. 22. Moreover, the rules in Saskatchewan, British Columbia, Ontario, Nova Scotia, Prince Edward Island, Quebec and the Federal Courts require experts to certify that they are aware of and will comply with their duty to the court: Anderson, at p. 228; Saskatchewan *Queen's Bench Rules*, r. 5-37(3); British Columbia *Supreme Court Civil Rules*, r. 11-2(2); Ontario *Rules of Civil Procedure*, r. 53.03(2.1); Nova Scotia *Civil Procedure Rules*, r. 55.04(1)(a); Prince Edward Island *Rules of Civil Procedure*, r. 53.03(3)(g); *An Act to establish the new Code of Civil Procedure*, art. 235 (not yet in force); *Federal Courts Rules*, SOR/98-106, r. 52.2(1)(c).

30 The formulation in the *Ontario Rules of Civil Procedure* is perhaps the most succinct and complete statement of the expert's duty to the court: to provide opinion evidence that is fair, objective and non-partisan: r. 4.1.01(1)(a). The Rules are also explicit that this duty to the court prevails over any obligation owed by the expert to a party: r. 4.1.01(2). Likewise, the newly adopted *Act to establish the new Code of Civil Procedure of Quebec* explicitly provides, as a guiding principle, that the expert's duty to the court overrides the parties' interests, and that the expert must fulfill his or her primary duty to the court "objectively, impartially and thoroughly": art. 22; Chamberland, at pp. 14 and 121.

31 Many of the relevant rules of court simply reflect the duty that an expert witness owes to the court at common law: Anderson, at p. 227. In my opinion, this is true of the Nova Scotia rules that apply in this case. Of course, it is always open to each jurisdiction to impose different rules of admissibility, but in the absence of a clear indication to that effect, the common law rules apply in common law cases. I note that in *Nova Scotia*, the *Civil Procedure Rules* explicitly provide that they do not change the rules of evidence by which the admissibility of expert opinion evidence is determined: r. 55.01(2).

32 Underlying the various formulations of the duty are three related concepts: impartiality, independence and absence of bias. The expert's opinion must be impartial in the sense that it reflects an objective assessment of the questions at hand. It must be independent in the sense that it is the product of the expert's independent judgment, uninfluenced by who has retained him or her or the outcome of the litigation. It must be unbiased in the sense that it does not unfairly favour one party's position over another. The acid test is whether the expert's opinion would not change regardless of which party retained him or her: P. Michell and R. Mandhane, "The Uncertain Duty of the Expert Witness" (2005), 42 *Alta. L. Rev.* 635, at pp. 638-39. These concepts, of course, must be applied to the realities of adversary litigation. Experts are generally retained, instructed and paid by one of the adversaries. These facts alone do not undermine the expert's independence, impartiality and freedom from bias.

#### **E. The Expert's Duties and Admissibility**

33 As we have seen, there is a broad consensus about the nature of an expert's duty to the court. There is no such consensus, however, about how that duty relates to the admissibility of an expert's evidence. There are two main questions: Should the elements of this duty go to admissibility of the evidence rather than simply to its weight?; And, if so, is there a threshold admissibility requirement in relation to independence and impartiality?

34 In this section, I will explain my view that the answer to both questions is yes: a proposed expert's independence and impartiality goes to admissibility and not simply to weight and there is a threshold admissibility requirement in relation to this duty. Once that threshold is met, remaining concerns about the expert's compliance with his or her duty should be considered as part of the overall cost-benefit analysis which the judge conducts to carry out his or her gatekeeping role.

##### *(1) Admissibility or Only Weight?*

###### **(a) The Canadian Law**

35 The weight of authority strongly supports the conclusion that at a certain point, expert evidence should be ruled inadmissible due to the expert's lack of impartiality and/or independence.

