Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiff investors previously had motion for class certification dismissed — Defendant mutual fund managers were engaged in trading tactic that made profit for them at expense of longer-term investors such as plaintiffs — Managers were investigated by Ontario Securities Commission (OSC) and entered into settlement agreements from which they were required to directly compensate investors — Plaintiff investors claimed that OSC settlements were not full compensation — Motion judge agreed that investors' application for certification met most of applicable criteria, but ruled that OSC settlement met requirements of behaviour modification and providing investors access to justice — Investors claimed that motion judge erred in analysis of proper procedure — Investors appealed from dismissal of original motion — Appeal allowed — Motion judge failed to apply proper evidentiary burden, which was low on investors at early stage of action — As investors had some evidence of claim for compensation, they met their evidentiary burden for class certification.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiff investors previously had motion for class certification dismissed — Defendant mutual fund managers were engaged in trading tactic that made profit for them at expense of longer-term investors such as plaintiffs — Managers were investigated by Ontario Securities Commission and entered into settlement agreements from which they were required to directly compensate investors — Plaintiff investors claimed that OSC settlements were not full compensation — Motion judge agreed that investors' application for certification met most of applicable criteria, but ruled that OSC settlement met requirements of behaviour modification and providing investors access to justice — Investors claimed that motion judge erred in analysis of proper procedure — Investors appealed from dismissal of original motion — Appeal allowed — Motion judge properly defined class as held by OSC to be certain group of investors.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiff investors previously had motion for class certification dismissed — Defendant mutual fund managers were engaged in trading tactic that made profit for them at expense of longer-term investors such as plaintiffs — Managers were investigated by Ontario Securities Commission and entered into settlement agreements from which they were required to directly compensate investors — Plaintiff investors claimed that OSC settlements were not full compensation — Motion judge agreed that investors' application for certification met most of applicable criteria, but ruled that OSC settlement met requirements of behaviour modification and providing investors access to justice — Investors claimed that motion judge erred in analysis of proper procedure — Investors appealed from dismissal of original motion — Appeal allowed — Issue of damages did not need to be certified as common issue at this stage of litigation.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiff investors previously had motion for class certification dismissed — Defendant mutual fund managers were engaged in trading tactic that made profit for them at expense of longer-term investors such as plaintiffs — Managers were investigated by Ontario Securities Commission and entered into settlement agreements from which they were required to directly compensate investors — Plaintiff investors claimed that OSC settlements were not full compensation — Motion judge agreed that investors' application for certification met most of applicable criteria, but ruled that OSC settlement met requirements of behaviour modification and providing investors access to justice — Investors claimed that motion judge erred in analysis of proper procedure — Investors appealed from dismissal of original motion — Appeal allowed — Motion judge failed to apply proper evidentiary burden, which was low on investors at early stage of action — Finding that OSC proceeding was preferable was improper as investors were not fully compensated — Motion judge erred by considering settlement approval at certification stage — Action was properly characterized as being for losses over and above what was compensated in OSC settlement — Taking factors for settlement approval criteria in account had effect of forcing settlement on investors without determination of whether this settlement was for — Past settlement not proper factor at preferable procedure stage.

APPEAL from judgment reported at *Fischer v. IG Investment Management Ltd.* (2010), 89 C.P.C. (6th) 205, 2010 CarswellOnt 135, 2010 ONSC 296 (Ont. S.C.J.), dismissing plaintiff's motion for certification.

**Molloy J.:**

**I. Introduction**

1 This is an appeal from the decision of Perell J. dated January 12, 2010 dismissing the plaintiffs' motion for certification as a class proceeding. As of the date of the argument of this appeal, three of the five defendants had entered into settlements with the plaintiffs. The remaining defendants are CI Mutual Funds Inc. ("CI") and AIC Limited ("AIC").

2 The defendants are mutual fund managers. In November 2003, the Ontario Securities Commission ("OSC") launched an investigation into the practice of "market timing" in the mutual fund industry. "Market timers" seek to take advantage of the fact that the daily value of a mutual fund is calculated only once a day at 4:00 pm EST. Because of time zone differences, the prices of securities principally traded on foreign exchanges may be as much as 12-15 hours old at the time the daily mutual fund valuation is done. As a result, the value may be, for a short period of time, artificially low. Market timers purchase mutual funds they believe are undervalued for a short-term turnaround, unlike the vast majority of unit-holders who invest in mutual funds as long-term investments. Although market timing is not an illegal activity, the profit made by the market timers is at the expense of the long-term investors. Also, market timing activity in a fund impedes the efficient operation of the fund in a number of ways. The OSC was concerned that some managers of mutual funds were not taking steps to control market timing and were therefore not acting in the best interests of their clients.

3 At the conclusion of its investigation, the OSC took enforcement proceedings against the five defendant mutual fund managers for failing to act in the public interest in relation to market timing activity in their funds. All of the defendants entered into settlement agreements with the OSC pursuant to which they paid \$205.6 million in compensation directly to their investors. The settlements were approved by the OSC as being in the public interest. All of the settlements specified that they were without prejudice to the rights of any person to bring civil or other proceedings against the mutual fund managers with respect to the same subject matter. Shortly after the settlements were approved, this action was commenced.

4 The plaintiffs filed evidence on the certification motion that the OSC settlements did not constitute full compensation to investors. Indeed, according to the affidavit of Professor Zitzewitz (an expert relied upon by the plaintiffs) using what he believed to be the most accurate method of calculation, the harm to investors by market timing activity in these funds was \$760 million, and could be as high as \$831.9 million or as low as \$301.1 million using other calculation methods. Based on Professor Zitzewitz's preferred method of calculation: the total harm for which CI is responsible to investors is \$349.3 million, as compared to \$49.3 million which is the amount of the OSC settlement (being 1/7 of the total harm); and the total harm for which AIC is responsible is \$192.6 million, as compared to its OSC settlement of \$58.8 million (being 1/3 of the total harm). Thus, based on that method of calculation, the plaintiffs' current claim against AIC and CI, over and above the OSC settlement, is \$333.8 million.

5 The motion judge held that the plaintiffs had established four out of the five necessary criteria for certification: (1) the pleadings disclose a cause of action; (2) there is an identifiable class; (3) there are common issues of fact and law suitable for resolution in a class action; and (4) there are appropriate representative plaintiffs who could produce a workable litigation plan if some changes were made to the current plan. However, the motion judge found that the plaintiffs had not established the fifth criterion — that a class proceeding would be a "preferable procedure" — and this missing element was fatal to the plaintiffs' request for certification.

6 In his analysis of the preferable procedure requirement, the motion judge held that if he ignored the OSC settlement, he would conclude that the class action was the preferable procedure to resolve the plaintiffs' claims.<sup>1</sup> He accepted that the class action would be a "fair, efficient and manageable procedure."<sup>2</sup> However, he concluded that as part of the "preferable procedure" analysis, the OSC proceedings must be taken into account in determining whether there is an alternative method for resolving the plaintiffs' claims. It was on this aspect of the test that he found the plaintiffs had failed to meet the requirement for certification. The motion judge concluded that the OSC settlement satisfied the goal of behaviour modification and that the OSC proceedings provided the plaintiffs with "access to justice." He therefore ruled that the class action was not the preferable procedure for resolving the plaintiffs' claims and dismissed the motion for certification. It is clear that but for the OSC settlements, the action would have been certified.

7 The principal issue on this appeal is whether the motion judge erred in his analysis of the preferable procedure, and in particular in his finding that the OSC proceeding was a preferable alternative to the class action. If the plaintiffs are not successful on this point, then the appeal as a whole must fail as it is crucial to certification. If successful on this primary point, the plaintiffs also argue that the motion judge erred in his analysis of the identifiable class by improperly rejecting evidence with respect to market timers other than those identified by the OSC and by foreclosing the possibility that newly identified market timers could be excluded from the class over time. The plaintiffs also submit that the motions judge erred in failing to certify common issues with respect to aggregate and punitive damages and other ancillary issues.

8 For the reasons that follow, I believe that the motion judge's analysis of the impact of the OSC settlement on the issue of preferable procedure is fundamentally flawed as a question of law. The OSC proceedings had already been completed at the time this action was commenced. The action does not seek the recovery of the \$205 million already paid; it seeks recovery of the damages not recovered through the OSC proceeding. On the evidence before the motion judge, which must be accepted for purposes of the motion, a significant amount of money is still owed to these plaintiffs. It cannot be said that the OSC process is a preferable procedure for recovering damages it failed to recover in the first place. There is no possibility of an OSC proceeding to recover this short-fall on a going-forward basis. The effect of what the motion judge did was to treat the OSC proceeding as a reasonable settlement of the plaintiffs' claims, which was an improper consideration in the context of this certification motion. Unless it can be said that the plaintiffs have achieved full, or at the very least substantially full, recovery, they are entitled to maintain this action. There is no other viable alternative for recovering the shortfall after the OSC settlement and all of the other tests for certification had been met. Accordingly, in my view, the certification motion ought to have been granted.

9 However, on the other issues raised by the plaintiffs on this appeal, I find no reviewable error by the motion judge and would dismiss the appeal on those points.

## **II. The Standard of Review**

10 The standard of review from a judge's decision on a pure question of law is that of correctness. At the other end of the spectrum, a judge's findings of fact may only be interfered with on appeal if there is a "palpable and overriding error." For the most part, questions of mixed fact and law, where the legal questions are inextricable from the facts, are also reviewed on the basis of palpable or overriding error. However, where the decision can be traced to an error of law or a misapplication of the law to the facts, the correctness standard will apply.<sup>3</sup>

11 Appellate courts have recognized the special expertise of class action judges in this highly specialized area of the law, and have held that substantial deference is owed on certification decisions.<sup>4</sup>

12 However, appellate intervention is warranted where matters of general principle are at stake. The application of a wrong test is an error in principle and the decision which results can attract no deference.<sup>5</sup>

## **III. The Test for Certification**

13 The motion judge correctly identified the tests that must be satisfied for certification of an action as a class proceeding.

14 There are five requirements set out in s. 5(1) of the *Class Proceedings Act, 1992*<sup>6</sup> all of which must be met before a certification order can be made. The criteria are: (i) the pleadings disclose a cause of action; (ii) there is an identifiable class; (iii) there are common issues of fact or law; (iv) a class proceeding would be the preferable procedure to resolve the claim; and (v) there is a representative plaintiff who would adequately represent the interests of the class without conflict of interest and who has a workable litigation plan.

15 The motion judge found that all of the criteria for certification had been met, other than the preferable procedure requirement, provided the plaintiffs revised the litigation plan. There is no challenge to the motion judge's findings with respect to those elements of the test he found had been met. The plaintiffs submit that he ought to have included more common issues for certification and should have permitted a more expansive identifiable class. I will return to those points later. First, however, it is appropriate to deal with the preferable procedure point, which is pivotal to the success or failure of this appeal, and indeed, of this class action.

#### **IV. Preferable Procedure**

##### **(a) The Decision of the Motion Judge**

16 The motion judge considered the evidence of Professor Zitzewitz that by his calculation shareholders had sustained \$760 million in losses, and had received only \$205 million in compensation under the OSC settlement. The motion judge also considered the arguments of the defendants as to alleged flaws they said undermined Professor Zitzewitz's opinion. He noted that for purposes of certification, there is a "very low standard of proof" placed on plaintiffs in respect of showing a factual foundation for their claim, and held that the plaintiffs had satisfied him that there was "some basis in fact" for the allegation that the investors were not fully compensated as a result of the OSC settlements. In short, he accepted the plaintiffs' position that the OSC settlement "left the investors' money on the table" and that it was this money the investors sought to recover in the class action.<sup>7</sup>

17 The motion judge referred to the defendants' argument that there was "strong evidence that the OSC was: (a) competent to assess the investors' losses; (b) on a declared mission to obtain for the investors full compensation for their losses; and (c) publicly (in its reports, reasons for decision, orders and announcements) satisfied that it had achieved its restitutive aims." The motion judge agreed with the defendants "that this strong evidence does exist" and stated that it "may be true that the investors have already received all and possibly more compensation than they are entitled." However, he held that for purposes of the motion the defendants' evidence would have to be "so powerful that it totally overcame the evidence of the plaintiffs," which he found it did not.<sup>8</sup>

18 The motion judge summarized the general principles to be applied in considering the issue of preferable procedure, referring to well-established case authority. He stated that the court should consider: (a) the nature of the proposed common issues; (b) the individual issues that would remain after determination of the common issues; (c) the factors listed in the Act; (d) the complexity and manageability of the proposed action as a whole; (e) alternative procedures for dealing with the claims asserted; (f) the extent to which the certification furthers the objectives underlying the Act and (g) the rights of the parties. He also stated that the preferable procedure is to be judged "by reference to the purposes of access to justice, behaviour modification, and judicial economy, and by taking into account the importance of the common issues to the claims as a whole." Finally, he recognized that the court must consider the viability of alternative proceedings for determination of the plaintiffs' claims, noting that the defendants must support the proposition that the other procedure is preferred with an evidentiary foundation.<sup>9</sup>

19 The motion judge started his analysis of this issue by considering all of the factors without taking the OSC proceeding into account. As a result of that analysis, he would have found a class action to be the preferable procedure. He held that a class action would be a fair, efficient and manageable method of dealing with the claims and that the common issues trial would advance the claim substantially.

20 He then considered the impact of the OSC proceeding on his analysis. He first rejected a number of bases advanced by the defendants for holding the OSC proceeding to be preferable. In particular, he found that:

- (a) The Superior Court is just as capable as the OSC to calculate the investors' losses;
- (b) Saving on judicial resources is not a basis for refusing certification;
- (c) It does not set a bad precedent from a public policy perspective to allow the class action to proceed after an OSC settlement. There is no reason to believe that certification would discourage future efforts by the OSC to obtain compensation for investors or have any effect whatsoever on future activities of the OSC. Further, the OSC settlement agreements expressly reserved the rights of parties to bring court proceedings.
- (d) The plaintiffs are not being unfair or "piggish" in taking the OSC compensation and then starting a class action. They did not ask the OSC to champion their cause. There is no reason to doubt that the plaintiffs genuinely believe they have been under-compensated and they are doing nothing wrong in seeking certification of a class proceeding.

21 Next, he considered whether it was relevant to take the OSC proceeding into account and concluded that it was. In particular, he examined case authority in which courts considered the preferability of procedures outside the traditional court system, including:

- a no-fault scheme for compensation of up to \$5000 for individual claims based on pollution from a landfill site;<sup>10</sup>
- a compensation program before an adjudicative panel, capped at recovery of \$60,000 per claimant, for deaf children who had been victims of abuse in a residential school;<sup>11</sup>
- an alternative dispute resolution process voluntarily offered to victims of abuse in an aboriginal residential school;<sup>12</sup>
- the availability of remedies before statutory tribunals for recovery of wages by dismissed employees;<sup>13</sup>
- voluntary programs instituted to review complaints from customers, sometimes accompanied by a right of appeal to an independent third-party adjudicator.<sup>14</sup>

22 In some of these cases, the alternative procedure was considered to be preferable, and in others, it was not. From this analysis, the motion judge drew what he referred to as "two modest conclusions." First, he found it was appropriate to include the OSC proceedings and settlements as part of the preferable procedure analysis. Second, he concluded that he should consider "a variety of open-ended factors to determine whether it is a genuine alternative that serves the purposes of a class proceeding, namely access to justice, behaviour modification and judicial economy."<sup>15</sup>

23 On the issue of behaviour modification, the motion judge noted that all parties acknowledged on the motion (as they did on the appeal) that the OSC settlement accomplished this purpose both with respect to the defendants and for fund managers of other mutual funds in the future. He then found judicial economy to be neutral factor. He therefore concluded that the issue of certification turned on whether the OSC proceedings and settlements provided access to justice for the investors.<sup>16</sup>

24 On the question of access to justice, the motion judge first stated that the preferable procedure did not necessarily have to include an adjudication process. He noted that most class actions result in settlements rather than the adjudication of rights after a trial, but that obtaining a settlement was nevertheless access to justice.<sup>17</sup>

25 On this point, he observed that the OSC staff and the OSC "gave itself the mission of obtaining restitutionary compensation for the harm suffered by the investors." The plaintiffs therefore received the same *form* of remedy they would receive in a class

action, even though they argue that the amount of the compensation received is inadequate. He distinguished those cases where the remedy obtainable in the alternative procedure was of a different kind than was sought in the litigation.<sup>18</sup>

26 Next, he observed that the OSC Staff "played much the same role as would be played by class counsel in a class proceeding," including taking an adversarial stance and demanding concessions and compensation. He also noted that the OSC's settlement agreements "left nothing on the table" about the defendants' responsibility to the investors, whatever might be said about the quantum of compensation.<sup>19</sup>

27 The motion judge stated that he agreed with the position of plaintiffs' counsel that the certification process should not be converted into a settlement approval hearing in which the court considers whether a settlement is in the best interests of the class members. However, he held that it was nevertheless relevant to consider the criteria taken into account in approval of a settlement when considering access to justice. In particular, he held that the following factors were relevant to consider: "(a) likelihood of recovery or likelihood of success; (b) amount and nature of discovery, evidence or investigation; (c) settlement terms and conditions; (d) recommendation and experience of counsel; (e) future expense and likely duration of litigation and risk; (f) recommendation of neutral parties, if any; (g) the presence of good faith, arms length bargaining and the absence of collusion; (h) the degree and nature of communications by counsel and the representative plaintiffs with class members during the litigation; and (i) information conveying to the court the dynamics of and the positions taken by the parties during the negotiation."<sup>20</sup>

28 The motion judge held that, with the exception of the communications with members of the class which was not applicable, all of these factors "favour the conclusion that the OSC proceeding was the preferable procedure." He stated that, "These observations taken separately or taken together provide sufficient reasons for concluding that the OSC proceedings and the settlement agreements satisfied the access to justice purposes of the *Class Proceedings Act*." He noted, however, that the plaintiffs still had the argument that the quality of access to justice was in doubt because the OSC may have left investors' money on the table.

29 He then referred to two arguments by the defendant in response to the plaintiffs' point about quantum, one of which he accepted, and the other of which he said he did not. The first argument was that the court should not second-guess the access to justice provided by the OSC upon being satisfied that the OSC's purpose was to obtain restitution and that the process to do so was adequate. The motion judge agreed with that principle. He was satisfied that the OSC purpose was to obtain restitution, based on material in which the OSC had stated that intention. He was also satisfied as to the adequacy of the process before the OSC.<sup>21</sup> The plaintiffs had pointed out that: they had no opportunity to participate in the investigative and enforcement stages of the OSC proceedings; were not advised as to the basis upon which the settlement figure had been arrived at; and were given insufficient notice of the approval hearings to have any meaningful opportunity to participate. However, the motion judge found that these were issues of procedural fairness, not access to justice.<sup>22</sup> He accepted that the investors did not have the right to opt out of the OSC proceeding as they would be entitled to do in a class action, but noted that the OSC settlement did not bind the investors and in any event they would be highly unlikely to opt out of a class action because given the size of the individual claims and the difficulties of forensic proof, a class proceeding would be the only viable means for them to exercise their private rights.<sup>23</sup>

30 Although the motion judge acknowledged that the investors had no opportunity to participate in the OSC proceedings, he observed that a class action is a representative proceeding and individual investors would not be participating in the carriage of the action, even though they would be bound by the result. He reasoned that class proceedings do not guarantee individual claimants their "day in court" in the conventional sense.<sup>24</sup>

31 The second argument advanced by the defendants to counter the plaintiffs' point about the quantum of their claims was that the OSC settlement did in fact fully compensate the investors. The motion judge stated that he did not accept that argument. However, on this point, he did not return to his previous ruling that the plaintiffs had met the onus of establishing a basis in fact for their claim that they were owed compensation beyond the amount of the OSC settlement. Instead, he reasoned that he could

not accept that argument because to do so he would have to decide the merits of the action and quantify the damages. He then stated that both parties' argument about whether the settlement fully compensated the plaintiffs were "problematic as a measure of access to justice because the Plaintiffs' argument assumes the Defendants are liable and the Defendants' counterargument about the quality of the recovery assumes that the quantum closely approached the correct sum payable." He then stated, "In any event, I do not rely on any of these qualitative arguments because there is no way to test their soundness or truth short of an actual adjudication."<sup>25</sup>

32 He therefore concluded that the plaintiffs had not satisfied the preferability branch of the preferable procedure criterion, because the OSC procedure was a better alternative. This was fatal to the certification motion, even though the plaintiffs had succeeded on all of the other requisite elements of the test.

### (b) Analysis

33 In my opinion, the motion judge erred in law both in respect of the test he applied and the manner in which he applied it. I have three areas of concern arising from the motion judge's reasons: (1) he failed to apply the proper low evidentiary burden on the plaintiffs at this stage; (2) he improperly found that the already completed OSC proceeding was a preferable proceeding for the remaining portion of the plaintiffs' claims going forward; and (3) he erred in law by considering criteria for approval of a settlement at the certification stage.

34 In addition, I have one over-arching observation — it is necessary to recognize what this action is about. It is *not* about the \$108 million in losses already recovered from these two defendants; it *is* about the losses over and above that amount that the plaintiffs allege are still owing, and which the plaintiffs' expert estimates at \$333 million. In my opinion, the motion judge lost sight of that point and this led him into error when determining whether the OSC proceedings and the settlement agreements provided access to justice for the investors. I will deal with the three areas of concern in this context.

#### (i) Factual Foundation

35 In an earlier part of his reasons, the motion judge correctly held that the standard to be met by the plaintiffs in respect of the factual foundation for certification is a low one. In *Hollick v. Metropolitan Toronto (Municipality)*,<sup>26</sup> a case in which one of the central issues was preferable procedure, the Supreme Court of Canada described the standard as "some basis in fact to support the certification order." The "some basis in fact" standard has been referred to in other cases as a "minimum standard" or "very weak" evidentiary threshold.<sup>27</sup> The motion judge recognized that this low factual threshold applied for each of the certification requirements (other than the pleadings issue), as is consistent with the case law.<sup>28</sup> He also correctly applied that test in the earlier portion of his reasons and held that there was "some basis in fact" for the plaintiffs' assertion that the OSC settlement funds represented only a portion of their total damages. That should have been the end of his factual analysis with respect to this point, as it applied to all aspects of the certification test. However, later in his reasons when dealing with preferable procedure and access to justice, the motion judge erred in law by applying a more onerous standard on this point.

36 Counsel for the appellants (plaintiffs) argued that the motion judge also erred in finding that the defence had shown "strong evidence" that the investors received full compensation for their losses. I agree that this finding was an error by the motion judge. Indeed, in my view, there is no evidence at all to this effect. There were some statements in the OSC materials that the intention of OSC staff was to effect restitution, and there was a settlement reached. At the time of the approval of the settlement before the OSC, there was no disclosure of the method of calculation for the settlement amount, and despite the plaintiffs' requests, that information was not provided subsequently. There is therefore absolutely no way to evaluate the quantum of the OSC settlement based on material from the OSC proceeding itself and no other evidence to support the defendants' contention that it constitutes full recovery for the plaintiffs. The only actual evidence with respect to the quantum of loss that was before the motion judge was from the expert reports filed by the plaintiffs, which indicate that the OSC settlement was not even half of the total damages suffered. However, while I accept that the motion judge erred in concluding that this constituted "strong evidence of full compensation," I do not see this error as having contributed to his ultimate finding. Immediately after referring to this evidence as "strong," the motion judge nevertheless held that it was not sufficient to totally overcome the plaintiffs' evidence,

and that the plaintiffs should therefore be regarded as having met their onus. Therefore, any error with respect to assessing the strength of the defence evidence would appear to have had no impact.

37 When determining whether the plaintiffs have already had access to justice with respect to the full amount of their claims, the motion judge considered two arguments advanced by the defendants. One of the defendants' arguments was that the plaintiffs had already been fully compensated. The motion judge properly rejected that argument. I do have some difficulty with one aspect of the motion judge's analysis on this point. In my view, he erred with respect to the nature of the burden on the plaintiff. The motion judge held that both parties' arguments on this quantum of damages point were problematic and, in particular, he found that the plaintiffs' argument was problematic because it "assumes the defendants are liable." He then said he did not rely on *any* of the qualitative arguments (as to the quantum of recovery) "because there is no way to test their soundness or truth short of an actual adjudication." This is an erroneous analysis. The motion judge should have rejected the defendants' arguments because the plaintiffs had already satisfied the threshold of showing "some basis" for their position that they were still owed damages. Again, although this may be an error, it had no impact on the result since the motion judge rejected the defendants' argument in any event.

38 However, the same cannot be said with respect to the other argument made by the defendants in response to the plaintiffs' position on quantum. The defence argued that once it was established that the OSC purpose was to obtain restitutive compensation and that the OSC process was adequate, the court ought not to second-guess whether this constituted access to justice for the plaintiffs in respect of the full quantum of their claim. The motion judge accepted that defence argument. In my view, this does constitute a legal error with respect to the test to be applied and did affect the result.

39 The plaintiffs had met the onus of showing some evidence that they had a claim for compensation beyond what they had already received through the OSC proceeding. Once it was established for purposes of the certification motion that the OSC process did not provide full compensation to the plaintiffs, the purpose of the OSC proceeding or the intention of OSC staff were wholly irrelevant to the inquiry before the motion judge. There was no basis upon which he could have or should have deferred to the OSC by refusing to "second-guess" the OSC decision approving the settlement. This is particularly the case since the OSC settlement specifically contemplated future civil actions flowing from the same conduct and specifically reserved the rights of individuals to pursue those claims notwithstanding the settlement.

40 This is a fundamental error in principle by the motion judge and had the effect of negating the low factual burden on the plaintiffs and replacing it with one that was impossible for them to meet. This is an error which undermines the motion judge's determination that the class action was not the preferable procedure.

#### *(ii) Relevance of the OSC Proceeding*

41 The second area of concern flows from the first. The factual foundation for the class action is that the plaintiffs seek to recover damages significantly over and above those recovered in the OSC proceeding. It is therefore illogical to characterize the OSC proceeding as a preferable procedure for recovering that money which the OSC proceeding failed to recover in the first place. It is by definition not a preferable procedure in those circumstances.

42 I agree with the motion judge's conclusion that in determining whether there is another preferable procedure he was required to consider all types of resolution possibilities, not merely traditional court proceedings. I also agree that access to justice does not necessarily require access to a system that will guarantee an adjudication of the claims on their merits. The case law cited by the motion judge fully supports that position.

43 However, this is a novel case. None of the case law cited by the motion judge addresses the issue of whether, in determining if there is another preferable procedure, it is appropriate to look to the past and to a procedure that has been fully completed. Rather, all of the case authority looks at the existing claim being asserted and considers the availability of alternative procedures for resolving those claims on a going forward basis.

44 There are some circumstances in which prior proceedings are clearly relevant to whether a class action should be certified. For example, a proceeding that has already been completed may be taken into account in determining whether the

plaintiffs' claims are barred by *res judicata* or issue estoppel, or whether in light of the resolution reached, there is anything left of the plaintiffs' claims to be tried in the class action. There may even be situations where it would be appropriate consider the appropriateness of a class action in light of a prior settlement that resulted in substantial compensation for the plaintiffs, even if not reaching 100 cents on the dollar.

45 None of those issues arise here. There is no issue of *res judicata* or issue estoppel. The OSC proceedings are not a bar to a class action. On the contrary, the OSC settlements expressly reserved the rights of any person to bring other proceedings against the defendant with respect to the same conduct. Further, in light of the evidence presented by the plaintiffs with respect to their actual losses as compared to the amount of the settlement, it could not be said that there was nothing left to the plaintiffs' claim at the conclusion of the OSC proceeding. Indeed, on the evidence before the motion judge, the remaining amount of the plaintiffs' claim exceeds \$333 million.

46 It is not necessary to decide in this case whether, as a question of law, a fully completed prior proceeding or settlement can ever be considered to be a preferable procedure for an ongoing class proceeding. Since it is not necessary to this case, I leave that legal determination for another day. For purposes of this case, I am satisfied that there was no proper basis to refuse certification based on the OSC proceeding. In my view, the motion judge erred in finding that the access to justice criterion had been met in respect of the amount of the plaintiffs' claim that went significantly beyond the amounts recovered in the OSC settlement.

### (iii) Settlement Approval Criteria

47 The motion judge further erred by applying the test for approval of a settlement in the context of a certification motion. Although the motion judge stated that he agreed with the plaintiffs that the preferable procedure test should not be converted into a settlement approval hearing, the analysis he then conducted was even more unfair to the plaintiffs than if he had actually undertaken a proper settlement approval process. In particular, he held that in considering preferable procedure and the issue of access to justice, the court should consider the criteria that it takes into account when it approves or refuses a settlement. He then listed the criteria and concluded that "to the extent these criteria can be applied to the circumstances of the case at bar with the exception of communication to class members during the OSC proceedings, they favour the conclusion that the OSC proceeding was the preferable procedure."

48 A brief consideration of the nine criteria listed by the motion judge will illustrate the impropriety of taking them into account at the certification stage. The first criterion listed is the likelihood of recovery or success. The case law is clear that this is not a proper consideration to import into the certification analysis. As the Supreme Court of Canada stated in *Hollick*, the question at the certification stage is not whether the claim is likely to succeed, but whether the suit is appropriately prosecuted as a class action.<sup>29</sup>

49 The second criterion listed is the amount and nature of discovery, evidence or investigation. Again, this cannot properly be taken into account at the certification stage. There has been no discovery at this stage and the case law is clear that this cannot be counted against the plaintiffs. In *Lambert v. Guidant Corp.*,<sup>30</sup> Cullity J. discussed the reasons for the low evidentiary burden placed on plaintiffs at the certification stage, noting the inability of plaintiffs to muster all of the evidence until after production and discovery. He held at paras. 70-71:

Most fundamentally, the purpose of the certification stage of a class proceeding is to determine whether the requirements in section 5 (1) of the CPA are satisfied and, if so, to define the issues to be tried. It would be a reversal of the process to permit certification to be determined by deciding issues that are likely to be front and centre at a trial.

The use that defendants' counsel sought to make of evidence on this motion was not consistent with the above principles. The fact that productions and examinations for discovery do not occur prior to certification is consistent with the legislative intention that the certification stage is not the time for facts that bear on the merits of a plaintiff's claims to be determined. It would be inconsistent with the purpose of discovery - and manifestly unfair to plaintiffs - to deny certification on the basis of findings of fact that may be in dispute and that would likely be the subject of discoveries prior to trial. To a very large extent, this is what defendants' counsel urged me to do in this case.

50 The third criterion listed by the motion judge is the settlement terms and conditions. However, the motion judge specifically stated that he would not be entering into an approval of the settlement terms. It is difficult to see how this can be taken into account, without actually entering into an analysis of the fairness of the settlement in relation to the total amount of the plaintiffs' losses, which the motions judge purported not to be doing.

51 The fourth criterion is the recommendation and experience of counsel. It is not clear how this could be said to be relevant or how it would favour the OSC proceedings as the preferable procedure. There is no basis for assessing the experience of OSC Staff as compared to the expertise of plaintiffs' class action counsel and expert advisers. Further, the basis for the recommendation of the OSC settlement amounts has never been disclosed, so it is difficult to see how that "recommendation" can be influential in deciding anything.

52 The fifth criterion listed is the future expense and likely duration of the litigation and risk. Obviously, that favours a proceeding that is already completed, which by definition will have no duration and has no future expense. However, this ignores the fact that this action is about losses estimated at \$333.8 million that were not recovered in the OSC proceeding. The "risk" that this claim will not be recovered in the OSC is not a risk; it is an actuality. The application of this criterion makes no sense in this context.

53 The sixth criterion is the number of objectors and nature of objections. Again, this has no relevance in terms of the preferability of the OSC proceeding as compared to the class action. There can be no objectors to a settlement in the class action as it has not yet progressed to that stage. At the OSC, the investors were not involved in the process. There were two hearings before the OSC to approve the settlements negotiated by OSC staff. The OSC issued general public notices that these hearings would be proceeding. There was no direct notice to investors. The notice given for the first hearing was four days, and for the second hearing three days. No background information or material was provided to investors prior to the settlement hearings. The absence of objectors in that context is hardly surprising. However, the very fact that this class action was commenced may be considered to be similar in principle to an objection to the OSC settlement, and the expert evidence as to the significant quantum in damages left on the table may be relevant to the "nature" of the objection. If so, it is hard to see how this criterion could be said to favour the OSC proceeding over the class action.

54 The seventh criterion listed by the motions judge is the presence of good faith, arms length bargaining and the absence of collusion. Certainly, that can be said to be satisfied in the OSC process; but, it would equally be satisfied in the class action. Without conceding that this is a relevant consideration, I would at least regard it as neutral in its impact.

55 The eighth criterion is the degree and nature of communications by counsel and the representative plaintiffs with class members. This was the only criterion recognized by the motion judge as being inapplicable.

56 The ninth criterion is information conveying to the court the dynamics of and the positions taken by the parties during the negotiations. There is no information as to the conduct of the defendants during the negotiation of the OSC settlement and the plaintiffs were not involved at all. I do not see how this is a factor that could favour the OSC proceeding over the class action.

57 In my opinion, it was fundamentally wrong in law to take any of these factors into account. The effect of the motion judge doing so was to force the settlement on the plaintiffs without any consideration of whether it was a fair settlement in all of the circumstances. This is truly the worst of all worlds for the plaintiffs — the reasonableness or fairness of the settlement is not evaluated, but it is nevertheless used as the sole basis for refusing to certify the class action.

### **(c) Conclusion on Preferable Procedure**

58 In my opinion, the motion judge erred by applying the wrong test in his consideration of the preferable procedure test for certification. He considered factors relevant to the approval of a settlement that are not properly the subject of consideration at the certification stage, and which are fundamentally unfair to the plaintiffs at this stage. He also erred by concluding that the test for preferable procedure could be met by a proceeding that had already been concluded. This was a fundamental error in principle.

59 I do not wish to be taken as having ruled that the existence of a past settlement or a concluded proceeding relating to the same claims can never be taken into account at the certification stage. As I have already noted, concluded proceedings or payments may be relevant to issues of *res judicata* or issue estoppel, or to whether there are any remaining damages to support a cause of action. However, these are not factors at the preferable procedure stage. There may also be abuse of process issues that could arise if parties are attempting to re-litigate issues already dealt with in some manner before. I note, however, that in this case the motions judge made specific findings that there were no public policy concerns about permitting the class action to proceed notwithstanding the prior OSC proceeding. He also rejected the suggestion that the plaintiffs were acting greedily, or in any way, improperly in seeking to advance the claims they have raised in this action.

60 Accordingly, while I would not foreclose the possibility of a past settlement being relevant to a certification motion in another case in the future, this particular settlement was not relevant on this particular certification motion and should not have been taken into account. Since it was the only obstacle to certification, it follows that the certification order should now be made.

## V. Class Definition

### (a) *The Decision of the Motion Judge*

61 The motion judge found there was an identifiable class and, subject to two qualifications, accepted the definition of that class as proposed in the plaintiffs' "Option A." The plaintiffs submit that those two qualifications constitute errors in principle that should be set aside. The first qualification related to the plaintiffs' reliance on an article that appeared in the *Globe & Mail* to expand the number of mutual funds to be included beyond what was considered by the OSC. The second qualification related to the plaintiffs' stated intention to reserve the possibility of redefining the class following discoveries to exclude any investors found to have been market timers.

62 The motion judge held that a piece of investigative journalism reported in the *Globe & Mail* does not satisfy the weak evidentiary requirement of "some basis in fact" to support the expansion of the class definition to include these mutual funds. He noted that there was no "cross-examinable testimony" from the *Globe & Mail* investigators, and contrasted this to the conclusions from the OSC investigation to which extraordinary resources and expertise had been committed. He therefore refused to expand the class to include investors in mutual funds identified by the *Globe & Mail* as having participated in market timing activity.<sup>31</sup>

63 On the future exclusion issue, the motion judge accepted that the certification process should be a fluid and adaptable one, and also recognized that from time to time adjustments to the class definition are often permissible. However, he distinguished such adjustments from what the plaintiffs were seeking here because of the nature of the class. He first noted that market timing is not itself illegal and must therefore be defined in some manner to make the persons excluded from the class identifiable. The OSC, for purposes of its proceeding, defined a market timer to be a trader with a threshold of \$50,000 and a five-day duration (in-and-out) for their investment in the mutual fund. The motion judge found this to be an acceptable definition. He noted that unless some defined threshold and duration are part of the definition, every investor who made a propitiously timed trade would be excluded from the class, which would not be appropriate.<sup>32</sup>

64 The motion judge was concerned about creating a conflict of interest within the class if there was a specific provision that market timers defined in some other manner could later be excluded from the class. It would be in the best financial interest of some class members to have other class members excluded from the class because this exclusion would have the result of increasing the amounts of compensation for the class members who remained. He objected to manufacturing a conflict in this manner and concluded that the class definition should expressly specify that there shall be no exclusions from the class other than the defendants and the disruptive market timers identified by the OSC.<sup>33</sup>

### (b) *Analysis*

65 The motion judge did not err in respect of the legal test he applied to the evidentiary standard to be met by the plaintiffs. He correctly held that "some basis in fact" was the standard to be applied.

66 I do not see the motion judge's observation about the absence of "cross-examinable" testimony as changing that legal standard. He did not, for example, require that information from the OSC investigation be provided in a manner that could be cross-examined upon. Rather, his concern was that there was nothing in the form of actual evidence to support the reporter's evidence with respect to the "churn rates" said to be indicative of market timing and simply relying upon something you read in the newspaper is not enough to meet the "some basis in fact" standard. The fact that the plaintiffs' expert witnesses gave further evidence with respect to the significance of the "churn rates" does nothing to support the accuracy of the information in the newspaper as to the actual existence of the churn rates or where the reporter got that information.

67 I accept the plaintiffs' point that the motion judge would appear to have applied a different standard when considering the strength of the defence evidence that the plaintiffs have been fully compensated through the OSC settlement. However, as I have already noted, I believe the motion judge erred in the standard he applied to that evidence; that does not mean he was required to accept the plaintiffs' evidence at an equally unverifiable standard.

68 I do not see any error in principle in the manner in which the motion judge dealt with the *Globe & Mail* article, nor do I see any error of law. His decision is entitled to deference on this point and I would not interfere with it.

69 I am likewise of the view that there was no error in principle or error of law in the motion judge's findings with respect to the possibility of excluding other market timers at a later date, subject to one minor variation.

70 The class needs to be identifiable by objective criteria in order to be certified. Since market timing is not by itself an improper or illegal activity, or one which has a generally accepted definition, it needs to be defined for purposes of class definition. The OSC definition is one way to define the activity carried on by those who will be excluded from the class, but it is not the only way to define it. The evidence before the motion judge in this case supported that definition, and it was suggested by the plaintiff, so there is no difficulty with accepting that as the definition.

71 I see no error in the motion judge refusing to build into the definition the possibility that other activity will subsequently be defined as market timing and that those engaging in it will be excluded from the class. That creates the potential for conflict within the class as part of the definition of the class limits, particularly when the parameters as proposed by the plaintiffs are so vague. The plaintiffs propose, for example, including a notice stating, "If you are a class member who has engaged in frequent trading activity you may be excluded from the class by subsequent court order." It is impossible for prospective class members to know what conduct would be included within the vague term "frequent trading activity."

72 However, I do not see the need to build into the definition a proviso that no further exclusions will be permitted. There is no basis for concluding that the only market timers who can ever be excluded are those already identified by the OSC, provided that the same definition of market timer is accepted throughout. It is possible, for example, that the OSC missed some market timers who fit the already established criteria. There is no logical basis for continuing to include those traders as part of the class. As long as the definition of those excluded is settled as part of the definition of the class, there is no logical reason to restrict further amendment of the class as the action evolves. That unduly ties the hands of a future motion judge if grounds emerge which either of the parties believe warrant amendment to the class definition. There is substantial precedent for maintaining flexibility in these situations<sup>34</sup> and forbidding future amendment of the class, regardless of the reason, does not comply with those general principles.

73 Accordingly, while I agree with the motion judge's observations with respect to the proviso proposed by the plaintiffs referring to possible future exclusions as part of the class definition, I would not endorse the motion judge's proposed addition to the definition purporting to ban exclusions from the class for all time.

#### **(c) Conclusions as to Identifiable Class**

74 Accordingly, I would dismiss the appeal with respect to the challenges to the motion judge's findings on the identifiable class. The class definition should include the definition of the market timers excluded, in which case that there should not be a specific prohibition against future amendments to exclude others from the class.

## VI. Common Issues

### (a) *The Decision of the Motion Judge*

75 The motion judge found that whether the defendants owed a fiduciary duty of care or some other duty of care, and whether those duties of care had been breached, were common issues meeting the test for certification.

76 However, the motion judge rejected the plaintiffs' submission that there could be anything other than an individual assessment of damages in this case. He based that conclusion on the fact that there was no evidence proposing any method of assessing damages other than by summation of individual assessments, and he noted that the OSC settlement also involved individual assessments of loss. The motion judge also found that the effect of the dilution of the fund by market timing would be experienced differently by individual investors depending upon: (a) the timing and duration of that person's investment in the fund; (b) the occurrence of market timing during that period of investment; (c) the individual investor's own trading activity; and (d) the individual's tax situation. Further, the amount each investor had already received from the OSC settlement would have to be factored in on an individual basis. The motion judge therefore concluded that there was no basis in law or in fact for concluding that there were common issues with respect to the appropriate method of quantifying loss or the assessment of damages in the aggregate.<sup>35</sup> Given his conclusion about individual trials, the motion judge left pre-judgment and post-judgment interest to the trial judge.

77 The motion judge also refused to certify the availability of punitive damages as a common issue. He accepted that in some cases punitive damages can be a common issue. However, he held in this case an assessment of punitive damages would require an appreciation of: (a) the degree of misconduct; (b) the amount of harm caused; (c) the availability of other remedies; (d) the quantification of the compensatory damages; and (e) the adequacy of compensatory damages to achieve retribution, deterrence, and denunciation. He accepted that the last of these could be judged on a global basis, but since it was conceded by all parties that behaviour modification had already been achieved by the OSC settlement, this factor alone could not support making this a common issue. The motion judge concluded that all of the other issues could only be concluded on an individual basis.<sup>36</sup>

### (c) *Analysis and Conclusions as to Common Issues*

78 With respect to the issue of how to quantify the damages and whether this can be done on an aggregate basis, I agree with the motion judge that there is no basis in the evidence to conclude that this is possible in this case. It may emerge at the end of the common issues trial, and perhaps even at the conclusion of discoveries, that there is a viable alternative to individualized damage assessments. If so, the issue can be revisited at that time. For present purposes, however, there is no evidentiary foundation to support the argument that damages can be assessed globally and no basis upon which to interfere with the motion judge's refusal to designate these as common issues at this time.

79 In coming to his conclusion with respect to punitive damages not being a common issue, the motion judge relied on his own earlier decision in *Robinson v. Medtronic Inc.*,<sup>37</sup> which has subsequently been affirmed by the Divisional Court on appeal. For the same reasons as stated by this court in *Robinson*, I would dismiss the plaintiffs' appeal on the punitive damages issue here.

80 I agree with the respondents' position that the issues of costs of administration, distribution of damages, and interest calculations are administrative matters that can be taken care of in the course of the proceeding. They do not need to be certified as common issues at this stage.

## VII. Order

81 The appeal is allowed and a certification order shall issue on the condition that the motion judge approves a revised litigation plan. The common issues and the definition of the class shall be as directed by the motion judge, except with respect to the express restriction on future exclusions from the class definition, as set out in para. 73 above. The form of the formal order is to be settled before the motion judge in light of these reasons.

82 The parties may make written submissions on costs on a schedule to be agreed upon by them, with all of the submissions being delivered to the court by March 11, 2011.

*Appeal allowed.*

**Headnote**

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiffs commenced two class actions on behalf of those who paid licensing fees after 1990, claiming that charitable lottery licensing and administration fees collected by defendant municipalities were direct taxes and ultra vires — Certification judge certified proceedings for two classes, one for claims arising within two-year limitation period from 2006 on, and one for claims preserved by transitional provisions of Limitations Act, 2002 in 2002 and 2003, on ground that claims falling outside these periods were time-barred — Appellate court allowed plaintiffs' appeal and remitted matter back to certification judge — Certification judge then certified both class actions to 1990, finding that impact of limitations issues should be dealt with later — Appellate court dismissed municipalities' appeal — Municipalities appealed — Appeal allowed in part; judgment varied — Proceedings were certified as class actions, as modified — Class should not have been defined using arbitrary cut-off date of 1990 — Temporal boundary of class could be defined in rational way by reference to ultimate limitation period of 15 years, resulting in class definition encompassing persons who paid fees from 1993.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Subclass certification

Plaintiffs commenced two class actions on behalf of those who paid licensing fees after 1990, claiming that charitable lottery licensing and administration fees collected by defendant municipalities were direct taxes and ultra vires — Certification judge certified proceedings for two classes, one for claims arising from 2006 on, and one for claims arising in 2002 and 2003, on ground that claims falling outside these periods were time-barred — Appellate court allowed plaintiffs' appeal and remitted matter back to certification judge — Certification judge then certified both class actions to 1990, finding that impact of limitations issues should be dealt with later — Appellate court dismissed municipalities' appeal — Municipalities appealed — Appeal allowed in part; judgment varied — Proceedings were certified as class actions, as modified — Class was defined as persons who paid fees after 1993 — Subclass was certified respecting class members with presumptively time-barred claims — Certain issues that had been certified were only common to subclass members and were certified as issues of subclass.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Fair and adequate representation

Plaintiffs commenced two class actions on behalf of those who paid licensing fees after 1990, claiming that charitable lottery licensing and administration fees collected by defendant municipalities were direct taxes and ultra vires — Certification judge certified proceedings for two classes, one for claims arising from 2006 on, and one for claims arising in 2002 and 2003, on ground that claims falling outside these periods were time-barred — Appellate court allowed plaintiffs' appeal and remitted matter back to certification judge — Certification judge then certified both class actions to 1990, finding that impact of limitations issues should be dealt with later — Appellate court dismissed municipalities' appeal — Municipalities appealed — Appeal allowed in part; judgment varied — Proceedings were certified as class actions, as modified — Class was defined as persons who paid fees after 1993 — Subclass was certified respecting class members with presumptively time-barred claims — Representative plaintiffs were able to represent all class members — Representative plaintiffs had interest in advancing claims both timely and time-barred, and had interest with all class members in common issues of liability and damages.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiffs commenced two class actions on behalf of those who paid licensing fees after 1990, claiming that charitable lottery licensing and administration fees collected by defendant municipalities were direct taxes and ultra vires — Certification judge certified proceedings for two classes, one for claims arising from 2006 on, and one for claims arising in 2002 and 2003, on ground that claims falling outside these periods were time-barred — Appellate court allowed plaintiffs' appeal and remitted matter back to certification judge — Certification judge then certified both class actions to 1990, finding that impact of limitations issues should be dealt with later — Appellate court dismissed municipalities' appeal — Municipalities appealed — Appeal allowed in part; judgment varied — Proceedings were certified as class actions, as modified — Class was defined as persons who paid fees after 1993 — Subclass was certified respecting class members with presumptively time-barred claims — As modified, class proceeding was preferable procedure — Both liability and limitation period issues could be resolved relatively expeditiously — Although individual issues may remain after common issues resolved, this would not make proceeding unmanageable.

## Table of Authorities

### Cases considered by *G.R. Strathy C.J.O.*:

- Anderson v. Wilson* (1999), 122 O.A.C. 69, 1999 CarswellOnt 2073, 175 D.L.R. (4th) 409, 44 O.R. (3d) 673, 36 C.P.C. (4th) 17, 78 O.T.C. 320 (Ont. C.A.) — referred to
- Anderson v. Wilson* (2000), 2000 CarswellOnt 1837, 2000 CarswellOnt 1838, 258 N.R. 194 (note), 138 O.A.C. 200 (note), 185 D.L.R. (4th) vii (note) (S.C.C.) — referred to
- Caponi v. Canada Life Assurance Co.* (2009), 2009 CarswellOnt 113, 2009 C.E.B. & P.G.R. 8326 (headnote only), 70 C.C.L.I. (4th) 148, 74 C.C.P.B. 89, 72 C.P.C. (6th) 331 (Ont. S.C.J.) — referred to

Winkler, Warren K. et al., *The Law of Class Actions in Canada* (Toronto: Canada Law Book, 2014) (looseleaf)

APPEALS by defendant municipalities from judgment certifying two class actions which claim that charitable lottery licensing and administration fees collected by municipalities are direct taxes and *ultra vires*.

**G.R. Strathy C.J.O.:**

1 The appellant municipalities appeal the certification of two class actions which claim that charitable lottery licensing and administration fees collected by the municipalities are direct taxes and therefore *ultra vires* because the revenues far exceed the costs of administration: see *Eurig Estate, Re*, [1998] 2 S.C.R. 565 (S.C.C.).

2 The appellants acknowledge that some of the respondents' claims are appropriate for resolution by class action. They initially consented to certification of claims for fees paid within the limitation periods prescribed by the *Limitations Act, 2002*, S.O. 2002, c. 24, Sched. B.

3 The appellants' primary objection is to the temporal scope of the class, which includes charities that have paid fees since 1990. They say this reaches too far back in time. This means, they say, that some of the common issues are not common to all class members and a class proceeding is not the preferable procedure for the resolution of all claims.

4 These actions were commenced in 2008. Unfortunately, they are not yet out of the starting gate.

5 For the reasons that follow, it is my view that with some adjustment these proceedings meet the requirements of s. 5(1) of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 ("CPA"). The time has come to ring the bell and get them on their way.

**Judicial History**

6 These actions have had a tortuous judicial history, having been twice certified, with ensuing appeals. I will describe that history to the extent necessary to understand the issues on appeal.

**(1) Certification: Round One**

7 The plaintiffs commenced their actions on October 24, 2008. The proposed classes consisted of anyone who had paid licensing fees on or after January 1, 1990.

8 The certification judge initially certified a class of charities that paid licensing fees in two time periods:

- October 24, 2006 and thereafter; and
- October 24, 2002 to December 31, 2003.

9 The first period covered claims arising within two years of the commencement of this action and therefore within the two-year limitation period in the *Limitations Act, 2002*. The second period covered claims preserved by the transitional provisions of the *Limitations Act, 2002*.

10 In limiting the claim to these periods, the certification judge accepted the municipalities' argument that claims falling outside these periods could not succeed because they were time-barred. He explained that in *Kingstreet Investments Ltd. v. New Brunswick (Department of Finance)*, 2007 SCC 1, [2007] 1 S.C.R. 3 (S.C.C.), which concerned allegedly illegal fees collected by New Brunswick, the Supreme Court held that the limitation period began to run at the moment the province received payment. He rejected the plaintiffs' submission that the applicability of the *Limitations Act, 2002* should be determined at a later stage, either on a summary judgment motion or at trial.

11 The plaintiffs appealed, with leave, to the Divisional Court. That court allowed the appeal for two reasons.

12 First, the court held that the certification judge erred by interpreting *Kingstreet* as having established an absolute limitation period for claims of this type. The court noted that in *Kingstreet*, there was no discoverability issue that could have extended the applicable limitation period. By contrast, in this case the plaintiffs pleaded a discoverability/concealment issue.

13 Second, and related, the discoverability/concealment issue raised questions of fact that could only be decided based on evidence. However, the inquiry under s. 5(1)(a) of the *CPA* is based on the pleadings alone and does not engage any discretion or fact finding. While it was not clear to the Divisional Court that the certification judge had considered any evidence under s. 5(1)(a), if he had, it would constitute an error of law.

14 The Divisional Court remitted the matter back to the certification judge for reconsideration. It explained that it was open to him to truncate the class or the common issues or to dismiss the certification motion altogether, if he found the proceeding was inappropriate for certification without a temporal limit.

## **(2) Certification: Round Two**

15 The certification rehearing was held in November 2012. This time, the certification judge certified both class actions using the plaintiffs' originally proposed, and admittedly arbitrary, commencement date of January 1, 1990.

16 The certification judge held, first, that the statement of claim disclosed a cause of action.

17 Second, there was an identifiable class, defined as "all persons whether natural (including unincorporated associations) or corporate who have paid lottery licensing fees and/or lottery administration fees to [the municipalities] on or after January 1, 1990."

18 Third, the proposed claims raised common issues as to liability, damages and limitation periods. The common issues certified were as follows:

1. In pith and substance are the lottery licensing fees and lottery administration fees that have been charged by [the municipalities] to members of the class during the claim period or any part thereof, taxes imposed in a manner contrary to s. 53 of the *Constitution Act, 1867*?

2. Do the statements and/or the conduct by and on behalf of the Hall Charities Association and/or Bingo Sponsor Association give rise to a defence in the nature of *laches*, estoppel, waiver or analogous equitable defences that bind the class or bind an identifiable subclass subject to the defendant's right to move under Rule 20 and/or Rule 21 of the *Rules of Civil Procedure*?

3. Apart from any arguments relating to discoverability and/or concealment, what is the limitation period applicable to such claims arising prior to the coming into force of the *Limitations Act, 2002* on January 1, 2004?

4. What is the effect, if any, of the transitional provisions contained in the *Limitations Act, 2002* upon the claims of the class members?

5. At what time (or times), if any, should the class members ought to have known that they had a claim against [the municipalities], such that the applicable limitation period began to run against all class members, having regard to the principles of discoverability and concealment?

6 If the said fees are taxes which are *ultra vires* or otherwise illegal, are class members entitled to an accounting and/or restitution of such taxes paid to [the municipalities] subject to any applicable limitation period, *laches*, waiver and/or estoppel arguments?

7. Having regard to all the circumstances, is an award of punitive damages appropriate in this case?

19 The contentious common issues before this court are issues 3, 4 and 5, which relate to limitation periods.

20 The certification judge rejected the municipalities' submission that these issues, and particularly common issue 5, would be unmanageable. He noted that because the plaintiffs limited the discoverability question to what a "reasonable person ought to have known", there would be no need to inquire into what each class member actually knew in order to determine this common issue.

21 He held that the impact of the limitations issues should be dealt with later, rather than at the certification stage. He explained that after pleadings, production of documents and discovery, the application of the *Limitations Act, 2002* could be appropriate for determination on a summary judgment motion.

22 Fourth, building on this analysis, the certification judge noted that he had previously held that a class proceeding would be appropriate to adjudicate the timely claims. He added, at para. 26: "And now on further analysis I am of the opinion that it is appropriate to permit those individuals who are outside the basic limitation period to have an opportunity to be heard." In his view, the limitations issue did not make the proceeding unmanageable.

23 Fifth, and finally, the certification judge found that the representative plaintiffs were able to advance the claims of all class members, including those with claims outside the basic limitation period. He did not address the issue of whether it was appropriate to create a subclass pursuant to s. 5(2) of the *CPA*.

24 Justice Nolan granted the municipalities' motion for leave to appeal to the Divisional Court. In her view, the certification judge's preferability analysis did not demonstrate that he had considered the advantages and disadvantages of a class action and the manageability of a proceeding that included potentially time-barred claims.

25 Justice Nolan also noted, at para. 25, that the certification judge "did not provide an analysis of whether the *prima facie* time-barred claims actually formed a subclass".

26 The Divisional Court dismissed the municipalities' appeal. The court emphasized that the certification judge's decision was entitled to substantial deference unless he erred in law or principle.

27 The Divisional Court approved the class definition and was not persuaded that the certification judge erred by failing to identify a subclass.

28 It rejected the municipalities' argument that it would be unfair and inefficient to litigate the timely claims alongside the presumptively time-barred ones. It also rejected the municipalities' argument that the certification judge erred in finding that the representative plaintiffs could represent all class members. The court held that it was open to the certification judge to find that the representative plaintiffs were suitable and did not have a conflict of interest.

29 Finally, the Divisional Court held that it was open to the certification judge to find that there were common issues, including issues of discoverability, notwithstanding that some of the claims were clearly brought in time.

30 The appellants appeal to this court, with leave.

### **Analysis**

31 The appellants' submissions focused on: (a) the class definition; (b) whether subclasses are required; (c) the lack of commonality of some issues; (d) the inability of the representative plaintiffs to fairly represent the claims of all class members; and (e) whether a class proceeding is the preferable procedure for the resolution of the claims.

32 I will address each of these in turn. In summary, in my view the class definition was arbitrary and some common issues lacked commonality. These are not fatal defects, however. They can be corrected by modifying the class definition, creating a subclass and stating subclass common issues. A subclass representative is not required, at this time. Thus modified, a class action remains the preferable procedure for the resolution of the claims.

**(a) The Class Definition**

33 It is a basic principle that the plaintiff must define the class with precision and in a way that is neither over-inclusive nor under-inclusive: *Hollick v. Metropolitan Toronto (Municipality)*, 2001 SCC 68, [2001] 3 S.C.R. 158 (S.C.C.). In *Hollick*, McLachlin C.J. held that the putative plaintiff must show that the class has been defined sufficiently narrowly. She explained the nature of the exercise, at para. 21:

The requirement is not an onerous one. The representative need not show that everyone in the class shares the same interest in the resolution of the asserted common issue. There must be some showing, however, that the class is not unnecessarily broad — that is, that the class could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issue. Where the class could be defined more narrowly, the court should either disallow certification or allow certification on condition that the definition of the class be amended.

[Emphasis in original.]

34 In Warren K. Winker et al, *The Law of Class Actions in Canada* (Toronto: Canada Law Book, 2014), the authors set out the general principle that should guide the task of defining a class under s. 5(1)(b), at p. 93:

A satisfactory class definition should bind the persons who ought to be bound and, therefore, the definition should not be under-inclusive. By the same token, a satisfactory definition should not bind persons who ought not to be bound, and, therefore, the definition should not be over-inclusive. An optimal class definition should not arbitrarily exclude those who share the same cause of action, or include persons without a claim.

35 The certification judge recognized that s. 5(1)(b) of the *CPA* requires the plaintiff to define the class in a rational manner. He also correctly stated the purposes of the class definition: to identify persons who have a potential claim against the defendants; to define the parameters of the lawsuit so as to include persons who should be bound by the result; and to describe who is entitled to notice of certification. He acknowledged the January 1, 1990 date was arbitrary, but approved it nonetheless, suggesting that the scope of the class could be refined after a summary judgment motion based on the limitation period.

36 The Divisional Court saw no error in the date being "somewhat arbitrary". It suggested that having no date could make the proceeding unmanageable and that the date could be revisited after discoveries, once the parties had a better handle on the historical claims.

37 The actions were commenced on October 24, 2008. The "timely" claims, which the appellants concede can go forward, are those where payments were made: (a) from and after October 24, 2006, based on the standard two-year limitation period in the *Limitations Act, 2002*; and (b) between October 24, 2002 and December 31, 2003, based on the transition provisions in s. 24(7.1) of the *Limitations Act, 2002*, which provide for a six-year limitation period for claims relating to payments made before January 1, 2004.

38 The appellants argue that claims outside these periods are "presumptively time-barred" and do not meet the test for certification under s. 5(1)(c), (d) and (e) of the *CPA* — they lack commonality with the timely claims, the proposed representative plaintiffs are inappropriate, and a class proceeding is not the preferable procedure.

39 I agree with the appellants that the class should not have been defined using an arbitrary cut-off date. Arbitrariness in the class definition defeats some of the important purposes of class proceedings: binding all persons who ought to be bound by the decision, providing access to justice and achieving judicial economy. See *Dumoulin v. Ontario* (2005), 19 C.P.C. (6th) 234 (Ont. S.C.J.), at para. 20; *Ragoongan Estate v. Imperial Tobacco Canada Ltd.* (2005), 78 O.R. (3d) 98 (Ont. S.C.J.), at para. 12, aff'd (2008), 54 C.P.C. (6th) 167 (Ont. Div. Ct.). Nor was it appropriate to adopt a "wait and see" approach to the class definition, leaving it to the defendants to define its contours by a summary judgment motion. It is the plaintiffs' responsibility to define the class properly, not the defendants'.

40 How, then, should the class be defined in this case?

41 As I have explained, the appellants propose to limit the claims to the "timely" claims — i.e. those between October 24, 2002 and December 31, 2003, and from October 24, 2006 onward. The respondents complain that truncating the class in this way presupposes that claims outside these time periods are time-barred — a conclusion that depends on a factual inquiry regarding discoverability. However, the case law is clear: where the resolution of the limitation issue depends on a factual inquiry, such as when the plaintiff discovered or ought to have discovered the claim, the issue should not be decided on the motion for certification: *Serhan Estate v. Johnson & Johnson* (2006), 85 O.R. (3d) 665 (Ont. Div. Ct.), at paras. 140-145, leave to appeal to C.A. refused (unreported), leave to appeal to S.C.C. refused, [2006] S.C.C.A. No. 494 (S.C.C.). See also *McKenna v. Gammon Gold Inc.*, 2010 ONSC 1591, 88 C.P.C. (6th) 27 (Ont. S.C.J.), at paras. 38-39.

42 On the other hand, if the classes are defined using no temporal limit, the claims would reach back to 1969/1970 when Ontario first introduced the licencing regime for charitable gaming. All parties appear to agree that a class definition stretching back more than four decades may make the proceeding unmanageable.

43 In my view, the temporal boundary of the class can be defined in a rational way by reference to the ultimate limitation period in s. 15(2) of the *Limitations Act, 2002*. That provides, "No proceeding shall be commenced in respect of any claim after the 15th anniversary of the day on which the act or omission on which the claim is based took place." This would result in a class definition encompassing persons who paid fees from and after October 24, 1993.

44 Although s. 15(4) of the *Limitations Act, 2002* provides an exception to the ultimate limitation period in the case of wilful concealment, drawing the class boundary at the ultimate limitation period is not arbitrary because it separates claims that require proof of wilful concealment from those that do not.

45 As I will explain, concerns with respect to manageability can be addressed by the creation of a subclass, by stating common issues for the subclasses and by appropriate case management. I will discuss the subclass issue next.

#### **(b) Subclasses**

46 The court has the authority to certify a subclass of class members who have claims or defences not shared by all class members: *CPA*, s. 5(2). Subclasses are appropriate when there are common issues applicable to the class as a whole and other issues that are applicable to some, but not all class members: *Caputo v. Imperial Tobacco Ltd.* (2004), 44 C.P.C. (5th) 350 (Ont. S.C.J.), at para. 45.

47 Here, issues of liability and damages are common to all class members. However, the claims of class members with presumptively time-barred claims raise common issues of fact and law not shared by those with timely claims. They should form a subclass. I would therefore certify a subclass of persons who paid fees between October 24, 1993 and October 23, 2002 and between January 1, 2004 and October 23, 2006. These are the payments made within the "ultimate limitation period" in s. 15 of the *Limitations Act, 2002*, but not within the basic limitation period and not preserved by the transition rules of the statute.

#### **(c) Common Issues**

48 A common issue must be a substantial ingredient of every class member's claim and its resolution must serve to advance the resolution of that claim: see *Hollick*, at para. 18; *Dell'Aniello c. Vivendi Canada inc.*, 2014 SCC 1, [2014] 1 S.C.R. 3 (S.C.C.), at para. 46. The answer to the question must be capable of extrapolation to every member of the class: see *McKenna*, at para. 125; *Sankar v. Bell Mobility Inc.*, 2013 ONSC 5916, 52 C.P.C. (7th) 75 (Ont. S.C.J.), at paras. 91, 93, leave to appeal to Div. Ct. refused, 2013 ONSC 7529 (Ont. Div. Ct.).

49 The certification judge properly certified common issues relating to liability (issue 1), defences (issue 2) and remedies (issues 6 and 7) that are common to all class members.

50 However, common issues 3, 4 and 5 are of no interest to class members whose claims are timely. Those issues are only applicable to the subclass members, whose claims may be subject to a limitations defence. They should be subclass common issues.

**(d) Representative Plaintiffs**

51 The issue now is whether a separate subclass representative is required. The appellants say the representative plaintiffs cannot fairly and adequately represent the interests of the subclass.

52 They rely on the principle expressed in *Stone v. Wellington (County) Board of Education* (1999), 120 O.A.C. 296 (Ont. C.A.), at para. 10, leave to appeal to S.C.C. refused, (2000), [1999] S.C.C.A. No. 336 (S.C.C.), that "[w]here a representative plaintiff, for reasons personal to that plaintiff, is definitively shown as having no claim because of the expiry of a limitation period, he or she cannot be said to be a member of the proposed class."

53 The appellants say the representative plaintiffs have a conflict of interest, because they have admitted to knowledge of certain facts that makes it impossible to rebut the presumption that they "discovered" their claims outside the limitation period. They say the subclass members with presumptively time-barred claims would be prejudiced if they were represented by these plaintiffs. Moreover, say the appellants, the representative plaintiffs may be inclined to sacrifice their interests in the time-barred claims in order to prosecute their timely claims.

54 The appellants refer to s. 5(2) of the *CPA*, which provides that where, in the opinion of the court, the protection of subclass members requires that they be separately represented, the court shall not certify the proceeding unless there is a representative plaintiff who would fairly and adequately represent the subclass, has produced a workable litigation plan on behalf of the subclass and who does not have, on the subclass common issues, a conflict of interest with the subclass.

55 I do not read this statutory requirement as precluding the class representative from representing a subclass. It is only when the representative plaintiff cannot fairly and adequately represent the subclass that the need for a separate subclass representative arises: see *Pearson v. Boliden Ltd.*, 2001 BCSC 1054, 94 B.C.L.R. (3d) 133 (B.C. S.C. [In Chambers]), at para. 73, varied on other grounds, 2002 BCCA 624, 222 D.L.R. (4th) 453 (B.C. C.A.); *Dominguez v. Northland Properties Corp.*, 2012 BCSC 328 (B.C. S.C.), at paras. 75-83; *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.), leave to appeal to S.C.C. refused, (2000), [1999] S.C.C.A. No. 476 (S.C.C.); *Caponi v. Canada Life Assurance Co.* (2009), 72 C.P.C. (6th) 331 (Ont. S.C.J.), at para. 56.

56 It is not necessary to resolve the appellants' concerns at this time. The representative plaintiffs, like many class members, may have claims that are both timely and presumptively time-barred. They have an interest, at least at the present time, in advancing both types of claims. They certainly have an interest with all class members in the common issues of liability and damages.

57 Moreover, I am not convinced that it is quite as obvious as the appellants suggest that the "admissions" made by the representative plaintiffs or their counsel are fatal to their claims. It has not been "definitively shown" that they have no claim.

58 On the present record, I am not satisfied the representative plaintiffs are unable to represent all class members. It may be that at some future date it will be necessary to revisit this issue, but that issue, and when it should be addressed, are matters best left to the judgment of the case management judge.

**(e) Preferable Procedure**

59 The remaining issue is whether this proceeding, as modified, meets the requirement of s. 5(1)(d) of the *CPA* — that is, whether it would be the preferable procedure for the resolution of the common issues.

60 The preferability analysis asks two main questions, as set out in *Hollick*: (a) whether or not the class proceeding would be a fair, efficient and manageable method of advancing the claim; and (b) whether a class proceeding would be preferable to other procedures.

61 These questions are to be addressed through the lens of the three goals of class action proceedings — judicial economy, access to justice and behaviour modification: *Hollick*, at para. 27. However, there is no requirement to prove that the class action

will actually achieve these goals: *Fischer v. IG Investment Management Ltd.*, 2013 SCC 69, [2013] 3 S.C.R. 949 (S.C.C.), at para. 22.

62 Although recent case law, particularly *Fischer v. IG Investment Management Ltd.*, has focused on the second question — the comparison to alternative procedures — the proposed class proceeding must nevertheless be "fair, efficient and manageable" in order for it to be certified. As stated by Winkler J., as he then was, in *Caputo*, at para. 62:

[I]t is not enough for the plaintiffs to establish that there is no other procedure which is preferable to a class proceeding. The court must also be satisfied that a class proceeding would be fair, efficient and manageable. Both parts of the test must be considered in the context of the three goals of the *CPA*, judicial economy, access to justice and behavioural modification of tortfeasors.

63 In this case, there are two issues of preferability. The first is the complexity introduced by the need to resolve potentially time-barred claims along with the timely claims. The appellants concede that a class action *could* combine timely claims and the presumptively time-barred claims. They say, however, that in this case the court should certify only a focused class of timely claims and leave the other claims to be pursued individually by those claimants who wish to do so.

64 The second concern is the existence of different regulatory and fiscal regimes over the broad class period, which may necessitate individual inquiries, in individual time periods, to determine issues of both liability and damages.

65 The difficulties faced by defendants simply by virtue of having to respond to common and individual issues do not make a class proceeding unfair, inefficient or unmanageable if those issues will have to be dealt with by the defendants one way or another. In *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.), leave to appeal to S.C.C. refused, [2005] S.C.C.A. No. 50 (S.C.C.), the defendants argued that a class action proceeding "would be unfair to them and would create an unmanageable proceeding." Justice Goudge rejected that submission, stating at para. 89-90:

The common issues require resolution one way or the other. It is no less fair to the respondents to face them in a single trial than in many individual trials....

That conclusion is not altered even if one takes into consideration the individual adjudications that would follow. The fact of a number of individual adjudications of harm and causation did not render the action in Rumley unmanageable and does not do so here.... Thus at this stage in the proceedings, when one views the common issues trial in the context of the action as whole, there is no reason to doubt the conclusion that the class action is a manageable method of advancing the claim.

66 The appellants argue that the certification judge failed to address the preferable procedure requirement. They say that combining the presumptively time-barred claims with the timely claims is not the preferable procedure for the resolution of either. They submit the large quantum at issue in the presumptively time-barred claims makes them amenable to ordinary litigation. Their small likelihood of success, given the admissions of the representative plaintiff and the challenges of litigating those claims, makes it clear that they should not be litigated with the timely claims.

67 I disagree. In my view, the significant features of class proceedings — the ability to case manage groups of claims raising common issues and the ability to make binding determinations of those issues — make a class proceeding appropriate to resolve these claims. With active and strategic case management, and a resolve by the parties to focus on the fair and efficient resolution of the issues, both liability and limitation period issues could be resolved relatively expeditiously.

68 Section 12 of the *CPA* empowers the case management judge to make appropriate orders to ensure the fair and expeditious determination of the proceeding and to impose appropriate terms on the parties. This provision is procedural (see *McCracken v. Canadian National Railway*, 2012 ONCA 445, 293 O.A.C. 274 (Ont. C.A.), at para. 142) and does not permit a judge to ignore or override provisions of the *CPA*. However, together with Rule 1.04 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194, it does permit the judge to impose procedural terms that will promote access to justice and judicial economy as well as ensure the "just, most expeditious and least expensive determination" of the proceeding on its merits.

69 The *Manual for Complex Litigation*, 4<sup>th</sup> ed., published by the American Federal Judicial Center in 2004, provides a useful catalogue of the features of effective case management at 10.13:

Effective judicial management generally has the following characteristics:

- *It is active.* The judge anticipates problems before they arise rather than waiting passively for counsel to present them. Because the attorneys may become immersed in the details of the case, innovation and creativity in formulating a litigation plan frequently will depend on the judge.
- *It is substantive.* The judge becomes familiar at an early stage with the substantive issues in order to make informed rulings on issue definition and narrowing, and on related matters, such as scheduling, bifurcation and consolidation, and discovery control.
- *It is timely.* The judge decides disputes promptly, particularly those that may substantively affect the course or scope of further proceedings. Delayed rulings may be costly and burdensome for litigants and will often delay other litigation events. The parties may prefer that a ruling be timely rather than perfect.
- *It is continuing.* The judge periodically monitors the progress of the litigation to see that schedules are being followed and to consider necessary modifications of the litigation plan. Interim reports may be ordered between scheduled conferences.
- *It is firm, but fair.* Time limits and other controls and requirements are not imposed arbitrarily or without considering the views of counsel, and they are revised when warranted. Once established, however, schedules are met, and, when necessary, appropriate sanctions are imposed ... for derelictions and dilatory tactics.
- *It is careful.* An early display of careful preparation sets the proper tone and enhances the court's credibility and effectiveness with counsel.

70 Case management judges in class proceedings are of course required to be fair to both parties, and they should take the representative plaintiff's litigation plan as an important starting point in guiding the case management process. At the same time, they are entitled to seek and impose creative solutions to the efficient determination of the issues. The resolution of issues does not always require an adversarial hearing. Some case management judges and counsel find case management conferences to be an efficient way of resolving procedural issues, through discussion, negotiation and consensus, facilitated by the case management judge and without the need for formal rulings.

71 The case management judge is entitled to give directions as to when certain steps should be accomplished and as to what motions may be brought, and when. The case management judge may prohibit motions from being brought before certain steps have been accomplished and may make orders as to the sequencing of motions. The case management judge is also entitled to determine the order in which some issues are addressed. He or she is entitled, but not required, to determine whether some issues are amenable to summary judgment and to schedule the proceedings accordingly.

72 In this case, individual issues may remain after the common issues have been resolved. It may be asserted that particular class members had special knowledge that triggered the commencement of the limitation period, notwithstanding that the information was not publicly known. Different regulatory regimes, fee scales and cost-recovery methods may require analysis of particular segments of the class period. I am not persuaded, however, that this would make the proceeding unmanageable or incapable of fair and efficient resolution. Indeed, it is my view that these issues can most effectively and fairly be resolved in the context of this proceeding.

73 As I suggested earlier, case management should be complimented by a resolve by the parties to focus on the fair and efficient resolution of the issues. That should be true in all litigation, but it is particularly important in complex litigation such

as class proceedings. All the more so in a case like this, in which the ultimate cost will be borne by the public, one way or the other. It behooves the parties, assisted by the case management judge, to focus their energies accordingly.

### **Disposition**

74 For these reasons, the appeal is allowed, in part, the judgment below is varied and the proceeding shall be certified as a class proceeding pursuant to s. 5(1) of the *CPA* on the terms set out herein.

75 As success is divided, I would make no order as to costs.

#### ***H.S. LaForme J.A.:***

I agree.

#### ***M. Tulloch J.A.:***

I agree.

*Appeals allowed in part; judgment varied.*

### Headnote

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Insured purchased life insurance policy — Insured maintained that insurer represented that premiums on policy would never rise above certain amount — Statement in policy allowed for variable premiums — Insured's premiums later rose above amount alleged by insured — Insured brought action for breach of contract, breach of fiduciary duty and fraudulent misrepresentation — Insured brought motion for certification of action as class proceeding — Motion dismissed — Identifiable class was not obviously extant — Although insurer had received several complaints regarding policies, few complaints were similar in nature to insured's — Insured did not show that second identifiable member of class existed — Insurer was not adequate representation of potential class — Many other customers of insurer had complaints, which were unrelated to insured's complaint.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Insured purchased life insurance policy — Insured maintained that insurer represented that premiums on policy would never rise above certain amount — Statement in policy allowed for variable premiums — Insured's premiums later rose above amount alleged by insured — Insured brought action for breach of contract, breach of fiduciary duty and fraudulent misrepresentation — Insured brought motion for certification of action as class proceeding — Motion dismissed — No common issue existed — Issue was not one of interpretation of identical contracts — Insured's claim rested on individual representations by insurer — Class proceeding was not necessarily preferable procedure — Insurer created alternate complaint procedure, which would not prejudice rights of insured, and which insured had not used — Insurer was not adequate representation of potential class — Many other customers of insurer had complaints, which were unrelated to insured's complaint — Settlement by insured as representative plaintiff could prejudice other complainants.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Insured purchased life insurance policy — Insured maintained that insurer represented that premiums on policy would never rise above certain amount — Statement in policy allowed for variable premiums — Insured's premiums later rose above amount alleged by insured — Insured brought action for breach of contract, breach of fiduciary duty and fraudulent misrepresentation — Insured brought motion for certification of action as class proceeding — Motion dismissed — Class proceeding was not necessarily preferable procedure — Insurer created alternate complaint procedure, which would not prejudice rights of insured, and which insured had not used — Insurer was not adequate representation of class — Many other customers of insurer had complaints, which were unrelated to insured's complaint — Settlement by insured as representative plaintiff could prejudice other complainants — Insured put forth no litigation plan beyond normal steps of litigation.

MOTION by insured for certification of class proceeding.

**Nordheimer J.:**

1 The plaintiff moves to certify this action as a class proceeding under the *Class Proceedings Act, 1992*, S.O. 1992, c.6.

2 This action was commenced on July 30, 2002. The claims asserted in this action arise out of an alleged failure by the defendant to honour the terms of certificates<sup>1</sup> of insurance that it issued, specifically Universal Life Insurance certificates, which the plaintiff claims were to have a fixed premium throughout the lifetime of the certificate.

3 The relief sought in the amended statement of claim includes declaratory relief relating to an alleged breach of fiduciary duties or breach of trust owed by the defendant to the plaintiff, damages for that breach, disgorgement of profits made, an accounting of alleged overpayments of premiums as well as damages for fraudulent misrepresentation in the amount of \$100,000, alternatively, damages for negligent misrepresentation in the amount of \$100,000, alternatively, damages for breach of contract or breach of collateral contract in the amount of \$100,000, together with interest and costs.

4 The statement of claim has been amended once to alter the definition of the proposed class. The proposed class is defined in the amended statement of claim and in the plaintiff's factum as:

Any person in Canada who:

- i) has entered into a Universal Life Policy of Insurance with the Defendant, whether now lapsed or surrendered; and
- ii) has been informed of a premium increase, or prospective increase; and
- iii) has been or will be deprived of the use of the difference of the insurance premiums actually charged and the contract premium contemplated by the parties; and
- iv) did not receive an accounting and payment of the fruits of such premium over payment or notification from the Defendant that such accounting or payment shall be made.

**Background**

5 In September 1984, the plaintiff, who was then thirty-eight years of age, purchased a Universal Life Insurance policy from the defendant. The relevant terms of the policy were:

- (a) a death benefit of \$50,000 payable at the insured's death, if death occurs prior to the policy maturity date;
- (b) a cash surrender value of \$50,000 payable at the policy maturity date, if the insured is still alive;
- (c) a maturity date of September 13, 2041 at which point the plaintiff would be at age ninety-five;
- (d) an initial monthly premium of \$52.60;
- (e) a cost of living allowance increase rider, and;
- (f) a 4% guaranteed savings rate.

6 Although Mr. Bellaire raises several causes of action in his claim, the central allegation advanced by Mr. Bellaire is that, under his Universal Life Insurance certificate, he was guaranteed a fixed monthly premium of \$52.60 for coverage until the earlier of death or age ninety-five. Contrary to that guarantee, the plaintiff was advised in April 2000 that his policy would lapse in 2011 unless his monthly premium increased to \$147.50.

7 The defendant's Universal Life Insurance was sold between 1984 and 1987. The defendant says that it was marketed as a flexible premium, flexible benefit product with various features and options to accommodate a range of insurance and other potential objectives specific to the certificate purchaser. The defendant also says that each certificate is member specific, in that it requires the member, in the application for insurance, to make selections including the amount of premium that the applicant proposes to pay.

8 The central feature of the defendant's Universal Life Insurance was the cash value fund which operated like a deposit account. Under such insurance, a member's premium, net of the "premium expense load", was deposited into the account. Out of that account the defendant deducted the cost of insurance, the cost of any riders, and the expense charges (collectively referred to as "monthly deductions"). Interest was added to the account, which accrued at a variable rate determined by the defendant, but with a minimum rate of 4%. The balance in the account at any point in time was the "cash value" of the certificate.

9 When purchasing a Universal Life Insurance certificate, the member selected the face amount and death benefit type (level or increasing), any riders (collectively referred to as "coverages") and, subject to a minimum level of premium, selected the premium and the planned frequency of its payment, for example, monthly, quarterly, semi-annually or annually. One feature of the Universal Life Insurance certificate was that it gave the member the option to change the frequency of payment of the selected premium, or to increase or decrease the amount of the premium, or to not pay any premium at all if the existing cash value of the policy was sufficient to cover the monthly deductions.

10 The cash value of a policy was dependent upon a number of factors - premiums deposited; interest credited; monthly deductions; and partial withdrawals made by the member. As long as the cash surrender value (cash value, net of any outstanding certificate loans and surrender charges, if applicable) was sufficient to fund the monthly deductions, the certificate remained in force. If not, and after a grace period, the certificate lapsed and was no longer in force.

11 After the issuance of the certificate, the basic elements of the certificate (i.e., coverages and premium) were subject to change at the option of the member: premiums could be increased or decreased; the coverages could be increased or decreased. The member could also take loans against, or make partial withdrawals from, the cash value. Each of these actions would have an impact on the cash value in the certificate and, consequently, how long the certificate might remain in force.

12 The plaintiff asserts that he was told by representatives of the defendant, and he understood, that the Universal Life Insurance certificate he was purchasing came with a fixed premium. In other words, the plaintiff says that it was represented to him that he would never have to pay more than \$52.60 per month in order to maintain the insurance he purchased. In contrast, the representative of the defendant who sold the certificate to the plaintiff says that he never represented to the plaintiff that his certificate would have a fixed monthly premium of \$52.60, or that coverage would last until age ninety-five.

13 In the course of his cross-examination, the plaintiff gave the following evidence:

- (a) that he was first told by an agent for a different insurer, Confederation Life, that the premium on a Universal Life policy was fixed and would provide him with coverage to close to age ninety-five;
- (b) that he could not recall exactly what he was told by the defendant's representative about the premium before he signed the application for insurance in 1984 although he did admit that the Universal Life Insurance certificate was thoroughly explained to him before he bought it;
- (c) that he understood how fluctuations in interest rates would have an impact on his certificate's cash value;
- (d) that following delivery of his certificate he never read it but simply "threw it in a filing cabinet".

14 In contrast to the asserted position of the plaintiff that the Universal Life Insurance certificate carried a fixed premium, the Certificate Specifications page delivered to Mr. Bellaire with his certificate shows a "planned" monthly premium of \$52.60 and goes on to expressly provide that "additional premiums may be required to provide coverage to the maturity date". In addition, the General Provisions applicable to the certificate set out a grace period in the following terms: "If the cash value less any debt will not cover the monthly deduction, a grace period of 61 days will be allowed to pay a premium that will cover the monthly deduction". Further, the Table of Values page applicable to the certificate states that "if the cash value becomes exhausted, additional premiums will be required to keep the certificate in force." Still further, the "Statement of Policy Cost And Benefit Information" which the defendant is required by the Province to provide to a purchaser stated: "This certificate provides life insurance as long as premiums paid and interest credited are more than charges for mortality and expenses, but not after age 95".

15 The plaintiff's claim here is not the first time that dissatisfaction with the Universal Life Insurance certificates has been made known to the defendant. In the latter part of 1997, a class action respecting these certificates was launched against the defendant in the United States. That class action was subsequently settled by the defendant and the settlement was ultimately approved by the U.S. court. As a consequence of that class action and the ensuing settlement, but before any action had been instituted in Canada, the defendant established the Foresters' Member Value Program ("MVP"). The defendant says that the MVP was created to provide an opportunity for Canadian purchasers of such life insurance certificates in the period January 1, 1984 to December 31, 1999, to come forward and raise any concerns regarding their certificates. I believe that it would be fair to conclude that the MVP was, at least in part, an effort by the defendant to pre-empt any similar action being commenced in Canada.

16 The MVP gave purchasers the opportunity to apply for an adjustment based upon their complaint or concern. The defendant mailed to each purchaser a package of information regarding the MVP including forms to be submitted to participate in the program. Each MVP participation form that was submitted was individually evaluated by staff of the defendant, all of whom had been involved in similar work in relation to the administration of the U.S. class action settlement. Those customers who submitted a complaint were then advised of the outcome of the assessment of their complaint and the accompanying adjustment, if any. Customers were also advised of a low-cost right of appeal and provided with an appeal form. An independent third party, who had been court-approved for claims evaluation in other class action settlements, considered the appeal and rendered a decision mailed directly to that member. The defendant's reviewers were monitored and checked by its internal auditors, and the files assessed were randomly audited by a retired Superior Court judge.

17 The plaintiff did not accept the invitation to participate in the MVP. However, the defendant took it upon itself to refer the plaintiff's complaint (which had been evidenced by letters which the plaintiff had sent to the defendant) to the MVP process. The plaintiff's complaints and the material in his certificate file were reviewed under the MVP procedure to determine whether his individualized situation merited an adjustment. Under MVP, it was determined that the plaintiff was eligible for an adjustment that would extend the lapse date for his policy from 2011 to 2027 before any increased premium was necessary.

18 On March 7, 2002, Mr. Bellaire was sent notice of his MVP adjustment. He was also advised of his appeal rights to an independent third party. The plaintiff did not exercise his appeal rights. Instead, he commenced this action. It should also be noted that, throughout all of this time, the plaintiff has never been obliged to pay more than \$52.60 per month to maintain his insurance coverage.

19 Some additional facts should be mentioned. There is no standard Universal Life Insurance certificate. Rather, the defendant has sold three different types of Universal Life Insurance from the period of 1984 to date, specifically, (i) Foresters Universal Life which was sold from 1984 to 1987; (ii) Foresters Universal Life 2 which was sold from 1987 to May 2001; and (iii) Foresters Passport<sup>2</sup> which has been sold since May 2001. Each of these Universal Life Insurance certificate types differ in: (a) the product features available; (b) the contractual wording; and (c) the extra-contractual materials delivered with the certificate. In addition, each certificate type may differ depending on the year the certificate was sold and the Province in which it was sold. For example, the plaintiff's certificate originally contained a two year "limitation of action" clause which was subsequently deleted but only

for those certificates sold in Ontario. Further, the training manuals and tapes used by the defendant's representatives differed for these three types of Universal Life Insurance.

20 Lastly, I should mention the likely size of the class. Since 1984, Foresters has sold over 55,500 Universal Life Insurance certificates in Canada. Of those, approximately 20,000 were certificates for the type of insurance which the plaintiff purchased. Approximately 25,000 were for the second type of insurance which the plaintiff also seeks to include in this proceeding.

### **Analysis**

21 In order to have an action certified as a class proceeding, the plaintiff must satisfy the requirements of section 5(1) of the Act which states:

The court shall certify a class proceeding on a motion under section 2, 3 or 4 if,

- (a) the pleadings or notice of applications discloses a cause of action;
- (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
- (c) the claims or defences of the class members raise common issues;
- (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
- (e) there is a representative plaintiff or defendant who,
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of the other class members.

#### **A. Causes of Action**

22 The defendant fairly concedes, for the purposes of this motion, that the statement of claim discloses a cause of action for the purposes of section 5(1)(a) of the Act.

#### **B. Identifiable class**

23 I earlier set out the definition of the class as proposed by the plaintiff.

24 The importance of an identifiable class and class definition was highlighted in *Western Canadian Shopping Centres Inc. v. Dutton* (2001), 201 D.L.R. (4th) 385 (S.C.C.) where Chief Justice McLachlin said, at p. 401:

First, the class must be capable of clear definition. Class definition is critical because it identifies the individuals entitled to notice, entitled to relief (if relief is awarded), and bound by the judgment. It is essential, therefore, that the class be defined clearly at the outset of the litigation. The definition should state objective criteria by which members of the class can be identified. While the criteria should bear a rational relationship to the common issues asserted by all class members, the criteria should not depend on the outcome of the litigation. It is not necessary that every class member be named or known.

25 During the course of the hearing of the certification motion, plaintiff's counsel conceded that there may be some difficulty with even the revised wording of the class definition insofar as it purports to include purchasers who, for whatever reason, permitted their certificates to lapse. This is indeed problematic since it would be difficult, for example, to reconcile the inclusion

of the plaintiff, with his stated position that he had a fixed premium for his coverage and which premiums he has continued to pay, in the same class with those purchasers who chose not to pay even the alleged fixed premium with the consequence that their certificates lapsed. Plaintiff's counsel, however, submitted that these concerns could be addressed by allowing the court to adjust the class definition as it found necessary to address such problems as they might appear in the course of attempting to reach the end result of certifying the proceeding.

26 As experience develops with class proceedings, the tendency of plaintiffs to approach the definition of the class in this fashion seems to be increasing. The problems associated with this approach were recently stated by Mr. Justice Winkler in *Caputo v. Imperial Tobacco Ltd.*, [2004] O.J. No. 299 (Ont. S.C.J.) where he said, at para. 41:

In some circumstances, it may be appropriate for the court to alter or amend a class definition to be consistent with other findings made on a certification motion. That is not the case here. What the plaintiffs suggest is akin to having the court perform the role of class counsel by making wholesale changes to arrive at a definition that the court itself would accept. That goes beyond a simple exercise of discretion and verges into the prohibited territory of descending 'into the arena' with the parties to the motion.

Put another way, a more rigorous and careful approach to the definition of the class is to be expected of the representative plaintiff. It is not appropriate to attempt to foist that responsibility onto the court.

27 Having said that, however, there is another problem with respect to this requirement. Section 5(1)(b) requires an *identifiable* class of two or more persons. In my view, that entails placing evidence before the court that there are other individuals who both share the same complaint as that of the plaintiff and wish to have the complaint litigated through the mechanism of a class proceeding, save and except for those factual situations where the existence of such other individuals is obvious. In this regard, I note that, on the plaintiff's cross-examination, the following exchange occurred:

Q. Mr. Bellaire or through your counsel, are you aware of at the present time of the existence of any other individuals who satisfy this class definition apart from Mr. Bellaire:

Mr. Sengbusch: It arises it would seem from the material that Mr. Lintner presented in which there were seventy thousand or so packages sent out for the MVP program related at least in whole or in part to universal life insureds, but you mean individual names?

Mr. Pinos: Yes

Mr. Sengbusch: No.

28 The reference in the above exchange to the MVP program must be explained. Between June 2000 and March 2001 there were 69,247 MVP packages mailed by the defendant to its customers. The defendant's response statistics indicate that 3,263 Participation Forms were received in reply to that mailing. However, of those Participation forms, only 911 related to the plaintiff's type of Universal Life Insurance certificate, and 1,074 related to the second type of certificate, for a total of 1,985 or less than three percent of the total customers contacted.

29 Further, the MVP was designed to cover a broad range of possible complaints regarding Universal Life Insurance certificates — not just the complaint that the plaintiff asserts here. An even smaller group of the participation forms received actually identified their complaint as being of the same general nature and kind as the complaint raised by the plaintiff, that is, 571 holders of the plaintiff's type of Universal Life Insurance certificate, and 565 holders of the second type of certificate, identified "Duration of Universal Life" as their complaint. There are two problems with the plaintiff relying on that evidence to establish an identifiable class. One is that a generalized complaint of "duration" does not necessarily establish a common issue or interest between such complainants and the plaintiff, whose fundamental complaint is the lack of a fixed premium. The other is that this evidence does not establish that, even if there are common interests, these other complainants wish to have the issue litigated. Unlike the plaintiff, these other complainants may well be content with the status quo or with the relief that they received from the defendant through the MVP.

30 This concern has arisen in other cases. It was the subject of comment in *Taub v. Manufacturers Life Insurance Co.* (1998), 40 O.R. (3d) 379 (Ont. Gen. Div.) where Mr. Justice Sharpe said, at p. 381:

Most class proceedings arise from situations where the fact of wide-spread harm or complaint is inherent in the claim itself. Obvious examples are claims arising from mass disasters such as subway or air crashes or claims based on allegations of harm from wide-spread pollution. I do not say that there must be affidavits from members of the class or that there should be any assessment of the merits of the claims of other class members. I do say, however, that there must, at the very least, be some basis in fact for the court to conclude that at least one other claim exists and some basis in fact for the court to assess the nature of those claims that exist that will enable the court to determine whether the common issue and preferability requirements are satisfied.

31 It arose again in *Lau v. Bayview Landmark Inc.*, [1999] O.J. No. 4060 (Ont. S.C.J.) where Mr. Justice Winkler said, at para. 23:

However, a class proceeding cannot be created by simply shrouding an individual action with a proposed class. That is to say, it is not sufficient to make a bald assertion that a class exists. The record before the court must contain a sufficient evidentiary basis to establish the existence of the class.

32 This concern was repeated in a case similar to the one that is before me here, namely, *Zicherman v. Equitable Life Insurance Co. of Canada*, [2000] O.J. No. 5144 (Ont. S.C.J.) where Mr. Justice Ferrier said, at para. 7:

However, s. 5(1)(b) requires that there be 'an identifiable class of two or more persons that would be represented by the representative plaintiff.' There is no evidence that anyone other than Mr. Zicherman has raised a cause of action. There is no evidence of anyone other than Mr. Zicherman being willing to engage the courts or assert a cause of action.

33 I respectfully agree with the observations made in these cases. In my view, before the extensive process of a class proceeding is engaged, it ought to be clear to the court that there is a real and subsisting group of persons who are desirous of having their common complaint (assuming there to be a common complaint) determined through that process. The scale and complexity of the class action process ought not to be invoked at the behest, and for the benefit, of a single complainant.