36 Our Court has confirmed this position in a recent decision that was not available to the courts below:

It is well established that an expert's opinion must be independent, impartial and objective, and given with a view to providing assistance to the decision maker (J.-C. Royer and S. Lavallée, *La preuve civile* (4th ed. 2008), at No. 468; D. Béchard, with J. Béchard, *L'Expert* (2011), chap. 9; *An Act to establish the new Code of Civil Procedure*, S.Q. 2014, c. 1, s. 22 (not yet in force)). However, these factors generally have an impact on the probative value of the expert's opinion and are not always insurmountable barriers to the admissibility of his or her testimony. Nor do they necessarily "disqualify" the expert (L. Ducharme and C.- M. Panaccio, *L'administration de la preuve* (4th ed. 2010), at Nos. 590-91 and 605). For expert testimony to be inadmissible, more than a simple appearance of bias is necessary. The question is not whether a reasonable person would consider that the expert is not independent. Rather, what must be determined is whether the expert's lack of independence renders him or her incapable of giving an impartial opinion in the specific circumstances of the case (D. M. Paciocco, "[Unplugging Jukebox Testimony in an Adversarial System: Strategies for Changing the Tune on Partial Experts](#)" (2009), 34 *Queen's L.J.* 565, at pp. 598-99).

*(Mouvement laïque québécois v. Saguenay (City), 2015 SCC 16, at para. 106)*

37 I will refer to a number of other cases that support this view. I do so by way of illustration and without commenting on the outcome of particular cases. An expert's interest in the litigation or relationship to the parties has led to exclusion in a number of cases: see, e.g., *Fellowes, McNeil v. Kansa General International Insurance Co.* (1998), 40 O.R. (3d) 456 (Ont. Gen. Div.) (proposed expert was the defendant's lawyer in related matters and had investigated from the outset of his retainer the matter of a potential negligence claim against the plaintiff); *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman* (2000), 49 O.R. (3d) 187 (Ont. S.C.J.) (expert was the party's lawyer in related U.S. proceedings); *R. v. Docherty*, 2010 ONSC 3628 (Ont. S.C.J.) (expert was the defence counsel's father); *Ocean v. Economical Mutual Insurance Co.*, 2010 NSSC 315, 293 N.S.R. (2d)

394 (N.S. S.C.) (expert was also a party to the litigation); *Handley v. Punnett*, 2003 BCSC 294 (B.C. S.C.) (expert was also a party to the litigation); *Bank of Montreal v. Citak*, [2001] O.J. No. 1096 (Ont. S.C.J. [Commercial List]) (expert was effectively a "co-venturer" in the case due in part to the fact that 40 percent of his remuneration was contingent upon success at trial: para. 7); *Dean Construction Co. v. M.J. Dixon Construction Ltd.*, 2011 ONSC 4629, 5 C.L.R. (4th) 240 (Ont. Master) (expert's retainer agreement was inappropriate); *Hutchingame v. Johnstone*, 2006 BCSC 271 (B.C. S.C.) (expert stood to incur liability depending on the result of the trial). In other cases, the expert's stance or behaviour as an advocate has justified exclusion: see, e.g., *Carmen Alfano Family Trust v. Piersanti*, 2012 ONCA 297, 291 O.A.C. 62 (Ont. C.A.); *Kirby Lowbed Services Ltd. v. Bank of Nova Scotia*, 2003 BCSC 617 (B.C. S.C.); *Gould v. Western Coal Corp.*, 2012 ONSC 5184, 7 B.L.R. (5th) 19 (Ont. S.C.J.).

38 Many other cases have accepted, in principle, that lack of independence or impartiality can lead to exclusion, but have ruled that the expert evidence did not warrant rejection on the particular facts: see, e.g., *United City Properties Ltd. v. Tong*, 2010 BCSC 111 (B.C. S.C.); *R. v. Inco Ltd.* (2006), 80 O.R. (3d) 594 (Ont. S.C.J.). This was the position of the Court of Appeal in this case: para. 109; see also para. 121.

39 Some Canadian courts, however, have treated these matters as going exclusively to weight rather than to admissibility. The most often cited cases for this proposition are probably *R. v. Klassen*, 2003 MBQB 253, 179 Man. R. (2d) 115 (Man. Q.B.), and *Gallant v. Brake-Patten*, 2012 NLCA 23, 321 Nfld. & P.E.I.R. 77 (N.L. C.A.). *Klassen* holds as admissible any expert evidence meeting the criteria from *Mohan*, with bias only becoming a factor as to the weight to be given to the evidence: see also *R. v. Violette*, 2008 BCSC 920 (B.C. S.C.). Similarly, the court in *Gallant* determined that a challenge to expert evidence that is based on the expert having a connection to a party or an issue in the case or a possible predetermined position on the case cannot take place at the admissibility stage: para. 89.