34 I conclude, therefore, that in the particular circumstances of this case, the requirement that there be an identifiable class is not satisfied.

### C. Common Issues

35 The common issues, as stated by the plaintiff in his factum, are:

- (a) Interpretation of the certificates of insurance and particularly the guaranteed premiums for coverage;
- (b) Breach of contract.

36 In *Western Canadian Shopping Centres Inc. v. Dutton*, *supra*, Chief Justice McLachlin, in discussing the requirement of common issues, said, at para. 39:

Commonality tests have been a source of confusion in the courts. The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be 'common' only where its resolution is necessary to the resolution of each class member's claim.

37 The defendant asserts that the common issues are not, in fact, common at all. It contends that this case is essentially a "point of sale" case and that the dealings which each and every member of the proposed class had with their respective representatives of the defendant would have to be examined to properly determine any claim. The defendant says that this case is no different

in kind from cases such as *Kumar v. Mutual Life Assurance Co. of Canada* (2003), 47 C.C.L.I. (3d) 43 (Ont. C.A.) and that it suffers from the same flaws.

38 I agree with the defendant. Notwithstanding the considerable efforts by counsel for the plaintiff to portray the central issues in this proceeding as purely matters of contractual interpretation, in my view when examined closely and critically, the claims advanced by the plaintiff are, at their heart, claims of misrepresentation. I reach this conclusion, in part, on the following facts.

39 When the plaintiff originally complained to the defendant regarding this matter, he did so in terms of what he said he had been told by the defendant's representatives which, in at least one letter, he referred to expressly as a misrepresentation. In addition, in his affidavit, the plaintiff said:

Prior to purchasing the above referenced policy, I was approached by a representative of the Defendant, who made representations that were intended to induce, and in fact did induce, me to switch from a term policy with the Defendant to a Universal Life Insurance Policy at a higher premium. These representations were intended to lead, and in fact did lead me to believe that the policy would have a fixed monthly premium of \$52.60 until my death or until age 95, when the coverage would terminate.

40 Further, when cross-examined, the plaintiff defended his failure to review the certificate and its terms on the basis that he relied on the defendant's representative to explain the policy to him and that he relied on the representations which the representative made. Still further, in the plaintiff's draft litigation plan (about which I will have more to say later) it is stated that:

The substantive and determinative common issue turns on whether or not there was a misrepresentation which induced the Plaintiff to enter the contract, and whether there was a breach of fiduciary duty, or breach of trust by the Defendant.

41 In any event, it is readily apparent that, if a court attempted to interpret the documents in question, in light of the provisions I earlier set out, the issue would quickly change from what the contracts say on their face to what the plaintiff understood them to mean. The plaintiff concedes that there is no place in the documents where the premium is stated to be fixed. Consequently, the plaintiff is driven to assert that the references in the documents to "additional" premiums possibly being necessary to maintain the insurance is different in kind from "increased" premiums being necessary. While I would say that such a distinction is not one that readily leaps to mind, regardless of that fact, it is nonetheless an interpretation that could only be reached based on evidence of the plaintiff's understanding to that effect and of the circumstances that lead him to that understanding.

42 In the end result, therefore, this case suffers from the same problem which Mr. Justice Cumming found to exist in *Kumar v. Mutual Life Assurance Co. of Canada*, *supra*, and with which Mr. Justice Rosenberg expressly agreed in dismissing the appeal, when he said, at para. 48:

I agree with the motion judge's conclusion on this issue:

'While the theories of liability can be phrased commonly the actual determination of liability for each class member can only be made upon an examination of the unique circumstances with respect to each class member's purchase of a policy' (at para. 39).

43 I conclude, therefore, that the proposed common issues are not in fact common issues at all because they cannot be determined on a common set of facts and thus made applicable to all members of the proposed class. The requirement under section 5(1)(c) of the Act is accordingly not satisfied.

#### **D. Preferable Procedure**

44 Given my conclusion that the common issues requirement is not met, I need only briefly deal with the requirement that a class proceeding be the preferable procedure for resolving the common issues. This requirement can be phrased in terms of the following general question: would the ultimate determination of the issues raised by each member's claim be better accomplished through the class proceeding or would they be better accomplished through other mechanisms such as joinder, test cases or simply by allowing each claim to proceed individually?

45 I will say that had the central issue raised by the plaintiff been purely an issue of contractual interpretation applicable to all members of the proposed class, then I would have been much more inclined to conclude that a class proceeding was the preferable procedure for its resolution. In that case at least two of the three advantages of a class action would be met. First, it would achieve judicial economy since the determination of that issue would leave only the question of the appropriate remedy to be dealt with. Second, given what may be the limited amounts in issue<sup>3</sup>, precluding the litigation of that issue through a class action might result in a denial of access to justice. Having said that, even such a claim would not likely satisfy the third advantage, namely behaviour modification, given the steps that the defendant has already taken, through the MVP, in an effort to address the underlying concerns raised.

46 However, as I pointed out in my analysis of the common issues requirement, this case is not one simply of contractual interpretation. It is a misrepresentation case. Such cases, almost by definition, involve so many individual issues that they do not generally allow for classwide determination, save and except for those rare cases where there is a single misrepresentation that is made in identical terms to all persons affected.

47 The plaintiff attempted to portray this case as such a case by submitting that there were standard training manuals used to train the defendant's representatives on how to sell the Universal Life Insurance product. The fact is that there were no standard training materials. They differed with the different type of certificates. However, even assuming standard training materials were used, that fact alone could not lead to the conclusion that what individual customers were told by those representatives, so trained, had to be universally identical or even similar. It is worthy of reminder in this context that this is a proposed national class action covering approximately 45,000 customers.

48 Finally, under this requirement, I repeat that the defendant has instituted the MVP in an attempt to address concerns arising from its issuance of Universal Life Insurance certificates. The MVP is based on a similar plan which received court approval in settlement of the U.S. class action. It is a plan which has many commendable aspects to it including a review process by a retired Superior Court judge and an avenue for appeal to a third party. While the plaintiff complains that there has been a relatively small takeup rate under the MVP, it seems to me that criticism is somewhat of a two-edged sword. While the plaintiff asserts that the small takeup rate shows that the MVP is not responsive to the vast majority of complaints, it is equally possible that the small takeup rate simply demonstrates that there is a limited group of disaffected customers.

49 In any event, it remains the fact that the MVP is a legitimate alternative form of relief available to members of the proposed class. The MVP is easy to access and is inexpensive to pursue. It appears to be procedurally and substantively fair. It does not require the claimant to renounce his or her right to institute legal proceedings. And for those persons who did not avail themselves of the MVP, there remains an ongoing complaints process which they can utilize.

50 While I would not necessarily conclude that the MVP alone was sufficient to establish that a class proceeding is not the preferable procedure, its presence in this case taken together with the other facts I have mentioned, leads me to conclude that the preferable procedure requirement is also not satisfied.

#### ***E. Representative Plaintiff***

51 There are three separate considerations to be addressed under this requirement. First, is whether the proposed representative plaintiff would fairly and adequately represent the interests of the class. I am not satisfied that he would. I reach that conclusion not as any criticism of the proposed representative plaintiff himself but rather as a consequence of the fact, as I mentioned in my consideration of whether there was an identifiable class, that the class as defined includes persons with differing complaints and is not, therefore, capable of being represented by one person. The results of the MVP demonstrates that there are a variety of concerns expressed regarding the defendant's Universal Life Insurance certificates. The complaint that the proposed representative plaintiff has with these certificates does not appear to be shared by others in the proposed class, or at least not by a majority of the members of the proposed class. While I recognize that subclasses can be used to distinguish between members of a class who have different aspects to their claims, there still has to be a common interest between the proposed representative

plaintiff and the members of the presumed class. The fact that all members of the presumed class might share a measure of dissatisfaction with the defendant does not constitute a sufficient common interest for these purposes.

52 I am also not satisfied with the litigation plan that is put forward. Indeed, I would suggest that it is not actually a plan at all. Rather, it is largely a recitation of the steps that would occur in any piece of litigation coupled with rather non-specific references to communicating with members of the class. I should mention, in addition, that the provision in the litigation plan, which states that a list of common issues will be provided by the plaintiff for comment by the defendant thirty days after certification, ignores the requirement of section 8(1)(e) of the Act that the order certifying the proceeding as a class proceeding set out the common issues.

53 Litigation plans will vary in the amount of detail they contain depending on the degree of complexity of the underlying claims. However, any litigation plan ought to contain some outline of how the representative plaintiff and his or her counsel intend to ensure that the common issues will be effectively and efficiently pursued if the action is certified. Without intending to be exhaustive, I suggest that the litigation plan ought to address matters such as the following:

- (i) the steps that are going to be taken to identify necessary witnesses and to locate them and gather their evidence;
- (ii) the collection of relevant documents from members of the class as well as others;
- (iii) the exchange and management of documents produced by all parties;
- (iv) ongoing reporting to the class;
- (v) mechanisms for responding to inquiries from class members;
- (vi) whether the discovery of individual class members is likely and, if so, the intended process for conducting those discoveries;
- (vii) the need for experts and, if needed, how those experts are going to be identified and retained;
- (viii) if individual issues remain after the determination of the common issues, what plan is proposed for resolving those individual issues, and;
- (ix) a plan for how damages or any other forms of relief are to be assessed or determined after the common issues have been decided.

54 I appreciate that any litigation plan will be a work in progress. It will need to be adjusted as the action proceeds. It may also be that the defendant and the court will need to have some input into variations to the proposed plan. None of those realities, however, relieves the representative plaintiff from his or her obligation to put before the court, on the certification motion, an initial effort at a plan to address these and other matters so that the court can be satisfied that, if the action is certified, some level of attention has been given to how the action will progress thereafter.

55 Lastly, for the same reasons I outlined regarding my conclusion that the proposed representative plaintiff cannot fairly and adequately represent the interests of the class, I am also concerned that the representative plaintiff may well have a conflict with other members of the presumed class. Due to the fact that the proposed representative plaintiff has a particular complaint that many other members of the proposed class do not share, there is a distinct possibility that the proposed representative plaintiff might well be amenable to a resolution of his claim that would be of a much different character than would interest other members of the proposed class and vice versa. The resulting potential for conflict as the action progresses is obvious.

56 I conclude therefore that the fifth requirement is also not met in this case.

## **Conclusion**

57 I am not satisfied that the plaintiff has satisfied any of the four requirements that are in issue in this proposed class proceeding. The motion for certification is therefore dismissed.

58 If the parties cannot resolve the issue of costs, they may make written submissions on the appropriate disposition. The defendant's submissions are to be filed within 15 days of the release of these reasons and the plaintiff's response is to be delivered within 15 days thereafter. No reply submissions are to be filed without leave. The submissions should include the necessary bill of costs or equivalent information that will allow me to fix the costs of the motion should I decide that costs are to be awarded.

*Motion dismissed.*

Footnotes

- \* Additional reasons at *Bellaire v. Independent Order of Foresters* (2004), 2004 CarswellOnt 5609, 5 C.P.C. (6th) 84, 19 C.C.L.I. (4th) 51 (Ont. S.C.J.).
- 1 The terms "certificate" and "policy" were used interchangeably by counsel and, succumbing to that influence, they appear interchangeably in these reasons.
- 2 Just prior to the commencement of the certification hearing, the plaintiff confirmed that this third type of Universal Life Insurance was not part of the proposed class proceeding.
- 3 I would observe that there was little evidence placed before the court regarding the amounts that would be recoverable by class members.

MOTIONS by defendants to strike entirety or portions of proposed class action claim.

**Hanssen J.:**

## Background

1 The Crocus Investment Fund (referred to as the "Crocus Fund" or "Crocus" or the "Fund") is a labour sponsored venture Capital Corporation created by *The Crocus Investment Fund Act*, C.C.S.M. c. C308 (the "Crocus Act").

2 Following its incorporation on March 21, 1992, Crocus engaged in a continuous offering of its Class A common shares to the public under a series of prospectuses which were generally issued annually.

3 On December 10, 2004, trading in shares of Crocus was halted.

4 On June 28, 2005, the Crocus Fund was placed into receivership.

5 On July 12, 2005, Bernard Bellan commenced a proposed class action ("Bellan No. 1") against a number of former officers and directors of the Crocus Fund, two of its financial advisors, its auditor and the Manitoba Securities Commission. Among other things, the statement of claim alleges the prospectuses for the Crocus Fund did not contain proper disclosure and they overstated the value of its assets.

6 On May 8, 2006, Bellan and Robert Nelson commenced a related proposed class action ("Bellan No. 2") against the Government of Manitoba (the "Province"). Many of the allegations in Bellan No. 1 have been repeated in Bellan No. 2, but additional allegations have been made in an attempt to establish a cause of action against the Province.

7 Bellan and Nelson bring these actions on their own behalf and on behalf of a proposed class of shareholders who owned Class A common shares in the Crocus Fund on December 10, 2004. The proposed Class period is from March 21, 1992, the date Crocus was incorporated, until trading in its shares was halted on December 10, 2004.

8 Bellan bought 350 Class A shares in the Crocus Fund in September, 1993. He redeemed these shares and purchased new shares in January/February, 2001. Nelson bought 237.1541 Class A shares in 2003.

9 Bellan, Nelson and the other putative class members have been unable to recover any of their investments since trading in Crocus shares was halted.

10 Bellan and Nelson seek to have Bellan No. 1 and Bellan No. 2 consolidated and certified together. Their motions to consolidate and certify are tentatively scheduled to be heard September 24 to 28, 2007.

11 A number of the defendants have brought preliminary motions for particulars and/or to strike portions of the amended amended statement of claim in Bellan No. 1 and the amended statement of claim in Bellan No. 2. (For simplicity, I will refer to these two documents simply as statements of claim.)

## Motions for Particulars in Bellan No. 1

12 There are three motions for particulars in Bellan No. 1 — one by all of the defendant directors other than David Friesen, one by David Friesen and one by Wellington West Capital Inc. ("Wellington West").

13 Since the particulars being sought in all three motions are similar and the issues are essentially the same, it is convenient to deal with them together.

14 An order for particulars is a discretionary remedy. Particulars should be ordered where they are necessary:

(a) to inform the defendant of the nature of the case they have to meet as distinguished from the mode in which it is to be provided;

(b) to prevent the defendants from being taken by surprise;

- (c) to enable the defendants to know what evidence they ought to be prepared with and to prepare for trial;
- (d) to limit the generality of the plaintiff's claim;
- (e) to limit and decide the issues to be tried, and as to which discovery is required; and
- (f) to tie the hands of the plaintiffs so they cannot, without leave, go into any matters not included in their claim.

See *Dumont v. Canada (Attorney General)* (1991), 75 Man. R. (2d) 273 (Man. C.A.) at para. 29.

15 In the course of argument, counsel for the plaintiffs agreed to provide a letter to the defendants' counsel clarifying the following:

- (a) Bellan is alleging a director is only responsible for losses of shareholders who purchased shares during the currency of a prospectus the director signed or consented to being signed on his or her behalf;
- (b) Bellan is adopting as part of his statement of claim the allegations in the Auditor General's Report which are set out at paragraphs 29(a), (d) and (e) of the statement of claim;
- (c) the "statutory obligations" referred to in paragraph 70(d) of the statement of claim are those set out in Part VII and s. 141 of *The Securities Act*, C.C.S.M. c. S50, and s. 15 of the *Crocus Act*;
- (d) Bellan is only alleging Nesbitt Burns Inc. ("Nesbitt Burns") is liable with respect to the shares which were purchased under the prospectuses dated December 22, 1999 and January 11 and July 13, 2001.

Counsel for Bellan also consented to an order striking the phrase "participating and consenting to" in paragraph 27 of the statement of claim.

16 The defendant directors and Wellington West say that the statement of claim is still deficient because it does not adequately particularize the claims against them. I agree with them that Bellan should also be required to provide the following particulars:

- (a) what are the "business activities or interests" of the insiders and the financial advisor referred to in paragraph 52 of the statement of claim;
- (b) what are the "immediate pecuniary interests" referred to in paragraph 67 of the statement of claim.

They need to know precisely what "business activities or interests" and what "pecuniary interests" Bellan is referring to, in order to properly prepare for the certification motion.

17 In addition to these particulars, however, the defendant directors and Wellington West are seeking voluminous and detailed information regarding the claim. They are, in effect, demanding full discovery of the plaintiffs' case prior to the certification hearing and before filing their statements of defence.

18 I am dismissing the remainder of their requests. While there is no doubt room for improvement in the pleading, it does not fall as short of the mark as these defendants suggest. It contains a concise statement of the material facts upon which Bellan is relying. Anyone reading it will understand what the case is about.

19 Much of the information these defendants are seeking with respect to specific paragraphs in the statement of claim is set out elsewhere in the statement of claim or documents referred to in the statement of claim.

20 In many instances, the particulars being requested are with respect to details which Bellan probably does not have and couldn't be expected to have until the discovery process has been completed. In fact, at this time, these defendants likely have more knowledge of many of the details they are requesting than Bellan does. They were actively involved in the matters which

are the subject of the action. As well, they have as much access as Bellan does to the large volume of information which is in the public domain.

21 The balance of the information they are requesting is not necessary at this stage of the proceedings. There is a substantial difference between the particulars they require for the certification hearing or to file their statements of defence and the information they may later require for the purposes of trial.

22 The level of detail they are requesting is not required for the certification process. Any additional information required for the certification motion can be provided by affidavits filed in support of the motion and any cross-examinations on them. If Bellan fails to provide sufficient information, the class action will simply not be certified.

23 Although defendants in a class action proceeding often defer filing their statements of defence until the action is certified, once the particulars I have ordered have been provided, the defendants will have sufficient information to file their defences should they choose to do so.

24 Under the circumstances, at this stage of the proceedings, it would not be in the interest of judicial economy to put Bellan through the extensive effort and expense of providing the voluminous particulars these defendants are requesting. Indeed, if the action is not certified the result would simply be a waste of time and money.

25 If the class action is certified, the defendants will have ample opportunity to obtain any additional information they require for the purposes of trial through the discovery process.

### **Motions to Strike**

26 The main ground being alleged with respect to the motions to strike is that the impugned pleadings disclose no cause of action. Some of the defendants also allege the statements of claim are scandalous, frivolous or vexatious.

#### **(a) Effect of Documents Referred to in the Statements of Claim**

27 Prior to argument on any of the motions, a dispute arose amongst some counsel as to what use could be made of documents referred to in the statements of claim on a motion to strike for failure to disclose a cause of action.

28 The Province and the defendant directors argue a document referred to in the statement of claim can only be utilized if it is one upon which the plaintiff *must rely* for the establishment of his claim. In support of their position, they rely on the following comment by Disbrey J. in *Balacko v. Eaton's of Canada Ltd.* (1967), 60 W.W.R. 22 (Sask. Q.B.) at p. 26:

In light of these authorities I am of the opinion that the only documents which are properly to be considered on an application to strike out a statement of claim on the ground that it discloses no reasonable cause of action are the notice of motion, the attacked statement of claim, the particulars furnished pursuant to a demand therefor, and any document which is referred to in the statement of claim upon which the plaintiff must rely for the establishment of his claim; for such a document is to be considered for the purposes of the application as forming part of the pleading: *Hogan v. Brantford (City)* (1909-10) 1 OWN 226. Other documents referred to in a statement of claim which are merely evidential and from which the plaintiff's claim does not arise should not, in my opinion, be considered; for to do so would be to admit evidence to support the attacked pleading, which is not permissible.

(underlining added)

29 The plaintiffs take the position that the statements of claim are substantially adequate and that the court doesn't need to consider any of the documents referred to in them in order to determine whether they disclose good causes of action against each of the defendants.

30 Nesbitt Burns and Pricewaterhouse Coopers LLP ("PWC") both argue that the totality of the documents referred to in the statement of claim should be considered. They wish to rely on the documents to demonstrate that contrary to what is

pledaded in the statement of claim in Bellan No. 1, Bellan and/or other members of the putative class do not have a good cause of action against them.

31 The relevant Queen's Bench Rules are 25.06(1) and (9). They read:

25.06(1) Every pleading shall contain a concise statement of material facts on which the party relies for a claim or defence, but not the evidence by which those facts are to be proved.

25.06(9) The effect of a document ..., if material, shall be pleaded as briefly as possible, but the precise words of the document ... need not be pleaded unless those words are themselves material.

(Emphasis mine)

32 By virtue of Rule 25.06(9), a material document may be incorporated into a pleading by merely referring to it. The purpose of the rule is to avoid the need to plead lengthy documents in the body of a pleading and/or provide particulars of them.

33 The documents which are referred to in the statements of claim in both Bellan No. 1 and 2 include the prospectuses, the auditors' reports, an agreement with Fonds de Solidarité, FTQ (Solidarité) dated November 15, 2002 and the Auditor General's report. The statement of claim in Bellan No. 2 also refers to a Cabinet memo dated November 27, 2000 and a Finance Department memo dated September 13, 2004.

34 I am satisfied that the prospectuses, the auditors' reports and the agreement with Solidarité are integral to both statements of claim. I am also satisfied the Cabinet and Finance Department memos are integral to the statement of claim in Bellan No. 2. Accordingly, these documents constitute material facts which the court may consider in assessing the substantive adequacy of the statements of claim. See *Montreal Trust Co. of Canada v. Toronto Dominion Bank* (1992), 40 C.P.C. (3d) 389 (Ont. Gen. Div.) at paras. 3 and 4; also see *Clitheroe v. Hydro One Inc.*, [2002] O.J. No. 4383 (Ont. S.C.J.) at para. 10(e); and *Web Offset Publications Ltd. v. Vickery* (1998), 40 O.R. (3d) 526 (Ont. Gen. Div.).

35 The Auditor General's report, on the other hand, does not appear to be a material document with respect to either of the statements of claim but the issue with respect to it is moot since none of the parties purported to rely on it in regard to any of the motions to strike.

**(b) Test for Striking Pleadings for Showing No Cause of Action**

36 A statement of claim should not be struck out unless it is "plain and obvious" that it discloses no reasonable cause of action. Nor should it be struck because it is novel or complex or the law is uncertain. See *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.) at para. 33. The motion is decided on the pleadings alone and any document incorporated into them by reference. The statement of claim must be read generously. The court must accept the facts alleged in the statement of claim as true unless they are patently ridiculous or incapable of proof. See *Falloncrest Financial Corp. v. Ontario* (1995), 27 O.R. (3d) 1 (Ont. C.A.).

**(c) Test for Determining if a Pleading is Scandalous, Frivolous or Vexatious**

37 Queen's Bench Rule 25.11 allows a court to strike a pleading that is scandalous, frivolous or vexatious. Epstein J. dealt with the meaning of "scandalous, frivolous or vexatious" in *George v. Harris*, [2000] O.J. No. 1762 (Ont. S.C.J.). At para. 20, he stated:

The next step is to consider the meaning of "scandalous", "frivolous" or "vexatious". There have been a number of descriptions provided in the multitude of authorities decided under this or similar rules. It is clear that a document that demonstrates a complete absence of material facts will be declared to be frivolous and vexatious. Similarly, portions of a pleading that are irrelevant, argumentative or inserted for colour, or that constitute bare allegations should be struck out as scandalous. The same applies to a document that contains only argument and includes unfounded and inflammatory attacks on the integrity of a party, and speculative, unsupported allegations of defamation. In such a case the offending statements will be struck out as being scandalous and vexatious. In addition, documents that are replete with conclusions,

expressions of opinion, provide no indication whether information is based on personal knowledge or information and belief, and contain many irrelevant matters, will be rejected in their entirety.

**(d) Motion by Wellington to Strike Last Sentence of Para. 62 of Statement of Claim in Bellan No. 1**

38 Wellington West moves to strike out the last sentence of para. 62 of the statement of claim in Bellan No. 1 which reads:

In addition, Wellington West, as a recipient of investment funds from the Crocus Fund, was in a conflict of interest.

39 It submits that whether it was a recipient of investment funds and whether it was in a conflict of interest are entirely irrelevant to any cause of action pled against it.

40 Bellan takes the position that the allegation is a material fact which has been properly pled. He points to the fact that one of the causes of action he is alleging against Wellington West is based on a breach of s. 52(1) of the *Competition Act*, R.S.C. 1985, c. C-34, which reads in part as follows:

No person shall, for the purpose of promoting, ... directly or indirectly, any business interest, by any means whatever, knowingly or recklessly make a representation to the public that is false or misleading in a material respect.

He says the fact Wellington West was a recipient of investment funds from Crocus shows it had an indirect business interest in the promotion of the sale of Crocus shares and as such is a material fact with respect to his claim under the *Competition Act*. He also says that the allegation it was in a conflict of interest is a material fact that may support an award of punitive damages.

41 As I am satisfied this plea constitutes a material fact for the reasons advanced by Bellan, I am dismissing Wellington West's motion.

**(e) Motions by Nesbitt Burns and Wellington West in Bellan No. 1 to strike claims against them other than those relating to Mr. Bellan's personal claim**

42 Nesbitt Burns and Wellington West are both requesting an order striking out the facts and claims asserted against them in Bellan No. 1 other than the facts and claims as to Bellan's alleged "reinvestment" of 350 shares of the Crocus Investment Fund in January/February, 2001 which was made under the Crocus Prospectus dated January 12, 2001.

43 For the purposes of their motions, they concede that Bellan has pleaded a personal cause of action against each of them with respect to his purchase of the 350 shares in January/February, 2001.

44 The real issue is whether Bellan can assert causes of action which he does not personally have on behalf of the putative class of plaintiffs. Nesbitt Burns and Wellington West maintain he cannot. They argue, there are separate and distinct causes of action under each of the prospectuses based on separate and distinct purchases of shares. They say it would open the floodgates if Bellan were allowed to assert claims for investors under each of the prospectuses over the twelve-year period Crocus was in the market-place. I do not agree.

45 I am satisfied that to the extent Nesbitt Burns and Wellington West focus their attacks on the personal claim of Bellan, they are engaging in the wrong inquiry under *The Class Proceedings Act*, C.C.S.M., c. C130 ("CPA").

46 Pleadings in class actions differ from pleadings in other lawsuits in that they may assert causes of action on behalf of the class and join defendants on behalf of the class even where such causes of action extend beyond the personal claim of the proposed representative plaintiff.

47 In *MacKinnon v. National Money Mart Co.*, [2004] B.C.J. No. 1960 (B.C. C.A.), Saunders J.A. speaking for the British Columbia Court of Appeal stated:

¶ 33 It is true that in one sense the action, before certification, is an ordinary action. And s. 40 of the Class Proceedings Act expressly provides that the Rules of Court apply. It does so, however, with the caveat "to the extent those rules are not

in conflict with this Act". I think it is also clear that an action commenced under the Class Proceedings Act is, even before the certification application, more than just "any old action": it is an action with ambition. That ambition, by Rule 4(4.1), must be reflected on the face of the pleadings. The question is whether that ambition stated on the face of the pleadings affects the application of Rule 19(24)(a) to the question before this Court.

¶ 34 I turn then to Rule 19(24). No doubt Rule 19(24)(a) can be invoked prior to a certification hearing. But what does it mean in the context of an action started under the Act? Obviously if the pleadings disclose no cause of action between any persons, whether or not named, the action may be dismissed. But that is not the case here. The statement of claim alleges a cause of action between members of the potential class and the defendants, even though those members have as yet no personal identity. Is this sufficient pleading to escape dismissal under Rule 19(24)?

....  
¶ 38 For the appellants to succeed on their Rule 19(24) application it must be plain and obvious that the action has no chance of success. In assessing the chance of success the action must be considered in the context of its stated ambition to be a class proceeding. On the authority of *Campbell v. Flexwatt and Harrington*, it is not plain and obvious that the action against the appellants has no chance of success. Those cases hold out the prospect that the action will be certified as a class action, and even that further representative plaintiffs may be appointed to represent a sub-class of persons who did have contractual dealings with the appellants.

....  
¶ 49 Considering that instruction, I find the flexibility in the Act supports the result of *Campbell v. Flexwatt*. While s. 2(1) displays an intention that, in ordinary cases, the representative plaintiff or plaintiffs themselves should have a cause of action, s. 2(4) shows that such a condition is not inherent to a class action. A representative plaintiff referred to in s. 2(4) is not a member of the class and would not be linked to the defendants by a cause of action. Rather the link would be between the defendants and the class, with the representative plaintiff simply the spokesperson of the class.

¶ 50 Although s. 2(4) only allows a nonmember of a class to be the representative plaintiff where it is necessary "to avoid a substantial injustice to the class", the fact that the Act allows such a situation at all indicates, in my view, that the cause of action nexus is not solely between defendants and the representative plaintiff, but also between defendants and the plaintiff class as a whole. This shifts the focus in the cause of action analysis from the representative plaintiff onto the class, and is consistent with a litigation process that seeks to resolve common issues, rather than to resolve entire claims.

¶ 51 I conclude that while the Act requires a cause of action against each named defendant, that cause of action must be held by class members, not necessarily the representative plaintiff.

¶ 52 The appellants urge upon us the reasoning in [*Ragoonian Estate v. Imperial Tobacco Canada Ltd.* (2000), 51 O.R. (3d) 603]. However, that case concerns a different statute, one without the equivalent of s. 2(4). It may be distinguished simply on that basis.

The same conclusion was reached by the Saskatchewan Court of Queen's Bench in *Frey v. BCE Inc.*, [2006] S.J. No. 453 (Sask. Q.B.).

48 The approach adopted by the courts in British Columbia and Saskatchewan is consistent with the recommendations made by the Manitoba Law Reform Commission in 1999. See Manitoba. Law Reform Commission. Report 100. Report on Class Proceedings. Winnipeg: The Commission, 1999. At p. 37, the Commission stated:

#### A. General Objectives

It must be kept in mind that there is little point in adopting a class proceedings law which appears to permit such actions but which, practically speaking, precludes them. The Ontario, British Columbia, and Uniform Acts take pains to ensure that barriers to class actions (particularly barriers identified in the American or Québec jurisprudence, or in decisions like that of the Supreme Court of Canada in [*Naken v. General Motors of Canada Ltd.* (1983), 144 D.L.R. (3<sup>rd</sup>) 385 (S.C.C.)]) are removed or minimized. As discussed in more detail below, this objective is accomplished through liberal certification

standards (including a specific enumeration of factors that are not bars to certification) and a careful consideration of financial arrangements, including the rules on costs, fee arrangements, and funding mechanisms.

(Emphasis mine)

Further, at p. 57 it stated:

We have considered the various recommendations discussed above, and are satisfied that the requirements set out in the British Columbia and Uniform Acts are reasonable, desirable, and adequate for Manitoba's purposes. A class proceeding ought not to be allowed to proceed if the representative party is not in a position to "fairly and adequately represent" the class, and the court must be empowered to ensure that this criterion is met prior to certification. At the same time, there are persuasive reasons not to require that the representative necessarily be an actual member of the class he or she has applied to represent.

(Emphasis mine)

49 In response to the recommendations of the Law Reform Commission, the Manitoba Legislature enacted the *CPA*. It is in all material respects identical to the British Columbia statute.

50 I am satisfied the approach taken by the courts in British Columbia and Saskatchewan should be followed in Manitoba. Section 6 of *The Interpretation Act*, C.C.S.M. c. I80, provides:

#### **Rule of liberal interpretation**

6 Every Act ... must be interpreted as being remedial and must be given the fair, large and liberal interpretation that best ensures the attainment of its objects.

51 As far as possible a multiplicity of proceedings should be avoided. The goal of the *CPA* is judicial economy and access to justice. The result should be that cases are handled in the most just, expeditious and inexpensive manner possible.

52 A requirement that there be a separate plaintiff who purchased under each of the prospectuses for the class action to proceed would not serve the purpose of judicial economy.

53 I am satisfied that allowing a representative plaintiff to assert causes of action he does not personally have will not open the floodgates to unfocused, sector wide litigation as the court has a gatekeeper role to play at the certification stage.

54 The real issue is whether the representative party is in a position to fairly and adequately represent the proposed class. This is something which will be determined in the certification hearing.

55 While it may ultimately be determined that there are different subgroups of investors that have different rights against the defendants, if such differences emerge they can be dealt with at a later point. For example, subclasses may be added or the action may not be certified.

56 As Bellan has pleaded a cause of action by members of the putative class against Wellington West under each of the prospectuses and against Nesbitt Burns with respect to the prospectuses dated December 22, 1999 and January 11 and July 13, 2001, I am dismissing their motions to strike.

#### ***(f) Motion to Strike in Bellan No. 1 by PWC***

57 PWC is seeking an order dismissing the claim against it in Bellan No. 1 on the ground that the statement of claim fails to disclose a reasonable cause of action against it.

58 PWC audited the financial statements of the Crocus Fund and in its audit reports expressed its opinion about the Fund's operation for the financial years in the class period. Bellan is asserting three causes of action against it. He is claiming damages for negligence, negligent misrepresentation and a breach of s. 52 of the *Competition Act*.

59 Prior to argument on this motion, Bellan and PWC consented to an order striking out the last sentence of both paragraphs 88 and 93 of the statement of claim without leave to amend. These sentences both stipulated that Bellan was relying on s. 141(1) of *The Securities Act*. Bellan agreed that they should be struck as he is no longer alleging the investors who purchased Crocus shares are deemed, pursuant to s. 141(1) of *The Securities Act*, to have relied upon PWC's audit reports.

(i) *Negligence*

60 Counsel for PWC stated he did not read the statement of claim as pleading a cause of action in negligence but if it did, there could be no breach of duty unless Bellan received the audit report.

61 I do not agree. Bellan alleges PWC was negligent in performing its audits of the Crocus Fund and as a result he and other members of the putative class suffered damages. He claims that if PWC had exercised due diligence in conducting the audits, the Crocus Fund either would not have continued trading as a public company or its shares would have been traded at a proper value. This claim by Bellan is not dependent on whether he saw or relied on the audit reports.

62 Accordingly, I am not satisfied that it is plain and obvious that Bellan and the other putative class members do not have a cause of action against PWC in negligence.

(ii) *Negligent Misrepresentation*

63 For the purposes of this portion of the motion, counsel for PWC indicated he was not going to argue that PWC did not owe a duty of care to investors under the principles set out in *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.).

64 However, he argued that actual reliance on the alleged negligent misrepresentation which is an essential element of a claim for negligent misrepresentation has not been pleaded or at least has not been pleaded with sufficient specificity. As a result, he submitted the claim for negligent misrepresentation should be struck.

65 Again, I do not agree. There is a specific plea of reliance in both paragraphs 89 and 93 of the statement of claim. Paragraph 89 reads "The plaintiff and other class members suffered loss and damage *as the result of relying upon the PWC opinion*." Paragraph 93 reads "The plaintiff and other class members *relied upon the PWC audit opinions* and the PWC opinion and purchased or held shares of the Crocus Fund and suffered loss and damage."

(iii) *The Competition Act Claim*

66 Section 52 of the *Competition Act* creates an offence with respect to the making of certain false or misleading representations. It reads:

52(1) No person shall, for the purpose of promoting, directly or indirectly, the supply or use of a product or for the purpose of promoting, directly or indirectly, any business interest, by any means whatever, knowingly or recklessly make a representation to the public that is false or misleading in a material respect.

67 Section 36 of the *Competition Act* provides a right to claim civil damages for a breach of s. 52(1).

68 PWC takes the position that the claim against it pursuant to the *Competition Act* should be struck because:

(a) there is no pleading that Bellan received and relied upon the audited financial statements;

(b) the expression of an audit opinion is not the type of act or representation that is captured or engaged by s. 52(1) of the *Competition Act*.

69 As stated above, I am satisfied that actual reliance has been pleaded in paragraphs 89 and 93 of the statement of claim.

70 PWC argues that it was actually performing a service and not promoting a service and as a result there is no cause of action against it under s. 52(1) of the *Competition Act*. It claims that the audited reports it prepared were for the limited purpose of providing shareholders with information for the purpose of overseeing the management and affairs of Crocus.

71 I am, however, satisfied that they had a dual purpose. A second and equally important purpose was for inclusion in the prospectuses to enable Crocus to offer its shares to the public. PWC knew Crocus was going to offer shares to the public. It knew its services were, in part, for the purpose of obtaining approval for that public offering. It consented to the audit reports being included in the prospectuses. In 1997, the audit report was incorporated directly into the prospectus and in the other years the reports were incorporated into the prospectuses by reference. Without the audited reports, the prospectuses would not have been approved by the regulator and Crocus would not have been able to offer shares to the public.

72 In *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2001] O.J. No. 4620 (Ont. S.C.J.), Cumming J. in a case similar to the case at bar stated at para. 85:

... I find that the [auditor's] alleged misrepresentations arguably may have been made for the purpose of promoting their "business interests" within the meaning of s. 52(1), even if that was only a subsidiary and indirect intention of the "representation". This novel cause of action of the plaintiffs advanced under the misleading advertising provisions of the *Competition Act* seems problematic and tenuous. However, in my view the s. 36 claim based on s. 52(1) of the *Act* should not be struck. I am not satisfied that it is plain and obvious that the claim advanced under ss. 36 and 52 of the *Competition Act* discloses no reasonable cause of action and that the plaintiffs' claim would necessarily fail.

73 I share that view in this case. Given the very broad language in s. 52(1), I am not satisfied it is plain and obvious that Bellan's claim under the *Competition Act* will necessarily fail.

74 PWC also takes the position that if the claim against it is not struck, it should be limited to the 2000 year-end audit opinion as this is the only opinion that could have had any impact on Bellan's 2001 share purchase. For example, it says, that by the time the Solidarité transaction was reported on the September 30, 2003 financial statements, Bellan had already purchased his shares and was subject to the hold period and therefore could not have acted on anything represented in the 2003 financial statements. This argument is identical to the one which I already rejected at paragraphs 42-56, when dealing with the motions by Nesbitt Burns and Wellington West. Under the circumstances, it is unnecessary for me to deal with it again.

75 PWC also argues that the documents incorporated into the plaintiffs' statement of claim by reference clearly show that the Solidarité transaction was not misclassified by PWC as Bellan maintains. However, the statement of claim alleges it was. Under the circumstances, I agree with Bellan that this is a question of fact for the trier of fact to determine.

76 Accordingly, I am dismissing PWC's motion to strike the statement of claim against it.

**(g) Motion to Strike in Bellan No. 1 by MSC**

77 MSC is seeking an order striking out the claim against it in Bellan No. 1 on the ground that the statement of claim fails to disclose a reasonable cause of action against it.

78 Relying primarily on *Cooper v. Hobart*, [2001] 3 S.C.R. 537 (S.C.C.) and *Edwards v. Law Society of Upper Canada*, [2001] 3 S.C.R. 562 (S.C.C.), it argues that a statutory regulator such as the MSC does not owe a private law duty of care to members of the investing public for negligence in failing to properly oversee the conduct of an investment company subject to its regulation. Both of these cases involved negligence actions against regulators — in one case a registrar of mortgage brokers and in the other a law society. The actions were brought by investors who alleged their losses were caused in part by the failure

of the regulator to take reasonable steps to protect them from parties who were subject to their regulation. The Supreme Court of Canada struck out both claims on the ground that there was no duty owed by the regulators to members of the investing public to protect their interests due to the absence of a sufficient degree of proximity between them.

79 Bellan argues that this case is distinguishable from *Hobart* and *Edwards*. He points to the fact that *The Securities Act* charges the MSC with the responsibility of administering that Act and empowers it to conduct an investigation. In this case, Bellan made a specific complaint to the MSC in about 2002 with respect to the alleged misleading valuation in the Crocus Fund. On April 28, 2003, the MSC publicly announced it was going to conduct a review of the Crocus Fund. Bellan alleges it completely botched this review and that this was an operational failure. He argues *The Securities Act* does not immunize the MSC from such failures. He points to s. 142(1) of that Act which provides:

142(1) No person may commence or maintain an action or other proceeding against ... the [Securities] Commission ... for any act done in good faith, or any neglect or default, in the performance or intended performance in good faith of a responsibility or in the exercise or intended exercise in good faith of a power or discretion

(a) under this Act or the regulations; ...

80 This provision, Bellan maintains, implies that the MSC may be civilly liable for conduct done in bad faith, or for conduct that goes beyond mere "neglect or default".

81 Bellan further argues a regulator can be civilly liable for its failure to conduct a proper investigation into complaints made by a clearly identified plaintiff. He relies on *McCulloch Finney c. Barreau (Québec)*, [2004] 2 S.C.R. 17 (S.C.C.); *McClelland v. Stewart*, [2004] B.C.J. No. 1858 (B.C. C.A.), leave to Supreme Court denied (2005), [2004] S.C.C.A. No. 492 (S.C.C.); and *755165 Ontario Inc. v. Parsons*, [2006] N.J. No. 224 (N.L. T.D.), leave to appeal refused [2006] N.J. No. 294 (N.L. C.A.).

82 *McCulloch Finney* concerned complaints made by a plaintiff regarding the conduct of a lawyer. The Barreau was found to be grossly incompetent in responding to these complaints. The Supreme Court of Canada affirmed an award of damages to the plaintiff and gave an expansive reading to the concept of "bad faith". At para. 39 it stated:

... [T]he concept of bad faith can and must be given a broader meaning that encompasses serious carelessness or recklessness.

It went on at para. 46 to state:

... [T]he Barreau would have been no less liable in the circumstances of this case if the analysis adopted by this Court in *Edwards v. Law Society of Upper Canada* ... and *Cooper v. Hobart* ... had been applied. The decisions made by the Barreau were operational decisions and were made in a relationship of proximity with a clearly identified complainant, where the harm was foreseeable. ...

(Emphasis mine)

83 *McCulloch Finney* was applied by the British Columbia Court of Appeal in *McClelland* and by the Newfoundland and Labrador Supreme Court — Trial Division in *Myles-Leger Ltd. (Trustee of)*. Both of these cases involved claims against statutory regulators. In both cases, the courts refused to strike the claims, finding that the actions were arguable in light of *McCulloch Finney*.

84 In *McClelland*, the court refused to strike the claims of a group of patients who were suing the College of Physicians and Surgeons for its failure to act on information that a doctor was sexually abusing his female patients.

85 In *Myles-Leger Ltd. (Trustee of)*, the court refused to strike a claim against a law society for its failure to act on information regarding a lawyer's abuse of trust accounts. Green C.J. T.D. wrote at para. 74:

Given the foregoing factors, and reading the decisions in *Cooper* and *Edwards* in light of *McCulloch Finney* and *McClelland*, I am not satisfied it is "plain and obvious" that the plaintiff's claim in this case cannot succeed. There is not such a deficiency in pleading on the proximity issue that should preclude the plaintiff from proceeding with its action. Instead as in *McLelland*, the question as to whether there is sufficient proximity should "turn on the factual underpinning" of the plaintiff's claims.

86 I am satisfied that the same is true in this case. There are a number of factors which distinguish this case from *Cooper* and *Edwards*. In *Cooper* and *Edwards*, the parties were strangers to one another. In the present case, Bellan made a specific complaint to the MSC. The MSC publicly announced a review of the Crocus Fund. During its review, it failed to discover wrongdoing which Bellan alleges should have been obvious.

87 Also, while in *Cooper* and *Edwards*, there was a statutory provision granting the regulator immunity for acts done in good faith, there was no allegation in either of those cases that the regulator acted in bad faith.

88 Given the different factual circumstances in this case and the decisions in *McCulloch Finney*, *McClelland* and *Myles-Leger Ltd. (Trustee of)*, it cannot be said that it is plain and obvious that the claim in Bellan No. 1 must fail.

89 Accordingly, I am dismissing MSC's motion.

**(h) Motions by Province in Bellan No. 2**

90 The Province has filed two motions.

91 In its first motion it is seeking an order striking out the following parts of the statement of claim: the portions of paragraphs 1(c) and (d) relating to direct liability, paragraphs 10, 14, 16, 17, 18, 34, the portions of paragraphs 42, 49 and 50 relating to direct liability, paragraphs 51, 52, 53, 54, 55, 56, paragraph 57 as it pertains to direct liability, and paragraph 61, on the grounds that they do not disclose a reasonable cause of action or are scandalous, frivolous or vexatious.

92 In its second motion, it is seeking:

(i) an order striking out the following words in the statement of claim:

In paragraph 11, in the 5<sup>th</sup> line, the word "including"

In paragraph 12, in the 2<sup>nd</sup> line, the word "included"

In paragraph 13, in the 2<sup>nd</sup> line, the word "including"

In paragraph 15, the words "or for other improper reasons"

In paragraph 49, in the 4<sup>th</sup> line, the word "include"

In paragraph 53, in the 4<sup>th</sup> line, the word "including"

or, in the alternative, an order deleting the words in question and requiring the plaintiffs to provide full particulars;

(ii) an order striking out the portions of paragraphs 1(c) and (d) relating to vicarious liability, paragraph 15, the portions of paragraphs 42, 49, and 50 relating to vicarious liability, on the grounds that they do not disclose a reasonable cause of action;

(iii) an order striking out paragraphs 38 and 53.1 through 53.10 on the grounds that they do not disclose a reasonable cause of action, are the pleading of evidence rather than material facts, are scandalous, frivolous or vexatious, or are irrelevant and an abuse of the process of the court;

(iv) an order striking out the words "the agreement was highly restrictive and one-sided in favour of Solidarité" in the first line and the word "onerous" in the third line of paragraph 34, and the phrase "the picture thus created was a sham" in paragraph 42, on the grounds that they are scandalous, frivolous or vexatious.

93 I am ordering Bellan and Nelson to provide particulars with respect to the "other improper reasons" referred to in paragraph 15 of the statement of claim. I am satisfied these particulars may be of assistance to the Province with respect to the certification hearing and are necessary in order to enable it to file a statement of defence. I am not satisfied that the remainder of the particulars the Province is requesting are required for either the certification hearing or for the purpose of filing a defence.

94 I am also making an order striking out paragraph 38 of the statement of claim on the ground that it is scandalous because the facts set out in it are irrelevant.

95 I am dismissing the request to strike portions of paragraphs 34 and 42 as I am satisfied they constitute pleas of material facts.

96 For the reasons which follow, I am also dismissing the remainder of the Province's motions.

97 Bellan and Nelson are asserting three causes of action against the Province — negligence, a breach of s. 234 of the *Corporations Act* (oppression) and abuse of public office.

*(i) Negligence*

98 The Province relies primarily on *Cooper* to argue it owed no duty of care to investors in the Crocus Fund. In *Cooper*, the Supreme Court of Canada confirmed that the principles set out in *Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.) are still appropriate in the Canadian context. In *Cooper* and its companion case *Edwards*, the Supreme Court reformulated the two-stage *Anns* test. The reformulation is concisely summarized in *Edwards* by McLachlin C.J. and Major J. as follows:

9 At the first stage of the *Anns* test, the question is whether the circumstances disclose reasonably foreseeable harm and proximity sufficient to establish a *prima facie* duty of care. The focus at this stage is on factors arising from the relationship between the plaintiff and the defendant, including broad considerations of policy. The starting point for this analysis is to determine whether there are analogous categories of cases in which proximity has previously been recognized. If no such cases exist, the question then becomes whether a new duty of care should be recognized in the circumstances. Mere foreseeability is not enough to establish a *prima facie* duty of care. The plaintiff must also show proximity — that the defendant was in a close and direct relationship to him or her such that it is just to impose a duty of care in the circumstances. Factors giving rise to proximity must be grounded in the governing statute when there is one, as in the present case.

10 If the plaintiff is successful at the first stage of *Anns* such that a *prima facie* duty of care has been established (despite the fact that the proposed duty does not fall within an already recognized category of recovery), the second stage of the *Anns* test must be addressed. That question is whether there exist residual policy considerations which justify denying liability. Residual policy considerations include, among other things, the effect of recognizing that duty of care on other legal obligations, its impact on the legal system and, in a less precise but important consideration, the effect of imposing liability on society in general.

99 I am satisfied it is at least arguable that the Province was in such a close and direct relationship to investors in the Crocus Fund that it would be just to impose a duty of care upon it in the circumstances of this case.

100     *The Mortgage Brokers Act*, R.S.B.C. 1996, c. 50, at issue in *Cooper* is distinguishable from the *Crocus Act*. *Cooper* involved a statute of general regulatory application. The *Crocus Act* relates only to the Crocus Fund. It is not a broad public duty statute.

101     However, the Province submits that even if a *prima facie* duty of care can be established under the first branch of the *Anns* test, it would be negated at the second stage for overriding policy reasons. It argues that its role was limited to making policy decisions, not operational decisions, and as such its decisions are immune from attack under the second branch of the *Anns* test.

102     I agree with the Province that there is a serious issue as to whether it owed a private law duty of care to investors in Crocus and, if so, the extent of that duty. However, the distinction between policy decisions and operational decisions is not always easy to determine. In the circumstances of this case, I am satisfied a full factual record is necessary to determine if there was private law duty of care owed by the Province to investors in the Crocus Fund.

103     The facts in *Cooper* were very different from the facts pleaded in this case. In *Cooper*, the regulator had no involvement with the mortgage broker — it held no shares in it, did not appoint any directors for it, did not provide it with start up capital, did not co-invest with it, did not have employees who signed any prospectus for it and did not promote the sale of its shares.

104     In this case, the Province played a myriad of roles in regard to Crocus. It provided Crocus with start up capital and co-invested with it. Provincial government employees were involved in running, monitoring, regulating and promoting it. The Province was a Class G shareholder in Crocus and had the right to appoint and did appoint a director to the Crocus board. It appointed very senior employees to that directorship, including deputy ministers. Bellan and Nelson allege that this directorship was not just a personal posting for these individuals but was instead a position intended to represent the Province's interests on the board.

105     Of particular importance is the fact that the Province was very prominent in promoting the Fund. Investors were buying an investment in which the government was playing an active role. Bellan and Nelson contend that, under the circumstances, the reasonable expectations of investors as to what the government's responsibilities were would be quite different from a case like *Cooper* where the government had no role in the creation or operation of the mortgage fund.

(ii) *Oppression Remedy (s. 234 Corporations Act)*

106     Bellan and Nelson allege that as a Class G shareholder, the Province unfairly disregarded the interests of the Class A shareholders contrary to s. 234 of *The Corporations Act*. The relevant portion of this section reads:

**Grounds**

**234(2)** If, upon an application ..., the court is satisfied that in respect of a corporation ...

      (b) the business or affairs of the corporation ... have been carried on or conducted in a manner ...

that is oppressive or unfairly prejudicial or that unfairly disregards the interests of any security holder ..., the court may make an order to rectify the matters complained of.

(Emphasis mine)

107     Bellan and Nelson claim the Province had specific knowledge of serious problems at the Crocus Fund on or before November 27, 2002 and did not take steps to protect or alert the Class A shareholders. Quite to the contrary, they say it continued to promote the sale of Class A shares to the public.

108     Bellan and Nelson allege that the Crocus Fund had all the earmarks of a government promoted investment. Under the circumstances, they claim investors in the Fund had a reasonable expectation that material information about the Fund would

not be given to and retained by only the Class G shareholder. This is especially true, they say, where the Class A investors were, with the knowledge of the Province, being given false and misleading information through the prospectuses.

109 Under all the circumstances, I am not persuaded that it is plain and obvious this claim will fail.

*(iii) Abuse of Public Office*

110 The elements of the tort of abuse of public office are:

- (a) deliberate, unlawful conduct in the exercise of public functions;
- (b) awareness that the conduct is unlawful and likely to injure the plaintiff;
- (c) causation; and
- (d) damages.

See *Odhayji Estate v. Woodhouse*, [2003] 3 S.C.R. 263 (S.C.C.) at para. 32.

111 The statement of claim in Bellan No. 2 alleges the Province was aware its employees were improperly shielding Crocus from compliance with the *Crocus Act* and from an adequate investigation, it was aware the actions of its employees were likely to injure investors in the Fund and the conduct of the Province's employees caused members of the putative class to suffer damages.

112 Accordingly, I am satisfied the requisite elements of the tort of abuse of public office have been pleaded.

*(iv) Vicarious Liability*

113 The Province argues that portions of the statement of claim which allege vicarious liability should be struck. It submits that Crocus was a stand alone corporation and that the government employees who became directors of it owed a responsibility to it and not the Province. But this misses the point being made by Bellan and Nelson. They acknowledge that the directors appointed by the Province had a legal duty to act in the best interests of Crocus but they claim that this is not what happened. Instead, they say the Province was, in fact, involved in the governance of Crocus through these directors. They assert the directors appointed by the Province, as employees of the Province, had a conflict of interest and did not act exclusively in the interests of Crocus. They allege the Province was negligent in permitting these directors, as well as certain other employees, agents and officers of the Province who also had multiple and conflicting roles in the direction and supervision of Crocus, to exercise authority with respect to monitoring and investigating the Crocus Fund. Under the circumstances, they say, the Province is both directly and vicariously liable for the actions of all of these employees, agents and officers.

114 Given all of the circumstances, I am not convinced that Bellan and Nelson's claim the Province is vicariously liable for the actions of its employees, agents and officers will necessarily fail.

**Costs**

115 If necessary, costs may be spoken to.

*Motions dismissed.*

XVIII Summary judgment

XVIII.11 Judgment on part of claim

**Headnote**

Practice --- Parties --- Representative or class actions --- General

Plaintiff passenger brought action for damages against defendant transit commission for personal injuries allegedly sustained in subway fire --- Transit commission made public admission of liability --- Passenger brought motion to obtain certification for class action proceeding --- Motion granted --- Passenger's pleadings disclosed cause of action and identifiable class existed --- Class not invalid on basis that all members not known at time of action --- Issues of fact and law common to members of proposed class --- Transit commission's admission did not resolve matter --- Liability not only issue common to class --- Admissions of liability do not defeat class actions as admission is only bare promise to members not party to proceeding --- Judicial economy served by class action as risk of inconsistent findings removed and resources conserved by single trial ---

Weighing of factors demonstrates class action preferable proceeding — Passenger could represent class adequately and was free from conflicts of interest and possessed litigation plan.

Practice --- Summary judgment — Judgment on part of claim

Plaintiff passenger brought action for damages against defendant transit commission for personal injuries allegedly sustained in subway fire — Transit commission made public admission of liability — Passenger brought motion for partial summary judgment — Motion granted — Admission of liability was sufficient to grant summary judgment on part of claim.

MOTION by passenger for class action certification and partial summary judgment in action for damages for personal injuries allegedly sustained in subway fire.

***Winkler J.*:**

1 This is a motion by the plaintiff for certification of this action as a class proceeding pursuant to the *Class Proceedings Act*, 1992, S.O. 1992, c. 6. The action arises from a fire in the Toronto Transit Commission subway system on August 6, 1997. The plaintiff also moves for partial summary judgment based on the defendant's admission of liability for the cause of the fire.

2 The TTC is a statutory commission which operates the public transit system in Toronto. At approximately 7:15 p.m. on August 6, 1997 a fire occurred near the TTC's Donlands subway station. The fire, which was located in a pile of rubber pads, took place in a subway tunnel area between the Donlands and Greenwood subway stations. Smoke from the fire entered the two adjacent subway stations and spread as well to other areas of the subway system. As a result passengers were asked or forced to leave the system through various stations.

3 The precise number of passengers affected by the fire and ensuing smoke is unknown but the TTC estimates that approximately 1200 to 1400 persons were caused to evacuate the subway system because of the incident. Although the TTC states that many passengers inhaled no or very little smoke and suffered a maximum exposure to smoke in the range of five minutes, it acknowledges that approximately 110 people were treated for smoke inhalation at the scene or at a hospital.

4 The representative plaintiff is a passenger who exited a train at the Donlands station, and then, proceeding by way of the tunnel, left the system at the Pape station. Her estimate is that she was exposed to the smoke in the station for approximately three to five minutes, and spent a similar amount of time moving through the tunnel to the Pape station, where there was also some smoke present. She was treated for smoke inhalation at Scarborough General Hospital. The following day she returned to work and for about one week after the incident suffered shortness of breath. Although she stated it was difficult to remove the smoke residue from her skin, she had no other symptoms related to the incident.

5 The TTC conducted a subsequent review of the incident and a further clean up of the system. The Fire Department Inspectors also reviewed the system and found nothing of concern, nor did they identify any additional fire hazards.

6 The instant intended class proceeding was commenced on or about August 8, 1997. The plaintiff claims \$30,000,000 in damages on behalf of the proposed class for personal injury, property damage and *Family Law Act* claims. The statement of claim sets out allegations of negligence and breach of contract. On August 13, 1997, the TTC publicly accepted responsibility and admitted liability for the cause of the subway fire. The statement of defence delivered by the TTC on or about September 24, 1997, contained this admission of liability.

## **Analysis and Disposition**

7 In order to be certified as a class action, the criteria contained in s. 5(1) of the Act must be met:

- 5(1) The court shall certify a class proceeding on a motion under section 2, 3 or 4 if,
- (a) the pleadings or the notice of application discloses a cause of action;
  - (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
  - (c) the claims or defences of the class members raise common issues;
  - (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
  - (e) there is a representative plaintiff or defendant who,
    - (i) would fairly and adequately represent the interests of the class,
    - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and

(iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

### **Cause of Action**

8 The first branch of the test requires a determination of whether the pleadings disclose a cause of action. The defendant has admitted liability for the cause of the fire. There is, therefore, no issue in this regard and the first requirement of the Act is met.

### **Identifiable Class**

9 The second requirement of the test for certification is that there be an identifiable class of two or more persons. The plaintiff proposes a class defined as follows:

- A. All persons other than TTC employees and emergency personnel, who were exposed to smoke and toxic gases in TTC vehicles or on TTC premises arising from a fire which commenced at approximately 7:15 p.m. on Wednesday, August 6, 1997 at or near the Donlands subway station or, where such a person died after the fire, the personal representative of the estate of the deceased person ... [referred to as the] Directly Affected Class Members; and
- B. All living parents, grandparents, children, grandchildren, siblings, and spouses (within the meaning of s. 61 of the *Family Law Act*) of the Directly Affected Class Members, or where such a family member died after the fire, the personal representative of the estate of the deceased family member [referred to as the] Family Claimants.

The defendant contends that in the present circumstances there is no identifiable class. It states that the class description proposed by the plaintiff is imprecise with the result that the class members will be unascertainable. I disagree.

10 The purpose of the class definition is threefold: a) it identifies those persons who have a potential claim for relief against the defendant; b) it defines the parameters of the lawsuit so as to identify those persons who are bound by its result; and lastly, c) it describes who is entitled to notice pursuant to the Act. Thus for the mutual benefit of the plaintiff and the defendant the class definition ought not to be unduly narrow nor unduly broad.

11 In the instant proceeding the identities of many of the passengers who would come within the class definition are not presently known. This does not constitute a defect in the class definition. In *Anderson v. Wilson* (1998), 37 O.R. (3d) 235 (Ont. Div. Ct.), Campbell J. adopted the words of the Ontario Law Reform Commission and stated at 248:

...a class definition that would enable the court to determine whether any person coming forward was or was not a class member would seem to be sufficient.

On this point, *Newberg on Class Actions* (3d ed. Looseleaf) (West Publishing) states at 6-61:

Care should be taken to define the class in objective terms capable of membership ascertainment when appropriate, without regard to the merits of the claim or the seeking of particular relief. Such a definition in terms of objective characteristics of class members avoids problems of circular definitions which depend on the outcome of the litigation on the merits before class members may be ascertained...

The *Manual for Complex Litigation, Third* (1995, West Publishing) states at 217:

Class definition is of critical importance because it identifies the persons (1) entitled to relief, (2) bound by a final judgment, and (3) entitled to notice in a [class] action. It is therefore necessary to arrive at a definition that is precise, objective, and presently ascertainable ... Definitions ... should avoid criteria that are subjective (e.g. a plaintiff's state of mind) or that depend upon the merits (e.g., persons who were discriminated against). Such definitions frustrate efforts to identify class members, contravene the policy against considering the merits of a claim in deciding whether to certify a class, and create potential problems of manageability.

The defendant urges, in the alternative, that the class definition should include a reference to damages resulting from smoke inhalation. This requirement, if adopted, would run contrary to the tenets set out above. It would unduly narrow the class and it anticipates entitlement. Moreover, it would eliminate persons with strictly property damage claims. The reference to damages impinges on the merits of the claim and, thus, goes beyond the purpose of class definition. The definition proposed by the plaintiff is approved with the deletion of words "and toxic gases".

### **Common Issues**

12 The third element of the test for certification is that claims of the class must raise common issues. The Act defines "common issues" in s. 1 as:

- (a) common but not necessarily identical issues of fact, or
- (b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts;

The *Class Proceedings Act, 1992*, is an entirely procedural statute, and, as such, does not create any new cause of action. A decision on certification does not constitute a determination on the merits of the action. The presence of common issues is at the very center of a class proceeding. It is the advancement of the litigation through the resolution of the common issues in a single proceeding which serves the goals of the Act. It is clear from the language of s. 5(1)(c) that the Act contemplates that there be a connection between the common issues, the claims or defences and the class definition. In like fashion, the common issues must have a basis in the causes of action which are asserted.

13 Here, the defendant admits liability for the cause of the fire. This admission, it contends, eliminates the common issue of liability. Since this, it asserts, is the only common issue, the certification motion must fail.

14 I cannot accede to this submission. This is not to in any way detract from the commendable and timely admission of fault by the defendant. However, an admission of liability in the air does not advance the litigation or bind the defendant in respect of the members of the proposed class. Without a certification order from this court no public statement by the defendant, and no admission in its defence to the nominal plaintiff, binds the defendant in respect of the members of the proposed class. A class proceeding by its very nature requires a certification order for the proposed class members to become parties to the proceeding. If the proposed class members are not parties to the proceedings, the admission of liability, as it relates to them, is no more than a bare promise. The words of the Divisional Court in *Westminister Canada Holdings Ltd. v. Coughlan* (1990), 75 O.R. (2d) 405 (Ont. Div. Ct.), are apposite. Rosenberg J., speaking for the court, stated at 415:

The defendants have undertaken to this court not to raise the limitation defence in Nova Scotia. The appellant did not seek such an undertaking. Such an undertaking does not end the matter. In my view the juridical disadvantage remains. In his text, James Cooper Morton, *Limitation of Civil Actions* (Toronto: Carswell, 1988), states at p. 106:

An agreement not to rely on the passage of time must meet the formal requirements of a contract before it can be considered binding. Specifically, consideration must pass between the parties. A bare promise not to rely on the passage of time is unenforceable.

In any event, absent a judgment by a court of competent jurisdiction on the basis of the admission, *res judicata* does not apply to the proposed class. See *Thoday v. Thoday*, [1964] 1 All E.R. 341 (Eng. C.A.) at 352. Therefore the admission *simpliciter* does not resolve the common issue of liability as it relates to the class members nor does it bind the defendant to them.

15 There is an additional common issue raised by the facts of this motion. One of the goals of the Act as stated by O'Brien J. in *Abdool v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) is "judicial economy or the efficient handling of potentially complex cases of mass wrongs".

16 Evidence of the circumstances surrounding the fire, the general background of the events on August 6, 1997, including the evacuation of the affected portion of the subway system, the composition of the smoke, the manner in which TTC staff reacted

to the emergency, and other evidence of general application to all the individual claims is relevant and indeed essential for a determination of individual damage claims. It is expedient, and in the interests of judicial economy, that this evidence and any consequent findings be dealt with as common issues of fact. Apart from the obvious efficiencies, this has the added advantage of removing the risk of inconsistent findings which accompanies a multiplicity of proceedings.

17 The plaintiff urges that an aggregate damages assessment applying to all class members be made a common issue. Section 24 of the Act permits of an aggregate determination of damages where appropriate, although the plaintiff concedes that this is a novel point and has never been ordered as a common issue under the Act. Section 24 provides in part:

24.(1) The court may determine the aggregate or a part of a defendant's liability to class members and give judgment accordingly where,

- (a) monetary relief is claimed on behalf of some or all class members;
- (b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability; and
- (c) the aggregate or a part of the defendant's liability to some or all class members can reasonably be determined without proof by individual class members.

18 In my view, the case at bar is not appropriate for an aggregate assessment of damages. The action advances claims for personal injury, property damage and claims under the *Family Law Act*. These claims cannot, "reasonably be determined without proof by individual class members" as required by s. 24(1)(c). Furthermore, each individual claim will require proof of the essential element of causation, which, in the words of 24(1)(b), is "a question of fact or law other than those relating to an assessment of damages".

19 In addition, the assessment of damages in each case will be idiosyncratic. All of the usual factors must be considered in assessing individual damage claims for personal injury, such as: the individual plaintiff's time of exposure to smoke; the extent of any resultant injury; general personal health and medical history; age; any unrelated illness; and other individual considerations. Indeed here, the representative plaintiff was suffering from and experiencing symptoms of food poisoning at the time of the incident. The property damage claims of class members must be assessed individually as the underlying facts will vary from one class member to the next.

20 The issue of damages, said to be a common issue by the plaintiff, is an individual issue. Furthermore, aggregate assessment cannot be a common issue here because this case does not meet the requirements of ss. 24(1)(b) and (c). Even if by class definition the members of the proposed class have all suffered exposure to smoke, the extent of such exposure and any damage flowing from it will vary on an individual basis.

#### ***Preferable Procedure***

21 Before dealing with the fourth requirement for certification contained in s. 5(1), that is, whether a class proceeding would be the preferable procedure for the resolution of the common issues, a review of general principles may be useful. It is not necessary that a determination of the common issues will determine liability. Rather, the common issues need only be issues of fact or law, the determination of which will move the litigation forward. The reasoning of Cumming J.A. in *Campbell v. Flexwatt Corp.* (1997), 15 C.P.C. (4th) 1 (B.C. C.A.), leave to appeal to S.C.C. denied [(1998), 228 N.R. 197 (note) (S.C.C.)] was adopted by Campbell J. in *Anderson* at 243, where he stated:

It is not necessary, in order to proceed with a class action, to demonstrate that the common issues will in themselves determine liability. The common issues need only be issues of fact or law that move the litigation forward...

and further at 247:

...a class proceeding does not have to be the preferable procedure for resolving the whole controversy, but merely the preferable procedure for *resolving the common issues*. (emphasis in original).

22 The Act is remedial legislation. As such, the Act ought to be given a purposive interpretation consistent with its goals of promoting judicial economy, facilitating access to justice and encouraging the modification of behaviour of actual or potential wrongdoers. In determining preferable procedure, the court, in the exercise of its discretion, undertakes a functional analysis of the individual and the common issues. Each case will therefore turn on its own facts. As O'Brien J. stated in *Abdool*, in respect of the application of discretion in certification, at 461:

Appellant's counsel, in argument, relied on the apparent mandatory wording of s. 5(1) of the Act, specifying "the court shall certify" if certain requirements are met. I am not persuaded that the approach to be taken is that simple.

Section 35 of the *Class Proceedings Act, 1992*, provides that the rules of court apply to class proceedings.

Rule 1.04(1) of the *Rules of Civil Procedure* provides:

These rules shall be liberally construed to secure the just, most expeditious and least expensive determination of every civil proceeding on its merits.

I do not accept the submission that any complex, multiple-party lawsuit is entitled to certification merely because that is the "preferable procedure" for resolving common issues which may be involved in the litigation.

In my view, some consideration must be given to individual issues involved in the litigation, the purposes of the Act, and the rights of the parties seeking, and opposing certification.

23 Section 6 was inserted in the statute to remove what had been impediments to representative actions prior to the Act. The section speaks to individual issues:

6. The court shall not refuse to certify a proceeding as a class proceeding solely on any of the following grounds:

1. The relief claimed includes a claim for damages that would require individual assessment after determination of the common issues.
2. The relief claimed relates to separate contracts involving different class members.
3. Different remedies are sought for different class members.
4. The number of class members or the identity, of each class member is not known.
5. The class includes a subclass whose members have claims or defences that raise common issues not shared by all class members.

24 Two points of view have emerged in *dicta* concerning the interpretation of s. 6. In *Abdool*, Moldaver J., as he then was, stated at 473:

Section 6 of the Act directs that the court, in coming to its decision to certify or not, shall not refuse certification solely if any one of the five delineated grounds is found to exist. Implicit in this, however, is the recognition that a court is entitled to consider the grounds referred to in s. 6 and where two or more of them are found to exist, the cumulative effect of these may legitimately be factored into the s. 5(1)(d) equation.

In *Nantais v. Electronics Proprietary (Canada) Ltd. (1995)*, 25 O.R. (3d) 331 (Ont. Gen. Div.), Brockenshire J. stated at 341:

I am not sure that this statement was essential to the result. I say this because I am not at all sure that this interpretation of the section is correct. With respect, I note that Moldaver J. has read in the word "one" after "any" in the beginning of s. 6 which in my view gives a restrictive effect to this remedial legislation. I think, in the context, "any" should be read as "any one or more". I would hope that a subsequent amendment to the section would remove any confusion.

Campbell J. in *Anderson* after referring to this difference of opinion concerning the interpretation of s. 6, found it unnecessary to decide the issue on the facts before the court and stated at 248:

Each case will turn on its own facts and not on abstract arguments about the interpretation of s. 6. Even if there is a conflict between these two *obiter dicta*, it makes no difference on the facts of this case.

Upon a further analysis, in my view, any conflict between the reasoning of Moldaver J. in *Abdool* and Brockenshire J. in *Nantais* is more apparent than real. The reasons of both indicate that in each case they weighed all the factors including individual issues in deciding whether a class proceeding was the preferable procedure. Individual considerations such as those set out in s. 6 are, in the words of Moldaver J. in *Abdool*, "legitimately factored into the s. 5(1)(d) equation."

25 The purpose for the inclusion of s. 6 in the Act is dealt with by Michael Cochrane in *Class Actions: A Guide to the Class Proceedings Act, 1992*, (Aurora: Canada Law Book, 1992) at 28:

Prior to the enactment of the *Class Proceedings Act, 1992*, the courts had in their interpretation of Rule 12 and its predecessor (Rule 75), erected a variety of substantive, procedural and other barriers to representative litigation. To ensure that these barriers are not the subject of litigation at certification, s. 6 [was included] in the [Act]...

Thus the central thrust of s. 6 is to ensure that the enumerated individual issues cannot be raised as absolute bars to certification. That is not to say, however, that individual issues are not to be taken into consideration in determining if a class proceeding is the preferable procedure. Indeed to so conclude would render any such exercise meaningless. Moreover, to apply a cumulative or quantitative approach to the individual issues referenced in s. 6 would have a like effect; for while they may exist, they may be relatively insignificant in the total context, or of unequal weight relative to each other or to the common issues. The court in reaching its decision on preferable procedure must of necessity consider all of the common and individual factors as part of the factual matrix.

26 In determining whether the class proceeding is the preferable procedure, the court does not inquire as to whether the common issues predominate the individual issues. The predominance test has been rejected by Ontario courts. Instead the proper approach is to weigh all of the relevant factors, including the common issues and the individual issues in the context of the goals of the Act. As Campbell J. stated in *Anderson* at 249:

Even if there was an error in the interpretation of s. 6 it could not affect the result because none of the three factors present in this case, individually or cumulatively, are significant enough to outweigh the degree of judicial economy and increased access to justice provided by the certification as a class action.

27 In the instant motion, four of the five factors in s. 6 are present. The plaintiff concedes in her factum that individual damages assessments will be required for some class members, that there are separate contracts, and that the precise numbers and identities of the class members are not presently known. In addition, the nature of the claims are such that different remedies will be sought for different class members.

28 In my view, none of these factors whether taken individually or together, are sufficient in the circumstances of this proceeding to support a conclusion that a class proceeding is not the preferable procedure. The personal injury and property damage claims are conceded by the plaintiff to be largely of a minor nature. There is a potential for hundreds of claims, each of which if dealt with separately would require a duplication of evidence to establish all of the background facts and circumstances. Thus, a class proceeding will undoubtedly promote judicial economies.

29 The defendant proposes that the preferable procedure is for the class members to proceed individually in the small claims court or through the simplified rules of procedure. In my view, this would result in a denial of access to the courts and in relation to the amount of any potential recovery, the costs of proceeding in this fashion would be significant. As O'Brien J. stated in *Abdool* "the goal is to permit advancement of small claims where the legal costs make it uneconomic to advance them." The individual issues in this matter require an assessment of damages for personal injury or property damage caused by the exposure to the smoke which, after the common issues are resolved, would be relatively straightforward.

30 The instant case, on its facts, is suited to be a class proceeding. The requirement that a class proceeding is the preferable procedure for resolution of the common issues is met.

***Representative Plaintiff***

31 A representative plaintiff need not be typical of the class or share every characteristic of every other member of the class. It is sufficient that he or she would fairly and adequately represent the interests of the class and be without interests in conflict on the common issues. In addition, the representative plaintiff must have set out a workable plan for the litigation.

*i) Lack of Conflict/Adequate Representation*

32 The representative plaintiff does not appear to have any interests which conflict with those of other class members on the common issues. There is no suggestion that she cannot fairly and adequately represent the class. These elements are satisfied.

*ii) Litigation Plan*

33 I am satisfied that the plaintiff and her counsel have submitted a workable litigation plan as it relates to the common issues. The plaintiff may submit an amended litigation plan dealing with individual issues within 30 days of the release of these reasons, hopefully with the consent of the parties as provided for in s. 25(1)(c), and failing that, the plaintiff may submit a plan for approval of this court.

*iii) Notice*

34 The issue of notice was not fully canvassed in argument. I advised counsel that I would hear submissions on the manner, form and content of the notice to the class if the disposition of the certification motion made this necessary. In light of these reasons, counsel may attend before me to make submissions on notice at a convenient time.

***Partial Summary Judgment***

35 The defendant admits liability for the cause of the fire. Partial summary judgment is granted accordingly to the plaintiff class. As stated by Osborne J.A. in *Ford Motor Co. of Canada v. Ontario Municipal Employees Retirement Board* (1997), 36 O.R. (3d) 384 (Ont. C.A.) at 396:

The purpose of rule 51.06 somewhat parallels Rule 20's purpose. If a party makes an admission (as occurred in the defendant's statement of defence in Roytor), rule 51.06 gives the beneficiary of the admission access to an order based on the admission. For example, if a defendant admits to liability, or a particular part of a loss claimed by the plaintiff, rule 51.06 would permit a motions judge to grant an order based on the admission. Such an order will typically take the form of a summary judgment for part of the plaintiff's claim.

36 The motions for certification and for partial summary judgment are granted, for the reasons stated, upon compliance by the plaintiff with the conditions set out herein relating to the litigation plan and notice and obtaining the requisite approval of this court.

*Motion granted.*

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — Section 5(1)(a) of CPA requires that pleadings disclose cause of action —

There was no reason that plaintiff could not plead both negligence and negligent representation, arising out of same factual circumstances, as long as claims were in fact distinct — Causes in action in negligence and negligent misrepresentation were properly pleaded against certain defendants — There were sufficient pleadings of fraud and fraudulent misrepresentation against certain defendants — It would be left to trial judge to determine, after all evidence was in, whether conspiracy and any of other causes of action had been made out and if so whether conspiracy claim added anything — While ordinary charitable donation would be highly unlikely to fall within Consumer Protection Act, 2002, gift program was far from ordinary — It would be wrong to resolve this issue at this stage — Taxpayer had pleaded tenable cause of action under Consumer Protection Act, 2002 against certain defendants — Whether benefit, if any, received by these defendants was sufficiently direct to give effect to successful claim for unjust enrichment was issue requiring proof at trial, but pleading itself was sufficient.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Developer developed software program and granted trust he established in Bermuda right to license software program to third parties — Software program was licensed by Bermuda trust to Bermuda company T Ltd. owned by developer — Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to Canadian taxpayers and created and settled private charitable trust to facilitate operation of gift program — Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — Class definition which included residents of Canada who participated in gift program in any of years of 2005 to 2009 was approved — Defendants did not dispute that there was identifiable class.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to Canadian taxpayers and created and settled private charitable trust to facilitate operation of gift program — Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — Breach of contract and rescission were certified as common issues against P Corp. — Negligence and conspiracy were certified as common issues against certain defendants — Fraud and fraudulent misrepresentation were certified as common issues against certain defendants — Unjust enrichment was certified as common issue against certain defendants — Consumer Protection Act, 2002 claims were certified as common issues against certain defendants — Negligent misrepresentation was certified as common issue against certain defendants — Vicarious liability of law firms was certified as common issue — Waiver of tort, aggregate assessment of waiver of tort damages, and punitive and exemplary damages were certified as common issues.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to Canadian taxpayers and created and settled private charitable trust to facilitate operation of gift program — Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — Class proceeding was found to be preferable procedure for resolution of common issues and claims of class members — Certification of proceedings would further purpose of CPA — There were really no alternative procedures that would be as effective as class proceeding in achieving goals of access to justice, judicial efficiency and behaviour modification — In light of its potential to promote access to justice and reduce or possibly eliminate need for individual trials, class action was found to be preferable procedure for resolution of common issues of Class.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Fair and adequate representation

Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to Canadian taxpayers and created and settled private charitable trust to facilitate operation of gift program — Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer withdrew notice of objection and paid CRA reassessment — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — It was found that taxpayer fairly and adequately represented Class — There was no dispute as to capacity of taxpayer to serve as representative plaintiff.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Litigation plan

Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to Canadian taxpayers and created and settled private charitable trust to facilitate operation of gift program — Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer withdrew notice of objection and paid CRA reassessment — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — It was found that taxpayer had produced appropriate plan for notifying Class and advancing proceeding — Having concluded that action was workable as class proceeding, issue of production, discovery, proof of damages and trial of individual issues, if required, could be addressed through case management as case proceeded to trial and by directions of common issues judge who would, by that time, have full appreciation of what remained to be determined.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Conflicts of interest

Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to Canadian taxpayers and created and settled private charitable trust to facilitate operation of gift program — Taxpayer participated in gift program — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer withdrew notice of objection and paid CRA reassessment — Taxpayer brought action against defendants on his own behalf and on behalf of national class of Canadian residents who participated in gift program — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motion for certification granted — Action was certified under s. 5(1) of CPA — It was found that taxpayer did not have interest in conflict with Class — Taxpayer's evidence that without promise of tax credit he would never have participated in gift program was not proof of lack of donative intent — Taxpayer's evidence was consistent with tax credit being one reason to make gift — All Class members who did not opt out would have same interest as taxpayer on common issues, regardless of their position on their individual tax appeals and whatever may be merits of those appeals.

Civil practice and procedure --- Summary judgment — Requirement to show no triable issue

Developer incorporated P Corp. for purposes of promoting leveraged charitable donation programs to taxpayers and created and settled private charitable trust to facilitate operation of gift program — Senior tax lawyer issued opinion letters and comfort letters in 2005, 2006 and 2007 concerning gift program — Senior tax lawyer's name, photograph and biography were included in gift program materials — Every donor was required to sign certain standard form documents, including donor declaration and tax risk disclosure statement — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer and taxpayer had to repay deductions with interest — Taxpayer brought action against defendants — Taxpayer brought motion for certification as class proceedings — Motions for summary judgment were brought by P Corp. and by lawyers — Motions for summary judgment dismissed — Potential finding of fraud was so serious that fairness to parties required trial — It was in interests of justice that weighing of evidence, evaluation of credibility of witnesses and drawing of inferences from evidence should only be exercised by trial judge — Taxpayer discharged burden of showing that his claims had real chance of success and that there was genuine issue requiring trial — Senior tax lawyer and law firms also knew, or ought to have known, that gift program could not be launched without favourable tax opinion by leading Canadian tax expert and that

existence of such opinion would be touted by promoters — Evidence raised genuine issue, requiring trial, concerning existence of duty of care owed by lawyers to taxpayer — There was substantial evidence in support of existence of special relationship between senior tax lawyer and taxpayer so as to give rise to duty of care.

**Tax --- Income tax — Tax credits — Charitable donations — Whether genuine gift**

In gift program donor would write \$2,500 cheque or make pledge to "participating charity" — Simultaneously, donor applied to become beneficiary of charitable trust — Donor executed escrow agreement appointing P Corp. to hold trust units and donate them to designated charity on donor's behalf — On receipt of application, charitable trust made investment in sub-trust and was issued two units — P Corp. was issued two sub-trust units by charitable trust and donor was issued confirmation of issuance of "discretionary" interest in two sub-trust units having ostensible value of \$7,500 — Sub-trust units were then donated by donor to charity — Charity redeemed sub-trust units and Bermuda trust indirectly acquired sub-trust units through charitable trust — Donor would receive two charitable donation receipts — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer, taking position that donations were not gift because they were made in expectation of material advantage, and taxpayer had to repay deductions with interest — In absence of "donative intent" taxpayer was not entitled to claim charitable deduction — Taxpayer brought action against defendants — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motions for summary judgment were brought by P Corp. and by lawyers — Motion for certification granted; motions for summary judgment dismissed — Action was certified under s. 5(1) of CPA — Taxpayer discharged burden of showing that his claims had real chance of success and that there was genuine issue requiring trial — Evidence raised genuine issue, requiring trial, concerning existence of duty of care owed by lawyers to taxpayer — There was substantial evidence in support of existence of special relationship between senior tax lawyer and taxpayer so as to give rise to duty of care.

**Tax --- Income tax — Tax credits — Charitable donations — Miscellaneous**

In gift program donor would write \$2,500 cheque or make pledge to "participating charity" — Simultaneously, donor applied to become beneficiary of charitable trust — Donor executed escrow agreement appointing P Corp. to hold trust units and donate them to designated charity on donor's behalf — On receipt of application, charitable trust made investment in sub-trust and was issued two units — P Corp. was issued two sub-trust units by charitable trust and donor was issued confirmation of issuance of "discretionary" interest in two sub-trust units having ostensible value of \$7,500 — Sub-trust units were then donated by donor to charity — Charity redeemed sub-trust units and Bermuda trust indirectly acquired sub-trust units through charitable trust — Donor would receive two charitable donation receipts — Taxpayer claimed deductions for charitable gifts to gift program in 2005 and 2006 — CRA reassessed taxpayer, taking position that donations were not gift because they were made in expectation of material advantage, and taxpayer had to repay deductions with interest — In absence of "donative intent" taxpayer was not entitled to claim charitable deduction — Taxpayer brought action against defendants — Taxpayer brought motion for certification as class proceedings under Class Proceedings Act, 1992 (CPA) — Motions for summary judgment were brought by P Corp. and by lawyers — Motion for certification granted; motions for summary judgment dismissed — Action was certified under s. 5(1) of CPA — Taxpayer discharged burden of showing that his claims had real chance of success and that there was genuine issue requiring trial — Evidence raised genuine issue, requiring trial, concerning existence of duty of care owed by lawyers to taxpayer — There was substantial evidence in support of existence of special relationship between senior tax lawyer and taxpayer so as to give rise to duty of care.

**Words and phrases considered**

**Fraud**

Fraud is the deprivation of another's property by dishonest means. While many of the classic definitions of fraud have a component of false representation . . . , other cases have held that these definitions are not exhaustive and fraud can simply mean the dishonest deprivation of someone else's property . . .

Fraud, in its widest sense, may include a component of deceit or misrepresentation, but it need not necessarily do so.

In this case, the pleading of fraud refers not only to the alleged fraudulent misrepresentation (which was in essence, "you will receive a valid charitable receipt much greater than your cash contribution"), but also to the allegation that the defendants constructed and participated in a dishonest scheme to siphon the plaintiff's charitable donations out of the charities and into their own pockets. The allegations in the statement of claim, read generously, are broad enough to include fraud by deceit and fraud by other dishonest acts.

#### **consumer**

A "consumer" is defined as "an individual acting for personal, family or household purposes and does not include a person who is acting for business purposes" and a "consumer transaction", means "any act or instance of conducting business or other dealings with a consumer, including a consumer agreement" (s. 1 [of the Consumer Protection Act, 2002, S.O. 2002, c. 30, Sched. A]).

. . . while the ordinary dictionary definitions of "consumer" or "consumer transaction" are more limited, the statute contains its own definitions which expand the ordinary meaning of these terms. [The plaintiff] is arguably a "consumer" within the meaning of the statute because he was "acting for personal . . . purposes" and the defendants were arguably engaged in a "consumer transaction", because they were "conducting business" or had "other dealings" with [the plaintiff].

MOTION by taxpayer for certification of action as class proceeding; MOTIONS by defendants P Corp. and lawyers for summary judgment.

#### **G.R. Strathy J.:**

#### **I. Introduction**

1 When Michael Cannon heard about the Donations for Canada Gift Program - an opportunity to obtain a \$10,000 charitable tax credit in return for a \$2,500 donation - he thought it was "too good to be true".

2 It was.

3 A few years later, his tax returns were reassessed by Canada Revenue Agency ("C.R.A.") and he had to repay his deductions, with interest. The only thing he received for his "donation" was a tax bill.

4 In the eyes of C.R.A., the Donations for Canada Gift Program (the "Gift Program") was nothing more than a scheme, in which the funds of "donors" like Cannon flowed through a giant circle and into the pockets of the promoters. In return for participating in the Gift Program, the charities got 1% of the total money donated and the promoters' promise of a 20-year income stream from an investment that the promoters would make, using a fraction of the Gift Program donations.

5 C.R.A. said that donors like Cannon lacked "donative intent" - there was no element of impoverishment in the so-called charitable donation, because the donor expected to be enriched by receiving a tax credit well in excess of his or her donation. The "donation" could not be characterized as a gift. Therefore, there was no allowable tax deduction and the full amount deducted had to be repaid - with interest.

6 Cannon brings a motion for certification of this action as a class proceeding under the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 (the "C.P.A.") and seeks to represent a class composed of almost 10,000 Canadian taxpayers who contributed to the Gift Program.

7 Motions for summary judgment are brought by two groups of defendants, ParkLane Financial Group Limited ("ParkLane") and Edwin C. Harris Q.C. ("Harris") and law firms with which Harris has been associated.

8 For the reasons that follow, I certify this action as a class proceeding, on the terms set out below, and I dismiss the motions for summary judgment.

## II. The Facts

### 1. Cannon and the Proposed Class

9 Cannon is an Ontario resident who participated in the Gift Program by contributing \$10,600 in 2005 and \$12,500 in 2006. In 2008 and 2009, his tax returns were reassessed by C.R.A. The charitable tax credits he had claimed for his donations to the Gift Program were disallowed. He has since paid the reassessed taxes and \$6,703.76 in interest.

10 Cannon had a 33 year career as a police officer, having risen to the rank of Staff Sergeant. He is a reasonably sophisticated investor, with some experience in tax planning strategies. He understands their risks and rewards. He participated in the Gift Program after receiving advice from his "professional counsel and tax advisor", in whom he placed trust and confidence.

11 Cannon brings this action on his own behalf and on behalf of a national class of Canadian residents who participated in the Gift Program (the "Class"). The Class is described as follows:

Any person who participated in the ParkLane Donations for Canada Charitable Gift Program while resident in Canada during the period between January 1, 2005 and December 31, 2009 [The "class period"], excluding Edward Furtak, Wayne Robertson, the Defendants, their subsidiaries, affiliates, officers, directors, senior employees, legal representatives, heirs, predecessors, successors and assigns, and any member of the families of the Individual Defendants, Wayne Robertson and Edward Furtak, and any entity in which any of the foregoing persons or entities has a legal or *de facto* controlling interest.

12 Cannon asserts that he is representative of the Class and that his experience can be extrapolated to all members of the Class. The defendants dispute this.

13 The Class consists of approximately 9,926 persons. There are Class members in every province and territory, except the Northwest Territories, with more than one-third located in Ontario. The out-of-pocket payments of Class members to the Gift Program total approximately \$144 million.

### 2. The Gift Program

14 In the following sections, I will describe the structure of the Gift Program, including the players involved and their functions. To put what follows in context, I will give a short and somewhat simplistic overview.

15 The Gift Program was the brainchild of Edward Furtak ("Furtak"), a developer of software and a sometime promoter of tax avoidance schemes, who is the President and CEO of the Trafalgar Group of Companies. Furtak had developed a computer program called the Trafalgar Global Index Futures Program (the "Software Program" or "Global Index Futures Program"), which purportedly had a methodology for making money from the trading of S & P futures contracts by predicting short-term movements in the financial markets. Furtak established a trust in Bermuda, called the "Bermuda Longtail Trust" (the "Bermuda Trust"), for the benefit of himself and his family and he granted the Bermuda Trust the right to license the Software Program to third parties. The Software Program was in turn licensed by the Bermuda Trust to a Bermuda company owned by Furtak called Trafalgar Trading Limited ("TTL").

16 Most of the cash donated to charities by participants in the Gift Program found its way into the pockets of Furtak's companies and the Bermuda Trust. The donations made by participants were super-sized by the very temporary injection of funds from the Bermuda Trust, which flowed briefly into the charities. Most of these funds were immediately returned to the Bermuda Trust, by way of the licensing agreement between the charities and TTL for the use of the Software Program. The

super-sizing made the taxpayer's donation appear to be much larger than it was in fact, thus justifying the enhanced charitable tax credit each taxpayer was to receive.

17 To make the Gift Program work, it was necessary to have six ingredients.

18 First, there had to be taxpayers, like Cannon, who were willing to buy into the concept that they could maximize their tax deductions not just by giving money to charity, but by getting a receipt for more than they had actually given - that is, by making a profit from their charitable donations. There were almost 10,000 Canadians who were convinced to do this. They came from all walks of life, teachers, lawyers, nurses, administrators, presidents and police officers. Some donated in multiple years. The minimum donation was \$10,000, but one enthusiastic donor made total donations of \$4,000,000. Over 1,700 Donors donated between \$50,000.00 and \$100,000.00 each, and over 700 Donors donated over \$100,000.00 each.

19 Second, there had to be legitimate charities or Registered Canadian Amateur Athletic Associations that were in need of cash and were prepared to give back 99% of the money donated to them to Furtak's companies in return for the promise of a future income stream from the use of the Software Program.

20 Third, there had to be an infrastructure of companies, trusts and agreements that would process the flow of funds. This infrastructure was designed by behind-the-scenes lawyers and accountants and populated by companies that were led by ParkLane and largely controlled by Furtak.

21 Fourth, there had to be a legal opinion, attesting to the fact that the Gift Program could likely sustain a challenge by C.R.A. Otherwise, no sensible donor would contribute to the program. Harris provided this opinion.

22 Fifth, there had to be a sales force to market the Gift Program to potential donors. This was done by a network of fundraisers, also called distributors (the "Distributors"), who were enlisted by ParkLane.

23 Sixth, there had to be cash, to inflate the donors' contributions, in order to convince C.R.A. that real money was being donated to the charities in return for the charitable receipts they were giving to the donors. This money was provided by Furtak through the Bermuda Trust.

24 As described in the marketing materials prepared by ParkLane, the Gift Program worked in the following way. I will take the case of a typical \$10,000 total donation. There were seven steps, which are identified in the diagram set out below.

25 The first step was that a donor would write a \$2,500 cheque or make a pledge to a "participating charity" - that is, a charity that had enrolled in the program and had entered into an agreement to use most of the funds donated to it to acquire a right to use the Software Program. Funds for Canada Foundation ("FFC Foundation"), was established in the second year of the Gift Program as an umbrella organization to receive donations and to disburse them to other qualified charities.

26 In the second step, which occurred simultaneously with the first, the donor applied to become a beneficiary of the Donations Canada Financial Trust (the "Donations Canada Trust"), a private charitable trust created by Furtak. The donor executed an escrow agreement appointing ParkLane to hold the trust units and to donate them to the designated charity on the donor's behalf.

27 On receipt of the donor's application, the third step occurred. The Donations Canada Trust made an "investment" in a sub-trust and was issued two units in the sub-trust.

28 The fourth step occurred when ParkLane, as escrow agent on behalf of the donor, was issued two sub-trust units by the Donations Canada Trust. The donor was issued a confirmation of issuance of the "discretionary" interest in two sub-trust units, having an ostensible value of \$7,500, in return for his or her cheque or pledge.