40 I conclude that the dominant approach in Canadian common law is to treat independence and impartiality as bearing not just on the weight but also on the admissibility of the evidence. I note that while the shareholders submit that issues regarding expert independence should go only to weight, they rely on cases such as *INCO* that specifically accept that a finding of lack of independence or impartiality can lead to inadmissibility in certain circumstances: R.F., at paras. 52-53.

### **(b) Other Jurisdictions**

41 Outside Canada, the concerns related to independence and impartiality have been addressed in a number of ways. Some are similar to the approach in Canadian law.

42 For example, summarizing the applicable principles in British law, Nelson J. in *Armchair Passenger Transport Ltd. v. Helical Bar Plc*, [2003] EWHC 367 (Eng. & Wales H.C. [T. & C.C.]), underlined that when an expert has an interest or connection with the litigation or a party thereto, exclusion will be warranted if it is determined that the expert is unwilling or unable to carry out his or her primary duty to the court: see also H. M. Malek et al., eds., *Phipson on Evidence* (18th ed. 2013), at pp. 1158-59. The mere fact of an interest or connection will not disqualify, but it nonetheless may do so in light of the nature and extent of the interest or connection in particular circumstances. As Lord Phillips of Worth Matravers, M.R., put it in a leading case, "[i]t is always desirable that an expert should have no actual or apparent interest in the outcome of the proceedings in which he gives evidence, but such disinterest is not automatically a precondition to the admissibility of his evidence": *Factortame Ltd. v. Secretary of State for the Environment, Transport & the Regions (Costs) (No.2)* (2002), [2002] EWCA Civ 932, [2003] Q.B. 381 (Eng. C.A.), at para. 70; see also *Gallaher International Ltd. v. Tlais Enterprises Ltd.*, [2007] EWHC 464 (Eng. Comm. Ct.); *Meat Corp. of Namibia Ltd. v. Dawn Meats (U.K.) Ltd.*, [2011] EWHC 474 (Eng. Ch. Div.); *Matchbet Ltd. v. Openbet Retail Ltd.*, [2013] EWHC 3067 (Eng. Ch. Div.), at paras. 312-17.

43 In Australia, the expert's objectivity and impartiality will generally go to weight, not to admissibility: I. Freckleton and H. Selby, *Expert Evidence: Law, Practice, Procedure and Advocacy* (5th ed. 2013), at p. 35. As the Court of Appeal of the state of Victoria put it: "... to the extent that it is desirable that expert witnesses should be under a duty to assist the Court, that has not been held and should not be held as disqualifying, in itself, an 'interested' witness from being competent to give expert evidence" (*FGT Custodians Pty Ltd. v. Fagenblat*, [2003] VSCA 33 (Australia Vic. Sup. Ct.), at para. 26 (AustLII); see also Freckleton and Selby, at pp. 186-88; *Collins Thomson Ltd. v. Clayton*, [2002] NSWSC 366 (New South Wales S.C.); *Kirch*

*Communications Pty Ltd. v. Gene Engineering Pty Ltd.*, [2002] NSWSC 485 (New South Wales S.C.); *SmithKline Beecham (Australia) Pty Ltd. v. Chipman*, [2003] FCA 796, 131 F.C.R. 200 (Australia Fed. Ct.)).

44 In the United States, at the federal level, the independence of the expert is a consideration that goes to the weight of the evidence, and a party may testify as an expert in his own case: *Rodriguez v. Pacificare of Texas Inc.* (1993), 980 F.2d 1014 (U.S. C.A. 5th Cir. 1993), at p. 1019; *Tagatz v. Marquette University* (1988), 861 F.2d 1040 (U.S. C.A. 7th Cir. 1988); *Apple Inc. v. Motorola, Inc.* (2014), 757 F.3d 1286 (U.S. C.A. Fed. Cir.), at p. 1321. This also seems to be a fair characterization of the situation in the states: *Corpus Juris Secundum*, vol. 32 (2008), at p. 325 ("The bias or interest of the witness does not affect his or her qualification, but only the weight to be given the testimony.").