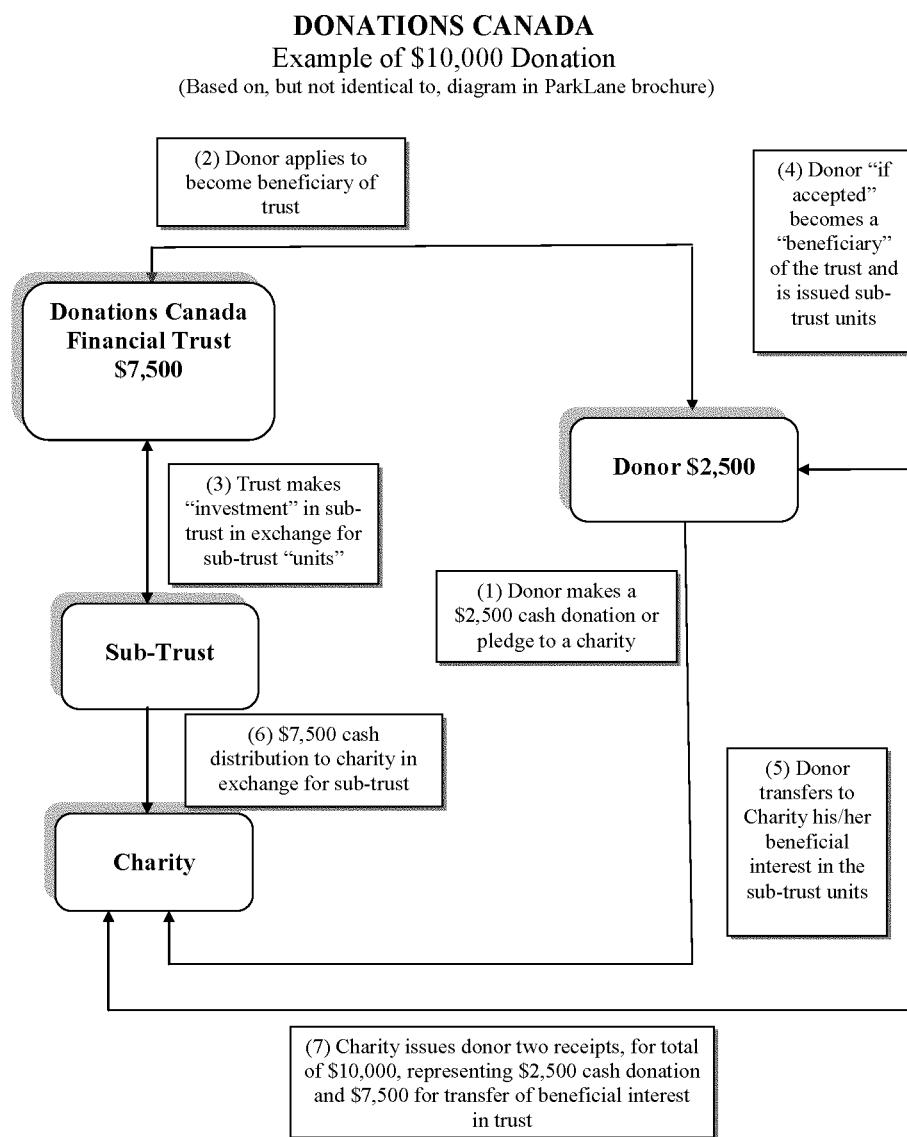

29 The fifth step was the donation of the sub-trust units by the donor to the charity. The charity was then sitting with \$2,500 in cash and a piece of paper representing the two sub-trust units donated by the donor, with an ostensible value of \$7,500.

30 Under the terms of its agreement with the Gift Program, the charity was required to "redeem" the sub-trust units. To provide the funds to make the redemption, the Bermuda Trust primed the pump by indirectly acquiring the sub-trust units, through Donations Canada Trust, for \$7,500. That was the sixth step. The charity was now sitting with a total of \$10,000 in cash.

31 At this point, the seventh step occurred: in return for his or her total donations, the donor would receive two charitable donation receipts, a cash receipt for \$2,500 and a donation-in-kind receipt for \$7,500, the stated value of the sub-trust units. At this stage, the donor's involvement ended and he or she would submit the charitable receipts along with his or her tax return.

32 In point of fact, as I will describe below, the \$10,000 did not remain with the charity for more than a *scintilla juris* - a "spark of right". At the "closing" of the donor's contribution, which was invariably done at the same time as a number of other transactions, most of the funds flowed in and out of the charity's bank account in rapid succession.

33 The following chart describes the "front half" of the Gift Program, as it was depicted in ParkLane's marketing materials. The chart is taken from those materials, with some minor modifications.

Graphic 1

34 I will now describe the "back half" of the Gift Program - that is, what happened to the money after it was donated to the charity. This part of the Gift Program was not described in the marketing materials; however, ParkLane and some of the Distributors have adduced evidence that the Distributors were informed about various aspects of the back half, including the involvement of the Bermuda Trust, the software licensing agreement between the Bermuda Trust and TTL, and the royalty agreement the charity was required to enter into with TTL. A chart illustrating the "back half" of the Gift Program is contained at the end of this description.

35 In order to participate in the Gift Program, a charity was required to enter into a royalty agreement with TTL. In consideration for this agreement, the charity paid TTL 99% of the total donations it received. The charity was entitled to keep 1% of each donation (i.e., \$100 for each \$10,000 donation) for its own operating expenses. In cases where FFC Foundation received donations, it kept 25% of the 1% and paid the balance to either the charity to which the funds were directed or to one of its own approved charities.

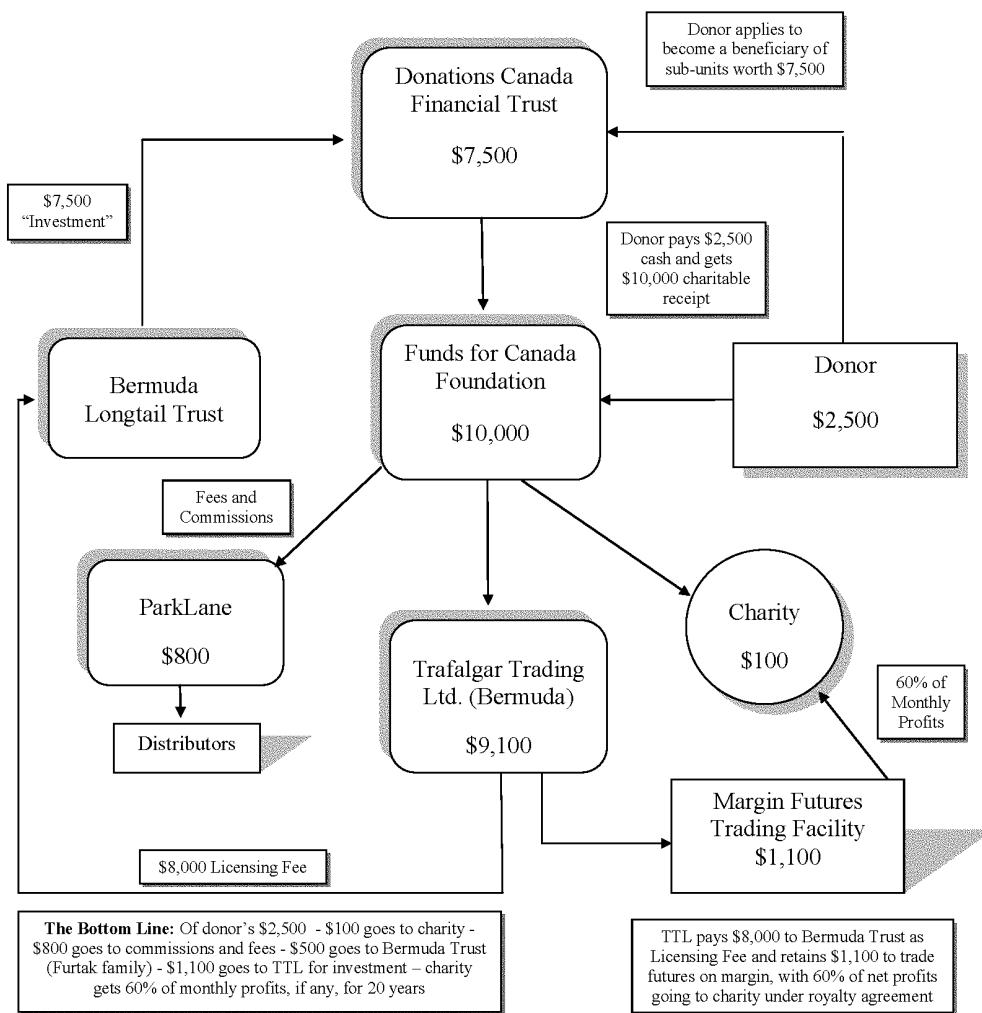

36 As I mentioned earlier, Furtak's Software Program was licensed to TTL by the Bermuda Trust. The funds paid by the charity to TTL were to be invested by TTL on behalf of the charity, using the Software Program. TTL established a leveraged cash and margin trading facility on behalf of the charity, using the charity's cash, ostensibly leveraged up to the amount paid by the charity for the royalty agreement. The charity was to receive a speculative and unguaranteed future income stream from the Software Program, based on 60% of the monthly profits generated by its investment, for a period of twenty years. TTL was to receive 20% of the monthly profits and the remaining 20% was to be re-invested in the trading facility. The charity was never to receive a return of its principal.

37 After it had received the licensing fee from the charity, i.e., the payment of 99% of the donations the charity had received, TTL:

- (a) paid \$600 or \$800 (the amount varied in different program years) to ParkLane to cover ParkLane's profit and the Distributors' commissions of about 18-20% of the donor's cash contribution;
- (b) paid approximately \$8,000 to the Bermuda Trust as a "software licensing fee" for the use of the Software Program - the effect of this was that the advance of \$7,500 was immediately repaid to Furtak and his family, through the Bermuda Trust, with an overnight profit of \$500. This profit was ostensibly for giving TTL the privilege of using the Software Program on behalf of the charity;
- (c) retained approximately \$1,100 in its own account to trade futures on margin, notionally leveraged up to as much as \$9,100, using the Software Program, for the benefit of the charity to whom the donor made his or her contribution.

38 The following schematic describes the "back half" of the Gift Program.

The “Back Half” of the Gift Program

Graphic 2

39 There are, unfortunately, some messy questions that remain. It is not necessary for me to answer these questions, for the purpose of either the certification motion or the summary judgment motion. I will mention them only because I have concluded that a trial is required in order to answer them and the numerous other questions that must be answered in order to determine the liability of the defendants.

40 First, there is no conclusive evidence that the sub-trust units donated by the donor had any significant intrinsic value and certainly no evidence that they had the value of \$7,500 that was assigned to them. Second, there is no evidence that the right to the future income stream represented by the royalty agreement was commensurate with the consideration paid by the charity. Third, while there is some evidence that a few charities have obtained some returns for their "investments", the evidence does not show whether the "software licensing fee" paid by the charity to TTL represented the fair market value of the future investment stream. This is particularly troubling considering that the charity did not retain its capital. There is evidence that the returns generated by TTL for the charities have been meager.

41 Some of the people and entities that populated this structure have already been introduced. I will describe them in more detail.

### ***3. The Defendants***

#### ***(a) Edward Furtak***

42 Furtak was the puppet master of this complex machinery. He was the President and CEO of the Trafalgar Group of Companies, which included ParkLane, TTL and Trafalgar Associates Limited ("TAL") (together, the "ParkLane Defendants"). He was also the settlor of the Bermuda Trust.

43 Furtak was originally a defendant in this action, but the plaintiff has settled with him in exchange for information and some degree of cooperation.

44 The evidence is open to the conclusion that the primary purpose of the Gift Program was to benefit Furtak and his family, through both:

- Furtak's control of the Bermuda Trust, of which the defendant Appleby Services Bermuda Ltd. ("Appleby") is ostensibly the trustee, but which appears to have been manipulated by Furtak and his colleagues to serve the ends of the Gift Program; and
- the ParkLane Defendants, which were the public face of the Gift Program and which facilitated the flow of funds.

#### ***(b) ParkLane***

45 ParkLane is an Ontario corporation incorporated by Furtak for the purposes of promoting leveraged charitable donation programs, including the Gift Program, to Canadian taxpayers. Between 2003 and 2006, ParkLane had promoted a tax shelter called the "Donation Program in Support of Canadian Amateur Athletics". Beginning in 2005, and continuing until 2009, under the direction of Furtak, ParkLane created, promoted and operated the Gift Program and sold it to the Class through its network of Distributors, which I will describe below.

#### ***(c) TAL and TTL***

46 TAL is an Ontario corporation, also incorporated by Furtak. It worked in conjunction with ParkLane to create, promote and operate the Gift Program.

47 TTL is a Bermudan corporation established by Furtak. It participated in the creation and operation of the Gift Program and played a key role in the transfer of funds to the various participants in the program. Its role will be described in more detail below.

48 The plaintiff alleges that the ParkLane Defendants are closely affiliated. They share common offices, computer systems, employees, officers, directors, shareholders, legal and beneficial owners, and professional advisors.

#### ***(d) Donations Canada Trust***

49 The Donations Canada Trust was a private charitable trust, created and settled by Furtak to facilitate the operation of the Gift Program. The plaintiff asserts that the purpose of the Donations Canada Trust was to be the false front of the Gift Program. It posed as a "charitable Canadian trust" and the ostensible source of the "matching" payments in the Gift Program. The plaintiff argues that, in reality, it was a shell through which funds flowed from the Bermuda Trust.

#### ***(e) Funds for Canada Foundation***

50 FFC Foundation was a registered charity, created in 2005 as a vehicle for disbursing donations to qualified charities. It facilitated the operation of the Gift Program in two ways. In the "front half" of the Gift Program, it received donations directly from donors and issued tax receipts to them. In the "back half" of the Gift Program, it served as a link between the participating charity and TTL. It gave the participating charity 75% of 1% of the initial donation, entered into a royalty agreement with TTL

for the investment of a portion of the funds donated by the donor, received royalty payments from TTL, and distributed a portion of those royalties to the participating charity, less its own administration fee.

51 FFC Foundation was established by the defendant Matt Gleeson, also known as Martin P. Gleeson ("Gleeson"), who provided consulting services to charities through his company, Gleeson Management Associates Inc. ("GMA"). Donations were received by FFC Foundation under the Gift Program from 2006 to July 2009, when its status as a registered charity was revoked by C.R.A. During that period, FFC Foundation disbursed funds it received to the participating charities, as required by the Gift Program.

52 FFC Foundation informed participating charities that it had entered into the royalty agreement with TTL, which provided for a stream of royalty payments based on the profits from the licensing of the Software Program.

53 There is evidence that the total returns through the Gift Program to the charities have been in the range of \$6 million since 2006. Considering that the aggregate donations by Canadian taxpayers to the Gift Program were in excess of \$140 million, this rate of return is less than 1% per annum on the contributors' donations and is an infinitesimal return on the total supersized donation that taxpayers were allegedly making to support the inflated charitable donation receipts that they received. In assessing these returns, it must be kept in mind that the charities have no right to receive the principal at the expiry of the 20 year royalty agreements with TTL.

*(f) Directors of FFC Foundation*

54 The defendants Sam Albanese, David Raby, Ken Ford, Riyad Mohammed and Greg Wade were the directors of FFC Foundation during the Class period (the "FFC Directors").

*(g) The Gleesons*

55 Gleeson was the founding director of FFC Foundation and the original trustee of the Donations Canada Trust. He held the position of trustee of the Donations Canada Trust until 2006, when he was replaced by Sarah Stanbridge. Through GMA, he also acted as "Director of Development" for FFC Foundation. In that capacity, he recruited charities to participate in the Gift Program through the FFC Foundation and was actively involved in the operations of FFC Foundation.

56 Gleeson's wife, Mary-Lou Gleeson ("Ms. Gleeson") was and continues to be the Executive Director of FFC Foundation. Ms. Gleeson is also a shareholder of GMA and ran that company with her husband.

57 GMA provides fundraising consulting services to charities and foundations. In 2005, GMA introduced a number of its pre-existing charity clients to the Gift Program. Six of these charities became beneficiaries of FFC Foundation through which they received charitable donations raised by the Gift Program.

58 Gleeson is sued both in his personal capacity and, together with Sarah Stanbridge, in his capacity as trustee of the Donations Canada Trust. The action has been dismissed against Stanbridge as a result of a settlement.

59 I will refer to Gleeson, Ms. Gleeson and GMA as the "Gleesons".

*(h) The Lawyers*

60 Harris is a senior tax lawyer. In each of 2005, 2006 and 2007, Harris issued an opinion letter to ParkLane concerning the Gift Program (each of which will be referred to as the "Opinion Letter").

61 The 2005 Opinion Letter was based on a statement of facts prepared by ParkLane's in-house lawyer. Although the 2005 Opinion Letter did not expressly say so, the clear implication was that a donor to the Gift Program would be entitled to receive tax credits both for his or her cash donation and for the donation in kind of sub-trust units. This implication was made express in the 2006 and 2007 Opinion Letters, although it was expressed to be "[S]ubject to the remaining uncertainties regarding the application of the GAAR [General Anti-Avoidance Rule] ..." .

62 Harris's evidence is that he issued the Opinion Letter on the understanding that it was not to be shown to donors but could be used by their professional advisors for the purpose of advising their clients and that all donors would be required to sign documents acknowledging that they had received independent advice and were prepared to assume the risk of reassessment.

63 In addition to providing an Opinion Letter, Harris provided what I will describe as a "Comfort Letter" in each of 2005, 2006 and 2007. The Comfort Letter, which I will refer to in more detail below, was included in the Gift Program materials given to potential donors and confirmed that Harris had provided ParkLane with an opinion concerning the Gift Program. Harris understood that the Comfort Letter would be used by ParkLane to inform prospective donors that he had issued the Opinion Letter for the benefit of ParkLane.

64 Harris's name, photograph and biography were included in the Gift Program materials, along with the Comfort Letter. The fact that he had given ParkLane a tax opinion was highlighted several times in the Gift Program materials, along with an invitation to donors to have their professional advisors review his opinion.

65 Patterson Kitz (Halifax), Patterson Kitz (Truro), Patterson Palmer, also known as Patterson Palmer Law, and McInnes Cooper (together, the "Law Firms" and, together with Harris, the "Lawyers") are partnerships carrying on the practice of law in Eastern Canada. Patterson Kitz (Truro) and Patterson Kitz (Halifax) carried on business in partnership under the name Patterson Palmer Law until December 2005. Harris was counsel at Patterson Palmer in 2005. Since January 1, 2006, he has been counsel at McInnes Cooper.

66 I will describe in more detail below the involvement of Harris in the Gift Program.

*(i) Appleby and the Bermuda Trust*

67 Appleby is an independent corporate trustee, based in Bermuda. Furtak created the Bermuda Trust in 1998, naming a predecessor of Appleby as trustee. The trustee was given wide-ranging powers to manage the assets of the trust, but was not required to interfere in the management or conduct of any company owned by the trust. Included in the trust assets managed by Appleby were two computer software programs developed by Furtak, the most recent being the Software Program. In its capacity as trustee, Appleby licensed the use of the Software Program to third parties.

68 Appleby granted TTL a limited, non-exclusive licence to use the Software Program, in return for license fees that were to be paid to the Bermuda Trust. The "software licensing fee" of about \$8,000, paid by TTL to Appleby out of the funds remitted from each \$10,000 "donation", was ostensibly for the privilege of using the Software Program to trade on behalf of the charity.

69 Appleby professes to have little knowledge of the Gift Program. It does acknowledge, however, that from time to time it was requested, by or on behalf of Furtak, to transfer sums of money from the Bermuda Trust to the Donations Canada Trust. Appleby claims that it has no knowledge of the reasons for those transfers. It also acknowledges that TTL paid licence fees to Appleby, to the account of the Bermuda Trust, during the life of the Gift Program.

70 I will now describe some of the other participants in the Gift Program, namely the Distributors, the Donors and the Charities.

**4. The Distributors**

71 As noted earlier, ParkLane did not market the Gift Program directly to the public. Instead, it relied on a network of 455 Distributors, who were financial planners and the like, who marketed the Gift Program to their clients. The defendants attach considerable importance to the Distributors, whom they call "Independent Financial Advisors", as sources of independent advice to the donors regarding the Gift Program and its associated risks.

72 ParkLane recruited the Distributors. It conducted training sessions for the Distributors and provided them with written materials, explaining the structure of the Gift Program. ParkLane told the Distributors how the Gift Program worked and that \$7,500 of the total donation was provided by the Bermuda Trust. It showed the Distributors copies of Harris's Opinion Letter.

73 All Distributors were required to enter into a "Charity Fundraising Agreement" with ParkLane. The recital to this agreement referred to the desire of ParkLane to engage the Distributor to raise donations for and to refer clients to the Gift Program. The agreement provided, in part, that the Distributor was strictly limited to supplying donors with written materials about the Gift Program that had been approved in advance by ParkLane:

4.4 The Distributor shall not, without the consent of ParkLane, make any representations, tax or otherwise, in the course of marketing the Donation Program and he or it will not distribute any written material with respect to the marketing of the Donation Program which representations and material have not been provided or approved in advance by ParkLane.

4.5 Neither the Distributor or any other person is authorized to give any information or to make any representations, tax or otherwise, in connection with the Donation Program other than as contained in the Donation Program Materials, as approved by ParkLane, or in any amendments or supplements thereto, or in any other marketing materials provided by ParkLane ... to the Distributor.

4.6 The Distributor shall, in furtherance of his or its obligations hereunder, and at his or its own cost and expense:

(a) take all diligent and reasonable steps to ensure that every potential or actual donor is fully informed as to the structure and mechanics of, and any and all amounts and fees payable or to be contributed pursuant to, the Donation Program and has been advised by a professional advisor of the nature of any and all potential tax and business/commercial risks associated with entering into the Donation Program and to take reasonable efforts to ensure that each such participant is a suitable candidate for the Donation Program and that funds contributed to the Donation Program by each such participant is from a legitimate source ...

74 ParkLane has filed affidavit evidence from three Distributors, Ted Gacich ("Gacich"), William MacKay ("MacKay") and Lorne Allen ("Allen"). As well as advising their clients to participate in the Gift Program, each of these three Distributors participated for several years as a donor.

75 Gacich was Cannon's financial advisor. He holds designations as a Financial Planner, Chartered Life Underwriter and Chartered Financial Consultant and has been in the financial services business for 19 years, specializing in tax planning. He marketed the Gift Program in 2005, 2006 and 2007 to approximately 80 clients and participated himself as a donor in two of those years. In 2005, he was a sub-distributor of another Distributor, Life Planning Insurance Agency Limited ("LPL"). Thereafter, he was a Distributor in his own right, through his company.

76 The Fundraising Agreement between ParkLane and Gacich for 2006 begins with the following recital:

WHEREAS ParkLane and LPL wish to engage the Distributor to raise donations to and to refer clients to the ParkLane Donations for Canada Program ...

AND WHEREAS the Distributor wishes to refer clients to the Donation Program for the fundraising fees enumerated herein ...

77 The Agreement goes on to provide that:

- ParkLane and LPL grant Gacich, the Distributor, a non-exclusive right to raise donations for and to refer clients to the Gift Program;
- Gacich accepts the appointment and undertakes to use best efforts to raise donations and refer clients;
- the Distributor is entitled to remuneration for raising donations and securing and closing transactions;
- the information that the Distributor was entitled to provide to his or her clients concerning the Gift Program was strictly controlled, as set out in clauses 4.4, 4.5 and 4.6 above;

- there is also an acknowledgment that the Distributor has no authority to act on behalf of ParkLane in connection with the Gift Program and a statement that there is no partnership, agency or employment relationship between them.

78 Gacich deposed that prior to recommending the Gift Program to his clients, he did due diligence to satisfy himself that it was a valid and viable program. He deposed that he always carefully reviewed the Donor Declaration and the Tax Risk Disclosure Statements (described below) with his clients to ensure that they understood the obligations and risks involved in participating in the Gift Program. He said that he reviewed the Donor Declaration with Mr. Cannon in 2005 and 2006 and he reviewed the new Tax Risk Disclosure Statement with him in 2006.

79 Gacich stated:

I recall reviewing each of the matters addressed in the Donor Declaration with Cannon in 2005 and 2006 before he decided to participate in the Gift Program in each of those years. Based on my discussions with him and the questions he asked of me on the various different occasions that I met with him I was of the view at the time, and I continue to be of the view that he is a reasonably knowledgeable investor who understood the nature of the Gift Program and how it worked and the risks involved in the Program, including the risk that he might be re-assessed and be required to pay penalties and interest as a result.

80 Gacich stated that the Tax Risk Disclosure Statement, which Cannon signed in 2006, reflects an acknowledgement of the risks that Gacich had discussed with Cannon. He denied that he "promised" Cannon that he would receive a tax credit and says that, on the contrary, he fully reviewed the risks with Cannon. Gacich swore that Cannon was also aware that by signing the Donor Declaration, he was unconditionally releasing ParkLane.

81 Gacich swore that he discussed these matters with all his clients and that, in some cases, clients decided not to participate because they were risk adverse. His clients' donations varied: one was \$1 million in total and others ranged as high as \$100,000 to \$280,000.

82 Gacich swore that he received a commission of 18-20% of each client's cash donation. He had 80 clients who participated in the Gift Program. He likely made tens of thousands, if not hundreds of thousands of dollars in commissions through the sale of the Gift Program to his clients.

83 Gacich testified that he was aware of the "back half" of the Gift Program - that is, the part that was not described in the glossy marketing brochures that were given to donors. He knew that:

- the charities did not retain more than \$100 of the total donation;
- the charities paid the balance in exchange for an unguaranteed and unsecured future income stream from the use of the Software Program;
- the Bermuda Trust financed the sub-trust units by paying \$7,500 to Donations Canada Trust, which was immediately returned to the Bermuda Trust with an additional \$500, ostensibly for the charity's use of its Software Program; and
- most of the donations circulated back to the promoters.

84 Gacich was not aware, at the time at least, that the Bermuda Trust was established by Furtak for the benefit of himself and his family. Nor did he tell his clients - unless they asked - where the money was coming from to finance the acquisition of the sub-trust units.

85 Gacich did not recall having told Cannon that the money he was putting into the Gift Program would be used by the charity to purchase the royalty agreement. He acknowledged that, under the terms of the distributorship agreement, this was not information he would likely have provided to Cannon. He also acknowledged that he did not inform Cannon of the role played by TTL and the Bermuda Trust in the structure of the Gift Program.

86 Allen was the President of LPL, the company that originally engaged Gacich as a sub-distributor. Allen recruited approximately 100 sub-distributors and entered into agreements with them to market the Gift Program. Most of these people were professional financial, tax or legal advisors, including accountants, life insurance agents, licensed financial planners and occasionally lawyers or mortgage brokers. He also did some individual marketing to his own clients. Like Gacich, Allen says that he was careful to review the Donor Declaration, the Tax Risk Disclosure Statement and the release of ParkLane with his clients.

87 MacKay is a financial planner and provided financial services and tax planning advice to his clients. He marketed and promoted the Gift Program; approximately 200 of his clients participated in the Gift Program. He personally participated in the Gift Program from 2005 to 2008. His evidence concerning his dealings with his clients is substantially the same as the evidence of Gacich and Allen.

88 ParkLane, TAL and TTL have issued a third party claim against all the Distributors. They say that if Cannon's action is certified, they will proceed with their claims against the Distributors for any donors who do not opt out of the action, in order to ensure that all liability issues are determined in the same proceeding.

89 As I mentioned earlier, the defendants make much of the role of the Distributors, whom they call the "Independent Financial Advisors", an expression that appears to be an artful creation of counsel, rather than a term that was actually used by the promoters of the Gift Program. This label glosses over the fact that the Distributors were retained and paid by ParkLane under a "Fundraising Agreement" and that their role was to "raise funds" for the Gift Program. The Distributors were limited in the information concerning the Gift Program that they were permitted to provide to donors. They made substantial commissions if their clients donated to the Gift Program. There are certainly arguments to be made that the Distributors were a cog in the machinery of the Gift Program and that they were recruited because they had a stable of well-heeled clients who would be interested in contributing to the Gift Program as a way of reducing their taxes. It could open to a trial judge to find that, in spite of the language in the "Fundraising Agreement", the Distributors were agents of ParkLane for the purpose of raising funds.

### **5. The Donors**

90 ParkLane has adduced evidence from six Donors who participated in the Gift Program between 2005 and 2008. These include: Mr. Russ Mergelas, Mr. Ralph Narum, Mr. Robert MacKay, Mr. Lorne Allen, Mr. William MacKay and Mr. Gacich.

91 Each of these could be described as a reasonably knowledgeable investor, who participated in the Gift Program after being advised by his personal financial advisor and who understood how the program worked and the risks involved, including the risks of a re-assessment by C.R.A., penalties and interest. Each reviewed the Donor Declaration and Tax Risk Disclosure Statement with his advisor before participating in the program and understood the nature and scope of the release that he signed in favour of ParkLane. Like Cannon, these donors have had their tax returns reassessed by C.R.A. but, unlike him, they have not accepted C.R.A.'s position and they are appealing the re-assessment.

### **6. The Charities**

92 In 2005, there were six participating charities that received funds through the Gift Program. These were all Registered Canadian Amateur Athletic Associations: Biathlon Canada, Canadian Amateur Football Association, Canadian Amateur Wrestling Association, Canadian 5 Pin Bowlers Association, Canadian Lacrosse Association, and Little League Baseball Canada. Donors could designate one of these charities as the recipient of their donations. It is fair to note that these organizations were not well-recognized in the Canadian not-for-profit landscape and the idea of a sustained flow of income, even with modest returns, was probably enticing to them.

93 From 2006 onward, FFC Foundation was prominently identified in the promotional materials of the Gift Program as a registered Canadian charity that supported a group of participating Canadian charities. It received donations through the Gift Program and disbursed them to the participating Canadian charities, including at least some of the charities that had participated in 2005. Charities that participated in the Gift Program through FFC Foundation included Canadian Community

Living Foundation, Scarboro Foreign Missions and the New Brunswick Foundation for the Arts. Other charities continued to participate directly in the Gift Program rather than through the FFC Foundation.

94 Certain qualifying charities could receive "directed donations" through the FFC Foundation, that is, donations specifically earmarked by donors to the charities. To qualify for a directed donation, the charity or Distributors would have to assemble \$1.5 million in aggregate donations, i.e. \$375,000 in contributions from donors. All charities participating through FFC Foundation entered into letters of understanding, committing to their participation in the Gift Program.

95 If FFC Foundation was the charity designated by a participant, then it decided which qualifying charity would be the recipient of Gift Program funds, unless donations were earmarked for a particular charity through a directed donation.

## ***7. Marketing Materials***

96 ParkLane prepared a promotional brochure that, with some variations, was in substantially the same form from year to year. The cover for the brochure in 2005 was entitled "Donations Canada" and showed pictures of athletes, presumably representing the beneficiaries of the 1% of the charitable donations actually retained by the charities, though this fact was not mentioned in the brochure.

97 Inside the brochure, there was a description of how the Gift Program worked. The brochure for 2005 described the Gift Program as a "unique charitable donation program" that would enable donors to "enhance their personal cash contributions to a variety of supported Canadian charities through a gift of [sic] beneficial interest in a Canadian resident trust." The brochure said that the Gift Program was designed to "assist charities in raising much needed funding." It described Donations Canada Trust as having been established "with a funding commitment of \$200,000,000 in cash to promote charitable giving in Canada". I note parenthetically that if this "funding commitment" was made by the Bermuda Trust to the Donations Canada Trust, there is no evidence at all that the Bermuda Trust had resources of this magnitude.

98 The brochure went on to explain that donors who donated cash to a charity would be able to apply to become a beneficiary of Donations Canada Trust and that upon this happening, the donor would assign his or her beneficial interest in the trust to the charity "which will result in an additional cash contribution to the charity". The clear implication of all this was that the donor's cash would be matched with an appropriate portion of the \$200 million "funding commitment" provided by the Donations Canada Trust and given to the charity.

99 The brochure contained a diagram, showing how the entire donation of \$10,000, the \$2,500 cash donation from the donor and the \$7,500 "investment" from the Donations Canada Trust to the sub-trust, were distributed to the charity. That diagram was in substantially the same form as the first of the two diagrams earlier in these reasons.

100 Nowhere in the brochure was there any explanation of the role of the Bermuda Trust or of the fact that the funds "donated" to the charity were not actually retained by the charity and that 99% of the funds flowed back to the promoters. The niceties of these issues were, apparently, left to the Distributors, who were limited in what they could tell their clients, as set out above. It is apparent, at least from the evidence of Gacich, that he only told his clients about the "back half" of the Gift Program, when they asked.

101 The 2005 brochure contained a letter dated June 15, 2005, on Patterson Palmer letterhead, signed by Harris, which stated as follows:

You requested our opinion concerning the consequences under the Canadian Income Tax Act and Regulations of participation in the Program by an individual who donates cash and a beneficial interest in a trust to a charitable organization, a charitable foundation, or a registered Canadian amateur athletic association.

We reviewed the Program and its compliance with the Income Tax Act and Regulations and with the proposed amendments thereto, and we issued our opinion to you dated May 18, 2005.

That opinion may be viewed by the professional adviser of any potential donor by contacting your office, providing that the adviser agrees that the opinion is the property of ParkLane Financial Group and is provided to the adviser without responsibility on our part, or the part of ParkLane Financial Group, for his or her sole use in assessing the Program and in determining its suitability to a donor's specific circumstances.

102 This letter and similar letters written by Mr. Harris and included in the marketing materials in 2006 and 2007 are what I have referred to above as the "Comfort Letter", because they were intended to give a prospective donor comfort that the Gift Program had been vetted by a respected Canadian tax lawyer who was satisfied that it complied with the *Income Tax Act* and regulations.

103 Also included in the brochure was a page addressed "To Donors", with this statement:

ParkLane Financial Group Ltd. has received a tax opinion from Mr. Edwin C. Harris, Q.C. of Patterson Palmer, Halifax, with respect of [sic] the Donations Canada Program.

Mr. Harris' opinion is available for review by your professional advisor. For more information, please have your accountant or lawyer contact our Burlington, Ontario office at [phone number].

104 Underneath these statements was a picture of Mr. Harris and a brief summary of his impressive credentials:

B.Com. (Dalhousie) 1954; LL.B (Dalhousie) 1958; LL.M. (Harvard) 1959; C.M.A. (1956); C.A. (1957); Admitted to Nova Scotia Bar (1959); Q.C. (1975); F.C.M.A. (1984); F.C.A. (1984).

105 Beneath this was the following statement:

Mr. Harris is counsel with the law firm of Patterson Palmer, Halifax. The author of many articles on taxation and estate planning, and texts on Canadian income taxation, he is an adjunct professor at Dalhousie Law School, Halifax and the Former Chair of the Canadian Tax Foundation.

106 The marketing materials for the Gift Program in 2006 and 2007 were substantially similar to the 2005 materials, except that they now contained a description of FFC Foundation, which had come into existence in 2005. There was also a description of some of the participating charities. The materials in each year up until and including 2007 contained a Comfort Letter from Harris and a note addressed from ParkLane "To Donors", indicating that it had received a "tax opinion" from Harris with respect to the Gift Program. Additionally, one of the benefits of the Program listed in the brochure was a:

Tax Opinion by top Canadian legal professionals

107 Inside the cover of the 2007 brochure, there was a letter from Mr. Olsthoorn, the President of ParkLane. In the letter, Mr. Olsthoorn described the Gift Program as an "innovative product design [which] provides a unique opportunity for Canadian donors to make significant cash contributions to registered Canadian Charities and Foundations."

108 Mr. Oolsthoorn went on to say in his letter that:

ParkLane has consulted with top Canadian tax and legal professionals in the design of this program. In addition, the Program has been reviewed by hundreds of tax and legal advisors of participating donors.

109 As we now know, the ParkLane brochure told only half the story about the Gift Program. In particular, it did not describe what happened to the donor's money after it reached the hands of the charity. It did not show that 99% of the \$10,000 aggregate donation immediately left the charity, which was left with \$100 and a promise of a future income stream.

## ***8. Contractual Materials for the Gift Program***

110 Every donor participating in the Gift Program was required to sign certain standard form documents. These documents were amended from time to time during the Gift Program. In 2005, the standard documents included:

- (a) a Pledge to a Charity directed to ParkLane as escrow agent;
- (b) an Enduring Property Pledge to a Charity directed to ParkLane as escrow agent, directing that the "cash gift shall be retained by the Charity ... for not less than 10 years from the date the gift was received by the Charity...";
- (c) an Application to be Designated as a Beneficiary of the Donations Canada Trust, stating, among other things, "I am interested in supporting the work of the charity to which I have made a pledge of a cash gift (the "Charity") and would like to see it benefit from further gifts";
- (d) a Donor Declaration in which the donor declared and agreed that:
  - (i) they had read and fully understood all and any written materials and documents in the Gift Program Materials, including (after 2005) the Tax Risk Disclosure Statement, in respect of their participation in and donations to the Gift Program;
  - (ii) except for what was contained in the materials provided by ParkLane, no other promise, representation or warranty had been made by ParkLane to them or was relied upon by them;
  - (iii) they had received independent professional advice in respect of the Gift Program from their own personal advisor/lawyer/accountant;
  - (iv) they fully understood the advice and information provided to them by their own personal advisor/lawyer/accountant in respect of all and any legal, commercial/business and tax consequences related to their participation in the Gift Program, including the fact that up to 8% of their aggregate donation amounts would be used to pay charity fundraising fees;
  - (v) they accepted any and all tax risks whatsoever related to their participation in the Gift Program, including the risk that their charitable donations, or a portion of them, might be re-assessed and even denied; and
  - (vi) they unconditionally released ParkLane and its officers and employees from any and all claims or liabilities of any kind whatsoever that they then had, or in the future might have with respect to matters occurring on, prior to or after the date of the Donor Declaration, arising out of, based upon, resulting from or in connection with their participation in the Gift Program; and
- (e) a Transfer of Units of Sub-trust to Charity, recognizing that all registered holders of the sub-trust units "have mutually agreed to donate our respective units to" a participating charity and designating ParkLane as escrow agent to hold and transfer the sub-trust units.

111 In 2006, a Tax Risk Disclosure Statement was included in the documents to be signed by donors. It provided, among other things:

- (a) The ParkLane Donations for Canada Program (the "Program") is being offered by ParkLane Financial Group Ltd. ("ParkLane") to assist registered Canadian amateur athletic associations, foundations, charities and other qualified donees under the *Income Tax Act* (Canada) (the "Act") ("Charity" or "Charities") in raising long-term and short-term charitable funding. The Program is principally designed to provide a donor resident in Canada ("Donor" or "Donors") with the means of effecting: (1) a cash donation to a Charity, entitling such Donor to a cash receipt; and (2) a distribution from a sub-trust ("Sub-Trust") of a Canadian-resident trust ("Master Trust") to a Charity, entitling the Donor to a donation-in-kind receipt.
- (b) *Tax Opinion & Advice*

(c) Edwin C. Harris, Q.C., of McInnes Cooper, tax counsel to ParkLane, has, based on the interpretation of the Act and favourable case law, provided a legal opinion to ParkLane outlining the tax consequences and the intended results for a Donor making a donation under the Program. *ParkLane recommends and urges any prospective donor interested in participating in the Program to review the tax consequences of making a donation with his or her professional legal, accounting and tax advisor.*

(d) ParkLane has worked closely with leading Canadian accounting and tax law professionals in the structure, design and development of the Program. Should C.R.A. or RQ choose to challenge the tax structure of the Program, ParkLane believes that very strong arguments can be made in supports of its position. ParkLane has at its disposal a contingency fund of \$500,000 set aside to support Donors in dealing with audits, reassessments or challenges made against the Program. This fund will remain in place until December 31, 2010 and will be used exclusively to provide assistance to Donors, which, in the past, has included assisting clients in responding to C.R.A. questionnaires drafting and filing of notices of objection, preparing appeals and funding tax litigation.

(e) While ParkLane intends to assist and support Donors in the event of such challenges and has committed the funds in this regards, *ParkLane cannot guarantee that each Donor will receive the income tax consequences contemplated under the Program and makes no representations in respect of a Donor's entitlement to claim the tax credits in respect of any donations made pursuant to the Program. ParkLane cautions each Donor that he or she may not ultimately obtain the income tax results designed to be achieved under the Program and may, in fact, incur certain costs and interest payments associated with any reassessment by the C.R.A. or RQ.* [emphasis in original]

#### **9. The C.R.A. Re-Assessment**

112 Cannon was reassessed by C.R.A., which disallowed his deductions for his charitable gifts to the Gift Program in 2005 and 2006. On about May 7, 2008, he received a letter from C.R.A. indicating that of the \$40,000 he had claimed, representing \$10,000 in cash and \$30,000 in kind, no amount was allowable as a charitable gift. A letter dated February 4, 2009 gave him the same bad news concerning his 2006 donation, \$12,500 of which was in cash and \$37,500 was in kind.

113 The C.R.A. letters described the nature of the Gift Program and described the Bermuda Trust as the "Facilitator". They stated that in the first year of the agreement, the charities that participated in the Gift Program received payments from TTL equivalent to an annual return of 0.16% (zero point sixteen percent). C.R.A. was unable to confirm that the funds paid had actually been invested on behalf of the charities.

114 The position taken by C.R.A. was that the donations made by Cannon were not a gift, because they were made in the expectation of a material advantage, namely, the expectation that he would receive the trust units at no costs to himself and that he would transfer those units to a charity and receive a second charitable donation receipt for three times the value of his cash payment. The 2008 letter continued:

Furthermore, the charities were obliged as a condition of participation in the Program to transfer almost all of these funds to specific parties. Through a series of transactions and directions signed by all parties involved, these funds followed a circular flow and ended up back in the hands of the promoters. This series of transactions was preordained with the result that, for a cash payment, you would claim donation receipts four times greater than the cost of participating in this scheme. It is our opinion that you participated in this scheme with full knowledge of this material benefit. Accordingly, it is our opinion that the full amount of the funds transferred to the charities does not represent a gift.

115 In the absence of a "donative intent", Cannon was not entitled to claim a charitable deduction.

116 In 2008, C.R.A. audited FFC Foundation for the period December 2005 to December 2006. It concluded that the Foundation had not complied with the requirements of the *Income Tax Act* and revoked its charitable status in 2009. C.R.A. has also disallowed all charitable deductions made by Class members with respect to tax receipts issued under the Gift Program.

### III. The Certification Motion

#### 1. Introduction

117 The plaintiff submits that this is an ideal case for certification and that it is substantially the same as *Robinson v. Rochester Financial Ltd.*, [2010] O.J. No. 187, 2010 ONSC 463 (Ont. S.C.J.), application for leave to Divisional Court denied, 2010 ONSC 1899 (Ont. Div. Ct.) ("Banyan Tree"), a decision of Justice Lax, certifying a class action relating to a charitable donation scheme called the "Banyan Tree Gift Program". The plaintiff says that he relies on well-established causes of action, that the Class is clearly identifiable and that the common factual and documentary underpinnings of the claim of every Class member give rise to common issues of fact and law. He says that he is an appropriate representative of the Class, that he has a suitable litigation plan and that certification is the preferable procedure for the resolution of claims of Class members and will accomplish the goals of the *C.P.A.*

118 The defendants say that this case is distinguishable from *Banyan Tree*. While they make a number of objections, their fundamental complaint is that the claims of the Class members are not common, because they can only be resolved by analyzing individual circumstances. They say that liability cannot be determined on a class-wide basis and will require an examination of such matters as the investor's knowledge, sophistication, experience and risk tolerance and the information, written and oral, disclosed to each investor. The defendants say that for those reasons a class proceeding is not the preferable procedure for dealing with the claims of the Class.

#### 2. Banyan Tree

119 In *Banyan Tree*, the plaintiffs sought to certify a class action on behalf of taxpayers, who had contributed to the Banyan Tree gift program. They sued the promoters and a law firm as a result of C.R.A.'s disallowance of their tax deductions. Lax J. certified causes of action in negligence and breach of contract against the promoters and also certified the action against the law firm in negligence.

120 The structure of the Banyan Tree gift program was quite different from the ParkLane Gift program, although as in this case, the participants were solicited by a network of "financial advisors" who promoted and sold the program. In *Banyan Tree*, however, the charitable donation of each taxpayer was pumped up through a loan from the promoters of 85% of the amount of the donation. The plaintiffs alleged that it was an express or implied term of their contracts with the promoters that they would receive a charitable tax receipt that would be recognized by C.R.A. and that they would not be at risk to repay the loans. They pleaded causes of action in contract and negligence.

121 The promoters did not dispute that the statement of claim disclosed causes of action in breach of contract and negligence, and Lax J. agreed. There was substantial debate with respect to the commonality criterion for certification. The promoters argued that the action was essentially a point-of-sale misrepresentation case and that, even though a cause of action for misrepresentation was not being asserted, it would be necessary to present "evidence as to who said what to whom in respect of each and every transaction". Lax J. found that the standard form of brochure and program information, the standard contract language and the evidence of the plaintiffs and their witnesses provided a sufficient evidentiary basis to raise common issues "that the tax opinion was considered to be part of the gift program, that it was necessary to launch the program, and that participants entered into common contracts on express or implied terms that they would receive a charitable donation tax receipt recognized by CRA and a risk-free loan" (at para. 50).

122 In *Banyan Tree*, the plaintiffs alleged that the law firm's opinions were prerequisites for the promotion and sale of the program and that the law firm intended that the participants would rely on its opinion in deciding whether or not to participate in the program. They pleaded that the law firm owed the participants a duty of care and that it was negligent in the preparation of the opinions. The lawyers argued that because the plaintiffs had never read their opinions, there could be no duty of care and they brought a motion to dismiss the claim on the basis of the plaintiffs' admission that they had not read the opinion letters.

123 Justice Lax found a cause of action in negligence against the lawyers. She addressed the lawyers' argument as follows, at para. 21:

FMC [the law firm] submits that a duty of care cannot be created based on the fact that an opinion was prepared, when its contents were never read or relied upon by anyone. They say that the allegations against FMC arise from the existence and the contents of the letters and that, in substance, the claim is made for negligent misrepresentation. I disagree. The claim is not pleaded on the basis that the plaintiffs read or relied upon the FMC letters, but on the basis that FMC issued the opinion letters with the expressed intention that they be relied upon by the gift program defendants and knowing that the gift program defendants would rely upon and publish the existence of the opinions in promoting the gift program.

124 The law firm argued that the opinion letters disclaimed reliance on the letter by anyone other than the promoters and donors who were provided with copies of the letter, and that it was not reasonably foreseeable that persons who did not receive or read the letters would sustain damages as a result of the opinions in the letter. Lax J. concluded that the lawyers knew or ought to have known that the very existence of the opinion would be used to market the Gift Program and that potential donors would rely on the existence of the opinion in deciding whether to participate. She stated, at paras. 24 and 25:

The allegation is not that FMC provided the letters intending that they be read and relied upon by the plaintiffs and proposed class members, although some may have done so, but rather that FMC provided the letters (1) with the intention that they be used by the gift program defendants in the manner the plaintiffs allege, namely to market the program as one in which proposed class members would receive a charitable tax receipt recognized by C.R.A.; and (2) with the intention and knowledge that the existence of a tax opinion would inform the decision of class members about whether or not to participate in the gift program. If these allegations are made out at trial, it is not plain and obvious that they could not support a duty to take care that the opinions expressed in the letters were accurate and reliable and that a failure to take such care or a failure to warn was the proximate cause of the losses the plaintiffs allege they suffered.

To put this in a different way, the reliance the plaintiffs allege is not on the tax opinion *per se*, but on there being a tax opinion that FMC intended and knew would be used by the gift program defendants to support the legitimacy of the gift program for income tax purposes and would be relied upon by the class members in deciding whether or not to participate. I would therefore not give effect to FMC's argument that this is a negligent misrepresentation claim "dressed up" as a negligence claim. It is properly pleaded as a negligence claim and the essential elements of the cause of action - duty, foreseeability, proximity, breach, and damage - are present. The express qualifications on the opinion are not matters to be considered at the certification stage.

125 Justice Lax went on to note at para. 26 that "there is precedent ... for advancing a class action claim in negligence against a law firm even though generally, a lawyer owes a duty of care only to the lawyer's client: *Baypark Investments Inc. v. Royal Bank* (2002), 57 O.R. (3d) 528 (Ont. S.C.J.) at paras. 23 and 33, aff'd, [2002] O.J. No. 4377 (Ont. C.A.); *Elms v. Laurentian Bank of Canada*, 2004 BCSC 1013, 35 B.C.L.R. (4th) 373 (B.C. S.C.), at paras. 63-65, aff'd, 2006 BCCA 86 (B.C. C.A.)."

126 After reviewing previous decisions, such as *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman* (2001), 18 B.L.R. (3d) 240, [2001] O.J. No. 4622 (Ont. S.C.J.), *Delgrossio v. Paul* (1999), 45 O.R. (3d) 605 (Ont. Gen. Div.) and *Elms v. Laurentian Bank of Canada*, 2001 BCCA 429, 90 B.C.L.R. (3d) 195 (B.C. C.A.), Lax J. found, at para. 30, that "there is clearly a developing line of authority in Ontario and elsewhere that have permitted claims of this kind to proceed". She concluded at para. 31:

... it is certainly arguable that FMC ought reasonably to have foreseen that its tax opinion would be used to market the gift program and that the participants would be "disappointed" and suffer damages if FMC was negligent in giving that opinion. In my view, FMC placed itself in a relationship of sufficient proximity to owe a *prima facie* duty of care to the plaintiffs and proposed class members and I would leave to trial the question of whether policy considerations ought to negative that duty.

127 Justice Lax found that the proposed class definition, "all individuals who participated in the Banyan Tree Gift Program for [the taxation years at issue]" was acceptable.

128 Justice Lax also found that a class proceeding would be the preferable procedure for the resolution of the common issues and rejected the defendants' motion to stay the proceeding until the donors' appeals to the Tax Court had been determined. Finally, she found that the representative plaintiff was appropriate and had produced a satisfactory litigation plan.

129 A motion for leave to appeal to the Divisional Court was dismissed by Dambrot J. He found that the appeal of the gift program defendants was highly fact-driven and did not meet the test for leave. Regarding the appeal by the lawyers, he found at paras. 23 to 25 that the absence of direct reliance on the advice of the law firm was not fatal to the claim in negligence:

It is arguable that reliance by the plaintiffs on the existence of a positive opinion given by Fraser [the law firm] to the gift program defendants supports their claim against Fraser in negligence. In my view, the words of Sharpe J., as he then was, at paragraph 10 of his judgment in *Delgross v. Paul* (1999), 45 O.R. (3d) 605 (Gen. Div.), one of the many cases relied on by Lax J., are apposite:

The defendant also submits that there can be no cause of action for breach of duty, whether as a solicitor or as a fiduciary, absent a plea of reliance by the plaintiff on his advice. While the plaintiff does not allege direct reliance on the solicitor, it seems to me at least arguable that where a party invests money in an RRSP to be invested in mortgages, the reliance the party places on the trustee or other advisors to ensure that adequate steps are taken to protect his interests may be adequate to support a claim against the solicitor retained by the trustee or advisor, particularly where the solicitor is aware of the identity of the party and the nature of the party's interest: see *White v. Jones*, [1995] 1 All E.R. 691 (H.L.).

Here, equally, the absence of direct reliance by the plaintiffs on the solicitor's advice may not be determinative. Even without direct reliance on the advice, it remains arguable that when the plaintiffs entered the scheme, they were relying on the legal advisors of the architects of the scheme to ensure that their pledges would qualify as valid charitable donations for tax purposes. If the legal advisors acted negligently in giving their advice to the gift plan defendants, the plaintiffs could have a claim in negligence against those legal advisors.

While it may be, particularly taking into account the qualifications and reservations expressed in Fraser's opinion, that the claim against Fraser will ultimately fail, I cannot say that there is good reason to doubt the correctness of the orders in issue, namely, the order to certify as against Fraser, the order to decline to strike the pleadings against Fraser and the order refusing to strike the claim against Fraser.

130 Accordingly, leave was not granted.

131 Against this background, I turn now to the question of whether, and on what terms, this action should be certified as a class proceeding.

#### A. The Test for Certification

132 Section 5(1) of the *C.P.A.* sets out the criteria for the certification of a class proceeding. The court *shall* certify the action as a class proceeding where the five-part test for certification is met:

- (a) the pleadings or the notice of application discloses a cause of action;
- (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff;
- (c) the claims of the class members raise common issues;
- (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and

- (e) there is a representative plaintiff who,
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

133 As Justice Lax observed in *Banyan Tree* at para. 14, these requirements are linked:

"There must be a cause of action, shared by an identifiable class, from which common issues arise that can be resolved in a fair, efficient and manageable way that will advance the proceeding and achieve access to justice, judicial economy and the modification of behaviour of wrongdoers": *Sauer v. Canada (A.G.)*, [2008] O.J. No. 3419, 169 A.C.W.S. (3d) 27 (Sup. Ct.) at para. 14.

134 It has been observed on many occasions that the *C.P.A.* is remedial legislation and that it should be interpreted generously in order to give effect to its objectives: access to justice, behaviour modification and judicial economy: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.); *Abdoool v. Anaheim Management Ltd.* (1993), 15 O.R. (3d) 39 (Ont. Gen. Div.), at 47, aff'd (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.).

135 I turn to the five components of the s. 5(1) test.

### ***1. Causes of Action***

136 Section 5(1)(a) of the *C.P.A.* requires that the pleadings disclose a cause of action. The test is the same as that applied in a motion to strike a pleading under rule 21.01(1)(b) of the *Rules of Civil Procedure*, R.R.O. 1990, reg. 194 on the ground that it discloses no reasonable cause of action: "assuming that the facts as stated in the Statement of Claim can be proved, is it 'plain and obvious' that the plaintiff's Statement of Claim discloses no reasonable case of action?" - *Hunt v. T & N plc*, [1990] 2 S.C.R. 959, [1990] S.C.J. No. 93 (S.C.C.) [Hereinafter *Hunt v. Carey Canada Inc.*] at para. 33.

137 This test was summarized by Cameron J. in *Balanyk v. University of Toronto* (1999), 1 C.P.R. (4th) 300, [1999] O.J. No. 2162 (Ont. S.C.J.) at para. 25 as follows:

The test to be applied is whether, assuming the facts pleaded are true, it is plain and obvious that the plaintiff's statement of claim discloses no reasonable cause of action. Only if the action is certain to fail because the pleading contains a radical defect should the relevant portions be struck out. If the pleading has some chance of success, it should remain. An arguable point of law or a novel cause of action should be left to the trial judge or a motion for judgment based on the point after exchange of pleadings. The motion for judgment may be under Rule 21.01(a) on the basis of some question of law or under Rule 20 where a factual context is required for its resolution: see *Hunt v. Carey Canada*, [1990] 2 S.C.R. 959; *Prete v. Ontario* (1993), 16 O.R. (3d) 161 (C.A.); *Nash v. Ontario* (1995), 27 O.R. (3d) 1 (C.A.); *Abramovic v. Canadian Pacific Ltd.* (1991), 6 O.R. (3d) 1 (C.A.).

138 The principles applicable to this aspect of the test are settled:

- no evidence is admissible for the purposes of determining the section 5(1)(a) criterion;
- all allegations of fact pleaded, unless patently ridiculous or incapable of proof, must be accepted as proved and thus assumed to be true;
- the pleading will be struck only if it is plain, obvious and beyond doubt that the plaintiff cannot succeed and only if the action is certain to fail because it contains a radical defect;

- matters of law that are not fully settled by the jurisprudence must be permitted to proceed; and,
- the pleading must be read generously to allow for inadequacies due to drafting frailties and the plaintiff's lack of access to key documents and discovery information.

See generally: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 25; *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 41, leave to appeal to the S.C.C. ref'd, [2005] S.C.C.A. No. 50 (S.C.C.), rev'g (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.); *Abdoole v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) at p. 469.

139 As is so often the case in class actions, the plaintiff asserts multiple causes of action against multiple defendants. The following chart describes the causes of action asserted against the various defendants:

<i>Cause of Action</i>	<i>Party</i>
(a) Negligence	All Defendants
(b) Negligent Misrepresentation	The ParkLane Defendants The Gleesons Harris Patterson Palmer Law (for 2005 only) McInnes Cooper (for 2006 - 2009)
(c) Fraud and Fraudulent Misrepresentation	The ParkLane Defendants
(d) Conspiracy	Appleby Trustee Gleeson (which refers to Gleeson in his capacity as trustee for the Donations Canada Trust from 2005 to in or about April 2006) The Gleesons
(e) Consumer Protection Legislation (rescission and damages)	The ParkLane Defendants FFC Foundation (from 2006 - 2009) and FFC Directors Trustee Gleeson The Gleesons
(f) Breach of Contract	ParkLane Trustee Gleeson The ParkLane Defendants FFC Foundation and FFC Directors, Appleby
(g) Unjust Enrichment and Constructive Trust	Trustee Gleeson The Gleesons

140 The claims against the FFC Directors begin from the time period of 2006 onwards. Although this chart indicates that the plaintiff claims against the FFC Directors for negligence, breach of the *Consumer Protection Act, 2002*, S.O. 2002, c. 30, Sched. A, and unjust enrichment, there is no pleaded claim against them for unjust enrichment.

*(a) Negligence*

141 There are allegations of negligence against all defendants and separate allegations of negligence against the Lawyers and the FFC Directors. The allegations of negligence essentially boil down to this:

- (a) all the defendants, other than the FFC Directors, were negligent in the planning and creation of the Gift Program and in failing to ensure that C.R.A. would recognize the charitable donation receipts issued to Class members and the tax credits they claimed;
- (b) all the defendants, other than the FFC Directors, negligently misrepresented that the Gift Program would provide valid charitable donation receipts when they knew or ought to have known that this would not occur;
- (c) the Lawyers issued their Opinion Letters and Comfort Letters without due care and attention, with the intention that those letters would be relied upon by the Class, when they knew or ought to have known that the letters were inaccurate;
- (d) the FFC Directors owed a duty of care to the Class to ensure that the charity was properly operated and they failed to ensure that Class members' donations were being received by the charities as gifts so that the donations would qualify for charitable tax credits.

142 In *Banyan Tree*, the "gift program defendants" did not dispute that there was a properly pleaded claim against them in negligence and a cause of action was certified in negligence.

143 I will make some general observations about the negligence pleading before turning to the submissions of each group of defendants.

144 The ParkLane Defendants, together with some of the other defendants, say that the claim in negligence is in substance a claim in negligent misrepresentation and is "subsumed" by that claim. They say that where the plaintiff's claim is that the defendant breached a duty to provide accurate information and not to make false or misleading statements, the cause of action is for negligent misrepresentation and the plaintiff cannot circumvent the requirement to plead reliance by pleading the case in negligence. The defendants rely, in particular, on *Deep v. M.D. Management*, [2007] O.J. No. 2392 (Ont. S.C.J.) at para. 28, aff'd *2008 ONCA 189* (Ont. C.A.) and *Singer v. Schering-Plough Canada Inc.*, [2010] O.J. No. 113, 2010 ONSC 42 (Ont. S.C.J.).

145 This is a major battle ground for the defendants, for understandable reasons. If the claim is for negligent misrepresentation alone, the defendants will argue that issues of individual reliance make the claim unsuitable for certification: see *McKenna v. Gammon Gold Inc.*, 2010 ONSC 1591, [2010] O.J. No. 1057 (Ont. S.C.J.) at para. 135, varied, *2010 ONSC 1591*, [2010] O.J. No. 1057 (Ont. S.C.J.) and the authorities referred to there. If, on the other hand, the plaintiff has a cause of action in negligence, as was the case in *Banyan Tree*, the focus will be on the defendants' conduct, making the claim more amenable to certification. This is, no doubt, why the plaintiff's pleading describes the claim under the heading of "Negligence", although most of the allegations sound like negligent misrepresentation.

146 I agree that a plaintiff cannot dress up a negligent misrepresentation claim in negligence clothes and then assert negligence as a separate cause of action. That is what happened in *Deep v. M.D. Management*. The plaintiff owned Nortel shares in his RRSP and claimed against Nortel when the value of the shares dropped dramatically. Justice Brown struck the claim for negligent misrepresentation, as the plaintiff had failed to plead that he had relied upon any representations made by Nortel. This left a claim for negligence, but Brown J. found that it was in substance a claim for misrepresentation. The alleged duty of care was to accurately represent Nortel's financial situation and the breach of this duty was by misrepresentation and failure to disclose. Justice Brown held, at para. 28:

As I read Dr. Deep's negligence pleading, it acts simply as an additional pleading of the first element for the cause of action of negligent misrepresentation - the existence of a duty of care based on a special relationship. In my view opinion [sic] Dr. Deep has not pleaded a cause of action sounding in negligence that is separate from his cause of action for negligent misrepresentation. As a result, it suffers from the same defects as his pleading of negligent misrepresentation.

147 It was clearly a case where the pleading of negligence was in substance a pleading of negligent misrepresentation.

148 Similarly, in *Singer v. Schering-Plough Canada Inc.*, the plaintiff claimed that two sunscreen manufacturers had misrepresented the degree of protection their products provided against UVA rays. Causes of action were asserted for negligence

and breach of the *Consumer Protection Act, 2002*, among others. In an apparent effort to avoid the issue of reliance that would arise in a claim for negligent misrepresentation, the plaintiff asserted a cause of action in negligence.

149 I found in that case that the pleading of negligence was essentially that the defendants owed a duty of care to provide consumers with accurate information on the labels of the products and not to make false or misleading claims in the labeling and advertising of their products. In substance, it was a claim for misrepresentation without a pleading of reliance and was therefore not properly pleaded. There was no allegation in that case that the product itself was defective.

150 In *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.), van Rensburg J. made a similar observation at para. 88:

The negligence pleading in this case is in substance a pleading of negligent misrepresentation without the ingredient of reliance. There is also no pleading that the alleged negligence caused damage to the plaintiffs and no separate claim for a remedy based on negligence. Accordingly, the claims sounding in negligence *simpliciter* ... will not be permitted to proceed and the claim shall be amended accordingly.

151 On the other hand, there is no reason that a plaintiff cannot plead both negligence and negligent misrepresentation, arising out of the same factual circumstances, as long as the claims are, in fact, distinct. Thus, in *Dobbie v. Arctic Glacier Income Fund*, [2011] O.J. No. 932, 2011 ONSC 25 (Ont. S.C.J.), there were distinct pleadings of negligence on the one hand and of negligent misrepresentation on the other. It was pleaded not only that the defendants issued prospectuses that contained misrepresentations, but also that, had the defendants fulfilled their duties, the securities would either not have been issued or would have been offered at lower prices. In that case, Tausendfreund J. noted, at para. 59:

A review of the pleadings in the case before me indicates that unlike *Deep* and *Imax*, the claims of negligence and negligent misrepresentation are pleaded quite differently and raise separate causes of action. The negligence *simpliciter* claim asserts that the securities issued pursuant to the prospectuses would not have been issued, or would have been issued at a substantially reduced offering price, but for the negligence of the defendants. The negligent misrepresentation pleading, on the other hand, points to a number of misrepresentations contained in various prospectuses and public disclosures.

152 Similarly, in *Lipson v. Cassels Brock & Blackwell LLP*, 2011 ONSC 6724, [2011] O.J. No. 5062 (Ont. S.C.J.), Perell J. certified a class action pleading both negligent misrepresentation and negligence. He stated, at para. 79:

I agree with Justice Lax's analysis [in *Banyan Tree*]. The [*Banyan Tree*] case is not distinguishable from the case at bar, and, indeed, the case at bar is a stronger case for her analysis, which posits that it is arguable that the law firm had a duty of care and that the other constituent elements of negligence claim might be established; i.e. it is not plain and obvious that Mr. Lipson and the Class Member's do not have a free-standing claim for negligence that is discrete from a claim for negligent misrepresentation. See also: *Yorkshire Trust Co. v. Empire Acceptance Corp. Ltd.*, [1986] B.C.J. No. 3254 (B.C.S.C.); *Collette v. Great Pacific Management Co.*, [2004] B.C.J. No. 381 (B.C.C.A.); *McCann v. C.P. Ships*, [2009] O.J. No. 5182 (S.C.J.); *Dobbie v. Arctic Glacier Income Fund*, 2011 ONSC 25.

153 In the *Lipson* case before Justice Perell, the lawyers' letters were expressly stated to be prepared so that they might be relied upon by potential donors. In the case at bar, they were not. It is arguable, however, in this case, as it was in *Banyan Tree*, that it was reasonably foreseeable that the Opinion Letters and the Comfort Letters in this case would be used to market the Gift Program.

154 It seems to me that, in the application of the s. 5(1)(a) test, the court should be careful not to strike a pleading on the ground that it has been "subsumed" by another pleading when the evidence at trial could well support separate causes of actions under both pleadings. Put another way, only when it is plain and obvious that a pleading has been dressed up to hide its real identity, should a court refuse to allow it to go forward.

155 In this particular case, reading the pleading generously, there are allegations that the "product" - the Gift Program - was negligently designed and that it did not work. There are also allegations that the defendants negligently made misrepresentations that it would work. It is conceivable that one claim might succeed and the other might fail. Why should it not be left for the

common issues judge to determine whether one or both claims have been made out, assuming that both claims are appropriate for certification? Similar observations were made by Wilson J. in *Hunt v. Carey Canada*, above, in the context of conspiracy pleadings.

156 I now turn to a consideration of the negligence pleading against each group of defendants.

**(i) ParkLane, TTL, TAL**

157 The pleading against the ParkLane Defendants includes allegations that these defendants "negligently planned and created the Gift Program" and that they "failed to ensure that C.R.A. would in fact recognize the charitable donation receipts issued and tax credits claimed by the Class members".

158 Reading the pleading generously and with due allowance for drafting deficiencies, including the lack of particulars, there is a pleading of negligence that is distinct from the pleading of negligent misrepresentation. It is possible to envisage circumstances in which the misrepresentation claim could fail, but the negligence claim could succeed. If, for example, the Gift Program could have been structured in such a way that the Class members at least obtained a valid receipt for their \$2,500 cash donations, then the ParkLane Defendants could have a liability in negligence, whether or not they misrepresented the fact that donors would be able to "supersize" their donations. Alternatively, as in *Dobbie v. Arctic Glacier Income Fund*, the plaintiff could argue that the Gift Program would not have been offered at all had the ParkLane Defendants properly investigated the tax consequences.

159 I am satisfied, therefore, that the plaintiff has properly pleaded a cause of action in negligence against the ParkLane Defendants.

**(ii) FFC Foundation**

160 Reading the pleading generously, the plaintiff pleads that FFC Foundation was negligent in failing to ensure that C.R.A. would recognize its charitable donation receipts as valid. It is arguable and not therefore plainly and obviously wrong that a charity owes a duty of care to donors to ensure that it is operated in such a way as to give the donor a valid charitable receipt in return for a donation. I will therefore certify a cause of action in negligence against FFC Foundation.

**(iii) FFC Directors**

161 The plaintiff asserts a claim in negligence against the FFC Directors, and Ms. Gleeson, the Executive Director of FFC Foundation. He also says that he is asserting a claim for negligent misrepresentation against Ms. Gleeson, but apparently not against the FFC Directors.

162 The pleading against the FFC Directors is that they, among other things:

- owed a duty to Class members to ensure that the FFC Foundation was operated in keeping with its objects and that their donations were in fact gifted to charities as set out in the promotional materials;
- owed a duty to Class Members to supervise Ms. Gleeson to ensure that the charity was operated in keeping with its objects and their donations were in fact gifted to charity;
- were negligent in the performance of their duties and obligations as directors of the FFC Foundation and, as a result, caused damages to the plaintiff and Class members;
- negligently breached their duties by permitting the FFC Foundation to be used as a vehicle whereby the other defendants (other than the Lawyers) perpetrated a fraud; and
- failed to identify the fact that the charitable donees did not have free use of the funds donated to them and were in fact required to pay the vast majority of the donations they received to the Bermuda Trust or to TTL.

163 There are no pleadings that:

- the FFC Directors were parties to any breach of contract;
- that they negligently planned or created the Gift Program;
- that they were involved in any conspiracy, fraud, or misrepresentation; or
- that they were unjustly enriched.

164 While there is no question that directors of a not-for-profit corporation owe a duty of care and a fiduciary duty to the corporation, they do not owe a duty to the corporation's shareholders or other stakeholders. In *London Humane Society, Re*, [2010] O.J. No. 4827, 2010 ONSC 5775 (Ont. S.C.J.), Granger J. observed, at para. 19:

Directors of not-for-profit and charitable organizations are subject to fiduciary duties at common law. The Supreme Court of Canada has held that directorial fiduciary duties are owed primarily to the corporation, not to the corporation's shareholders or other stakeholders (See *Re BCE Inc.*, 2008 SCC 69 at paras. 36-38). While most litigation in this area focuses on for-profit corporations, various academic texts apply the same concept to the directors of not-for-profit corporations (See McCarthy Tétrault, *Directors' and Officers' Duties and Liabilities in Canada*, M.P. Richardson, Ed. (Toronto: Butterworths, 1997)).

165 Officers and directors may have a liability to persons other than the corporation where they engage in "fraud, dishonesty, want of authority or other conduct specifically pleaded which justified piercing the corporate veil": *Alvi v. Misir* (2004), 73 O.R. (3d) 566, [2004] O.J. No. 5088 (Ont. S.C.J. [Commercial List]), at para. 52. In this case, however, there is no pleading of fraud, dishonesty, want of authority or other conduct of FFC Foundation or the FFC Directors that would justify the piercing of the corporate veil: see *Budd v. Gentra Inc.*, [1998] O.J. No. 3109 (Ont. C.A.); *McKenna v. Gammon Gold Inc.*, above.

166 In fact, the plaintiff has assiduously avoided lumping the FFC Directors into the allegations of malfeasance and fraud made against the other defendants.

167 The plaintiff argues that the claim against the FFC Directors should be allowed to proceed because it falls within the principle that "novel" claims should be allowed to proceed. There is nothing novel about this area of the law. The principle that directors owe a duty to the corporation and not to others goes back to *Foss v. Harbottle* (1843), 67 E.R. 189 (Eng. V.-C.).

168 The plaintiff therefore has no cause of action in negligence against the FFC Directors and that claim will be struck.

#### (iv) The Gleesons

169 It is pleaded that the Gleesons, together with the ParkLane Defendants and the Bermuda Trust, created the FFC Foundation and the Donations Canada Trust for the purpose of facilitating the operation of the Gift Program. It is also alleged that GMA, as agent for ParkLane and Gleeson, promoted, marketed and sold the Gift Program to Class members. There are also allegations that all of the defendants, other than the FFC Directors, negligently planned and created the Gift Program and negligently distributed or permitted the distribution of the promotional materials when they knew or ought to have known that the representations were false.

170 Counsel for Gleeson and GMA makes vigorous objections to the pleading against his clients. He submits that the pleading is devoid of material facts against Gleeson, that it contains broad sweeping allegations that lump Gleeson and GMA together with the other defendants and that the claim for negligence is subsumed in the claim for negligent misrepresentation.

171 For the reasons set out in relation to the claim against ParkLane, I find that there is a properly pleaded claim in negligence against Gleeson and GMA. Although the pleading against Ms. Gleeson lumps her in with all the other defendants, as having negligently planned and created the Gift Program, the pleading is broad enough to include her.

#### (v) The Lawyers

172 For the reasons set out below, dealing with the Lawyers' summary judgment motion, I find that there is a properly pleaded cause of action against the Lawyers in negligence.

**(vi) Appleby**

173 There is no separate pleading of negligence or negligent misrepresentation against Appleby - Appleby is simply bundled together, in the statement of claim, with "all of the Defendants", other than the FFC Directors.

174 Appleby contends that the statement of claim does not disclose a cause of action against it in negligence, because the plaintiff fails to plead the existence of a duty of care. It says that there is no duty of care, since the claim is for pure economic loss and does not fall within one of the relationships that have been recognized as giving rise to such a duty: see *Canadian National Railway v. Norsk Pacific Steamship Co.*, [1992] 1 S.C.R. 1021, [1992] S.C.J. No. 40 (S.C.C.), at para. 31.

175 To establish a new duty of care, the plaintiff must meet the test set out in *Attis v. Canada (Minister of Health)* (2008), 93 O.R. (3d) 35 (Ont. C.A.), which in turn confirmed the approach described in *Cooper v. Hobart*, 2001 SCC 79, [2001] 3 S.C.R. 537 (S.C.C.) and *Edwards v. Law Society of Upper Canada*, 2001 SCC 80, [2001] 3 S.C.R. 562 (S.C.C.). See also: *Design Services Ltd. v. R.*, 2008 SCC 22, [2008] S.C.J. No. 22 (S.C.C.).

176 I will discuss the duty of care analysis at length when I consider the Lawyers' summary judgment motion. This approach requires, at the first stage, that the plaintiff establish that the harm that occurred was a reasonably foreseeable consequence of the defendant's conduct and that there is sufficient proximity arising from the relationship between the parties to justify imposing a duty of care on the defendant. At the second stage, if the court has made findings of foreseeability and proximity, the onus shifts to the defendant to show that there are residual policy considerations that negative the imposition of a duty of care.

177 I do not accept Appleby's submission. There is a pleading that the Bermuda Trust, for which Appleby is the trustee, is affiliated with the ParkLane defendants and that it acted in concert with them in the creation, administration, marketing and sale of the Gift Program. Accepting these allegations as true for the purposes of the s. 5(1)(a) test, Appleby as a creator of the Gift Program arguably owed a duty of care to a prospective donor to ensure that the program would work and that the donor would receive a valid charitable donation receipt in return for his or her gift. I conclude that there is a properly pleaded cause of action against Appleby for negligence.

*(b) Negligent Misrepresentation*

178 A claim for negligent misrepresentation is made in para. 1(d) of the statement of claim against the ParkLane Defendants<sup>1</sup>, the Lawyers and the Gleesons.

179 In *Queen v. Cognos Inc.*, [1993] 1 S.C.R. 87 (S.C.C.), the Supreme Court of Canada set out the requirements of the tort of negligent misrepresentation:

- (a) there must be a duty of care based on a "special relationship" between the representor and the representee;
- (b) the representation in question must be untrue, inaccurate, or misleading;
- (c) the representor must have acted negligently in making the representation;
- (d) the representee must have relied, in a reasonable manner, on the negligent misrepresentation; and
- (e) the reliance must have been detrimental to the representee in the sense that damages resulted.

180 Misrepresentation must be pleaded with particularity. The pleading must set out, with "careful particularity": (a) the alleged representation; (b) when, where, how and by whom it was made; (c) its falsity; (d) the inducement; (e) the intention that the plaintiff should rely on it; (f) the alteration by the plaintiff of his or her position relying on the misrepresentation; and (g)

the resulting loss or damage to the plaintiff: see *Lysko v. Braley* (2006), 79 O.R. (3d) 721, [2006] O.J. No. 1137 (Ont. C.A.), at para. 30 (C.A.).

181 As I have noted, in attempting to dance around the difficulties associated with certifying a class action based on negligent misrepresentation, the statement of claim has bundled together allegations of both negligence and negligent misrepresentation under the single heading of "Negligence". The pleading of negligent misrepresentation is lacking in "careful particularity", but, read generously, it does include allegations that the defendants, other than the FFC Directors:

- owed a duty of care to the Class;
- negligently created the Gift Program promotional materials;
- knew or ought to have known that Class members would be relying on the accuracy of those materials;
- knew or ought to have known that the materials were inaccurate;
- failed to take steps to correct the inaccuracy;
- failed to explain that the cash and in kind donations were granted to the charities conditionally and on terms limiting their use;
- failed to disclose to Class members that there was no charitable intent to the Gift Program and that the primary purpose was to financially benefit the defendants; and
- that Class members relied on the representations contained in the promotional materials to their detriment.

182 The plaintiff says in his factum that "[T]he facts alleged in the Claim that support the claim for negligent misrepresentation are included, above, in the facts that support the claim in negligence, *simpliciter*." He says that the defendants created promotional materials that contained material misstatements and omissions when they knew or ought reasonably to have known that the Class members would rely on these misrepresentations to their detriment, which in fact occurred.

183 Reading the pleading generously, as I must, with due allowance for drafting deficiencies, including the lack of particulars, I find that the plaintiff has adequately pleaded a cause of action for negligent misrepresentation against the defendants identified above.

*(c) Fraud and Fraudulent Misrepresentation*

184 The plaintiff pleads that the Gift Program was an elaborate fraud, planned and created by the ParkLane Defendants, Appleby and the Gleasons for the purpose of profiting themselves by approximately \$100 million at the expense of Class members. He also pleads that these defendants fraudulently misrepresented to the Class that they would receive tax benefits, which they knew or ought to have known would not occur, and that the Class members relied on these representations. He alleges that the defendants knew, or were reckless or willfully blind to, the fact that the representations in the promotional materials were untrue.

185 ParkLane does not contest that there is an adequately pleaded cause of action for fraudulent misrepresentation. It submits, however, that the claims in fraud are, in substance, claims for fraudulent misrepresentation and disclose no separate cause of action. The other defendants make similar submissions and also assert that the plaintiff has failed to provide sufficient particulars of the alleged fraud.

186 A pleading of fraudulent misrepresentation (also referred to as deceit) requires that there be: (a) a false representation of fact; (b) made with knowledge of its falsehood or recklessly, without belief in its truth; (c) with the intention that it should be acted upon by the plaintiff; and (d) that actually induces the plaintiff to act on it to his or her detriment: *Parna v. G. & S.*

*Properties Ltd.* (1970), [1971] S.C.R. 306, 15 D.L.R. (3d) 336 (S.C.C.); *McKenna v. Gammon Gold Inc.*, above, aff'd on this issue on motion for leave to appeal, 2010 ONSC 4068 (Ont. Div. Ct.) at para. 20.

187 Fraud is the deprivation of another's property by dishonest means. While many of the classic definitions of fraud have a component of false representation (see *Parna v. G. & S. Properties Ltd.*, above, at S.C.R. 316) or deceit (see *London & Globe Finance Corp., Re*, [1903] 1 Ch. 728 (Eng. Ch. Div.), [1900-3] All E.R. Rep. 891, 88 L.T. 194, 10 Mans. 198 at 732-33 [cited to Ch.]), other cases have held that these definitions are not exhaustive and fraud can simply mean the dishonest deprivation of someone else's property. For example, in *Scott v. Metropolitan Police Commissioner*, [1974] 3 All E.R. 1032, [1975] A.C. 819, 60 Cr. App. R. 124 (U.K. H.L.), 181 Sol. Jo. 863 [cited to All E.R.], Viscount Dilhorne held at p. 1038:

The definition of "defraud" in the *London and Globe Finance case* is not exhaustive and the word ordinarily means: "... to deprive a person dishonestly of something which is his or of something to which he is or would or might but for the perpetration of the fraud, be entitled."

188 This is consistent with the definition of the criminal offence of fraud set out in s. 380 of the *Criminal Code*, R.S.C. 1985, c. C-46:

Every one who, by deceit, falsehood or other fraudulent means, whether or not it is a false pretence within the meaning of this Act, defrauds the public or any person, whether ascertained or not, of any property, money or valuable security ... [is guilty of an offence].

[emphasis added].

189 In *Harland v. Fancsali* (1993), 13 O.R. (3d) 103, [1993] O.J. No. 961 (Ont. Gen. Div.), at paras. 15-17, Ferguson J. pointed out that fraud is broader than deceit and there is no need to prove a false representation:

Many of the texts and cases are not very clear about the relationship and differences between a civil claim based on fraud and one based on deceit. It would appear that a remedy for fraud was originally only available in equity but that in current theory it would be more helpful to simply consider it as a category of liability based on unjust enrichment (Klar, *Remedies in Tort*, vol. 1 (Toronto: Carswell, 1987), at pp. 5-11; Klippert, *Unjust Enrichment* (Toronto: Butterworths, 1983), pp. 280-82) (where the defendant has benefited at the expense of the plaintiff) or, more generally, as simply a tort for which the court will grant a remedy to restore the plaintiff to his original position or compensate him for any loss caused.

As a theory of liability, fraud is much broader in scope than deceit. There is no need to prove a false representation. Indeed, the courts have recognized that it is difficult, if not impossible, to define fraud because it is capable of being committed in endless forms and new forms continually arise: see Klar, *Remedies in Tort*, supra, pp. 511-12.

Justice Montgomery reviewed the definitions of fraud in *Ontex Resources Ltd. v. Metalore Resources Ltd.* (1990), 75 O.R. (2d) 513 (Gen. Div.). Perhaps the most general definition he quoted was that "defraud" means to deprive a person dishonestly of something which is his or of something to which he is or would or might, but for the perpetration of the fraud, be entitled.

190 Fraud, in its widest sense, may include a component of deceit or misrepresentation, but it need not necessarily do so.

191 In this case, the pleading of fraud refers not only to the alleged fraudulent misrepresentation (which was in essence, "you will receive a valid charitable receipt much greater than your cash contribution"), but also to the allegation that the defendants constructed and participated in a dishonest scheme to siphon the plaintiff's charitable donations out of the charities and into their own pockets. The allegations in the statement of claim, read generously, are broad enough to include fraud by deceit and fraud by other dishonest acts.

192 I agree with the submission of counsel for the plaintiff that some of the defendants could be found liable for having committed a fraud, without necessarily having made fraudulent misrepresentations, and other defendants could be liable for both fraud and fraudulent misrepresentation.

193 I therefore conclude that there are sufficient pleadings of fraud and fraudulent misrepresentation against the defendants identified above. The role of each defendant in the alleged fraud is sufficiently spelled out in the pleading to make it clear what acts made up the fraud.

(d) *Conspiracy*

194 The plaintiff pleads that all the defendants, other than the Lawyers, the FFC Foundation and the FFC Directors, engaged in a conspiracy to cause harm to the plaintiff and the Class. He also says that they agreed to act unlawfully, the predominant purpose of which was to cause injury to the plaintiff and the Class and that they did in fact cause injury. Alternatively, the plaintiff says that the defendants entered into an agreement to engage in unlawful conduct directed towards the Class, which they knew or ought to have known would cause injury, and which in fact caused injury to the Class by the loss of their donations. The allegations of conspiracy, and the particulars, are set out in paras. 95 to 106 of the statement of claim.

195 A pleading of conspiracy must include the following particulars:

- (a) the parties and their relationship;
- (b) an agreement to conspire;
- (c) the precise purpose or objects of the alleged conspiracy;
- (d) the overt acts that are alleged to have been done by each of the conspirators; and
- (e) the injury and particulars of the special damages suffered by reason of the conspiracy.

See *2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp.* (2008), 89 O.R. (3d) 252, [2008] O.J. No. 833 (Ont. S.C.J.), at para. 90, rev'd on other grounds (2009), 96 O.R. (3d) 252, [2009] O.J. No. 1874 (Ont. Div. Ct.); *Normart Management Ltd. v. West Hill Redevelopment Co.* (1998), 37 O.R. (3d) 97, [1998] O.J. No. 391 (Ont. C.A.); *D.G. Jewelry Inc. v. Cyberdiam Canada Ltd.*, [2002] O.J. No. 1465 (Ont. S.C.J.); *Cineplex Corp. v. Viking Rideau Corp.* (1985), 28 B.L.R. 212, [1985] O.J. No. 304 (Ont. H.C.).

196 There are two different ways that the tort of conspiracy may be established:

- (a) by proof of "simple motive conspiracy," e.g. that the defendants had a purpose of injuring the plaintiff; or
- (b) by proof of "unlawful conduct conspiracy" or "unlawful means conspiracy" - that the defendants were engaging in unlawful conduct that they knew or ought to have known would injure the plaintiff.

197 In *Harris v. GlaxoSmithKline Inc.* (2010), 101 O.R. (3d) 665, [2010] O.J. No. 1710 (Ont. S.C.J.), Perell J. identified the elements of the tort of conspiracy and the two different ways in which a conspiracy may be committed, and therefore pleaded, at para. 74:

In Canada, the tort of conspiracy can be committed in two discrete ways that may arise on the same set of facts; namely, (1) by two or more persons using some means (lawful or unlawful) for the predominate purpose of injuring the plaintiff; and (2) by two or more persons using unlawful means with knowledge that their acts were aimed at the plaintiff and knowing or constructively knowing that their acts would result in injury to the plaintiff. The other elements of the tort of conspiracy are: (a) an agreement to injure between two or more persons; (b) acts in furtherance of the agreement to injure; and (c) the plaintiff suffering damages as a result of the defendants' conduct.

198 Perell J. referred to the leading Canadian case of *Canada Cement Lafarge Ltd. v. British Columbia Lightweight Aggregate Ltd.*, [1983] 1 S.C.R. 452 (S.C.C.), in which the Supreme Court of Canada defined the tort of conspiracy as follows, at para. 33-34:

...[T]he law of torts does recognize a claim against [Defendants] in combination as the tort of conspiracy if:

- (1) whether the means used by the Defendants are lawful or unlawful, the predominant purpose of the Defendants' conduct is to cause injury to the Plaintiff; or
- (2) where the conduct of the Defendants is unlawful, the conduct is directed towards the Plaintiff (alone or together with others), and the Defendants should know in the circumstances that injury to the Plaintiff is likely to and does result.

In situation (2) it is not necessary that the predominant purpose of the Defendants' conduct be to cause injury to the Plaintiff but, in the prevailing circumstances, it must be a constructive intent derived from the fact that the Defendants should have known that injury to the Plaintiff would ensue. In both situations, however, there must be actual damage suffered by the Plaintiff.

199 In *Agribrands Purina Canada Inc. v. Kasamekas*, [2011] O.J. No. 2786, 2011 ONCA 460 (Ont. C.A.), the Court of Appeal identified the following elements of the tort of unlawful conduct conspiracy:

- (a) they act in combination, that is, in concert, by agreement or with a common design;
- (b) their conduct is unlawful;
- (c) their conduct is directed towards the respondents;
- (d) the appellants should know that, in the circumstances, injury to the respondents is likely to result; and
- (e) their conduct causes injury to the respondents.

200 The Court of Appeal confirmed that the "unlawful conduct" component of this form of conspiracy may include conduct that is "wrong in law", but not necessarily actionable in private law. This could include, for example, breach of a criminal statute or breach of a statute that does not confer a civil cause of action. The Court of Appeal stated, at paras. 37-38:

It is clear from that jurisprudence that quasi-criminal conduct, when undertaken in concert, is sufficient to constitute unlawful conduct for the purposes of the conspiracy tort, even though that conduct is not actionable in a private law sense by a third party. The seminal case of *Canada Cement Lafarge* is an example. So too is conduct that is in breach of the *Criminal Code*. These examples of "unlawful conduct" are not actionable in themselves, but they have been held to constitute conduct that is wrongful in law and therefore sufficient to be considered "unlawful conduct" within the meaning of civil conspiracy. There are also many examples of conduct found to be unlawful for the purposes of this tort simply because the conduct is actionable as a matter of private law. In Peter T. Burns & Joost Blom, *Economic Interests in Canadian Tort Law* (Markham: LexisNexis, 2009), the authors say this at p. 167-168:

There are two distinct categories of conduct that can be described as comprising "unlawful means": conduct amounting to an independent tort or other actionable wrong, and conduct not actionable in itself.

...

Examples of conspiracies involving tortious conduct include inducing breach of contract, wrongful interference with contractual rights, nuisance, intimidation, and defamation. Of course, a breach of contract itself will support an action in civil conspiracy and, as one Australian court has held, the categories of "unlawful means" are not closed.

The second category of unlawful means is conduct comprising unlawful means not actionable in itself.

...

The first class of unlawful means not actionable in themselves, but which nevertheless supports a conspiracy action, is breach of a statute which does not grant a private right of action, the very instance rejected in *Lonrho* (1981) by the House of Lords. A common case is a breach of labour relations legislation, and another is the breach of a criminal statute such as the Canadian *Criminal Code*.

What is required, therefore, to meet the "unlawful conduct" element of the conspiracy tort is that the defendants engage, in concert, in acts that are wrong in law, whether actionable at private law or not. In the commercial world, even highly competitive activity, provided it is otherwise lawful, does not qualify as "unlawful conduct" for the purposes of this tort.

201 The plaintiff's pleading sets out a proper cause of action for unlawful conduct conspiracy. It is alleged that the ParkLane Defendants, "Trustee Gleeson", and the Gleesons:

- (a) acted by agreement;
- (b) to engage in unlawful conduct, namely the allegedly fraudulent Gift Program;
- (c) which was directed at Class members;
- (d) which they knew or ought to have known would cause injury to the Class;
- (e) and that injury did, in fact, result.

202 The primary objection made by the defendants is that the conspiracy claim adds nothing, is "merged" in the underlying torts, and should be struck - see Lord Denning M.R. in *Ward v. Lewis* (1954), [1955] 1 All E.R. 55 (Eng. C.A.), at 56:

It is important to remember that when a tort has been committed by two or more persons an allegation of a prior conspiracy to commit the tort means nothing. The prior agreement merges in tort.

See also *McKenna v. Gammon Gold Inc.* (Div. Ct.), above, at paras. 62-76; *Normart Management Ltd. v. West Hill Redevelopment Co.*, [1996] O.J. No. 3655 (Ont. Gen. Div.), aff'd [1998] O.J. No. 391 (Ont. C.A.).

203 Put another way, where the plaintiff complains that the defendants planned to do something and then did it, the pleading of conspiracy adds nothing: *Apple Bee Shirts Ltd. v. Lax* (1988), 27 C.P.C. (2d) 226 (Ont. H.C.).

204 Lord Denning amplified on the rationale of the merger principle in *Ward v. Lewis*, above, at p. 56:

The prior agreement merges in the tort. A party is not allowed to gain an added advantage by charging conspiracy when the agreement has become merged in the tort. It is sometimes sought, by charging conspiracy, to get an added advantage, for instance in proceedings for discovery, or by getting in evidence which would not be admissible in a straight action in tort, or to overcome substantive rules of law, such as here, the rules concerning republication of slanders. When the court sees attempts of that kind being made, it will discourage them by striking out the allegation of conspiracy on the simple ground that the conspiracy adds nothing when the tort has in fact been committed.

205 In para. 96 of the statement of claim, the plaintiff pleads that the defendants conspired to make fraudulent representations. There are pleadings in paragraphs 98 and 99 that the defendants agreed to participate in a "scheme" to acquire the Class member's money and, in para. 104, that the defendants conspired to commit a fraud. The plaintiff relies upon the same conduct for the claims for fraud and fraudulent misrepresentation.

206 The defendants say that in substance the pleading of conspiracy is that the defendants conspired to engage in a fraudulent scheme to separate the Class members from their money. The underlying facts supporting the conspiracy claim are the same facts that are pleaded in relation to the fraud and fraudulent misrepresentation claims.

207 The plaintiff relies upon *Hunt v. T & N plc*, [1990] 2 S.C.R. 959, [1990] S.C.J. No. 93 (S.C.C.), a leading case on the pleading of conspiracy, and on the "plain and obvious" test on a motion to strike a pleading as disclosing no cause of action. In that case, Wilson J. refused to give effect to an argument that the conspiracy claim had merged with the tort claim, concluding that the issue should be left to the trial judge to determine after considering all the evidence. She stated at paras. 53-55:

Finally, the defendants also submit that a cause of action in conspiracy is not available when a plaintiff has available another cause of action. Since the plaintiff has alleged in paragraph 20 of his statement of claim that the defendants engaged in various tortious acts, the defendants contend that it is not open to the plaintiff to proceed with his claim in conspiracy.

In my view, there are at least two problems with this submission. First, while it may be arguable that if one succeeds under a distinct nominate tort against an individual defendant, then an action in conspiracy should not be available against that defendant, it is far from clear that the mere fact that a plaintiff alleges that a defendant committed other torts is a bar to pleading the tort of conspiracy. It seems to me that one can only determine whether the plaintiff should be barred from recovery under the tort of conspiracy once one ascertains whether he has established that the defendant did in fact commit the other alleged torts. And while on a motion to strike we are required to assume that the facts as pleaded are true, I do not think that it is open to us to assume that the plaintiff will necessarily succeed in persuading the court that these facts establish the commission of the other alleged nominate torts. Thus, even if one were to accept the appellants' (defendants) submission that "upon proof of the commission of the tortious acts alleged" in paragraph 20 of the plaintiff's statement of claim "the conspiracy merges with the tort", one simply could not decide whether this "merger" had taken place without first deciding whether the plaintiff had proved that the other tortious acts had been committed.

This brings me to the second difficulty I have with the defendants' submission. It seems to me totally inappropriate on a motion to strike out a statement of claim to get into the question whether the plaintiff's allegations concerning other nominate torts will be successful. This a matter that should be considered at trial where evidence with respect to the other torts can be led and where a fully informed decision about the applicability of the tort of conspiracy can be made in light of that evidence and the submissions of counsel. If the plaintiff is successful with respect to the other nominate torts, then the trial judge can consider the defendants' arguments about the unavailability of the tort of conspiracy. If the plaintiff is unsuccessful with respect to the other nominate torts, then the trial judge can consider whether he might still succeed in conspiracy. Regardless of the outcome, it seems to me inappropriate at this stage in the proceedings to reach a conclusion about the validity of the defendants' claims about merger. I believe that this matter is also properly left for the consideration of the trial judge.

208 *Hunt v. T & N plc* was discussed recently by the Divisional Court in an appeal from a certification decision in *McKenna v. Gammon Gold Inc.*, [2011] O.J. No. 3240, 2011 ONSC 3782 (Ont. Div. Ct.), a case involving alleged misrepresentations affecting the price of the shares of a publicly-traded company. I had adjourned the motion for certification, pending the delivery by the representative plaintiff of particulars of the special damages allegedly sustained that were separate and distinct from the damages arising from the underlying tort. Leave to appeal on this issue was granted, as well as on an issue related to the conspiracy claim on behalf of purchasers in the secondary market. The Divisional Court (Herman and Swinton JJ., Wilton-Siegel J. concurring in the result) held that the plaintiff was not required to provide particulars as a precondition to certification of the conspiracy claim.

209 The Divisional Court reviewed a number of authorities on the issue, including *Hunt v. T & N plc*. It noted that in *Yordanes v. Bank of Nova Scotia*, [2006] O.J. No. 280 (Ont. S.C.J.), Cullity J., following *Hunt v. T & N plc*, had rejected the idea that a conspiracy plea would only be certified if the damages claimed relate to losses not covered by the damages claimed in respect of the other pleaded torts. In *Dean v. Mister Transmission (International) Ltd.* (2008), 66 C.P.C. (6th) 287, [2008] O.J. No. 4372 (Ont. S.C.J.), Gray J., following the decision of the Court of Appeal in *Smith v. National Money Mart Co.*, [2006] O.J. No. 1807 (Ont. C.A.), had also left this issue for trial.

210 On the other hand, in *Normart Management Ltd. v. West Hill Redevelopment Co.*, the Court of Appeal upheld a decision to strike a conspiracy claim on the basis that it would have no impact on the success or failure of the action. The Court of Appeal held, per Finlayson J.A.:

[T]his court must determine whether the allegations relating to the claim of conspiracy and the ensuing damages are substantially the same as those of the cause of action for breach of contract and fiduciary duty, such that the two causes of actions relate to the same underlying factual foundation and no significant differences between the two causes of actions emerge.

211 The Divisional Court in *McKenna v. Gammon Gold Inc.* concluded that these decisions could be reconciled by the application of the principle set out immediately above. It stated, at para. 62:

... at the pleadings stage of a conspiracy claim, the court's task is to determine whether the allegations relating to the claim of conspiracy and the ensuing damages are substantially the same as those pleaded in another cause of action such that the conspiracy claim adds nothing.

212 The Divisional Court put the test as follows, at para. 64:

The question the court needs to consider is whether it is plain and obvious that the conspiracy claim adds nothing to the other claims. Is it plain and obvious that if the [other cause(s) of action] claim does not succeed, the conspiracy claim cannot succeed; and if the [other cause of action] claim does succeed, is it plain and obvious that the conspiracy claim adds nothing further?

213 It will be helpful for the analysis to juxtapose this test with the observation of Wilson J. in *Hunt v. T & N plc* at para. 55 that:

If the plaintiff is successful with respect to the other nominate torts, then the trial judge can consider the defendants' arguments about the unavailability of the tort of conspiracy. If the plaintiff is unsuccessful with respect to the other nominate torts, then the trial judge can consider whether he might still succeed in conspiracy.

214 I take the test set out by the Divisional Court to require me to determine whether it is plain and obvious that if the other causes of action do not succeed, the conspiracy claim could also not succeed, or that if the other cause of action does succeed, the conspiracy claim could add nothing.

215 In applying that test, I am required to construe the pleading generously, having regard, among other things, to the plaintiff's lack of access to key documents and discovery information at the pleadings stage. This observation is particularly apt in a conspiracy pleading, where the conduct complained of is invariably outside the plaintiff's knowledge. Cumming J. commented on this very point in *North York Branson Hospital v. Praxair Canada Inc.*, [1998] O.J. No. 5993, 84 C.P.R. (3d) 12 (Ont. Gen. Div.), at para. 22:

In truth, the very nature of a claim of conspiracy is that the tort resists detailed particularisation at early stages. The relevant evidence will likely be in the hands and minds of the alleged conspirators. Part of the character of a conspiracy is its secrecy and the withholding of information from alleged victims. The existence of an underlying agreement bringing the conspirators together, proof of which is a requirement borne by a plaintiff, often must be proven by indirect or circumstantial evidence. A conspiracy is more likely to be proven by evidence of overt acts and statements by the conspirators from which the prior agreement can be logically inferred. Such details would not usually be available to a plaintiff until discoveries. These considerations and the general theme of Hunt, instructing courts not to shy away from difficult litigation, also militate against holding pleadings in civil conspiracy cases to an extraordinary standard.

216 This is a case in which several causes of action are asserted against five sets of defendants. The allegations of conspiracy in the pleading are general and it is impossible to speculate what constellation of facts or combination of facts may ultimately be proven at trial and what underlying causes of action may ultimately be established against which defendants. It is possible, for example, that the unlawful conduct of the defendants might be sufficient to support the underlying cause of action, such as

misrepresentation, fraud, or breach of the *Consumer Protection Act, 2002*, but that the cause of action itself might fail for any number of reasons, leaving the cause of action for conspiracy still standing.

217 I am unable to say that it is plain and obvious that if none of the several causes of action succeeds, the conspiracy claim could not succeed, or, that if one of those claims does succeed, the conspiracy claim would add nothing.

218 I prefer, therefore, in this complex and multi-party action, to adopt the course suggested by Wilson J. in *Hunt v. Carey Canada* and to leave it to the trial judge to determine, after all the evidence is in, whether conspiracy and any of the other causes of action have been made out and, if so, whether the conspiracy claim adds anything.

219 Ms. Gleeson submits that there is no cause of action against her for conspiracy, in her capacity as an officer of GMA, for her actions on behalf of the corporation.

220 In *Normart Management Ltd. v. West Hill Redevelopment Co.*, above, the Court of Appeal observed, at para. 18:

It is well established that the directing minds of corporations cannot be held civilly liable for the actions of the corporations they control and direct unless there is some conduct on the part of those directing minds that is either tortious in itself or exhibits a separate identity or interest from that of the corporations such as to make the acts or conduct complained of those of the directing minds: see *Scotia McLeod Inc. v. Peoples Jewellers Ltd.* (1995), 26 O.R. (3d) 481 at 491 (C.A.).

See also: *Craik v. Aetna Life Insurance Co. of Canada*, [1995] O.J. No. 3286 (Ont. Gen. Div.) at para. 23, aff'd. [1996] O.J. No. 2377 (Ont. C.A.); *Accord Business Credit Inc. v. Bank of Nova Scotia*, [1997] O.J. No. 2562 (Ont. Gen. Div.) at para. 34.

221 In *Normart*, however, the Court of Appeal noted that there was no factual basis for the allegation that the individual directors were acting outside their corporate capacities. In the case before me, there are allegations that the Gleesons were acting in their own personal capacities, with a view to their own enrichment. That is sufficient to make out a cause of action in their personal capacities.

222 As I will explain when I discuss the breach of contract claim against Gleeson, there is no cause of action against Gleeson, referred to as "Trustee Gleeson", in his capacity as Trustee of the Donations Canada Trust, as he is no longer a trustee of that trust. The cause of action against him for conspiracy, in his personal capacity as opposed to his capacity as a trustee, will be certified.

223 In summary, a cause of action in conspiracy will be certified against the ParkLane Defendants, Appleby and the Gleesons.

*(e) Breach of Consumer Protection Legislation*

224 The plaintiff pleads that the Gift Program was a "consumer transaction" and as such, was governed by the *Consumer Protection Act, 2002* and comparable legislation in other provinces. The claim under the statute is asserted against all defendants other than Appleby and the Lawyers.

225 There are broad pleadings that:

- the ParkLane Defendants and the Gleesons marketed and sold the Gift Program to the Class;
- these defendants made misrepresentations to the Class concerning the Gift Program; and
- these defendants had a duty to comply with the *Consumer Protection Act, 2002*, and failed to do so.

226 The plaintiff alleges that these defendants engaged in unfair practices prohibited by s. 17(1) of the *Consumer Protection Act, 2002*, by making false, misleading or deceptive representations and unconscionable representations concerning the Gift Program, giving rise to a remedy in rescission or damages under s. 18.

227 The *Consumer Protection Act, 2002* applies to "consumer transactions" if the "consumer" or the person engaging in the transaction with the consumer is located in Ontario when the transaction takes place (s. 2(1)). A "consumer" is defined

as "an individual acting for personal, family or household purposes and does not include a person who is acting for business purposes" and a "consumer transaction", means "any act or instance of conducting business or other dealings with a consumer, including a consumer agreement" (s. 1).

228 The substantive and procedural rights conferred by the statute apply despite any agreement or waiver to the contrary (s. 7(1)).

229 The statute prohibits, among other things, an "unfair practice" (s. 17(1)). This includes making a "false, misleading or deceptive representation", defined by s. 14(1) to include a variety of statements, including:

1. A representation that the goods or services have sponsorship, approval, performance characteristics, accessories, uses, ingredients, benefits or qualities they do not have.

...

6. A representation that the goods or services are available for a reason that does not exist.

...

8. A representation that the goods or services or any part of them are available or can be delivered or performed when the person making the representation knows or ought to know they are not available or cannot be delivered or performed.

...

13. A representation that the transaction involves or does not involve rights, remedies or obligations if the representation is false, misleading or deceptive.

14. A representation using exaggeration, innuendo or ambiguity as to a material fact or failing to state a material fact if such use or failure deceives or tends to deceive.

230 It is also an unfair practice, and therefore prohibited, to make an "unconscionable representation" (s. 15(1)). Section 15(2) provides:

Without limiting the generality of what may be taken into account in determining whether a representation is unconscionable, there may be taken into account that the person making the representation or the person's employer or principal knows or ought to know,

...

(c) that the consumer is unable to receive a substantial benefit from the subject-matter of the representation;

...

(e) that the consumer transaction is excessively one-sided in favour of someone other than the consumer;

(f) that the terms of the consumer transaction are so adverse to the consumer as to be inequitable;

(g) that a statement of opinion is misleading and the consumer is likely to rely on it to his or her detriment; or

...

231 An unfair practice gives rise to a remedy in rescission under s. 18(1) or where rescission is not possible, damages, including exemplary or punitive damages, under s. 18(2).

232 To qualify for rescission or damages, section 18(3) requires that notice of rescission or recovery of damages must be given within one year. However, the Court has jurisdiction under s. 18(15) to waive this requirement if it is in the interests of justice to do so.

233 Cannon's argument on this cause of action is, in summary, as follows:

- (a) he and Class members fall within the definition of "consumer" in the *Consumer Protection Act, 2002*, because they are "an individual acting for personal, family or household purposes ... s. 1;
- (b) a "consumer transaction", is "any act or instance of conducting business or other dealings with a consumer, including a consumer agreement": s. 1;
- (c) a "consumer agreement" means an agreement between a supplier and a consumer in which the supplier agrees to supply goods or services for payment": s.1;
- (d) a "consumer transaction" is necessarily broader than a "consumer agreement" and can include agreements that are for something other than the supply of goods or services;
- (e) the general "anti-avoidance" section of the statute provides that, in determining whether the statute applies to an "entity or transaction", the court is required to "consider the real substance of the entity or transaction and in so doing may disregard the outward form": s. 3;
- (f) the defendants engaged in conduct that was an unfair practice and also engaged in making unconscionable representations;
- (g) the *Consumer Protection Act, 2002* applies to "all consumer transactions if the consumer or the person engaging in the transaction with the consumer is located in Ontario when the transaction takes place.": s.2; and
- (h) since all the Defendants against whom the Plaintiff claims this relief are located in Ontario, except for TTL, the *Consumer Protection Act, 2002* will apply to all Class members' claims against all these Defendants, except TTL. The *Consumer Protection Act, 2002* will apply in respect of the claims of Ontario Class members as against TTL, as well. Only the consumer protection claims asserted against TTL on behalf of Class members located in other provinces will require reference to the legislation in the other provinces.

234 The plaintiff states no authority or precedent for the proposition that a claim such as this, which involves no sale of goods or provision of services, falls within the *Consumer Protection Act, 2002*. Nor is he required to do so. The novelty of the cause of action is not a factor in the application of the s. 5(1)(a) test: *Khanna v. Royal College of Dental Surgeons (Ontario)* (2000), 47 O.R. (3d) 95, [2000] O.J. No. 946 (Ont. C.A.); *Hunt v. T & N plc*, above at S.C.R. p. 980:

235 The ParkLane Defendants, FFC Foundation and the Gleesons have advanced some cogent arguments in support of the proposition that the plaintiff has no cause of action under the *Consumer Protection Act, 2002*. In summary, these arguments are:

- (a) in substance, Cannon's donation to the program was a "gift" - it had to be a gift, with the requisite donative intent, in order to qualify for a tax credit - and the *Consumer Protection Act, 2002* is plainly not intended to apply to gifts;
- (b) Cannon was not entering into an agreement requiring the payment by a "consumer" to a "supplier" in exchange for the supply of "goods" or "services";
- (c) a "consumer transaction" is generally associated with the exchange of goods and services and a "consumer" is defined in the *Canadian Oxford Dictionary* as "(i) a person who consumes, esp. one who uses a product and (ii) a purchaser of goods and services" - the ordinary grammatical reading of the statute is inconsistent with its application to charitable donations; and

(d) the overall scheme of the *Consumer Protection Act, 2002* is intended to regulate ordinary consumer agreements for the supply of goods and services, as well as specific sectors of the consumer market, such as internet agreements (sections 37-40), repair services for motor vehicles and goods (sections 55-65), credit agreements (sections 66-76) and leases (sections 86-90) - the fact that charitable giving is not included in the regulated transactions suggests that the statute was intended to regulate only ordinary and well-understood forms of consumer agreements.

236 There are some equally compelling answers to the defendants' submissions. First, the *Consumer Protection Act, 2002* is, as its name suggests, designed for the protection of the public - it is remedial legislation and should be liberally construed in order to give effect to its objects: *Weller v. Reliance Home Comfort Ltd. Partnership*, 2011 ONSC 3148, [2011] O.J. No. 2344 (Ont. S.C.J.) at para. 38.

237 Second, it is relatively new legislation and the Court should be reluctant to define its scope on a pleadings motion. Horkins J. made the observation recently in *Wright v. United Parcel Systems Ltd.*, 2011 ONSC 5044, [2011] O.J. No. 3936 (Ont. S.C.J.) at para. 134:

For most of the *Consumer Protection Act* causes of action, the jurisprudence is either unsettled or non-existent. As a result, it is important to respect the principle that matters of law not fully settled in the jurisprudence be permitted to proceed.

238 Third, s. 3 of the statute requires the Court to consider the substance and not the form of the transaction. While the form of Cannon's contribution to the Gift Program was a "gift", there is certainly an argument, which was advanced by C.R.A., that the substance of his contribution was not a gift, because he lacked the necessary donative intent. That is an issue of fact that will require an evidentiary record. It is also arguable that in providing an elaborate structure that would ramp up Cannon's donation by a multiple of four, the defendants were in fact providing a "service" or that, at the very least, the arrangement was a "consumer transaction" within the scope of the statute.

239 Fourth, while the ordinary dictionary definitions of "consumer" or "consumer transaction" are more limited, the statute contains its own definitions which expand the ordinary meaning of these terms. Cannon is arguably a "consumer" within the meaning of the statute because he was "acting for personal ... purposes" and the defendants were arguably engaged in a "consumer transaction", because they were "conducting business" or had "other dealings" with Cannon.

240 Fifth, it may not be stretching the scope of the language to say that, in substance, the Gift Program was selling a financial product or service, other than a product or service covered by the exceptions outlined in s. 2(2), below. ParkLane's own literature referred to the Gift Program as part of its "suite of products".

241 Sixth, the broad scope of the statute is illustrated by the exceptions set out in s. 2(2), which include:

- (a) consumer transactions regulated under the *Securities Act*, R.S.O. 1990, c. S.5;
- (b) financial services related to investment products or income securities;
- (c) financial products or services regulated under the *Insurance Act*, the *Credit Unions and Caisses Populaires Act, 1994*, the *Loan and Trust Corporations Act* or the *Mortgage Brokerages, Lenders and Administrators Act, 2006*;
- (d) consumer transactions regulated under the *Commodity Futures Act*;
- (e) prescribed professional services that are regulated under a statute of Ontario;
- (f) consumer transactions for the purchase, sale or lease of real property, except transactions with respect to time share agreements as defined in section 20; and
- (g) consumer transactions regulated under the *Residential Tenancies Act*.

242 Many of these exceptions, such as transactions in securities, investment products, financial products and commodity futures, would not normally be thought of as dealings in "goods and services" or as "consumer transactions". The fact that they have been specifically excluded from the scope of the *Consumer Protection Act, 2002*, suggests that other financial products or plans, such as a charitable donation program with enhanced tax benefits, might well be covered by the statute.

243 While an ordinary charitable donation would be highly unlikely to fall within the *Consumer Protection Act, 2002*, the Gift Program itself was far from ordinary. Bearing in mind the liberal test under s. 5(1)(a) of the *C.P.A.*, the caution that the novelty of the cause of action is not a bar, and the importance of allowing unsettled questions to be determined on a full record, it would be wrong, in my view, to resolve this issue at this stage.

244 I therefore find that the plaintiff has pleaded a tenable cause of action under the *Consumer Protection Act, 2002* against the defendants identified above. All those defendants, other than TTL, are located in Ontario and are therefore subject to the application of the statute. The statute will apply to TTL insofar as the claims of Ontario Class members are concerned. The liability, if any, of TTL in relation to Class members outside Ontario will fall to be determined under the consumer protection legislation of the particular province in which the class member resides. If necessary, this can be determined as a sub-issue.

245 Insofar as Appleby and the Bermuda Trust are concerned, I have previously ruled that there is no evidence of a contractual relationship between Cannon and Appleby to support service of the statement of claim under the *Consumer Protection Act, 2002* out of the jurisdiction on Appleby in Bermuda: see *Cannon v. Funds for Canada Foundation*, [2010] O.J. No. 3486, 2010 ONSC 4517 (Ont. S.C.J.).

*(f) Breach of Contract*

246 The plaintiff asserts a claim against ParkLane "and the Donations Canada Trustees" for breach of contract, rescission, and return of monies paid under the Gift Program. The pleading alleges that there was a contract between the plaintiff and ParkLane and the Donations Canada Trustees and that ParkLane and the trustees breached the contract, causing damages to the plaintiff and Class members. It further alleges that the terms of the contract between the plaintiff and ParkLane and the Donations Canada Trustees were set out in the promotional materials. The terms included, among other things, that in exchange for the donor's cash donation, he or she would receive a charitable receipt that would be accepted by C.R.A. as a valid and legitimate claim for charitable donation tax credits.

247 The pleading continues that there was a fundamental and material breach of the terms of their contracts by ParkLane and the Donations Canada Trustees, that the Gift Program was a fraud and that virtually none of the Class Members' donations were gifted to charities and the Class members did not receive valid receipts recognized by C.R.A.

248 The plaintiff claims rescission of the contract and return of all monies paid under the Gift Program.

249 In *Banyan Tree*, the plaintiffs had made a similar pleading to the effect that it was an express or implied term of the contract between participants and the gift program that participants would receive a charitable tax receipt that would be recognized by C.R.A. In that case, the gift program defendants did not oppose certification of that cause of action.

250 ParkLane does not contest the cause of action for breach of contract. It does, however, take issue with the proposition that the claim gives rise to common issues, a subject I will discuss below.

251 As noted earlier, and as pleaded, Gleeson was the original trustee of the Donations Canada Trust and the pleading asserts that Sarah Stanbridge became the trustee in 2006. She continued in that role until the action was dismissed against her on June 27, 2011, as a result of a settlement with the plaintiff, whereby she agreed to produce all documents in her possession or control relating to the Donations Canada Trust.

252 I agree with the submission on behalf of Gleeson that the only possible breach of contract claim against him would be in his capacity as a trustee of the Donations Canada Trust, a position that he no longer holds and that, on the face of the pleading, he ceased to hold in 2006.

253 In an earlier decision in this proceeding, relating to the Bermuda Trust, *Cannon v. Funds for Canada Foundation*, [2010] O.J. No. 3486, 2010 ONSC 4517 (Ont. S.C.J.), I noted at para. 65 that a trust does not have an independent legal status. It operates through its trustees and it is held accountable through its trustees - referring to *Foo v. Yakimetz*, [2002] O.J. No. 3958 (Ont. S.C.J.) at para. 72; *Kingsdale Securities Co. v. Minister of National Revenue*, [1974] 2 F.C. 760, [1974] F.C.J. No. 182 (Fed. C.A.).

254 In this case, the substance of the pleading is that the plaintiff and the Class members entered into a contract with Donations Canada Trust through its trustees. A breach of contract claim can only be asserted by suing the trust through its current trustees. Gleeson was not a trustee at the time the proceeding was commenced. There is no claim against him in his personal capacity in relation to his activities as trustee and there is no claim that he acted outside his duties. For this reason, any pleading against Gleeson in his capacity as trustee of the Donations Canada Trust should be struck.

(g) *Unjust Enrichment*

255 Cannon's pleading, under the heading "Restitution, Unjust Enrichment, Waiver of Tort, Constructive Trust", is a hodgepodge of allegations against "the Defendants, or some of them". It mixes causes of action and remedies to assert an entitlement to "damages on the basis of unjust enrichment and constructive trust." I remind myself, however, that I am required to read the pleading generously and with due allowance for drafting deficiencies.

256 The plaintiff claims that the actions of the defendants, other than the Lawyers and the FFC Directors, were intended to induce the plaintiff and Class members to invest in the Gift Program and that those defendants have received some or all of the money paid by the Class to the Gift Program. It is alleged that the Gift Program was a fraud, that the Class members have suffered a deprivation and that there has been enrichment of the defendants without juristic reason. The plaintiff pleads waiver of tort and seeks an order for restitution or a declaration that the defendants hold the proceeds on constructive trust.

257 The Supreme Court of Canada set out the essential elements to establish a claim for unjust enrichment in *Garland v. Consumers' Gas Co.*, [2004] 1 S.C.R. 629, [2004] S.C.J. No. 21 (S.C.C.), at para. 30. The plaintiff must show that:

- (a) the defendant was enriched;
- (b) there was a corresponding deprivation to the plaintiff; and
- (c) there was no juristic reason for the enrichment.

258 The ParkLane Defendants do not challenge the pleading of a cause of action for unjust enrichment. For reasons discussed later, however, they take the position that the common issues based on unjust enrichment are not appropriate for certification.

259 Claims for unjust enrichment against FFC Foundation and the Gleesons have been lumped together with claims against the ParkLane Defendants. There is also a claim against Appleby as trustee of the Bermuda Trust. There is no pleading of unjust enrichment against the FFC Directors.

260 These defendants argue that the plaintiff's claim for unjust enrichment must fail, because, as pleaded, any enrichment they received was indirect and ancillary, rather than direct.

261 FFC Foundation argues that this is a case like *Boulanger v. Johnson & Johnson Corp.* (2003), 174 O.A.C. 44, [2003] O.J. No. 2218 (Ont. C.A.) or *Singer v. Schering-Plough Canada Inc.*, above, because there is no direct *nexus* between the alleged deprivation of the plaintiff and the alleged enrichment of FFC Foundation and Ms. Gleeson. It says that the re-assessment of Cannon by C.R.A. is not, in itself, indicative of a lack of juristic reason for the funds being retained by FFC Foundation.

262 Gleeson and GMA make similar submissions, although most of their submissions are based on factual assertions that are not relevant on a motion of this kind. They say that, at best, any benefit or enrichment they may have received was indirect

and ancillary and that, at best, the pleading alleges that at some point they received payments from FFC Foundation and other charities.

263 Appleby makes much the same point. Appleby says that the claim cannot succeed because any benefit to it was only *indirectly* conferred. It submits that for there to be a cause of action for unjust enrichment, the enrichment must be direct, relying on *Peel (Regional Municipality) v. Canada*, [1992] 3 S.C.R. 762, [1992] S.C.J. No. 101 (S.C.C.) at para. 58; *Boulanger v. Johnson & Johnson Corp.* (2003), 174 O.A.C. 44, [2003] O.J. No. 2218 (Ont. C.A.), at para. 20. See also *Singer v. Schering-Plough Canada Inc.*, above, at para. 111. It says that on the plaintiff's case as pleaded, the enrichment was indirect, because it is alleged that the plaintiff's funds went initially to ParkLane, then to the charity, then to TTL and finally, to Appleby. In the course of this route, the funds flowed through the charities, which are not even parties to the proceeding and against which the plaintiff makes no allegation of wrongdoing.

264 The requirement that the benefit to the defendant be "direct" is to ensure that the plaintiff does not recover twice - once from the party who received a direct benefit and again from those who received indirect, incidental or collateral benefits. This point was addressed by Chief Justice Lamer in *Peel (Regional Municipality) v. Canada*, at para. 58:

While not much discussed by common law authorities to date, it appears that a further feature which the benefit must possess if it is to support a claim for unjust enrichment, is that it be more than an incidental blow-by. A secondary collateral benefit will not suffice.

To permit recovery for incidental collateral benefits would be to admit of the possibility that a plaintiff could recover twice — once from the person who is the immediate beneficiary of the payment or benefit (the parents of the juveniles placed in group homes in this case), and again from the person who reaped an incidental benefit. ... It would also open the doors to claims against an undefined class of persons who, while not the recipients of the payment or work conferred by the plaintiff, indirectly benefit from it. This the courts have declined to do.

265 It was on this basis that claims for unjust enrichment were not permitted to proceed against manufacturers where the plaintiffs had purchased the product from retailers: *Boulanger v. Johnson & Johnson Corp.* (C.A.), above, at para. 20 and *Singer v. Schering-Plough Canada Inc.*, above.

266 This case is different. The core allegation in this case is that the defendants engaged in a course of conduct that was conspiratorial and fraudulent, that they intended to enrich themselves at the expense of the donors and that the elaborate structure of the Gift Program was contrived for that very purpose. The funds may have passed through various pockets before they got to any individual defendant, but that is all it was - a pass through. Reading the pleading generously, it cannot be said that the benefit to the defendants was an "incidental blow-by" or a "secondary collateral benefit", to use the words of Chief Justice Lamer in *Peel (Regional Municipality) v. Canada*.

267 The plaintiff pleads that the donors' money "travelled in a giant circle". Allegedly, some of it was retained by FFC Foundation, some was paid to ParkLane for fees, some was paid to the Gleesons, and some was paid to TTL, which in turn passed on most of what it received to Appleby for the Bermuda Trust.

268 Whether the benefit, if any, received by these defendants is sufficiently direct to give effect to a successful claim for unjust enrichment is an issue requiring proof at trial, but the pleading itself is sufficient.

269 Additionally, the allegation that FFC Foundation was enriched by its receipt of funds extracted from the Class due to the fraudulent conspiracy with the defendants is sufficient to meet the "absence of juristic reason" requirement.

270 Construing the pleading generously, again as I must, there is a pleading that the plaintiff suffered a deprivation, that there was an enrichment of Appleby in its capacity as trustee of the Bermuda Trust and that there was a fraud, which is the antithesis of a juristic reason.

271 As the ParkLane defendants have conceded that a cause of action of unjust enrichment is made out against them, I conclude that this pleading meets the test under s. 5(1)(a). The claims of unjust enrichment against the other defendants also meet s. 5(1)(a).

*(h) Summary Concerning cause of Action*

272 My conclusions concerning the cause of action requirement in section 5(1)(a) is that the plaintiff has pleaded the following causes of action against the defendants set out below:

- (a) Negligence: the ParkLane Defendants, Appleby, FFC Foundation, the Gleesons and the Lawyers;
- (b) Negligent Misrepresentation: the ParkLane Defendants, the Gleesons, and the Lawyers;
- (c) Fraud and Fraudulent Misrepresentation: the ParkLane Defendants, Appleby, and the Gleesons;
- (d) Conspiracy: the ParkLane Defendants, Appleby and the Gleesons;
- (e) *Consumer Protection Act, 2002*: the ParkLane Defendants, FFC Foundation, and the Gleesons;
- (f) Breach of Contract: ParkLane; and
- (g) Unjust enrichment and constructive trust: the ParkLane Defendants, FFC Foundation, the Gleesons, and Appleby.

273 The plaintiff has not pleaded a tenable cause of action against Gleeson in his capacity as a former trustee of the Donations Canada Trust and the action against him in that capacity will be dismissed.

274 The plaintiff has failed to plead a tenable cause of action against the FFC Directors and the claim against them will be dismissed.

275 To state the obvious, my conclusions on the cause of action requirement are not to be taken as conclusions on the merits of the plaintiff's cause of action against any defendants. Some of the defendants have made submissions going to the merits of the plaintiff's claims, raising numerous factual arguments to show why, in their view, the plaintiff's claims are bound to fail. That issue is not before me on the certification motion. I will deal with the specific motions for summary judgment of the ParkLane Defendants and the Lawyers later in these reasons.

**2. Identifiable Class**

276 Section 5(1)(b) of the *C.P.A.* requires that "there be an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant."

277 The Class is described above. It consists of residents of Canada who participated in the Gift Program during the period January 1, 2005 to December 31, 2009, the years in which it was offered. The identity of the Class members is readily ascertainable from the records of ParkLane.

278 The defendants do not dispute that there is an identifiable class. A class similar to this was certified by Justice Lax in *Banyan Tree*. I approve the Class definition.

**3. Common Issues**

279 Section 5(1)(c) of the *C.P.A.* requires that the claims of class members raise "common issues". These are defined in section 1 as:

- (a) common but not necessarily identical issues of fact, or

(b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts.

280 The plaintiff refers to the principles applicable to the common issues analysis, which I summarized in *McKenna v. Gammon Gold Inc.* at paras. 125 and 126. No party has taken issue with those principles, but there is considerable disagreement about how they should be applied in this case. I do not propose to re-state those principles, which are well-understood and oft-quoted. The first principle, however, bears repeating: The underlying foundation of a common issue is whether its resolution will avoid duplication of fact-finding or legal analysis. This principle derives from the judgment of Chief Justice McLachlin in the important case of *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534, [2000] S.C.J. No. 63 (S.C.C.), at paras. 39 and 40:

Commonality tests have been a source of confusion in the courts. The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be "common" only where its resolution is necessary to the resolution of each class member's claim. It is not essential that the class members be identically situated vis-à-vis the opposing party. Nor is it necessary that common issues predominate over non-common issues or that the resolution of the common issues would be determinative of each class member's claim. However, the class members' claims must share a substantial common ingredient to justify a class action. Determining whether the common issues justify a class action may require the court to examine the significance of the common issues in relation to individual issues. In doing so, the court should remember that it may not always be possible for a representative party to plead the claims of each class member with the same particularity as would be required in an individual suit.

... with regard to the common issues, success for one class member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent

281 The considerations mentioned in the second half of the first paragraph of this extract are properly factors to be considered in the preferability analysis under s. 5(1)(d). The Chief Justice's comment that the analysis should be approached purposively reminds us that the ability to engage in fact finding or legal analysis on a common basis drives the resolution of the claims of the class members and achieves both access to justice and judicial economy. If the issues put forward are simply not capable of resolution on a common basis, these goals cannot be achieved.

282 I would also emphasize the point that an issue will not be common if its resolution is dependent upon individual findings of fact that have to be made with respect to each individual claimant: *Fehringer v. Sun Media Corp.*, [2002] O.J. No. 4110, 27 C.P.C. (5th) 155 (Ont. S.C.J.), aff'd [2003] O.J. No. 3918, 39 C.P.C. (5th) 151 (Ont. Div. Ct.).

283 I turn to the common issues proposed by the plaintiff.

(a) *Did ParkLane and Matt Gleeson as Trustee of the Donations Canada Trust ("Trustee Gleeson") breach their contracts with the Class Members?*

284 I have found that there is no cause of action against Gleeson in his capacity as a former trustee of the Donations Canada Trust, but I have certified a cause of action against ParkLane for breach of contract.

285 The plaintiff claims that the contract for the Gift Program for the years 2005 to 2009 included substantially the same documents, all of which were executed by Class members when they participated in the program. The Tax Risk Disclosure Statement was not introduced until 2006.

286 ParkLane's submission on this issue is, essentially, that properly interpreted, the contract documents are clear and unambiguous and do not support Cannon's claims. It says that there is a disconnect between what Cannon says he was "promised" and what the contract actually says. As a result, ParkLane argues, that the breach of contract claim will ultimately have to be determined based on what Cannon, and every other Class member, understood about the contract and the individual

circumstances that lead him or her to that understanding. I disagree. The meaning of the contract will be determined objectively, not by what a party may have thought it means.

287 ParkLane relies upon *Bellaire v. Independent Order of Foresters*, [2004] O.J. No. 2242, 19 C.C.L.I. (4th) 35 (Ont. S.C.J.), in which Nordheimer J. declined to certify a breach of contract claim concerning the interpretation of an insurance policy because he found that the plaintiff's claim was fundamentally a "point of sale" misrepresentation case.

288 In effect, ParkLane's submission is really to interpret the contract and to say that the plaintiff's interpretation is so manifestly wrong that it cannot succeed, so there can be no common issue. This argument actually concedes that there is a common issue of contractual interpretation that is capable of providing an answer applicable to all donors.

289 I agree with the submission of the plaintiff that the issue is not who will ultimately win the breach of contract issue. The only issue is whether the proposed issue is common to the Class and whether its resolution will advance the proceeding. If ParkLane is correct in its interpretation, there will be a binding determination of the contractual rights of all Class members. If ParkLane is wrong, there will be an equally binding determination in favour of the entire Class.

290 In *Banyan Tree*, Lax J. certified common issues dealing with the existence of contract terms and whether the contract had been breached by the defendants.<sup>2</sup> She found that the gift program in that case was marketed in common to class members and sold by agents, many of whom were trained in a standard way and were given information that was prepared by the defendants and intended to be used to promote the program. She found that variations from year to year did not detract from the commonality. That is precisely the case here. There are common contractual materials and the Distributors were supplied with standardized information and training.

291 In this case, the plaintiff pleads that it was an express or implied term of the contract between the plaintiffs and Donations Canada Trust that the charitable tax receipts received by Class members "would be accepted by C.R.A. as valid and legitimate claims for charitable donation tax credits" and that Class members "would receive the tax savings as stated in the promotional materials and the contract."

292 In my view, the existence of such an implied term is an appropriate common issue. The case is not unlike *Hickey-Button v. Loyalist College of Applied Arts & Technology* (2006), 211 O.A.C. 301, [2006] O.J. No. 2393 (Ont. C.A.), at para. 47 and *Ramdath v. George Brown College of Applied Arts & Technology*, 2010 ONSC 2019, [2010] O.J. No. 1411 (Ont. S.C.J.), in which implied terms of a contract arising out of a university calendar were certified to be determined on a common basis.

293 To the extent there is an issue of an implied term, this case is similar to *Glover v. Toronto (City)*, [2009] O.J. No. 1523, 70 C.P.C. (6th) 303 (Ont. S.C.J.), in which there was an implied term to provide clean air, which would not depend on individual circumstances. The contract material, although varying slightly from year to year, was substantially the same in each year. To the extent there may be variations that might affect the answers, sub-issues can be developed.

*(b) Are the Class Members entitled to rescind their contracts with ParkLane and the Donations Canada Financial Trust?*

294 The plaintiff claims rescission, as an alternative to damages, on the grounds of fraud, total failure of consideration, and material misrepresentation inducing the contract. As I have found that the plaintiff has properly pleaded these causes of action, that these pleadings give rise to common issues of fact and law, it is appropriate to certify a common issue of whether Class members are entitled to the remedy of rescission if their claims are made out.

295 As I have found that the Donations Canada Trust is not properly before the Court, this common issue relates solely to ParkLane and is confined to the common law claim for rescission, as opposed to the claim under the *Consumer Protection Act, 2002*, which is addressed below.

*(c) Common Issues Relating to Negligence*

296 The plaintiff proposes the following common issues relating to negligence:

- (i) Did the Defendants owe the Class a duty of care?
- (ii) What is the applicable standard of care? Did the Defendants' acts and omissions breach the applicable standard of care?
- (iii) Was the gift program so poorly conceived that Harris and the other defendants, or some of them, should have determined that the Class were always unlikely to have received the stated tax benefits? Against those defendants against whom fraud is pled, was this failure to determine that the tax benefit would never be received the result of dishonesty and fraud?
- (iv) Was material information about the "back end" transaction missing from the Gift Program documents? If so, was the omission negligent or fraudulent?
- (v) Did the Gift Program documents fail to disclose other material information? Was the failure due to negligence? Was the failure due to fraud?

297 It seems to me that the second sentence in para. (iii) as well as paras. (iv) and (v) relate to fraud and fraudulent misrepresentation and are subsumed under those common issues.

298 I have found that there is a proper pleading of negligence against the ParkLane Defendants, Appleby, FFC Foundation and the Gleesons. In essence, the pleading against those defendants is that the Gift Program was negligently constructed and that the defendants failed to ensure that C.R.A. would recognize charitable receipts issued pursuant to the Gift Program. It also alleges that the defendants were negligent in continuing the Gift Program after they knew or ought to have known that it was defective.

299 I have also found that there is a properly pleaded cause of action in negligence against the Lawyers.

300 In *Banyan Tree*, Lax J. certified similar common issues relating to the existence of a duty of care and whether the duty of care had been breached.<sup>3</sup>

301 The essence of the defendants' objections relating to the negligence common issues is that the action is, at its core, about express misrepresentations and implicit misrepresentations by omission. The defendants say that liability cannot be established without determining what misrepresentations were made, whether those misrepresentations were material, whether there was reasonable reliance by the donor and whether that reliance caused each Class member's damages. Thus, they say, the issue of liability for negligence will require individual inquiries to determine each Class member's knowledge, motivations and sensitivity to risks.

302 The defendants focus, as they do throughout this motion, on the role played by the Distributors in the marketing of the Gift Program. ParkLane says that it had no direct dealings with Class members and that it was really the Distributors who were responsible for the "point of sale" representations to the donors. Thus, the defendants all say that each Class member's knowledge depends on the information about the Gift Program that he or she received from the Distributor and other financial advisors. In my view, those objections are not applicable to negligence common issues, but may be applicable to the negligent misrepresentation common issues.

303 In my view, the first three common issues above are appropriate. The question of breach of duty focuses on whether the Gift Plan was negligently designed. It can be examined by focusing on the structure of the Gift Program and the conduct of the defendants in putting the Program together. It does not require individual inquiries into the actions of particular Class members.

*(d) Are ParkLane, Trafalgar Associates, TTL, Appleby Services, the Donations Canada Trustees, GMA, Matt Gleeson and Ms. Gleeson (or any combination thereof) liable to the Class Members for conspiracy?*

304 I have set out above my conclusion that the plaintiff has pleaded a tenable cause of action for conspiracy. The elements of tort of unlawful conduct conspiracy focus on the conduct of the defendant. At the risk of repetition, as noted in *Agribrands*, the Court asks the following questions:

- (a) did the defendants act in concert, by agreement or with common design?
- (b) was their conduct unlawful?
- (c) was their conduct directed toward the plaintiff and the Class?
- (d) did the defendants know that injury to the plaintiff and the Class was likely to result?
- (e) did the conduct in fact cause injury to the plaintiff and the Class?

305 The first four requirements focus exclusively on the defendant's conduct and knowledge. Only the last requirement needs an examination of the effect of the defendant's conduct on the plaintiff and the Class. One could say that a conspiracy claim is ideally suited to class action treatment, because it focuses substantially on the conduct of the defendant.

306 It is not surprising, therefore, that common issues of conspiracy have been certified in a number of class proceedings - see, for example: *Smith v. National Money Mart Co.* (2007), 37 C.P.C. (6th) 171, [2007] O.J. No. 46 (Ont. S.C.J.); *Silver v. Imax Corp.*, above; *Irving Paper Ltd. v. Atofina Chemicals Inc.*, [2009] O.J. No. 4021 (Ont. S.C.J.); *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236, [2000] O.J. No. 4014 (Ont. C.A.); *Chadha v. Bayer Inc.* (2003), 63 O.R. (3d) 22, [2003] O.J. No. 27 (Ont. C.A.), leave to appeal to S.C.C. ref'd [2003] S.C.C.A. No. 106 (S.C.C.).

307 In this case, it is unlikely that individual inquiries will be required to determine injury to the Class, because the tax deductions claimed by all Class members have been treated in the same manner - all have been disallowed and all Class members have received no deduction in return for their donations.

308 The defendants argue that the conspiracy claim is not suitable for certification, because the unlawful conduct at issue is fraudulent misrepresentation, which necessitates individual findings of reliance, materiality, reasonableness and causation. They also say that conspiracy requires proof of causation and damages, neither of which can be determined on a common basis, because the Court would have to examine whether the defendants' fraudulent misrepresentation actually caused the plaintiff to take actions that resulted in damages.

309 I do not agree that the unlawful conduct must necessarily be the fraudulent misrepresentation. It could be fraud by other dishonest acts or a breach of the *Consumer Protection Act, 2002*. The answer to the common issue will focus on the conduct of the defendants, without a need for individual inquiries.

310 Moreover, the nature of the allegedly unlawful misrepresentation - telling people that in exchange for a \$2,500 donation, they would get a \$10,000 tax deduction - is such that reliance, materiality, reasonableness and causation would be presumed. Even if it cannot be presumed, the determination of common issues of fact relating to the conduct of the defendants would significantly advance the claim of every Class member.

311 While the evidence is sparse, as it necessarily will be at this stage, I am satisfied that there is a basis in fact for a common issue of conspiracy in relation to the ParkLane Defendants, the Gleesons and Appleby.

*(e) Are ParkLane, Trafalgar Associates, TTL, Appleby Services or the Bermuda Longtail Trust, the Donations Canada Trustees, GMA, Matt Gleeson and/or Ms. Gleeson liable to the Class Members on the basis of fraud or fraudulent misrepresentations?*

312 I have found that there are properly pleaded causes of action against the ParkLane Defendants, Appleby and the Gleesons for fraud and for fraudulent misrepresentation.

313 In arguing that these claims do not give rise to common issues, the defendants treat the claims as one and then attempt to demonstrate that the fraudulent misrepresentation claim is not an appropriate common issue. They argue that if the fraudulent misrepresentation claim fails then fraud must fail as a common issue as well. They say that claims based on negligent misrepresentation or fraudulent misrepresentation cannot give rise to common issues, due to the presence of individual issues of

reliance, materiality, reasonableness and causation that could not be determined in common: see *Kumar v. Mutual Life Assurance Co. of Canada* (2003), 226 D.L.R. (4th) 112, [2003] O.J. No. 1160 (Ont. C.A.), *Zicherman v. Equitable Life Insurance Co. of Canada* (2003), 226 D.L.R. (4th) 131, [2003] O.J. No. 1161 (Ont. C.A.), app. for leave to appeal dismissed, (2004), [2003] S.C.C.A. No. 280 (S.C.C.); *Bellaire v. Independent Order of Foresters* (2004), 5 C.P.C. (6th) 68, [2004] O.J. No. 2242 (Ont. S.C.J.) and *Moyes v. Fortune Financial Corp.* (2002), 61 O.R. (3d) 770, [2002] O.J. No. 4297 (Ont. S.C.J.), aff'd. (2003), 67 O.R. (3d) 795, [2003] O.J. No. 4731 (Ont. Div. Ct.).

314 Applying the reasoning of the Court of Appeal in *Carom v. Bre-X Minerals Ltd.* (1999), 44 O.R. (3d) 173, [1999] O.J. No. 1662 (Ont. S.C.J.), aff'd. (1999), 46 O.R. (3d) 315, [1999] O.J. No. 5114 (Ont. Div. Ct.), rev'd. (2000), 51 O.R. (3d) 236, [2000] O.J. No. 4014 (Ont. C.A.), to which I will turn in a moment, the defendants say that if their arguments about negligent misrepresentation not being an appropriate common issue are accepted, the same fate should befall the fraudulent misrepresentation claim.

315 ParkLane and FFC Foundation argue that the claims in this case will require examination of what each Class member was told by one of the 455 "Independent Financial Advisors" (the Distributors) over a period of five years, an analysis of each Class member's particular knowledge, experience, sophistication and risk tolerance and a determination of whether each Class member was induced to act as a result of these representations. Similar arguments, ultimately unsuccessful, were made in *Carom v. Bre-X Minerals Ltd.*

316 In *Carom v. Bre-X Minerals Ltd.*, there was a claim in fraudulent misrepresentation. It was argued by the defendants there that there was no conceivable commonality since the plaintiff was relying on numerous representations contained in statements originating from Bre-X and some of the defendants over a period of almost four years. The plaintiffs said that these representations were, in effect, a single representation, namely "gold was present in mineable quantities in the Busang." There, as here, it was argued that the statements were received by investors of vastly different sophistication, knowledge and investment strategies.

317 Winkler J., who heard the certification motion, found at paras. 78 and 79 that the claim for negligent misrepresentation was not suitable for certification, but that the claim for fraudulent misrepresentation was suitable:

A reduction of the numerous representations to a common representation requires analysis and characterization of each individual representation, the plaintiff's perception of the representation and the circumstances in which it was made. This is, of necessity, an individual inquiry. Thus, the plaintiffs' contention that a multitude of statements can be reduced to a single core representation is antithetical to the essence of a common issue in a class proceeding. That is to say, that the common trial in the class proceeding is intended to resolve issues which have been determined to be common between the defendants and the plaintiff class. As such, a resolution binds every class member. The existence of the common issue must be discernible at the certification stage since it provides the basis for the common issue trial and the viability of a class proceeding. The common issue cannot be dependent upon findings which will have to be made at individual trials, nor can it be based on an assumption to circumvent the necessity for the individual inquiries. As such, there is no prospect of a resolution in a trial on common issues which would advance this litigation in any manner as it relates to the claim in negligent misrepresentation.

However, I am of the view that the claim in fraudulent misrepresentation raises common issues. The plaintiffs' allegation is that the Bre-X operation was fraudulent. Therefore, it is contended, every representation, whenever made, is tainted by the fraud. The allegation that the fraud permeates every statement raises common issues regardless of whether individual issues may arise from the actual communications made to the class members.

318 The decision of Winkler J. was upheld by the Divisional Court. It observed at para. 4:

There is a complex, overlapping, differing and sometimes inconsistent tissue of representations made by different people at different times. As Winkler J. pointed out, the case of each individual plaintiff requires an individual inquiry as to what

representations he or she relied upon and how he or she was affected by the particular representation. These individual inquiries cannot be circumvented.

The common issue cannot be dependent upon findings which have to be made, as here, at individual trials.

319 The Court of Appeal reversed, holding that the claim for negligent misrepresentation should have been certified.

320 MacPherson J.A., giving the judgment of the Court, observed as a preliminary matter at para. 41 that the courts have been wary of setting the bar too high on the common issues test. He noted the observation of Cumming J.A. in *Campbell v. Flexwatt Corp.* (1997), 15 C.P.C. (4th) 1 (B.C. C.A.), at p. 18:

When examining the existence of common issues it is important to understand that the common issues do not have to be issues which are determinative of liability; they need only be issues of fact or law that move the litigation forward. The resolution of a common issue does not have to be, in and of itself, sufficient to support relief. To require every common issue to be determinative of liability for every plaintiff and every defendant would make class proceedings with more than one defendant virtually impossible.

[emphasis added].

321 The observation above that I have emphasized is particularly apt in a case such as this, where there are multiple defendants, each taking a run at the commonality of the common issues.

322 MacPherson J.A. went on to find that it was appropriate to certify common issues dealing with both fraudulent misrepresentation and negligent misrepresentation and that a class action was the preferable procedure for the resolution of those claims. On the first point, the common issues, he noted at para. 44 that there were substantial similarities between the definitions of the two torts and they shared some requirements:

There are substantial similarities in these definitions of the two torts. A fraudulent misrepresentation is "a false representation of fact"; a negligent misrepresentation is one that is "untrue, inaccurate or misleading". A fraudulent misrepresentation can be one that is made "recklessly, without belief in its truth"; a negligent misrepresentation is one that is made "negligently" or, to employ the standard non-conclusory word, "carelessly".

323 He went on to find that there was sufficient overlap in the two claims to justify certification of both and there was a substantial overlap of factual issues common to both torts - in fact, there were two core issues in the entire proceeding: Was there gold in mineable quantities in the Busang and, if not, what was the various defendants' knowledge of the true state of affairs. The latter inquiry might be complex and might require an examination of the state of mind and conduct of each defendant, but that was not a question for the common issues analysis.

324 In my view, there are some parallels between the *Bre-X* case and this case. As I have suggested earlier, it is arguable that there was a single misrepresentation: "you will receive a valid charitable receipt much greater than your cash contribution" that permeated every other representation about the Gift Program. If the donation program was a fraud, the Court could find that every representation, no matter how it was made or who made it, was tainted by the fraud. The question would then be: what did each defendant know and what did each defendant do in relation to the fraud? These are issues that can be addressed without reference to the behaviour of individual Class members.

(f) *Have ParkLane, Trafalgar Associates, TTL, the Bermuda Longtail Trust, Trustee Gleeson, the Funds for Canada Foundation ("FFC Foundation"), GMA, Matt Gleeson, Ms. Gleeson or any one or more thereof, been unjustly enriched?*

(i) *If so, are the Class Members entitled to an order imposing a constructive trust over the funds held by or for the benefit of FFC Foundation, or by TTL, or by Appleby in the Bermuda Longtail Trust and an order requiring restitution of the aforesaid funds to the Class?*

(ii) *If so, are the Class Members entitled to a tracing order tracing any amounts paid by the Class Members into the Gift Program to the current holders of such funds?*

325 The requirements for unjust enrichment have been discussed earlier. The defendants do not dispute that the issues of "deprivation" of the plaintiffs and "enrichment" of defendants are capable of determination on a common basis.

326 The defendants say, however, that there are three reasons why unjust enrichment is not a proper common issue.

327 First, they say that the issue of "juristic reason" cannot be determined on a common basis. They say that individual inquiries will be required to determine whether some donors had a "donative intent" to benefit a charity, thereby giving rise to a juristic reason for the enrichment. They argue that those donors who had no donative intent might be entitled to assert a claim for unjust enrichment, whereas those who had a true donative intent (including those who have appealed their tax reassessments) would have no claim, because their intent to benefit a charity would be a juristic reason for the enrichment.

328 Second, the defendants say that there is a juristic reason for the enrichment, namely a valid contract between the donors and ParkLane and Donations Canada Financial Trust.

329 Third, they raise a concern about the pending appeals by some of the Class members. If those appeals are successful and the Class members' deductions are restored, they say there would in fact be no "deprivation" and therefore no claim. If, on the other hand, the appeals are disallowed, they say there will have been a deprivation.

330 Turning to the first concern raised by the defendants, it is the absence of a juristic reason for the enrichment of the defendant that makes that enrichment "unjust". An enrichment of the defendants as a result of a class member's intent to benefit a third party, the charity, is not a juristic reason for the enrichment of the defendant. The juristic reason for the enrichment must be linked to the party that receives the enrichment - the defendants, not the charities. It is no answer for the enriched parties - the defendants - to say that "there is a juristic reason for our enrichment because you intended to enrich the charities."

331 I turn to the second concern. The question of whether the contracts are sufficient juristic reasons for the enrichment of ParkLane and Donations Canada Trust will depend upon whether they are found to be valid and enforceable, an issue that is likely to be capable of determination on a common basis. If the contracts are rescinded or voidable, the contracts cannot serve as "juristic reason" for the enrichment of the contracting party: *MacKinnon v. Ontario (Municipal Employees Retirement Board)* (2007), 88 O.R. (3d) 269, [2007] O.J. No. 4860 (Ont. C.A.) at para. 82; *Windisman v. Toronto College Park Ltd.* (1996), 28 O.R. (3d) 29, [1996] O.J. No. 552 (Ont. Gen. Div.), at para. 69; *Larsen v. Charron*, 2007 BCSC 675, [2007] B.C.J. No. 1012 (B.C. S.C.); *Metzler Investment GmbH v. Gildan Activewear Inc.*, [2009] O.J. No. 5695 (Ont. S.C.J.) at para. 30, referring to *Windisman v. Toronto College Park Ltd.*: "a contract rendered unenforceable by law or equity does not qualify as a juristic reason for the purposes of the test for unjust enrichment."

332 The third issue only arises in the event a donor's tax appeal is allowed, and the deduction is restored. That issue can be dealt with as an individual issue, if necessary.

333 In my view, this is a case in which the determination of the "deprivation" and "enrichment" aspects of unjust enrichment would move the claims of individual Class members well towards a resolution.

(g) *Did ParkLane, Trafalgar Associates, TTL, Trustee Gleeson, FFC Foundation, GMA, Matt Gleeson, and/or Ms. Gleeson engage in unfair and unconscionable practices in respect of the marketing and sale of the Gift Program, contrary to s. 17 of the Ontario Consumer Protection Act (and the comparable sections of consumer protection legislation in other provinces as set out in Schedule A to the Fresh Further Fresh as Amended Statement of Claim)?*

(i) *If so, is it in the interests of justice to waive any requirement for giving notice under s. 18(15) of the Ontario Consumer Protection Act (and the comparable sections of consumer protection legislation in other provinces as set out in Schedule A to the Fresh Further Fresh as Amended Statement of Claim)?*

(ii) *If so, are the Class Members entitled to an order rescinding the Gift Program contracts and granting to the Class Members: (a) damages, and/or (b) exemplary and/or punitive damages pursuant to s. 18 of the Ontario Consumer Protection Act (and the comparable sections of consumer protection legislation in other provinces as set out in Schedule A to the Fresh Further Fresh as Amended Statement of Claim)?*

334 As noted earlier, the plaintiff claims that the Gift Program was a consumer transaction governed by the *Consumer Protection Act, 2002* and comparable legislation in other provinces. I have concluded that there is a tenable cause of action under the *Consumer Protection Act, 2002* against the ParkLane Defendants, the Gleasons and FFC Foundation. I have noted that the claim against TTL on behalf of Class members in jurisdictions other than Ontario falls to be determined under the law of the provinces in which they reside.

335 The plaintiff requests the following remedies:

- (a) a declaration that these Defendants engaged in unfair and unconscionable practices with respect to the marketing and sale of the Gift Program;
- (b) a declaration that it is in the interests of justice to waive the statutory notice requirement; and
- (c) an order granting rescission of the Gift Program contracts and granting damages to the Class, including exemplary and punitive damages.

336 The defendants' primary argument against the certification of a common issue under the *Consumer Protection Act, 2002* is that establishing liability for an unfair practice or an unconscionable transaction will require the Court to look behind the marketing materials and make individual inquiries into what each Class member knew about the Gift Program and what advice the Class member obtained from his or her financial advisor. Moreover, they say that there is evidence before the Court from six donors that they were aware of the "back half" of the Gift Program but that the information was not material to them.

337 I do not accept this submission. Common issues under the *Consumer Protection Act, 2002* have been certified by the Court in similar circumstances: *Ramdath v. George Brown College of Applied Arts & Technology* (2010), 93 C.P.C. (6th) 106, [2010] O.J. No. 1411 (Ont. S.C.J.); *Matoni v. C.B.S. Interactive Multimedia Inc.* (2008), 163 A.C.W.S. (3d) 701, [2008] O.J. No. 197 (Ont. S.C.J.).

338 It is not necessary under the *Consumer Protection Act, 2002* to establish that the consumer was induced to enter into the contract due to the unfair practice or that the consumer relied on the representation. In *Matoni*, Hoy J. held at para. 149 that a false, misleading or deceptive representation, defined under the *Consumer Protection Act, 2002* as including "a failure to state a material fact if such failure deceives or tends to deceive", can be determined objectively, by reference to what would be conveyed to a reasonable person. She went on to state that "[T]he determination of whether the defendants engaged in an unfair practice under these statutes involves common issues of fact and common issues of law." She held that issues of breach of the statute, the remedies for the breach, and a potential waiver of the notice requirement were appropriate common issues. I certified substantially similar common issues in *Ramdath*, noting at para. 110 that the common issues were "ideally suited for resolution on a class-wide basis".

339 I conclude that these common issues are appropriate for certification.

(h) *Are Harris, ParkLane, Trafalgar Associates, TTL, GMA, Matt Gleeson and/or Ms. Gleeson liable to the Class Members for negligent misrepresentations made to the Class?*

340 In *McKenna v. Gammon Gold Inc.*, I set out at some length, commencing at para. 129, the problematic issue of the certification of common issues in misrepresentation claims, pointing to the difficulties associated with proving reliance on a class-wide basis. I noted, however, that there have been cases such as *Hickey-Button v. Loyalist College of Applied Arts & Technology*, above, where there is a single representation or a number of representations are made, all having had a common import. I would add to this list: *Ramdath v. George Brown College of Applied Arts & Technology*, [2010] O.J. No. 1411, 2010

ONSC 2019 (Ont. S.C.J.); *McCann v. CP Ships Ltd.*, [2009] O.J. No. 5182 (Ont. S.C.J.); *Silver v. Imax Corp.*, above. I also noted that there may be cases where proof of reliance could be made by inference: *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman* (2001), 15 C.P.R. (4th) 289, [2001] O.J. No. 4620 (Ont. S.C.J.); *Kripps v. Touche Ross & Co.*, [1997] B.C.J. No. 968, 89 B.C.A.C. 288 (B.C. C.A.) at para 101; *NBD Bank, Canada v. Dofasco Inc.* (1999), 46 O.R. (3d) 514 (Ont. C.A.), at 547, [1999] O.J. No. 4749 (Ont. C.A.).

341 The plaintiff says that this case falls within the relatively narrow range of misrepresentation cases that raise common issues because there was one overarching representation and reliance can be inferred.

342 Alternatively, the plaintiff says that the misrepresentations allegedly made by the defendants will be examined in any event in connection with the claim under the *Consumer Protection Act, 2002*, which asks whether, on an objective basis, the representation was false, misleading, deceptive or unconscionable. It therefore makes sense, as a matter of efficiency, to certify common issues in relation to both. He makes the same point with respect to the negligent misrepresentation claim and the claims for fraud and fraudulent misrepresentation.

343 The plaintiff's submission is supported by the decision of the Court of Appeal in *Carom v. Bre-X Minerals Ltd.*. In that case, the Court of Appeal reversed the decisions of the motion judge and the Divisional Court to certify common issues of fraudulent misrepresentation, but not common issues of negligent misrepresentation. MacPherson J.A., writing for the Court, noted that there was substantial overlap in the legal requirements for and factual issues raised by the two torts. At the core of both torts were the following issues: (1) what was the true state of affairs? and (2) what did the defendants know about the true state of affairs? Accordingly, he observed, at para. 47, there was no principled basis for treating the two torts differently. Both will focus on the knowledge and conduct of the defendants.

344 Precisely the same point can be made here. The negligent misrepresentation claim and the *Consumer Protection Act, 2002* claim will traverse much of the same legal and factual ground as the fraudulent misrepresentation claim. They will focus on the knowledge and conduct of the defendants. Having these issues addressed in a single trial will avoid duplication of fact-finding and legal analysis.

345 The defendants' primary attack on this common issue is in relation to the requirement of reliance, including issues of whether the representation was a material one, whether it was reasonable to the plaintiff to rely on the representation and whether in fact the representation was causative of each Class member's decision to participate in the Gift Program. They point out that in order to succeed in an action for negligent misrepresentation, it must be shown that the misrepresentation is a material one, in the sense that it "would be likely to influence the conduct of the plaintiff or would be likely to operate upon his judgment": *White v. Colliers Macaulay Nicolls Inc.* (2009), 95 O.R. (3d) 680, 2009 ONCA 444 (Ont. C.A.) at para. 25, citing *Hembruff v. Ontario Municipal Employees Retirement Board* (2005), 78 O.R. (3d) 561, [2005] O.J. No. 4667 (Ont. C.A.) at paras. 87-89; *Canada Trustco Mortgage Co. v. Bartlet & Richardes* (1996), 28 O.R. (3d) 768 (Ont. C.A.), at 773, [1996] O.J. No. 1551 (Ont. C.A.).

346 The defendants rely on *Kumar v. Mutual Life Assurance Co. of Canada*, [2003] O.J. No. 1160 (Ont. C.A.), *Zicherman v. Equitable Life Insurance Co. of Canada*, [2003] O.J. No. 1161 (Ont. C.A.), *Bellaire v. Independent Order of Foresters*, [2004] O.J. No. 2242 (Ont. S.C.J.) and *Moyes v. Fortune Financial Corp.*, [2002] O.J. No. 4297 (Ont. S.C.J.) as cases in which certification of negligent misrepresentation common issues was refused due to the need to make individual inquiries concerning reliance, causation and damages, and in some cases, such as *Zicherman*, the need to separate out which representations were made by the defendants and which were made by others. As well, the defendants say that in this case, the decision of each Class member was informed by information and recommendations of his or her "Independent Financial Advisor" (the Distributor) and this information would have to be sifted through in order to determine whether the alleged representations were both material and causative. The individual donor's personal experience would also have to be examined to determine the person's sophistication, experience, risk tolerance and financial goals.

347 ParkLane relies on the evidence of the six donors who said that they were aware of the "back half" of the Gift Program and nevertheless decided to participate.

348 As well, ParkLane says that the Donor Declaration signed by Cannon expressly excludes a duty of care owed to Class members. It says that whether these terms should or should not apply will depend on individual circumstances.

349 The plaintiff replies that the alleged representations made by the Distributors would not have to be examined to determine what information the Class members relied upon, because the Distributors were expressly prohibiting from giving information to the donors other than the standardized materials that ParkLane had specifically approved in advance.

350 As I have indicated above, in my view, this is a case, like *Ramdath* and *Hickey-Button*, in which there is effectively one, or perhaps two representations, contained in written materials supplied by ParkLane to every Class member: "This is a legitimate tax avoidance program that has been designed to satisfy the requirements of Revenue Canada. You will receive a tax credit that exceeds the amount of your actual donation."

351 This is also a case in which it may be possible to infer that each donor relied on the representation. The entire purpose of the elaborate structure was to achieve the ramped-up tax deduction. It can reasonably be inferred that taxpayers did not participate in the Gift Program only because they wanted to make a gift to the underlying charity. They did so due to the representation that they would receive an enhanced tax deduction.

352 By the same token, damages can reasonably be inferred, at least in the amount of the donor's cash donation and potentially for the amount of any re-assessment, penalties, interest and costs.

353 Even if there are some aspects of the misrepresentation claim that have to be determined as individual issues, this is a consideration for the preferability stage of the inquiry, not for this stage: *Hickey-Button* at para. 53.

(i) *Are Patterson Kitz (Halifax), Patterson Kitz (Truro), Patterson Palmer also known as Patterson Palmer Law [for 2005] and/or McInnes Cooper [for 2006 - 2009] vicariously liable for Harris' negligence or negligent misrepresentations?*

354 This is an appropriate common issue. It has not been suggested otherwise. The answer focuses entirely on the relationship between Harris and the law firms with which he was associated at the material times.

(j) *Are the Class Members entitled to pursue a restitution claim based upon waiver of tort as against ParkLane, Trafalgar Associates, TTL, Appleby Services or the Bermuda Longtail Trust, Trustee Gleeson, FFC Foundation, GMA, Matt Gleeson, and Ms. Gleeson?*

355 The plaintiff asks for a disgorgement of the defendants' profits based on what he describes as the "remedy" of waiver of tort. As a remedy, he claims either an order for restitution or a declaration of constructive trust. I certified such a claim as a common issue in *Pollack v. Advanced Medical Optics Inc.*, [2011] O.J. No. 2556, 2011 ONSC 1966 (Ont. S.C.J.), noting that common issues arising out of claims in waiver of tort have been certified in a number of class actions.

356 The ParkLane Defendants submit that waiver of tort is a remedy, not a cause of action. This seems to be conceded by the plaintiff. I am not quite so sanguine: see *Aronowicz v. EMTWO Properties Inc.*, [2010] O.J. No. 475, 2010 ONCA 96 (Ont. C.A.) at paras. 80-82. The availability of waiver of tort, and its scope, is an open question that may not be conclusively resolved for some time.

357 If waiver of tort is a remedy, it will only be of interest if the plaintiff establishes a cause of action or other wrongdoing: *Aronowicz v. EMTWO Properties Inc.* at para. 82. The nature of the cause of action and the damages recoverable will then determine whether the plaintiff and Class members have any interest in waiving their damages and claiming disgorgement.

(k) *If so, can the damages based upon a waiver of tort claim be assessed in the aggregate, and if so, in what amount?*

358 I noted in *Pollack v. Advanced Medical Optics Inc.*, [2011] O.J. No. 2556, 2011 ONSC 1966 (Ont. S.C.J.) at para. 25, there have been numerous cases in which the amount to be disgorged, if waiver of tort is available, has been stated as a common issue. I will not repeat that lengthy list.

359 In some cases, the *quantum* of waiver of tort damages has been bifurcated to proceed after a common issues trial. I followed that course of action in *Schick v. Boehringer Ingelheim (Canada) Ltd.*, 2011 ONSC 1942, [2011] O.J. No. 1381 (Ont. S.C.J.), adopting the decision of the Divisional Court in *Peter v. Medtronic Inc.*, 2010 ONSC 3777, [2010] O.J. No. 3056 (Ont. Div. Ct.). In *Peter v. Medtronic Inc.*, the Divisional Court affirmed the decision of Perell J. to bifurcate the issue. Perell J. had noted, at para. 21 of his reasons, [2009] O.J. No. 4364 (Ont. S.C.J.), that the case before him was "one of the extraordinary and rare cases where it would be fair and just to have divided discovery and to bifurcate the common issue of the quantification of the amount of the waiver of tort claim."

360 While I have discretion to bifurcate the issue, I must exercise this discretion with regard to the factors summarized by Nordheimer J. in *Air Canada v. WestJet Airlines Ltd.* (2005), 20 C.P.C. (6th) 141, [2005] O.J. No. 5512 (Ont. S.C.J.) at para. 31. Having regard to those factors, I consider that:

- (a) the issues of liability are not clearly separate from the issues of remedies. In particular, the fraud and unjust enrichment claims will require an examination of the benefits that the defendants have received from their actions, the same questions that will be asked in the waiver of tort claim;
- (b) there is no obvious advantage to having the liability issues tried first;
- (c) nor will it result in a substantial saving of time and expense;
- (d) it will in fact likely lengthen the overall time frame of the proceeding; and
- (e) there is no agreement between the parties that bifurcation is appropriate.

361 In this case, I am not satisfied that the claim falls within the "rare and extraordinary" category, so as to justify a departure from the general rule that litigation by installments is to be avoided. While class actions are inherently bifurcated, addressing common issues before individual issues, the usual rule is that all common issues should be resolved at the same time. There is no reason to think that the aggregate assessment of waiver of tort damages will be particularly complicated or time-consuming in this case.

362 I conclude that this common issue should be approved and that it should not be bifurcated.

(l) *Are the Class Members entitled to damages and prejudgment interest, including:*

- (i) *The amount of their cash donations?*
- (ii) *The fair market value of any in kind donations?*
- (iii) *The interest and/or penalties payable to the Canada Revenue Agency ("C.R.A.") in respect of their tax reassessments?*
- (iv) *Their out of pocket expenses incurred in responding to the C.R.A. tax reassessments?*

363 The Defendants take the position that damages are not an appropriate common issue. They say that issues of mitigation, penalties, out-of-pocket expenses and interest will require individual inquiries. They note that there are allegations that Cannon and the Class members were contributorily negligent and that ParkLane has asserted a counterclaim against donors who participated in the Gift Program in 2008 and 2009, based on an indemnity given by those donors to ParkLane.

364 In *Banyan Tree*, Lax J. declined to certify common issues asking whether the defendants were liable to Class members for damages and, if so, the amount of such liability. She concluded that a damage assessment would require individual determinations.

365 I am not convinced that damages are an appropriate common issue in this case. This will not mean that a class proceeding is not a preferable procedure for the resolution of the issues. Section 6 of the *C.P.A.* stipulates that the fact that damages will require individual assessment after the common issues trial is not, on its own, a bar to certification.

(m) *Can or should the damages under paragraph (13)(i) be assessed in the aggregate?*

366 In *Singer v. Schering-Plough Canada Inc.*, above, I pointed out at paras. 189 to 191 that it is possible, but not necessary, to certify the aggregate assessment of damages as a common issue, referring to *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 70; *Smith v. National Money Mart Co.* (2007), 37 C.P.C. (6th) 171, [2007] O.J. No. 46 (Ont. S.C.J.), leave to appeal ref'd [2007] O.J. No. 2160, 30 E.T.R. (3d) 163 (Ont. Div. Ct.); *Lee Valley Tools Ltd. v. Canada Post Corp.* (2007), 57 C.P.C. (6th) 223, [2007] O.J. No. 4942 (Ont. S.C.J.).

367 In this case, although it might be concluded that the cash donations of all Class members can simply be aggregated, the expert evidence adduced by the Lawyers suggests that it may not be quite such a simple exercise. It may be necessary, for example, to offset any loss incurred by a donor against the benefit he or she received from the initial tax credit. There will also be questions about whether all Class members have been re-assessed, and whether some have settled with C.R.A.

368 It is not necessary to decide whether these are bars to an aggregate assessment. I have sufficient concerns about the availability of an aggregate assessment in this case to leave the issue to the common issues judge.

(n) *Are the Class Members entitled to an award of punitive or exemplary damages against any one or more of the Defendants, and if so, in what amount?*

369 The defendants, led by the Lawyers, say that punitive damages are not an appropriate common issue, because there are numerous individual issues of liability and damages that will have to be determined before liability for punitive damages can be determined or the quantum of such damages assessed. They point, in particular, to observations in *Whiten v. Pilot Insurance Co.*, [2002] 1 S.C.R. 595, [2002] S.C.J. No. 19 (S.C.C.), that punitive damages are only appropriate when the defendant's conduct would otherwise go unpunished or where other sanctions, including compensatory damages, are inadequate to achieve the goals of retribution, deterrence and denunciation.

370 In *Schick v. Boehringer Ingelheim (Canada) Ltd.*, [2011] O.J. No. 1381, 2011 ONSC 1942 (Ont. S.C.J.), I certified the following common issue:

Does the conduct of the defendant justify an award of punitive damages?

371 I concluded that, notwithstanding the concerns expressed by Perell J. in *Robinson v. Medtronic Inc.* (2009), 80 C.P.C. (6th) 87, [2009] O.J. No. 4366 (Ont. S.C.J.), aff'd 2010 ONSC 3777, [2010] O.J. No. 3056 (Ont. Div. Ct.), flowing from the observations of Binnie J. in *Whiten v. Pilot Insurance Co.*, a common issue focusing solely on the defendant's conduct would avoid duplication of fact-finding and legal analysis, even though it would not establish either liability for punitive damages or the *quantum* of such damages. If the Court found that the defendant's conduct was not of such a nature as to justify an award of punitive damages, this would be the end of the inquiry. If, on the other hand, there was a finding of "high-handed, malicious, arbitrary, or highly reprehensible misconduct that departs to a marked degree from ordinary standards of decent behaviour", the application of the other *Whiten* factors could be addressed after the common issues trial.

372 A somewhat similar approach was taken by Hoy J. in *Peter v. Medtronic Inc.*, [2007] O.J. No. 4828 (Ont. S.C.J.), leave to appeal denied, [2008] O.J. No. 1916 (Ont. Div. Ct.).

373 Additionally, Justice Lax discussed the case law in *Banyan Tree* and certified the following issue:

Should an award of punitive damages be made against the defendants? If so, in what amount?

374 She concluded, however, that although the issue could be certified, it could only be answered after the conclusion of all individual proceedings and the quantification of general damages.

375 Dambrot J., in granting leave to appeal in *Robinson v. Medtronic Inc.*, [2010] O.J. No. 1479, 2010 ONSC 1987 (Ont. Div. Ct.), noted that a compelling argument could be made for a common issue concerning the *prima facie* entitlement to punitive damages, notwithstanding that the ultimate liability for and *quantum* of punitive damages might have to await an assessment of compensatory damages.

376 I also note that, notwithstanding the concerns that he expressed in *Robinson v. Medtronic Inc.*, Perell J. in his recent decision in *Blair v. Toronto Community Housing Corp.*, [2011] O.J. No. 3347, 2011 ONSC 4395 (Ont. S.C.J.), concluded that a common issue of punitive damages, focusing on the defendant's conduct, would be appropriate. He stated, at para. 49:

For the Reasons I expressed in *Robinson v. Medtronic Inc.*, [2009] O.J. No. 4366 (S.C.J.), aff'd [2010] O.J. No. 3056 (Div. Ct.), a claim for punitive damages will not be suitable for a common issue when the court cannot make a rational assessment about the appropriateness of punitive damages until after individual assessments of the compensatory losses of class members has been completed. However, where the ultimate determination of the entitlement and quantification of punitive damages must be deferred until the conclusion of the individual trials, the question of whether the defendants' conduct was sufficiently reprehensible or high-handed to warrant punishment is capable of being determined as a common issue at the common issues trial: *Chalmers (Litigation guardian of) v. AMO Canada Co.*, 2010 BCCA 560.

377 As Perell J. noted, a similar conclusion was reached by the British Columbia Court of Appeal in *Chalmers (Litigation Guardian of) v. AMO Canada Co.*, 2010 BCCA 560 (B.C. C.A.).

378 I conclude that a common issue should be certified on the same basis as *Schick v. Boehringer Ingelheim (Canada) Ltd.* This issue focuses solely on the conduct of the defendants and avoids duplication of fact-finding and legal analysis.

379 In summary, I have certified the following common issues

- (a) breach of contract, against ParkLane;
- (b) rescission, against ParkLane;
- (c) negligence, against the ParkLane Defendants, Appleby, FFC Foundation and the Gleesons;
- (d) conspiracy, against the ParkLane Defendants, Appleby and the Gleesons;
- (e) fraud and fraudulent misrepresentation, against the ParkLane Defendants, Appleby and the Gleesons;
- (f) unjust enrichment, against the ParkLane Defendants, Appleby, FFC Foundation and the Gleesons;
- (g) *Consumer Protection Act, 2002* claims against the ParkLane Defendants, the Gleesons and FFC Foundation;
- (h) negligent misrepresentation, against the ParkLane Defendants, the Gleesons, and Harris;
- (i) vicarious liability of the Law Firms;
- (j) waiver of tort;
- (k) aggregate assessment of waiver of tort damages;
- (n) punitive and exemplary damages.

#### **4. Preferable Procedure**

380 Section 5(1)(d) of the *C.P.A.* requires that a class proceeding be the "preferable procedure for the resolution of the common issues". This deceptively simple statement has been explained in different ways, but most decisions refer to the observation that a class proceeding must represent a fair, efficient, and manageable procedure that is preferable to any alternative method of resolving the claims: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at paras. 73-75, leave to appeal to S.C.C. ref'd, [2005] S.C.C.A. No. 50 (S.C.C.).

381 The preferability analysis is conducted through the lens of the goals of class actions: access to justice, judicial economy and behaviour modification. It also takes into account the importance of the common issues to the claims as a whole, including the individual issues: See *Cloud v. Canada (Attorney General)* at para. 73; *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.) at para. 69 (C.A.), leave to appeal to S.C.C. ref'd, [2007] S.C.C.A. No. 346 (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.).

382 In considering whether a class action would be the preferable procedure, the Court should examine: (a) the nature of the proposed common issue(s); (b) the individual issues that would remain after determination of the common issue(s); (c) the factors listed in the *C.P.A.*; (d) the complexity and manageability of the proposed action as a whole; (e) alternative procedures for dealing with the claims asserted; (f) the extent to which certification furthers the objectives underlying the *C.P.A.*; and (g) the rights of the plaintiff(s) and defendant(s): *Chadha v. Bayer Inc.* (2001), 54 O.R. (3d) 520 (Ont. Div. Ct.) at para. 16, aff'd (2003), 63 O.R. (3d) 22 (Ont. C.A.), leave to appeal to S.C.C. ref'd, [2003] S.C.C.A. No. 106 (S.C.C.).

383 The defendants say that there are a number of individual issues lying at the core of this action that dominate the proceeding and outweigh the significance of the common issues. These include:

- (a) The ParkLane Defendants and the Lawyers have asserted claims against Cannon for contributory negligence and they will do so against all other donors - this is a substantive right that does not yield to certification: *Ranjoy Sales & Leasing Ltd. v. Deloitte, Haskins & Sells* (1990), 41 C.P.C. (2d) 280 (Man. C.A.) at paras. 17-18. These claims raise individual issues concerning the knowledge and information possessed by each Class member at the time he or she subscribed to the Gift Program and call for individual inquiry.
- (b) ParkLane has asserted a counterclaim against all donors who participated in the Gift Program in 2008 and 2009 based on a written indemnity those donors gave to ParkLane for all claims arising out of the Gift Program. The resolution of these claims will give rise to individual issues.
- (c) ParkLane has commenced third party proceedings against every one of the 455 "Individual Financial Advisors" (the Distributors) and other defendants may do so as well - these claims will raise issues concerning the nature and scope of the information that was provided to the donors by their advisors.
- (d) The allegations of negligence require individual inquiries concerning the duty of care, the standard of care, causation and damages. The claim of negligent misrepresentation will require similar investigations. The extent and complexity of these investigations, and the costs involved, will outweigh any economy achieved by the resolution of the common issues in a single trial: *Dennis v. Ontario Lottery & Gaming Corp.*, [2010] O.J. No. 1223 (Ont. S.C.J.) at para. 238.
- (e) Even if the misrepresentation issues are found appropriate for certification, the need to prove reliance and damages, in each case, will make the proceedings unmanageable

384 The defendants rely on cases such as *Mouhteros v. DeVry Canada Inc.* (1998), 41 O.R. (3d) 63, [1998] O.J. No. 2786 (Ont. Gen. Div.), and *Singer v. Schering-Plough Canada Inc.*, above, in which the need to prove reliance and damages on an individual basis was found to overwhelm the benefits that would be realized by resolving a few common issues.

385 In my view, the Court must look with some skepticism on threats of defendants to undertake scorched earth tactics that will make class actions unmanageable. Defences such as contributory negligence, third party proceedings and counterclaims

can be addressed efficiently and fairly by a combination of case management and the trial of individual issues if necessary. They will not have to be addressed if the common issues are decided in favour of the defendants.

386 The need to address individual issues will depend upon which common issues are answered in favour of the Class. If it is found that the Gift Program was a massive fraud, or that there were fraudulent misrepresentations, or that there were unfair or unconscionable practices under the *Consumer Protection Act, 2002*, the need for the trial of individual issues will be substantially reduced or, possibly, eliminated. In any event, this is a case in which the resolution of the common issues of liability will move the action considerably forward.

387 There is no doubt that certification of this proceeding would further the purposes of the *C.P.A.* The words of Lax J. in *Banyan Tree* at para. 69 are equally applicable to this case:

... a class action achieves judicial economy by make binding determinations affecting the rights of 2,825 individuals in one proceeding. It achieves behaviour modification by holding corporations and law firms accountable for the promotion of allegedly sham investments and it facilitates access to justice for litigants who would not bring individual claims.

388 There are really no alternative procedures that would be as effective as a class proceeding in achieving the goals of access to justice, judicial efficiency and behaviour modification. It has been suggested that the Class members could make a complaint to a Judge of the Superior Court under the *Charities Accounting Act*, R.S.O. 1990, c. 10. The judge has the authority to direct the Public Guardian and Trustee to make an investigation. However, this statute does not give the Court the jurisdiction to provide compensation on a class-wide basis.

389 In terms of access to justice, the defendants suggest that some of the Class members are wealthy individuals, with substantial losses, who could easily afford to bring individual actions. In making this suggestion, the defendants do not really expect individual actions if the action is not certified. What they surely expect and hope is that if the action is not certified, the claims will become dust in the wind. Most Class members will decide that the cost of individual action is prohibitive, as it would be, and they will not throw good money after bad. The result will be that nearly 10,000 people, who have suffered losses allegedly over \$100 million, will never have their day in court. In making this observation, I am not making any conclusion on the merits of the plaintiff's case and, indeed, it is quite obvious that the defendants have raised some significant defences.

390 The rights of defendants are, I agree, an important consideration. The substantive rights of defendants must be protected and it has been noted on many occasions that a class proceeding is procedural and does not change the substantive law. It should not be assumed, however, that the disposition of this action will necessarily require individual trials. If the plaintiff is successful on some common issues, such as fraud or conspiracy, the need for individual trials may be eliminated or reduced. If the defendants are successful on the negligence, contract and *Consumer Protection Act, 2002* common issues, there will be no need for individual trials. Additionally, success for the Class on the *Consumer Protection Act, 2002* or restitutionary claims may open up the availability of remedies that do not call for individual assessments of damages.

391 As I have noted earlier, some of the defendants say that the presence of a Distributor as an "Independent Financial Advisor" to every Class member raises individual issues of Class member knowledge and reliance that make this action unsuitable for certification. They point to the evidence of some of the Distributors and some of the donors to show that the Distributors were aware of the "back half" of the Gift Program and that, at least in some instances, that information was conveyed to donors.

392 The statements of defence of both ParkLane and the Lawyers make reference to the role played by Gacich in advising Cannon. In the third party claim asserted by ParkLane against the Distributors, it is alleged that the Distributors had a duty to protect their clients and that they are liable for any losses sustained by their clients as a result of participating in the Gift Program.

393 It will be interesting to see how the Distributors respond to the third party claim. Will they agree that ParkLane told them everything there was to know about the Gift Program? Will they agree that the information they were provided with made full disclosure of the flow of funds and the risks associated with the Gift Program? Will they agree that they were "independent" of ParkLane? Will they agree that if their clients have a complaint, it was all their (the Distributors') fault for not properly advising them of the risks?

394 It seems to me that the evidence raises a question of whether the Distributors were truly "independent financial advisors", the term coined by counsel, or whether they were, as described in their agreement with ParkLane, "fundraisers", who were retained to "raise donations" for the Gift Program. The evidence raises questions about exactly whose agents they were. It raises questions about the extent of disclosure made by ParkLane to the Distributors concerning the Gift Program.

395 I leave for another day, if necessary, the issue of whether these questions can be determined on a common basis. In my view, the questions are serious ones, and they significantly dilute the arguments made by the defendants concerning the role of the Distributors.

396 I have found that there are substantial common issues, the resolution of which will advance the claim of every class member. It is true that, depending on the resolution of the common issues, some individual issues may remain. I am satisfied, however, that the practical difficulties associated with the resolution of these common issues are not a reason to deprive Class members of the benefits associated with collective recourse. I am also satisfied that a process can be established to ensure that the rights of the defendants are protected and that the process is fair to both parties.

397 In light of its potential to promote access to justice and reduce or possibly eliminate the need for individual trials, I find that a class action is a preferable procedure for the resolution of the common issues of the Class.

### ***5. Representative Plaintiff and Litigation Plan***

398 Section 5(1)(e) of the *C.P.A.* requires that there be a representative plaintiff or defendant who (i) would fairly and adequately represent the interests of the class, (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the Class and of notifying Class members of the proceeding, and (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other Class members.

399 There is no dispute as to the capacity of Cannon to serve as representative plaintiff. The Lawyers, however, supported by some of the other defendants, submit that Cannon has a conflict with other members of the Class that prevents him from being a representative plaintiff. They also submit that the litigation plan he has submitted is deficient and unworkable due to deficiencies in the common issues and a failure to address issues such as production, discovery and damages.

400 Turning first to the alleged conflict, the Lawyers say that Cannon has acknowledged that he had no "donative intent" when he participated in the Gift Program and that this puts him in conflict with many other Class members who are challenging their C.R.A. reassessments on the ground that they did, in fact, have a "donative intent". Cannon withdrew his notice of objection and paid the C.R.A. reassessment, unlike many donors who have continued to challenge it.

401 The Lawyers put the argument as follows in their factum:

Because Cannon has, by denying that he had donative intent, conceded one of the arguments advanced by the C.R.A. against the Gift Program while the vast majority of proposed class members continue to actively oppose that position, he has an actual conflict exists [sic] between Cannon and the vast majority of the proposed class. Success for Cannon in this litigation depends on him establishing the absence of donative intent while the majority of class members who are disputing the C.R.A. reassessments can only succeed if they establish the opposite.

402 I am not sure that Cannon's evidence that "[W]ithout this promise of a tax credit I would never have participated in the Gift Program" is proof of lack of donative intent. Ordinary taxpayers might also say that they would not have made a charitable donation unless they knew that they would receive a tax credit. Cannon's evidence is consistent with the tax credit being one reason - but not the only reason - to make the gift. Nor do I agree with the proposition that Cannon can only succeed in this action if he establishes the absence of a donative intent. His case, as pleaded, is that the Gift Program was a fraud and that the money paid out of his own pocket went to enrich the defendants and not to the charity that he wanted to support.

403 Perhaps more important, section 5(1)(e) of the *C.P.A.* says that the representative plaintiff must not have a conflict with the Class members "on the common issues for the class." All Class members who do not opt out will have the same interest

as Cannon on the common issues, regardless of their position on their individual tax appeals and whatever may be the merits of those appeals.

404 In my view, therefore, Cannon does not have a disqualifying conflict.

405 I turn to the litigation plan. The defendants say that the plan is deficient because it assumes that the resolution of the common issues will resolve all questions of liability, when individual issues will remain, including contributory negligence and the third party claims. They point out that one purpose of the litigation plan is to ensure that the proceeding will in fact work as a class action.

406 As I have pointed out under the preferable procedure analysis, the need for examination of individual issues may be substantially circumscribed by the resolution of the common issues. Having concluded that the action is workable as a class proceeding, I am satisfied that issues of production, discovery, proof of damages and the trial of individual issues, if required, can be addressed through case management as the case proceeds to trial, and by directions of the common issues judge who will, by that time, have a full appreciation of what remains to be determined.

## ***6. Conclusions on Certification***

407 In summary, I have:

- (a) certified causes of action in negligence, negligent misrepresentation, fraud, fraudulent misrepresentation, conspiracy, breach of the *Consumer Protection Act, 2002*, breach of contract and unjust enrichment against the defendants identified earlier;
- (b) approved the class definition, which includes residents of Canada who participated in the Gift Program in any of the years 2005 to 2009, inclusive;
- (c) approved the common issues identified in section III.A.3 of these reasons;
- (d) found that a class proceeding is the preferable procedure for the resolution of the common issues and the claims of class members; and
- (e) found that Cannon would fairly and adequately represent the Class, does not have an interest in conflict with the Class and has produced an appropriate plan for notifying the Class and advancing the proceeding.

408 For these reasons, the action will be certified under s. 5(1) of the *C.P.A.*

409 I now turn to the motions for summary judgment.

## **IV. The Summary Judgment Motions**

### ***A. The Test for Summary Judgment***

410 In January 2010, the test for summary judgment was changed from "no genuine issue for trial" to "no genuine issue requiring a trial." Rule 20.04(2) now provides:

20.04 (2) The court shall grant summary judgment if,

- (a) the court is satisfied that there is no genuine issue requiring a trial with respect to a claim or defence;

...

(2.1) In determining under clause (2) (a) whether there is a genuine issue requiring a trial, the court shall consider the evidence submitted by the parties and, if the determination is being made by a judge, the judge may exercise any of the following powers for the purpose, unless it is in the interest of justice for such powers to be exercised only at a trial:

1. Weighing the evidence.
2. Evaluating the credibility of a deponent.
3. Drawing any reasonable inference from the evidence

411 In *Combined Air Mechanical Services Inc. v. Flesch*, 2011 ONCA 764 (Ont. C.A.), released on December 5, 2011, the Court of Appeal, in a unanimous decision, cleared away much of the confusion and conflicting jurisprudence about the circumstances in which summary judgment can be granted. In the process, the Court of Appeal disposed of five jointly-heard appeals of summary judgment decisions through the application of the new "full appreciation test."

412 The new test focuses on procedural fairness and substantive fairness in reaching a just disposition of the parties' dispute. The Court cautioned that before embarking on the summary judgment analysis, and using the enhanced powers under Rule 20.04(2.1), the motion judge must apply the full appreciation test: "Can the full appreciation of the evidence and issues that is required to make dispositive findings be achieved by way of summary judgment, or can this full appreciation only be achieved by way of a trial?"

413 The Court of Appeal pointed out that some cases, by their very nature, will be more suitable for determination on summary judgment than other cases and the analysis of whether a just result can be obtained must be carried out on a case-by-case basis.

414 The Court of Appeal summarized its opinion at paras. 72-75:

We have described three types of cases where summary judgment may be granted. The first is where the parties agree to submit their dispute to resolution by way of summary judgment.

As will be illustrated below, at paras. 101-111, a judge may use the powers provided by rules 20.04(2.1) and (2.2) to be satisfied that a claim or defence has no chance of success. The second class of case is where the claim or defence has no chance of success. The availability of these enhanced powers to determine if a claim or defence has no chance of success will permit more actions to be weeded out through the mechanism of summary judgment. However, before the motion judge decides to weigh evidence, evaluate credibility, or draw reasonable inferences from the evidence, the motion judge must apply the full appreciation test.

The amended rule also now permits the summary disposition of a third type of case, namely, those where the motion judge is satisfied that the issues can be fairly and justly resolved by exercising the powers in rule 20.04(2.1). In deciding whether to exercise these powers, the judge is to assess whether he or she can achieve the full appreciation of the evidence and issues that is required to make dispositive findings on the basis of the motion record - as may be supplemented by oral evidence under rule 20.04(2.2) - or if the attributes and advantages of the trial process require that these powers only be exercised at a trial.

Finally, we observe that it is not necessary for a motion judge to try to categorize the type of case in question. In particular, the latter two classes of cases we described are not to be viewed as discrete compartments. For example, a statement of claim may include a cause of action that the motion judge finds has no chance of success with or without using the powers in rule 20.04(2.1). And the same claim may assert another cause of action that the motion judge is satisfied raises issues that can safely be decided using the rule 20.04(2.1) powers because the full appreciation test is met. The important element of the analysis under the amended Rule 20 is that, before using the powers in rule 20.04(2.1) to weigh evidence, evaluate credibility, and draw reasonable inferences, the motion judge must apply the full appreciation test in order to be satisfied that the interest of justice does not require that these powers be exercised only at a trial.

415 The Court of Appeal described, at paras. 51 and 52, the circumstances in which, applying the full appreciation test, summary judgment might be appropriate. It cautioned against the use of summary judgment in cases where it is necessary to make numerous findings of fact based on an extensive testimonial record. In contrast, it said, document cases, or cases in which there are few contentious factual issues, may be more amendable to summary judgment:

We think this "full appreciation test" provides a useful benchmark for deciding whether or not a trial is required in the interest of justice. In cases that call for multiple findings of fact on the basis of conflicting evidence emanating from a number of witnesses and found in a voluminous record, a summary judgment motion cannot serve as an adequate substitute for the trial process. Generally speaking, in those cases, the motion judge simply cannot achieve the full appreciation of the evidence and issues that is required to make dispositive findings. Accordingly, the full appreciation test is not met and the "interest of justice" requires a trial.

In contrast, in document-driven cases with limited testimonial evidence, a motion judge would be able to achieve the full appreciation of the evidence and issues that is required to make dispositive findings. Similarly, the full appreciation test may be met in cases with limited contentious factual issues. The full appreciation test may also be met in cases where the record can be supplemented to the requisite degree at the motion judge's direction by hearing oral evidence on discrete issues.

416 The Court of Appeal emphasized that "full appreciation" means more than simply being aware of, familiar with and capable of interpreting the written record. The judge must ask whether he or she can fairly weigh the evidence, draw inferences from the evidence, or evaluate the credibility of witnesses without the "opportunity to hear and observe witnesses, to have the evidence presented by way of a trial narrative, and to experience the fact-finding process first hand" (at para. 55).

417 Having set out the principles applicable to summary judgment motions, the Court of Appeal proceeded to apply those principles to each of the five appeals before it. Two of those cases are particularly instructive.

418 The first case involved two related appeals, *Mauldin v. Hryniak* (C52912) and *Bruno Appliance and Furniture v. Hryniak* (C52913) on appeal from *Bruno Appliance & Furniture Inc. v. Cassels Brock & Blackwell LLP*, [2010] O.J. No. 4661, 2010 ONSC 5490 (Ont. S.C.J.). The plaintiffs in both actions were investors who claimed that they had been defrauded by the defendant, Hryniak. They sued Hryniak for fraud and his law firm and one of its partners for fraud, conspiracy, negligence and breach of contract. The motion judge granted judgment against Hryniak, disbelieving his evidence and concluding that he had defrauded the plaintiffs. The motion judge concluded that a trial was necessary to determine whether Hryniak's lawyer was guilty of fraud or whether he was an innocent dupe and had liability apart from the claim for fraud.