### (c) Conclusion

45 Following what I take to be the dominant view in the Canadian cases, I would hold that an expert's lack of independence and impartiality goes to the admissibility of the evidence in addition to being considered in relation to the weight to be given to the evidence if admitted. That approach seems to me to be more in line with the basic structure of our law relating to expert evidence and with the importance our jurisprudence has attached to the gatekeeping role of trial judges. Binnie J. summed up the Canadian approach well in *J. (J.-L.)*: "The admissibility of the expert evidence should be scrutinized at the time it is proffered, and not allowed too easy an entry on the basis that all of the frailties could go at the end of the day to weight rather than admissibility" (para. 28).

#### (2) The Appropriate Threshold

46 I have already described the duty owed by an expert witness to the court: the expert must be fair, objective and non-partisan. As I see it, the appropriate threshold for admissibility flows from this duty. I agree with Prof. (now Justice of the Ontario Court of Justice) Paciocco that "the common law has come to accept ... that expert witnesses have a duty to assist the court that overrides their obligation to the party calling them. If a witness is unable or unwilling to fulfill that duty, they do not qualify to perform the role of an expert and should be excluded": "*Taking a 'Goudge' out of Bluster and Blarney: an 'Evidence-Based Approach' to Expert Testimony*" (2009), 13 *Can. Crim. L. R.* 135, at p. 152 (footnote omitted). The expert witnesses must, therefore, be aware of this primary duty to the court and able and willing to carry it out.

47 Imposing this additional threshold requirement is not intended to and should not result in trials becoming longer or more complex. As Prof. Paciocco aptly observed, "if inquiries about bias or partiality become routine during *Mohan voir dires*, trial testimony will become nothing more than an inefficient reprise of the admissibility hearing": "*Unplugging Jukebox Testimony in an Adversarial System: Strategies for Changing the Tune on Partial Experts*" (2009), 34 *Queen's L.J.* 565 ("Jukebox"), at p. 597. While I would not go so far as to hold that the expert's independence and impartiality should be presumed absent challenge, my view is that absent such challenge, the expert's attestation or testimony recognizing and accepting the duty will generally be sufficient to establish that this threshold is met.

48 Once the expert attests or testifies on oath to this effect, the burden is on the party opposing the admission of the evidence to show that there is a realistic concern that the expert's evidence should not be received because the expert is unable and/or unwilling to comply with that duty. If the opponent does so, the burden to establish on a balance of probabilities this aspect of the admissibility threshold remains on the party proposing to call the evidence. If this is not done, the evidence, or those parts of it that are tainted by a lack of independence or by impartiality, should be excluded. This approach conforms to the general rule under the *Mohan* framework, and elsewhere in the law of evidence, that the proponent of the evidence has the burden of establishing its admissibility.

49 This threshold requirement is not particularly onerous and it will likely be quite rare that a proposed expert's evidence would be ruled inadmissible for failing to meet it. The trial judge must determine, having regard to both the particular circumstances of the proposed expert and the substance of the proposed evidence, whether the expert is able and willing to carry out his or her primary duty to the court. For example, it is the nature and extent of the interest or connection with the litigation or a party thereto which matters, not the mere fact of the interest or connection; the existence of some interest or a relationship does not

automatically render the evidence of the proposed expert inadmissible. In most cases, a mere employment relationship with the party calling the evidence will be insufficient to do so. On the other hand, a direct financial interest in the outcome of the litigation will be of more concern. The same can be said in the case of a very close familial relationship with one of the parties or situations in which the proposed expert will probably incur professional liability if his or her opinion is not accepted by the court. Similarly, an expert who, in his or her proposed evidence or otherwise, assumes the role of an advocate for a party is clearly unwilling and/or unable to carry out the primary duty to the court. I emphasize that exclusion at the threshold stage of the analysis should occur only in very clear cases in which the proposed expert is unable or unwilling to provide the court with fair, objective and non-partisan evidence. Anything less than clear unwillingness or inability to do so should not lead to exclusion, but be taken into account in the overall weighing of costs and benefits of receiving the evidence.

50 As discussed in the English case law, the decision as to whether an expert should be permitted to give evidence despite having an interest or connection with the litigation is a matter of fact and degree. The concept of apparent bias is not relevant to the question of whether or not an expert witness will be unable or unwilling to fulfill its primary duty to the court. When looking at an expert's interest or relationship with a party, the question is not whether a reasonable observer would think that the expert is not independent. The question is whether the relationship or interest results in the expert being unable or unwilling to carry out his or her primary duty to the court to provide fair, non-partisan and objective assistance.

51 Having established the analytical framework, described the expert's duty and determined that compliance with this duty goes to admissibility and not simply to weight, I turn now to where this duty fits into the analytical framework for admission of expert opinion evidence.

#### ***F. Situating the Analysis in the Mohan Framework***

##### ***(1) The Threshold Inquiry***

52 Courts have addressed independence and impartiality at various points of the admissibility test. Almost every branch of the *Mohan* framework has been adapted to incorporate bias concerns one way or another: the proper qualifications component (see, e.g., *Bank of Montreal; Dean Construction; Agribrands Purina Canada Inc. v. Kasamekas*, 2010 ONSC 166 (Ont. S.C.J.); *R. v. Demetrius* [2009 CarswellOnt 2548] (Ont. S.C.J.)], 2009 CanLII 22797; the necessity component (see, e.g., *Docherty; Alfano*); and during the discretionary cost-benefit analysis (see, e.g., *United City Properties; Abbey* (ONCA)). On other occasions, courts have found it to be a stand-alone requirement: see, e.g., *Docherty; International Hi-Tech Industries Inc. v. FANUC Robotics Canada Ltd.*, 2006 BCSC 2011 (B.C. S.C.); *Casurina Ltd. Partnership v. Rio Algom Ltd.* (2002), 28 B.L.R. (3d) 44 (Ont. S.C.J. [Commercial List]); *Prairie Well Servicing Ltd. v. Tundra Oil & Gas Ltd.*, 2000 MBQB 52, 146 Man. R. (2d) 284 (Man. Q.B.). Some clarification of this point will therefore be useful.

53 In my opinion, concerns related to the expert's duty to the court and his or her willingness and capacity to comply with it are best addressed initially in the "qualified expert" element of the *Mohan* framework: S. C. Hill, D. M. Tanovich and L. P. Strezos, *McWilliams' Canadian Criminal Evidence* (5th ed. (loose-leaf)), vol. 2, at s. 12:30 20.50; see also *Deemar v. College of Veterinarians (Ontario)*, 2008 ONCA 600, 92 O.R. (3d) 97 (Ont. C.A.), at para. 21; Lederman, Bryant and Fuerst, at pp. 826-27; *Halsbury's Laws of Canada: Evidence*, at para. HEV-152 "Partiality"; *The Canadian Encyclopedic Digest* (Ont. 4th ed. (loose-leaf)), vol. 24, Title 62 — Evidence, at § 469. A proposed expert witness who is unable or unwilling to fulfill this duty to the court is not properly qualified to perform the role of an expert. Situating this concern in the "properly qualified expert" ensures that the courts will focus expressly on the important risks associated with biased experts: Hill, Tanovich and Strezos, at s. 12:30.20.50; Paciocco, "Jukebox", at p. 595.

##### ***(2) The Gatekeeping Exclusionary Discretion***

54 Finding that expert evidence meets the basic threshold does not end the inquiry. Consistent with the structure of the analysis developed following *Mohan* which I have discussed earlier, the judge must still take concerns about the expert's independence and impartiality into account in weighing the evidence at the gatekeeping stage. At this point, relevance, necessity, reliability and absence of bias can helpfully be seen as part of a sliding scale where a basic level must first be achieved in order to meet

the admissibility threshold and thereafter continue to play a role in weighing the overall competing considerations in admitting the evidence. At the end of the day, the judge must be satisfied that the potential helpfulness of the evidence is not outweighed by the risk of the dangers materializing that are associated with expert evidence.

#### **G. Expert Evidence and Summary Judgment**

55 I must say a brief word about the procedural context in which this case originates — a summary judgment motion. (I note that these comments relate to the summary judgment regime under the Nova Scotia rules and that different considerations may arise under different rules.) It is common ground that the court hearing the motion can consider only admissible evidence. However, under the Nova Scotia jurisprudence, which is not questioned on this appeal, it is not the role of a judge hearing a summary judgment motion in Nova Scotia to weigh the evidence, draw reasonable inferences from evidence or settle matters of credibility: *Coady v. Burton Canada Co.*, 2013 NSCA 95, 333 N.S.R. (2d) 348 (N.S. C.A.), at paras. 42-44, 87 and 98; *Fougere v. Blunden Construction Ltd.*, 2014 NSCA 52, 345 N.S.R. (2d) 385 (N.S. C.A.), at paras. 6 and 12. Taking these two principles together, the result in my view is this. A motions judge hearing a summary judgment application under the Nova Scotia rules must be satisfied that proposed expert evidence meets the threshold requirements for admissibility at the first step of the analysis, but should generally not engage in the second step cost-benefit analysis. That cost-benefit analysis, in anything other than the most obvious cases of inadmissibility, inevitably involves assigning weight — or at least potential weight — to the evidence.