419 The summary judgment motion had been lengthy and complex. The hearing lasted four days and there was affidavit evidence from eighteen witnesses. The motion record consisted of twenty-eight volumes and the cross examinations had taken three weeks. The amounts at issue were approximately \$1 million and \$1.2 million.

420 The Court of Appeal concluded that cases such as *Mauldin v. Hryniak* will generally require a trial and should not be decided on summary judgment. It noted its observations, at paras. 50 and 51 of its reasons, that a case that calls for "multiple findings of fact on the basis of conflicting evidence emanating from a number of witnesses and found in a voluminous record" will not generally be appropriate for summary judgment.

421 The Court of Appeal found, at para. 148, that the actions had all the hallmarks of the kind of case in which, generally speaking, the full appreciation of the evidence and issues could only be achieved at trial. These included:

- a voluminous motion record;
- numerous witnesses, affidavits and extensive cross-examinations;
- different theories of liability against each of the defendants;
- the need to make numerous findings of fact;

- conflicting evidence of the main witnesses and the need for credibility determinations; and
- the absence of reliable documentary yardsticks to assess the credibility of the witnesses.

422 The Court of Appeal noted that the motion for summary judgment in that case had not provided access to justice, proportionality and costs savings - on the contrary, it had taken considerable time and resulted in enormous costs to the parties. Any efficiency achieved by the motion, insofar as Hryniak's liability was concerned, was attenuated by the decision that a trial was required to determine the liability of Hryniak's lawyer.

423 In spite of the Court of Appeal's conclusion that the case was not appropriate for summary judgment, and as a clear and unique exception to the principles it had stated, the Court considered whether the motion judge was correct in granting partial summary judgment. It concluded that the motion judge was correct, in one of the two actions, because Hryniak's defence had no credibility. In the other action, it concluded that the decision could not stand, because the motion judge had failed to address one of the elements of civil fraud and because it was not clear from the evidence whether Hryniak had obtained the benefit of the plaintiff's funds.

424 The second case was *394 Lakeshore Oakville Holdings Inc. v. Misek* (C53035), an appeal from a decision reported at [2010] O.J. No. 4659, 2010 ONSC 6007 (Ont. S.C.J.). The action involved a claim for a prescriptive easement over the property of the respondent. The motion judge, after reviewing the evidence, had concluded that the appellants simply had a personal licence to pass over the respondent's lands and not an easement that ran with the lands.

425 In dismissing the appeal, the Court of Appeal described the case as a good example of the kind of case that would be appropriate for summary judgment based on the application of the "full appreciation" test: the documentary evidence was limited and not contentious; there were a limited number of relevant witnesses; and the governing legal principles were not in dispute.

426 Following the release of the decision of the Court of Appeal in *Combined Air Mechanical Services Inc. v. Flesch*, I invited the parties to make further written submissions concerning the application of the decision in this case. I have now received and considered those submissions, and I now turn to the summary judgment motions.

#### ***B. ParkLane's Motion for Summary Judgment***

427 ParkLane moves for summary judgment dismissing Cannon's claim. I will begin by setting out the submissions of the parties. I will then consider whether ParkLane has met the burden of showing that there is no genuine issue requiring a trial.

##### *1. Submissions of ParkLane*

428 ParkLane's argument is simple. It says that by signing the Donor Declaration and the Tax Risk Disclosure Statement, Cannon accepted the risk of his claim for a tax deduction being refused and expressly released ParkLane from liability for the claims advanced in this action. I have summarized these documents earlier, under the heading "Contractual Materials for the Gift Program."

429 To understand ParkLane's submission, it will be helpful, however, to set out portions of the text of the Donor Declaration signed by Cannon in 2006:

1. I have read and fully understand all and any written materials and documents in the marketing and donor kit prepared by [ParkLane] ... I acknowledge that, except for what is contained in the Documents, no other promise, representation or warranty has been made by ParkLane to, or relied upon, by the undersigned.
2. I have received independent professional advice in respect of the Program from my owner personal advisor/lawyer/accountant (my "Advisor"), as the case may be. I fully understand such advice and information provided to me by my Advisor in respect of all and any legal, commercial/business and tax consequences related to my participation in the

Program ... *I am prepared to accept any and all tax risks whatsoever related thereto, including the risk that the charitable donation, or a portion of it, may be reassessed and even denied.*

3. I understand that to facilitate various transactions in connection with the Program, monies have been or will be deposited to and/or transferred from accounts with one or two chartered bank(s) (collectively, the "Bank"). I further acknowledge that *ParkLane is acting, in addition to its role in marketing and facilitating the Program, as escrow agent in connection with the Program, and in such specific capacity as escrow agent*, is authorized to receive funds and to disburse them in accordance with written directions. Aylesworth LLP ("Aylesworth") is also acting as escrow agent in respect of the Program. I hereby unconditionally release the Bank, ParkLane and Aylesworth and their respective partners, officers, authorized agents and employees, from any and all claims or liabilities of any kind whatsoever that I or my executors and assigns, now has or in the future may have with respect to matters occurring on, prior to or after the date hereof, arising out of, based upon, resulting from or in connection with the Declarant participating in the Program. [Underlining in original; italics added].

430 ParkLane relies on the following facts, which are not in dispute:

- Cannon was a reasonably experienced and sophisticated investor;
- he had no direct dealings with anyone at ParkLane concerning the Gift Program and relied exclusively on Gacich, his "trusted financial advisor";
- Gacich was fully aware of the nature of the Gift Program, including the role of the Bermuda Trust and the royalty agreements between TTL and the charities - he thought that the Gift Program was "well thought out, well put together" and "a brilliant structure" - Gacich himself contributed to the Gift Program and recommended that his 80 clients do so;
- when Gacich originally discussed the Gift Program with him, Cannon thought it was "too good to be true", but after receiving information from Gacich, and Gacich's recommendation, he decided to participate;
- Cannon was aware of and understood the risks of participating in the Gift Program, including the risk that his donation might be re-assessed or denied;
- Gacich reviewed the Donor Declaration and Tax Risk Disclosure statements with his clients, including Cannon, before having them executed;
- Cannon executed and delivered a Donor Declaration in 2005; he executed a second Donor Declaration in 2006, as well as a Tax Risk Disclosure Statement; and
- Cannon read and understood the Donor Declaration and the Tax Risk Disclosure Statement before he signed them.

431 ParkLane also notes that in the Donor Declarations, Cannon declared and agreed that:

- he had read and fully understood all the Gift Program Materials, including (in 2006) the Tax Risk Disclosure Statement, in respect of his participation in, and donations to the Gift Program;
- except for what was contained in the materials provided by ParkLane, no other promise, representation or warranty had been made by ParkLane to him, or had been relied upon, by him;
- he had received independent professional advice in respect of the Gift Program from his own personal advisor /lawyer / accountant;
- he fully understood the advice and information provided to him by his own personal advisor/lawyer/accountant in respect of all and any legal, commercial/business and tax consequences related to his participation in the Gift Program, including the fact that up to 8% of his aggregate donation amounts would be used to pay charity fundraising fees;

- he accepted any and all tax risks whatsoever related to his participation in the Gift Program, including the risk that the charitable donations, or a portion of them, might be re-assessed and even denied; and
- he unconditionally released ParkLane and its officers and employees from any and all claims or liabilities of any kind whatsoever that he then had, or in the future might have with respect to matters occurring on, prior to or after the date of the Donor Declaration, arising out of, based upon, resulting from or in connection with his participation in the Gift Program.

432 Gacich has sworn that:

- at no time did he "promise" Cannon that he would receive a tax credit;
- he reviewed the risks associated with the Gift Program with Cannon, including the risk that no tax credit might be allowed;
- Cannon understood the risks and understood the nature and scope of the release that he was giving to ParkLane.

433 Cannon has not contradicted Gacich's evidence.

434 ParkLane says that this is exactly the kind of document-driven case, with limited controversial facts, that the Court of Appeal in *Combined Air Mechanical Services Inc. v. Flesch* stated would be suitable for summary judgment. It says that the issue is a narrow one, namely the interpretation and application of the release clause in the Donor Declarations signed by Cannon.

435 ParkLane relies, in particular, on the decision of the Supreme Court of Canada in *Tercon Contractors Ltd. v. British Columbia (Minister of Transportation & Highways)*, [2010] 1 S.C.R. 69, [2010] S.C.J. No. 4 (S.C.C.), ("Tercon Contractors"). It says that the language of the exclusion clause is clear and unambiguous, it is not unconscionable and that public policy requires its enforcement.

## 2. Submissions of the Plaintiff

436 The plaintiff makes five submissions in response to ParkLane's motion for summary judgment.

437 *First*, he says that the release clause in the Donor Declaration is based on a factual premise that does not exist, namely the making of a valid charitable gift and, since the premise was not realized, the release is of no effect.

438 *Second*, referring to the language I have italicized in clause 3 of the Donor Declaration, he says that the release clause is confined to ParkLane's role as an escrow agent, and does not release ParkLane from its liability for misconduct as a promoter and operator of the Gift Program.

439 *Third*, and alternatively, he says that if the release is not so confined, the release is ambiguous and, applying the *contra proferentem* rule, the ambiguity must be resolved in his favour. This, he says, will require a trial in order to weigh the evidence of the factual matrix underpinning the interpretation of the contract.

440 *Fourth*, he says that there are "genuine issues requiring a trial" regarding the validity and enforceability of the contract, including issues of (a) whether there has been a total failure of consideration; (b) fraud or fraudulent misrepresentation on the part of ParkLane; (c) negligent misrepresentation by ParkLane; and (d) whether he is entitled to rescission under the *Consumer Protection Act, 2002*. If these issues are determined in his favour, the contract may be vitiated, voidable, rescinded or otherwise unenforceable.

441 *Fifth*, and finally, the plaintiff says that the *Tercon Contractors* analysis will require a determination of whether the release clause is unconscionable and whether there are public policy considerations that outweigh enforcement and the resolution of these issues requires a trial.

## 3. Discussion

442 I do not consider it necessary to consider Cannon's first, second and third submissions concerning the interpretation of the release, because I have concluded that, even if he does not succeed on these issues, a genuine issue requiring trial will remain concerning the enforceability of the contract as a whole.

443 I will elaborate, but in summary I have concluded that there is a genuine issue, requiring a trial, about whether the contract between Cannon and ParkLane, including the Donor Declaration and the Tax Risk Disclosure Statement, is vitiated by fraud, unenforceable due to unconscionability or for reasons of public policy, or subject to rescission under the *Consumer Protection Act, 2002*. I have concluded that the issues are of such factual complexity, and so dependent on findings of credibility that will require the balancing of the evidence of multiple witnesses, that a full appreciation of the evidence can only be obtained at a trial. Moreover, the potential finding of fraud is so serious that fairness to the parties requires a trial.

444 In light of these conclusions and because a trial will be required, I do not propose to comment on the issues of contractual interpretation raised by ParkLane. Those issues should be left to the trial judge, who will consider them in light of the entire factual matrix revealed at trial.

445 I turn to a consideration of the various grounds on which the contract between Cannon and ParkLane may be voided or found unenforceable in this case.

#### **(a) Fraud and Fraudulent Misrepresentation**

446 There is ample authority for the proposition that "fraud vitiates every contract and every clause in it": *S. Pearson & Son Ltd. v. Dublin Corp.*, [1907] A.C. 351 (U.K. H.L.), at 362. See also: *Ballard v. Gaskill*, [1955] 2 D.L.R. 219, 14 W.W.R. 519 (B.C. C.A.); *1018429 Ontario Inc. v. Fea Investments Ltd.*, [1999] O.J. No. 3562, 125 O.A.C. 88 (Ont. C.A.); *Francis v. Dingman* (1983), 43 O.R. (2d) 641, 2 D.L.R. (4th) 244 (Ont. C.A.), leave to appeal to S.C.C. refused, (1984), 23 B.L.R. 234 (note) (S.C.C.); *Nepean Hydro-Electric Commission v. Ontario Hydro*, [1982] 1 S.C.R. 347, [1982] S.C.J. No. 15 (S.C.C.).

447 If it were determined at trial that the Gift Program was a fraud, intended to enrich the promoters by dishonestly depriving the Class of their donations, then the contracts signed by Cannon, including the release clause in the Donor Declaration, could be considered part of the means used to perpetrate the fraud and therefore unenforceable. The same result would follow if ParkLane were found liable for fraudulent misrepresentation.

448 The application and effect of the proposition that fraud vitiates the contract is demonstrated by two decisions of our Court of Appeal. The first case is *Francis v. Dingman*, above, in which the defendant had entered into an agreement with the plaintiffs to purchase their shares in a family newspaper business. It was agreed that if, within ten years, the defendant resold the shares to someone outside the family, he would pay the plaintiffs the difference between the price he had paid for their shares and the resale price. About three years later, the defendant received an offer from a third party to purchase all the shares in the newspaper business. He told the plaintiffs that he had received an offer to purchase the shares, and that he wanted to come to an agreement with them concerning the price to be paid for their shares. When the plaintiffs asked about the price at which the shares were being acquired by the third party, the defendant responded, falsely, that the third party would not agree to the disclosure of this information, but he said that it was a fair price. The defendant also said that if the plaintiffs did not accept his offer for the purchase of their shares, he would not sell the newspaper until the expiry of the ten year period and the plaintiffs would get nothing more for their shares.

449 Predictably, the plaintiffs agreed to sell their shares to the defendant and later discovered that the price paid by the defendant was much less than the amount he had received from the third party.

450 The trial judge dismissed the plaintiffs' claim for fraudulent misrepresentation and held that, as there was no fiduciary relationship between the parties, a claim for negligent misrepresentation could not be made out. The Court of Appeal reversed. In response to the defendant's submission that the plaintiffs had executed a release of the defendant, Lacourcière J.A. held that the release could not stand in the face of, among other things, the fraudulent misrepresentation that the third party would not complete the transaction if the share price was disclosed. He stated, at paras. 28-30:

A misrepresentation is fraudulent and not merely negligent when it can be said that its maker has an absence of honest belief in its truth. In holding that the misrepresentation regarding disclosure of the price to the appellant Francis was not fraudulent, the learned trial judge stated that the respondent seemed to assume that the Thomson group [the purchaser of the shares] would not let him disclose it to anyone, not just the press and the general public. However, there was no evidence to support that statement and it is inconsistent with the evidence of the respondent that he did not think of asking Thomson for permission to disclose the price to the appellant Francis, although it would have been a decent thing to do. It is also inconsistent with the finding of the learned trial judge that the respondent did not ask permission to reveal the price to the plaintiffs because he had no intention of sharing with them the full proceeds of the sale.

I would go further and say that the respondent, who was found to have intended to not share the full proceeds of the share, could not have entertained an honest belief in the truth of the statement that Thomson would not go through with the transaction if the price was disclosed to the appellants. I take the view that this amounted to more than a negligent misrepresentation as found by the learned trial judge and constituted, in fact, a fraudulent misrepresentation within the meaning of Lord Herschell's statement in *Derry et al. v. Peek* (1889), 14 App. Cas. 337 at p. 376:

... if I thought that a person making a false statement had shut his eyes to the facts, or purposely abstained from inquiring into them, I should hold that honest belief was absent, and that he was just as fraudulent as if he had knowingly stated that which was false.

Accordingly, the consent and release which are based not only on incomplete information in breach of a fiduciary obligation of full disclosure but also on fraudulent misrepresentation, cannot be allowed to bar the appellants' action: 38 Hals., 3rd ed., pp. 964-6, paras. 1670-72.

451 Goodman J.A., with whom Zuber J.A. agreed, found that it was "inconceivable" on the evidence that the defendant honestly believed that the third party would cease negotiations if he disclosed the amount of the offer for the shares. He found that the defendant must have known that the third party would be aware that he would have to reveal the price to all shareholders. He concluded that the release was vitiated by the fraudulent misrepresentation - at para. 52:

A release obtained by a fraudulent misrepresentation will be set aside: see *Chitty on Contracts*, 24th ed. (1977), p. 643, para. 1359. In my opinion the plaintiff is entitled to rescind the agreement dated December 10, 1973, and to have a declaration that the release given pursuant to the terms thereof is null and void.

452 The second case is *1018429 Ontario Inc. v. Fea Investments Ltd.*, above. The plaintiff had bought an apartment building from the defendant. The agreement of purchase and sale contained warranties that there was no litigation pending or threatened and that all rent increases had been in accordance with the rent control legislation. The warranties were to survive closing for a period of one year. The agreement contained a disclaimer that the purchaser would have no remedy for breach of warranty or misrepresentation, other than rescission. Shortly after closing, the purchaser discovered that there had in fact been a notice from the Ministry of Housing to the defendant concerning high rent levels. The Ministry subsequently made an order rolling back rents on some of the apartments. The plaintiff brought an action against the vendor for damages for fraudulent misrepresentation. The Court of Appeal affirmed the trial judge's award of damages for fraudulent misrepresentation.

453 The Court of Appeal adopted the following observation in Waddams, *The Law of Contract*, 4th ed. (1999), at p. 299:

A fraudulent misrepresentation is a statement known to be false or made not caring whether it is true or false. A person induced to enter into a contract by such a statement is entitled, *prima facie*, to damages for fraud ... and to rescission.

454 The Court of Appeal accepted the trial judge's conclusion that the defendant either knew that the rents were illegal or was reckless about the legality of the rents being charged and knew that it was not disclosing this fact to the purchaser. The Court of Appeal also accepted the trial judge's conclusion that the purchaser had relied upon the representation made by the vendor.

455 Turning to the question of remedies, the Court of Appeal held that in cases of fraudulent misrepresentation the innocent party is entitled to avoid the contract and sue for damages. In response to the defendant's submission that the contract excluded any remedy other than rescission, the Court of Appeal cited with approval the following extracts from Professor Waddams' text and from Professor Fridman's work - at paras. 50 and 51:

The leading contracts scholars and case authorities do not support this proposition. Professor Waddams, in *The Law of Contracts*, supra, at p. 307, states:

A fraudulent misrepresentation permits the party deceived to avoid the contract and to sue in tort for damages based on the plaintiff's out-of-pocket loss including consequential damages but not expectation or loss of bargain damages.

Professor Fridman, in *The Law of Contract*, 3rd ed. (1994), at p. 294, states:

A fraudulent misrepresentation is one which is made with knowledge that it is untrue and with the intent to deceive. It may even constitute a term of the contract. Whether it does or not is immaterial, since fraud gives rise to effects in the law of contract and the law of tort. A contract resulting from a fraudulent misrepresentation may be avoided by the victim of the fraud. In such instances the apparent consent by the innocent party to the contract and its terms, is not a real consent. Whether or not the effect of such fraud is to induce a mistake (which might render the contract void), the consent of the innocent party may be revoked at his option.

The case law in Ontario echoes Professors Waddams and Fridman.

456 The Court of Appeal found that the disclaimer clause in the agreement of purchase and sale, waiving remedies for breach of warranty or misrepresentation, did not immunize the defendant from a claim for damages for fraudulent misrepresentation.

457 These authorities demonstrate several propositions that are pertinent to this case:

(a) a fraudulent misrepresentation is one that is made with knowledge that it is untrue, or recklessly, without caring whether it is false;

(b) determining whether a fraudulent misrepresentation has been made requires a factual inquiry into the knowledge and state of mind of the representor to determine, among other things, whether the representor had an honest belief in the truth of the statement;

(c) a contract procured by fraudulent misrepresentation may be voided by the innocent party;

(d) if the contract is voided, any release or limitation of liability contained in the contract will also fall; and

(e) the innocent party will be entitled to rescission or damages for fraudulent misrepresentation.

458 Counsel for ParkLane submits that the exculpatory clause in the Donor Declaration is extremely broad and applies to all claims, including not only claims for breach of contract and misrepresentation, but also claims for fraud and unconscionable conduct. He says that the clause bars all claims, regardless of the potential that the contract may be unenforceable. Suffice to say that the language of the Donor Declaration is general and does not expressly refer to claims for misrepresentation, fraud, or unconscionability. To the extent it did, or did so by implication, there would be a strong argument that such a clause would be a nullity, based on the principles expressed in *S. Pearson & Son Ltd. v. Dublin Corp.*, above.

459 As I will explain, the plaintiff's evidence satisfies me that a trial is required to determine whether ParkLane committed a fraud or made fraudulent misrepresentations that would entitle Cannon to void the contract.

**(b) Consumer Protection Act, 2002**

460 The *Consumer Protection Act, 2002* stipulates that the procedural and substantive rights afforded by the statute cannot be waived. Section 7(1) provides:

The substantive and procedural rights given under this Act apply despite any agreement or waiver to the contrary.

461 If it is determined at trial that ParkLane made false, misleading or deceptive representations, and thereby breached s. 17 of the statute, the release language in the Donor Declaration would be to no avail and Cannon may have a right of rescission.

### (c) Unconscionability and Public Policy

462 In *Tercon Contractors*, the Supreme Court of Canada laid to rest the doctrine of fundamental breach, as it applied to the effect of an exclusion clause. It substituted an analytical framework that requires the Court to determine:

- (a) whether, as a matter of interpretation, the exclusion clause applies to the circumstances established in the evidence;
- (b) if the exclusion clause applies, whether the clause was unconscionable and therefore invalid, at the time the contract was made; and
- (c) if the clause is held to be valid under (b), whether the Court should nevertheless refuse to enforce the exclusion clause, because of an "overriding public policy, proof of which lies on the other party seeking to avoid enforcement of the clause, that outweighs the very strong public interest in the enforcement of contracts" (at para. 123).

463 The analysis under (b) - unconscionability - will require an examination of the factual circumstances in which the contract was made, including whether there was unequal bargaining power. As applied to this case, the examination could include the role played by the Distributors and the amount and accuracy of information provided by ParkLane to the Distributors, as well as any limitations on the ability of the Distributors to disclose such information to their clients.

464 The analysis under (c) - an overriding public policy - will also require close consideration of the circumstances surrounding the making of the contract. As Binnie J. observed in *Tercon Contractors*, at para. 120:

Conduct approaching serious criminality or egregious fraud are but examples of well-accepted and "substantially incontestable" considerations of public policy that may override the countervailing public policy that favours freedom of contract. Where this type of misconduct is reflected in the breach of contract, all of the circumstances should be examined very carefully by the court. Such misconduct may disable the defendant from hiding behind the exclusion clause.

[emphasis added]

465 I turn now to the question of whether there is a genuine issue requiring a trial in this matter.

#### 4. Is a Trial Required?

466 ParkLane does not, in general, contest the propositions of law I have set out above. It submits, however, that Cannon has failed to show that his claims of fraud and unconscionability have a real chance of success and *require* a trial. It says that he has failed to provide "real evidence to support the finding, not inference and speculation" that ParkLane committed a fraud: see *Vaillancourt v. Watson*, [1994] O.J. No. 214, 69 O.A.C. 227 (Ont. C.A.) at para. 21. ParkLane says that Cannon cannot simply rest on his pleading or on assumptions about what the evidence may show at trial.

467 ParkLane relies on *Canada Trustco Mortgage Co. v. Barclay*, [1996] O.J. No. 2734, 12 C.C.L.S. 286 (Ont. Gen. Div.), which it says is on all fours with the facts of this case. Canada Trustco had brought a motion for summary judgment against eleven investors who had borrowed from it in order to finance their investments in a series of tax shelters. The investments went bad and the investors suffered a financial loss.

468 There was no dispute that the defendants had borrowed money from Canada Trustco or that they were in default. They asserted, however, that Canada Trustco had misrepresented the investment, that the investment breached the *Securities Act* because there was no offering memorandum, and that the representatives of the tax shelter had acted as agents for Canada Trustco.

469 Chadwick J. found that there was no genuine issue for trial on all three issues. There was no evidence of any close connection between Canada Trustco and the promoters of the tax shelter. Nor was there evidence of any misrepresentation. There was no evidence that Canada Trustco was aware of the *Securities Act* requirements and no evidence to show any agency relationship between the promoters and Canada Trustco.

470 ParkLane suggests that these circumstances are similar in the case before me because Cannon had little real contact with ParkLane and obtained his information from Gacich.

471 In my view, the differences between this case and *Canada Trustco* are significant. They only serve to highlight why this case is not suitable for summary judgment. Canada Trustco was simply a lender. It did not create the tax shelter and it did not market it. It loaned money to the defendants to enable them to make an investment that they had already decided to make. In this case, in contrast, Furtak and ParkLane created the Gift Program and the entire structure that supported it. They created the marketing materials that contain the alleged misrepresentations at issue. They created the marketing structure, recruited the Distributors, trained them and told them what information they could and could not provide to their clients. Furtak also created the "back half" of the Gift Program, which funneled most of the profits of the Gift Program to the Bermuda Trust and to the ParkLane Defendants, which he owned or controlled.

472 Unlike the situation in *Canada Trustco*, and as I have discussed elsewhere in these reasons, there is evidence in this case to support the existence of an agency relationship between ParkLane and the Distributors, the denial in the distributorship agreement notwithstanding. In this case, unlike *Canada Trustco*, there was also an inextricable link between ParkLane and the donors.

473 On one view of the evidence, the Gift Program was a *bona fide*, well-designed plan to minimize taxes, the risks of which were clearly understood and accepted by all participants. One of those risks unfortunately came to fruition, as every donor was aware it might.

474 On another view of the evidence, the Gift Program was a giant shell game and the so-called Independent Financial Advisors (the "Distributors") were the shills. ParkLane's marketing materials created the impression that there really was a pea under the shell when the donor made a contribution, whereas in fact it was whisked away and into ParkLane's pocket as soon as the donor put money on the table. On this cynical view of the evidence, ParkLane's answer is akin to saying, "Well, we may have been playing a shell game, but your trusted financial advisor knew that there was no pea under any shell."

475 Cannon has demonstrated that there are serious issues to be tried concerning the Gift Program and the conduct of the defendants, including ParkLane, Appleby, the Lawyers and others who were instrumental in the establishment, marketing and operation of the Gift Program. I am satisfied that there is indeed a genuine issue requiring a trial concerning where ParkLane's conduct lies on the scale between the innocent view and the sinister view - between *bona fides* and fraud. One of the issues to be considered, by no means the only one, is whether the disclosure of information concerning the "back half" of the Gift Program by ParkLane to the Distributors, to the extent that disclosure actually occurred, is a defence to the plaintiff's claim.

476 I am also satisfied that in the particular circumstances of this case, it is in the interests of justice that the weighing of the evidence, the evaluation of the credibility of witnesses and the drawing of inferences from the evidence should only be exercised by a trial judge.

477 I come to this conclusion for several reasons. First, a finding of fraud is a serious matter and proof of civil fraud, although on a balance of probabilities standard, requires rigorous examination of the totality and quality of the evidence as a whole. This frequently requires an assessment of the credibility of witnesses and, in a case such as this, may require the evaluation,

assessment and comparison of the credibility of a number of witnesses. Even using the motion judge's expanded powers under Rule 20.04(2.1) a summary judgment motion is not a suitable forum for this kind of assessment.

478 Second, as the authorities indicate, the defendant's knowledge and state of mind are vital considerations in cases of fraud and fraudulent misrepresentation. Did the defendant have an honest belief in the truth of the statement? Were the representations made recklessly, not caring whether they were true or false? These issues are best explored through examination and cross-examination in the context of all the other evidence in the crucible of trial.

479 Third, the very nature of the inquiries in cases of fraud, unconscionability and public policy requires that the factual foundation be carefully examined and reconstructed. This case raises an issue about the validity of a tax planning device that was marketed to almost 10,000 Canadians. It raises issues about the proper use and alleged misuse of the tax laws pertaining to charities. These are matters of public interest and it is desirable that there be a full airing of the issues in the context of a trial.

480 ParkLane has submitted, relying on *Tercon Contractors* and by way of reply to Cannon's arguments, that the Court has "no discretion to refuse to enforce a valid and applicable contractual exclusion clause" absent "some paramount consideration of public policy sufficient to over-ride the public interest in freedom of contract to defeat the contractual rights of the parties" (*Tercon Contractors* at para. 82). It also submits that Cannon's evidentiary burden is not simply to show that there are triable issues, but rather to show that there is real evidence to support a finding that ParkLane is prevented from relying on the exclusion clause for reasons such as fraud.

481 The first part of this submission begs the question of whether the exclusion clause is "valid". As I have shown, the authorities support the conclusion that if the contract is vitiated by fraud, the exclusion clause falls with it. The second part of this submission over-states Cannon's burden. He is not required to affirmatively establish that ParkLane cannot rely on the exclusion clause. He is required to show, by real evidence, that there is a genuine issue requiring a trial.

482 In my view, Cannon has done just this. The ParkLane marketing brochures were the only documents that were designed with the specific purpose that they would be provided to prospective donors. They contained statements such as:

- the Donations Canada Trust had been established "with a funding commitment of \$200,000,000 *in cash* to promote charitable giving in Canada" (emphasis added);
- the Gift Program had, as of January 2, 2007, "raised far in excess of \$400,000,000 for various registered charities";
- participation in the Gift Program would enable taxpayers to make "cash donations" to charities;
- the charity would receive "cash" from both the donor and from the redemption of the sub-trust units;
- there would be a \$7,500 "cash distribution" to the charity from the redemption of the sub-trust units in addition to the participant's \$2,500 "cash donation";
- the Harris Comfort Letter referred to the donor making a "cash donation" and a "donation in kind" to the charity.

483 These statements are capable of being interpreted as representations that there was \$200 million in real cash waiting to be pumped into Canadian charities to match the donors' cash donations and that the charities would be receiving real cash to support the charitable receipt that the donors would receive. Structuring the program so that the charity got next to nothing and most of the money went into the pockets of the promoters, and marketing the program in a way that masked or distorted the truth, raises a serious issue of whether the ParkLane Defendants should be able to rely any of the exclusionary language in their contracts.

484 In summary, while there is certainly an argument that the exclusion clause in the Donor Declaration bars Cannon's claims under the ordinary principles of contractual interpretation, this will not entitle ParkLane to summary judgment if Cannon is able to establish fraud, unconscionability, a breach of the *Consumer Protection Act, 2002* or a public policy reason not to enforce the contract. The donors have ended up with nothing. The evidence raises real questions about whether the charities have ended

up with anything of real value. ParkLane, its Distributors, (a.k.a. "Independent Financial Advisors", a.k.a. "fundraisers"), its founder and its affiliates have ended up with most of the donor's money in their pockets.

485 Having regard to the evidence adduced by both sides, and for the reasons I have expressed, I am satisfied that the plaintiff has discharged the burden of showing that his claims have a real chance of success and that there is a genuine issue requiring a trial. I am also satisfied that fairness to both parties - not just the plaintiff - requires that there be a trial. It would not be possible to acquire a full appreciation of the evidence on the written record and that it would not be in the interests of justice to decide these issues on a motion.

### ***C. The Lawyers' Motion for Summary Judgment***

486 The Lawyers move for summary judgment dismissing Cannon's claims for negligence and negligent misrepresentation. I will begin by setting out the positions of the parties, followed by my analysis of the evidence and the arguments.

#### *1. Submissions of the Lawyers*

487 The Lawyers say that Cannon is unable to establish that he was in a sufficiently close relationship with Harris and the Law Firms to give rise to the existence of a duty of care. They rely, in particular, on the decision the Supreme Court of Canada in *Cooper v. Hobart*, above, which I will discuss.

488 The Lawyers submit that the uncontested evidence is that Harris issued each Opinion Letter on the express understanding that:

- (a) the Opinion Letter was exclusively for the benefit of ParkLane (this was stated on the face of the letter);
- (b) donors and potential donors would not be permitted to view the Opinion Letter;
- (c) donors would be receiving independent professional tax advice;
- (d) professional advisors to the donors and to potential donors could view the Opinion Letter for the sole purpose of providing advice to their clients (although the ability of such advisors to view the opinion would be subject to strict limits and controls);
- (e) donors would be required to execute documentation acknowledging receipt of independent professional advice prior to participating in the Gift Program; and
- (f) donors would be required to execute documentation acknowledging the assumption of tax risks, including the risk of C.R.A. reassessment, relating to their participation in the Gift Program.

489 The Lawyers' argument is that they had no relationship of proximity to Cannon and therefore owed him no duty of care. It follows, they say, that Cannon's claims in negligence and negligent misrepresentation cannot succeed. They point out that Cannon had no direct contact with Harris, never saw the opinions he had written, and obtained advice concerning the Gift Program from Gacich. They say that Cannon's knowledge of the Gift Program was informed by the promotional materials he received in each of 2005 and 2006, by the contractual documents he executed in each of those years, by the advice he received from Gacich and by his own knowledge, in the fall of 2006, before he filed his own tax return, that C.R.A. would be auditing the Gift Program. They say that Cannon knew from the Comfort Letters contained in the ParkLane brochures that Harris and the Law Firms accepted no responsibility to the donors and Cannon was fully aware of the risk of re-assessment by C.R.A. He executed the Donor Declarations and the Tax Risk Disclosure Statement (in 2006), in which he confirmed his awareness of the risks and the fact that he had received independent advice from Gacich.

490 The Lawyers say that, as Cannon's claim against them is for pure economic loss and does not fit into one of the recognized duty of care categories, Cannon is required to establish a duty of care based on the principles set out in *Anns v. Merton London Borough Council (1977)*, [1978] A.C. 728 (U.K. H.L.) and amplified by the Supreme Court of Canada in *Cooper v. Hobart*.

491 On the first stage of the *Cooper v. Hobart* analysis, *proximity*, the Lawyers say that the relationship between Cannon and Harris was not sufficiently close to make it just and fair to impose a duty of care on Harris. On the second stage of that analysis, *public policy*, the Lawyers say that imposing liability on the Lawyers would give rise to indeterminate liability to an indeterminate class in circumstances where they took deliberate and reasonable steps to avoid such liability.

492 With respect to the claim in negligent misrepresentation, the Lawyers say that no duty of care was owed to Cannon on the basis of a "special relationship" and that reliance by Cannon was neither foreseeable nor reasonable.

493 The Lawyers say that this case falls nicely with the category of cases that the Court of Appeal has identified in *Combined Air Mechanical Services Inc. v. Flesch* as being suitable for summary judgment: there are few contentious factual issues, the case is largely documentary and it is not necessary to make findings of fact or to draw inferences based on contentious facts.

## 2. Submissions of the Plaintiff

494 Cannon submits that Harris had a broad role in the Gift Program, which was not limited to the preparation of his Opinion Letters and the Comfort Letters. He was involved in drafting some of the Gift Program documents and he reviewed and edited some of the promotional materials. He says that not only was Harris negligent in his preparation of the Opinion Letters and Comfort Letters, but he was negligent in the planning and creation of the Gift Program and the promotional materials, failed to provide appropriate information to Class members once he became aware of the C.R.A.'s position, and failed to allow the Class to view his Opinion Letters.

495 The plaintiff says that the Opinion Letters given by Harris are deficient in two ways:

- (a) they fail to disclose the "back half" of the Gift Program or to consider whether this will have tax consequences for donors;
- (b) they fail to address the issue, ultimately raised by the C.R.A. as a reason to disallow the deduction, of the lack of "donative intent" or genuine "impoverishment" of the donors.

496 As part of his case on certification, the plaintiff has adduced the evidence of Vern Krishna, Q.C., who expresses the opinion that Harris failed to address aspects of the Gift Program that Mr. Krishna considered to be an abuse of the charitable donation provisions of the *Income Tax Act*: the circular flow of funds and the enhanced benefit of a \$10,000 deduction that the taxpayer would receive for a charitable donation of only \$2,500.

497 Cannon disputes the assertion that his claim does not fall within a recognized category of economic loss. He says that these categories include negligent misstatement and that in any event, there is a body of authority, including the "disappointed beneficiaries" cases, which holds lawyers liable in negligence where they knew or ought to have known that the third party would be likely to rely on their work. Included in this line of cases, he says, is *Banyan Tree*.

498 In any case, the plaintiff says that this case can satisfy the test in *Cooper v. Hobart* and *Edwards v. Law Society of Upper Canada*, above.

499 Cannon says that the claim against Harris for negligent misrepresentation meets the test in *Queen v. Cognos Inc.*, discussed above, the requisite proximity is present and the existence of a duty of care is not circumscribed by policy considerations or by the disclaimers and other exclusionary language in the Opinion Letters, Comfort Letters and contract documents.

## 3. Duty of Care: Is a Trial Required?

500 The factual foundation for the Lawyers' submission concerning proximity focuses on:

- (a) the lack of a direct connection between Cannon and Harris;
- (b) the fact that Cannon's knowledge of the Gift Program was informed by the advice he received from Gacich;

(c) the fact that Cannon was aware of the risks associated with the Gift Program, including the risk that his donation would be disallowed, and that he signed documents accepting those risks.

501 Viewed through a different lens, however, Harris and Gacich were simply accomplices in the marketing pitch for the Gift Program, which was carefully crafted by Furtak and ParkLane to distance themselves from the donors and to give the Gift Program an aura of credibility and respectability.

502 In the discussion of the facts under the heading of "Marketing Materials", I have described the brochure used by ParkLane to market the Gift Program and the prominent role given to Harris' Comfort Letters, his biography and his photograph. I do not propose to repeat those facts, but the language of the brochure can be interpreted as leading a reasonable reader to conclude that Harris had given opinions that the Gift Program complied with the *Income Tax Act* and that a donor would receive a valid tax credit for the full amount of the donation.

503 This conclusion could only have been reinforced by Harris' Comfort Letters, which, together with the other statements in the brochure, were manifestly intended to give the donor reassurance, that:

- (a) the Gift Program had been reviewed by Harris as a "top Canadian tax and legal professional" or "leading Canadian ... tax law professional";
- (b) Harris' tax opinion, which the donor's financial adviser would be permitted to review, was that the Gift Program complied with the *Income Tax Act*; and
- (c) the donor would receive a valid tax credit for a multiple of his or her personal donation.

504 In *Mustapha v. Culligan of Canada Ltd.*, 2008 SCC 27, [2008] 2 S.C.R. 114 (S.C.C.) at para. 3, the Supreme Court of Canada confirmed the test for negligence as requiring that the plaintiff demonstrate:

... (1) that the defendant owed him a duty of care; (2) that the defendant's behaviour breached the standard of care; (3) that the plaintiff sustained damages; and (4) that the damages were caused, in fact and in law, by the defendant's breach.

505 In this case, the Lawyers address only the first component of the test - the existence of a duty of care. They are, of course, quite entitled to do so - to show that the claim has no chance of success because one of the critical elements of the cause of action cannot be established.

506 In *Attis v. Canada (Minister of Health)* (2008), 93 O.R. (3d) 35, 300 D.L.R. (4th) 415 (Ont. C.A.), the Court of Appeal summarized the test for the existence of a duty of care at para. 26:

In examining whether a duty of care is present, a court must first inquire whether the harm that occurred was the reasonably foreseeable consequence of the defendant's conduct. If foreseeability is established, the question becomes whether the parties were in a relationship of proximity to support a duty of care. If a court finds both foreseeability and proximity, it must then inquire at the second stage of the analysis whether any residual policy considerations negative the imposition of a duty of care.

507 In *Cooper v. Hobart*, the Supreme Court of Canada reviewed the test in *Anns v. Merton London Borough Council* and addressed the role of policy concerns in the scope of liability for negligence. The plaintiff had advanced money to a mortgage broker for investment and had lost much of it. She sued the Registrar of Mortgage Brokers, claiming that he negligently failed to supervise the conduct of the mortgage broker. She sought to have her action certified as a class proceeding. The issue was whether the Registrar owed a duty of care to the investing public for alleged negligence in failing to properly supervise the conduct of a company which he had licensed.

508 The Supreme Court stated that there are two stages in the duty of care analysis. In the first stage of the analysis, the Court looks at whether there is a sufficiently close relationship between the parties, such that it would be foreseeable, in the reasonable contemplation of the defendant, that carelessness on its part might cause damage to the plaintiff.

509 Foreseeability alone is not sufficient, however. The Court must undertake a proximity analysis to determine whether the relationship is sufficiently close to make it fair and just to impose a duty of care.

510 The Supreme Court said that proximity is used to describe relationships that give rise to duties of care. Some well-known categories have been considered to give rise to such a duty, but the law is evolving and new categories will be developed, applying a principled approach. Typically, a duty of care arises where the circumstances of the relationship are "of such a nature that the defendant may be said to be under an obligation to be mindful of the plaintiff's legitimate interests in conducting his or her affairs": *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165, [1997] S.C.J. No. 51 (S.C.C.) at para. 24.

511 In *Cooper v. Hobart*, the Supreme Court said that defining relationships that give rise to a duty of care may involve looking at issues of the parties' expectations, representations, reliance and the interests involved - at para. 34:

Defining the relationship may involve looking at expectations, representations, reliance, and the property or other interests involved. Essentially, these are factors that allow us to evaluate the closeness of the relationship between the plaintiff and the defendant and to determine whether it is just and fair having regard to that relationship to impose a duty of care in law upon the defendant.

512 The Court identified, at para. 36, certain categories in which proximity has been recognized. These include:

- the traditional and common case where the defendant's act causes foreseeable physical harm to the plaintiff or the plaintiff's property;
- cases of nervous shock;
- liability for negligent mis-statement;
- misfeasance in public office;
- a duty to warn of the risk of danger;
- a duty owed by municipalities to prospective purchasers;
- a duty of government authorities with respect to road maintenance;
- relational economic loss; and
- joint venture cases.

513 The Court stated that "when a case falls within one of these situations or an analogous one and reasonable foreseeability is established, a *prima facie* duty of care may be posited."

514 If the case does not fall within one of these categories, the Court must determine whether there is sufficient proximity between the parties - such close and direct relationship between the parties, that it is fair and just to impose a duty of care.

515 The Supreme Court said that if foreseeability and proximity are established, one turns to the question of "whether there are residual policy considerations outside the relationship of the parties that may negative the imposition of a duty of care" (at para. 30). These considerations look to the overall consequences of recognizing a duty of care. The court explained this inquiry at para. 37:

This brings us to the second stage of the *Anns* test. As the majority of this Court held in *Norsk*, at p. 1155, residual policy considerations fall to be considered here. These are not concerned with the relationship between the parties, but with the effect of recognizing a duty of care on other legal obligations, the legal system and society more generally. Does the law already provide a remedy? Would recognition of the duty of care create the spectre of unlimited liability to an unlimited class? Are there other reasons of broad policy that suggest that the duty of care should not be recognized? Following this approach, this Court declined to find liability in *Hercules Managements*, *supra*, on the ground that to recognize a duty of care would raise the spectre of liability to an indeterminate class of people.

516 The Supreme Court emphasized that the second stage analysis is particularly important in novel cases that do not fall within existing categories where a duty of care has been historically recognized. Effectively, this analysis determines that even though foreseeability and proximity are present, giving rise to a *prima facie* duty of care, broader considerations of the effect on society of recognizing such a duty make it unwise to impose one.

517 In the companion case to *Cooper v. Hobart, Edwards v. Law Society of Upper Canada*, the plaintiffs in a proposed class action had paid money into a lawyer's trust account as consideration for gold delivery contracts made with a third party. The plaintiffs were not clients of the lawyer. The contracts turned out to be part of a fraudulent scheme. The lawyer alerted the Law Society of the unorthodox use of his trust account, and the Law Society commenced an investigation. Unfortunately, it was not completed in time to save the plaintiffs' investments. The plaintiffs alleged that that the Law Society had not acted fast enough and that, having been alerted of potential misconduct, it should have taken steps to ensure that the lawyer's trust account was not dissipated. The issues were: whether the Law Society owed a duty of care to persons, not clients of the solicitor, who deposit money into a solicitor's trust account, in respect of losses resulting from misuse of the account and, if there was such a duty, whether there were grounds rooted in policy that would limit or negate the finding of a duty.

518 The Supreme Court summarized the *Anns/Cooper v. Hobart* test as follows, at paras. 9 and 10:

At the first stage of the *Anns* test, the question is whether the circumstances disclose reasonably foreseeable harm and proximity sufficient to establish a *prima facie* duty of care. The focus at this stage is on factors arising from the relationship between the plaintiff and the defendant, including broad considerations of policy. The starting point for this analysis is to determine whether there are analogous categories of cases in which proximity has previously been recognized. If no such cases exist, the question then becomes whether a new duty of care should be recognized in the circumstances. Mere foreseeability is not enough to establish a *prima facie* duty of care. The plaintiff must also show proximity — that the defendant was in a close and direct relationship to him or her such that it is just to impose a duty of care in the circumstances. Factors giving rise to proximity must be grounded in the governing statute when there is one, as in the present case.

If the plaintiff is successful at the first stage of *Anns* such that a *prima facie* duty of care has been established (despite the fact that the proposed duty does not fall within an already recognized category of recovery), the second stage of the *Anns* test must be addressed. That question is whether there exist residual policy considerations which justify denying liability. Residual policy considerations include, among other things, the effect of recognizing that duty of care on other legal obligations, its impact on the legal system and, in a less precise but important consideration, the effect of imposing liability on society in general.

519 The Supreme Court found that the case did not fall within, nor was it analogous to, any category of cases in which a duty of care had previously been recognized. Thus, the plaintiff was required to establish foreseeability and proximity. There was nothing in the *Law Society Act*, R.S.O. 1990, c. L.8, the governing statute, to impose a private law duty of care on the Law Society. Rather, the legislation was geared towards the protection of clients, as opposed to creating a private law duty of care to members of the public who deposit money in a lawyer's trust account. There were existing mechanisms, through the Law Society's Compensation Fund and lawyers' mandatory professional liability insurance, to compensate clients who suffer losses due to dishonesty or negligence of lawyers. Above all, s. 9 of the *Law Society Act* conferred a statutory immunity on the Treasurer, benchers and officials of the Society for acts done in the performance of their duties. This precluded an inference

that the statute was intended to provide protection to members of the public. Accordingly, the Supreme Court found that there was no *prima facie* duty of care. Even if there was a duty of care, it would be negated by policy considerations.

520 In this case, the issue is whether a lawyer who provides an opinion concerning the compliance of a charitable donation program with the *Income Tax Act* and regulations owes a duty of care to donors who have not received or read the opinion and who have been informed that the opinion is available for review by their financial advisors without responsibility on the part of the lawyer. The plaintiff argues that this case is analogous to cases that have recognized proximity between a solicitor and investors or between a solicitor and beneficiaries who have suffered loss due to the negligence of the solicitor, even though they were not in a direct solicitor and client relationship.

521 In *Delgrossos v. Paul* (1999), 45 O.R. (3d) 605, [1999] O.J. No. 5742 (Ont. Gen. Div.), the plaintiff, along with other proposed class members, had invested his RRSPs in mortgages that were syndicated by one of the defendants. The mortgages had been prepared and registered on the subject properties by a solicitor, who was named as a defendant. The investments collapsed and the plaintiff sued the solicitor, alleging that he was negligent and that he knew or ought to have known that the mortgages were part of a fraudulent scheme. Sharpe J. acknowledged that the claim was "somewhat novel", but noted that there was a "developing line of authority" that the plaintiff could draw upon. He referred to *Filipovic v. Upshall* (1998), 19 R.P.R. (3d) 88 (Ont. Gen. Div.) as well as the "disappointed beneficiary" cases: *Whittingham v. Crease & Co.*, [1978] 5 W.W.R. 45 (B.C. S.C.) and *Linsley v. Kirstiuk* (1986), 28 D.L.R. (4th) 495 (B.C. S.C.). He observed, at para. 8:

While I agree that the claim against Paul is somewhat novel, there is a developing line of authority the plaintiff can draw upon. As noted by Chapnik J. in *Filipovic v. Upshall* (1998), 19 R.P.R. (3d) 88 (Ont. Gen Div.) at pp. 104-05, there is a line of cases that holds a solicitor may place himself or herself in a sufficient relationship of proximity to a third party to owe that party a duty of care. In *Filipovic*, the solicitor was retained by a corporation with respect to a real property transaction. The issue was whether the solicitor was liable to the plaintiffs who were investors in the transaction. The plaintiffs thought they were acquiring a beneficial interest in property, but in fact they were shareholders in the corporation. While the solicitor was found not liable on the ground that he had not breached any duty, Chapnik J. did find that he owed the plaintiff investors a duty of care: see pp. 105-06. Solicitors have been found to owe a duty of care to persons not formally retained as clients in other cases which lend support to the plaintiffs [sic] contention that Paul may have owed him a duty of care. In *Whittingham v. Crease & Co.*, [1978] 5 W.W.R. 45 (B.C.S.C.), a solicitor was held to owe a duty of care to the intended beneficiary of a will where the solicitor had been retained by the testator. In *Tracy v. Atkins* (1979), 105 D.L.R. (3d) 632, the British Columbia Court of Appeal found that a solicitor, retained by the purchaser in a real estate transaction, owed a duty of care to the vendor, who was unrepresented, with respect to a take-back mortgage. Similarly, in *Linsley v. Kirstiuk* (1986), 28 D.L.R. (4th) 495 (B.C.S.C.), a solicitor retained by the trustee of the estate was found to owe a duty to the beneficiaries of the estate.

522 In *Delgrossos v. Paul*, Sharpe J. was applying the test under s. 5(1)(a) of the *C.P.A.* and was not making a finding on the merits.

523 The authorities referred to by Justice Sharpe, and other authorities were referred to by Lax J. in *Banyan Tree* in her consideration of the s. 5(1)(a) analysis in relation to the law firm. In *Banyan Tree*, Justice Lax concluded that there was a sufficient relationship between the plaintiffs and the law firm to give rise to a duty of care - at paras. 30 and 31:

Notwithstanding the efforts of counsel for [the law firm] to confine these cases to their facts and to distinguish them, there is clearly a developing line of authority in Ontario and elsewhere that have permitted claims of this kind to proceed. FMC pointed to no authority that rejected a third party negligence claim against lawyers at the certification stage. I regard *Hurst v. Price Waterhouse Coopers (PWC) LLP, Canada*, [2009] O.J. No. 1415 on which FMC relies as entirely distinguishable. This was a claim for negligent misrepresentation, reckless misrepresentation, and negligence in which the allegedly wrongful act by PWC amounted only to having its name appear as auditor on an offering memorandum. This was found insufficient to establish a relationship giving rise to a *prima facie* duty of care.

Whether or not the plaintiffs and proposed class members are akin to disappointed beneficiaries, it is certainly arguable that FMC ought reasonably to have foreseen that its tax opinion would be used to market the gift program and that the participants would be "disappointed" and suffer damages if FMC was negligent in giving that opinion. In my view, FMC placed itself in a relationship of sufficient proximity to owe a *prima facie* duty of care to the plaintiffs and proposed class members and I would leave to trial the question of whether policy considerations ought to negative that duty.

[Emphasis added].

524 In answer to the law firm's argument that the plaintiffs admitted that they had not read the opinions, Justice Lax noted that the claim was not advanced on the basis that there was a direct relationship with the law firm and whether the plaintiffs read or relied on the opinions was irrelevant to the law firm's liability. The same is true here.

525 On an application for leave to appeal the decision of Lax J. in *Banyan Tree, Robinson v. Rochester Financial Ltd.*, [2010] O.J. No. 1481, 2010 ONSC 1899 (Ont. Div. Ct.), Dambrot J. stated at para. 24:

Here, equally, the absence of direct reliance by the plaintiffs on the solicitor's advice may not be determinative. Even without direct reliance on the advice, it remains arguable that when the plaintiffs entered the scheme, they were relying on the legal advisors of the architects of the scheme to ensure that their pledges would qualify as valid charitable donations for tax purposes. If the legal advisors acted negligently in giving their advice to the gift plan defendants, the plaintiffs could have a claim in negligence against those legal advisors.

526 That is precisely the situation here.

527 The Lawyers distinguish *Banyan Tree* on the basis that in this case, the Opinion Letters were not permitted to be shown to donors, whereas in *Banyan Tree*, the letters were written in contemplation that they would be provided to donors and specifically stated that they could be relied upon by donors as well as the promoters. They point out as well that Cannon acknowledged that he had received independent advice and was aware of the risk that his donation might be disallowed.

528 To the contrary, both the distinguishable facts in *Banyan Tree* and the fact that it was concerned not with summary judgment but with the "plain and obvious" test under s. 5(1)(a) of the *C.P.A.* make the case for a duty of care in this case even stronger than in *Banyan Tree* and the disappointed beneficiary cases.

529 In this case, the Comfort Letters were supplied by the Lawyers with the knowledge that they would be used to market the Gift Program. Harris and the Law Firms also knew, or ought to have known, that the Gift Program could not be launched without a favourable tax opinion by a leading Canadian tax expert. They knew that the existence of such an opinion would be touted by the promoters, as in fact it was. In *Banyan Tree*, Lax J. found that it was "arguable" that the law firm "ought reasonably to have foreseen that its tax opinion would be used to market the Gift Program and that the participants would be 'disappointed' and suffer damages if [the law firm] was negligent in giving the opinion." This case is stronger in that regard than *Banyan Tree* because, in this case, Harris and the Law Firms knew that the Opinion Letters were being used to market the Gift Program.

530 It is my view, therefore, that a strong argument can be made that this is a case that falls within an existing category in which a duty of care has been recognized -a duty of care owed by a solicitor to third parties who have not formally retained the solicitor but who rely on the solicitor to protect their interests. These would include the "disappointed beneficiary" cases (for example, *Whittingham v. Crease & Co.* and *Linsley v. Kirstiuk*), the investor cases (*Delgrossos v. Paul* and *Filipovic v. Upshall*), and charitable donation or tax shelter cases such as *Banyan Tree*, and *Lipson v. Cassels Brock & Blackwell LLP*.

531 I will, however, assume that this case does not fall within an existing category in which a duty of care has been recognized and I will ask whether there was a sufficient relationship of proximity between Cannon and Harris to give rise to a duty of care.

532 The proximity analysis requires the Court to engage in a fact-based examination of the relationship between the parties to determine whether that relationship is sufficiently close that it would be fair and just to impose a duty of care. The touchstones

for the analysis were, as I have noted, described by the Supreme Court of Canada as expectations, representations, reliance and the property or other interests involved.

533 Under these headings, the Lawyers point to the fact that the Gift Program had been carefully word-smithed to bullet-proof ParkLane and the Lawyers from claims by the donors if the program failed to deliver valid tax deductions. They say that the brochures provided to Cannon, the documents he signed and the advice and information he received from Gacich are inconsistent with either an expectation that Harris was looking after his interests or reliance on Harris's opinion. They say that the express representations made by Cannon are inconsistent with a close relationship with Harris and that, in light of those, Harris could not have contemplated that Cannon would rely on his opinion.

534 In my view, the Lawyers' analysis glosses over the significance of Harris in the successful marketing of the Gift Program - specifically, the significance of allowing his name, his impressive credentials and reputation and his photograph, along with his Comfort Letters, to be held out as having endorsed the Gift Program as being an effective and *bona fide* tax planning device. One over-riding representation that was made by the Gift Program brochure was: "This program has the endorsement of a leading Canadian tax expert, Edwin C. Harris Q.C., who has given an opinion that it is legitimate and that it will work." As I have noted, Harris permitted this representation to be made. He admitted on cross-examination that the Comfort Letter was prepared by him with the intention that it would be included in the Gift Program materials that would be given to potential donors to show that it was a *bona fide* program.

535 I noted earlier in these reasons that the successful marketing of the Gift Program depended on the existence of a legal opinion that the program complied with the *Income Tax Act* and that donors could expect to receive a tax deduction. Without such an opinion and the ability to publicize the opinion to prospective donors, the Gift Program would never have gotten off the drawing board. It was not enough for the promoters that Harris be an expert, but cloistered, tax "grinder", unlike some of the other lawyers and accountants who worked on the program - it was essential that they be able to use his name, his photograph, his credentials, his reputation and his opinion, in order to sell the Gift Program. Harris could have refused to permit this. He could have insulated himself from liability in the best way possible, by remaining anonymous, just as the other experts did. In allowing the use of his reputation and opinions, however, he clearly knew that he and his opinions were part of the sales package that was being offered to prospective donors.

536 By permitting himself and his Comfort Letters to be used in the marketing of the Gift Program, Harris intentionally put himself in a close and direct relationship with every donor.

537 The Lawyers rely on the bolded warning in the Opinion Letters stating, "*We assume no responsibility to Donors.*" As Cannon never saw the Opinion Letters and no donor was supposed to see them, this factor does not go to limit the scope of the representations made to the donor. By the same token, the fact that the Comfort Letters contained statements that the donor's financial advisor was permitted to view the Opinion Letter "without responsibility on our part, for his or her sole use in assessing the Program and in determining its suitability to a donor's specific circumstances" does not go to limitation of the Lawyers' responsibility to the donor - although it might be construed as limiting the Lawyers' responsibility to the financial advisor. Nor is there any representation made by Cannon in the Donor Declarations, that could reasonably be regarded as a representation to the Lawyers. There is no mention of the Lawyers in that document, although there is a release of Aylesworth LLP in its capacity as escrow agent.

538 It was reasonably foreseeable that if Harris was negligent in his advice to ParkLane, and the Gift Program did not comply with the *Income Tax Act*, donors such as Cannon would suffer harm. The evidence supports the conclusion that Harris knew, or ought to have known, that his Opinion Letters, and his Comfort Letters, were integral parts of the marketing of the Gift Program and that the whole purpose of his Comfort Letters was to assure donors that he had reviewed the Gift Program and that it was, in his words, *bona fide*.

539 In providing the Comfort Letters, his photograph and his biography, and permitting them to be used in the marketing of the Gift Program, Harris allowed his name and reputation to be put on the line in support of the Gift Program and in so doing became an integral part of the sales pitch. He knew, or ought to have known that his favourable opinion concerning the Gift

Program was being used to sell the Gift Program to donors. He could reasonably foresee that the donors would suffer a loss if he was negligent in the preparation of his opinion.

540 In my view, the evidence in this case raises a genuine issue, requiring a trial, concerning the existence of a duty of care owed by the Lawyers to Cannon. That evidence takes this case well beyond the disappointed beneficiaries cases and the disgruntled investors cases such as *Delgross v. Paul*, *Filipovic v. Upshall* and *Banyan Tree*. It does so because, in this case, Harris permitted himself and his opinion to be held out to donors in the marketing of the Gift Program. There is evidence that Harris knew that this was taking place and knew that donors would be given comfort by his involvement. There is some evidence that Cannon was in fact reassured by Harris' involvement. The circumstances suggest that there were expectations on both sides, representations by Harris and reliance by Cannon, sufficient to give rise to a duty of care and to make it fair and just to impose such a duty.

541 There is also an argument to be made that, in allowing his Comfort Letters to be included in ParkLane's marketing brochure, knowing that prospective donors would not be permitted to see his Opinion Letters, Harris had a duty to ensure that the brochure itself contained an accurate description of the Gift Program. I have identified some statements in the brochure that are capable of being considered misleading. It is arguable that Harris knew, or ought to have known, that they were misleading and that he owed a duty to Class members to either correct the statements or to refuse to permit his Comfort Letter to be used as part of the marketing materials.

542 There is also an argument, which I have discussed earlier, that the Donor Declaration and Tax Risk Disclosure Statement will fall by the wayside if it is established that the Gift Program is impeachable on the ground of fraud or misrepresentation. There is no suggestion whatsoever that Harris was implicated in or aware of any misfeasance, but Canon's execution of those documents will not amount to an assumption of risk if the execution was procured by fraud or in breach of the *Consumer Protection Act, 2002*.

543 I turn to the second stage of the *Cooper v. Hobart* analysis - are there residual policy considerations that would negative the duty of care? These may include such considerations as (a) whether recognizing a duty of care would create the spectre of unlimited liability to an unlimited class; (b) the effect of recognizing a duty of care on other legal obligations, the legal system and society in general; and (c) the existence of other remedies in law: *Cooper v. Hobart* at para. 37.

544 The Lawyers rely primarily on the first consideration - they say that imposing legal obligations on lawyers in these circumstances will impact the ability of lawyers to freely advise their clients and the ability of clients to disclose the fact that advice has been received. They say that this is an indeterminate liability to an indeterminate class "in circumstances where the Law Firms took active and reasonable steps to avoid any such potential exposure arising." They distinguish this case from *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.), because, in this case, the Lawyers could not have known, at the time they gave their opinions, the identity or number of the donors. In *Hercules*, the auditors could have ascertained the identity of the shareholders at the time they prepared their report.

545 In this case, the concern is not that a tax opinion was provided to ParkLane. The concern is that the opinion was provided with the knowledge that ParkLane would advertise its existence to potential donors and would use its author as part of its marketing program. Imposing liability in these circumstances does not interfere with the ability of lawyers to freely advise clients. It may, however, cause lawyers to exercise caution or control when they give an opinion to a client with knowledge that the client proposes to distribute it to numerous third parties for the business purpose of selling the very product of the lawyer's advice. It seems to me that this is a policy reason that would support, rather than limit, the existence of a duty. As a trial is required to fully explore the duty of care analysis, I believe that conclusions on the policy question should be deferred to trial as well.

#### 4. Negligent Misrepresentation: Is a Trial Required

546 My conclusions with respect to the existence of a duty of care in negligence apply equally to the claim against the Lawyers for negligent misrepresentation.

547 The plaintiff pleads that the Lawyers prepared the Comfort Letters on the instructions of ParkLane and "with the intent that they would be read by the Class Members, and relied upon by the Class Members in making their decision to participate in the Gift Program." They go on to plead:

In particular, these Defendants other than the [FFC Foundation Directors] knew that the only reasonable inference to be drawn from the comfort letters was that the Gift Program was a legitimate charitable giving program and that the tax receipts generated by donations under the Gift Program would be accepted as charitable tax credits by CRA.

But for these comfort letters, the Gift Program would not have been launched and the Class would not have participated in the Gift Program. The comfort letters were designed to induce the Class to invest in the Gift Program without disclosing to the Class all of the material risks of investing in the Gift Program, or the true facts relating to the actual operation of the Gift Program. These Defendants, other than the [FFC Foundation Directors] knew, or ought to have known, that the Class Members receiving the comfort letters (but not the opinion letters), would assume that the opinion letters created by the lawyers would opine that the income tax savings represented in the promotional materials for the Gift Program would be permitted without objection from the CRA.

548 The Lawyers' motion for summary judgment on negligent misrepresentation is based on the assertion that the Lawyers owed no duty of care based on a "special relationship" between Harris and his law firms on the one hand and Cannon on the other hand, as required by *Queen v. Cognos Inc.*, discussed earlier. Again, they say that it was not reasonably foreseeable that Cannon would rely on the Opinion Letters, given that he was not permitted to see them, he signed documents denying any reliance and he obtained advice from his own financial advisor.

549 I have found that in providing the Comfort Letter, his biography and his photograph for use in the marketing brochure and as part of the sales pitch for the Gift Program, Harris knowingly brought himself into direct proximity with Cannon and Class members. The only purpose of the Comfort Letter was to help ParkLane sell the Gift Program.

550 It was foreseeable that a donor would rely on the Comfort Letters and it was entirely reasonable that he or she would do so. In *Hercules Management Ltd. v. Ernst & Young*, above, the Supreme Court of Canada set out a list of factors at para. 43 that could be indicative of "reasonableness":

- (a) the defendant had a direct or indirect financial interest in the transaction in respect of which the representation was made.
- (b) the defendant was a professional or someone who possessed special skill, judgment, or knowledge.
- (c) the advice or information was provided in the course of the defendant's business.
- (d) the information or advice was given deliberately, and not on a social occasion.
- (e) the information or advice was given in response to a specific enquiry or request.

551 The Supreme Court made it clear that these factors were not to be considered absolute, exclusive or a strict test of reasonableness.

552 In this case, most, if not all, of these factors are met in relation to Harris. As the Lawyer for ParkLane, who received fees in relation to the Gift Program year after year, he had an indirect financial interest in the success of the Gift Program. He obviously possessed special skill, a fact that was touted by ParkLane. He provided the Comfort Letters in the course of his business as a lawyer and as counsel for ParkLane. The information was given deliberately, and not casually or socially. Finally, the information was given in response to a specific request by ParkLane with knowledge that it would be conveyed to potential donors whose first question would undoubtedly be - "Is it legal?"

553 I find, therefore, that there is substantial evidence in support of the existence of a special relationship between Harris and Cannon so as to give rise to a duty of care.

554 Moreover, on the second aspect of the *Cooper v. Hobart* test, which asks whether there are residual policy considerations that justify denying liability, it seems to me that this is not a case where indeterminate liability would be a concern. Harris knew precisely how his Comfort Letter was going to be used and he knew precisely the class of persons to whom it would be provided. I have discussed this earlier.

555 As I have said, one reasonable interpretation of ParkLane's brochure was that Harris had expressed the opinion that the Gift Program was *bona fide* and would work. The plaintiff has adduced evidence that the Gift Program was not *bona fide*, was simply a scheme to enrich the promoters, had no real chance of success and that Harris should have known this. There is also a credible argument that if the Gift Program was a fraudulent scheme, none of the exclusionary language in any of the Gift Program documentation is of any value to any of the defendants, the Lawyers included. A trial is required in order to fairly examine these issues.

556 The Lawyers' motion for summary judgment is therefore dismissed.

## V. Summary and Conclusions

557 This was a hearing of both a certification motion against multiple parties and summary judgment motions by two sets of defendants. The evidentiary burden on the motions is obviously different. On the certification motion, the plaintiff was only required to show "some basis in fact" that the action meets the requirement for certification, other than the requirement in s. 5(1) (a) of the *C.P.A.* that there be a cause of action. On the summary judgment motions, the defendants were required to establish that there was no genuine issue requiring a trial. I have found, on the evidence before me, that the plaintiff met his burden on certification and that the defendants have failed to meet their burden on summary judgment. While it has been necessary for me to take a hard look at the evidence, it must be understood that my conclusions are not immutable findings of fact, but simply observations first, that there is a basis in fact that this action is appropriate for certification and second, that the plaintiff's claims have a real chance of success and a trial is required in order to come to conclusive determinations of fact and law.

*Motion for certification granted; motions for summary judgment dismissed.*

## Footnotes

- 1 The pleading in the statement of claim is actually against ParkLane and Trafalgar Trading Associates Limited, which appears to be a typographical error. The plaintiff's chart, set out earlier, indicates that the claim is against all the ParkLane Defendants.
- 2 The common issues were: (a) Was it a term of the contract of participation in the Gift Program that participants would receive a charitable donation receipt that would be recognized by Canada Revenue Agency for tax credit purposes? (b) Was it a term of the contract of participation in the Gift Program that participants would not be at risk to repay loans obtained from Rochester? (c) If the answer to (a) and/or (b) is yes, has the contract been breached by the Gift Program Defendants?
- 3 The common issues were: (d) Did the Gift Program Defendants owe a duty of care to participants? (e) If the answer to (d) is yes, what was the nature and extent of that duty? (f) Has the duty of care owed by the Gift Program Defendants to participants been breached?

**Headnote**

Practice --- Parties — Representative or class actions — Procedural requirements

Company was involved in exploration and development of gold mining properties — Stock of company plummeted after press release indicated that properties did not contain levels of gold as represented — Plaintiff investors brought action against company and its senior officers for damages arising from conspiracy, fraudulent misrepresentation and negligent misrepresentation — Plaintiffs' motion for certification class action proceeding was granted in part — Motions judge found that claims of conspiracy and fraudulent misrepresentation raised common issues, but claim of negligent misrepresentation did not raise common issue — Motions judge found that class proceeding was preferable procedure and restricted plaintiff class to those who held shares on date of public disclosure of possible fraud — Plaintiffs' appeal was dismissed — Divisional court held negligent misrepresentation was not common issue because each individual plaintiff required individual inquiry into what representations plaintiff relied on and how plaintiff was affected by particular representation — Divisional court held fraudulent misrepresentation and conspiracy constituted common issues because of one single overarching allegation that every representation, whenever made, was tainted with fraud — Divisional court held motions judge had adequate basis for discretionary conclusion that class action was not preferable procedure for negligent misrepresentation — Appeal by plaintiffs allowed — Divisional court and motions judge erred on matter of general principle — No sufficient difference existed between plaintiffs' claims in fraudulent misrepresentation and negligent misrepresentation to justify certification of only claim of fraudulent misrepresentation — Creation of such dichotomy was error in logic, in principle and in policy — Bar is not to be set too high on common issues factor — Sufficient overlap existed in legal claims of plaintiffs grounded in fraudulent misrepresentation and negligent misrepresentation to justify certification for both claims — Substantial overlap also existed of factual issues common to both claims — Under both claims, focus would be on defendants, their knowledge and their conduct — Existence of numerous representations by defendants should not be used as reason to refuse certification — Certification was potentially way of reducing representations to much smaller number of relevant representations — As most of plaintiffs' claim was proceeding in class proceedings context, no strong reason existed to exclude claim in negligent misrepresentation from proceedings — Fact that determination of some of common issues relevant to claim in negligent misrepresentation would not resolve entire litigation was not determinative — Certification can be preferable procedure in situations far short of final resolution of lawsuit — Determination of common issues would move litigation forward.

**The judgment of the court was delivered by MacPherson J.A.:**

**INTRODUCTION**

1 Disasters spawn litigation. Trains collide or derail, planes crash, ships sink, lakes and rivers become polluted, chemical factories explode, ordinary people eat, drink, wear or use unhealthy or defective products. People — sometimes hundreds, even thousands — are injured or killed by these events. When the crisis subsides, some of the victims turn to the courts for redress and compensation.

2 One of the modern mechanisms for dealing with the litigation fallout from major disasters is the class action. In Ontario, this type of action is regulated in a detailed fashion by a relatively recent statute, the *Class Proceedings Act, 1992*, S.O. 1992, c. 6.

3 In the *Report of the Attorney General's Advisory Committee on Class Action Reform* (1990), a class action was defined in simple, straightforward terms, at p. 15:

A class action is an action brought on behalf of, or for the benefit of numerous persons having a common interest. It is a procedural mechanism that is intended to provide an efficient means to achieve redress for widespread harm or injury by allowing one or more persons to bring the action on behalf of the many.

4 In this passage, one of the principal procedural goals of class actions is stated explicitly, namely litigation efficiency. This goal is sometimes framed with different terminology — judicial economy. The underlying objective of either formulation is the same, namely to find a mechanism to enable the court system to deal efficiently with a large number of claims being made by many aggrieved persons who have all suffered injuries from the same event or product.

5 There is, however, a second fundamental procedural goal of class actions. It is to encourage access by victims to the court system. In its landmark study, *Report on Class Actions* (1982), the Ontario Law Reform Commission discussed the linkage between class actions and access to the courts in considerable detail. The Commission stated its conclusion on this point, at p. 139:

The Commission is of the view that many claims are not individually litigated, not because they are lacking in merit or unimportant to the potential claimant, but because of economic, social, and psychological barriers. We believe that class actions can help to overcome such barriers and, by providing increased access to the courts, may perform an important function in society. Quite clearly, effective access to justice is a precondition to the exercise of all other legal rights.

6 The *Class Proceedings Act, 1992* ("CPA") is anchored in the principles of access to justice and judicial economy. Lawyers and judges in Ontario are in the early stages of grappling with this law. Class proceedings have been certified in several cases. Some of the cases have dealt with defective products such as silicone gel breast implants and pacemakers: see, respectively, *Bendall v. McGhan Medical Corp.* (1993), 14 O.R. (3d) 734 (Ont. Gen. Div.), and *Nantais v. Telectronics Proprietary (Canada) Ltd.* (1995), 25 O.R. (3d) 331 (Ont. Gen. Div.). In other cases, courts have certified mass tort claims in relation to a single accident, for example, a fire in a subway: see *Bywater v. Toronto Transit Commission* (1998), 27 C.P.C. (4th) 172 (Ont. Gen. Div.).

7 Certifications of class actions under the *CPA* have not been limited to situations in which redress is sought for physical injuries. Economic injury or financial loss has also served as a basis for some class actions. For example, a class action was certified for a copyright infringement claim by writers who alleged that a publisher had wrongfully reproduced their work in electronic form: see *Robertson v. Thomson Corp.* (1999), 43 O.R. (3d) 161 (Ont. Gen. Div.). Another class action was certified for a claim by building owners that certain companies had engaged in illegal price fixing in relation to construction materials: see *Chadha v. Bayer Inc.* (1999), 45 O.R. (3d) 29 (Ont. S.C.J.).

8 However, certifications of class actions have not been automatic. Probably the most notable domain in which certification has been refused relates to claims grounded in allegations of misrepresentation. For example, a claim against a petroleum company for misrepresenting the nature of a franchise to potential franchisees was not certified: see *Rosedale Motors Inc. v. Petro-Canada Inc.* (1998), 42 O.R. (3d) 776 (Ont. Gen. Div.). A claim against Ontario Hydro for misrepresentation in the context of a bidding process was also not certified: see *Controltech Engineering Inc. v. Ontario Hydro* (1998), 72 O.T.C. 351 (Ont. Gen. Div.), aff'd. (2000), 130 O.A.C. 367 (Ont. Div. Ct.)

9 The present appeal involves some of the causes of action that have been considered by Ontario courts in previous cases — misrepresentation, anti-competitive practices and conspiracy. It arises in the context of economic, not physical, injuries suffered by thousands of people who invested in a sham gold mining company. The plaintiffs in the action lost a great deal of money. They allege that the defendants, the "insiders" of the company, made great fortunes by lying to the public about the presence of gold in a mine in Indonesia. The investors seek redress from the "insiders" of the company. The procedural mechanism the investors want to employ in their litigation is certification as a class action.

10 The motions judge, Winkler J., certified a class action with respect to three of the claims advanced by the plaintiffs — fraudulent misrepresentation, the tort of conspiracy and breach of the *Competition Act*, R.S.C. 1985, c. C-34. However, he

refused to certify a class action for a fourth claim put forward by the plaintiffs, namely negligent misrepresentation. Winkler J.'s decision was upheld by the Divisional Court.

11 The appeal from the Divisional Court's decision raises at least two interesting and important questions. First, is it appropriate to certify part of an action as a class proceeding? Is it logical and desirable to permit a two-track lawsuit, with some claims proceeding under the *CPA* while others advance through the normal route of lawsuits initiated by individual plaintiffs? Second, is there a sufficient distinction between the torts of fraudulent misrepresentation and negligent misrepresentation to justify routing them onto separate tracks in the litigation process? Why is it appropriate to certify a class action for a claim of fraudulent misrepresentation, but refuse certification for a claim of negligent misrepresentation?

## **A. FACTUAL BACKGROUND**

### **(I) The events**

12 I begin this section of my reasons with two preliminary points, the first to provide context, and the second in the nature of a warning.

13 The contextual point is this. The plaintiffs initiated eight lawsuits relating to the Bre-X gold mine and stock market debacle which I will shortly describe. The main action is against Bre-X Minerals Ltd., Bresea Resources Ltd. and various individuals who held senior positions in these companies. In the main action, the plaintiffs also sued two stock brokerage firms, Nesbitt Burns Inc. and First Marathon Securities Ltd., and two research analysts, Egizio Bianchini and Kerry Smith, employed by these firms. The second action was brought against two engineering companies which conducted analyses of gold resources on behalf of Bre-X. Five other actions were brought against various stock brokerage firms and some of their individual analysts who are alleged to have promoted Bre-X stock. An eighth action was brought against Ingrid Felderhof and Spartacus Corp.; it was stayed at an early juncture.

14 The motions judge heard motions seeking certification of the first seven actions as class proceedings. His decision was that class proceedings were inappropriate for all seven actions. His decisions with respect to all of the brokerage firms, the two engineering firms, and all of the named individual analysts in those firms, have not been appealed by the plaintiffs. In other words, the only defendants who remain in the proposed class action are the companies and individuals directly involved in the gold mine venture. I make this point at the outset to indicate that what might appear on the record as a highly complicated matter (eight lawsuits, three categories of defendants, and almost three dozen named defendants) is in fact, at this juncture, a much smaller matter — a single action, a single category of defendants and ten named defendants. In short, the lawsuit that will go forward is against two gold mine companies and their senior officers; it no longer relates to stock brokerage firms or engineering companies which provided professional services to the gold mine companies and to investors.

15 I move now to my second preliminary point. Although the title and sub-title of this section of my reasons are "factual background" and "the events," an important warning is required at the outset. There has been no trial in this matter. Indeed, at this juncture none of the defendants has been required to file a Statement of Defence. The "facts" in the action thus far are not facts at all; rather, they are allegations by the plaintiffs. However, as required by the *CPA*, the courts below accepted the factual background set out in the plaintiffs' statement of claim for purposes of determining whether the plaintiffs' claims should be certified as a class action. I will do the same, but underline that at this point no one should accept those allegations as proven.

16 Bre-X Minerals Ltd. ("Bre-X") was a junior mining company. In 1989, its shares were listed on the Alberta Stock Exchange. Bresea Resources Ltd. ("Bresea") and Bre-X held shares in each other. Bresea was controlled by the directing minds of Bre-X.

17 In 1987, an Australian based joint venture obtained a contract of work to drill for gold in a remote area of Indonesia known as the Busang. For several years, the results of the project were generally poor. In the spring of 1993, Bre-X acquired an option to purchase an 80 per cent interest in the Busang project.

18 On May 6, 1993, Bre-X and Bresea issued a press release announcing the deal and stating that the property showed sufficient gold to yield an annual after-tax cash flow of US \$10 million to Bre-X. Thereafter, Bre-X and Bresea issued a series

of 160 press releases and other statements building on the favourable results in the first release. From January 1994, Bre-X reported core drilling results that gave investors reason to believe that the Busang properties contained one of the largest gold deposits ever discovered. The price of Bre-X shares rose from 50 cents in 1993 to more than \$200 in late 1996. Many Canadians made fortunes during these years by trading in Bre-X shares.

19 In fact, there were no economic gold deposits in the Busang properties. The core samples drilled by Bre-X had been, in the language of the mining industry, "salted" with gold which could not have come from the Busang. In short, someone committed a massive fraud. As expressed bluntly in a May 3, 1997 report by Strathcona Mineral Services Ltd., a company retained by Bre-X to perform a technical audit of Bre-X's exploration work:

[T]he magnitude of the tampering with core samples that we believe has occurred and resulting falsification of assay values at Busang, is of a scale and over a period of time and with a precision that, to our knowledge, is without precedent in the history of mining anywhere in the world.

20 In 1997, Bre-X collapsed. Its shares became worthless, and many Canadians lost fortunes. Some of them want to sue those they hold responsible for the fraud.

### **(2) The parties**

21 At present, there are three representative plaintiffs in the class action. 3218520 Canada Inc. was the corporate investment vehicle for Greg Windsor. He purchased 500 Bre-X shares in September 1996 for \$13,975. Osamu Shimizu purchased 300 Bre-X shares in September 1996 for \$7887. Both of these sets of shares are now worthless. 662492 Ontario Limited was the corporate investment vehicle for Ivo Battistella. Between May 1996 and April 1997, he traded in Bre-X shares and lost about \$762,000.

22 The plaintiffs have sued Bre-X and Bresea. They have also sued several Bre-X "insiders," including David Walsh, Chairman and President<sup>1</sup>, Jeannette Walsh, Corporate Secretary, John Felderhof, Vice-Chairman, Senior Vice-President and supervising geologist, T. Stephen McAnulty, Vice-President, John Thorpe, Treasurer, Rolando Francisco, Executive Vice-President and Chief Financial Officer, Hugh Lyons, outside director, and Paul Kavanagh, outside director. The plaintiffs allege that these insiders were responsible for their losses and, in addition, made huge financial gains by selling their own Bre-X shares before the fraud became known. The scale of the alleged fraud, and some sense of the magnitude of the losses suffered by investors, is apparent from the financial gains the insiders are alleged to have garnered: David Walsh — \$25,018,512; Jeannette Walsh — \$30,605,010; John Felderhof — \$71,211,417; Stephen McAnulty — \$8,234,460; John Thorpe — \$4,109,973; Rolando Francisco — \$1,254,500; Hugh Lyons — \$3,250,000; and Paul Kavanagh — \$511,500.

### **(3) The litigation**

23 On April 3, 1997, the plaintiffs issued their notice of action. On November 3, 1997, they delivered their Statement of Claim. Their claim is grounded in four causes of action: the torts of conspiracy, fraudulent misrepresentation and negligent misrepresentation, and breach of the *Competition Act*. On December 3, 1997, the plaintiffs brought their motion for certification of the action as a class proceeding.

24 The requirements for certification are set out in s. 5 of the *CPA*:

- 5(1) The court shall certify a class proceeding on a motion under section 2, 3 or 4 if,
  - (a) the pleadings or the notice of application discloses a cause of action;
  - (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
  - (c) the claims or defences of the class members raise common issues;
  - (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and

- (e) there is a representative plaintiff or defendant who,
  - (i) would fairly and adequately represent the interest of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

25 On April 8, 1998, the motions judge, Winkler J., determined that the pleadings disclosed a cause of action pursuant to s. 5(1)(a). On February 11, 1999, the motions judge adopted a national class as the identifiable class under s. 5(1)(b). This class included persons not resident in Ontario, although these non-residents were permitted to opt out of the class and the action.

26 On May 13, 1999, the motions judge disposed of the remaining aspects of the certification motion, including certification of common issues (s. 5(1)(c)), preferable procedure (s. 5(1)(d)), representative plaintiffs (s. 5(1)(e)) and the remaining issues of class description.

27 On the question of common issues, the motions judge certified 15 common issues for determination in a class proceeding. The formal Order provides:

8. THIS COURT DECLARES that the common issues for the Class against the Certified Defendants are:

- (a) Did Busang contain gold in commercial quantities or in quantities sufficient to make the mining of it commercially viable ("gold in mineable quantities")?
- (b) Was Bre-X operating a legitimate business?
- (c) Were the core samples from Bre-X salted with gold and, if so, how, when, where and by whom?
- (d) Did Bre-X follow generally accepted mining exploration practices and techniques and, if not, how did it deviate? Was any deviation reasonable under the circumstances?
- (e) Did Bre-X, Bresea and the Insiders or any of them conspire to inflate the price of Bre-X and Bresea shares on the Markets? If they did, what are the particulars of the conspiracy?
- (f) Did Bresea and the named individual defendants, or any of them, know or ought to have known the answers to the questions (a), (b), (c), (d) and (e) or any of them and, if so, who knew or ought to have known what, when and why and what should have they done, if anything?
- (g) Did Bre-X and/or the named individual defendants represent that:
  - (i) There is gold in mineable quantities in the Busang?
  - (ii) Any company associated with SNC-Lavalin Inc. audited Bre-X's work or otherwise verified the accuracy of Bre-X's resource database?
  - (iii) Bre-X was operating a legitimate business?
- (h) Were the representations identified by issue (g) made knowing that they were false or recklessly, caring not whether they were false or without exercising reasonable care and attention?
- (i) Are the named individual defendants, or any of them, personally liable for any damages resulting from or caused by the representations identified by issue (g)?

- (j) What is the meaning of the words "as a result of" in section 36 of the *Competition Act*?
- (k) Does the *Negligence Act* or the concept of contributory negligence apply in assessing loss or damage under section 36?
- (l) Must the plaintiffs prove an anti-competitive component to the *Competition Act* cause of action? If so, have they? Does Part VI apply to behaviour which is not anti-competitive?
- (m) Should the full costs of investigation in connection with this matter and the cost of the proceedings or part thereof be assessed globally as provided for in section 36 of the *Competition Act*, and, if so, who should pay and in what amount(s)?
- (n) Was there a breach of section 52 of the *Competition Act* by Bre-X and the named individual defendants giving rise to liability pursuant to section 36 if the Class member can prove damages as a result of the representation(s)?
- (o) Was the conduct of the defendants, or any of them, such that they ought to pay globally to the Class members exemplary or punitive damages?

28 The motions judge held that these common issues relate to the torts of conspiracy and fraudulent misrepresentation and to breach of the *Competition Act*. He also held that a class proceeding is the preferable procedure for the resolution of these common issues.

29 There is no dispute about any of the above. The motions judge's decisions relating to whether the pleadings disclose a cause of action and his definition of the plaintiff class have not been appealed. Moreover, his identification of 15 common issues and his determination that these issues are relevant to the conspiracy, fraudulent misrepresentation and *Competition Act* causes of action have been accepted by all parties.

30 The point of contention in this appeal relates to the motions judge's determination, confirmed by the Divisional Court, that the 15 common issues he identified *did not* relate to the claim of negligent misrepresentation. Additionally, the motions judge held, and the Divisional Court confirmed, that if some of the common issues were applicable to negligent misrepresentation, nevertheless the preferable procedure was that they be determined in separate actions brought by individual plaintiffs. In short, the courts below have held that the plaintiffs' claims in conspiracy, fraudulent misrepresentation and breach of the *Competition Act* meet all of the components of the test in s. 5(1) of the *CPA*, but that the plaintiffs' claim in negligent misrepresentation fails both s. 5(1)(c) ("common issues") and s. 5(1)(d) ("preferable procedure"). Hence, the courts below refused to certify the claim in negligent misrepresentation as part of the class action.

31 The plaintiffs sought leave to appeal from the decision of the Divisional Court upholding the motions judge's refusal to permit the claim in negligent misrepresentation to proceed as part of the class action. By Order dated March 14, 2000, a panel of this court (Osborne A.C.J.O. and Abella and Moldaver JJ.A.) granted the plaintiffs' motion for leave to appeal.

## **B. ISSUES**

32 There are two issues on this appeal:

- (1) Did the Divisional Court err in failing to order that the class proceeding which will determine the 15 certified common issues should apply to the claim in negligent misrepresentation?
- (2) Did the Divisional Court err by determining that a class action was not the preferable procedure for dealing with the negligent misrepresentation claim?

## **C. ANALYSIS**

### ***(1) The "common issues" issue***

33 The motions judge certified 15 common issues for the class action. He explicitly held that these common issues are relevant to three of the legal claims advanced by the plaintiffs — conspiracy, fraudulent misrepresentation and breach of the *Competition Act*.

34 However, the motions judge further held that the 15 common issues did not relate to the plaintiffs' claim of negligent misrepresentation. He explained the different results for the torts of fraudulent misrepresentation and negligent misrepresentation in this fashion:

The essence of each tort is the representation made by the defendant to the plaintiff. The plaintiffs contend that the series of statements contained in the press releases and other documentation emanating from Bre-X, notwithstanding their number and diversity of content, contain a common misrepresentation, namely that "gold was present in mineable quantities in the Busang." Thus they contend that a number of common issues arise from what they state is a singular misrepresentation.

The plaintiffs identify some 160 statements made by the defendants over a 4 year period to a class indeterminate in number and national in scope. The statements were distributed to the public through various forms of media and subject to whatever editorial control that may have been exercised by the respective proprietors. The statements were received by investors with varying degrees of sophistication and knowledge, and more importantly, differing investment strategies.

.....

A reduction of the numerous representations to a common representation requires analysis and characterization of each individual representation, the plaintiff's perception of the representation and the circumstances in which it was made. This is, of necessity, an individual inquiry. Thus, the plaintiffs' contention that a multitude of statements can be reduced to a single core representation is antithetical to the essence of a common issue in a class proceeding. That is to say, that the common trial in the class proceeding is intended to resolve issues which have been determined to be common between the defendants and the plaintiff class. As such, a resolution binds every class member. The existence of the common issue must be discernible at the certification stage since it provides the basis for the common issue trial and the viability of a class proceeding. The common issue cannot be dependent upon findings which will have to be made at individual trials, nor can it be based on an assumption to circumvent the necessity for the individual inquiries. *As such, there is no prospect of a resolution in a trial on common issues which would advance this litigation in any manner as it relates to the claim in negligent misrepresentation.*

However, I am of the view that the claim in fraudulent misrepresentation raises common issues. The plaintiffs' allegation is that the Bre-X operation was fraudulent. Therefore, it is contended, every representation, whenever made, is tainted by the fraud. The allegation that the fraud permeates every statement raises common issues regardless of whether individual issues may arise from the actual communications made to the class members. [Emphasis added.]

35 In a relatively short endorsement, the Divisional Court agreed with the motions judge's reasoning and with the dichotomy he created. A. Campbell J. said:

There is a complex, overlapping, differing and sometimes inconsistent tissue of representations made by different people at different times. As Winkler J. pointed out, the case of each individual plaintiff requires an individual inquiry as to what representations he or she relied upon and how he or she was affected by the particular representation. These individual inquiries cannot be circumvented.

The common issue cannot be dependent upon findings which have to be made, as here, at individual trials.

36 There is no doubt that class actions are a new, different and, in many cases, complex development in the Ontario legal system. Because of this, a practice has developed of assigning a small number of judges to hear certification motions. Those judges develop an expertise which should be recognized and respected by appellate courts. As expressed by Carthy J.A. in *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.), at 677:

I am mindful of the deference which is due to the Superior Court judges who have developed expertise in this very sophisticated area of practice. The Act provides for flexibility and adjustment at all stages of the proceeding and any intervention by this court at the certification level should be restricted to matters of general principle.

37 Bearing in mind this admonishment, I have reached the reluctant conclusion that the Divisional Court and the motions judge have erred on a matter of general principle. I do not agree that there is a sufficient difference between the plaintiffs' claims in fraudulent misrepresentation and negligent misrepresentation to justify certification of the former and non-certification of the latter. In my view, the creation of such a dichotomy in this litigation is an error in logic, in principle and in policy. I reach this conclusion for several reasons.

38 My first two reasons are contextual ones.

39 First, s. 8(1) of the *CPA* provides that a certification order should set out the common issues of the class. Section 1 of the *CPA* defines "common issues" as:

- (a) common but not necessarily identical issues of fact, or
- (b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts.

40 The observation I would make about this definition is that it represents a conscious attempt by the Ontario legislature to avoid setting the bar for certification too high. The important procedural objectives of the *CPA*, namely promoting access to justice and judicial economy, would not be realized if there was a requirement that the prospective plaintiffs in a class action present absolutely identical issues of fact or law.

41 Second, the courts have also been wary of setting the bar too high on the common issues factor. In many cases, the Ontario courts have stated explicitly that certification should be ordered if the resolution of the common issues would advance the litigation. Resolution through the class proceeding of the entire action, or even resolution of particular legal claims in the action, is not required. In *Campbell v. Flexwatt Corp.* (1997), 15 C.P.C. (4th) 1 (B.C. C.A.), Cumming J.A. said, at p. 18:

When examining the existence of common issues it is important to understand that the common issues do not have to be issues which are determinative of liability; they need only be issues of fact or law that move the litigation forward. The resolution of a common issue does not have to be, in and of itself, sufficient to support relief. To require every common issue to be determinative of liability for every plaintiff and every defendant would make class proceedings with more than one defendant virtually impossible.

In *Anderson v. Wilson*, *supra*, Carthy J.A., speaking for a unanimous court, expressly adopted this reasoning.

42 Against the backdrop of the low bar set by the legislature and judiciary for common issues, I turn to my third, and most important, reason for thinking that the courts below erred. Given the accepted definitions of the torts of fraudulent misrepresentation and negligent misrepresentation, I can see no logical or principled basis for treating them differently on the question of certification. I could understand an order certifying, or refusing to certify, both claims. I do not, however, understand why opposite orders were considered appropriate for the two claims.

43 The best way to commence my discussion of my doubts on this issue is by setting out the motions judge's careful and accurate description of the elements of the two torts. He said:

The constituent elements of a claim for fraudulent misrepresentation were enunciated by the Supreme Court of Canada in *Parna v. G. & S. Properties Ltd.* (1970), 15 D.L.R. (3d) 336 (S.C.C.) at 344:

... *Anson on Contract*, 12<sup>th</sup> ed., p. 187, where "fraud" has been defined, reads:

[Fraud is] a false representation of fact, made with a knowledge of its falsehood, or recklessly, without belief in its truth, with the intention that it should be acted upon by the complaining party, and actually inducing him to act upon it.

See also *Derry v. Peek (1889)*, 14 A.C. 337 (H.L.) at 374.

The tort of negligent misrepresentation has five constituent elements. There must be a duty of care arising from a special relationship between a representor and a representee. There must be a representation made that was untrue, inaccurate or misleading. The representor must have made the statement negligently. The representee must have reasonably relied upon the statement and further, suffered damages as a result of the reliance. See *Queen v. Cognos*, [1993] 1 S.C.R. 87 at 110.

44 There are substantial similarities in these definitions of the two torts. A fraudulent misrepresentation is "a false representation of fact"; a negligent misrepresentation is one that is "untrue, inaccurate or misleading." A fraudulent misrepresentation can be one that is made "recklessly, without belief in its truth"; a negligent misrepresentation is one that is made "negligently" or, to employ the standard non-conclusory word, "carelessly." At least two of the 15 common issues that have been certified relate directly to the tort of fraudulent misrepresentation:

(g) Did Bre-X and/or the named defendants represent that:

(i) There is gold in mineable quantities in the Busang? . . .