#### **H. Application**

56 I turn to the application of these principles to the facts of the case. In my respectful view, the record amply sustains the result reached by the majority of the Court of Appeal that Ms. MacMillan's evidence was admissible on the summary judgment application. Of course, the framework which I have set out in these reasons was not available to either the motions judge or to the Court of Appeal.

57 There was no finding by the motions judge that Ms. MacMillan was in fact biased or not impartial or that she was acting as an advocate for the shareholders: C.A. reasons, at para. 122. On the contrary, she specifically recognized that she was aware of the standards and requirements that experts be independent. She was aware of the precise guidelines in the accounting industry concerning accountants acting as expert witnesses. She testified that she owed an ultimate duty to the court in testifying as an expert witness: A.R., vol. III, at pp. 75-76; C.A. reasons, at para. 134. To the extent that the motions judge was concerned about the "appearance" of impartiality, this factor plays no part in the test for admissibility, as I have explained earlier.

58 The auditors' claim that Ms. MacMillan lacks objectivity rests on two main points which I will address in turn.

59 First, the auditors say that the earlier work done for the shareholders by the Kentville office of Grant Thornton "served as a catalyst and foundation for the claim of negligence" against the auditors and that this "precluded [Grant Thornton] from acting as 'independent' experts in this case": A.F., at paras. 17 and 19. Ms. MacMillan, the auditors submit, was in an "irreconcilable conflict of interest, in that she would inevitably have to opine on, and choose between, the actions taken and standard of care exercised by her own partners at Grant Thornton" and those of the auditors: A.F., at para. 21. This first submission, however, must be rejected.

60 The fact that one professional firm discovers what it thinks is or may be professional negligence does not, on its own, disqualify it from offering that opinion as an expert witness. Provided that the initial work is done independently and impartially and the person put forward as an expert understands and is able to comply with the duty to provide fair, objective and non-partisan assistance to the court, the expert meets the threshold qualification in that regard. There is no suggestion here that Grant Thornton was hired to take a position dictated to it by the shareholders or that there was anything more than a speculative possibility of Grant Thornton incurring liability to them if the firm's opinion was not ultimately accepted by the court. There was no finding that Ms. MacMillan was, in fact, biased or not impartial, or that she was acting as an advocate for the shareholders. The auditors' submission that she somehow "admitted" on her cross-examination that she was in an "irreconcilable conflict" is not borne out by a fair reading of her evidence in context: A.R., vol. III, at pp. 139-45. On the contrary, her evidence was clear that she understood her role as an expert and her duty to the court: *ibid.*, at pp. 75-76.

61 The auditors' second main point was that Ms. MacMillan was not independent because she had "incorporated" some of the work done by the Kentville office of her firm. This contention is also ill founded. To begin, I do not accept that an expert lacks the threshold qualification in relation to the duty to give fair, objective and non-partisan evidence simply because the expert relies on the work of other professionals in reaching his or her own opinion. Moreover, as Beveridge J.A. concluded, what was "incorporated" was essentially an exercise in arithmetic that had nothing to do with any accounting opinion expressed by the Kentville office: C.A. reasons, at paras. 146-49.

62 There was no basis disclosed in this record to find that Ms. MacMillan's evidence should be excluded because she was not able and willing to provide the court with fair, objective and non-partisan evidence. I agree with the majority of the Court of Appeal who concluded that the motions judge committed a palpable and overriding error in determining that Ms. MacMillan was in a conflict of interest that prevented her from giving impartial and objective evidence: paras. 136-50.

#### **IV. Disposition**

63 I would dismiss the appeal with costs.

*Appeal dismissed.*

*Pourvoi rejeté.*