(h) Were the representations identified by issue (g) made knowing that they were false or recklessly, caring not whether they were false or without exercising reasonable care and attention?

These common issues relate to two of the four components of the tort of fraudulent misrepresentation — a false statement and two potential reasons (knowledge or recklessness) for the statement. In my view, they relate equally to two of the five components of the tort of negligent misrepresentation — a false statement and one potential reason (carelessness) for the statement. My conclusion, therefore, is that there is a sufficient overlap in the *legal* claims of the plaintiffs, grounded in fraudulent misrepresentation and negligent misrepresentation, to justify certification for both claims.

45 Fourth, in my view there is a substantial overlap of *factual* issues common to both torts. There are two core issues in this litigation: first, was there gold in mineable quantities in the Busang; and second, if there was not, what was the various defendants' knowledge of the true state of affairs?

46 The defendants' conduct with respect to the first question was manifested in the 160 statements and press releases which informed the public about exploration developments in the Busang. These 160 statements will have to be analyzed in the context of the fraudulent misrepresentation claim. The analysis might become somewhat complicated. For example, it cannot be said categorically that the fraud crystallized with the first press release on May 6, 1993 and that all of the other statements from Bre-X during the next four years were mere elaborations on the crystallized fraud. This would not be true for several of the named defendants who were not associated with Bre-X in 1993 — for example, Francisco, Lyons and Kavanagh. It follows that an individualized assessment of each defendant's conduct will be required in the certified class action relating to fraudulent misrepresentation.

47 Given this reality, I see no principled basis for treating the claim in negligent misrepresentation differently. Under both torts, the focus will be on the defendants, their knowledge and their conduct. Did they know (fraud) that there was no gold in the Busang? Were they careless about (negligence) their knowledge of the state of affairs in the Busang? The answers to these questions under the tort of fraudulent misrepresentation might be different for each defendant. Some might have participated in the fraud from its inception. Some might have joined the fraud later. Others might never have known that there was a fraud or participated in it in a fashion that might give rise to liability. Precisely the same thing can be said about the tort of negligent misrepresentation. Some of the defendants might have been careless about the state of affairs in the Busang from the outset. Some might have become careless later. Others might never have been careless or participated in Bre-X's affairs in a fashion

that would give rise to liability. In short, the complexity that exists with respect to determining the defendants' states of mind and conduct is inherent in both torts. It follows that certification should either be granted or withheld for both claims.

48 I make one other observation with respect to the overlap of factual issues common to both torts. Both the motions judge and the Divisional Court attached great significance to the fact that the contested representations by Bre-X were not made on a single occasion; rather they took the form of 160 statements and press releases. In the eyes of the motions judge and the Divisional Court, this posed particularly difficult problems on the reliance component of the tort of negligent misrepresentation. As expressed by the Divisional Court:

The alleged negligent misrepresentations include 160 or more Bre-X press releases over a four year period beginning May 10, 1993. The representations were different in content and made at different times by different people for different reasons . . . As Winkler J. pointed out, the case of each individual plaintiff requires an individual inquiry as to what representations he or she relied upon and how he or she was affected by the particular representation. These individual inquiries cannot be circumvented.

49 With respect, I think it is a mistake, at this early juncture of the litigation, to overemphasize the number and diversity of Bre-X's representations. One of the potential benefits of a class action with certified common issues relating to the knowledge and conduct of the defendants is that the resolution of those issues might narrow substantially the subsequent inquiries on the plaintiffs' side of the coin. As I understand the theory of the plaintiffs, the named defendants participated in a scheme to promote Bre-X shares by embarking on a program of issuing press releases they knew to be false, that portrayed the assay results from the Busang site as demonstrating the existence of a gold mine of staggering dimensions. If these facts can be established by the plaintiffs, the questions raised in paragraph 8(f) of the order declaring the common issues must be addressed. What did the individual defendants know about the promotional fraud? Here, if knowledge of the fraud cannot be attributed to a given defendant, the lesser degree of complicity respecting carelessness can be addressed. At this stage of the proceedings, the court does not know what this will entail by way of evidence. It is possible — I put it no higher — that fixing the knowledge and conduct of each Bre-X insider will present a much clearer picture. For example, if the moment when a Bre-X insider became careless about a representation or representations in which he participated could be isolated, the subsequent consideration, admittedly in individual trials, of such issues as duty of care and reliance might be rendered more focussed and manageable. This would "move the litigation forward." In short, the existence of 160 representations should not be used as a reason to refuse certification as a class action; rather certification is, potentially, a way of reducing those 160 representations to a much smaller number of relevant ones.

50 Fifth, in this action and in five companion actions, the plaintiffs made claims against five stock brokerage firms which provided investment advice and services to them. The motions judge concluded that the claims of fraudulent misrepresentation and negligent misrepresentation against the brokerage firms raised common issues appropriate for certification. He said:

I accept the plaintiffs' contention that common issues are raised on the basis that it is arguable that a finding can be made at a common issue trial that there is a point in time at which the analysts were, or ought to have been aware of the alleged fraud.

.....

The essence of misrepresentation is the negligent statement. If a point in time is fixed at which the analysts knew or ought to have known of the alleged fraud, then any statement to the contrary after that point is an inaccurate, negligently made statement. Such a finding would advance the litigation.

I agree with this analysis. In my view, if the words "Bre-X insiders" were substituted for "analysts," this reasoning would be equally applicable.

51 In summary, the motions judge and the Divisional Court certified 15 common issues as appropriate for resolution in a class proceeding. The focus of these common issues is the knowledge and conduct of the defendants, the Bre-X insiders. The conduct, especially the reliance, of the plaintiffs stays on the sidelines at this juncture in the litigation. The plaintiffs advance four claims against the defendants. The courts below certified three of them, including the claim for fraudulent misrepresentation.

I agree with these components of the courts' decisions. However, the courts below refused to certify the claim in negligent misrepresentation. For the above reasons, I am of the view that they erred in this refusal. After setting out the definitions of fraudulent and negligent misrepresentation, the motions judge said: "The essence of each tort is the representation made by the defendant to the plaintiff." I agree with that statement. However, in my view it serves to bind together, not divide, the treatment of both claims under the *CPA*.

## **(2) The "preferable procedure" issue**

52 Section 5(1)(d) of the *CPA* provides that a court shall certify a class proceeding if it would be the preferable procedure for the resolution of the common issues. The motions judge concluded that a class proceeding was not the preferable procedure for the claim of negligent misrepresentation. He said:

I have concluded that there are no common issues concerning the claim in negligent misrepresentation but even if I had not so concluded, I would nevertheless find that a class proceeding is not the preferable procedure for the resolution of any such issues for the reasons particularized in the SNC-Carom II and Brokers actions.

The Divisional Court agreed with the motions judge's reasoning and conclusion on this point.

53 The SNC-Carom II and Brokers actions were companion actions brought by the plaintiffs against, respectively, companies which analyzed Bre-X's Busang project and stock brokerage firms which advised, and sold shares to, the plaintiffs. The crucial fact of these companion actions was that the claims of negligence and negligent misrepresentation were the *only* claims against the defendants. After a careful review of the relevant factors, the motions judge determined that a class proceeding was not a preferable procedure.

54 The crucial difference in the present appeal is that a class action has already been certified for three of the four claims advanced by the plaintiffs. The question then becomes: if most of the plaintiffs' claims will proceed in a class proceedings context, is there a strong reason to exclude the claim in negligent misrepresentation from the proceedings? In my view, for several reasons, the answer to this question is "No."

55 First, and at a general level, I am not aware of any Ontario case, before this one, in which some of the potential claims were certified while others were not certified. *Anderson v. Wilson*, *supra*, *Dabbs v. Sun Life Assurance Co. of Canada* (1998), 40 O.R. (3d) 429 (Ont. Gen. Div.), *Maxwell v. MLG Ventures Ltd.* (1995), 7 C.C.L.S. 155 (Ont. Gen. Div.), and *Peppiatt v. Nicol* (1993), 16 O.R. (3d) 133 (Ont. Gen. Div.) are all cases in which certifications were ordered. In several of these cases there were multiple claims advanced by the plaintiffs. On the other hand, *Hollick v. Metropolitan Toronto (Municipality)* (1999), 46 O.R. (3d) 257 (C.A.),<sup>2</sup> *Controltech Engineering Inc. v. Ontario Hydro*, *supra*, *Rosedale Motors Inc. v. Petro-Canada Inc.*, *supra*, *Mouhteros v. DeVry Canada Inc.* (1998), 41 O.R. (3d) 63 (Ont. Div. Ct.), and *Abdoole v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) are all cases in which certification was refused. Again, in several of these cases there were multiple claims against the defendants. The implicit message from these results is that the courts seem to employ a starting point or presumption — I put it no higher — in favour of either *complete* certification or *no* certification. The decisions of the motions judge and Divisional Court in the present matter are not in tune with these results.

56 Second, in my view there is substantial merit in trying to utilize the *CPA* to deal with as many issues as possible. On this point, the motions judge's analysis of the relationship among the three claims he certified is instructive:

Since I have found a class proceeding to be the preferable procedure for resolving the common issues in respect of the claim in conspiracy, I have concluded as well that it is in keeping with the goals of the *CPA* to determine the common issues arising out of the claims in fraudulent misrepresentation and breach of the *Competition Act* as part and parcel of the inquiry. The determination of the common issues proposed for the claims in fraudulent misrepresentation and under the *Competition Act* will not unduly complicate the common issue trial. In my view, it advances the goals of judicial economy to take advantage of the opportunity for efficiency presented by the common issue trial necessary for the claim in conspiracy. The fact that there will be a common issue trial between the same parties, on a claim which arises from the same

background circumstances, favours including the common issues arising from claims in fraudulent misrepresentation and breach of the *Competition Act*, even though the plaintiffs may still have to engage in lengthy individual trials to determine the actual liability of the defendants on the claims. In these unique circumstances, the efficiencies achieved on the one hand, offset the inefficiencies on the other.

I agree with this analysis. I would simply extend it to the plaintiffs' fourth claim, the one in negligent misrepresentation.

57 Third, I observe that the plaintiffs and defendants accept that detrimental reliance is an element of both the torts of fraudulent and negligent misrepresentation. Moreover, they agree that the reliance component will have to be dealt with at individual trials on the issue of fraudulent misrepresentation. Yet the defendants do not use this two-track scenario as a basis for challenging, by way of appeal or cross-appeal, the certification of the claim in fraudulent misrepresentation. In my view, this silence tells in favour of moving the negligent misrepresentation claim onto the same unchallenged track on which the fraudulent misrepresentation claim is already situated.

58 Fourth, the fact that determination of some of the common issues relevant to the claim in negligent misrepresentation (or indeed the other three claims) will not resolve the entire litigation is not determinative. Certification can be the preferable procedure in situations far short of final resolution of the lawsuit.

59 On this point, the decision of this court in *Anderson v. Wilson, supra*, is instructive. In that case, the court certified claims in negligence and breach of contract by patients exposed to Hepatitis B through electroencephalogram tests administered by the defendant clinics. The court found that the class proceeding could not resolve the ultimate issues of liability and damages because it could not provide an answer to the pivotal question of causation. In those circumstances, Carthy J.A. framed the question in these terms, at p. 683:

The question then becomes whether there are sufficient common issues left to justify certification. In my view, it seems sensible with this number of potential plaintiffs and the similarities that are evident in their claims, that any potential efficiency in advancement of their claims through the flexibility provided by the *CPA* should, where reasonable, be utilized.

60 In my view, this passage evinces a proper understanding of, and respect for, the objectives of the *CPA*. The *CPA* does provide a flexible procedure for dealing with multiple plaintiffs with similar claims, usually arising out of a single accident, catastrophe or other major event.

61 Carthy J.A. then proceeded to answer his own question in *Anderson v. Wilson*. He said, at pp. 683-84:

In this case, the common issue as to the standard of conduct expected from the clinics from time to time, and whether they fell below the standard, can fairly be tried as a common issue. Resolving this issue would move the litigation forward. The participation of the class members is not needed for that inquiry, although their later evidence may bear upon whether standards, such as the use of gloves, were actually met in individual cases. Isolating this one major issue, the class action proceeding clearly appears to be the preferable method of resolution to the benefit of all parties.

62 A similar analysis can be made in the present appeal. The major common issue in this action is the knowledge and conduct of the Bre-X insiders. What did they know about gold in the Busang and when did they know about it? And, given their knowledge, what did they tell the public and what legal rubrics (innocent, false, careless, anti-competitive, conspiratorial) should be attached to their statements? The answers to some of these questions may become complicated. Moreover, different answers may be required for different defendants. However, the complications are offset by two overarching considerations. First, the presence and the stories of the plaintiffs are not required for the first stage of the lawsuit. The focus is on the defendants, their knowledge and their conduct. The determination of these matters, although perhaps difficult, will move the litigation forward. Second, it is uncontested that there will be a class proceeding with respect to three of the plaintiffs' claims. In that context, it seems sensible and desirable to place the claim of negligent misrepresentation on the same litigation track.

## **DISPOSITION**

63 I think it important, and fair, to place the disposition of this appeal in a proper context. The Bre-X debacle has given rise to seven separate lawsuits involving three different groups of defendants — the Bre-X insiders, external analyst corporations and stock brokerage firms. The plaintiffs have sought certification of all of their legal claims in all seven actions. A single judge, Winkler J., has been charged with dealing with all class proceedings aspects of these actions. In a series of comprehensive, careful and, I might say, timely decisions, the motions judge has resolved many important and difficult issues, including whether there are causes of action, the definition of the plaintiff class, mechanisms for non-residents of Ontario to participate (or not) in the class proceedings, and, ultimately, the appropriateness of certification of class actions in terms of the statutory criteria of "common issues" and "preferable procedure." In all of this, the vast majority of the motions judge's decisions have been accepted by the parties.

64 The sole exception — and it is a minor one in the grand scheme of the lawsuits relating to Bre-X — is this appeal which challenges the decisions of the Divisional Court and the motions judge refusing to certify the plaintiffs' claim in negligent misrepresentation against the Bre-X insiders.

65 For the reasons I have outlined above, I would allow the appeal. Paragraph 9 of the Order of the Superior Court of Justice should be amended by deleting reference to the claim in negligent misrepresentation.

66 In my view, the appellants are entitled to their costs of the appeal, including the motion for leave to appeal. The appellants are also entitled to their costs in the Divisional Court. The costs order of the motions judge should stand.

*Appeal allowed.*

Practice --- Pleadings — Statement of claim — Striking out for absence of reasonable cause of action — Need for clearly unsustainable claim

Company became subject of criminal fraud investigation amidst allegations that it was money-laundering operation with fictitious sales, revenues and profits — Company's shares lost all value and ceased to trade — Plaintiffs, who had bought shares in company in secondary market, brought class action against several defendants, including company's auditors, claiming damages for alleged misrepresentations contained in prospectus issued by company — Auditors brought motions to dismiss claim against them as disclosing no reasonable cause of action — Motions dismissed — Fact that pleading did not disclose that plaintiffs had reasonable cause of action against auditors for negligence and negligent and fraudulent misrepresentation at common law was not plain and obvious — Plaintiffs pleaded material facts in support of claim of proximity such as to give rise to duty of care — Fact that auditors ought reasonably to have foreseen that plaintiffs would rely on their representations and that such reliance would be reasonable was arguable — Plaintiffs did not simply plead "fraud on market" theory and case law recognizes that reliance upon representations may be inferred from all circumstances — To foreclose consideration of issue of reliance on representations beyond pleading stage would be premature.

Securities and commodities --- Trading in securities — Prospectus — Misrepresentation

Company became subject of criminal fraud investigation amidst allegations that it was money-laundering operation with fictitious sales, revenues and profits — Company's shares lost all value and ceased to trade — Plaintiffs, who had bought shares in company in secondary market, brought class action against several defendants, including company's auditors, claiming damages for alleged misrepresentations contained in prospectus issued by company — Auditors brought motions to dismiss claim against them as disclosing no reasonable cause of action — Motions dismissed — Fact that pleading did not disclose that plaintiffs had reasonable cause of action against auditors for negligence and negligent and fraudulent misrepresentation at common law was not plain and obvious — Plaintiffs pleaded material facts in support of claim of proximity such as to give rise to duty of care — Fact that auditors ought reasonably to have foreseen that plaintiffs would rely on their representations and that such reliance would be reasonable was arguable — Plaintiffs did not simply plead "fraud on market" theory and case law recognizes that reliance upon representations may be inferred from all circumstances — To foreclose consideration of issue of reliance on representations beyond pleading stage would be premature.

Trade and commerce --- Consumer protection — Misleading advertising — Miscellaneous issues

Company became subject of criminal fraud investigation amidst allegations that it was money-laundering operation with fictitious sales, revenues and profits — Company's shares lost all value and ceased to trade — Plaintiffs, who had bought shares in company in secondary market, brought class action against several defendants, including company's auditors, claiming damages for alleged misrepresentations contained in prospectus issued by company — Plaintiffs also alleged violations of Competition Act with respect to making of false or misleading representations for purpose of promoting product or business interest — Auditors brought motions to dismiss claim against them as disclosing no reasonable cause of action — Motions dismissed — Novel cause of action advanced by plaintiffs under misleading advertising provisions of Competition Act was problematic and tenuous however it was not plain and obvious that claim advanced under Act disclosed no reasonable cause of action and would necessarily fail — Auditors' alleged misrepresentations arguably may have been made for purpose of promoting their "business interests" within meaning of s. 52(1) of Act, even if that was only subsidiary and indirect intention of representation — Competition Act, R.S.C. 1985, c. C-34, ss. 36, 52(1).

MOTIONS by defendant auditors to strike out pleading for failure to disclose reasonable cause of action.

**Cumming J.:**

**The Mondor class action**

1 The plaintiffs initiated this 165 page Fresh Statement of Claim (the "pleading") August 1, 2001. The proposed representative plaintiffs bring this class proceeding (the "Mondor class action") under the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 (the "CPA") (Given the length and complexity of the pleading, for ease of reference I have referred to some paragraphs of the pleading in brackets throughout these Reasons for Decision).

2 The plaintiffs Roger Mondor ("Mondor") and Anita M. Karia ("Karia") claim on behalf of every person (with certain excluded persons) who dealt in shares of YBM Magnex International, Inc. ("YBM") between March 7, 1996 and May 14, 1998 (the "class period") and suffered a loss as a result. That is, they claim on behalf of those persons who suffered losses through purchases of YBM shares in the secondary market. YBM's shares originally traded on the Alberta Stock Exchange (ASE) but throughout the class period the shares traded solely on the Toronto Stock Exchange ("TSE").

3 There is extensive litigation relating to YBM. In particular, there is another class proceeding, *Royal Trust Corporation of Canada et al. v. Igor Fisherman et al.* #00-CV-186800CP (the "Royal Trust class action") which includes within the class all persons who purchased or acquired shares in YBM distributed pursuant to a prospectus dated November 17, 1997 (the "1997 Prospectus").

4 There are Reasons for Decision of today's date in respect of the plaintiffs' motion to amend their pleading in the Royal Trust class action together with separate Reasons for Decision, also of today's date, with respect to motions to strike brought by certain defendants in that action.

5 YBM is an Alberta corporation, with its registered office in Calgary, Alberta and its head office in Newtown, Pennsylvania. Throughout the class period YBM purported to be a manufacturer and distributor of magnets and other products for sale through interests in certain wholly or majority-owned subsidiaries in Eastern Europe, North America and other parts of the world.

6 The plaintiffs allege (paras. 6, 60, 66 and 67) that in fact YBM was used to carry out a multi-layered conspiracy and fraud for several purposes, including: money-laundering, obtaining improper gains from the sale of shares of YBM to the public for prices predicated on the pervasive false representation that "YBM was a legitimate business with income only from legitimate business activities" (the pleading defines this in Schedule 1 as the "Representation"), obtaining improper gains by financial statement misrepresentation and manipulation, and by circling funds in ever-increasing amounts through YBM and sham suppliers and customers.

7 YBM's shares ceased to trade in May, 1998 after it became the subject of a criminal fraud investigation in the United States. The shares now do not have any value.

**Background**

8 A company known as Pratecs Technologies Inc. was incorporated pursuant to the laws of Alberta about March 16, 1994. The name was changed to YBM Magnex International, Inc. ("YBM" in these Reasons for Decision) about October 5, 1995. A final prospectus was issued in July, 1994 to qualify the distribution of four million shares at 10 cents per share for the purpose of acquiring the Canadian marketing and distribution rights from YBM Magnex, Inc., (not to be confused with YBM Magnex International, Inc., being "YBM" in these Reasons for Decision) a Pennsylvania corporation, with respect to its products in exchange for YBM shares.

9 On July 18, 1994 (para. 10) YBM issued shares to the public for aggregate consideration of \$400,000. The shares were then posted for trading on the Alberta Stock Exchange.

10 The plaintiffs allege (see in part paras. 15 to 28; 60 to 92; 98 to 160, 170 to 172; 196; 217; 220, 221, 224 to 230 to 239, 242; 283 to 286;) that YBM was employed by certain persons (the "Central Group") to perpetrate a fraud. The plaintiffs allege that members or associates of Russian organized crime associated with the so-called Solntsevskaya Organization (allegedly involved in weapons trafficking, nuclear materials trafficking, prostitution, drug trafficking, dealing in precious gems and money laundering), including one Semeon Mogilevitch ("Mogilevitch"), owned or acquired a number of foreign corporations.

11 These included a Russian company known as Arabat International ("Arabat"), a Channel Islands company called Arigon Company Limited ("Arigon") and a Hungarian corporation then named "Kiss es Kaiser Kian Kit". The name of this corporation was changed such that it ultimately became known as Magnex RT in 1992. These individuals allegedly determined in early 1994 to indirectly take Magnex RT public through the Alberta Stock Exchange. YBM Magnex Inc. [not to be confused with YBM Magnex International, Inc., herein referred to as "YBM"] was incorporated pursuant to the laws of Pennsylvania about February 10, 1994. YBM Magnex Inc. then allegedly purchased the assets of Magnex RT and the shares of Arigon in 1994.

12 About October 31, 1995 YBM merged by way of a share exchange with YBM Magnex, Inc., through a "reverse takeover transaction". The shareholders of YBM Magnex, Inc. obtained approximately 94% of the common shares of YBM which remained a public company and YBM became the owner of 100% of the shares of YBM Magnex, Inc.

13 The plaintiffs refer to the "Central Group" in their pleading, defined to include the defendants Fisherman and Bogatin as well as Mogilevitch and the Arigon shareholders,

14 YBM (para. 11) filed a final prospectus with the British Columbia Securities Commission (the "BCSC"), the Alberta Securities Commission (the "ASC") and the Ontario Securities Commission ("OSC") January 19, 1996, qualifying the issuance of 7,050,000 common shares and 1,768,750 share purchase warrants (the "1996 Prospectus"), and becoming a reporting issuer in Ontario. On March 7, 1996 YBM was listed and its shares posted for trading on the TSE.

15 YBM filed a final prospectus (the "1997 Prospectus") November 17, 1997, which ultimately qualified the distribution of a total of some 7,520,000 shares. This included 3,520,000 shares sold for aggregate proceeds of approximately \$52 million and an additional 4 million common shares issued pursuant to automatically convertible debt instruments (the "Notes"). The Notes had a face value of \$48 million.

16 The claim alleges (paras.23 to 28) numerous subsequent transactions involving the shares and/or assets of various companies in different countries.

17 On May 13, 1998 (para. 13) the United States' Federal Bureau of Investigation ("FBI") and other government agencies under the umbrella of the "Organized Crime Strike Force" raided the head office of YBM in Newtown, Pennsylvania for the purpose of executing a search warrant. On May 13, 1998 the OSC and ASC issued cease-trading orders in respect of the securities of YBM. The TSE subsequently de-listed YBM.

18 Ernst & Young YBM Inc. (the "Receiver") (para.14) was appointed as the receiver of YBM by order of the Court of Queen's Bench of Alberta December 8, 1998. On April 14, 1999 the Alberta court approved a guilty plea agreement entered into by YBM through its Receiver with the US District Attorney for the Eastern District of Pennsylvania. On June 7, 1999 YBM

pledged guilty to a charge in a one-count criminal information with a multi-object conspiracy to commit mail and securities fraud in the United States and was fined U.S. \$3 million.

## **The parties**

### ***The plaintiffs***

19 The plaintiff Mondor lives in Red Deer, Alberta. The plaintiff Karia lives in Mississauga, Ontario. Both purchased YBM shares in the secondary market.

### ***The insider defendants***

20 The plaintiffs allege that at the material times the following persons were officers and directors of YBM. The defendant Jacob C. Bogatin ("Bogatin") (para. 29) resides in Pennsylvania and was a director and, *inter alia*, the Chief Executive Officer. The defendant Igor Fisherman ("Fisherman"), who resides in Kiev, Ukraine, was a director and the Chief Operating Officer. The plaintiffs allege that Bogatin and Fisherman acted in concert with Mogilevitch and the shareholders of Arigon to defraud the shareholders of YBM. (Schedule 1 defines the Central Group as comprising Mogilevitch, Fisherman, Bogatin and the Arigon shareholders. The term "Core Conspirators" is defined as being Fisherman and Bogatin.)

21 The defendant Kenneth Davies ("Davies"), who resides in British Columbia, was a director of YBM. The defendant Michael Schmidt ("Schmidt"), who resides in British Columbia, was a director. Both were members of special committee #1 of YBM. The defendant Frank Greenwald ("Greenwald") resides in Delaware, was a director and was a member of special committee #2. The defendant Harry W. Antes ("Antes") resides in Pennsylvania and was a director who became Chairman of the board of directors in August, 1996. He was also a member of special committee #2. The defendant R. Owen Mitchell ("Mitchell") resides in Ontario and was a director. He was also a director and Vice-President of Investment Banking for the defendant National Bank Financial Inc., which acquired and merged with First Marathon Securities Limited ("First Marathon"). He was a member of special committee #2. The defendant David R. Peterson ("Peterson") resides in Ontario and was a director of YBM. He is also a partner in the defendant law firm, Cassels, Brock & Blackwell ("Cassels"). The defendant Daniel E. Gatti ("Gatti") resides in Pennsylvania and was Vice-President, Finance and Chief Financial Officer of YBM. He was also an accounting manager with the defendant, Parente Randolph Orlando Carey & Associates ("Parente") when that firm conducted YBM's initial audits in 1995. The defendant James J. Held ("Held") resides in Pennsylvania and was Vice-President, Business Development and Investor Relations of YBM. The defendant Guy R. Scala ("Scala") resides in Pennsylvania and was the Vice-President, Sales and Secretary. The plaintiffs allege (para. 40) that each of the above individual defendants was negligent and "so reckless as to be wilfully blind in the performance of his obligations and duties as a director or officer of YBM" and was a party to the conspiracy. The alleged "Conspiracy", is defined in Schedule 1 of the pleading as "[t]he issuance of false statements, announcements and press releases by the Conspirators and their failure to make required timely disclosure of material developments affecting YBM."

### ***The auditor defendants***

22 The defendant Parente is a firm of certified public accountants, with offices in Plymouth Meeting, Pennsylvania and elsewhere. Parente (para. 43) was appointed auditor of YBM about May 19, 1995. The plaintiffs allege Parente provided (paras. 41 to 44) its "unqualified audit opinion" in respect of the financial statements relating to YBM and its subsidiaries for the fiscal years 1993 to 1996, inclusive. Parente consented to the incorporation by reference of YBM's 1995 financial statements in the 1997 Prospectus.

23 The defendant Deloitte & Touche LLP ("Deloitte") is a certified public accounting firm with offices in Ontario, Philadelphia and elsewhere. Deloitte was engaged by YBM (para. 46) to re-audit its 1996 financial operations. Deloitte allegedly provided (paras 47 and 333) by letter dated October 13, 1997 "its clean or unqualified audit opinion" on the re-stated financial statements for the fiscal year ending December 31, 1996. Deloitte consented to the incorporation by reference of YBM's re-stated 1996 financial statements into the 1997 Prospectus, being a prerequisite to the 1997 Prospectus being filed with the securities' regulatory authorities. Deloitte was engaged by YBM about January 22, 1998 to perform its 1997 audit. Deloitte

resigned as YBM's auditor about June 26, 1998. (The defendants Parente and Deloitte are collectively referred to as the "auditor defendants.")

### ***The lawyer defendants***

24 Cassels is a law firm partnership carrying on the practice of law in Ontario and elsewhere. Cassels (para. 49) allegedly acted as counsel, including securities counsel, for YBM and drafted the 1997 Prospectus. Cassels also allegedly acted as counsel to special committee #1 and assisted with respect to special committee #2. The defendant Lawrence Wilder ("Wilder") is a partner of Cassels. It is alleged (para. 50) that he and the defendant Peterson were primarily responsible for the work performed by Cassels for YBM. A declaration is sought that Cassels is vicariously responsible for the acts and omissions of Wilder and Peterson.

### ***The lead financial advisor defendants***

25 The defendant National Bank Financial Corp. ("National") is an investment dealer formerly known as First Marathon Securities Limited ("First Marathon"). The defendant Griffiths McBurney & Partners ("Griffiths McBurney") is also an investment dealer. First Marathon and Griffiths McBurney (para. 55) were the "lead financial advisors" as agents for YBM with respect to a proposed special warrant financing about September 1, 1995. (Collectively, National/ First Marathon and Griffiths McBurney are referred to as the "lead financial advisors"). Ultimately, they became YBM's lead financial advisors for YBM's 1997 financing. The plaintiffs say (para. 56) that Griffiths McBurney and First Marathon/Mitchell had common knowledge as to certain matters. The plaintiffs assert (para. 57) that First Marathon had actual knowledge and is deemed in law to have had certain knowledge of its director and senior officer Mitchell with respect to the affairs of YBM.

26 The plaintiffs also allege (paras. 57 and 58) that both First Marathon and Griffiths McBurney and their officers and employees traded in the shares of YBM for their own accounts and as broker/agent traded in YBM shares on behalf of Mogilevitch., his associates and Arigon shareholders. They allege that First Marathon and Griffiths McBurney were negligent and so reckless as to be wilfully blind in the performance of their duties and obligations and were parties to the "Conspiracy".

### ***The causes of action alleged in the pleading***

27 The plaintiffs allege (paras. 66) that the Central Group used YBM to carry out a multi-layered conspiracy and fraud with several objectives, including, to launder funds obtained from other sources and to obtain improper gains from the sale of shares of YBM to the public for prices predicated upon the "Representation". The plaintiffs say (para. 67) that to achieve their objectives the Central Group had to mislead YBM's innocent shareholders by circulating funds, in ever-increasing amounts, through YBM, its sham suppliers and its customers. The Central Group had to get its sham magnets business past the auditors.

28 The plaintiffs do not allege that the defendants, apart from Bogatin and Fisherman, were intentionally dishonest. Rather, the plaintiffs assert (para. 69) that

the defendants' conduct, when coupled with their immediate pecuniary interests, was such as to constitute knowledge in law or such as to be considered reckless or wilfully blind, thereby making them in law parties to the conspiracy and liable in damages for the conspiracy, for misrepresentation and under the *Competition Act*.

29 The claim alleges negligence, negligent and reckless (caring not whether it was true or false) misrepresentation at common law (paras. 450 and 464). The claim is also advanced under provisions of the *Competition Act*, R.S.C. 1985, c. C-34.

### ***The motions***

30 The defendants Parente and Deloitte bring motions under rules 21.01(1)(b) and 25.11 to strike the pleading on the ground it fails to disclose a reasonable cause of action against them.

31 The test to be applied on a rule 21 motion is whether, accepting the facts alleged in the proposed pleading as proven unless they are patently ridiculous or incapable of proof, is it "plain and obvious" that the plaintiffs' pleading discloses no cause of

action and that the action cannot succeed. Neither the complexity of the issues, the novelty of the cause of action asserted, nor the potential for the defendants to present a strong defence is to prevent the plaintiffs from proceeding with their case. The proposed claim against the auditor defendants should only be struck "if the action is certain to fail because it contains a radical defect." A cause of action with some chance of success should not be struck out. *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.), at 980.

### **The pleading of negligence and negligent and fraudulent misrepresentation at common law**

32 A plaintiff must establish five elements to succeed in a claim of negligent misrepresentation.

- a duty of care based on a "special relationship" between the representor and the representee;
- the representation is untrue, inaccurate or misleading;
- the representor was negligent in making the misrepresentation;
- the representee reasonably relied upon the misrepresentation; and
- the reliance must have resulted in damages suffered by the representee.

See *Queen v. Cognos Inc.* (1993), 99 D.L.R. (4th) 626 (S.C.C.) per Iacobucci J. at 643. The plaintiffs have pleaded (para. 106) the requisite elements of the claim in negligent misrepresentation.

33 A plaintiff must establish the following elements to succeed in a claim of fraudulent misrepresentation.

- that the representor knowingly made a false representation, or made the representation recklessly, caring not whether it was true or false;
- that the representation was intended to induce reliance; and
- the plaintiff relied upon the representation to his or her detriment and suffered loss and damage.

See *Carom v. Bre-X Minerals Ltd.* (1998), 41 O.R. (3d) 780 (Ont. Gen. Div.).

34 The claim (at paras. 91, 200, 216, 294, 329, 445, 446, 458, and 459-461) expressly alleges that Parente and Deloitte intended that shareholders and the public rely upon the financial statements Parente and Deloitte had prepared in making investment decisions. The plaintiffs say the audit opinions contained the "Representation" which was made to the public (paras. 454, 455 and 467, 468) and that they relied upon the "Representation" and suffered loss as a result.

35 The plaintiffs plead (paras. 447 and 462) that Parente and Deloitte were negligent in the preparation of their audit opinions, failed to warn investors, failed to report the YBM's financial statements did not fairly present its financial position, failed to apply reasonable diligence and skill to investigate and discover the real situation and failed to apply the requisite professional standards. The plaintiffs say that (paras. 448, 449 and 463) if the auditor defendants had not been negligent YBM would not have become a public company and the 1997 Prospectus would not have come to fruition. The plaintiffs plead (paras. 450, 464 and 467) that Parente and Deloitte each negligently made the same materially misleading misrepresentation, being the "Representation" that YBM "was a legitimate business with income only from legitimate business activities".

36 The plaintiffs' claim (paras. 1 (m) and (n)) seeks a declaration that Parente owed a duty of care to the class members which duty it allegedly breached. The plaintiffs say that in connection with the issuance of its audit opinions Parente negligently made the Representation (paras. 1 (b), (6) and 450).

37 The same allegations are made against Deloitte (paras. 1 (o) and (p), 47) with respect to its re-audit and audit opinion concerning YBM's consolidated financial statements for the year ended December 31, 1996. The plaintiffs also say that Deloitte's audit opinion was given in part for the purpose of allowing the public financing by YBM through the 1997 Prospectus and with the expectation that investors would rely on it.

38 The plaintiffs allege (paras. 450 and 464) that the auditors' "Representation" that "YBM was a legitimate business with income only from legitimate activities" was made "recklessly, caring not whether it was true or false, intending that [the class] rely upon the Representation".

### The issue of a duty of care

39 In determining whether there is a duty of care in tort law, two questions must be answered: *Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.) per Lord Wilberforce at pp. 751,752. First, a *prima facie* duty of care is owed when there is a sufficient relationship of proximity between two persons such that it is reasonably foreseeable by the alleged wrongdoer that carelessness on his/her part may cause damage to the other person.

40 Second, upon a determination of a *prima facie* duty of care, it is necessary to consider whether there are any factors or policy considerations which ought to negative or limit the scope of the duty, or the class of person to whom the duty is owed, or the damages for a breach of the duty.

41 This test has been applied in Canada to claims arising with respect to the alleged negligence of an auditor. *Hercules Management Ltd. v. Ernst & Young* (1997), 146 D.L.R. (4th) 577 (S.C.C.) at p. 586. In *Hercules* the court found that a *prima facie* duty of care existed, (at pp. 592-593 and 597 per La Forest J.). It was reasonably foreseeable that the shareholders in that case would rely on the statutory audited year-end financial statements in making their investment decisions and that such reliance could lead to financial loss.

42 However, La Forest J. held that the *prima facie* duty of care generally will be negated where the auditor faces unlimited liability. It is contrary to public policy that auditors be exposed to the "socially undesirable consequences" that would be consequential to "liability in an indeterminate amount for an indeterminate time to an indeterminate class". (at pp. 592, 503) See Earl A. Cherniak and Kirk F. Stevens, "Two Steps Forward or One Step Back? *Anns at the Crossroads in Canada*" (1992), 20 C.B.L.J. 164 at pp. 169-171.

43 After weighing the respective interests of the users of financial statements and the interests of auditors, La Forest J. concluded:

In the general run of auditors' cases, concerns over indeterminate liability will serve to negate a *prima facie* duty of care. . . . Where, however, indeterminate liability can be shown not to be a concern on the facts of a particular case, a duty of care will be found to exist. (at pp. 595 and 597)

44 The *prima facie* duty of care will be negated when either the auditor does not know the identity of the investor or of the limited class of investors or the investor did not use the audit report for the specific purpose for which it was prepared (at pp. 590, 592 and 599). La Forrest J. in *Hercules* at pp.595 to 597 allowed that a claim for negligent misrepresentation might proceed exceptionally where "the scope of liability can readily be circumscribed".

45 Parente and Deloitte submit that the claim in the case at hand is asserted by as broad a class as could almost possibly be as it includes every person who dealt in the shares of the corporation over the class period.

46 The principles articulated in *Hercules* must be considered in the situation at hand with respect to both the pleading of negligent misrepresentation and the pleading of negligence. *Hercules* involved a motion for summary judgment after lengthy examinations for discovery. By contrast, the motion at hand is a rule 21.01 (1) (b) motion. The factual matrix as pleaded must be taken to be true, unless patently ridiculous or incapable of proof. The pleading is deemed to include documents incorporated therein by reference.

47 The auditor defendants submit that the audit opinions in question were statutory audits, and not special purpose audits. Statutory year-end audits have the limited purpose of providing the shareholders with information for the purpose of overseeing the management and affairs of the corporation and not for the purpose of guiding personal investment decisions. *Roman Corp. v.*

*Peat Marwick Thorne* (1992), 11 O.R. (3d) 248 (Ont. Gen. Div. [Commercial List]) at p. 260 adopted in *Hercules* at pp. 600-601; *Caparo Industries plc v. Dickman*, [1990] 1 All E.R. 568 (U.K. H.L.) at p. 583 per Lord Oliver, adopted in *Hercules* at p. 600.

48 The plaintiffs plead (para. 42 and 44) that the audit opinions of Parente were not simply statutory audit opinions but, as known to and consented to by Parente, were to be used for the purposes of the 1996 and 1997 Prospectuses. They make the same allegation (para. 47) in respect of Deloitte's audit opinion with respect to YBM's 1996 financial statements as restated, being incorporated in the filing of the 1997 Prospectus.

49 The plaintiffs plead (paras. 91, 200, 216, 294, 444 to 446) that Parente intended that the shareholders and public would rely upon the audited financial statements when making investment decisions. The plaintiffs make the same allegation in respect of Deloitte (para. 458 to 461). Hence, the plaintiffs submit that the instant case is an exception to the "general run" of cases involving auditors as contemplated by *Hercules*.

50 The plaintiffs also assert (paras. 447 (a) and 462 (b)) that the auditors failed to warn the shareholders of the facts which would lead to a change in management. The auditors' duty is to report to shareholders to allow them to scrutinize the conduct of the corporation's affairs and to exercise their collective powers to remove directors. See *Hercules* at pp. 600-5. The plaintiffs allege that the shareholders of YBM as a collectivity could not effectively scrutinize the conduct of management because of the negligence of the auditors.

51 I turn to the first part of the *Hercules* test and the case at hand. Is there arguably a *special relationship* such that there is a *prima facie* duty of care owed by Parente and Deloitte to the plaintiff class? Whether a duty of care does or does not exist is a factual enquiry. In my view, the plaintiff has pleaded material facts in support of the claim of proximity such as to give rise to a *prima facie* duty of care.

52 *Hercules* involved a summary judgment motion with a very extensive evidentiary record. The rule 21 challenge by Parente and Deloitte in the case at hand simply goes to the adequacy of the pleading. Accepting the alleged factual record as set forth in the pleading, in my view it cannot be said that its is plain and obvious that the pleading does not disclose a reasonable cause of action against Parente and Deloitte. It is arguable that they ought reasonably to have foreseen that the plaintiff class members would rely upon their representations. It is arguable that such reliance by the prospective shareholder investors would be reasonable. La Forest J. puts the test for establishing a *prima facie* duty of care as:

[D]etermining whether "proximity" exists on a given set of facts consists in an attempt to discern whether, as a matter of simple justice, the defendant may be said to have had an obligation to be mindful of the plaintiff's interests in going about his or her business. (at p. 13)

53 I turn now to the second part of the *Anns* test. In *Hercules* the court held that even though the defendants owed the individual claimants a *prima facie* duty of care, such was negated by policy considerations which were not obviated by the facts of the case. Mr. Justice La Forest quoted (at p. 14) Cardozo C.J. in *Ultramarine Corp. v. Touche*, 174 N.E. 441 (U.S. N.Y., 1931) at p. 444 that the fundamental policy consideration to be addressed in negligent misrepresentation actions is whether a defendant might be exposed to "liability in an indeterminate amount for an indeterminate time to an indeterminate class".

54 Where an auditor acts for a party in an arms-length transaction his/her normative duty is to his client and not to any party who has an interest adverse to that of his/her client. See for example *Midland Mortgage Corp. v. Jawl & Bundon* (1999), 62 B.C.L.R. (3d) 239 (B.C. C.A.); additional reasons at (1999), 64 B.C.L.R. (3d) 1 (B.C. C.A.). Something more must be shown before imposing a duty on one party to care for the purely economic interests of another, than simply that the former could foresee that his/her conduct might cause loss or damage to those interests.

55 Parente and Deloitte say that YBM was their client, not the investing public. Hence, they argue, they owed no duty of care at law to the investing public or, at least, such duty is to be negated on policy considerations. However, the factual situation in *Hercules* has less force than that seen in the pleading at hand. A statutory audit report such as that considered in *Hercules* is not generally prepared for the purpose of guiding personal investment decisions. (*Hercules*, pp. 19 and 22, citing with approval

*Caparo Industries plc v. Dickman*, [1990] 1 All E.R. 568 (U.K. H.L.); *Roman Corp. v. Peat Marwick Thorne* (1992), 11 O.R. (3d) 248 (Ont. Gen. Div. [Commercial List]).

56 In the case at hand, the specific purpose of the services provided by Parente and Deloitte to YBM, as known to them, was in part to enable YBM to raise more than \$100 million from the investing public through the 1997 Prospectus and the offering and qualifying of common shares. The plaintiffs argue that it ought to have been within the contemplation of the auditors that the 1997 Prospectus was incomplete and hence, misleading. The plaintiffs submit that the services of Parente and Deloitte are properly to be viewed within a much broader context than simply the provision of services to a client, YBM. Parente and Deloitte knew there was to be an offering to the public. They knew their services were for the purpose of achieving this public offering. They knew that the offering could not be made to the public without it being receipted by the regulators. They knew that a receipt would not be given if there were known to be misrepresentations in the Prospectus. They knew that if the public offering was made there would, of course, be trading in the secondary market. They allegedly negligently allowed the Prospectus to be receipted and the public offering to proceed.

### **The issue of reliance**

57 Proof of reliance is a necessary ingredient of actions based upon negligent misrepresentation. *Queen v. Cognos Inc.*, [1993] 1 S.C.R. 87 (S.C.C.), at 110. The plaintiffs assert (paras. 477 to 483) that the issue of reliance upon the "Representation" is a matter of fact. The plaintiffs claim that the market price of the shares of YBM reflected the "Representation" made in the Parente and Deloitte audit opinions. Thus, the plaintiffs argue, a court could conclude that by purchasing YBM shares each class member relied upon the "Representation". (paras. 480 and 481) See generally *Kripps v. Touche Ross & Co.*, [1997] B.C.J. No. 968 (B.C. C.A.), paras. 101, 103; *NBD Bank, Canada v. Dofasco Inc.* (1999), 46 O.R. (3d) 514 (Ont. C.A.), at 547.

58 The auditor defendants assert that this assertion by the plaintiffs is in reality to advance the American "fraud on the market theory" which is not part of the law of Canada. Therefore, they say the plaintiffs' allegations (paras. 477-481) concerning this "theory" in the pleading do not disclose a reasonable cause of action and must be struck.

59 The "fraud on the market theory" is an implied statutory cause of action arising from Rule 10b-5 of the United States Securities and Exchange Commission. Under American law, the fraud on the market theory was developed in relation to actions brought under s. 10(b) of the *Securities Exchange Act of 1934*, 15 U.S.C. s.78a, as a means to establish reliance for the purposes of this statutory cause of action. The theory results in deemed reliance where an actionable misrepresentation is established on the part of a company and there has been the purchase of its shares by an investor in the secondary market. This statutory cause of action was described by the United States Supreme Court in *Basic Inc. v. Levinson*, 485 U.S. 224 (U.S. Ohio, 1988), at 241 as follows:

[It] is based on the hypothesis that, in an open and developed securities market, the price of a company's stock is determined by the available material information regarding the company and its business . . . Misleading statements will therefore defraud purchasers of stock even if the purchasers do not directly rely on the misstatements . . . The causal connection between the defendants' fraud and the plaintiffs' purchase of each stock in such a case is no less significant than in a case of direct reliance on misrepresentations.

60 The theory negates the necessity of requiring proof of subjective reliance from each member of the proposed plaintiff class. The theory has been described as a legal fiction which has the effect of overcoming the need to prove reliance. Campion in "Misrepresentation in Class Proceedings: The Cardozo Nightmare", (2001) 24 Advocates Quarterly 129 at 164 notes, "The doctrine represents a form of deemed reliance and a mechanism to prove aggregate damages through experts' opinions on the impact of each statement on the market price."

61 The "fraud on the market theory" has been expressly rejected by Canadian courts because, *inter alia*, Canadian securities legislation does not include a similar concept, and that actual reliance is a necessary component under Canadian law concerning negligent and fraudulent misrepresentation. See *Kripps v. Touche Ross & Co.* (1990), 52 B.C.L.R. (2d) 291 (B.C. S.C. [In

Chambers]), aff'd on other grounds ([1992](#), **94 D.L.R. (4th) 284** (B.C. C.A.) , leave to appeal refused ([1993](#), **101 D.L.R. (4th) vii** (S.C.C.) and the recent Ontario decision of *Carom v. Bre-X Minerals Ltd.* ([1998](#), **41 O.R. (3d) 780** (Ont. Gen. Div.).

62 In *Carom*, at 794, Winkler J. noted the following:

The torts of fraudulent and negligent misrepresentation are neither novel nor undeveloped in Canada. Both have been canvassed by the Supreme Court of Canada and the pronouncements of that court on the elements of each must be considered to be settled law. In my view, the presumption of reliance created by the fraud on the market theory can have no application as a substitute for the requirement of actual reliance in either tort. In the context of the torts of fraudulent and negligent misrepresentation a representation of the nature advocated for by the plaintiffs does not exist in Canadian common law. Indeed, to import such a presumption would amount to a redefinition of the torts themselves.

63 The plaintiffs in the instant situation recognize that the "fraud on the market theory" is not available under Canadian common law. Winkler J. in *Carom* found that the amendments to the statement of claim in *Carom* were "framed specifically with the fraud on the market theory in mind." The plaintiffs' pleading in the case at hand does not, at least expressly, refer to that theory. The plaintiffs' claim must be examined within the context of the common law actions of fraudulent and/or negligent misrepresentation.

64 The plaintiffs assert that they plead *actual reliance* upon the "Representation". They claim (at para. 46 of their Factum) that they do not assert the "fraud on the market theory" at all. The plaintiffs claim that the issue of reliance upon the "Representation" is a matter of fact and that if the market price of YBM reflected the Representation, a court may conclude as a question of fact that each putative class member relied upon the "Representation" in purchasing shares in the secondary market. The plaintiffs note that Winkler J. in *Carom* did not decide this issue. In *Carom*, Winkler J. considered the fraud on the market theory and rejected the proposition that an inference of reliance upon a representation was a matter of law; that is, he only evaluated the submissions made to him within the context of the "fraud on the market theory".

65 Whether a plaintiff has actually relied upon a misrepresentation is a question of fact and may be inferred from all the circumstances. As Finch J.A. of the British Columbia Court of Appeal noted in *Kripps v. Touche Ross & Co.*, [[1997](#)] B.C.J. No. **968** (B.C. C.A.) at para 101.

Whether a representation was made negligently or fraudulently, reliance upon that representation is an issue of fact as to the representee's state of mind. There are cases where the representee may be able to give direct evidence as to what, in fact, induced him to act as he did. Where such evidence is available, its weight is a question for the trier of fact. In many cases, however, as the authorities point out, it would be unreasonable to expect such evidence to be given, and if it were it might well be suspect as self-serving. . . .

66 Finch J.A. further held at para. 103 that

where the misrepresentation in question is one which was calculated or which would naturally tend to induce the plaintiff to act upon it, the plaintiff's reliance may be inferred. The inference of reliance is one which may be rebutted but the onus of doing so rests on the representor.

67 Mr. Justice Rosenberg of the Ontario Court of Appeal has also recently held that whether or not a person relied upon a (mis)representation may be inferred from all the circumstances: *NBD Bank, Canada v. Dofasco Inc.* ([1999](#), **46 O.R. (3d) 514** (Ont. C.A.), at 547.

68 The plaintiffs claim that if one were to assume for the purposes of this motion that the market price of YBM shares, from time to time, reflected the "Representation", it is open to a trial judge to infer that as a question of fact a putative class member relied on the "Representation" made by Parente, Deloitte and others when a class member purchased YBM shares in the secondary market.

69 To foreclose the consideration of an arguable issue past the pleading stage, a moving party must show that there is an existing bar in the form of a decided case directly on point from the same jurisdiction demonstrating that the very issue has been squarely dealt with and rejected: *Dalex Co. v. Schwartz Levitsky Feldman* (1994), 19 O.R. (3d) 463 (Ont. Gen. Div.). Had the plaintiffs simply pleaded the "fraud on the market theory" I would have foreclosed that consideration. Given, however, that the case law recognizes that a person's reliance upon a representation may be inferred from all the circumstances, in my view it would be premature to foreclose the consideration of this issue in the case at hand beyond the pleading stage.

70 The plaintiffs also allege that the defendants were reckless in their negligent misrepresentation, not caring whether it was true or false. That is, they did not care whether the "Representation" they made was true or false. While this is not a claim of fraud, it is an allegation that the defendants Representation was tantamount to a fraudulent misrepresentation. *Peek v. Derry* (1889), 14 App. Cas. 337 (U.K. H.L.), at 374; *Parna v. G. & S. Properties Ltd.* (1970), 15 D.L.R. (3d) 336 (S.C.C.), at 343-4. The concern as to indeterminate liability expressed in *Hercules* has no application to a claim of fraudulent misrepresentation.

71 For the reasons given, in my view, and I so find, it is not plain and obvious that the plaintiffs do not have a reasonable cause of action against the auditor defendants for negligence and negligent and fraudulent misrepresentation at common law.

### The Competition Act

72 Section 52 in Part VI of the *Competition Act* (the "Act") creates a criminal offence with respect to the making of certain false or misleading representations:

52(1): No person shall, for the purpose of promoting, directly or indirectly, the supply or use of a product or for the purpose of promoting, directly or indirectly, any business interest, by any means whatever, knowingly or recklessly make a representation to the public that is false or misleading in a material respect.

73 Section 36 provides a right to claim civil damages for breach of the criminal provisions of the *Act*.

36(1): Any person who has suffered loss or damage as a result of

(a) conduct that is contrary to any provision of Part VI,

may, in any court of competent jurisdiction, sue for and recover from the person who engaged in the conduct . . . an amount equal to the loss or damage proved to have been suffered by him, together with any additional amount that the court may allow not exceeding the full cost to him of any investigation in connection with the matter and of proceedings under this section.

74 The plaintiffs have pleaded that the "Representation" made by the auditor defendants was done "recklessly, caring not whether it was true or false intending that [the class] rely upon the Representation." Section 51(2) of the *Competition Act* is not restricted to representations based in intentional fraud. Rather it requires a false or misleading representation to the public that is made "knowingly or recklessly". See *R. v. Wholesale Travel Group Inc.*, [1991] 3 S.C.R. 154, 84 D.L.R. (4th) 161 (S.C.C.); *Carom v. Bre-X Minerals Ltd.* *supra* at 795.

75 The term "product" is defined in subsection 2(1) of the Act to include both an article and service. The term "article" is defined, in part, to mean "personal property of every description." This definition would arguably include the publicly traded shares of YBM, being choses-in-action.

76 The term "service" is defined to mean "a service of any description whether . . . professional or otherwise". Because the term "service" includes professional services, the plaintiffs argue that Parliament intended subsections 52(1) and 36(1) to apply to false and materially misleading representations made to the public by professionals, including accountants.

77 The plaintiffs plead (paras. 452 to 455 and 465 to 468) that the Parente and the Deloitte audit opinions were materially false and were made to the public for the purpose of promoting, directly or indirectly, the business interests of Parente and Deloitte, respectively. In doing so, the plaintiffs allege that the auditor defendants made the "Representation" about YBM.

78 The plaintiffs say that Parente and Deloitte had a direct, or immediate pecuniary interest in that it was in their business interests to prepare the audited financial statements for YBM. The plaintiffs contend that the auditors also had a secondary interest in providing the service, that of promoting their own business interest as auditors. The plaintiffs argue that it was in Deloitte's own business interests to accept a "high risk" audit with respect to YBM, a high-profile public company which became part of the TSE 300 company index and to produce the restated audited financial statements when it was suggested as a possible auditor by the Ontario Securities Commission.

79 Parente and Deloitte contend that the decision in *Apotex Inc. v. Hoffmann-La Roche Ltd.*, [2000] O.J. No. 4732 (Ont. C.A.), is authoritative and that the plaintiffs' claim on this ground must be struck. In *Apotex* the Court of Appeal held that the words "any business interest" found in s.52(1) of the Act means the business interest of the alleged representor; and, quoting with approval the British Columbia County Court decision of Darling Co.Ct.J. in *R. v. Garibaldi Lifts Ltd.* (1977), 35 C.C.C. (2d) 190 (B.C. Co. Ct.), "promoting" means "enhancing or increasing the volume of business for the company". Accordingly, Parente and Deloitte argue, the plaintiffs' cause of action under s.52 can succeed only if the "Representation" was related to the defendants' business interests. The auditor defendants deny that the "Representation" was related to their own business interests and say that there is nothing in the pleading connecting the Representation to a business interest of the defendants.

80 In *Apotex* the defendants succeeded on a motion to have the claim struck out as disclosing no reasonable cause of action. The Court of Appeal granted the appeal in part and reinstated the action. The plaintiff's claim was based upon s.36 of the *Competition Act*, relying upon, *inter alia*, s.52. The plaintiff complained of the marketing strategy of the defendant brand name pharmaceutical companies.

81 The claim in *Apotex*, however, satisfied the requirement of s.52 by alleging that the misrepresentation was for the purpose of promoting "any business interest" because it promoted the business interest of the defendants in continuing the sale of the brand name drug at a higher price than the generic brand. The court doubted that Parliament intended to prohibit the type of conduct alleged and commented that the causal connection between the false representation and loss or damage to the plaintiff was weak. However, the court concluded that it was not plain and obvious that the plaintiff's claim would fail, given the strict test for striking out a claim.

82 In *Canadian Competition Law, Vol. 1* (Looseleaf ed.) (Scarborough: Carswell, 2001), the authors Affleck and McCracken note at 5A-10 a particular quotation from the Quarterly Misleading Advertising Bulletin issued by the Marketing Practices Branch of the Bureau of Competition Policy released in 1984:

... The primary object of the communication need not appear to be promotion of a business interest. Rather, a particular representation may be captured under section 36 (now section 52) if promotion of a business interest is a subsidiary or indirect intention of the communication.

83 The plaintiffs contend in their factum (at p.22) that "[w]henever an accountant prepares and puts its name on audited financial statements, containing a misrepresentation, a court may conclude that the accountant is directly or indirectly promoting its own business interests". When professionals put their name on any document intended for a public audience, there is arguably commonly a subsidiary or indirect intention to promote their own professional services.

84 The plaintiffs assert that the auditor defendants, in giving their unqualified audit opinions, made the "Representation" that YBM was a legitimate business with income only from legitimate business activities. The pleading asserts that in fact the opposite was true and hence, the "Representation" was a misrepresentation.

85 Based on the foregoing, I find that the Parente's and Deloitte's alleged misrepresentations arguably may have been made for the purpose of promoting their "business interests" within the meaning of s. 52(1), even if that was only a subsidiary and

indirect intention of the "Representation". This novel cause of action of the plaintiffs advanced under the misleading advertising provisions of the *Competition Act* seems problematic and tenuous. However, in my view the s.36 claim based on s.52(1) of the *Act* should not be struck. I am not satisfied that it is plain and obvious that the claim advanced under ss.36 and 52 of the *Competition Act* discloses no reasonable cause of action and that the plaintiffs' claim would necessarily fail.

### **Disposition**

86 For the reasons given, the auditor defendants' motions are dismissed.

*Motions dismissed.*

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

It was appropriate to certify residential schools action involving students who attended particular institute between 1922 and 1969 as class action — Identifiable class requirement under s. 5(1)(b) of Class Proceedings Act, 1992 was met — Motion judge applied wrong test in this regard by requiring that all students fully share cause of action — Shared interest need only extend to resolution of common issues — All class members shared same interest in resolution of whether certain duties were owed to them and whether those duties were breached.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

It was appropriate to certify residential schools action involving students who attended particular institute between 1922 and 1969 as class action — Common issue requirement under s. 5(1)(c) of Class Proceedings Act, 1992 was met — Proper analysis involved question of whether there were any issues resolution of which would be necessary to resolve each class member's claim and which could be said to be substantial ingredient of those claims — Plaintiffs' claim of systematic breach of duty was a part of every class member's case and was of sufficient importance to meet commonality requirement.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

It was appropriate to certify residential schools action involving students who attended particular institute between 1922 and 1969 as class action — Preferable procedure requirement under s. 5(1)(d) of Class Proceedings Act, 1992 was met — In context of entire claim, resolution of common issues would significantly advance action — Resolution of common issues would take action framed in negligence, fiduciary duty and aboriginal rights up to point where only harm, causation and individual defences such as limitations remained for determination — Access to justice would be greatly enhanced by single trial of common issues — Class action was manageable method of advancing claim.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Litigation plan

It was appropriate to certify residential schools action involving students who attended particular institute between 1922 and 1969 as class action — Workable litigation plan requirement under s. 5(1)(e)(ii) of Class Proceedings Act, 1992 was met — Certification motion did not fail on basis that plaintiffs had not yet produced workable litigation plan — Litigation plan produced

by the plaintiffs was, as was case with all litigation plans, something of work in progress — It would undoubtedly have to be amended, particularly in light of issues found to warrant common trial — Nothing in litigation plan exposed weaknesses in case as framed that undermined conclusion that class action was preferable procedure.

**Aboriginal law --- Practice and procedure — Parties — Representative or class actions**

It was appropriate to certify residential schools action involving students who attended particular institute between 1922 and 1969 as class action — All of requirements under s. 5(1) of Class Proceedings Act, 1992 were met.

**Churches and religious institutions --- Practice and procedure**

It was appropriate to certify residential schools action involving students who attended particular institute between 1922 and 1969 as class action — All of requirements under s. 5(1) of Class Proceedings Act, 1992 were met.

The plaintiffs brought an action against Canada, the Incorporated Synod of the Diocese of Huron and the New England Company for breach of fiduciary duty, negligence, assault, battery and breaches of aboriginal and treaty rights with respect to the operation of a residential school. The claims were made for the period from 1922 to 1969 on behalf of all students who attended the institute during that period. The plaintiffs estimated that there were approximately 1,400 such students. In addition, two of the plaintiffs advanced claims for breach of fiduciary duty and for loss of care, guidance and companionship under the Family Law Act. Those plaintiffs sought to represent the parents, siblings, spouses and children of former students. The number of such persons was estimated to be 4,200.

The plaintiffs moved for certification as a class proceeding. The motion judge determined that the Superior Court of Justice did not have jurisdiction to entertain claims under the Crown Liability and Proceedings Act arising from acts or omissions that occurred prior to May 14, 1953. The motion judge held that the plaintiffs did not have causes of action with respect to claims by family members of former students brought under the Family Law Act. The motion judge found that there were numerous, significant individual issues that would require trial beyond the resolution of any common issues and that the procedure of certification would not result in any judicial economy.

The plaintiffs' appeal was dismissed. The majority for the Divisional Court found that the motion judge committed no error with respect to the pre-May 14, 1953 claims and the Family Law Act claims. The majority found that the motion judge correctly determined that the resolution of the common issues presented to him for consideration would do nothing to avoid or limit the length of the individual claims which would be inevitable given the diverse experiences of each student. The majority found that even if the common issues advanced in this case were reformulated in terms of systemic negligence, the result would not be altered; the common issues would not significantly advance the action. The majority found that a class action was not the preferable procedure because the underlying policy objectives of access to justice, judicial economy and behaviour modification would not be served by certifying the action.

The dissenting judge for the Divisional Court found that the pre-May 15, 1953 claims against the Crown for breach of fiduciary duty were not barred by statute. The dissenting judge found that each of the criteria in s. 5(1) of the Class Proceedings Act ("CPA") was satisfied and that the action should be certified. The dissenting judge found that the primary class of plaintiffs consisted of all individuals who were students at the institute between 1922 and 1970. The dissenting judge found that if attention was directed solely to the possible existence of issues of systemic breach of duty in this case, such issues were common to the members of the primary class. The dissenting judge found that the required rational connection between the criteria for identifying members of the class and such issues was present. The dissenting judge found that a trial of the common issues would be a fair, efficient and manageable method of advancing the claims pleaded. The dissenting judge found that as the focus of the inquiry would be on the conduct of the defendants, those issues could be determined without regard to differences in the family backgrounds, the experiences of particular class members at the school and the facts of each incident in which harm was alleged to have occurred.

The plaintiffs appealed.

**Held:** The appeal was allowed and the action was certified.

The plaintiffs properly conceded that the Family Law Act claims, the claims for negligence occurring before 1953 and the claims for treaty rights could not be proceeded with. Otherwise, the claims for vicarious liability (although the plaintiffs conceded that those claims did not give rise to any common issue), breach of fiduciary duty and negligence (but only between 1953 and 1969 for negligence), survived the test in s. 5(1)(a) of the CPA that the claims must disclose a cause of action.

The identifiable class requirement under s. 5(1)(b) of the CPA was met. The motion judge applied the wrong test in this regard, by requiring that all students fully share a cause of action. The shared interest need only extend to the resolution of the common

issues. The majority of the Divisional Court did not address the identifiable class issue, but the dissenting judge correctly found that the requirement was met. The plaintiffs satisfied all dimensions of the requirement. None of the proposed classes was open-ended but, rather, were circumscribed by their defining criteria. The classes were rationally linked to the common issues found by the dissenting judge. All class members shared the same interest in the resolution of whether certain duties were owed to them and whether those duties were breached.

The common issues requirement under s. 5(1)(c) of the CPA was met. The motion judge focused on those aspects of the claim that in his view would require individual determination, student by student, and did not analyse what parts of the claim could be said to be common. The motion judge erred in his ultimate conclusion that there were no common issues. The majority of the Divisional Court did not address this requirement. The dissenting judge correctly analysed whether there were any issues the resolution of which would be necessary to resolve each class member's claim and which could be said to be a substantial ingredient of those claims. The plaintiffs' claim of systematic breach of duty was a part of every class member's case and was of sufficient importance to meet the commonality requirement. A class action was sufficiently flexible to deal with whatever variation in the applicable standard of care might arise on the evidence. The existence of limitations defences did not negate a finding that there were common issues. The common trial would take the claims to the point where only causation and harm remained to be established, and it would adjudicate a substantial part of each class member's claim by doing so. Also, as stated by the dissenting judge from Divisional Court, in a trial of the common issues the claims for an aggregate assessment of damages and punitive damages were properly included as common issues.

The preferable procedure requirement under s. 5(1)(d) of the CPA was met. As the dissenting judge of the Divisional Court found, in the context of the entire claim the resolution of the common issues would significantly advance the action. Resolution of the common issues would take the action framed in negligence, fiduciary duty and aboriginal rights up to the point where only harm, causation and individual defences such as limitations remained for determination. The common issues were fundamental to the action and could not be described as negligible in relation to the consequential individual issues or to the claim as a whole. A single trial of the common issues would achieve substantial judicial economy. Without a common trial, the issues would have to be dealt with in each individual action at an obvious cost in judicial time and possibly resulting in inconsistent outcomes. Access to justice would be greatly enhanced by a single trial of the common issues, and this consideration strongly favoured the conclusion that a class action was the preferable procedure. A class action was a manageable method of advancing the claim. The alternative dispute resolution ("ADR") system that had been put in place by Canada to deal with claims of those who attended native residential schools did not displace the conclusion that the class action was the preferable procedure. The ADR system was a system unilaterally created by one of the defendants and could be unilaterally dismantled without the consent of the plaintiffs. It dealt only with physical and sexual abuse. It capped the amount of possible recovery and, importantly, compared to the class action it shared the access to justice deficiencies of individual actions.

The "workable litigation plan" requirement under s. 5(1)(e)(ii) of the CPA was met. The certification motion did not fail on the basis that the plaintiffs had not yet produced a workable litigation plan. The litigation plan produced by the plaintiffs was, as was the case with all litigation plans, something of a work in progress. It would undoubtedly have to be amended, particularly in light of the issues found to warrant a common trial. Nothing in the litigation plan exposed weaknesses in the case as framed that undermined the conclusion that a class action was the preferable procedure.

APPEAL by plaintiffs from judgment reported at *Cloud v. Canada (Attorney General)* (2003), 65 O.R. (3d) 492, 2003 CarswellOnt 4630, 41 C.P.C. (5th) 226 (Ont. Div. Ct.) dismissing appeal from judgment dismissing motion for certification of action as class proceeding.

**Goudge J.A.:**

**Introduction**

1 The appellants seek to bring this action on behalf of the former students of the Mohawk Institute Residential School, a native residential school in Brantford, Ontario, and their families. They seek to recover for the harm said to have resulted from attending the School. The action is against those said to be responsible for running the School, namely Canada, the Diocese of Huron and the New England Company.

2 The question before us is whether the action should be certified pursuant to s. 5(1) of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 (the CPA).

3 The motion judge and the majority of the Divisional Court found that the action should not be certified, primarily because they saw no identifiable class of plaintiffs and no common issues, and, therefore, a class action could not be the preferable procedure. Rather, they viewed the case as one in which the issues were almost exclusively unique to each student and hence required adjudication individual by individual.

4 Cullity J. dissented in the Divisional Court. He found that the criteria for certification set out in s. 5(1) of the CPA were met. He found that there were common issues of sufficient relative importance in the context of the action as a whole that it should be certified.

5 In a case like this, set in the context of a residential school, the primary challenge is to determine if there are common issues and then, in light of the almost inevitable individual issues, to assess the relative importance of those common issues in relation to the claim as a whole. That question is centre stage in this appeal.

6 Cullity J. decided in favour of certification. I agree with his conclusion and, in large measure, with his analysis. Thus, for the reasons that follow, I would allow the appeal and certify the action.

## **The Background**

7 The legislative context for this appeal is found in s. 5(1) of the CPA. It provides that an action must be certified if certain specified criteria are met. The subsection reads as follows:

- 5(1) The court shall certify a class proceeding on a motion under section 2, 3 or 4 if,
- (a) the pleadings or the notice of application discloses a cause of action;
  - (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
  - (c) the claims or defences of the class members raise common issues;
  - (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
  - (e) there is a representative plaintiff or defendant who,
    - (i) would fairly and adequately represent the interests of the class,
    - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
    - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

8 The facts relevant to this appeal centre on the Mohawk Institute Residential School which was located in Brantford near the Six Nations Reserve. The School began its existence in 1828 as a residential school for First Nations children. It was founded

by the New England Company, an English charitable organization dating back to the 17<sup>th</sup> century, with the mission of teaching the Christian religion and the English language to the native peoples of North America.

9 The New England Company ran the School until 1922, when it leased the School to the federal government. Under the lease, Canada agreed to continue the School as an educational institution for native children and agreed to continue to train them in the teachings and doctrines of the Church of England. Indeed, in 1929, Canada sought to appoint an Anglican clergyman as principal of the School and looked to the Bishop of the Diocese of Huron to nominate appropriate candidates, a selection process that was repeated in 1945. The lease also entitled the New England Company to maintain some measure of control over the premises. It was renewed in similar terms in 1947 and ran until 1965, when the New England Company sold the School to Canada. Four years later, in 1969, the School closed.

10 This action covers the years from 1922 to 1969. During that time, there were 150 to 180 students at the School each year, ranging in age from 4 to 18 and split roughly equally between boys and girls. All were native children, that is Indians within the meaning of the *Indian Act*, R.S.C. 1906, c. 81, as amended. In all, approximately fourteen hundred native children attended the School in these years. They constitute the primary class of claimants proposed for this action. The appellants put forward two additional classes, a "siblings" class (namely the parents and siblings of the students) and a "families" class (namely their spouses and children).

11 The appellants are members of the various First Nations from which the students came. They allege that Canada, the New England Company and the Diocese of Huron, either singly or together, were responsible for the operation and management of the School.

12 Broadly put, their claim is that the School was run in a way that was designed to create an atmosphere of fear, intimidation and brutality. Physical discipline was frequent and excessive. Food, housing and clothing were inadequate. Staff members were unskilled and improperly supervised. Students were cut off from their families. They were forbidden to speak their native languages and were forced to attend and participate in Christian religious activities. It is alleged that the aim of the School was to promote the assimilation of native children. It is said that all students suffered as a result.

### **The Judgments Below**

13 The statement of claim commencing this action was issued on October 5, 1998. It seeks damages on behalf of the students for breach of fiduciary duty, negligence, assault, sexual assault, battery, breach of aboriginal rights and breach of Treaty rights. Damages are also claimed on behalf of the siblings and families of the students for breach of fiduciary duty and for loss of care, guidance and companionship pursuant to the *Family Law Act*, R.S.O. 1990, c. F.3. Finally, the statement of claim advances a claim for punitive damages.

14 In June of 2001, the appellants sought certification of the action pursuant to the CPA, although they excluded the claims for sexual assault from that request.

15 Haines J. dismissed the motion. He dealt in turn with each of the criteria for certification set out in s. 5(1) of the CPA. He found that it is plain and obvious that any claims arising from acts or omissions before May 14, 1953, when the *Crown Liability Act*, S.C. 1952-53, c. 30 came into effect, cannot succeed because the Superior Court of Justice has no jurisdiction to consider those claims. For the period from 1953 to 1969 he concluded that the pleadings were sufficient to disclose a cause of action for breach of fiduciary duty, for the torts alleged, and for breach of aboriginal rights, but not for breach of Treaty rights. Finally, he found it plain and obvious that the claims of the siblings and family members could not succeed.

16 The motion judge then examined whether there was an identifiable class and whether there were any common issues. He found neither, because in essence he could see no cause of action common to all the students who attended the school between 1922 and 1969. He found that the circumstances and experiences of the students were far too diverse to support the notion that the respondents owed identical duties to each student, nor could it be said that, to the extent these duties were breached against one, they were breached against all.

17 The motion judge then briefly addressed the preferability criterion. He concluded that it was not met because of the wide variety of important individual issues requiring independent inquiry, and thus certification would not serve the objectives of access to justice, judicial economy and behaviour modification.

18 Lastly, the motion judge found the appellants to be suitable representatives but the proposed litigation plan to be unworkable in that it sought a common minimum award of damages for each student who had attended the school.

19 In dismissing the motion for certification, the motion judge summed up his conclusion at para. 80 of his reasons:

I have concluded that the statement of claim does disclose a cause of action with respect to certain claims of the student plaintiffs. I have found, however, that the plaintiffs have failed to establish there is an identifiable class and have failed to demonstrate their claims raise common issues. In the result, the motion for certification is dismissed.

20 On appeal, the majority of the Divisional Court upheld this conclusion. They agreed with the motion judge that the Superior Court of Justice has no jurisdiction over claims arising before May 14, 1953, and that the claims of family members under the *Family Law Act*, must fail because they are based on legislation first enacted in 1978 that cannot be given retroactive effect, as decided in this Court's decision in *Lafrance Estate v. Canada (Attorney General)* (2003), 64 O.R. (3d) 1 (Ont. C.A.).

21 Although the majority noted that the motion judge found no common issues, they did not discuss either that conclusion or his finding that there was no identifiable class. Rather, they found it necessary to address only the preferability criterion in s. 5(1)(d) of the CPA. They concluded that there was no evidence of access to justice difficulties with individual students pursuing individual claims and no need to consider behaviour modification because residential schools are now a thing of the past in Canada. Most importantly, they concluded that no judicial economy would be achieved by certification because no matter how any common issues might be framed, their resolution would do nothing to avoid or limit the individual claims which would be inevitable, given the diverse experiences of each student. Finally, they said that a class action would be unfair to the defendants and would create an unmanageable trial.

22 Cullity J. dissented. He found each of the five criteria in s. 5(1) of the CPA to be satisfied, and concluded that the appeal should be allowed and the action certified.

23 In addressing whether the pleadings disclose a cause of action as required by s. 5(1)(a) he found that claims against the Crown for vicarious liability for the actions of its employees prior to May 14, 1953, can be brought in the Superior Court of Justice because of the jurisdiction given to that court by the *Crown Liability and Proceedings Act*, R.S.C. 1985, c. C-50 as amended, and because the ban in s. 24(1) of the *Crown Liability Act* does not extend to claims like this because they could have been brought against the Crown before May 14, 1953, in the Exchequer Court.

24 Similarly, he found that the claim against the Crown for breach of fiduciary duty is a claim in equity that could have been brought against the Crown in the Exchequer Court before May 14, 1953, and can therefore now be brought in the Superior Court even if it arises before that date. Although he does not say so expressly, it is implicit in his reasons that he treated the claim for breach of aboriginal rights in the same way, because he found it to be a common issue as well.

25 However, he agreed with the motion judge that the claims in tort for breach of duty owed by the Crown directly to class members can only be advanced if they arose after May 14, 1953. Finally, he also agreed that the claim pursuant to the *Family Law Act* cannot stand.

26 He found that the requirement that there be an identifiable class was also met. He held that the members of the class of individuals who were students at the school between 1922 and 1969 could be ascertained by objective criteria rationally linked to the common issues he identified.

27 He also concluded that the families and siblings of the students both constituted identifiable classes, provided that the claim for breach of fiduciary duty owed to them by the Crown could be said to disclose a cause of action sufficient to meet the criterion in s. 5(1)(a).

28 He then turned to examine in more detail whether the claims of class members raised common issues as required by s. 5(1)(c). He began by describing the sizeable challenge faced by the motion judge on this score, given that the litigation plan first presented by the plaintiffs proposed a list of fifty-three common issues. Many, such as how the operations of the school were funded, were drafted with such particularity that their resolution would be of little moment in the trial of these claims. He quite rightly pointed out that although class actions often require active and continual management of the proceedings by the court, plaintiffs' counsel nonetheless has the responsibility to establish that the criteria for certification are met, including the identification of common issues. Counsel cannot expect the judge on a certification motion to single-handedly fashion the common issues in order to meet the requirements of s. 5(1)(c).

29 By the time of the appeal to the Divisional Court, the appellants had reworked their list and were proposing eight more broadly framed common issues. Cullity J. found that with some further refashioning there were common issues sufficient to satisfy s. 5(1)(c). He placed considerable reliance on the reasons of the Supreme Court of Canada in *Rumley v. British Columbia* (2001), 205 D.L.R. (4th) 39 (S.C.C.) which were released after the decision of the motion judge here. He focused on the duty of care said to be owed to all members of the student class and the fiduciary duty owed both to them and the families and siblings classes. He found that the common issues could be defined in terms of these duties and their breach. He described his conclusion about the common issues at paras. 25 and 31 of his reasons:

As in *Rumley*, they would include a failure to have in place management and operations procedures that would reasonably have prevented abuse and, in addition, issues similar to those described by the Court of Appeal in *Lafrance Estate* as the essence of the claims for breach of fiduciary duty against the Crown in that case: namely, whether "the very purpose of the Crown's assumption of control over the primary plaintiffs was to strip the Indian children of their culture and identity, thereby removing, as and when they became adults, their ability 'to pass on to succeeding generations the spiritual, cultural and behavioural bases of their people.'"

.....

While I would not accept without modification the original formulation — or the reformulation — of the common issues proposed on behalf of the plaintiffs, such issues could, I believe, be defined in terms of the existence and breach of duties of care, and fiduciary duties, owed by the defendants to class members — and the infringement of the aboriginal rights of the members — with respect to the purposes, operations, management and supervision of the Mohawk Institute and with respect to each of the categories of harm referred to in paragraphs 51 and 52 of the statement of claim. The issues relating to the existence and breach by the Crown of duties of care in tort would be confined to conduct that occurred after May 13, 1953. I would also include as common issues the claim for punitive damages arising from any of the above breaches that are proven and the possibility of an aggregate assessment of damages.

30 He did, however, go on to reject the claim for vicarious liability, finding that because the claim addressed the conduct of particular employees towards particular students it could not qualify as a common issue.

31 Finally, he turned to the preferability requirement of s. 5(1)(d). He found that any deference owed to the motion judge on this issue was displaced because the preferability analysis can be properly done only in light of the common issues identified and the motion judge identified none. He went on to conclude that the trial of the common issues he identified would be a fair, efficient and manageable method of advancing the claims pleaded and would be preferable to other procedures. Unlike his colleagues, he accepted the evidence of the vulnerability of class members and thus found that the objective of access to justice would be served to an appreciable extent by certification. However, he gave most weight to the judicial economy to be achieved by having one trial of the common issues rather than fourteen hundred.

32 In summary, he found that the focus of the trial of the common issues would be on the conduct of the respondents rather than on the precise circumstances of particular class members and that the existence of individual issues such as limitation periods or causation of harm to individual students was not enough to outweigh the conclusion that resolution of the common issues would significantly advance this action.

33 He concluded by finding that although the proposed litigation plan required reformulation in light of his findings, its deficiencies were not sufficient to deny the motion. He would have allowed the appeal, granted certification, and left the details of the litigation plan to be resolved by counsel under the supervision of the judge assigned to case manage the proceedings.

### **Analysis**

34 With leave, the appellants appeal to this court, seeking an order setting aside the orders of the Divisional Court and the motion judge and certifying the action. They invite us to do so on the basis of the reasoning of Cullity J. which they fully endorse. They argue that all of the five of the criteria in s. 5(1) of the CPA are met and that the court must therefore certify. The respondents contest each of these, some more vigorously than others, most pointedly the preferability requirement.

35 Before addressing in turn each of these factors, it is helpful to repeat the full subsection and set out the principles applicable to its application as they have been developed by the Supreme Court of Canada and this court. Section 5(1) reads as follows:

- 5(1) The court shall certify a class proceeding on a motion under section 2, 3 or 4 if,
- (a) the pleadings or the notice of application discloses a cause of action;
  - (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
  - (c) the claims or defences of the class members raise common issues;
  - (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
  - (e) there is a representative plaintiff or defendant who,
    - (i) would fairly and adequately represent the interests of the class,
    - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
    - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

36 The Supreme Court of Canada has issued three important decisions to guide the development of class actions in Canada: *Western Canadian Shopping Centres Inc. v. Dutton* (2001), 201 D.L.R. (4th) 385 (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)* (2001), 205 D.L.R. (4th) 19 (S.C.C.), and *Rumley*, supra. In *Hollick*, the Supreme Court of Canada had its first opportunity to enunciate the interpretive approach to be applied to the CPA in general and to its certification provisions in particular.

37 Speaking for the Court at paras. 14-16, McLachlin C.J.C. made clear that in light of its legislative history, the CPA should be construed generously and that an overly restrictive approach must be avoided in order to realize the benefits of the legislation as foreseen by its drafters, namely serving judicial economy, enhancing access to justice and encouraging behaviour modification by those who cause harm. She underlined the particular importance of keeping this principle in mind at the certification stage.

38 In addition, she emphasized that the certification stage is decidedly not meant to be a test of the merits of the action, but rather focuses on its form. As she said at para. 16, "The question at the certification stage is not whether the claim is likely to succeed, but whether the suit is appropriately prosecuted as a class action."

39 For its part, this court has said that because of the expertise developed in this new and evolving field of class actions by the small group of judges across the province who have significant experience in hearing certification motions, an appellate court should proceed with deference and should restrict its intervention to matters of general principle. See *Carom v. Bre-X*

*Minerals Ltd.* (2000), 51 O.R. (3d) 236 (Ont. C.A.). This admonition is somewhat complicated in this particular case because both Haines J. and Cullity J. have been part of that small group.

40 It is against this backdrop then that the debate between the parties on each of the requirements of s. 5(1) must be considered.

***The Cause of Action Criterion — s. 5(1)(a)***

41 It is now well established that this requirement will prevent certification only where it is "plain and obvious" that the pleadings disclose no cause of action, as that test was developed in *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.).

42 Although the parties originally differed on whether that test is met here, by the time of argument in this court they had come to agree that the appellants' pleadings disclose the following causes of action within the meaning of that test:

- (a) The claim for vicarious liability of the defendants over the full period of this action namely, 1922 to 1969 (although the appellants do not contest Cullity J.'s conclusion that these claims do not give rise to any common issue);
- (b) The claim for breach of fiduciary duty owed to the members of the student class over the full time frame of the action;
- (c) The claim for breach of fiduciary duty owed to the members of the families and siblings classes over the full time frame of the action (given this court's decision in *Lafrance Estate*, *supra*); and
- (d) The claims for negligence of the defendants but only between 1953 and 1969.

43 I agree with the parties that these causes of action survive the test in s. 5(1)(a). Although it was not the subject of separate argument before us, I would reach the same conclusion concerning the claim for breach of the aboriginal rights of the members of the student class over the full time frame of the action, because this claim is so closely akin to the claim for breach of fiduciary duty.

44 On the other side of the coin, the appellants also now properly concede that the following claims cannot be proceeded with:

- (a) The claims of the members of the families and siblings classes pursuant to the *Family Law Act*;
- (b) The claims for negligence occurring before 1953; and
- (c) The claims for breach of Treaty rights (which the motion judge found were not made out on the pleadings and which the appellants did not thereafter pursue).

***The Identifiable Class Requirement — s. 5(1)(b)***

45 *Hollick*, *supra*, at para. 17, describes what is necessary to meet this requirement. The appellants are required to show that the three proposed classes are defined by objective criteria which can be used to determine whether a person is a member without reference to the merits of the action. In other words, each class must be bounded and not of unlimited membership. As well, there must be some rational relationship between the classes and the common issues. The appellants have an obligation, although not an onerous one, to show that the classes are not unnecessarily broad and could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issues.

46 As I have said, Haines J. found that the appellants failed to establish any identifiable class. In my view, he applied the wrong test in doing so by requiring that all students fully share a cause of action. This is inconsistent with *Hollick*, *supra*, which makes clear that the shared interest need only extend to the resolution of the common issues. The application of a wrong test is an error in principle and the decision which results can attract no deference. For its part, the majority of the Divisional Court did not address the identifiable class issue. However Cullity J. found that the requirement in s. 5(1)(b) had been satisfied by the appellants.

47 In my view, he was correct in doing so. The appellants satisfy all the dimensions of this requirement. Membership in the student class is defined by the objective requirement that a member have attended the school between 1922 and 1969. Membership in the families class requires that a person meet the objective criterion of being a spouse, common law spouse or child of someone who was a student. Likewise the siblings class is defined as the parents and siblings of those students. None of the three proposed classes is open-ended. Rather all are circumscribed by their defining criteria. All three classes are rationally linked to the common issues found by Cullity J. in that it is the class members to whom the duties of reasonable care, fiduciary obligation and aboriginal rights are said to be owed and they are the ones who are said to have experienced the breach of those duties. Finally, because all class members claim breach of these duties and that they all suffered at least some harm as a result, these classes are not unnecessarily broad. All class members share the same interest in the resolution of whether they were owed these duties and whether these duties were breached. Any narrower class definition would necessarily leave out some who share that interest. Thus I conclude that the identifiable class requirement is met.

#### ***The Common Issues Requirement — s. 5(1)(c)***

48 As with each of the criteria in s. 5(1) the common issues requirement must be discretely addressed and satisfied for the action to be certified. However, there is no doubt that this analysis will often overlap with that required by other factors in s. 5(1). Indeed in some cases these inquiries may be somewhat interdependent. For example, the identification of common issues will often depend in part upon the definition of the identifiable class and vice versa. This particular interrelationship is reflected in the requirement that there be some rational relationship between the identifiable class and the common issues. Hence the discussion of common issues must have in mind the identifiable class, just as the discussion of identifiable class proceeded in light of the common issues.

49 Moreover, like the other criteria in s. 5(1), save for the disclosure of a cause of action, the common issues criterion obliges the class representative to establish an evidentiary basis for concluding that the criterion is met. McLachlin C.J.C. put it this way in *Hollick*, *supra*, at para. 25: "In my view, the class representative must show some basis in fact for each of the certification requirements set out in s. 5 of the Act, other than the requirement that the pleadings disclose a cause of action."

50 *Hollick* also makes clear that this does not entail any assessment of the merits at the certification stage. Indeed, on a certification motion the court is ill equipped to resolve conflicts in the evidence or to engage in finely calibrated assessments of evidentiary weight. What it must find is some basis in fact for the certification requirement in issue.

51 *Hollick* also explains the legal test by which the common issues requirement is to be assessed. After dealing with the identifiable class factor, the Supreme Court addressed this question at para. 18:

A more difficult question is whether "the claims...of the class members raise common issues", as required by s. 5(1)(c) of the *Class Proceedings Act, 1992*. As I wrote in *Western Canadian Shopping Centres*, the underlying question is "whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis". Thus an issue will be common "only where its resolution is necessary to the resolution of each class member's claim" (para. 39). Further, an issue will not be "common" in the requisite sense unless the issue is a "substantial...ingredient" of each of the class members' claims.

52 This requirement has been described by this court as a low bar. See *Carom*, *supra*, at para. 42. Indeed this description is consistent with the commonality finding in *Hollick* itself. The class action proposed there was on behalf of some thirty thousand people who lived in the vicinity of a landfill site that was alleged to cause harm through noise and physical pollution. The Supreme Court found that the issue of whether the site emitted pollutants into the air met the test of s. 5(1)(c) because each class member would have to show this or see his claim fail. The Court did not see this conclusion to be at all undermined by the fact that this common issue was but one aspect of the liability issue and a small one at that. It clearly accepted that after the trial of the common issue the many remaining aspects of liability and the question of damages would have to be decided individually. Yet it found the commonality requirement to be met.

53 In other words, an issue can constitute a substantial ingredient of the claims and satisfy s. 5(1)(c) even if it makes up a very limited aspect of the liability question and even though many individual issues remain to be decided after its resolution. In such a case the task posed by s. 5(1)(c) is to test whether there are aspects of the case that meet the commonality requirement rather than to elucidate the various individual issues which may remain after the common trial. This is consistent with the positive approach to the CPA urged by the Supreme Court as the way to best realize the benefits of that legislation as foreseen by its drafters.

54 Neither the reasons of the motion judge nor those of the majority of the Divisional Court reflect this approach to the commonality assessment. The motion judge focused on those aspects of the claim that in his view would require individual determination, student by student. Although he did not have the benefit of the Supreme Court decision in *Hollick, supra*, he did not analyze what parts of the claim could be said to be common as explained in that decision. Moreover, in my view, he erred in his ultimate conclusion that there were no common issues. For its part, the majority of the Divisional Court felt it unnecessary to address this criterion.

55 On the other hand, I think Cullity J. approached the commonality issue correctly and reached the right result. As I have described, rather than focusing on how many individual issues there might be and concluding from that that there could be no common issues, Cullity J. analyzed whether there were any issues the resolution of which would be necessary to resolve each class member's claim and which could be said to be a substantial ingredient of those claims.

56 Relying on *Rumley*, he found that a substantial part of each claim was the alleged breach of the various legal duties said to be owed to all class members. For the student class these duties are framed in negligence, fiduciary obligation and aboriginal rights. For the other two classes the claim is one of fiduciary obligation. The need to determine the existence of these duties and whether they were breached in respect of all class members is a significant part of the claim of each class member. Finally, he found that the claim for an aggregate assessment of damages for the breaches found and the claim for punitive damages for the respondents' conduct also met the commonality requirement. Thus he found that s. 5(1)(c) was met.

57 The appellants urge us to adopt Cullity J.'s conclusion. On the other hand the respondents attack it in several ways.

58 The respondents' basic challenge is that the claims of the class members are so fundamentally individual in nature that any commonality among them is superficial. I do not agree. Cullity J. focused on the appellants' claim of systemic breach of duty, that is whether, in the way they ran the School, the respondents breached their lawful duties to all members of the three classes. In my view, this is a part of every class member's case and is of sufficient importance to meet the commonality requirement. It is a real and substantive issue for each individual's claim to recover for the way the respondents ran the School. As the analysis in *Hollick, supra*, exemplifies, the fact that beyond the common issues there are numerous issues that require individual resolution does not undermine the commonality conclusion. Rather, that is to be considered in the assessment of whether a class action would be the preferable procedure.

59 The respondents also argue that the claim of systemic negligence in running the School cannot serve as a common issue because the standard of care would undoubtedly change over time as educational standards change. However, in my view this argument is answered by *Rumley*, which was also a claim based on systemic negligence in the running of a residential school for children. There the Supreme Court found that the class action proceeding is sufficiently flexible to deal with whatever variation in the applicable standard of care might arise on the evidence. In that case the claim covered a forty-two year period. Here, in analogous circumstances, the negligence claim covers only sixteen years, from 1953 to 1969.

60 The respondents also say that the affidavit material shows that many of the appellants and other class members did not suffer much of the harm alleged, such as loss of language and culture. They argue that this underlines the individual nature of these claims and negates any commonality. Again, I disagree. There is no doubt that causation of harm will have to be decided individual by individual if and when it is found in the common trial that the respondents owed legal duties to all class members which they breached. However, this does not undermine the conclusion that whether such duties were owed, what the standard of care was, and whether the respondents breached those duties constitute common issues for the purposes of s. 5(1)(c).

61 Equally the respondents' assertion of limitations defences does not undermine the finding of common issues. In the context of these issues, these defences must await the conclusion of the common trial. They can only be dealt with after it is determined whether there were breaches of the systemic duties alleged and over what period of time and when those breaches occurred. Only then can it be concluded when the limitations defence arose. Moreover, because an inquiry into discoverability will undoubtedly be a part of the limitations debate and because that inquiry must be done individual by individual, these defences can only be addressed as a part of the individual trials following the common trial. As with other individual issues, the existence of limitations defences does not negate a finding that there are common issues.

62 The respondents other than Canada also argue that, at least for them, the finding of common issues by Cullity J. is undermined by their assertion that their proximity to Canada in exercising control over the operation of the School varied over time. Again, I disagree. At best that assertion may provide these respondents with a defence to the appellants' claims in the common trial for certain periods of time. Nonetheless the common issues remain and require resolution.

63 Lastly the respondents say that in reaching his conclusion about common issues Cullity J. should not have relied on *Rumley*, but should have distinguished it. They say this essentially for two reasons. First *Rumley* involved sexual abuse of students and therefore there could be little debate about the duty to prevent it owed by those running the school, whereas, here, the legal duties alleged are seriously contested. Second, they say that in *Rumley* there were very few individual issues requiring resolution because, for example, sexual abuse had been found to occur and there were no issues of vicarious liability or limitations requiring individual resolution.

64 In my view neither of these renders *Rumley* inapplicable to this case. Although the existence of the systemic duty of care to all students and its precise nature may be more hotly contested here than in *Rumley*, nonetheless the issue is a significant one requiring resolution for each class member and is a proper common issue.

65 Moreover, at para. 33 of *Rumley*, the Supreme Court made clear that the comparative extent of individual issues is not a consideration in the commonality inquiry although it is obviously a factor in the preferability assessment. Although the Court underlined that it was dealing with the British Columbia *Class Proceedings Act* (which explicitly states that the common issues requirement may be met whether or not these issues predominate over individual issues, whereas the CPA is silent on the point), in my view the same approach is implicit in the CPA. A weighing of the relative importance of the common issues and the remaining individual issues is necessarily an important part of the preferability inquiry. I do not think that the CPA contemplates a duplication of that task as part of the commonality inquiry. The CPA's silence on the point cannot be read as mandating the opposite of the B.C. legislation. Thus the extent of individual issues that may remain after the common trial in this case does not undermine the conclusion that the commonality requirement is met.

66 I therefore agree that the appellants have met the commonality requirement. A significant part of the claim of every class member focuses on the way that the respondents ran the School. It is said that their management of the School created an atmosphere of fear, intimidation and brutality that all students suffered and hardship that harmed all students. It is said that the respondents did this both by means of the policies and practices they employed and because of the policies and practices they did not have that would reasonably have prevented abuse. Indeed, it is said that their very purpose in running the School as they did was to eradicate the native culture of the students. It is alleged that the respondents breached various legal duties to all class members by running the School in this way.

67 In the affidavits of the ten representative plaintiffs there is a clear showing of some basis in fact supporting this description of the way in which the School was run. Although their cross-examinations support the conclusion that students were not all treated the same way and did not all experience the same suffering, the appellants have shown some basis in fact for their assertion that the management and operation of the School raises the common issues required for certification by s. 5(1)(c). They have met their evidentiary burden.

68 The appellants acknowledge that if they are successful in the common issues trial it will be necessary to separately establish causation of harm and quantification of damages for each individual class member for all three classes.

69 Nevertheless, it is my view that whether the respondents owed legal obligations to the class members that were breached by the way the respondents ran the School is a necessary and substantial part of each class member's claim. No individual can succeed in his or her claim to recover for harm suffered because of the way the respondents ran the School without establishing these obligations and their breach. The common trial will take these claims to the point where only causation and harm remain to be established. In my view it will adjudicate a substantial part of each class member's claim by doing so. Hence the appellants have met the commonality requirement.

70 I also agree with Cullity J. that in a trial of these common issues the claims for an aggregate assessment of damages and punitive damages are properly included as common issues. The trial judge should be able to make an aggregate assessment of the damages suffered by all class members due to the breaches found, if this can reasonably be done without proof of loss by each individual member. Indeed, this is consistent with s. 24 of the CPA. As well, given that the common trial will be about the way the respondents ran the School and their alleged purpose in doing so, it can also properly assess whether this conduct towards the members of the three classes as a whole should be sanctioned by means of punitive damages.

71 In summary, I agree with Cullity J. that the appellants have met the requirements set by s. 5(1)(c) of the CPA. The focus of the common trial will be on the conduct of the respondents as it affected all class members, and how and for what purpose they ran the School. Although evidence from individuals that speaks to the respondents' systemic conduct may be relevant to this, findings of causation and extent of harm must await the individual trials to follow.

72 As the class action proceeds, the judge managing it may well determine that the common issues should be restated with greater particularity in light of his or her experience with the class proceeding. To permit that process to unfold with flexibility, at this stage. I would state the common issues in general terms, as follows:

- (1) By their operation or management of the Mohawk Institute Residential School from 1953 to 1969 did the defendants breach a duty of care owed to the students of the School to protect them from actionable physical or mental harm?
- (2) By their purpose, operation or management of the Mohawk Institute Residential School from 1922 to 1969 did the defendants breach a fiduciary duty owed to the students of the School to protect them from actionable physical or mental harm, or the aboriginal rights of those students?
- (3) By their purpose, operation or management of the Mohawk Institute Residential School from 1922 to 1969 did the defendants breach a fiduciary duty owed to the families and siblings of the students of the School?
- (4) If the answer to any of these common issues is yes, can the court make an aggregate assessment of the damages suffered by all class members of each class as part of the common trial?
- (5) If the answer to any of these common issues is yes, were the defendants guilty of conduct that justifies an award of punitive damages?
- (6) If the answer to that is yes, what amount of punitive damages is awarded?

***The Preferable Procedure Requirement — s. 5(1)(d)***

73 As explained by the Supreme Court of Canada in *Hollick*, *supra*, at paras. 27-28, the preferability requirement has two concepts at its core. The first is whether or not the class action would be a fair, efficient and manageable method of advancing the claim. The second is whether the class action would be preferable to other reasonably available means of resolving the claims of class members. The analysis must keep in mind the three principal advantages of class actions, namely judicial economy, access to justice, and behaviour modification and must consider the degree to which each would be achieved by certification.

74 *Hollick* also decided that the determination of whether a proposed class action is a fair, efficient and manageable method of advancing the claim requires an examination of the common issues in their context. The inquiry must take into account the importance of the common issues in relation to the claim as a whole.

75 At para. 30 of that decision the Court also makes clear that the preferability requirement in s. 5(1)(d) of the CPA can be met even where there are substantial individual issues and that its drafters rejected the requirement that the common issues predominate over the individual issues in order for the class action to be the preferable procedure. This contrasts with the British Columbia legislation in which the preferability inquiry includes whether the common issues predominate over the individual cases.

76 In Ontario it is nonetheless essential to assess the importance of the common issues in relation to the claim as a whole. It will not be enough if the common issues are negligible in relation to the individual issues. The preferability finding in *Hollick* itself was just this and the requirement was therefore found not to be met. That decision tells us that the critical question is whether, viewing the common issues in the context of the entire claim, their resolution will significantly advance the action.

77 Neither the motion judge nor the majority of the Divisional Court properly addressed this vital aspect of the preferability inquiry and thus their conclusion cannot stand. As Cullity J. said, the determination of whether, in the context of the entire claim, the resolution of the common issues will significantly advance the action can only be done in light of the particular common issues identified. Here the motion judge found none and therefore could not make this assessment. The majority of the Divisional Court did not address the common issues requirement but simply stated its conclusion that any attempt to formulate common issues in terms of systemic negligence would not significantly advance the litigation given the numerous individual claims. With respect, without an articulation of what the common issues are, any assessment of their relative importance in the context of the entire claim cannot be properly made. It would risk a conclusion based not on relative importance but simply on the existence of a large number of individual issues. It would also preclude any appellate review.

78 On the other hand, as I have outlined, Cullity J. found that in the context of the entire claim the resolution of the common issues he found would significantly advance the action and that otherwise the preferability requirement was met. I agree with that conclusion.

79 As they did with the common issues, the respondents contest this finding in several different ways. Here too their primary attack is that the vast majority of issues require individual determination. They say that these issues involve individual acts of abuse, different perpetrators, unique individual circumstances both before and after attendance at the school widely varying impacts and damage claims, and an array of different limitations, triggers and discoverability issues. They argue that the common issues are negligible in comparison and that their resolution will not significantly advance the action.

80 I do not agree. An important part of the claims of all class members turns on the way the respondents ran the School over the time frame of this action. The factual assertion is both that the respondents had in place policies and practices, such as excessive physical discipline, and that they failed to have in place preventative policies and practices, such as reasonable hiring and supervision, which together resulted in the intimidation, brutality and abuse endured by the students at the School. It is said that the respondents sought to destroy the native language, culture and spirituality of all class members. The legal assertion is that by running the School in this way the respondents were in breach of the various legal obligations they owed to all class members. Together these assertions comprise the common issues that must be assessed in relation to the claim as a whole.

81 I agree with Cullity J. that whether framed in negligence, fiduciary obligation or aboriginal rights the nature and extent of the legal duties owed by the respondents to the class members and whether those duties were breached will be of primary importance in the action as framed. If class members are to recover, they must first succeed on this issue. It is only at that point that individual issues of the kind raised by the respondents would arise. Save for those relating to limitations they are all aspects of harm and causation, both of which the appellants acknowledge they will have to establish individual by individual. The limitations questions are all individual defences, which the appellants also acknowledge will require individual adjudication.

82 The resolution of these common issues therefore takes the action framed in negligence, fiduciary duty and aboriginal rights up to the point where only harm, causation and individual defences such as limitations remain for determination. This moves the action a long way.

83 The common issues are fundamental to the action. They cannot be described as negligible in relation to the consequential individual issues nor to the claim as a whole. To resolve the debate about the existence of the legal duties on which the claim is founded and whether these duties were breached is to significantly advance the action.

84 This assessment is not quantitative so much as qualitative. It is not driven by the mere number of individual adjudications that may remain after the common trial. The finding in *Rumley* demonstrates this. The class there was defined as students at the residential school between 1950 and 1992 who reside in British Columbia and claimed to have suffered injury, loss, or damages as a result of misconduct of a sexual nature occurring at the school. The common issues were defined very similarly to those in this case. The Supreme Court recognized that following their resolution, adjudication of injury and causation would be required individual by individual. Although the number of individual adjudications appears to have been uncertain, the time frame of the action alone suggests that it might be relatively high. Yet the Court was able to conclude that the common issues predominated over those affecting only individual class members, which is a consideration required by the British Columbia legislation. This as an even higher standard than that set for preferability under the CPA, namely that viewed in the context of the entire claim, the resolution of the common issues must significantly advance the action. However, in both cases the assessment is a qualitative one, not a comparison of the number of common issues to the number of individual issues.

85 In this case that qualitative assessment derives from the reality that resolving the common issues will take the action a long way. That assessment is also informed in an important way by the considerations of judicial economy and access to justice. Because residential schools for native children are no longer part of the Canadian landscape, the third objective of class proceedings, namely behaviour modification, is of no moment here.

86 However, I think that a single trial of the common issues will achieve substantial judicial economy. Without a common trial, these issues would have to be dealt with in each individual action at an obvious cost in judicial time possibly resulting in inconsistent outcomes. As Cullity J. said, a single trial would make it unnecessary to adduce more than once evidence of the history of the establishment and operation of the School and the involvement of each of the respondents.

87 Access to justice would also be greatly enhanced by a single trial of the common issues. I do not agree with the majority of the Divisional Court that there is nothing in the record to sustain this conclusion. The affidavit material makes clear that the appellants seek to represent many who are aging, very poor, and in some cases still very emotionally troubled by their experiences at the school. Cullity J. put it this way at para. 46 of his reasons:

While the goal of behavioural modification does not seem to be a value that would be achieved to any extent by certification, I am satisfied that the vulnerability of members of the class — as evidenced by the uncontradicted statements in the affidavits sworn by the representative plaintiffs — is such that the objective of providing access to justice would be served to an appreciable extent. Each of the representative plaintiffs referred to the poverty of many of the former students, their inability to afford the cost of individual actions and the effect such proceedings would have on the continuing emotional problems from which they suffer as a result of their experiences at the Mohawk Institute. These statements were not challenged on cross-examination and, unlike my colleagues, I see no reason to reject their truth or their significance.

88 In short, I think that the access to justice consideration strongly favours the conclusion that a class action is the preferable procedure. The language used by the Chief Justice in *Rumley* at para. 39 is equally apt to this case:

Litigation is always a difficult process but I am convinced that it will be extraordinarily so for the class members here. Allowing the suit to proceed as a class action may go some way toward mitigating the difficulties that will be faced by the class members.

89 The respondents also attack Cullity J.'s preferability finding by saying that a class action would be unfair to them and would create an unmanageable proceeding. I do not agree. The common issues require resolution one way or the other. It is no less fair to the respondents to face them in a single trial than in many individual trials. Nor, at this stage, is there any reason to think that a single trial would be unmanageable. The common issues centre on the way the respondents ran the School and can probably be dealt with even more efficiently in one trial than in fourteen hundred.

90 That conclusion is not altered even if one takes into consideration the individual adjudications that would follow. The fact of a number of individual adjudications of harm and causation did not render the action in *Rumley* unmanageable and does not do so here. Moreover, the CPA provides for great flexibility in the process. For example, s. 10 allows for decertification if, as the action unfolds, it appears that the requirements of s. 5(1) cease to be met. In addition, s. 25 contemplates a variety of ways in which individual issues may be determined following the common issues trial other than by the presiding trial judge. Thus at this stage in the proceedings, when one views the common issues trial in the context of the action as whole, there is no reason to doubt the conclusion that the class action is a manageable method of advancing the claim.

91 Lastly, the respondents argue that Cullity J. was wrong because the class action is not preferable to other means of resolving class members' claims. They support this position with fresh evidence filed in this court describing the alternative dispute resolution system that has been put in place by Canada to deal with claims of those who attended native residential schools.

92 Even if we were to admit this fresh evidence I do not agree that this ADR system displaces the conclusion that the class action is the preferable procedure. It is a system unilaterally created by one of the respondents in this action and could be unilaterally dismantled without the consent of the appellants. It deals only with physical and sexual abuse. It caps the amount of possible recovery and, most importantly in these circumstances, compared to the class action it shares the access to justice deficiencies of individual actions. It does not compare favourably with a common trial.

93 Thus I conclude that each of the respondents' attacks must fail and that Cullity J. was correct to find that the appellants have met the preferability requirement.

#### ***The Workable Litigation Plan Requirement — s. 5(1)(e)(ii)***

94 Although it was not strenuously pursued in oral submissions, the respondents also argue in their factums that the action cannot be certified because the appellants have not yet produced a workable litigation plan.

95 I do not agree that the appellants' certification motion should fail on this basis. The litigation plan produced by the appellants is, like all litigation plans, something of a work in progress. It will undoubtedly have to be amended, particularly in light of the issues found to warrant a common trial. Any shortcomings due to its failure to provide for when limitations issues will be dealt with or how third party claims are to be accommodated can be addressed under the supervision of the case management judge once the pleadings are complete. Most importantly, nothing in the litigation plan exposes weaknesses in the case as framed that undermine the conclusion that a class action is the preferable procedure.

#### **Conclusion**

96 I conclude that the appellants have shown that their action satisfies all the requirements of s. 5(1) of the CPA. It must therefore be certified and remitted to the supervision of the Superior Court judge assigned to manage the action.

97 That judge will undoubtedly face significant challenges as this class action unfolds. If they prove insurmountable, the CPA provides remedies. However, the CPA also provides the judge with much flexibility in addressing these challenges and assessing them at this stage of the proceedings, I am not persuaded that they cannot be satisfactorily met within this form of proceeding.

98 I would therefore allow the appeal, set aside the orders of the Divisional Court and the motion judge and substitute an order certifying the action consistent with these reasons.

99 The parties have given us proposed bills of costs. However given the amounts at stake, I invite the parties to make written submissions as to the costs here and below. These submissions are to be exchanged and filed within six weeks of the release of these reasons and are not to exceed five pages, double spaced. Within a further two weeks, each party may then file a written reply not to exceed three pages, double spaced.

**Catzman J.A.:**

I agree.

APPEAL by plaintiff from judgment reported at *Collette v. Great Pacific Management Co.* (2003), 2003 BCSC 332, 2003 CarswellBC 530 (B.C. S.C.), dismissing plaintiff's application for certification of class proceeding.

#### ***Mackenzie J.A.:***

#### **INTRODUCTION**

1 This is an appeal from a decision of a chambers judge dismissing the appellant's application to certify the action as a class proceeding. The learned chambers judge concluded that the action failed the test for common issues and preferable procedure under s. 4(1)(c) and (d) of the *Class Proceedings Act*, R.S.B.C. 1996, c. 50.

2 The appellant's action is for damages for losses on units of two mortgages he purchased from a representative of the respondent Great Pacific Management Co. Ltd. ("Great Pacific"), a financial advisor and investment broker. The mortgages were syndicated by the third party mortgage broker, Multimetro Mortgage Corporation ("Multimetro"), and marketed by the respondents to their clients for commissions.

3 The action alleges breach of duty in the provision of professional services, framed in both contract and tort. The appellant claims that the respondents breached due diligence obligations with respect to the mortgage investments before offering the units for sale to the appellant and other clients. The mortgages both went into default and the unit investors are likely to realize little or nothing from the net proceeds of the foreclosures.

4 The appellant seeks to represent between 1,000 and 1,600 other investors who invested in mortgage units either through Great Pacific or the other two respondents, Sector Financial Services Ltd. and Sector Securities Inc. (collectively "Sector"). Eight hundred to 1,200 of the investors made investments of \$10,000 or less and over 95 percent of the total number invested \$50,000 or less.

5 The appellant contends that because of the relatively small individual investments, individual actions are not economically viable and class proceedings are the only avenue realistically available for relief.

6 The certification application was argued on the basis of facts alleged in the statement of claim and affidavit evidence submitted by the parties. Those allegations and the filed materials have not been tested and therefore the facts as outlined below are to be taken with the caveat that they are set out only for the limited purpose of addressing issues of certification.

## **THE FACTUAL CONTEXT**

7 Multimetro arranged mortgage financing for two commercial developments in Nanaimo and Parksville (respectively the Nanaimo project and the Parksville project), acting as a mortgage broker. The developers proposed to purchase and redevelop a hotel in Nanaimo. The Parksville project involved the purchase of waterfront property and the development of 161 luxury resort condominiums.

8 The Nanaimo mortgage was for first mortgage construction financing to a maximum of \$15 million. Interest was calculated at 18 percent per annum, with eight percent to be paid quarterly and the balance of ten percent per annum to be paid at the time of payment out of the mortgage. The term of the mortgage was 24 months. Multimetro's commitment funded only \$10.24 million to the developers for the costs of land purchase and construction. The balance went for mortgage arrangement costs of \$3.6 million and an interest reserve fund of \$1.4 million.

9 The Parksville mortgage arrangements were similar. The loan of \$12 million was secured by first mortgage, but only \$8.6 million was advanced to the borrower. Mortgage arrangement costs of \$2.4 million and an interest reserve of \$1 million were deducted. The interest rate was 16 percent, eight percent to be paid quarterly and the balance of eight percent upon payment of the mortgage principal at the end of the 24 month mortgage term.

10 Multimetro syndicated the mortgages into units but it did not make sales to investors directly. Investment firms were engaged to sell its products to investors for a commission. Great Pacific and Sector were the selling firms involved. They were compensated through 8 to 10 percent commissions on sales.

11 The mortgage units were specialty investments, so classified because they were not securities traded on an exchange or otherwise generally available for purchase or resale in a publicly traded market. Before agreeing to sell any specialty investment products, Great Pacific carried out a "due diligence" review through its specialty investment department. Allegedly, only specialty investment products that met strict standards of review were passed by the specialty investment department and allowed to be offered for sale by Great Pacific investment advisors to clients. Sector is alleged to have had a similar, less formal process of due diligence review.

12 Multimetro raised a total of \$15 million for the Nanaimo project through the sale of units by financial planners. Of that total, Great Pacific sold units totalling \$5.508 million to between 458 and 654 different investor clients. Sector sold units totalling \$2.431 million to 205 investor clients.

13 Six hundred and twenty-one clients of Great Pacific purchased units in the Parksville project having a total of \$5.089 million. Ninety-six Sector clients invested a total of \$821,000.

14 The appellant purchased \$22,000 worth of units in the Nanaimo project in September 1996 from Great Pacific. In February 1997 he purchased a further \$10,800 worth of units in the Parksville project.

15 Other than payments made from the interest reserve held back by Multimetro, the borrower never made any payments of principal or interest on the Nanaimo mortgage. Eventually Multimetro commenced foreclosure proceedings. There is expected to be no realization for the appellant and the other investors after deduction of various expenses in connection with the foreclosure. Similarly, no mortgage payments were made on the Parksville mortgage, apart from those made from the interest reserve. The Parksville mortgage has also been foreclosed and the property sold. Again, there is expected to be no realization for the investors who invested a total of \$12 million.

## **THE REASONS OF THE CHAMBERS JUDGE**

16 The certification application was heard before the chambers judge on two occasions. The first argument was limited to issues of negligent misrepresentation at the invitation of counsel, although the pleadings were framed more broadly to include claims in contract and negligence. On appeal from that decision, this Court remitted the matter back to the chambers judge to address the contractual issues. The chambers judge granted the appellant leave to amend the statement of claim to redefine the contractual relationship alleged and then addressed the issues based on the amended statement of claim. He refused certification for reasons that he summarized succinctly as follows:

... Although it is possible to identify potential common issues in the pleadings as set out, it becomes apparent on analysis that those issues do not necessarily apply to all members of the putative class. Instead, further individualized inquiries into the specific contractual arrangements between the defendants and their clients would be needed to determine whether the alleged implied contractual terms exist. Absent such an inquiry, any determination of the proposed common issues would take place in a vacuum. While the need to demonstrate individual reliance, so problematic on the first application, is avoided by the presentation of the claim in contract, the need to prove the necessary contractual terms capable of giving rise to the duties as now alleged presents similar practical hurdles to certification.

17 The chambers judge found that the appellant met certain of the requirements for certification under s. 4(1) of the *Act*. He concluded that the pleadings disclosed a cause of action, that there was an identifiable class of two or more persons, and that the appellant was an appropriate representative plaintiff. He observed that if the action was certified it would be necessary to create a sub-class of Sector investors with another suitable representative plaintiff. These conclusions are not questioned on this appeal. The contentious issues are common issues and preferable procedure.

## **THEORY OF THE APPELLANT'S CASE**

18 The theory of the appellant's case is summarized in his factum as follows:

47. The case being put forth on behalf of the Plaintiff can be easily and succinctly summarized, as follows:

(a) The Defendants held themselves out to the general public as firms which provided professional investment services. In that capacity the Defendants owed a concurrent duty in tort (a duty of care) and in contract (as an implied term arising from the contract to provide services) to exercise reasonable care, skill and diligence when they rendered their services to their clients.

(b) Individuals or companies often made available to the Defendant firms "investment products" such as limited partnership units or units of a syndicated real estate mortgage, which were not generally available to the public through a stock exchange, seeking the assistance of the Defendant firms to market these products to the clients of the Defendant firms.

(c) In order to fulfill the duty of care owed by the Defendants to their clients, the Defendants had a duty to "screen out" investment products which had little or no investment merit, and accordingly, not make those investment products available to their clients.

(d) The Defendants breached their contract with their clients, and breached the duty of care owed to their clients, when they made available to their clients the Multimetro units.

(d) In respect of the breach of contract, the loss suffered by the Plaintiff, and by each of the prospective class members, arose naturally, that is, according to the usual course of things, such that the loss is recoverable in contract.

(f) With respect to the claim in negligence, but for the negligence of the Defendants, the Plaintiff and the other class members would not have purchased the Multimetro units, such that the Defendants are responsible for the loss suffered by the Plaintiff and the other potential class members.

48. The Plaintiff advances a further, or alternative claim, based upon negligent misrepresentation. The Plaintiff alleges that the Defendants, by making available to their clients the Multimetro units, impliedly represented to their clients that the Multimetro units had significant investment merit when such was not the case. The Plaintiff and the other proposed class members suffered damages as a result of the negligent misrepresentation.

19 The appellant's theory emphasizes a two stage process by Great Pacific and Sector in the sale of the mortgage units. The first stage involved a due diligence review of the mortgage units by the Great Pacific specialty investment department and equivalent review by Sector. The second stage involved offering the units to individual investors by particular financial advisors of the respondent firms.

20 The appellant contends that the due diligence responsibility of the specialty investment departments at stage one is a common duty to all clients and that the respondents breached that duty in passing the units for sale. That obligation is an implied term of the contractual relationship and is otherwise an obligation assumed in this context by a professional advisory firm dealing with specialty products which are not exchange traded or otherwise readily marketable.

21 The appellant concedes that the second stage duty of individual advisers to clients, often referred to as a "know your client" responsibility, is an individualized obligation that does not raise common issues. It involves an individualized process where the particular circumstances of investors and their individual "risk tolerance" are considered.

22 The appellant says that the alleged breach of duty at stage one satisfies the "but for" test of causation for all the investors because if the units had failed the due diligence review they would not have been offered for sale by either firm to any of their clients. The units were not generally available which distinguishes them from exchange traded or other securities readily available in an open market. They were specialty investments available only from firms who assumed a responsibility to carry out a due diligence assessment of the investment and offer the units to clients if they met the due diligence criteria.

23 The "strict standard" of objectively reasonable due diligence review allegedly assumed by Great Pacific and Sector will likely depend on expert and other evidence as to the standard appropriate in the circumstances, including the foreseeability that the units would be offered to a substantial number of clients. Individual financial advisers allegedly were exhorted by Great Pacific to "KEEP ON SELLING" the units to clients.

24 The appellant's case for certification is aimed exclusively at the stage one breach of duty. The "know your client" obligations related to the relationships between investment representatives or salesmen and particular clients are not relevant to the due diligence obligation. The appellant will not rely on any allegations of individualized fault by particular advisors at the second "know your client" stage. By restricting the action in this way, the appellant may be limiting grounds for liability that would be available to individual clients in separate actions. As the cost of separate actions for relatively small individual claims is prohibitive, the concession is justified as necessary to frame a viable class proceeding.

## **ANALYSIS**

25 In *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158, 205 D.L.R. (4th) 19, 13 C.P.C. (5th) 1 (S.C.C.) at para. 15, Chief Justice McLachlin, in a unanimous judgment, recognized that class proceedings offer important procedural advantages. They serve judicial economy by avoiding unnecessary duplication of fact-finding and legal analysis. They improve access to justice by combining claims that would not be economical to pursue individually. They serve efficiency and justice by ensuring that wrongdoers face the full consequences of harm caused and modify their behaviour accordingly. These advantages are reasons to apply class proceedings legislation flexibly and expansively.

26 All three advantages of class proceedings are evident in this case. There are between 1,000 and 1,600 claims that raise similar issues of fact and law. The cost of litigating those claims individually is prohibitive. That cost will effectively deter individual claims and insulate the respondents from responsibility for harm caused by any fault on their part. There will be no effective sanction in damages for breach of due diligence obligations. These are reasons to allow the appellant to frame the proceedings to concentrate on common issues that are amenable to class proceedings disposition. The result is a practical compromise which may limit the prospect of success but it allows common complaints to go forward. In every case, the choice is one for the plaintiff and class counsel to make in the first instance, although no doubt the court retains a residual discretion to assess whether the compromise is a reasonable one in the circumstances. Individual claimants who are unhappy with the compromise may of course opt out of the class proceeding and commence a separate action.

27 With these general observations in mind, I turn now to the issues in this case.

#### **Duty and Standard of Care**

28 The appellant alleges that the defendants assumed a responsibility to carry out a due diligence analysis on potential investments and offer for sale to clients only those investments that passed the standards of due diligence, objectively and reasonably applied. The appellant contends that this obligation was assumed with respect to all clients irrespective of whether or not individual clients were aware that the defendants were carrying out the due diligence analysis and expressly relied on representations to that effect. He will argue that the requirement for a due diligence analysis is inherent in the sale of specialty investments such as these mortgage units which are not widely available in an open market. He relies on the opinion of Lord Goff of Chieveley in *Henderson v. Merrett Syndicates Ltd.*, [1994] 3 W.L.R. 761 at 776, (1994), [1995] 2 A.C. 145 (U.K. H.L.) at 181 [cited to W.L.R.] for the proposition that:

if a person assumes responsibility to another in respect of certain services, there is no reason why he should not be liable in damages for that other in respect of economic loss which flows from the negligent performance of those services.

Lord Goff added:

Furthermore, especially in a context concerned with a liability which may arise under a contract or in a situation "equivalent to contract," it must be expected that an objective test will be applied when asking the question whether, in a particular case, responsibility should be held to have been assumed by the defendant to the plaintiff. see *Caparo Industries Plc. v. Dickman*[,] [1990] 2 A.C. 605, 637, *per* Lord Oliver of Aylmerton.

*Henderson* involved actions by "Names" in Lloyds' syndicates against underwriting agents for negligence in the conduct of their underwriting affairs. The House of Lords upheld the Court of Appeal and dismissed appeals from decisions of a chambers judge on preliminary issues finding a duty of care was owed by the agents to the Names.

29 The appellant finds further support for the *Henderson* propositions, stated in terms of proximity, in the reasons of McLachlin J. (as she then was) in *Canadian National Railway v. Norsk Pacific Steamship Co.*, [1992] 1 S.C.R. 1021 at 1152, 91 D.L.R. (4th) 289 at 369, 11 C.C.L.T. (2d) 1 (S.C.C.).

30 In this case, the appellant contends that the due diligence duty for specialty products was an implied term of the contracts with all the respondents' clients as well as an assumed responsibility in tort. It is not for the Court at this stage to weigh the merits of the appellant's assertion that the respondents assumed a due diligence duty of care to all their clients beyond the question of whether it raises a triable issue. In my view, the appellant has met that test on the duty issue.

31 As evidence of the due diligence standard of care assumed by the respondents, the appellant will rely on a communication by a Great Pacific financial advisor to a client, referred to as the Woodfield memorandum. That memorandum, under the heading of "The Importance of Due Diligence", states that Great Pacific applies "strict standards" of due diligence and adds: "Each project or limited partnership is examined by our board before it can be used with any of our clients." The memorandum then refers to the Nanaimo mortgage units as "an excellent project with outstanding security". The appellant does not contend that

the Woodfield memorandum was generally circulated to clients but he contends that it is evidence that Great Pacific did in fact assume a due diligence duty to all of its clients and can be held liable for breach of that duty to all clients who invested in the mortgage units through Great Pacific. He will submit that Sector assumed a similar duty.

32 Apart from the Woodfield memorandum, there is little evidence of the particulars of the due diligence standards that the respondents applied, or reasonably should have applied, in assessing the investment quality of the mortgage units and whether they should have been approved to be offered for sale by the respondents' financial advisers. The reasonable standard may involve expert evidence and, in any event, it is an issue for trial. If the respondents had a due diligence duty of care to clients then the determination of a standard of care follows necessarily to reach the question of whether there has been a breach of duty. Assuming a duty, standard of care is a triable issue.

### ***Is Individual Reliance Required?***

33 The respondents submit that the investors cannot succeed without proof of reliance on the misrepresentation by each investor individually, particularly with respect to the claims for negligent misrepresentation. The chambers judge concluded that proof of reliance was required for the claims in tort but not in contract.

34 The reason for insistence on reliance is to establish causation. If causation can be established otherwise, then reliance is not required: see *Henderson, supra, per Lord Goff at 776, and Yorkshire Trust Co. v. Empire Acceptance Corp. (Receiver of)* (1986), 24 D.L.R. (4th) 140 at 145-47, 69 B.C.L.R. 357 at 354-55, 22 E.T.R. 96 (B.C. S.C.) *per McLachlin J.* Here if the mortgage units had not passed the due diligence test they would not have been offered for sale by the respondents to any clients. Causation is therefore established between a breach of due diligence duty and the investors' loss, independently of proof of individual reliance. In my view, proof of reliance does not present an obstacle to the appellant's case as framed. The appellant's case adequately links a breach of duty causally to the investors' losses.

### ***Common Issues and Preferred Procedure***

35 The chambers judge ultimately refused to certify the action because "common issues pertaining to the breach of an implied contractual term are dependent upon findings which will have to be made at individual trials." (para. 51) He concluded that the implied term depended upon "the individual factual circumstances of each investment advisor/client relationship" (para. 46). As discussed above, I agree with the chambers judge that the stage two relationship is dependent upon the individual circumstances and does not raise common issues. With respect, however, I do not think that the stage one issues are in the same category. The appellant's case is that no investment advisor could have offered the units to any client unless they passed the due diligence test of the specialty investment department. Any breach of duty at that stage, in allowing the units to be offered for sale by any advisor to any client, is common to all clients of the firm. As discussed above, the appellant does not rely on any allegations of breach of duty by individual investment advisors at stage two, which eliminates the individual issues that caused the chambers judge to refuse certification. I do not think that the appellant has shifted his position from that argued before the chambers judge but the distinction between due diligence and "know your client" obligations may not have been as clearly delineated before him as it was in this Court.

36 In summary I am satisfied that the claims of the class members raise common issues as required by s. 4(1)(c) of the *Act*. With the elimination of any individualized stage two issues from the litigation by the appellant, I am satisfied that "questions of fact or law common to the members of the class predominate over any questions affecting only individual members": s. 4(2)(a). Either way, the resolution of the stage one common issues should substantially determine the fate of the litigation. Individual actions are impractical because of the relatively small amount of the individual claims. Avoidance of duplication of fact-finding and legal analysis favours a class proceeding over individual actions. A class proceeding is therefore preferable for the fair and efficient resolution of the common issues: s. 4(1)(d).

37 The refusal to certify the action by the chambers judge rests on a misapprehension of the appellant's case as framed for certification. The error is therefore not a matter of discretion to which this Court should accord deference. I would therefore allow the appeal and certify the action as a class proceeding.

## **THE COMMON ISSUES TO BE CERTIFIED**

38 The common issues remain to be defined. I would state the common issues as follows:

1. Did the Defendants, or any of them, owe, to the class members with whom they dealt, a duty in contract, tort, or both, to evaluate the Multimetro Mortgages by a standard of due diligence and not to offer units in the mortgages for sale to class members if the investments did not meet the standard of due diligence?
2. If the answer to question 1 is "yes", did the Defendants, or any of them, breach that duty?
3. If the answers to questions 1 and 2 are "yes", did the breach of duty cause damage to the class members?

The common issues as stated are subject to the powers of the case management or trial judge to define sub-classes and revise or add to the common issues as may be appropriate to reflect the exigencies of the litigation in the exercise of the court's jurisdiction under s. 12 of the *Act*.

## **CONCLUSION**

39 For these reasons I would allow the appeal, direct that the action be certified as a class proceeding and define the common issues as set out above.

### ***Braidwood J.A.:***

I AGREE.

### ***Low J.A.:***

I AGREE.

*Appeal allowed.*

## **Headnote**

Professions and occupations --- Auditors — Negligence

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — Auditor should not be liable for L Inc.'s increase in liquidation deficit which followed auditor's provision of negligent services in relation to solicitation of investment — As L Inc.'s losses did not flow from failure to solicit investment, recovery should be denied for increase in L Inc.'s liquidation deficit beginning in fall of 1997 — Auditor should be liable for increase in L Inc.'s liquidation deficit which followed statutory audit — Shareholders were unable to discharge their function of supervising management and safeguarding interests of corporation by reason of auditor's negligence — As consequence, L Inc.'s corporate life was artificially prolonged, resulting in deterioration of its finances — Recovery should be allowed for increase in L Inc.'s liquidation deficit which followed 1997 audit.

Torts --- Negligence — Duty and standard of care — Duty of care

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal

and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — Duty of care was established where proximity and reasonably foreseeability of injury were found — Auditor's undertaking in relation to soliciting investment, and 1997 audit, gave rise to proximate relationships — L Inc. relied on 1997 audit for purpose it was provided — Resulting injury was reasonably foreseeable — Same could not be said in respect of auditor's negligent assistance in soliciting investment — Overly broad characterization of established category of proximity which failed to consider scope of activity in respect of which proximity was previously recognized risked premature imposition of *prima facie* duty of care — This very error impaired reasons of trial judge and Court of Appeal — Auditor should not be liable for L Inc.'s increase in liquidation deficit which followed auditor's provision of negligent services in relation to solicitation of investment — Auditor should be liable for increase in L Inc.'s liquidation deficit which followed statutory audit.

**Torts --- Negligence — Causation — Foreseeability and remoteness**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — L Inc. asserted that increase in its liquidation deficit beginning in fall of 1997 was reasonably foreseeable consequence of auditor's negligence, because false financial picture that ought not to have been certified by auditor was relied upon by L Inc. to artificially extend its solvency — This type of injury, however, was not reasonably foreseeable consequence of auditor's negligent assistance in soliciting investment — L Inc. argued that it detrimentally relied on auditor's services and representations to artificially extend life of corporation — This reliance was not tied to solicitation of investment, but was matter of oversight of management — Auditor never undertook, in preparing comfort letter, to assist L Inc.'s shareholders in overseeing management — Proximity was established between L Inc. and auditor in relation to statutory audit, on basis of previously recognized proximate relationship identified by court — Increase in L Inc.'s liquidation deficit was reasonably foreseeable consequence of auditor's negligent audit, because audit preserved false financial picture upon which L Inc. relied to artificially extend its solvency and delay filing for bankruptcy.

**Contracts --- Performance or breach — Breach — Miscellaneous**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — Auditor should not be liable for L Inc.'s increase in liquidation deficit which followed auditor's provision of negligent services in relation to solicitation of investment — Auditor should be liable for increase in L Inc.'s liquidation deficit which followed statutory audit — Shareholders were unable to discharge their function of supervising management and safeguarding interests of corporation by reason of auditor's negligence — As consequence, L Inc.'s corporate life was artificially prolonged, resulting in deterioration of its finances — Dispute was primarily framed as one in negligence — Trial judge found that claim in contract succeeded for same reasons as claim in negligent performance of service, and that elements of contract claim were incorporated by reference to finding of "negligence" — Same quantum of liability for concurrent claim in breach of contract was to be imposed in case at bar.

**Business associations --- Powers, rights and liabilities — Liability of corporations**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part on other grounds; damages reduced — Defences of illegality and contributory fault both relied on applicability of doctrine of corporate identification — For defences to succeed, auditor had to attribute illegal or wrongful conduct of certain directors and managers to L Inc. itself — Doctrine is only one of judicial necessity, and where its application would not provide protection of any interest in community or would not advantage society by advancing law and order, rationale for its application fades away — Denying liability on basis that individual within corporation has engaged in very action that auditor was enlisted to protect against would render statutory audit meaningless — It would be perverse to deny auditor's liability for negligently failing to detect fraud where harm to corporation was likely to occur and likely to be most serious.

**Torts --- Negligence — Contributory negligence — Proof of contributory negligence — Miscellaneous**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part on other grounds; damages reduced — For auditor to rely on defence of contributory fault, it had to be able to attribute conduct of certain directors and managers to L Inc. itself — Negligence Act requires that plaintiff's fault be factored into apportionment of damages — Corporate identification was prerequisite to plaintiff, L Inc., being at fault — Auditor's claim that s. 3 of Negligence Act required that L Inc. bear its share of fault presupposed corporate identification — Negligence Act only makes contribution by negligent plaintiff mandatory; it does not make attribution of negligence to plaintiff mandatory — Auditor chose not to bring third party claims against guilty parties, D and G, but availability of third party claim against fraudulent director weighed against application of corporate identification doctrine.

**Bankruptcy and insolvency --- Effect of bankruptcy on other proceedings — Proceedings by bankrupt**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — L Inc. asserted that increase in its liquidation deficit beginning in fall of 1997 was reasonably foreseeable consequence of auditor's negligence, because false financial picture that ought not to have been certified by auditor was relied upon by L Inc. to artificially extend its solvency — This type of injury, however, was not reasonably foreseeable consequence of auditor's negligent assistance in soliciting investment — L Inc. argued that it detrimentally relied on auditor's services and representations to artificially extend life of corporation — This reliance was not tied to solicitation of investment, but was matter of oversight of management — Auditor never undertook, in preparing comfort letter, to assist L Inc.'s shareholders in overseeing management — Proximity was established between L Inc. and auditor in relation to statutory audit, on basis of previously recognized proximate relationship identified by court — Increase in L Inc.'s liquidation deficit was reasonably foreseeable consequence of auditor's negligent audit, because audit preserved false financial picture upon which L Inc. relied to artificially extend its solvency and delay filing for bankruptcy.

**Civil practice and procedure --- Actions — Cause of action — Ex turpi causa non oritur actio (denial of right of action for illegality or immorality)**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part on other grounds; damages reduced — Defences of illegality and contributory fault both relied on applicability of doctrine of corporate identification — For defences to succeed, auditor had to attribute illegal or wrongful conduct of certain directors and managers to L Inc. itself — Doctrine is only one of judicial necessity, and where its application would not provide protection of any interest in community or would not advantage society by advancing law and order, rationale for its application fades away — Denying liability on basis that individual within corporation has engaged in very action that auditor was enlisted to protect against would render statutory audit meaningless — It would be perverse to deny auditor's liability for negligently failing to detect fraud where harm to corporation was likely to occur and likely to be most serious.

**Remedies --- Damages — Damages in tort — Other torts — Miscellaneous**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Trial judge found that L Inc. lost \$113,000,000 between time of auditor's negligent failure to end relationship with L Inc. and latter's insolvency — Trial judge reduced that amount by 25 per cent for contingencies, and awarded \$84,750,000 in damages — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — Trial judge and Court of Appeal erred in finding that auditor's negligence in relation to press release and comfort letter resulted in injuries that were reasonably foreseeable — At that time, auditor's services were engaged for purpose of soliciting investment, not management oversight — As L Inc.'s losses did not flow from failure to solicit investment, recovery should be denied for increase in L Inc.'s liquidation deficit beginning in fall of 1997 — Recovery should be allowed for increase in L Inc.'s liquidation deficit which followed 1997

audit — Trial judge assessed L Inc.'s damages following 1997 audit at \$53.9 million — Applying trial judge's 25 per cent contingency reduction resulted in final damages assessment of \$40,425,000.

**Remedies --- Damages --- Damages in contract --- Contract for service or repair**

D and G formed business, L Inc., and manipulated its financial records — L Inc. continued to raise capital and reinvested it in unprofitable enterprises — Auditor's report for 1997 did not disclose fraud — L Inc. filed for insolvency protection and went into receivership — L Inc. brought successful action in tort and contract against auditor — Trial judge found that L Inc. lost \$113,000,000 between time of auditor's negligent failure to end relationship with L Inc. and latter's insolvency — Trial judge reduced that amount by 25 per cent for contingencies, and awarded \$84,750,000 in damages — Court of Appeal dismissed appeal and cross-appeal — Auditor appealed — Appeal allowed in part; damages reduced — Trial judge and Court of Appeal erred in finding that auditor's negligence in relation to press release and comfort letter resulted in injuries that were reasonably foreseeable — At that time, auditor's services were engaged for purpose of soliciting investment, not management oversight — As L Inc.'s losses did not flow from failure to solicit investment, recovery should be denied for increase in L Inc.'s liquidation deficit beginning in fall of 1997 — Recovery should be allowed for increase in L Inc.'s liquidation deficit which followed 1997 audit — Trial judge assessed L Inc.'s damages following 1997 audit at \$53.9 million — Applying trial judge's 25 per cent contingency reduction resulted in final damages assessment of \$40,425,000 — Dispute was primarily framed as one in negligence, but same quantum of liability for concurrent claim in breach of contract was to be imposed.

**Torts --- Negligence --- Contributory negligence --- Proof of contributory negligence --- Duty of care --- Miscellaneous**

**Professions et métiers --- Vérificateurs --- Négligence**

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie; montant des dommages-intérêts réduit — Vérificateur ne devrait pas être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la prestation négligente, par le vérificateur, de services relatifs à la sollicitation de fonds d'investissement — Comme les pertes de L inc. ne découlaient pas d'un défaut de solliciter des investissements, il fallait refuser l'indemnisation pour l'accroissement du déficit de liquidation de L inc. à compter de l'automne 1997 — Vérificateur devrait être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la vérification exigée par la loi — Actionnaires n'ont pas été en mesure de s'acquitter de leur tâche de superviser la gestion et de protéger les intérêts de la société à cause de la négligence du vérificateur — En conséquence, l'existence de L inc. en tant qu'entreprise a été artificiellement prolongée, de sorte que sa situation financière s'est entre-temps détériorée — Il y avait lieu d'accorder une indemnité pour l'augmentation du déficit de liquidation de L inc. qui a suivi le rapport de 1997.

**Délits civils --- Négligence --- Devoir et norme de diligence --- Devoir de diligence**

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie; montant des dommages-intérêts réduit — Il y avait obligation de diligence si la proximité et la prévisibilité raisonnable du préjudice étaient établies — Engagements du vérificateur relativement à la sollicitation d'investissements, et le rapport de 1997, ont donné lieu à des liens de proximité — L inc. s'est fiée au rapport de 1997 aux fins pour lesquelles il a été préparé — Préjudice qui en a résulté était donc raisonnablement prévisible — Toutefois, on ne pouvait dire la même chose pour l'aide entachée de négligence que le vérificateur a fournie en ce qui a trait à la sollicitation d'investissements — Interprétation trop large d'une catégorie établie de liens de proximité qui ne tenait pas compte du champ d'activité à l'égard duquel l'existence d'un lien a déjà été établie risquait de donner lieu à l'imposition prématurée d'une obligation de diligence prima facie — C'était cette erreur même qui viciait les motifs du juge de première instance et de la Cour d'appel — Vérificateur ne devrait pas être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la prestation négligente, par le vérificateur, de services relatifs à la sollicitation de fonds d'investissement — Vérificateur devrait être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la vérification exigée par la loi.

**Délits civils --- Négligence — Lien de causalité — Prévisibilité et faiblesse du lien causal**

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie; montant des dommages-intérêts réduit — L inc. a affirmé que l'augmentation de son déficit de liquidation à partir de l'automne 1997 était une conséquence raisonnablement prévisible de la négligence du vérificateur, parce qu'elle s'était fiée au faux portrait financier que le vérificateur n'aurait pas dû attester pour prolonger artificiellement sa solvabilité — Or, ce type de préjudice ne constituait pas une conséquence raisonnablement prévisible de l'assistance fournie par le vérificateur de manière négligente en vue de solliciter des investissements — L inc. a plaidé qu'elle s'était fiée à son détriment aux déclarations et aux services fournis par le vérificateur pour prolonger artificiellement l'existence de l'entreprise — Cette confiance n'était pas liée à la sollicitation de fonds d'investissement, mais plutôt à la surveillance de la gestion — En préparant la lettre de confort, le vérificateur ne s'est jamais engagé à aider les actionnaires de L inc. à surveiller la gestion — Existence d'un lien de proximité a été établie entre L inc. et le vérificateur quant à la vérification exigée par la loi, compte tenu du rapport de proximité déjà reconnu par la Cour — Augmentation du déficit de liquidation de L inc. était une conséquence prévisible de la vérification négligente du vérificateur, parce que le rapport de vérification a préservé un faux portrait financier sur lequel L inc. s'est appuyée pour prolonger de façon artificielle sa solvabilité et retarder sa mise en faillite.

**Contrats --- Exécution ou défaut d'exécution — Défaut d'exécution — Divers**

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie; montant des dommages-intérêts réduit — Vérificateur ne devrait pas être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la prestation négligente, par le vérificateur, de services relatifs à la sollicitation de fonds d'investissement — Vérificateur devrait être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la vérification exigée par la loi — Actionnaires n'ont pas été en mesure de s'acquitter de leur tâche de superviser la gestion et de protéger les intérêts de la société à cause de la négligence du vérificateur — En conséquence, l'existence de L inc. en tant qu'entreprise a été artificiellement prolongée, de sorte que sa situation financière s'est entre-temps détériorée — On a considéré qu'il s'agissait principalement d'une poursuite fondée sur la négligence — Juge de première instance a conclu que la demande fondée sur le contrat était accueillie pour les mêmes raisons qu'il accueillait la demande fondée sur la prestation négligente d'un service, et que les éléments de la demande fondée sur le contrat étaient incorporés par renvoi à la conclusion relative à la « négligence » — Il fallait imposer dans le présent dossier une responsabilité dans la même mesure pour la demande concurrente fondée sur la violation de contrat.

**Associations d'affaires --- Pouvoirs, droits et responsabilités — Responsabilité des sociétés**

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie pour d'autres motifs; montant des dommages-intérêts réduit — Illégalité invoquée comme moyen de défense et la faute contributoire étaient fondées sur l'applicabilité de la doctrine de l'identification à la société — Pour que le vérificateur puisse invoquer la défense d'illégalité, il devait pouvoir attribuer la conduite illégale ou fautive de certains administrateurs et dirigeants à L inc. elle-même — Doctrine n'en est qu'une de nécessité juridique, et lorsque son application ne protégerait aucun intérêt de la collectivité ou ne favoriserait pas l'ordre public, la règle n'aurait plus de raison d'être — Refuser d'imputer la responsabilité au motif qu'un employé de l'entreprise a commis les actes mêmes contre lesquels le vérificateur a été retenu pour protéger la société reviendrait donc à vider de son sens la vérification exigée par la loi — Il serait illogique de refuser de tenir responsable le vérificateur qui a omis par négligence de détecter une fraude lorsqu'il est probable que le préjudice de la société se produira et qu'il sera vraisemblablement très grave.

Délits civils --- Négligence — Faute contributoire — Preuve de la faute contributoire — Divers

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie pour d'autres motifs; montant des dommages-intérêts réduit — Pour que le vérificateur puisse invoquer la défense d'illégalité, il devait pouvoir attribuer la conduite illégale ou fautive de certains administrateurs et dirigeants à L inc. elle-même — Loi sur le partage de la responsabilité exige qu'il soit tenu compte de la faute du demandeur dans la répartition des dommages-intérêts — Or, l'identification à la société était une condition préalable à l'imputation d'une faute à la demanderesse L inc. — Argument avancé par le vérificateur que l'art. 3 de la Loi sur le partage de la responsabilité exigeait que L inc. supporte sa part de la faute presupposait l'identification à la société — Loi sur le partage de la responsabilité rend seulement obligatoire la contribution du demandeur négligent; elle ne rend pas obligatoire l'attribution d'une négligence au demandeur — Bien que le vérificateur ait décidé de ne pas demander que les parties coupables, D et G, soient mises en cause, la possibilité de mettre en cause un administrateur frauduleux jouait en défaveur de l'application de la doctrine de l'identification à la société.

Faillite et insolvabilité --- Effet de la faillite sur d'autres procédures — Procédures par le failli

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie; montant des dommages-intérêts réduit — L inc. a affirmé que l'augmentation de son déficit de liquidation à partir de l'automne 1997 était une conséquence raisonnablement prévisible de la négligence du vérificateur, parce qu'elle s'était fiée au faux portrait financier que le vérificateur n'aurait pas dû attester pour prolonger artificiellement sa solvabilité — Or, ce type de préjudice ne constituait pas une conséquence raisonnablement prévisible de l'assistance fournie par le vérificateur de manière négligente en vue de solliciter des investissements — L inc. a plaidé qu'elle s'était fiée à son détriment aux déclarations et aux services fournis par le vérificateur pour prolonger artificiellement l'existence de l'entreprise — Cette confiance n'était pas liée à la sollicitation de fonds d'investissement, mais plutôt à la surveillance de la gestion — En préparant la lettre de confort, le vérificateur ne s'est jamais engagé à aider les actionnaires de L inc. à surveiller la gestion — Existence d'un lien de proximité a été établie entre L inc. et le vérificateur quant à la vérification exigée par la loi, compte tenu du rapport de proximité déjà reconnu par la Cour — Augmentation du déficit de liquidation de L inc. était une conséquence prévisible de la vérification négligente du vérificateur, parce que le rapport de vérification a préservé un faux portrait financier sur lequel L inc. s'est appuyée pour prolonger de façon artificielle sa solvabilité et retarder sa mise en faillite.

Procédure civile --- Actions — Cause d'action — Ex tirpi causa non oritur actio (refus du droit d'action pour cause d'illégalité ou d'immoralité)

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie pour d'autres motifs; montant des dommages-intérêts réduit — Illégalité invoquée comme moyen de défense et la faute contributoire étaient fondées sur l'applicabilité de la doctrine de l'identification à la société — Pour que le vérificateur puisse invoquer la défense d'illégalité, il devait pouvoir attribuer la conduite illégale ou fautive de certains administrateurs et dirigeants à L inc. elle-même — Doctrine n'en est qu'une de nécessité juridique, et lorsque son application ne protégerait aucun intérêt de la collectivité ou ne favoriserait pas l'ordre public, la règle n'aurait plus de raison d'être — Refuser d'imputer la responsabilité au motif qu'un employé de l'entreprise a commis les actes mêmes contre lesquels le vérificateur a été retenu pour protéger la société reviendrait donc à vider de son sens la vérification exigée par la loi — Il serait illogique de refuser de tenir responsable le vérificateur qui a omis par négligence de détecter une fraude lorsqu'il est probable que le préjudice de la société se produira et qu'il sera vraisemblablement très grave.

**Réparations --- Dommages-intérêts — Dommages-intérêts fondés sur la responsabilité délictuelle — Autres délits civils — Divers**

D et G ont fondé une société, L inc., et ont manipulé ses dossiers financiers — L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets non rentables — Rapport du vérificateur pour l'exercice de 1997 n'a pas révélé la fraude — L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre — L inc. a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur, avec succès — Juge de première instance a conclu que L inc. avait subi des pertes de 113 000 000 \$ entre le moment où le vérificateur a négligé de mettre un terme à sa relation avec L inc. et l'insolvabilité de cette dernière — Juge de première instance a diminué ce montant de 25 pour cent pour tenir compte des imprévus et a accordé des dommages-intérêts s'élevant à 84 750 000 \$ — Cour d'appel a rejeté l'appel et l'appel incident — Vérificateur a formé un pourvoi — Pourvoi accueilli en partie; montant des dommages-intérêts réduit — Juge de première instance et la Cour d'appel ont eu tort de conclure que la négligence dont le vérificateur avait fait preuve en ce qui concerne le communiqué de presse et la lettre de confort avait causé des préjudices qui étaient raisonnablement prévisibles — À l'époque, les services du vérificateur avaient été retenus afin de solliciter des investissements, non pas afin de faciliter la surveillance de la gestion de l'entreprise — Comme les pertes de L inc. ne découlaient pas d'un défaut de solliciter des investissements, il fallait refuser l'indemnisation pour l'accroissement du déficit de liquidation de L inc. à compter de l'automne 1997 — Il y avait lieu d'accorder une indemnité pour l'augmentation du déficit de liquidation de L inc. qui a suivi le rapport de 1997 — Juge de première instance a évalué les dommages subis par L inc. après le rapport de 1997 à 53 900 000 \$ — Si l'on applique à cette somme la réduction pour éventualités de 25 pour cent ordonnée par le juge de première instance, on obtient la somme finale de 40 425 000 \$ au titre des dommages-intérêts.

Two individuals, D and G, formed a partnership which carried on business through its nominee corporation, L Inc., the plaintiff. The defendant was the auditor for L Inc. until 1998. D and G manipulated L Inc.'s financial records and were later convicted of fraud. The auditor did not uncover the company's schemes. L Inc. continued to raise investment capital and reinvested it in unprofitable theatre enterprises. The auditor's report for L Inc.'s 1997 fiscal year did not disclose the fraud and, although the auditor objected when G presented a misleading quarterly financial statement to the audit committee in 1997, it did not resign. The truth came to light in 1998. New equity investors appointed new management who discovered irregularities. L Inc. filed for insolvency protection, and went into receivership. L Inc., through its special receiver and manager, brought an action in tort and contract against the auditor. The trial judge found that L Inc. lost \$113,000,000 between the time of the auditor's negligent failure to end its relationship with L Inc. and the latter's insolvency. The trial judge reduced that amount by 25 per cent for

contingencies, and awarded \$84,750,000 in damages. The Court of Appeal dismissed the appeal and cross-appeal. The auditor appealed to the Supreme Court of Canada.

**Held:** The appeal was allowed in part, and the damages were reduced.

Per Gascon and Brown JJ. (Karakatsanis and Rowe JJ. concurring): The auditor should not be liable for L Inc.'s increase in liquidation deficit which followed the auditor's provision of negligent services in relation to the solicitation of investment. The auditor should, however, be liable for the increase in L Inc.'s liquidation deficit which followed the statutory audit. Shareholders were unable to discharge their function of supervising management and safeguarding the interests of the corporation by reason of the auditor's negligence. As a consequence, L Inc.'s corporate life was artificially prolonged, resulting in the deterioration of its finances. There was a sufficient evidentiary basis for liability based on impaired shareholder supervision. Application of the *Anns/Cooper* framework [*Anns v. London Borough of Merton* and *Cooper v. Hobart*], coupled with the basis for auditor liability identified by the Supreme Court of Canada in *Hercules Managements Ltd. v. Ernst & Young*, led the Supreme Court of Canada to uphold the trial judge's finding of liability in relation to the negligently prepared auditory statement. The trial judge's core findings, that the auditor's conduct fell below the standard of care on two occasions, either when it failed to discover fraud and act on it in August 1997, or when it signed off on L Inc.'s 1997 financial statements in April 1998, were not disputed. The trial judge's findings of negligence could be divided into two separate events: (1) the auditor's approval of a 1997 press release and provision of a comfort letter; and (2) the auditor's preparation and approval of the 1997 clean audit opinion.

At the first stage of the *Anns/Cooper* framework, a duty of care is established where proximity and reasonably foreseeability of injury are found. The auditor's undertaking in relation to soliciting investment, and the 1997 audit, gave rise to proximate relationships. L Inc. relied on the 1997 audit for the purpose it was provided. A resulting injury was reasonably foreseeable. The same could not be said in respect of the auditor's negligent assistance in soliciting investment. At the second stage of the *Anns/Cooper* framework, residual policy considerations could negate the auditor's duty of care, but none applied to the negligent provision of the 1997 audit. An overly broad characterization of an established category of proximity which fails to consider the scope of activity in respect of which proximity was previously recognized risks a premature imposition of a *prima facie* duty of care. This very error impaired the reasons of the trial judge and the Court of Appeal. The Supreme Court of Canada has not previously established a proximate relationship as between an auditor and its client for the purposes of soliciting investment. A full proximity analysis had to be undertaken. From August to October 1997, the services provided, particularly the auditor's ongoing assistance in relation to the press release and the provision of the comfort letter, were undertaken for the purpose of helping L Inc. to solicit investment. A relationship of proximity arose in respect of the content of the auditor's undertaking. The loss that resulted from L Inc.'s inability to attract investment could fall within the scope of the auditor's duty of care, though only in relation to the press release and comfort letter.

L Inc. asserted that the increase in its liquidation deficit beginning in the fall of 1997 was a reasonably foreseeable consequence of the auditor's negligence, because the false financial picture that ought not to have been certified by the auditor was relied upon by L Inc. to artificially extend its solvency. This type of injury, however, was not a reasonably foreseeable consequence of the auditor's negligent assistance in soliciting investment. L Inc. argued that it detrimentally relied on the auditor's services and representations to artificially extend the life of the corporation. This reliance was not tied to the solicitation of investment, but was a matter of oversight of management. Losses outside the scope of the undertaking were not recoverable. The auditor never undertook, in preparing the comfort letter, to assist L Inc.'s shareholders in overseeing management.

Proximity was established between L Inc. and the auditor in relation to the statutory audit, on the basis of the previously recognized proximate relationship identified by the Supreme Court of Canada. The increase in L Inc.'s liquidation deficit was a reasonably foreseeable consequence of the auditor's negligent audit, because the audit preserved a false financial picture upon which L Inc. relied to artificially extend its solvency and delay filing for bankruptcy. If the auditor had taken reasonable care in auditing L Inc., the latter would have discovered the fraud and avoided the interim deterioration of its assets. This type of injury was a reasonably foreseeable consequence of the auditor's negligent audit. L Inc.'s reliance on the auditor for the purpose of overseeing the conduct of management was both reasonable and reasonably foreseeable. As L Inc.'s injury arose from its detrimental reliance, the injury linked to that reliance was reasonably foreseeable.

Having found a proximate relationship based on a previously recognized category, it was not necessary to consider residual policy considerations. However, as McLachlin C.J.C. (dissenting in part in this judgment) found in the alternative that the policy consideration of indeterminate liability would deny recovery in this case, it was useful to examine how the established proximate relationship engaged in this case precluded indeterminate liability. None of the three pertinent aspects of the character

of indeterminacy: (1) temporal, (2) claimant; and (3) value, arose in the case at bar. The 1997 audit was prepared for the express purpose of oversight of management by L Inc.'s shareholders, and the loss at issue flowed from those shareholder's inability to conduct that oversight. The purposes underlying the 1997 audit did not give rise to potential indeterminacy, and by corollary, related to potential losses that were not indeterminate.

The auditor did not have complete immunity from liability flowing from a remoteness analysis. Remoteness overlaps conceptually with the reasonable foreseeability analysis conducted in the *prima facie* duty of care analysis. However, the two are distinct: the duty analysis is concerned with the type of injury that is reasonably foreseeable as flowing from the defendant's conduct; the remoteness analysis is concerned with the reasonable foreseeability of the actual injury suffered by the plaintiff. The loss in the present case, stemming from the auditor's failure to fulfill its undertaking, was reasonably foreseeable. It followed that remoteness was not a bar to recovery. The record supported the assertion that shareholders would have called management to account had they received a non-negligent audit. L Inc.'s response upon receiving a prudent audit in 1998 was telling, and belied any suggestion that informed shareholder scrutiny would have permitted L Inc. to act in any manner other than expected. Any speculation that shareholders might have done nothing in response to rampant fraud was unsustainable.

Although the auditor did not advise L Inc. on its business decisions, it "assumed responsibility" over providing accurate information upon which the shareholders could rely to scrutinize management conduct. The auditor did not escape liability simply because a negligent audit, in itself, cannot cause financial harm. It is only when audits are detrimentally relied upon that tangible consequences ensue. It should not be understated that to exclude those harms which are a reasonably foreseeable consequence of a negligent audit would undercut a central purpose for which a statutory audit was prepared, thus immunizing auditors from liability for any act of negligence impairing oversight.

Reliance on the so-called "SAAMCO principle" from a House of Lords' decision (*South Australia Asset Management Corp. v. York Montague Ltd.*) was mistaken for the same reason as reliance on the dichotomy between information and advice. In assuming responsibility for informing shareholder scrutiny of management, the auditor assumed responsibility for injuries flowing from that impaired scrutiny. The principle denies liability where an alternate cause that is unrelated to the defendant's negligence is the true source of the plaintiff's injury. L Inc.'s trading losses were not an alternate and unrelated cause of L Inc.'s injury. The shareholders' capacity to oversee the conduct of L Inc.'s business was entirely dependent upon the statutory audit. The SAAMCO principle did not limit the auditor's liability in respect of the 1997 audit. The principle, at least in the manner applied by McLachlin C.J.C. in the case at bar, conflicted with Canadian jurisprudence. Alternate hypothetical causes were already accounted for in the trial judge's 25 per cent reduction in damages. As to whether L Inc. failed to prove that alternate hypothetical causes did not cause the remaining 75 per cent of damages, it was the auditor, not L Inc., who bore the burden of proving that liability should be limited in this fashion.

The defences of illegality and contributory fault both relied on the applicability of the doctrine of corporate identification. The only illegal or wrongful conduct was committed by L Inc.'s directors, D and G, and portions of management. For the illegality defence to succeed, the auditor had to attribute the illegal or wrongful conduct of certain directors and managers to L Inc. itself. The doctrine is only one of judicial necessity, and where its application would not provide protection of any interest in the community or would not advantage society by advancing law and order, the rationale for its application fades away. Denying liability on the basis that an individual within the corporation has engaged in the very action that the auditor was enlisted to protect against would render the statutory audit meaningless. It would be perverse to deny the auditor's liability for negligently failing to detect fraud where the harm to the corporation was likely to occur and likely to be most serious. Courts retain the discretion to refrain from applying the doctrine where it would not be in the public interest to do so. Where, as in the case at bar, its application would render meaningless the very purpose for which a duty of care was recognized, such application will rarely be in the public interest.

For the auditor to rely on the defence of contributory fault, it had to be able to attribute the conduct of certain directors and managers to L Inc. itself. The Negligence Act requires that a plaintiff's fault be factored into the apportionment of damages. Corporate identification was a prerequisite to the plaintiff, L Inc., being at fault. The auditor's claim that s. 3 of the Negligence Act required that L Inc. bear its share of the fault presupposed corporate identification. The Negligence Act only makes contribution by a negligent plaintiff mandatory; it does not make attribution of negligence to a plaintiff mandatory. The auditor chose not to bring third party claims against the guilty parties, D and G, but the availability of a third party claim against a fraudulent director weighed against the application of the corporate identification doctrine.

The trial judge and the Court of Appeal erred in finding that the auditor's negligence in relation to the press release and comfort letter resulted in injuries that were reasonably foreseeable in light of the proximate relationship between the parties. At that time, the auditor's services were engaged for the purpose of soliciting investment, not management oversight. As L Inc.'s losses did not flow from a failure to solicit investment, recovery should be denied for the increase in L Inc.'s liquidation deficit beginning in the fall of 1997. Recovery should be allowed for the increase in L Inc.'s liquidation deficit which followed the 1997 audit. The auditor should not have signed off on the 1997 audit, and the increase in L Inc.'s liquidation deficit which followed fell within the duty of care owed by the auditor to L Inc. in relation to the preparation of a statutory audit, the express purpose of which was to assist L Inc. in management oversight. The trial judge assessed L Inc.'s damages following the 1997 audit at \$53.9 million. Applying the trial judge's 25 per cent contingency reduction to this amount resulted in a final damages assessment of \$40,425,000, and the auditor was liable for this amount. The dispute was primarily framed as one in negligence. The trial judge found that the claim in contract succeeded for the same reasons as the claim in negligent performance of a service, and that the elements of the contract claim were incorporated by reference to the finding of "negligence". As such, the same quantum of liability for the concurrent claim in breach of contract was to be imposed in the case at bar. The amount of the trial award was to be reduced from \$84,750,000 to \$40,425,000.

Per McLachlin C.J.C. (dissenting in part) (Wagner and Côté JJ. concurring): The appeal should be allowed. The auditor owed a duty of care to L Inc., which it breached when it failed to discover and expose L Inc.'s fraud in the audited statements it prepared. But the auditor was not liable for virtually all the loss that befell L Inc. as it pursued its precipitous decline into insolvency through doomed investments. Where an auditor falsely or wrongfully represents that the audit statements are sound and can therefore be used for their intended purpose, this constitutes negligence or wrongdoing. Economic loss tied to that particular wrongdoing is recoverable; other loss is not. The key to answering the question of the scope of the duty of care owed by the auditor to L Inc. was the purpose for which the auditor prepared the statements, which in turn defined the wrongful act — the negligent failure to provide the correct information for the intended purpose. Three purposes were discernable: (1) to report accurately on finances and provide audit opinions on which to rely for attracting investment; (2) to uncover errors or wrongdoing to enable correction or response to misfeasance; and (3) to provide audit reports on which shareholders could rely to supervise management. L Inc. was entitled to recover for losses occasioned by its own or its shareholders' reliance on the auditor's audit work for these purposes.

L Inc. did not rely on the "attract investment capital" purpose; L Inc. attracted a great deal of capital on the strength of the auditor's statements. That was the essence of the complaint — if it had not been able to attract this money, it would not have been able to spend it on new theatre ventures that failed and decreased L Inc.'s net worth. The company's assets were not diminished by an inability to attract investment, but by L Inc.'s improvident management of those investments. The possibility that the wrongful act prevented L Inc. from detecting misfeasance in the company's management, which would have been corrected, was not L Inc.'s situation. L Inc. led no evidence that its management did not know of D and G's misfeasance; it likely could not have done so. D and G, the fraudsters, were themselves the management. D and G knew the audit reports were inaccurate. There was no evidence that anyone at a lower level of L Inc. management would have "blown the whistle" if L Inc.'s statements had revealed the fraud at an earlier date.

The proposition that all loss that shareholder supervision might have avoided was recoverable, including the decline in the value of the company, faced two difficulties. First, the factual basis for liability based on impaired shareholder supervision was lacking. L Inc. did not prove and the trial judge did not find that L Inc.'s shareholders relied on the auditor's negligent audit statements, or that had they received and relied on accurate statements, they would have acted in a way that would have prevented L Inc. from carrying on business and diminishing its assets in the period between the issuance of the relevant statements and L Inc.'s insolvency. The broad view of the duty of care taken by L Inc. and accepted by the trial judge meant that the trial judge failed to consider the parameters of the shareholders' reasonable and foreseeable reliance as required in *Hercules* when defining the scope of the duty of care with respect to losses stemming from impaired shareholder supervision. Crucially, the trial judge did not ask whether the shareholders had in fact relied on the audits — a critical element to the cause of action. He did not ask whether, if they relied, this reliance prevented them from taking steps to replace directors or officers or otherwise alter course. He did not ask whether this would have included shutting down L Inc. earlier than when it was shut down. He did not ask whether these actions would have prevented the losses that L Inc. built up during the period in question. If the trial judge had asked these questions, he would have been obliged to answer them in the negative, since L Inc. offered no proof to support affirmative answers. The second difficulty was a related policy concern: to allow recovery in the absence of the required proof

would be to open the door to indeterminate recovery. L Inc.'s position that the auditor was liable for all loss without proof of the elements required to advance a case based on impaired shareholder supervision would result in an unfair allocation of loss and indeterminacy of damages. To make the auditor the virtual guarantor of everything L Inc. — not the collectivity of shareholders to which the duty was owed — did thereafter would not be a fair allocation of responsibility. Auditors would be unable to reasonably predict, when they were providing services to clients, what their ultimate liability would be.

The losses at issue were not shown to fall within the scope of the auditor's duty of care. The first step of the *Anns* test was not established. It was not necessary to go on to ask whether *prima facie* liability was negated by policy considerations unrelated to the relationship between the parties. Were it necessary to do so, the policy considerations of unfair allocation of loss and indeterminacy would preclude imposing liability on the auditor. It remained for future cases to explore the limits of an auditor's liability for impaired shareholder supervision. L Inc.'s failure to prove that any of the loss it suffered could be attributed to its shareholders' reliance on the negligent 1997 audit report for the purpose of corporate oversight was a sufficient basis on which to allow the appeal in its entirety.

There was a further problematic aspect of the shareholder supervision theory on which L Inc. now sought to rely — one of principle. The purpose of an annual audit report is to inform shareholder decision making, not to govern it. The auditor is not liable for the indeterminate quantum of loss that the shareholders' course of action or inaction may trigger. Loss that cannot be attributed to the auditor's breach will be too remote to recover. The language of lost opportunity was unavailing. The question was the extent to which the loss that in fact resulted may be attributed to the wrongness (i.e., the tortious quality) of the information provided. On the trial judge's findings, the auditor never assumed responsibility for any of the decisions that may be said to have occasioned L Inc.'s loss. A close and proximate connection between wrongful act and the loss claimed must be established. L Inc. could not recover the losses it claimed against the auditor. The tort claim had to be dismissed. The result was the same with respect to L Inc.'s action in contract; in the present case, too, the losses would be too remote. Given the trial judge's determination that the elements of action in contract were identical to the elements of the action in tort, it followed that the trial judge's conclusion that there was a breach in contract was erroneous.

Deux individus, D et G, ont fondé une société qui faisait affaire par l'entremise d'une société prête-nom, L inc., la partie demanderesse. Le défendeur était le vérificateur de L inc. jusqu'en 1998. D et G ont manipulé les dossiers financiers de L inc. et ont plus tard été déclarés coupables de fraude. Le vérificateur n'a jamais découvert les stratagèmes de la société. L inc. a continué à réunir des capitaux d'investissement et à les réinvestir dans des projets de scène non rentables. Le rapport du vérificateur pour l'exercice de 1997 de L inc. n'a pas révélé la fraude, et même si elle a exprimé son opposition lorsque G a présenté des états financiers trimestriels falsifiés au comité de vérification en août 1997, le vérificateur n'a pas démissionné. La vérité a éclaté en 1998. De nouveaux investisseurs ont nommé d'autres dirigeants, qui ont découvert des irrégularités. L inc. a demandé la protection contre l'insolvabilité et a été mise sous séquestre. L inc., par l'entremise de son séquestre et administrateur spécial, a déposé une action en responsabilité délictuelle et en responsabilité contractuelle à l'encontre du vérificateur. Le juge de première instance a conclu que L inc. avait subi des pertes de 113 000 000 \$ entre le moment où le vérificateur a négligé de mettre un terme à sa relation avec L inc. et l'insolvabilité de cette dernière. Le juge de première instance a diminué ce montant de 25 pour cent pour tenir compte des imprévus et a accordé des dommages-intérêts s'élevant à 84 750 000 \$. La Cour d'appel a rejeté l'appel et l'appel incident. Le vérificateur a formé un pourvoi auprès de la Cour suprême du Canada.

**Arrêt:** Le pourvoi a été accueilli en partie et le montant des dommages-intérêts a été réduit.

Gascon, Brown, JJ. (Karakatsanis, Rowe, JJ., souscrivant à leur opinion) : Le vérificateur ne devrait pas être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la prestation négligente, par le vérificateur, de services relatifs à la sollicitation de fonds d'investissement. Cependant, le vérificateur devrait être tenu responsable de l'augmentation du déficit de liquidation de L inc. qui a suivi la vérification exigée par la loi. Les actionnaires de L inc. n'ont pas été en mesure de s'acquitter de leur tâche de superviser la gestion et de protéger les intérêts de la société à cause de la négligence du vérificateur. En conséquence, l'existence de L inc. en tant qu'entreprise a été artificiellement prolongée, de sorte que sa situation financière s'est entre-temps détériorée. Des éléments de preuve suffisants permettaient de conclure à la responsabilité du vérificateur du fait que la surveillance par les actionnaires était compromise. L'application du cadre d'analyse établi dans les arrêts *Anns c. London Borough of Merton* et *Cooper c. Hobart*, conjuguée au fondement de la responsabilité du vérificateur que la Cour suprême du Canada a expressément reconnu dans *Hercules Managements Ltd. c. Ernst & Young*, permettait de confirmer la conclusion de responsabilité tirée par le juge de première instance du fait de la préparation négligente du rapport du vérificateur exigé par la loi. Les conclusions tirées par le juge de première instance, selon qui le vérificateur n'a pas respecté la norme de

diligence requise, et ce, à deux occasions, soit en août 1997, lorsqu'il n'a pas découvert la fraude et n'a pas pris les mesures que cette découverte rendait nécessaires, ou en avril 1998, lorsqu'il a approuvé les états financiers de 1997 de L inc., n'étaient pas contestées. Les conclusions de négligence formulées par le juge de première instance pouvaient être classées en fonction de deux événements distincts : (1) l'approbation par le vérificateur d'un communiqué de presse en 1997 et la fourniture d'une lettre de confort; et (2) la préparation et l'approbation par le vérificateur de l'opinion sans réserve du vérificateur pour l'exercice 1997. À la première étape du cadre d'analyse énoncé dans *Anns et Cooper*, il y a obligation de diligence si la proximité et la prévisibilité raisonnable du préjudice sont établies. Les engagements du vérificateur relativement à la sollicitation d'investissements, et le rapport de 1997, ont donné lieu à des liens de proximité. L inc. s'est fiée au rapport de 1997 aux fins pour lesquelles il a été préparé. Le préjudice qui en a résulté était donc raisonnablement prévisible. Toutefois, on ne pouvait dire la même chose pour l'aide entachée de négligence que le vérificateur a fournie en ce qui a trait à la sollicitation d'investissements. À la deuxième étape du cadre d'analyse des arrêts *Anns et Cooper*, des considérations de politique résiduelles pouvaient écarter l'obligation de diligence du vérificateur, mais aucune ne s'appliquait à la préparation entachée de négligence du rapport de 1997. Une interprétation trop large d'une catégorie établie de liens de proximité qui ne tient pas compte du champ d'activité à l'égard duquel l'existence d'un lien a déjà été établie risque de donner lieu à l'imposition prématurée d'une obligation de diligence prima facie. C'était cette erreur même qui viciait les motifs du juge de première instance et de la Cour d'appel. Il est faux de prétendre que la Cour suprême du Canada a déjà établi l'existence d'un lien de proximité entre un vérificateur et son client à des fins de sollicitation de fonds d'investissement. Il fallait procéder à une analyse exhaustive du lien de proximité. D'août à octobre 1997, les services fournis, notamment une assistance constante concernant le communiqué de presse et la fourniture de la lettre de confort, avaient pour objet d'aider L inc. à solliciter des investissements. Un lien de proximité s'est créé quant au contenu de l'engagement pris par le vérificateur. Les pertes découlant de l'incapacité de L inc. à attirer des investissements pouvaient être visées par l'obligation de diligence du vérificateur, mais seulement relativement au communiqué de presse et à la lettre de confort.

L inc. a affirmé que l'augmentation de son déficit de liquidation à partir de l'automne 1997 était une conséquence raisonnablement prévisible de la négligence du vérificateur, parce qu'elle s'était fiée au faux portrait financier que le vérificateur n'aurait pas dû attester pour prolonger artificiellement sa solvabilité. Or, ce type de préjudice ne constituait pas une conséquence raisonnablement prévisible de l'assistance fournie par le vérificateur de manière négligente en vue de solliciter des investissements. L inc. a plaidé qu'elle s'était fiée à son détriment aux déclarations et aux services fournis par le vérificateur pour prolonger artificiellement l'existence de l'entreprise. Cette confiance n'était pas liée à la sollicitation de fonds d'investissement, mais plutôt à la surveillance de la gestion. Les pertes associées à cet engagement n'étaient pas susceptibles d'indemnisation. En préparant la lettre de confort, le vérificateur ne s'est jamais engagé à aider les actionnaires de L inc. à surveiller la gestion.

L'existence d'un lien de proximité a été établie entre L inc. et le vérificateur quant à la vérification exigée par la loi, compte tenu du rapport de proximité déjà reconnu par la Cour suprême du Canada. L'augmentation du déficit de liquidation de L inc. était une conséquence prévisible de la vérification négligente du vérificateur, parce que le rapport de vérification a préservé un faux portrait financier sur lequel L inc. s'est appuyée pour prolonger de façon artificielle sa solvabilité et retarder sa mise en faillite. Si le vérificateur avait pris des précautions raisonnables en procédant à la vérification des états financiers de L inc., cette dernière aurait découvert la fraude et évité la dévalorisation de son actif entre-temps. Ce type de préjudice était une conséquence raisonnablement prévisible de la vérification négligente faite par le vérificateur. Que L inc. s'en soit remise au vérificateur dans le but de surveiller la conduite de la gestion était aussi raisonnable que raisonnablement prévisible. Puisque le préjudice subi par L inc. découlait de la confiance qu'elle a eue à son détriment, le préjudice lié à cette confiance était lui-même raisonnablement prévisible.

Ayant conclu à l'existence d'un lien de proximité relevant d'une catégorie déjà reconnue, point n'est besoin d'examiner les considérations de politique résiduelles qui écarteraient l'obligation de diligence ou en restreindraient la portée. Néanmoins, comme la Juge en chef McLachlin (dissidente en partie dans le présent jugement) a conclu que la considération de politique de la responsabilité indéterminée empêcherait toute indemnisation en l'espèce, il était utile d'examiner comment le lien de proximité établi en l'espèce rendait impossible la responsabilité indéterminée. Aucun des trois aspects pertinents, soit (1) un temps indéterminé, (2) un demandeur indéterminé et (3) un montant indéterminé, n'était présent en l'espèce. Le rapport de 1997 a été préparé dans le but exprès de permettre aux actionnaires de L inc. de surveiller la gestion, et la perte en question était le résultat de leur incapacité à assurer cette surveillance. Les buts qui sous-tendaient le rapport de 1997 ne donnaient pas

lieu à une éventuelle indétermination, et s'attachaient, corollairement, à des pertes éventuelles qui, elles non plus, n'étaient pas indéterminées.

Le vérificateur ne bénéficiait pas d'une exonération absolue de responsabilité à l'issue d'une analyse fondée sur le caractère éloigné. Le principe de l'éloignement recoupe en théorie l'analyse de la prévisibilité raisonnable considérée dans le cadre de l'analyse de l'obligation de diligence prima facie. Toutefois, les deux analyses sont distinctes : l'analyse relative à l'obligation de diligence s'intéresse au type de préjudice qu'il est raisonnable de prévoir qu'il découlera de la conduite du défendeur, alors que l'analyse relative à l'éloignement s'attache à la prévisibilité raisonnable du préjudice réel subi par le demandeur. La perte en l'espèce, qui découlait du défaut du vérificateur de respecter l'engagement précis qu'il avait pris envers L inc., était raisonnablement prévisible. Il s'ensuit que l'éloignement n'était pas un obstacle à l'indemnisation de L inc. Le dossier permettait d'affirmer que les actionnaires auraient demandé à la direction de rendre des comptes s'ils avaient reçu un rapport non entaché de négligence. La réponse de L inc., lorsqu'elle a reçu un rapport prudemment préparé en 1998, était éloquente et contredisait toute prétention qu'un examen attentif par des actionnaires informés aurait permis à L inc. d'agir autrement que de la manière attendue. Toute hypothèse suivant laquelle les actionnaires de L inc. auraient pu ne rien faire devant une fraude patente était tout simplement insoutenable.

Bien que le vérificateur n'ait pas conseillé L inc. concernant ses décisions d'affaires, il [TRADUCTION] « assumait une responsabilité » de fournir des renseignements exacts auxquels les actionnaires pourraient se fier pour examiner en détail la conduite de la direction. Le vérificateur n'échappait pas à sa responsabilité tout simplement parce qu'une vérification entachée de négligence ne pouvait en soi causer un préjudice financier. Ce n'est que si quelqu'un s'y fie à son détriment qu'il entraîne des conséquences tangibles. Il ne fallait pas sous-estimer qu'exclure ce préjudice, lequel est une conséquence raisonnablement prévisible d'une vérification entachée de négligence, mettrait à mal un objectif principal de la vérification exigée par la loi et, ainsi, dégagerait les vérificateurs de responsabilité pour tout acte négligent compromettant la surveillance de l'entreprise.

Invoquer le principe qu'on peut appeler le « principe SAAMCO » tiré d'un arrêt de la Chambre des lords (*South Australia Asset Management Corp. c. York Montague Ltd.*) était une erreur pour la même raison que d'invoquer la dichotomie entre les renseignements et les conseils était une erreur. Lorsque le vérificateur a assumé la responsabilité d'aider les actionnaires à surveiller la gestion, il a effectivement assumé la responsabilité des préjudices découlant de cette surveillance compromise. Le principe rejette toute responsabilité lorsqu'une cause subsidiaire étrangère à la négligence du défendeur est la source véritable du préjudice subi par le demandeur. Les pertes commerciales de L inc. n'étaient pas une cause subsidiaire et étrangère au préjudice qu'elle a subi. La capacité des actionnaires à surveiller la conduite des affaires de L inc. dépendait entièrement du rapport d'évaluation exigé par la loi. Le principe SAAMCO ne limitait pas la responsabilité du vérificateur pour ce qui est du rapport de 1997. Le principe SAAMCO, du moins de la façon dont la Juge en chef McLachlin l'a appliqué en l'espèce, était contraire à la jurisprudence canadienne. Le juge de première instance a déjà pris en compte ces autres causes hypothétiques en réduisant les dommages de 25 pour cent. En ce qui concerne la question de savoir si L inc. n'a pas réussi à prouver que d'autres causes hypothétiques n'ont pas causé le 75 pour cent des dommages restants, c'était au vérificateur, et non à L inc., qu'il incombat de prouver que la responsabilité devrait être limitée de cette façon.

L'illégalité invoquée comme moyen de défense et la faute contributoire étaient fondées sur l'applicabilité de la doctrine de l'identification à la société. La seule conduite illégale ou fautive a été commise par les administrateurs de L inc., D et G, et par certains de ses dirigeants. Ainsi, pour que le vérificateur puisse invoquer la défense d'illégalité, il doit pouvoir attribuer la « conduite illégale ou fautive » de certains administrateurs et dirigeants à L inc. elle-même. La doctrine n'en est qu'une de nécessité juridique, et lorsque son application ne protégerait aucun intérêt de la collectivité ou ne favoriserait pas l'ordre public, la règle n'aurait plus de raison d'être. Refuser d'imputer la responsabilité à la société au motif qu'un de ses employés a commis les actes mêmes contre lesquels le vérificateur a été retenu pour protéger la société reviendrait donc à vider de son sens la vérification exigée par la loi. Il serait illogique de refuser de tenir responsable le vérificateur qui a omis par négligence de détecter une fraude lorsqu'il est probable que le préjudice de la société se produira et qu'il sera vraisemblablement très grave. Les tribunaux conservent le pouvoir discrétionnaire de s'abstenir d'appliquer la doctrine lorsque, dans les circonstances de l'espèce, il ne serait pas dans l'intérêt public de le faire. Et lorsque, comme en l'espèce, l'application de ce principe viderait de son sens la raison même pour laquelle l'obligation de diligence a été reconnue, il sera rarement dans l'intérêt public de l'appliquer.

Pour que le vérificateur puisse invoquer la défense d'illégalité, il devait pouvoir attribuer la conduite de certains administrateurs et dirigeants à L inc. elle-même. La Loi sur le partage de la responsabilité exige qu'il soit tenu compte de la faute du demandeur dans la répartition des dommages-intérêts. Or, l'identification à la société était une condition préalable à l'imputation d'une faute

à la demanderesse L inc. L'argument avancé par le vérificateur que l'art. 3 de la Loi sur le partage de la responsabilité exigeait que L inc. supporte sa part de la faute présupposait l'identification à la société. La Loi sur le partage de la responsabilité rend seulement obligatoire la contribution du demandeur négligent; elle ne rend pas obligatoire l'attribution d'une négligence au demandeur. Bien que le vérificateur ait décidé de ne pas demander que les parties coupables, D et G, soient mises en cause, la possibilité de mettre en cause un administrateur frauduleux jouait en défaveur de l'application de la doctrine de l'identification à la société.

Le juge de première instance et la Cour d'appel ont eu tort de conclure que la négligence dont le vérificateur avait fait preuve en ce qui concerne le communiqué de presse et la lettre de confort avait causé des préjudices qui étaient raisonnablement prévisibles compte tenu du lien de proximité qu'il y avait entre les parties. À l'époque, les services du vérificateur avaient été retenus afin de solliciter des investissements, non pas afin de faciliter la surveillance de la gestion de l'entreprise. Comme les pertes de L inc. ne découlaient pas d'un défaut de solliciter des investissements, il fallait refuser l'indemnisation pour l'accroissement du déficit de liquidation de L inc. à compter de l'automne 1997. Le vérificateur n'aurait pas dû approuver le rapport de 1997 et l'augmentation consécutive du déficit de liquidation de L inc. relevait de l'obligation de diligence à laquelle le vérificateur était tenu envers L inc. quant à la préparation d'une vérification exigée par la loi, laquelle visait expressément à aider L inc. à surveiller la gestion de l'entreprise. Le juge de première instance a évalué les dommages subis par L inc. après le rapport de 1997 à 53 900 000 \$. Si l'on appliquait à cette somme la réduction pour éventualités de 25 pour cent ordonnée par le juge de première instance, on obtiendrait la somme de 40 425 000 \$ et c'était là la somme dont le vérificateur était responsable. On a d'abord considéré qu'il s'agissait principalement d'une poursuite fondée sur la négligence. Le juge de première instance a conclu que la demande fondée sur le contrat était accueillie pour les mêmes raisons qu'il accueillait la demande fondée sur la prestation négligente d'un service, et que les éléments de la demande fondée sur le contrat étaient incorporés par renvoi à la conclusion relative à la « négligence ». Compte tel, il fallait imposer dans le présent dossier une responsabilité dans la même mesure pour la demande concurrente fondée sur la violation de contrat. La somme de 84 750 000 \$ accordée en première instance a été réduite à 40 425 000 \$.

McLachlin, J.C.C. (dissidente en partie) (Wagner, Côté, JJ., souscrivant à son opinion) : Le pourvoi devrait être accueilli. Le vérificateur avait une obligation de diligence envers L inc., obligation à laquelle il a manqué lorsqu'il n'a pas détecté et dénoncé la fraude commise par L inc. dans les états financiers vérifiés qu'il a préparés. Cependant, le vérificateur n'était pas responsable de pratiquement toutes les pertes qu'a subies L inc. alors qu'elle sombrait rapidement dans l'insolvabilité en raison d'investissements voués à l'échec. Lorsqu'un vérificateur déclare faussement ou à tort que les états financiers vérifiés sont valables et peuvent donc être utilisés pour les fins auxquelles ils sont destinés, cela constitue de la négligence ou un acte fautif. La perte économique liée à cet acte fautif précis est indemnisable; les autres pertes ne le sont pas. Pour répondre à la question de savoir quelle était l'étendue de l'obligation de diligence du vérificateur envers L inc., il fallait savoir à quelles fins le vérificateur a préparé les déclarations, ce qui définirait l'acte fautif, soit l'omission par négligence de fournir les renseignements exacts pour les fins visées. On pouvait discerner trois fins : (1) présenter un état exact de la situation financière et fournir des opinions pouvant être utilisées pour attirer des investissements; (2) découvrir des erreurs ou des actes fautifs afin de permettre de corriger cette faute ou de prendre des mesures à cet égard; et (3) fournir des rapports de vérification qui serviraient à la surveillance de la gestion de l'entreprise par les actionnaires. L inc. avait le droit d'être indemnisée pour les pertes occasionnées par le fait qu'elle-même et ses actionnaires se sont fiés aux rapports de vérification du vérificateur à ces fins.

L inc. n'invoquait pas l'argument fondé sur la possibilité d'attirer des capitaux d'investissement; en fait, elle a attiré beaucoup de capitaux grâce aux déclarations du vérificateur. Il s'agissait là de l'essence de sa plainte — si elle n'avait pas réussi à attirer ces capitaux, elle n'aurait pas pu les dépenser dans de nouveaux spectacles, qui se sont avérés des échecs et qui ont diminué la valeur de L inc. L'actif de l'entreprise n'a pas été diminué par son incapacité à attirer des investissements, mais plutôt par la gestion inconsidérée de ces investissements par L inc. La possibilité que l'acte fautif ait empêché L inc. de déceler dans la gestion de l'entreprise la faute que les dirigeants de L inc. auraient corrigée ne correspondait pas à la situation de L inc. Celle-ci n'a présenté aucune preuve que ses dirigeants n'étaient pas au courant de la faute commise par D et G et, de fait, elle n'aurait probablement pas pu le faire. D et G, les fraudeurs, étaient eux-mêmes les dirigeants. D et G savaient que les rapports du vérificateur étaient inexacts. Rien ne prouvait que quiconque occupant un poste à un échelon inférieur de la direction de L inc. aurait dénoncé la fraude si les déclarations de L inc. l'avaient révélée plus tôt.

La proposition selon laquelle toutes les pertes que la surveillance par les actionnaires aurait pu permettre d'éviter étaient indemnifiables, y compris la diminution de la valeur de l'entreprise, présentait deux difficultés. La première était qu'il n'y avait pas de preuve de la responsabilité fondée sur le fait que la surveillance des actionnaires était compromise. L inc. n'a pas prouvé,

et le juge de première instance n'a pas conclu, que les actionnaires de L inc. s'étaient fiés aux états financiers vérifiés de façon négligente par le vérificateur, ou que s'ils avaient reçu des états financiers exacts et s'y étaient fiés, ils auraient agi d'une façon qui aurait empêché L inc. de poursuivre ses activités et de diminuer ses actifs au cours de la période entre la production des états financiers en cause et l'insolvabilité de L inc. En raison de l'interprétation large de l'obligation de diligence adoptée par L inc. et acceptée par le juge de première instance, ce dernier a omis de tenir compte des paramètres de la confiance raisonnable et prévisible des actionnaires, comme l'exigeait larrêt *Hercules* lorsqu'il a défini l'étendue de l'obligation de diligence en ce qui a trait aux pertes découlant du fait que la surveillance des actionnaires soit compromise. Un point essentiel toutefois, le juge de première instance ne s'est pas demandé si les actionnaires s'étaient effectivement fiés aux états financiers vérifiés — un élément crucial pour la cause d'action. Il ne s'est pas demandé si, dans le cas où les actionnaires s'étaient fiés à ces états financiers, cette confiance les avait empêchés de prendre des mesures pour remplacer les administrateurs ou les dirigeants ou changer les choses autrement. Il ne s'est pas demandé si cela aurait inclus la cessation des activités de L inc. plus tôt. Finalement, il ne s'est pas demandé si ces mesures auraient empêché les pertes que L inc. a accumulées pendant la période en question. Si le juge de première instance avait posé ces questions, il aurait été tenu d'y répondre par la négative, puisque L inc. n'a présenté aucune preuve à l'appui de réponses affirmatives. La deuxième difficulté était une considération de politique générale connexe : permettre l'indemnisation en l'absence de la preuve nécessaire reviendrait à ouvrir la porte à l'indemnisation indéterminée. La position de L inc., selon laquelle le vérificateur était responsable de toutes les pertes sans qu'il soit nécessaire de prouver les éléments requis pour présenter une thèse fondée sur le fait que la surveillance des actionnaires soit compromise, donnerait lieu à une attribution inéquitable de la perte, ainsi qu'à un montant indéterminé de dommages-intérêts. Faire en sorte que le vérificateur soit pratiquement garant de tout ce que ferait par la suite L inc., et non les actionnaires collectivement, ne constituerait pas une attribution équitable de la responsabilité. Les vérificateurs seraient incapables de prévoir raisonnablement quelle serait leur responsabilité ultime lorsqu'ils fournissent des services à des clients.

Il n'a pas été démontré que les pertes en question étaient visées par l'obligation de diligence du vérificateur. La première étape du critère énoncé dans *Anns* n'a pas été franchie. Il n'était pas nécessaire de se demander si des considérations de politique générale non liées à la relation entre les parties annihilaient la responsabilité prima facie. Cependant, s'il était nécessaire de le faire, les considérations de politique générale que sont l'attribution inéquitable de la perte et l'indétermination empêcheraient que le vérificateur soit tenu responsable. La jurisprudence aura à préciser les limites de la responsabilité d'un vérificateur du fait que la surveillance des actionnaires est compromise. Le défaut de L inc. de prouver que toute perte subie pouvait être attribuée au fait que les actionnaires s'étaient fiés au rapport de vérification de fin d'exercice pour 1997 entaché de négligence aux fins de la surveillance de l'entreprise constituait un fondement suffisant pour accueillir le pourvoi dans sa totalité.

Mais la thèse de la surveillance par les actionnaires que L inc. voulait maintenant invoquer comportait un autre aspect qui posait problème. Il s'agissait d'une question de principe. Le rapport annuel du vérificateur vise à éclairer la prise de décisions par les actionnaires, et non à dicter leurs décisions. Le vérificateur ne peut être tenu responsable du montant indéterminé de la perte susceptible de résulter des actes ou de l'inaction des actionnaires. Une perte qui ne peut être attribuée au manquement du vérificateur est trop éloignée pour être indemnisable. La notion de privation d'une occasion n'était pas utile. Il fallait déterminer dans quelle mesure la perte que cela a effectivement entraînée peut être attribuée à l'inexactitude (c.-à-d. le caractère délictuel) des renseignements fournis. Il ressortait des conclusions du juge de première instance que le vérificateur n'a jamais assumé la responsabilité des décisions pouvant être considérées comme ayant causé la perte subie par L inc. Il fallait établir l'existence d'un lien étroit et immédiat entre l'acte fautif et la perte alléguée. L inc. ne pouvait recouvrer du vérificateur les pertes alléguées. L'action en responsabilité délictuelle devait être rejetée. L'action en responsabilité contractuelle de L inc. aboutissait au même résultat; dans ce cas également, les pertes seraient trop éloignées. Vu la décision du juge de première instance suivant laquelle les éléments de l'action en responsabilité contractuelle étaient identiques à ceux de l'action en responsabilité délictuelle, il s'ensuit que le juge a commis une erreur en concluant à l'existence d'une violation du contrat.

## Table of Authorities

### Cases considered by *Gascon, Brown JJ.*:

*Anns v. Merton London Borough Council* (1977), [1978] A.C. 728, [1977] 2 W.L.R. 1024, (sub nom. *Anns v. London Borough of Merton*) [1977] 2 All E.R. 492, 121 S.J. 377, [1977] UKHL 4 (U.K. H.L.) — considered

*Banque Bruxelles Lambert S.A. v. Eagle Star Insurance Co.* (1996), [1997] A.C. 191, (sub nom. *South Australia Asset Management Corp. v. York Montague Ltd.*) [1996] 3 W.L.R. 87, (sub nom. *South Australia Asset Management Corp. v. York Montague Ltd.*) [1996] 3 All E.R. 365, [1996] UKHL 10 (U.K. H.L.) — considered

*Bow Valley Husky (Bermuda) Ltd. v. Saint John Shipbuilding Ltd.* (1997), 1997 CarswellNfld 207, 1997 CarswellNfld 208, 153 D.L.R. (4th) 385, 221 N.R. 1, 158 Nfld. & P.E.I.R. 269, 490 A.P.R. 269, [1997] 3 S.C.R. 1210, 48 C.C.L.I. (2d) 1, 37 B.L.R. (2d) 1, 40 C.C.L.T. (2d) 235, 1999 A.M.C. 108 (S.C.C.) — followed

*British Columbia v. Zastowny* (2008), 2008 SCC 4, 2008 CarswellBC 214, 2008 CarswellBC 215, 53 C.C.L.T. (3d) 161, (sub nom. *X. v. R.D.M.*) 370 N.R. 365, 76 B.C.L.R. (4th) 1, [2008] 4 W.W.R. 381, (sub nom. *Zastowny v. MacDougall*) 290 D.L.R. (4th) 219, (sub nom. *X v. R.D.M.*) 250 B.C.A.C. 3, (sub nom. *X v. R.D.M.*) 416 W.A.C. 3, [2008] 1 S.C.R. 27 (S.C.C.) — followed

*Canadian National Railway v. Norsk Pacific Steamship Co.* (1992), 11 C.C.L.T. (2d) 1, 91 D.L.R. (4th) 289, 137 N.R. 241, (sub nom. *Norsk Pacific Steamship Co. c. Cie des Chemins de Fer nationaux du Canada*) [1991] R.R.A. 370, [1992] 1 S.C.R. 1021, 1992 CarswellNat 168, 53 F.T.R. 79, 1992 CarswellNat 655, 1992 A.M.C. 1910, 228 W.A.C. 70, 11 C.C.L.T. (2d) 14 (S.C.C.) — followed

*Caparo Industries plc v. Dickman* (1990), [1990] 1 All E.R. 568, [1990] 2 W.L.R. 358, [1990] 2 A.C. 605 (U.K. H.L.) — considered

*Childs v. Desormeaux* (2006), 2006 SCC 18, 2006 CarswellOnt 2710, 2006 CarswellOnt 2711, 30 M.V.R. (5th) 1, 266 D.L.R. (4th) 257, 39 C.C.L.T. (3d) 163, 347 N.R. 328, 210 O.A.C. 315, 80 O.R. (3d) 558 (note), [2006] 1 S.C.R. 643, [2006] R.R.A. 245 (S.C.C.) — considered

*Clements (Litigation Guardian of) v. Clements* (2012), 2012 SCC 32, 2012 CarswellBC 1863, 2012 CarswellBC 1864, [2012] 7 W.W.R. 217, 31 B.C.L.R. (5th) 1, 93 C.C.L.T. (3d) 1, 29 M.V.R. (6th) 1, 346 D.L.R. (4th) 577, (sub nom. *Clements v. Clements*) 431 N.R. 198, (sub nom. *Clements v. Clements*) [2012] 2 S.C.R. 181, (sub nom. *Clements v. Clements*) 331 B.C.A.C. 1, (sub nom. *Clements v. Clements*) 565 W.A.C. 1 (S.C.C.) — followed

*Cooper v. Hobart* (2001), 2001 SCC 79, 2001 CarswellBC 2502, 2001 CarswellBC 2503, [2002] 1 W.W.R. 221, 206 D.L.R. (4th) 193, 96 B.C.L.R. (3d) 36, (sub nom. *Cooper v. Registrar of Mortgage Brokers (B.C.)*) 277 N.R. 113, 8 C.C.L.T. (3d) 26, (sub nom. *Cooper v. Registrar of Mortgage Brokers (B.C.)*) 160 B.C.A.C. 268, (sub nom. *Cooper v. Registrar of Mortgage Brokers (B.C.)*) 261 W.A.C. 268, [2001] 3 S.C.R. 537, [2001] B.C.T.C. 215, 2001 CSC 79 (S.C.C.) — followed  
*Edgeworth Construction Ltd. v. N.D. Lea & Associates Ltd.* (1993), [1993] 8 W.W.R. 129, 11 B.L.R. (2d) 101, 12 C.L.R. (2d) 161, (sub nom. *Edgeworth Construction Ltd. v. Lea (N.D.) & Associates Ltd.*) 83 B.C.L.R. (2d) 145, (sub nom. *Edgeworth Construction Ltd. v. Lea (N.D.) & Associates Ltd.*) 157 N.R. 241, (sub nom. *Edgeworth Construction Ltd. v. Lea (N.D.) & Associates Ltd.*) 32 B.C.A.C. 221, (sub nom. *Edgeworth Construction Ltd. v. Lea (N.D.) & Associates Ltd.*) 53 W.A.C. 221, (sub nom. *Edgeworth Construction Ltd. v. Lea (N.D.) & Associates Ltd.*) [1993] 3 S.C.R. 206, 17 C.C.L.T. (2d) 101, (sub nom. *Edgeworth Construction Ltd. v. Lea (N.D.) & Associates Ltd.*) 107 D.L.R. (4th) 169, 1993 CarswellBC 237, 1993 CarswellBC 1264 (S.C.C.) — referred to

*Edwards v. Law Society of Upper Canada* (2001), 2001 SCC 80, 2001 CarswellOnt 3962, 2001 CarswellOnt 3963, 34 Admin. L.R. (3d) 38, 206 D.L.R. (4th) 211, 277 N.R. 145, 8 C.C.L.T. (3d) 153, 13 C.P.C. (5th) 35, (sub nom. *Edwards v. Law Society of Upper Canada (No. 2)*) 56 O.R. (3d) 456 (headnote only), 153 O.A.C. 388, [2001] 3 S.C.R. 562, 2001 CSC 80, 56 O.R. (3d) 456, 56 O.R. (3d) 456 (note), [2001] O.T.C. 325 (S.C.C.) — followed

*Followka v. Royal Oak Ventures Inc.* (2010), 2010 SCC 5, 2010 CarswellNWT 9, 2010 CarswellNWT 10, 71 C.C.L.T. (3d) 1, [2010] 4 W.W.R. 35, (sub nom. *Followka v. Pinkerton's of Canada Ltd.*) 398 N.R. 20, 315 D.L.R. (4th) 577, (sub nom. *Followka v. Pinkerton's of Canada Ltd.*) 474 A.R. 1, (sub nom. *Followka v. Pinkerton's of Canada Ltd.*) 479 W.A.C. 1, (sub nom. *Followka v. Pinkerton's of Canada Ltd.*) [2010] 1 S.C.R. 132, 80 C.C.E.L. (3d) 1 (S.C.C.) — considered

*Glanzer v. Shepard* (1922), 135 N.E. 275, 233 N.Y. 236, 23 A.L.R. 1425 (U.S. N.Y. Ct. App.) — considered

*Gross v. Great-West Life Assurance Co.* (2002), 2002 ABCA 37, 2002 CarswellAlta 209, [2002] 4 W.W.R. 421, 21 B.L.R. (3d) 159, 99 Alta. L.R. (3d) 207, 299 A.R. 142, 266 W.A.C. 142 (Alta. C.A.) — considered

*Haig v. Bamford* (1976), [1977] 1 S.C.R. 466, 72 D.L.R. (3d) 68, 9 N.R. 43, 27 C.P.R. (2d) 149, [1976] 3 W.W.R. 331, 1976 CarswellSask 116, 1976 CarswellSask 112 (S.C.C.) — considered

Pt. XII — referred to

**Words and phrases considered:**

**indeterminate liability**

[Per Gascon and Brown JJ. (Karakatsanis and Rowe JJ. concurring):] Indeterminate liability is liability of a specific *character*, not of a specific *amount*. In particular, indeterminate liability should not be confused with significant liability (*Gross v. Great-West Life Assurance Co.*, 2002 ABCA 37, 299 A.R. 142, at para. 38). . . . liability is truly "indeterminate" if "the accepted sources of law and the accepted methods of working with those sources such as deduction and analogy — are insufficient to

resolve the question" (M. V. Tushnet, "Defending the Indeterminacy Thesis", in B. Bix, ed., *Analyzing Law: New Essays in Legal Theory* (1998), 223, at pp. 224-25).

### **residual policy considerations**

[Per Gascon and Brown JJ. (Karakatsanis and Rowe JJ. concurring):] Where a *prima facie* duty of care is recognized on the basis of proximity and reasonable foreseeability, the analysis advances to stage two of the *Anns/Cooper* framework [*Anns v. London Borough of Merton*, [1977] 2 All E.R. 492; *Cooper v. Hobart*, 2001 SCC 79]. Here, the question is whether there are "residual policy considerations" outside the relationship of the parties that may negate the imposition of a duty of care (*Cooper*, at para. 30; *Edwards* [*Edwards v. Law Society of Upper Canada*, 2001 SCC 80], at para. 10; *Odhayji* [*Odhayji Estate v. Woodhouse*, 2003 SCC 69], at para. 51).

By "residual", we mean that such considerations "are not concerned with the relationship between the parties [already considered at stage one], but with the effect of recognizing a duty of care on other legal obligations, the legal system and society more generally" (*Cooper*, at para. 37; see also *Edwards*, at para. 10).

#### **Termes et locutions cités:**

#### **considérations de politique résiduelles**

Lorsque l'existence d'une obligation de diligence *prima facie* est établie sur le fondement du lien de proximité et de la prévisibilité raisonnable, l'analyse passe au deuxième volet du cadre établi dans les arrêts *Anns* et *Cooper*. Il s'agit alors de déterminer si « des considérations de politique résiduelles » étrangères au lien existant entre les parties sont susceptibles d'écartier l'imposition d'une obligation de diligence (*Cooper*, par. 30; *Edwards*, par. 10; *Odhayji*, par. 51).

[...]

Par « résiduelles », nous voulons dire que ces considérations « ne portent pas sur le lien existant entre les parties [qui a déjà été examiné au premier volet du critère], mais sur l'effet que la reconnaissance d'une obligation de diligence aurait sur les autres obligations légales, sur le système juridique et sur la société en général » (*Cooper*, par. 37; voir aussi *Edwards*, par. 10).

#### **responsabilité indéterminée**

La responsabilité indéterminée est une responsabilité de *nature* particulière et non d'une *importance* particulière. Plus précisément, il ne faut pas confondre responsabilité indéterminée et lourde responsabilité (*Gross c. Great-West Life Assurance Co.*, 2002 ABCA 37, 299 A.R. 142, par. 38). (...) [L]a responsabilité est réellement « indéterminée » si [TRADUCTION] « les sources de droit reconnues et leurs méthodes d'application reconnues, telles la déduction et l'analogie -- ne permettent pas de trancher la question » (M. V. Tushnet, « Defending the Indeterminacy Thesis », dans B. Bix, dir., *Analyzing Law : New Essays in Legal Theory* (1998), 223, 224-225).

APPEAL by auditor from judgment reported at *Livent Inc. (Receiver of) v. Deloitte & Touche* (2016), 2016 ONCA 11, 2016 CarswellOnt 122, 31 C.B.R. (6th) 205, 24 C.C.L.T. (4th) 177, 128 O.R. (3d) 225, 393 D.L.R. (4th) 1, 342 O.A.C. 201, 52 B.L.R. (5th) 225, [2016] O.J. No. 51 (Ont. C.A.), dismissing appeal and cross-appeal from judgment allowing action in tort and contract.

POURVOI formé par un vérificateur à l'encontre d'un jugement publié à *Livent Inc. (Receiver of) v. Deloitte & Touche* (2016), 2016 ONCA 11, 2016 CarswellOnt 122, 31 C.B.R. (6th) 205, 24 C.C.L.T. (4th) 177, 128 O.R. (3d) 225, 393 D.L.R. (4th) 1, 342 O.A.C. 201, 52 B.L.R. (5th) 225, [2016] O.J. No. 51 (Ont. C.A.), ayant rejeté l'appel et l'appel incident interjetés à l'encontre d'une décision accueillant une action en responsabilité délictuelle et contractuelle.

#### **Gascon, Brown JJ. (Karakatsanis, Rowe JJ. concurring):**

#### **I. Introduction**

1 This appeal provides the Court with an opportunity to affirm the analytical framework by which liability may be imposed in cases of negligent misrepresentation or performance of a service by an auditor.

2 There is substantial agreement between us and the Chief Justice. We agree on the general analytical framework governing negligent misrepresentation claims (Chief Justice's reasons, at paras. 146-147). And we agree that Deloitte & Touche (now Deloitte LLP) should not be liable for its corporate client Livent Inc.'s increase in liquidation deficit which followed Deloitte's provision of negligent services in relation to the solicitation of investment.

3 We conclude, however, that Deloitte should be liable for the increase in Livent's liquidation deficit which followed the statutory audit. In *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.), this Court recognized that a statutory audit is prepared to allow shareholders to collectively "supervise management and to take decisions with respect to matters concerning the proper overall administration of the corporatio[n]" which permits "the shareholders, acting as a group, to safeguard the interests of the corporatio[n]" (para. 56 (emphasis deleted)). This describes precisely the function which Livent's shareholders were unable to discharge by reason of Deloitte's negligence. As a consequence, Livent's corporate life was artificially prolonged, resulting in the interim deterioration of its finances. There was a sufficient evidentiary basis for liability based on impaired shareholder supervision. Application of the *Anns/Cooper* framework, coupled with the basis for auditor liability specifically identified by this Court in *Hercules*, would lead us to uphold the trial judge's finding of liability in relation to the negligently prepared statutory audit.

4 As a result, we would allow the appeal from the decision of the Ontario Court of Appeal, 2016 ONCA 11, 128 O.R. (3d) 225 (Ont. C.A.), but only in part.

## **II. Facts and Judicial History**

5 We generally agree with the facts and judicial history set out by the Chief Justice in her reasons. In particular, she correctly identifies the trial judge's core finding that Deloitte's conduct fell below the standard of care on two occasions: "... either when it failed to discover the fraud and act on that discovery in August 1997, or when it signed off on Livent's 1997 financial statements in April 1998" (Chief Justice's reasons, at para. 127; trial reasons, 2014 ONSC 2176, 10 C.C.L.T. (4th) 182 (Ont. S.C.J. [Commercial List]), at paras. 241-42). We, like the Chief Justice, do not dispute these core findings. Some further elaboration upon them is, however, helpful.

6 The trial judge's findings of negligence can be divided into two separate events: (1) Deloitte's approval of a 1997 press release ("Press Release") and provision of a comfort letter ("Comfort Letter"); and (2) Deloitte's preparation and approval of the 1997 clean audit opinion ("1997 Audit"). We would not label all of these documents "audit statements". Indeed, collapsing the distinctions between these documents obfuscates a proper duty of care analysis.

7 Livent asserts that it detrimentally relied on Deloitte in each of these events, which impaired its ability to oversee its operations. Specifically, Livent says that, had Deloitte been prudent in relation to these representations, Livent's life would not have been artificially extended and that, in turn, it would have suffered less corporate loss (calculated as the increase in the deficit between its liabilities and assets at the time of its liquidation): trial reasons, at paras. 23-25, citing Livent's amended statement of claim, at paras. 210 and 212. A detailed recounting of the events pertaining to these two representations is, therefore, critical to the negligence analysis in this case.

### **A. Primary Negligence Finding: The Press Release and Comfort Letter (August to October 1997)**

8 Chronologically, the first representations found by the trial judge to be negligence causing compensable harm were the Press Release and Comfort Letter.

9 The Comfort Letter pertains to an agreement whereby Dundee Realty Corp. sought to purchase the air rights above Livent's Pantages Theatre and adjacent lands ("Air Rights Agreement"). Deloitte audited the accounting and reporting relating to that purchase, and identified irregularities in the accounting for the reporting of profit. Ultimately, Livent and Deloitte

disagreed about the irregularities, which left Deloitte with a choice between resigning (and reporting those irregularities to regulatory authorities and the next auditor), and remaining (thereby effectively capitulating to Livent's views on how the irregularities should be reported). Deloitte, negligently, chose the latter route. It did not resign or inform anyone of the accounting irregularities. Instead, it helped prepare, and approved, the Press Release of September 2, 1997, which misrepresented the basis for the reporting of profit arising from the Air Rights Agreement.

10 Further, that Press Release was issued "on the eve of a public offering for which [Deloitte] was going to have to provide a comfort letter" (trial reasons, at para. 193). As a result, Deloitte — again, negligently — provided the Comfort Letter on October 10, 1997, in support of the U.S. \$125 million debenture underwriting. The purpose underlying the Press Release and the Comfort Letter is critical. It was not to inform *Livent* of its own financial position, but rather, to inform *investors* of Livent's financial position, furnishing "comfort" in respect of their investment (despite one of Deloitte's senior partners' express acknowledgment that Deloitte was in no position "to provide *any comfort* to any regulators, underwriters or audit committee members as to the interim financial statement's conformity with GAAP") (trial reasons, at para. 178 (emphasis added; emphasis in original deleted)). Casting "professional skepticism, if not GAAS, aside" (para. 209), Deloitte approved the Press Release and Comfort Letter — all, seemingly, to maintain its profitable relationship with Livent.

11 Given the foregoing, the trial judge assessed Livent's injury as of a "measurement date" of August 31, 1997, i.e., the date on which Deloitte would, acting reasonably, have resigned. The trial judge also reduced Livent's damages by 25 percent, however, for "contingencies" said to represent the amount Livent would have lost, even without Deloitte's negligence.

12 Deloitte appeals the trial judge's award of damages, which amounts to the measure of damages (75 percent of damages overall) that he estimated to have arisen after the date on which Deloitte should have resigned.

#### ***B. Alternative Negligence Finding: The 1997 Audit (April 1998)***

13 In the alternative, the trial judge held that, if Deloitte reasonably refrained from resigning in August or September of 1997, it was negligent in preparing the 1997 Audit which was finalized in April 1998. That audit, which lacked "independent thought", essentially tracked the statutory audit for 1996 ("1996 Audit"), despite (1) Livent now presenting inordinate risk given its "more than ... modest history of aggressive, if not questionable, accounting practices" (trial reasons, at para. 211); and (2) Deloitte discovering, before the audit was completed, that Livent had intentionally deceived it as to the nature of its contractual dealings underlying the Air Rights Agreement. Somehow, this latter discovery of deliberate deception — after which "all hell broke loose" (para. 213) — was not enough to persuade Deloitte to terminate its engagement with Livent, despite all of its testifying senior partners acknowledging that "their collective professional skepticism would have been at the highest level" at this time (para. 214), and despite Livent's after-the-fact explanation for this deception "ma[king] no sense, whatsoever" (para. 234(5)). Deloitte's willingness to succumb to Livent's transparently fraudulent demands left the trial judge "breathless" (para. 238) and was "beyond [his] comprehension" (para. 239).

14 Given the foregoing, the trial judge also assessed Livent's injury as of an "alternative" measurement date of March 31, 1998, i.e., the date on which Deloitte would, acting reasonably, have provided a prudent audit opinion (trial reasons, at para. 306, fn. 188, and para. 369, fn. 228).

15 We reiterate that the *purpose* of the representation is critical. Unlike the Press Release and Comfort Letter (which were intended to inform *investors* of Livent's financial position), the 1997 Audit was intended to inform *Livent* of its own financial position for various purposes, including, most importantly, shareholder oversight of management.

### **III. Analysis**

#### ***A. Duty of Care***

16 Traditionally, the test from *Anns v. Merton London Borough Council*, [1977] 2 All E.R. 492 (U.K. H.L.), governed the duty analysis in decisions of this Court addressing claims for pure economic loss (*Hercules Management Ltd.; Bow Valley Husky (Bermuda) Ltd. v. Saint John Shipbuilding Ltd.*, [1997] 3 S.C.R. 1210 (S.C.C.); *Canadian National Railway v. Norsk Pacific*

*Steamship Co.*, [1992] 1 S.C.R. 1021 (S.C.C.). Significantly, however, the *Anns* test for establishing tort liability in Canada has since been refined. In *Cooper v. Hobart*, 2001 SCC 79, [2001] 3 S.C.R. 537 (S.C.C.), this Court provided greater certainty to the law of tort by clarifying the factors which may be considered at each stage of the *Anns* test. While the resulting *Anns/Cooper* framework has yet to be applied by this Court in a case of auditor's negligence, we adopt this statement of La Forest J. for the Court in *Hercules*: "... to create a 'pocket' of negligent misrepresentation cases ... in which the existence of a duty of care is determined differently from other negligence cases would, in my view, be incorrect" (para. 21).

17 We turn, therefore, to consider the test for establishing tort liability, beginning with this Court's decision in *Hercules*, and the proper application of the general *Anns/Cooper* framework to cases of auditors' liability.

#### (I) *Hercules*: The *Anns* Test

18 In *Hercules*, this Court recognized a duty owed by an auditor in preparing a statutory audit of its corporate client. While the Court dismissed the plaintiff shareholders' claim for lost personal investments, it consistently maintained that a claim by the corporation itself for its own losses resulting from a negligent statutory audit could have succeeded (paras. 58-59; see also paras. 1 and 60-64):

All the participants in this appeal ... raised the issue of whether the appellants' claims in respect of the losses they suffered in their existing shareholdings through their alleged inability to oversee management of the corporations ought to have been brought as a derivative action ....

... if an action is to be brought in respect of such losses, it must be brought either by the corporation itself (through management) or by way of a derivative action.

19 The duty analysis in *Hercules* entailed applying the then-current test for recognizing a duty of care in Canadian negligence law: the *Anns* test. Comprising two stages, the *Anns* test asked (1) whether a *prima facie* duty of care exists between the parties; and (2) if so, whether there are any residual policy considerations which should negate or limit the scope of the duty, the class of persons to whom it is owed or the damages to which a breach of it may give rise (*Hercules*, at para. 20; *Nielsen v. Kamloops (City)*, [1984] 2 S.C.R. 2 (S.C.C.), at pp. 10-11; *Norsk*, at p. 1155; *Bow Valley*, at para. 47).

20 Under the *Anns* test, a *prima facie* duty of care is recognized where a "sufficiently close relationship between the plaintiff and the defendant" exists such that "in the reasonable contemplation of the [defendant], carelessness on its part may cause damage to the [plaintiff]" (*Hercules*, at para. 22; *Kamloops (City)*, at p. 10). In other words, where injury to the plaintiff is a reasonably foreseeable consequence of the defendant's negligence, a duty of care would, *prima facie*, arise. This relationship, where present, was labelled one of "proximity" (*ibid.*). In *Hercules*, the Court provided greater particularity to the test of reasonable foreseeability which established proximity under the *Anns* test in the context of claims for pure economic loss arising from negligent misrepresentation or performance of a service. Specifically, it stated that proximity would inhere in a relationship where two criteria are met: (1) that the defendant should reasonably foresee that the plaintiff will rely on his or her representation; and (2) that the plaintiff's reliance would, in the circumstances of the case, be reasonable. The Court explained that considering the plaintiff's *reliance* within the test for the reasonable foreseeability of injury did not "abandon the basic tenets underlying the [*Anns*] formula" (para. 25). Rather, as the plaintiff's injury in cases of pure economic loss arising from negligent misrepresentation or performance of a service stems from his or her detrimental reliance, the reasonableness of that reliance informs the determination of whether his or her injury is reasonably foreseeable (paras. 25-26). Where, therefore, the *Anns* test was applied to cases of negligent misrepresentation, reasonable foreseeability of injury alone, as arising from reasonable reliance, was sufficient to establish a proximate relationship supporting a *prima facie* duty of care (*Hercules*, at paras. 25 and 27; *Norsk*, at p. 1154; *Bow Valley (Bermuda) Ltd.*, at para. 61).

21 The *Anns* test thereby set a low threshold at the first stage, imposing duties in relation to a nearly limitless class of persons who might rely on representations for nearly limitless purposes. Indeed, as this Court stated in *Hercules*, "[i]n modern commercial society, the fact that audit reports will be relied on by many different people (e.g., shareholders, creditors, potential takeover bidders, investors, etc.) for a wide variety of purposes will almost always be reasonably foreseeable to auditors

themselves" (para. 32). For that reason — that is, because of the low "foreseeability" threshold for establishing a *prima facie* duty of care at the first stage of the *Anns* test — the Court looked to the second stage of the *Anns* test to negate or narrow the duty on the basis of the "policy consideration" of indeterminacy. It was here that the Court looked to the identity of the plaintiffs and the purpose of the audit opinion to deny liability for investment and devaluation losses of individual shareholders (paras. 27-28; see also *Haig v. Bamford* (1976), [1977] 1 S.C.R. 466 (S.C.C.)). Specifically, the Court found that one of the purposes of a statutory audit — that is, to "allo[w] shareholders, as a group, to supervise management and to take decisions with respect to matters concerning the proper overall administration of the corporatio[n]" (para. 56 (emphasis in original)) — would have permitted the corporate client to recover its own losses at the time of receivership had the claim been brought in the corporation's name. As we will explain, Livent's injury following the 1997 Audit is precisely the type of injury described in *Hercules* as being compensable.

## (2) *Cooper*: Refining the *Anns* Test

22 While this Court's holding in *Hercules* remains binding authority governing an auditor's duty of care in relation to a statutory audit, the framework by which that duty is imposed has since been refined. In the companion cases of *Cooper* and *Edwards v. Law Society of Upper Canada*, 2001 SCC 80, [2001] 3 S.C.R. 562 (S.C.C.), this Court revised the *Anns* test by distinguishing more clearly between foreseeability and proximity, and by placing greater emphasis on a more demanding first stage of the two-stage analysis (*Cooper*, at para. 30). While, therefore, we rely on *Hercules* for the general proposition that an auditor may owe its client a duty of care in relation to a particular undertaking, it is the *Anns/Cooper* framework to which we must have reference in identifying a principled basis for imposing liability. And, properly applied, that framework will rarely, if ever, give rise to a *prima facie* duty of care that could result in indeterminate liability. Accordingly, and with great respect for contrary views, there is no reason to resort to the second stage in order to negate all liability in this case.

### (a) Stage One: Prima Facie Duty of Care

23 In *Cooper*, this Court recognized that "foreseeability alone" is not enough to establish a *prima facie* duty of care (para. 22; see also *Edwards*, at para. 9). In doing so, it signalled a shift from the *Anns* test, which had grounded the recognition of a *prima facie* duty upon mere foreseeability of injury (*Hercules*, at paras. 25 and 27; *Norsk*, at p. 1154; *Bow Valley*, at para. 61). After *Cooper*, the first stage of the *Anns/Cooper* framework would require "something more" (*Cooper*, at para. 29). That "something more" is *proximity* (*Odhavji Estate v. Woodhouse*, 2003 SCC 69, [2003] 3 S.C.R. 263 (S.C.C.), at paras. 47-48; *Childs v. Desormeaux*, 2006 SCC 18, [2006] 1 S.C.R. 643 (S.C.C.), at para. 12; *Hill v. Hamilton-Wentworth (Regional Municipality) Police Services Board*, 2007 SCC 41, [2007] 3 S.C.R. 129 (S.C.C.), at para. 23; and *Followka v. Royal Oak Ventures Inc.*, 2010 SCC 5, [2010] 1 S.C.R. 132 (S.C.C.), at para. 18).

24 In *Cooper*, the Court did not indicate whether proximity or reasonable foreseeability should be assessed first. In cases of negligent misrepresentation or performance of a service, however, proximity will be more usefully considered before foreseeability. What the defendant reasonably foresees as flowing from his or her negligence depends upon the characteristics of his or her relationship with the plaintiff, and specifically, in such cases, the purpose of the defendant's undertaking. That said, both proximity and foreseeability of injury merit further reflection.

#### (i) Proximity

25 Assessing proximity in the *prima facie* duty of care analysis entails asking whether the parties are in such a "close and direct" relationship that it would be "just and fair having regard to that relationship to impose a duty of care in law" (*Cooper*, at paras. 32 and 34).

26 Under the *Anns* test, proximity did not, "in and of itself, provide a principled basis on which to make a legal determination" (*Hercules*, at para. 23). Rather, proximity was a "label" which expressed nothing more than a "result, judgment or conclusion" (*ibid.*), where mere reasonable foreseeability of injury could be shown. While, under the *Anns/Cooper* framework, the proximity analysis has become more analytically robust, this descriptive component remains. By this, we mean that the term "proximity" is still used, in part, as a shorthand description of those categories of relationships in which proximity has already

been found to exist (*Cooper*, at para. 23). If a relationship falls within a previously established category, or is analogous to one, then the requisite close and direct relationship is shown. So long, then, as a risk of reasonably foreseeable injury can also be shown — or has already been shown through an analogous precedent — the first stage of the *Anns/Cooper* framework is complete and a duty of care may be identified (*ibid.*, at para. 36). In such circumstances, the second stage of the *Anns/Cooper* framework will seldom be engaged because any residual policy considerations will have already been taken into account when the proximate relationship was first identified (*ibid.*, at para. 39; *Edwards*, at para. 10).

27 This Court has on occasion defined previously established categories of proximity in broad terms. In *Hill*, for example, the Court listed "[t]he duty of care of the motorist to other users of the highway; the duty of care of the doctor to his patient; the duty of care of the solicitor to her client" (para. 25). Proximate relationships will not always, however, be identified so generally. In particular, whether proximity exists between two parties at large, or whether it inheres only for particular purposes or in relation to particular actions, will depend upon the nature of the particular relationship at issue (*ibid.*, at para. 27; *Haig*, at p. 479). Indeed, and as we explain below, factors which support recognizing "novel" proximate relationships do so based upon the characteristics of the parties' relationship and the circumstances of each particular case (*Cooper*, at paras. 34-35).

28 It follows that, where a party seeks to base a finding of proximity upon a previously established or analogous category, a court should be attentive to the particular factors which justified recognizing that prior category in order to determine whether the relationship at issue is, in fact, truly the same as or analogous to that which was previously recognized. And, by corollary, courts should avoid identifying established categories in an overly broad manner because, again, residual policy considerations are not considered where proximity is found on the basis of an established category (*Cooper*, at para. 39). Analytically, this makes sense. For a court to have previously recognized a proximate relationship, second-stage residual policy considerations must already have been taken into account. When, therefore, a court relies on an established category of proximity, it follows "that there are no overriding policy considerations that would [negate] the duty of care" (*ibid.*). A consequence of this approach, however, is that a finding of proximity based upon a previously established or analogous category must be grounded not merely upon the identity of the parties, but upon examination of the particular relationship at issue in each case. Otherwise, courts risk recognizing *prima facie* duties of care without any examination of pertinent second-stage residual policy considerations.

29 Where an established proximate relationship cannot be found, courts must undertake a full proximity analysis. To determine whether the "'close and direct' relationship which is the hallmark of the common law duty of care" exists (*Saadati v. Moorhead*, 2017 SCC 28, [2017] 1 S.C.R. 543 (S.C.C.), at para. 24, citing *Cooper*, at para. 32, and *McAlister (Donoghue) v. Stevenson*, [1932] A.C. 562 (U.K. H.L.), at pp. 580-81), courts must examine all relevant "factors arising from the relationship between the plaintiff and the defendant" (*Cooper*, at para. 30 (emphasis in original); *Edwards*, at para. 9; *Childs*, at para. 24; *Odhavji Estate*, at para. 50; *Hill*, at para. 24; *Followka*, at para. 26; *Saadati*, at para. 24). While these factors are diverse and depend on the circumstances of each case (*Cooper*, at para. 35), this Court has maintained that they include "expectations, representations, reliance, and the property or other interests involved" (*ibid.*, at para. 34; *Odhavji*, at para. 50; *Followka*, at para. 26) as well as any statutory obligations (*Cooper*, at para. 38; *Edwards*, at paras. 9 and 13; *Odhavji Estate*, at para. 56).

30 In cases of pure economic loss arising from negligent misrepresentation or performance of a service, two factors are determinative in the proximity analysis: the defendant's undertaking and the plaintiff's reliance. Where the defendant undertakes to provide a representation or service in circumstances that invite the plaintiff's reasonable reliance, the defendant becomes obligated to take reasonable care. And, the plaintiff has a right to rely on the defendant's undertaking to do so (W. N. Hohfeld, "Some Fundamental Legal Conceptions as Applied in Judicial Reasoning" (1913), 23 *Yale L.J.* 16, at pp. 49-50). These corollary rights and obligations create a relationship of proximity (*Haig*, at p. 477; *Caparo Industries plc v. Dickman*, [1990] 1 All E.R. 568 (U.K. H.L.), at pp. 637-38; *Glanzer v. Shepard*, 135 N.E. 275 (U.S. N.Y. Ct. App. 1922) at pp. 275-76; *Ultramarine Corp. v. Touche*, 174 N.E. 441 (U.S. N.Y. Ct. App. 1931), at pp. 445-46; E. J. Weinrib, "The Disintegration of Duty" (2006), 31 *Adv. Q.* 212, at p. 230).

31 Rights, like duties, are, however, not limitless. Any reliance on the part of the plaintiff which falls outside of the scope of the defendant's undertaking of responsibility — that is, of the purpose for which the representation was made or the service was undertaken — necessarily falls outside the scope of the proximate relationship and, therefore, of the defendant's duty of care (Weinrib; A. Beever, *Rediscovering the Law of Negligence* (2007), at pp. 293-94). This principle, also referred to as the

"end and aim" rule, properly limits liability on the basis that the defendant cannot be liable for a risk of injury against which he did not undertake to protect (*Glanzer*, at pp. 275 and 277; *Ultramarine Corp.*, at pp. 445-46; *Haig*, at p. 482). By assessing all relevant factors arising from the relationship between the parties, the proximity analysis not only determines the *existence* of a relationship of proximity, but also delineates the *scope* of the rights and duties which flow from that relationship. In short, it furnishes not only a "principled basis upon which to draw the line between those to whom the duty is owed and those to whom it is not" (*Followka*, at para. 70), but also a principled delineation of the scope of such duty, based upon the purpose for which the defendant undertakes responsibility. As we will explain, these principled limits are essential to determining the type of injury that was a reasonably foreseeable consequence of the defendant's negligence.

#### **(ii) Reasonable Foreseeability**

32 Assessing reasonable foreseeability in the *prima facie* duty of care analysis entails asking whether an injury to the plaintiff was a reasonably foreseeable consequence of the defendant's negligence (*Cooper*, at para. 30).

33 Broadly speaking, reasonable foreseeability concerns the likelihood of injury arising from the defendant's negligence (*Donoghue*, at p. 580). This inquiry is not amenable to, and does not require, actuarial precision. The jurisprudence gives content, however, to the foreseeability inquiry, providing courts with guidance. In the abstract, a defendant's negligent misrepresentation or performance of a service could potentially give rise to innumerable injuries tangentially cascading from the originally contemplated service. This was so in *Hercules*, where the Court recognized that an auditor's statement could be relied upon by a potentially limitless number of individuals (e.g., shareholders or takeover bidders), for a potentially limitless array of purposes (e.g., investments or takeover bids), any of which could result in various foreseeable injuries.

34 As we have already observed, however, reasonable foreseeability of injury is no longer the sole consideration at the first stage of the *Anns/Cooper* framework. Since *Cooper*, both reasonable foreseeability *and proximity* — the latter expressed in *Cooper* as a distinct and more demanding hurdle than reasonable foreseeability — must be proven in order to establish a *prima facie* duty of care. And, in cases of negligent misrepresentation or performance of a service, the proximate relationship — grounded in the defendant's undertaking and the plaintiff's reliance — informs the foreseeability inquiry. Meaning, the purpose underlying that undertaking and that corresponding reliance limits the type of injury which could be reasonably foreseen to result from the defendant's negligence.

35 As a matter of first principles, it must be borne in mind that an injury to the plaintiff in this sort of case flows from the fact that he or she detrimentally relied on the defendant's undertaking, whether it take the form of a representation or the performance of a service. It follows that an injury to the plaintiff will be reasonably foreseeable if (1) the defendant should have reasonably foreseen that the plaintiff would rely on his or her representation; and (2) such reliance would, in the particular circumstances of the case, be reasonable (*Hercules*, at para. 27). Both the reasonableness and the reasonable foreseeability of the plaintiff's reliance will be determined by the relationship of proximity between the parties; a plaintiff has a right to rely on a defendant to act with reasonable care for the particular purpose of the defendant's undertaking, and his or her reliance on the defendant for that purpose is therefore both reasonable and reasonably foreseeable. But a plaintiff has no right to rely on a defendant for any other purpose, because such reliance would fall outside the scope of the defendant's undertaking. As such, any consequent injury could not have been reasonably foreseeable.

36 We add this. Under the *Anns* test, the Court recognized that auditors may owe a *prima facie* duty of care to an innumerable number of parties on the basis of reasonable foreseeability alone (*Hercules*, at para. 32). We acknowledge that the *Anns/Cooper* framework, when applied to cases of negligent misrepresentation, will give rise to a far narrower scope of reasonably foreseeable injuries and, therefore, a narrower range of *prima facie* duties of care. This is no indictment of the *Anns/Cooper* analysis. Rather, it was the very purpose and effect of this Court's instruction in *Cooper* that "something more" than mere foreseeability is required at the first stage of the *Anns/Cooper* framework. By requiring examination of the relationship between the parties as we have just discussed, *Cooper* gave Canadian courts a more complete array of legal tools to determine whether it is "just and fair" to impose a *prima facie* duty of care.

#### **(b) Stage Two: Residual Policy Considerations**

37 Where a *prima facie* duty of care is recognized on the basis of proximity and reasonable foreseeability, the analysis advances to stage two of the *Anns/Cooper* framework. Here, the question is whether there are "residual policy considerations" outside the relationship of the parties that may negate the imposition of a duty of care (*Cooper*, at para. 30; *Edwards*, at para. 10; *Odhavji*, at para. 51).

38 By "residual", we mean that such considerations "are not concerned with the relationship between the parties [already considered at stage one], but with the effect of recognizing a duty of care on other legal obligations, the legal system and society more generally" (*Cooper*, at para. 37; see also *Edwards*, at para. 10). To the extent, therefore, that stage one of the *prima facie* duty of care is said to engage "policy" considerations arising from the relationship between the parties — i.e., the recognition that it is sound "policy" to only hold defendants liable for negligence when they are in a proximate relationship with the plaintiff and when the injury suffered was reasonably foreseeable (see *Cooper*, at para. 25) — such "policy" considerations are not revisited at stage two (*ibid.*, at para. 28). Indeed such reconsideration would be both redundant and analytically confusing (*ibid.*, at para. 29).

39 *Cooper*, and in particular, its strict delineation between "factors arising from the *relationship* [between the parties]" (para. 30 (emphasis in original)) and factors that "are not concerned with the relationship between the parties" (para. 37) has impacted the stage at which certain factors are considered within the *Anns/Cooper* framework. For example, principles that were traditionally considered at the second stage of the *Anns* test in cases of negligent misrepresentation, such as (1) whether the defendant knew the identity of the plaintiff or the class of plaintiffs who would rely on its representation; and (2) whether the reliance losses claimed by the plaintiff stem from the particular transaction in respect of which the statement at issue was made (*Hercules*, at paras. 27 and 40; *Bow Valley*, at paras. 55-56), are no longer considered at the second stage. This is because, as we have explained, these factors arise from the *relationship* between the parties and are, therefore, properly accounted for under the first stage proximity and reasonable foreseeability analysis.

40 What, then, remains to be considered at the second stage of the *Anns/Cooper* framework? In *Cooper*, this Court identified factors which are external to the relationship between the parties, including (1) whether the law already provides a remedy; (2) whether recognition of the duty of care creates "the spectre of unlimited liability to an unlimited class"; and (3) whether there are "other reasons of broad policy that suggest that the duty of care should not be recognized" (para. 37). In this way, the residual policy inquiry is a normative inquiry. It asks whether it would be better, for reasons relating to legal or doctrinal order, or reasons arising from other societal concerns, not to recognize a duty of care in a given case.

41 The place within the *Anns/Cooper* framework of this policy inquiry is significant. It follows the proximity and foreseeability inquiries. The policy inquiry assesses whether, *despite* the proximate relationship between the parties, and *despite* the reasonably foreseeable quality of the plaintiff's injury, the defendant should nonetheless be insulated from liability (*Cooper*, at para. 30; *Odhavji Estate*, at para. 51). That it would limit liability in the face of findings of both proximity and reasonable foreseeability makes plain how narrowly it should be relied upon (*Cooper*, at para. 30, citing *Yeu v. Hong Kong (Attorney-General)* (1987), [1988] 1 A.C. 175 (Hong Kong P.C.); *Edgeworth Construction Ltd. v. N.D. Lea & Associates Ltd.*, [1993] 3 S.C.R. 206 (S.C.C.), at p. 218). Only in rare cases — such as those concerning decisions of governmental policy (*Cooper*, at paras. 38 and 53) or quasi-judicial bodies (*ibid.*, at para. 52; *Edwards*, at para. 19) — should liability be denied when a defendant's negligence causes reasonably foreseeable injury to a plaintiff with whom he or she shares a close and direct relationship. In light of the above, the stage at which certain factors are considered in the *Anns/Cooper* framework is material.

42 In this case, the Chief Justice finds that, if it were necessary to proceed to the second stage of the *Anns/Cooper* framework, she would insulate Deloitte from liability based on the residual policy consideration of indeterminacy (para. 166). We concede that indeterminate liability may, in some cases, be a legitimate residual policy consideration (*Cooper*, at paras. 37 and 54; *Hercules*, at para. 31). In our view, however, rarely, if ever, should a concern for indeterminate liability persist after a properly applied proximity and foreseeability analysis (*Saadati*, at para. 34; *Fullowka*, at para. 70). Robust application of stage one of the *Anns/Cooper* framework should almost always obviate concerns for indeterminate liability. This follows from an appreciation of what indeterminate liability, as a concept, actually means.

43 Indeterminate liability is liability of a specific *character*, not of a specific *amount*. In particular, indeterminate liability should not be confused with significant liability (*Gross v. Great-West Life Assurance Co.*, 2002 ABCA 37, 299 A.R. 142 (Alta. C.A.), at para. 38). Certain activities — like flying commercial aircraft, manufacturing pharmaceutical drugs, or auditing a large corporation — may well give rise to significant liability. But such liability arises from the nature of the defendant's undertakings and of the severe but reasonably foreseeable scale of injury that can result where such undertakings are negligently performed. This explains the significant compensation which these high risk undertakings typically attract. It also explains why contractual disclaimers limiting liability may often be warranted (*Edgeworth Construction Ltd.*, at p. 220). In contrast, the liability arising from these "high risk" undertakings may only be characterized as "indeterminate" if the scope of such liability is impossible to ascertain (*Black's Law Dictionary* (10th ed. 2014), *sub verbo* "indeterminate"). In other words, liability is truly "indeterminate" if "the accepted sources of law and the accepted methods of working with those sources such as deduction and analogy — are insufficient to resolve the question" (M. V. Tushnet, "Defending the Indeterminacy Thesis", in B. Bix, ed., *Analyzing Law: New Essays in Legal Theory* (1998), 223, at pp. 224-25). More specifically, there are three pertinent aspects to so-called "indeterminacy" in these cases: (1) value indeterminacy ("liability in an indeterminate amount"); (2) temporal indeterminacy ("liability ... for an indeterminate time"); and (3) claimant indeterminacy ("liability ... to an indeterminate class"): *Hercules*, at para. 31, citing *Ultramares Corp.*, at p. 444. Naturally, when a claim has value, temporal, and claimant indeterminacy, our legal tools are insufficient to resolve the quantum of infinite damages that will flow from such a claim.

44 All this said, it would be very difficult for liability of an indeterminate character, so understood, to survive a robust analysis of proximity and foreseeability at the first stage of the *Anns/Cooper* framework. In cases of negligent misrepresentation or performance of a service, the requisite proximity analysis will address claimant indeterminacy because the class of claimants is *determinate*, including only those in respect of whom the defendant undertook to act. Likewise, foreseeability, which is constrained by the purpose of the undertaking in question, should address concerns about value indeterminacy, because the value of damages is limited — that is, *determined* — by the reasonably foreseeable quality of the injury (*Hercules*, at para. 32). Finally, proximity and foreseeability should both address temporal indeterminacy since the longer the period of time over which injury is said to have occurred, the less likely the defendant undertook to protect against it and the less foreseeable the injury, taken as a whole. Hence Cardozo C.J.'s statement in the oft-cited *Ultramares Corp.* decision that a duty which gives rise to indeterminacy "enkindle[s] doubt whether a flaw may not exist in the implication of a duty that exposes to these consequences" (p. 444; see also Weinrib, at p. 231; Beever, at p. 275). In other words, a finding of indeterminate liability at the damages stage strongly suggests that a legal error occurred at the duty stage, since a finding of a *prima facie* duty of indeterminate scope underlies the resulting indeterminate liability.

45 We would add one final point. Indeterminate liability is a residual policy consideration, nothing more. The presence of indeterminacy need not be dispositive of liability in all cases. To approach the analysis otherwise would transform indeterminate liability from a policy *consideration* into a policy *veto*. While indeterminacy may militate against liability, other policy considerations — such as the immense profit margins that "high risk" actors often benefit from, or the extent to which "high risk" actors voluntarily assume the risk of indeterminate liability — may ultimately justify maintaining that liability, despite its indeterminacy (Beever, at p. 293). Even, therefore, in the rare case where indeterminate liability survives the proximity and foreseeability inquiries, it is not automatic that such indeterminacy will necessarily govern (*Followka*, at para. 70). Indeed, any so-called "indeterminate liability" which survives stage one of the *Anns/Cooper* framework presumably arises from the risk against which the defendant voluntarily undertook to protect the plaintiff and, therefore, may justly and fairly result in liability.

## B. Application

46 Having set out the proper legal framework for establishing liability in cases of pure economic loss arising from negligent misrepresentation or performance of a service, we turn now to apply that framework to the trial judge's two findings of negligence in this case.

47 In summary, at the first stage of the *Anns/Cooper* framework, a duty of care is established where proximity and reasonably foreseeability of injury are found. In our view, Deloitte's undertakings in relation to soliciting investment, and the 1997 Audit, gave rise to proximate relationships. The purpose of those undertakings, in turn, determines the type of injury that was reasonably

foreseeable as a result of Livent's reliance. Livent relied on the 1997 Audit for the purpose it was provided. Thus, a resulting injury was reasonably foreseeable. The same cannot be said, however, in respect of Deloitte's negligent assistance in soliciting investment.

48 At the second stage of the *Anns/Cooper* framework, residual policy considerations may negate Deloitte's duty of care. But none apply to the negligent provision of the 1997 Audit.

*(1) Solicitation of Investment (August to October 1997)*

**(a) Prima Facie Duty of Care**

*(i) Proximity*

49 The proximity analysis first asks whether the relationship at issue falls within, or is analogous to, a previously recognized category of proximity (*Cooper*, at para. 36; *Edwards*, at para. 9).

50 In *Hercules*, this Court found that an auditor may be in a proximate relationship with its corporate client sufficient to give rise to a duty of care. That proximate relationship was not, however, between an auditor and its client at large. Rather, the recognized relationship was limited to the preparation of a statutory audit (para. 14).

51 In this case, the asserted proximate relationship is not so narrow in scope. Livent claims that Deloitte owed it a duty of care in relation both to (1) the preparation of the 1997 Audit; and (2) the approval of the Press Release and preparation of the Comfort Letter. We see it as vital to the resolution of this case to distinguish between these two sets of documents.

52 The mere fact that proximity has been recognized as existing between an auditor and its client for *one* purpose is insufficient to conclude that proximity exists between the same parties for *all* purposes. As discussed above, an overly broad characterization of an established category of proximity which fails to consider the scope of activity in respect of which proximity was previously recognized, risks a premature imposition of a *prima facie* duty of care. In our respectful view, this very error impairs the reasons of the trial judge and the Court of Appeal. This approach is fundamentally inconsistent with the framework set out by this Court in *Cooper*. For this reason, we do not agree that this Court has previously established a proximate relationship as between an auditor and its client for the purposes of soliciting investment. In these circumstances, we must undertake a full proximity analysis.

53 As we have indicated above, the full proximity analysis in cases of negligent misrepresentation is focussed upon the purpose of the defendant's undertaking and the plaintiff's reliance. From August to October of 1997, the services which Deloitte provided to Livent — particularly its ongoing assistance in relation to the Press Release and the provision of the Comfort Letter — were undertaken for the purpose of helping Livent to solicit investment. Given this undertaking, Livent was entitled to rely upon Deloitte to carry out these services with reasonable care. From this, it follows that a relationship of proximity arose *in respect of the content of Deloitte's undertaking*. Deloitte's undertaking did *not* entitle Livent to rely on Deloitte's services and representations for *all* possible purposes. Rather, the "close and direct" relationship which obligated Deloitte to act with reasonable care was limited to the purpose for which Deloitte undertook to act. In this regard, we agree with the Chief Justice that "[l]oss that results from [Livent's] inability to attract investment ... may fall within the scope of Deloitte's duty of care", though only in relation to the Press Release and Comfort Letter (para. 153).

*(ii) Reasonable Foreseeability*

54 Having established a relationship of proximity for the purpose of soliciting investment, Livent asserts that the increase in its liquidation deficit beginning in the fall of 1997 was a reasonably foreseeable consequence of Deloitte's negligence, because "[t]he false financial picture that ought not to have been certified by Deloitte" was relied upon by Livent to artificially extend its solvency (R.F., at para. 108). In other words, had Deloitte resigned rather than continued to assist Livent in soliciting investment, Livent would have known its actual finances and avoided their interim deterioration. In our view, however, this type of injury was not a reasonably foreseeable consequence of Deloitte's negligent assistance in soliciting investment. This follows from our

earlier observations about how the scope of the parties' proximate relationship limits the type of injuries that are reasonably foreseeable.

55 In cases of negligent misrepresentation or performance of a service, a plaintiff's injury will be reasonably foreseeable where (1) the defendant should reasonably foresee that the plaintiff will rely on his or her representation; and (2) reliance by the plaintiff would, in the particular circumstances of the case, be reasonable (*Hercules*, at para. 27). Whether reliance is reasonable and reasonably foreseeable will turn on whether the plaintiff had a right to rely on the defendant *for that purpose*. Here, Livent argues that it detrimentally relied on Deloitte's services and representations to artificially extend the life of the corporation. This reliance is not, however, tied to the solicitation of investment, but was a matter of oversight of management. Phrased in terms of Deloitte's undertaking, during the fall of 1997 Deloitte undertook to assist Livent in soliciting investment, not in oversight of management. Losses related to this undertaking — for example, an inability to solicit investment because of Deloitte's negligence — may be recoverable from Deloitte. But losses outside the scope of this undertaking, including those claimed here relating to a lack of oversight of management extending Livent's solvency, are not recoverable from Deloitte. Simply put, Deloitte never undertook, in preparing the Comfort Letter, to assist Livent's shareholders in overseeing management; it cannot therefore be held liable for failing to take reasonable care to assist such oversight. And, given that Livent had no right to rely on Deloitte's representations for a purpose other than that for which Deloitte undertook to act, Livent's reliance was neither reasonable nor reasonably foreseeable. Consequently, the increase in Livent's liquidation deficit which arose from its reliance on the Press Release and Comfort Letter was not a reasonably foreseeable injury.

56 This is not to say that Livent had no resources for oversight at the time Deloitte assisted in soliciting investment. Indeed, for internal oversight purposes, Livent could reasonably rely on Deloitte's 1996 Audit. Unlike the Comfort Letter, the 1996 Audit was prepared for the purpose of assisting shareholder oversight of management. As a consequence, its negligent preparation could result in reasonably foreseeable injury flowing from the shareholders' inability to oversee management. The trial judge, however, made a finding of fact that any negligence in Deloitte's preparation of the 1996 Audit caused no injury to Livent. As this finding has not been cross-appealed by Livent, we make no further comment on it.

## **(b) Residual Policy Considerations**

57 Having concluded that no *prima facie* duty of care arose in respect of Deloitte's assistance in soliciting investment and the resulting increase in Livent's liquidation deficit, there is no need to consider residual policy considerations.

### *(2) 1997 Clean Audit Opinion (April 1998)*

#### **(a) Prima Facie Duty of Care**

##### *(i) Proximity*

58 This Court has previously established that an auditor owes its corporate client a duty of care in the preparation of a statutory audit. It follows that the established proximate relationship in *Hercules* will be dispositive of the existence of a duty of care in this case, unless the purpose of Deloitte's undertaking to prepare such an audit in this case can be distinguished from the undertaking in *Hercules Management Ltd.*. As we will show, it cannot.

59 In *Hercules*, at para. 48, this Court cited Lord Oliver's statement in *Caparo Industries plc*, at p. 583, identifying the purposes of a statutory audit:

It is the auditors' function to ensure, so far as possible, that the financial information as to the company's affairs prepared by the directors accurately reflects the company's position in order first, to protect the company itself from the consequences of undetected errors or, possibly, wrongdoing ... and, second, to provide shareholders with reliable intelligence for the purpose of enabling them to scrutinise the conduct of the company's affairs and to exercise their collective powers to reward or control or remove those to whom that conduct has been confided.

[Emphasis added; emphasis in original deleted.]

60 These purposes, according to La Forest J., were no different under the statutory audit provisions in Manitoba's *Corporations Act*, R.S.M. 1987, c. C225, which were at issue in *Hercules*. Regarding the second purpose, this Court stated that a statutory audit was necessary to "permit the shareholders, as a body, to make decisions as to the manner in which they want the corporation to be managed, to assess the performance of the directors and officers, and to decide whether or not they wish to retain the existing management or to have them replaced" (*Hercules*, at para. 49). The purpose of the audited reports then "was, precisely, to assist the collectivity of shareholders of the audited companies in their task of overseeing management" (*ibid.*).

61 No party before us has suggested that the purposes for which a statutory audit is prepared, and which have been recognized in Canadian law for 20 years, have changed. These purposes are consistent with the governing statute in this case: Ontario's *Business Corporations Act*, R.S.O. 1990, c. B.16 ("*OBCA*"). In particular, ss. 153 and 154 of the *OBCA* require Deloitte, as Livent's auditor, to examine Livent's financial statements in order for Livent's directors to fulfill their obligation to place a yearly statutory audit before its shareholders at the annual general meeting. And, while the engagement letters between Deloitte and Livent indicated that the detection of fraud was not guaranteed even where Deloitte acted with all reasonable care, they did not disclaim liability for negligently failing to uncover fraud. Thus, in our view, Deloitte did not alter the purpose for which it undertook to provide the 1997 Audit or disclaim liability in relation to that purpose.

62 Given the foregoing, no basis exists for distinguishing the purpose of the statutory audit in this case from the purpose which underlay the statutory audit in *Hercules*. It follows that proximity is established between Livent and Deloitte in relation to the statutory audit, on the basis of the previously recognized proximate relationship identified by this Court.

#### **(ii) Reasonable Foreseeability**

63 Livent says that the increase in its liquidation deficit was a reasonably foreseeable consequence of Deloitte's negligent audit, because the audit preserved a false financial picture upon which Livent relied to artificially extend its solvency and delay filing for bankruptcy. In other words, if Deloitte had taken reasonable care in auditing Livent, then Livent would have discovered the fraud and avoided the interim deterioration of its assets.

64 In our view, this type of injury was a reasonably foreseeable consequence of Deloitte's negligent audit. The purpose of the 1997 Audit was, as this Court described in *Hercules*, two-fold: (1) to protect the company from the consequences of undetected errors and wrongdoing; and (2) to provide shareholders with reliable intelligence enabling oversight (para. 48, citing *Caparo Industries plc*, at p. 583). Those purposes, as we have already described in our discussion of proximity generally, inform the scope of reasonably foreseeable injury. Specifically, at the time Deloitte undertook to provide the 1997 Audit, Livent was entitled to rely on Deloitte to take reasonable care in doing so for these recognized purposes. Livent's reliance on Deloitte for the purpose of overseeing the conduct of management was therefore both reasonable and reasonably foreseeable. And, as Livent's injury arises from its detrimental reliance, the injury linked to that reliance is itself reasonably foreseeable.

65 It follows that the type of injury Livent suffered here was a reasonably foreseeable consequence of Deloitte's negligence. Through the 1997 Audit, Deloitte undertook to assist Livent's shareholders in scrutinizing management conduct. By negligently conducting the audit, and impairing Livent's shareholders' ability to oversee management, Deloitte exposed Livent to reasonably foreseeable risks, including "business losses" that would have been avoided with a proper audit. Indeed, the risk of injury flowing from undetected fraud is *precisely* the type of injury statutory audits seek to avoid.

66 We add one final point in this regard. In *Hercules* (at para. 48), this Court cited *Caparo Industries plc* for the proposition that statutory audits are conducted, in part, "to provide shareholders with reliable intelligence for the purpose of enabling them to scrutinise the conduct of the company's affairs". If subsequent business decisions that would not have survived such scrutiny do not fall within the scope of an auditor's duty of care, one wonders what injury, if any, could result in liability for a negligent audit with respect to this recognized auditing purpose. Corporate scrutiny connotes both *knowledge* of problems within the corporation, and *decisions* reflecting an appreciation of those problems. Indeed, it is only by acting on the knowledge contained in an audit that is the product of reasonable care that corporation's avoid losses that would have otherwise occurred without that audit.

## (b) Residual Policy Considerations

67 Having found a proximate relationship based on a previously recognized category, we need not consider residual policy considerations to negate or limit the scope of the duty of care (*Cooper*, at para. 39). Nonetheless, as the Chief Justice finds, in the alternative, that the policy consideration of indeterminate liability would deny recovery in this case (paras. 165-166), it is useful to examine how the established proximate relationship engaged in this case precludes indeterminate liability.

68 As discussed, the character of indeterminacy in these cases has three pertinent aspects: (1) temporal; (2) claimant; and (3) value (*Hercules*, at para. 31, citing *Ultramarine Corp.*, at p. 444). None of them arise here, consistent with our earlier observation that a robust application of the *Anns/Cooper* framework will usually, if not always, preclude the imposition of liability that is in any way indeterminate (*Saadati*, at para. 34; *Fellowka*, at para. 70).

69 Here, as to temporal indeterminacy, any suggestion that Livent could recover indefinitely from the negligent preparation of the 1997 Audit fundamentally mischaracterizes the scope of *annual* statutory audits. The injury flowing from the 1997 Audit could not be assessed over an *indeterminate* time window. Rather, statutory audits must occur annually (*OBCA*, s. 154). As a result, the liability that could attach to one year's negligent audit could not extend beyond the following year's audit, which would effectively supersede the prior year's audit as the factual and legal cause of the injury alleged. Put simply, the time window during which liability might flow from a single negligent statutory audit is not indeterminate. It is one year.

70 Regarding claimant indeterminacy, the class of claimants here could not be further from *indeterminate*: it represents one single claimant — Livent. In *Hercules*, this Court noted that "audit reports will be relied on by many different people (e.g., shareholders, creditors, potential take-over bidders, investors, etc.)" (para. 32). That claim gave rise to indeterminate liability because the class of claimants (the "many different people") was indeterminate. For example, any number of investors could rely on an audit to inform their investment decisions. This case, in contrast, is entirely distinguishable. The fact of a single potential claimant raises no concern of claimant indeterminacy.

71 We note, parenthetically, that Deloitte characterizes Livent's claim as, in reality (that is, in light of its insolvency), a claim by its various stakeholders. But this submission conflates the plaintiff, Livent, with the stakeholders who may benefit from the success of Livent's claim, thereby disregarding Livent's separate corporate personality. More importantly, it directly contradicts this Court's holding in *Hercules* that a derivative action — which, too, could benefit various stakeholders — is the appropriate vehicle for a claim regarding a negligent statutory audit (paras. 1 and 58-64).

72 The absence of temporal and claimant indeterminacy in turn explains the absence of value indeterminacy in this case. Here, Livent's improvident use of investment funds could not result in liability of an *indeterminate* value. Rather, the liability in this case could not exceed the losses of a single corporation. When undertaking to audit Livent, Deloitte must have known that Livent was a substantial corporation, and in turn, that it could suffer large financial losses if misinformed by its auditor. But *significant* liability is distinct from *indeterminate* liability (*Gross*, at para. 38). Put differently, Deloitte was, indeed, "able to gauge the scale of its potential liability" before undertaking the 1997 Audit (Chief Justice's reasons, at para. 176). This is a far cry from the limitless potential quantum of lost investments by innumerable third parties relying on audit statements for their own investment decisions (see *Hercules*, at para. 32). The concern that Deloitte did not know "the scope of [its] liability at the time [it took] on [its] engagement" with Livent (Chief Justice's reasons, at para. 176) conflates *indeterminate* liability with *undetermined* liability.

73 The Chief Justice describes the liability sought to be imposed here as "indeterminate" because Livent's reliance purportedly fell outside the scope of Deloitte's undertaking (para. 170). We disagree. To the contrary, value indeterminacy is limited by the purposes for which the audit was prepared, and Livent's reliance fell squarely within that purpose. In *Hercules*, this Court rejected a claim by investors because they might use audit reports for a "collateral or unintended purpose" (para. 38), thereby giving rise to indeterminate liability (since the variety of purposes to which an audit may be put is potentially limitless). But that is not the case here. The 1997 Audit was prepared for the express purpose of oversight of management by Livent's shareholders, and the loss at issue flowed from those shareholders' inability to conduct that oversight. It follows that the purposes underlying

the 1997 Audit — of which, as we have explained, there are only two — do not give rise to potential indeterminacy, and by corollary, relate to potential losses that, too, are not indeterminate. This is not a case where, for example, an unknown third-party relied on an audit to launch a takeover bid — a purpose outside the scope of the audit (*Hercules*, at para. 32). Rather, this is a case in which an established purpose of the audit was undermined, and where losses predictably flowed from that failed purpose (*Haig*, at pp. 478-79).

74 Here, *one* claimant (Livent) is suing Deloitte for failing to satisfy one of *two* auditing purposes (oversight of management) which would have been superseded by an audit *one* year later. No indeterminate liability arises in this context. In this regard, La Forest J.'s remarks for this Court in *Hercules* (at para. 37) are apposite:

... in cases where the defendant knows the identity of the plaintiff (or of a class of plaintiffs) and where the defendant's statements are used for the specific purpose or transaction for which they were made, policy considerations surrounding indeterminate liability will not be of any concern since the scope of liability can readily be circumscribed.

75 The lack of indeterminacy here between Deloitte (an auditor) and Livent (its corporate client) is unsurprising given (1) this Court's recognition in *Hercules* that a duty of care exists between an auditor and its corporate client in relation to a statutory audit; and (2) this Court's direction in *Cooper* that the second stage of the *Anns/Cooper* framework need not be considered where a previously recognized proximate relationship exists.

### **(c) Remoteness**

76 The Chief Justice says that Deloitte's complete immunity from liability would similarly flow from a remoteness analysis (para. 173). We disagree.

77 In a successful negligence action, a plaintiff must demonstrate that (1) the defendant owed him or her a duty of care; (2) the defendant's behaviour breached the standard of care; (3) the plaintiff sustained damage; and (4) the damage was caused, in fact and in law, by the defendant's breach (*Mustapha v. Culligan of Canada Ltd.*, 2008 SCC 27, [2008] 2 S.C.R. 114 (S.C.C.), at para. 3; *Saadati*, at para. 13). The principle of remoteness, or legal causation, examines whether "the harm [is] too unrelated to the wrongful conduct to hold the defendant fairly liable" (*Mustapha*, at para. 12, citing A.M. Linden and B. Feldthusen, *Canadian Tort Law* (8th ed. 2006), at p. 360; see also *Saadati*, at para. 34). It is trite law that "it is the foresight of the reasonable man which alone can determine responsibility" (*Mustapha*, at paras. 11-13, citing *Overseas Tankship (U.K.) Ltd. v. Morts Dock & Engineering Co.*, [1961] A.C. 388 (New South Wales P.C.), at p. 424). Therefore, injury will be sufficiently related to the wrongful conduct if it is a reasonably foreseeable consequence of that conduct.

78 We acknowledge that remoteness, so understood, overlaps conceptually with the reasonable foreseeability analysis conducted in the *prima facie* duty of care analysis (*Mustapha*, at para. 15). But the two are distinct: the duty analysis is concerned with *the type of injury* that is reasonably foreseeable as flowing from the defendant's conduct, whereas the remoteness analysis is concerned with the reasonable foreseeability of *the actual injury* suffered by the plaintiff (L. N. Klar and C. S. G. Jefferies, *Tort Law*, (6th ed. 2017), at p. 565: "Remoteness questions deal with how far liability should extend in reference to *injuries caused to the plaintiff*, once a duty relationship ...[has] been established" (emphasis added)).

79 Remoteness, at its core, turns on the reasonable foreseeability of the actual injury suffered by the plaintiff. But, and as we have explained, the loss here — stemming from Deloitte's failure to fulfill the specific undertaking it made to Livent — *was* reasonably foreseeable. It follows that remoteness is not a bar to Livent's recovery.

80 Nonetheless, the Chief Justice holds that Livent's loss is too remote because it cannot be attributed to its shareholders' reliance on the 1997 Audit for the purpose of overseeing management. Specifically, she says that "Livent did not prove and the trial judge did not find that Livent's shareholders relied on Deloitte's negligent audit statements, or that had they received and relied on accurate statements, they would have acted in a way that would have prevented Livent from carrying on business and diminishing its assets" (para. 159). With respect, we see the matter differently. In its amended statement of claim, Livent advanced its theory of impaired shareholder reliance (A.R., vol. III, at p. 112):

As a consequence of the Auditors' breaches of duty, they missed repeated opportunities to uncover and reveal the accounting irregularities and errors being orchestrated by Drabinsky and Gottlieb. Consequently, the Livent Stakeholders were deprived of the opportunity to exercise their collective will by, inter alia, ousting Drabinsky and Gottlieb thereby avoiding further losses, damages and liabilities incurred by Livent and the Livent Stakeholders.

[Emphasis added.]

81 Similarly, when the trial judge summarized Livent's position at trial, he wrote (at para. 23):

[Deloitte's] alleged negligent issuance of unqualified opinions, in turn, deprived the honest directors and shareholders of the opportunity to put a stop to the fraud, and the losses eventually caused to the company by the fraud, at an earlier date.

[Emphasis added.]

82 The trial judge accepted this theory: "I believe that the honest directors and innocent shareholders in this case were entitled to rely on Deloitte's audits to discharge their supervisory task" (para. 341). Nonetheless, the Chief Justice would deny liability because, in her view, "Livent offered no proof to support" the assertion that its shareholders would have called management to account had they received a non-negligent audit in March of 1998 (para. 161). But this is *precisely* what the record shows. On November 18, 1998, Livent received a prudently prepared audit of its restated 1997 financial statements. This prudent audit disclosed a "significant, if not staggering" difference in reported income (trial reasons, at para. 15). Specifically, the prudent audit uncovered an additional loss of over \$50 million during the 1997 fiscal year.

83 Livent's response upon receipt of this audit report is telling and, in our view, belies any suggestion that informed shareholder scrutiny would have permitted Livent to act in any manner other than expected. *That same day*, "Drabinsky and Gottlieb were dismissed for cause ... and Livent voluntarily made a petition for bankruptcy protection" in the United States (trial reasons, at para. 16). *The next day*, "Livent filed for protection under the *Companies' Creditors Arrangement Act*, R.S.C. 1985, c. C-36 in Canada" (*ibid.*). It is difficult to conceive of a clearer demonstration of when and how Livent's shareholders would have "prevented Livent from carrying on business and diminishing its assets" had Deloitte prepared a prudent audit in March of 1998 (Chief Justice's reasons, at para. 159).

84 On this record, any speculation that Livent's shareholders might have done nothing in response to rampant fraud is simply unsustainable. Indeed, the similarly speculative claim that Livent's shareholders might have done nothing when confronted with a notional liquidation deficit of approximately \$365 million in early April 1998 (when we know that the actual liquidation deficit of \$413.83 million in mid-November 1998 prompted Livent's immediate petition into bankruptcy) is — also in light of this record — equally improbable.

85 The Chief Justice, however, advances one additional basis upon which to deny Deloitte's liability: that Deloitte should be liable "only for the information" it provided (the audit opinion), not "for the decision[s] to be informed by it" (para. 171). This proposition does not preclude Deloitte's liability here.

#### **(d) Additional Basis for Limiting Liability: Information, Advice and the "SAAMCO Principle"**

86 The Chief Justice seeks to limit Deloitte's liability because it merely provided "information" to Livent, not "advice", and, as a consequence, did not "assume responsibility for what the shareholders decide[d] to do with that information" (para. 170). In this regard, she cites (at para. 149) the following passage from *Hughes-Holland v. BPE Solicitors*, [2017] UKSC 21, [2017] 2 W.L.R. 1029 (U.K. S.C.), at para. 44:

A valuer or a conveyancer, for example, will rarely supply more than a specific part of the material on which his client's decision is based. He is generally no more than a provider of what Lord Hoffmann [in *SAAMCO*] called "information". At the opposite end of the spectrum, an investment adviser advising a client whether to buy a particular stock, or a financial adviser advising whether to invest self-invested pension fund in an annuity are likely, in Lord Hoffmann's terminology, to

be regarded as giving "advice". Between these extremes, every case is likely to depend on the range of matters for which the defendant assumed responsibility and no more exact rule can be stated.

87 It is true that Deloitte, as auditor, did not advise Livent on its business decisions. But it nevertheless "assumed responsibility" over providing accurate information upon which the shareholders could rely to scrutinize management conduct. Deloitte does not escape liability simply because a negligent audit, in itself, cannot cause financial harm. Audits never, in themselves, cause harm. It is only when they are detrimentally relied upon that tangible consequences ensue.

88 The consequences of this line of reasoning should not be understated. By effectively limiting an auditor's liability to the harms inherent in the negligent audit, while excluding those harms which are a reasonably foreseeable consequence of that negligent audit (i.e., an inability to oversee management), a central purpose for which a statutory audit is prepared is undercut, thereby immunizing auditors from liability for any act of negligence impairing oversight. This holding is inconsistent with the Court's jurisprudence (which prescribes recovery for reasonably foreseeable injury, even if that injury is not technically immediate) and is in tension with *Hercules* (which sought to limit auditors' liability for statutory audits to determinate corporate claims rather than indeterminate stakeholder claims, not to insulate auditors from virtually all liability).

89 The Chief Justice's reliance on the so-called "SAAMCO principle" — derived from the House of Lords' decision in *Banque Bruxelles Lambert S.A. v. Eagle Star Insurance Co. (1996), (sub nom. South Australia Asset Management Corp. v. York Montague Ltd.) [1997] A.C. 191* (U.K. H.L.) ("SAAMCO"); see also *Nykredit Mortgage Bank Plc v. Edward Erdman Group Ltd., [1997] 1 W.L.R. 1627* (Eng. H.L.); *Platform Home Loans Ltd. v. Oyston Shipways Ltd. (1999), [2000] 2 A.C. 190* (Eng. H.L.)); and *BPE Solicitors* — is in our respectful view mistaken for the same reason as her reliance on the dichotomy between information and advice as described in *BPE Solicitors*. Her reliance on both U.K. decisions is premised on how Deloitte never assumed responsibility for injuries resulting from Livent's operations — either because those injuries were not caused by the mere information contained in the 1997 Audit (*BPE Solicitors*), or because those injuries did not flow from what was incorrect in the 1997 Audit (*SAAMCO*). But, in assuming responsibility for informing shareholder scrutiny of management, Deloitte *did* assume responsibility for injuries flowing from that impaired scrutiny.

90 In simple terms, the *SAAMCO* principle denies recovery for pure economic loss where the plaintiff's injury would still have occurred even if the defendant's negligent misrepresentation were factually true. Rephrased as a test, the principle denies liability where an *alternate* cause that is *unrelated* to the defendant's negligence is the true source of the plaintiff's injury. This alternate and unrelated cause explains why the truth of the negligent misstatement has no bearing on the plaintiff's ultimate injury (i.e., because, even with that truth, the injury would have flowed as a result of the alternate cause). Or, framed from the perspective of the duty of care, the defendant could not have undertaken to protect against injuries that would have been caused by alternate and unrelated sources. In *SAAMCO*, the House of Lords explained the principle with the commendably Albertan example of a mountaineer:

A mountaineer about to undertake a difficult climb is concerned about the fitness of his knee. He goes to a doctor who negligently makes a superficial examination and pronounces the knee fit. The climber goes on the expedition, which he would not have undertaken if the doctor had told him the true state of his knee. He suffers an injury which is an entirely foreseeable consequence of mountaineering but has nothing to do with his knee. [p. 213]

91 In this example, the doctor's negligent misrepresentation (the positive knee diagnosis) is a cause that is alternate and unrelated to the cause of the mountaineer's injury (a mountaineering accident unrelated to the knee, for example, an avalanche). As a result, even had the doctor's negligent misrepresentation been true (i.e., even if the mountaineer's knee had been fit), the injury would still have occurred, since the fitness of his knee would not have prevented the injury caused by the avalanche. In other words, the doctor could not have undertaken to protect against an avalanche, which is unrelated to his or her diagnosis.

92 Deloitte is unlike the doctor. Deloitte's negligence related to a statutory audit, a purpose of which is management oversight by shareholders. That oversight, in turn, informs (or is related to) subsequent business decisions by the corporation. It follows that Livent's trading losses were not an alternate and unrelated cause of Livent's injury. To the contrary, the shareholders' capacity to oversee the conduct of Livent's business was entirely dependent upon the statutory audit preceding that oversight.

In particular, the shareholders' reliance on that audit and the audit's portrayal of the directors and their business ventures was a critical component of their oversight of management — which, we reiterate, was the very purpose in respect of which Deloitte undertook to act with reasonable care.

93 It therefore follows from a proper understanding of the *SAAMCO* principle that it does not limit Deloitte's liability in respect of the 1997 Audit.

94 We add, however, that a full consideration of *SAAMCO*'s application in Canadian law by this Court should await future cases, with greater consideration of the principle by lower courts, more comprehensive submissions by counsel, and critically, with facts more analogous to those in the *SAAMCO* jurisprudence. *SAAMCO* addressed whether a negligent valuator should be liable, not only for the difference between their valuation and a prudent valuation, but also for a subsequent drop in the market which exacerbated the lenders' losses. In this specific context, the loss attributable to the negligent valuation is easily extricable; it is the difference between the negligent valuation and a prudent valuation. But the same cannot be said in the context of statutory audits, where the "cause" of future losses flowing from future commercial activity is far more complex to isolate. Indeed, as Lord Sumption noted in *BPE Solicitors* (at para. 46):

Where the loss arises from a variety of commercial factors which it was for the claimant to identify and assess, it will commonly be difficult or impossible as well as unnecessary to quantify and strip out the financial impact of each one of them.

95 In any event, the *SAAMCO* principle, at least in the manner the Chief Justice applies it here, conflicts with Canadian jurisprudence. Under established Canadian tort law, a defendant is liable if the plaintiff proves — in respect of causation — that the defendant caused the plaintiff's injury in fact (*Clements (Litigation Guardian of) v. Clements*, 2012 SCC 32, [2012] 2 S.C.R. 181 (S.C.C.), at para. 8) and in law (*Mustapha*, at paras. 12-13). As we have already explained, Livent proved both in respect of its injuries after the 1997 Audit. It follows that Deloitte is liable for Livent's injuries following that audit. Admittedly, a defendant may limit its liability, even if the plaintiff proves legal and factual causation, where the defendant proves that some of the plaintiff's injury would have still occurred without the defendant's negligence because of alternate hypothetical causes (*Rainbow Industrial Caterers Ltd. v. Canadian National Railway*, [1991] 3 S.C.R. 3 (S.C.C.), at pp. 15-16). But those alternate hypothetical causes were already accounted for in the trial judge's 25 percent reduction in damages (trial reasons, at paras. 324-26). And, in so far as the Chief Justice holds that Livent failed to prove that alternate hypothetical causes did not cause the remaining 75 percent of damages, she disregards that it is Deloitte, not Livent, who bears the burden of proving that liability should be limited in this fashion (*Rainbow Industrial Caterers Ltd.*, at pp. 15-16).

### **C. Defences**

96 Finally, having concluded that we would uphold the trial judge's finding that Deloitte is liable for its negligence in relation to the statutory audit, we must consider the two defences Deloitte advanced before this Court. First, Deloitte submits that both lower courts erred in failing to find that Livent's action was not barred by the defence of illegality. Secondly, Deloitte submits that, even had Livent's action not been barred for illegality, Deloitte should only be liable for part of the injury due to Livent's contributory fault.

97 Both defences rely on the applicability of the doctrine of corporate identification. As the wrongdoing at issue was not that of Livent's but of its directors Drabinsky and Gottlieb, Deloitte cannot succeed on either defence unless it can show that the fraudulent acts of Livent's employees should be attributed to the corporation. The corporate identification doctrine is not, however, a standalone principle; rather, it is a means by which acts may be attributed to a corporation for the particular purpose or defence at issue. It follows that corporate identification must be analyzed independently for each defence.

#### **(1) Illegality**

98 The defence of illegality bars an otherwise valid action in tort on the basis that the plaintiff has engaged in illegal or immoral conduct and, therefore, should not recover (*Hall v. Hebert*, [1993] 2 S.C.R. 159 (S.C.C.), at p. 169; *British Columbia v. Zastowny*, 2008 SCC 4, [2008] 1 S.C.R. 27 (S.C.C.), at para. 20). Grounded in public policy, it is available in very "limited"

circumstances, only where it is necessary to preserve the "integrity of the justice system" (*Hall*, at pp. 179-80). And, the integrity of the justice system will only be compromised where a "damage award in a civil suit would, in effect, allow a person to profit from illegal or wrongful conduct, or would permit an evasion or rebate of a penalty prescribed by the criminal law" (*Hall*, at p. 169; *Zastowny*, at para. 3).

99 Here, the only illegal or wrongful conduct was committed by Livent's directors, Drabinsky and Gottlieb, and portions of management. It follows that, for Deloitte to rely on the defence of illegality, it must be able to attribute the "illegal or wrongful conduct" of certain directors and managers to Livent itself, the plaintiff in this case.

100 The test for corporate attribution was set out by this Court in *R. v. McNamara*, (*sub nom. R. v. Canadian Dredge & Dock Co.*) [1985] 1 S.C.R. 662 (S.C.C.) [hereinafter *Canadian Dredge*]. To attribute the fraudulent acts of an employee to its corporate employer, two conditions must be met: (1) the wrongdoer must be the directing mind of the corporation; and (2) the wrongful actions of the directing mind must have been done within the scope of his or her authority; that is, his or her actions must be performed within the sector of corporate operation assigned to him. For the purposes of this analysis, an individual will cease to be a directing mind unless the action (1) was not totally in fraud of the corporation; and (2) was by design or result partly for the benefit of the corporation (pp. 681-82 and 712-13).

101 At first glance, these conditions might seem to be satisfied in this case. Drabinsky and Gottlieb were directing minds, acting within the sector of corporate operations assigned to them, whose fraud was genuinely designed and executed in an attempt to assist Livent through the artificial extension of its life. Indeed, the application of the doctrine in this case would be consistent with the factually analogous decision in *Hart Building Supplies Ltd. v. Deloitte & Touche*, 2004 BCSC 55, 41 C.C.L.T. (3d) 240 (B.C. S.C. [In Chambers]). There, the test laid down by this Court in *Canadian Dredge* was strictly applied in the context of a civil claim for auditor's negligence and was satisfied. The court attributed the fraudulent acts of the "alter ego and directing mind" to the auditor's corporate client and barred recovery for the auditor's negligent preparation of a statutory audit.

102 In our view, however, a strict application of this Court's decision in *Canadian Dredge* was not warranted in *Hart*, and is not warranted here. It must be recalled that *Canadian Dredge* was decided in the context of criminal liability. Accordingly, the underlying question there was who should bear the responsibility for the criminal actions of a corporation's directing mind. Consequently, the policy factors identified therein which weigh in favour of imputing a corporation with the illegality or wrongdoing of its directing mind flow from the "social purpose" of holding a corporation responsible for the *criminal* acts of its employees where those acts are designed and carried out, at least in part, to benefit the corporation (*Canadian Dredge*, at p. 704).

103 However, as Estey J. himself recognized, the doctrine is only one of "judicial necessity" and where its application "would not provide protection of any interest in the community" or "would not advantage society by advancing law and order", the rationale for its application "fades away" (*Canadian Dredge*, at pp. 707-8 and 718-19). While public policy and judicial necessity may favour imputing the corporation with the actions of its directing minds in certain criminal prosecutions, the same cannot be said of attributing the actions of a directing mind for the purposes of a civil suit in the context of an auditor's negligent preparation of a statutory audit. As indicated above, the very purpose of a statutory audit is to provide a means by which fraud and wrongdoing may be discovered. It follows that denying liability on the basis that an individual within the corporation has engaged in the very action that the auditor was enlisted to protect against would render the statutory audit meaningless (D. L. MacPherson, "*Emaciating the Statutory Audit — A Comment on Hart Building Supplies Ltd. v. Deloitte & Touche*" (2005), 41 *Can. Bus. L.J.* 471). As Livent submitted, it would be perverse to deny auditor's liability for negligently failing to detect fraud "where the harm [to the corporation] is likely to occur and likely to be most serious" (R.F., at para. 94).

104 While, therefore, this Court's decision in *Canadian Dredge* remains the authoritative test for the application of the corporate identification doctrine, we would reaffirm one qualification. The principles set out in *Canadian Dredge* provide a *sufficient* basis to find that the actions of a directing mind be attributed to a corporation, not a *necessary* one (pp. 681-82). As a principle that is grounded in policy, and which only serves as a means to hold a corporation criminally responsible or to deny civil liability, courts retain the discretion to refrain from applying it where, in the circumstances of the case, it would not be in the public interest to do so. And where, as here, its application would render meaningless the very purpose for which a duty of care was recognized, such application will rarely be in the public interest. If a professional undertakes to provide a service to

detect wrongdoing, the existence of that wrongdoing will not normally weigh in favour of barring civil liability for negligence through the corporate identification doctrine. (That said, we leave for another day the question of whether the same is true in the context of a "one man" corporation, where the sole director and shareholder hires the auditor to uncover the wrongful action which he, himself, carries out: *Stone & Rolls Ltd. v. Moore Stephens Ltd.*, [2009] UKHL 39, [2009] 1 A.C. 1391 (U.K. H.L.); see also *373409 Alberta Ltd. (Receiver of) v. Bank of Montreal*, 2002 SCC 81, [2002] 4 S.C.R. 312 (S.C.C.), at para. 22; *Jetivia SA v. Bilita (U.K.) Ltd. (In Liquidation)*, [2015] UKSC 23, [2016] A.C. 1 (U.K. S.C.), at para. 30.)

105 Finally, given the limited application of the defence of illegality, as recognized by this Court in *Hall* and *Zastowny*, we find no further compelling reason to justify the use of the corporate identification doctrine in these circumstances.

## *(2) Contributory Fault*

106 In the alternative, Deloitte submits that the Court of Appeal erred in holding Deloitte liable for the entirety of the proven loss, and specifically that Livent should have been found contributorily at fault in accordance with s. 3 of the *Negligence Act*, R.S.O. 1990, c. N.1:

In any action for damages that is founded upon the fault or negligence of the defendant if fault or negligence is found on the part of the plaintiff that contributed to the damages, the court shall apportion the damages in proportion to the degree of fault or negligence found against the parties respectively.

107 Again, the only conduct implicating Livent in this case was committed by Livent's directors, Drabinsky and Gottlieb, and portions of management. It follows that, for Deloitte to rely on the defence of contributory fault, it must be able to attribute the conduct of certain directors and managers to Livent itself.

108 Unlike the discretionary illegality doctrine, Deloitte notes that s. 3 of the *Negligence Act* is mandatory ("... the court *shall* apportion the damages ..."), and argues that corporate identification *must* be permitted because "the application of the corporate identification doctrine must be tailored to the terms of the particular substantive rule it serves" (A.F., at para. 132, citing C.A. reasons, at para. 157). This argument, however, misunderstands what the *Negligence Act* actually makes mandatory. The *Negligence Act* requires that a plaintiff's fault be factored into the apportionment of damages. But corporate identification is a prerequisite to the plaintiff, Livent, being at fault. In other words, Deloitte's claim that s. 3 of the *Negligence Act* requires that Livent bear its share of the fault presupposes corporate identification, in effect, putting the cart before the horse. The *Negligence Act* only makes contribution by a negligent plaintiff mandatory; it does not make attribution of negligence to a plaintiff mandatory.

109 In any event, we repeat our earlier conclusion that where, as here, the use of the corporate identification doctrine would undermine the very purpose of establishing a duty of care, it will rarely be in the public interest to apply it. A negligent auditor cannot limit liability for its own negligence by attributing to the corporation the wrongful acts of its employees, such acts being the very conduct that the auditor undertook to uncover. Additionally, had Deloitte sought to limit its liability through apportionment, it need not have relied on the doctrine of corporate identification at all. Specifically, Deloitte could have brought third party claims against the guilty parties, Drabinsky and Gottlieb, for their wrongful actions. For whatever reason, it chose not to do so. Nonetheless, the availability of a third party claim against a fraudulent director weighs against the application of the doctrine. In this case, it is not in the public interest to undermine separate legal personality where the wrongdoer could have been properly named as a third party.

## **D. Conclusion**

110 It follows from the foregoing that we would allow the appeal, but only in part.

111 In our view, the trial judge and Court of Appeal erred in finding that Deloitte's negligence in relation to the Press Release and Comfort Letter resulted in injuries that were reasonably foreseeable in light of the proximate relationship between the parties. At that time, Deloitte's services were engaged for the purpose of soliciting investment, not management oversight. As

Livent's losses did not flow from a failure to solicit investment, we would deny recovery for the increase in Livent's liquidation deficit beginning in the fall of 1997.

112 We would, however, allow recovery for the increase in Livent's liquidation deficit which followed the 1997 Audit. We agree with the trial judge that "Deloitte should not have signed off on the 1997 Audit in early April 1998" (para. 242) and that the increase in Livent's liquidation deficit which followed fell within the duty of care owed by Deloitte to Livent in relation to the preparation of a statutory audit, the express purpose of which was to assist Livent in management oversight.

113 The trial judge assessed Livent's damages following the 1997 Audit at \$53.9 million (para. 306, fn. 188, and para. 369, fn. 228). Applying the trial judge's 25 percent contingency reduction to this amount results in a final damages assessment of \$40,425,000. This is the amount for which Deloitte is liable.

114 Throughout these proceedings, the parties have primarily framed this dispute as one in negligence. Indeed, this was noted by the trial judge (at para. 47). At trial, Livent conceded that its losses for negligent performance of a service or breach of contract would be identical (*ibid.*). The trial judge agreed, finding that Livent's claim in contract "succeed[ed] ... for the [same] reasons" as its claim of negligent performance of a service and that the elements of its claim in contract were "incorporated by reference to the finding of 'negligence'" (para. 243). Given the above, we would impose the same quantum of liability on Deloitte for the concurrent claim in breach of contract.

115 Accordingly, the appeal is allowed in part. The amount of the trial award is reduced from \$84,750,000 to \$40,425,000. Livent shall have its costs throughout.

***McLachlin C.J.C. (dissenting in part) (Wagner, Côté JJ. concurring):***

116 Garth Drabinsky and Myron Gottlieb built a North American theatre empire that came to be known as Livent Inc. Seeking ever more spectacular success, they resorted to manipulating the company's financial records. When the scheme came to light, Livent collapsed. Its assets were liquidated. Drabinsky and Gottlieb went to jail.

117 This is among the many lawsuits that followed. The courts below held that Deloitte & Touche, a firm of accountants and Livent's auditor, breached the duty of care it owed to Livent in failing to detect and expose Livent's fraud, as a result of which Livent was able to continue operations and continue losing money — money it now claims from Deloitte.

118 I agree with the courts below that Deloitte owed a duty of care to Livent, which it breached when it failed to discover and expose Livent's fraud in the audited statements it prepared. However, I do not agree that Deloitte is liable for virtually all the loss that befell Livent as it pursued its precipitous decline into insolvency through doomed investments. I would allow the appeal.

**I. Facts**

119 The saga that led to these proceedings began in 1989 when two would-be entertainment moguls, Drabinsky and Gottlieb, launched a takeover bid of their employer, Cineplex Odeon Corporation. When the bid failed, the pair formed MyGar Partnership, which purchased all of the assets and some of the liabilities of Cineplex's live entertainment division. These included Toronto's Pantages Theatre and the rights to a wildly successful show, *The Phantom of the Opera*. MyGar carried on business through its nominee corporation, Live Entertainment Corporation of Canada Inc., and both entities were rolled into Live Entertainment of Canada Inc., or Livent Inc., in 1993. Livent made its debut in Canada's equity market with an initial public offering that year. By the end of 1995, Livent's shares were also listed on New York's NASDAQ exchange.

120 Deloitte & Touche (now Deloitte LLP) became MyGar's auditor in 1989 and continued as auditors for MyGar and its successor Livent until 1998.

121 Livent's strategy was vertical integration. Unlike other players in the live entertainment industry, it brought the entire enterprise, from production to performance, under one roof — a roof that Livent, as a proprietor of theatre properties, also owned. This was an immensely costly and risky undertaking. Livent invested in real estate in Toronto, Vancouver, New York,

and Chicago. It produced and presented a string of spectacular (and therefore expensive) musicals. When its shows succeeded, Livent reaped all the rewards. When they did not, it bore the losses alone.

122 Drabinsky and Gottlieb were determined to prove that their business model worked. To be sure it did, they and their associates cooked the books. They did so in four ways:

- i. Drabinsky and Gottlieb pocketed some \$7.5 million in kickbacks in the two years before Livent's initial public offering. These they secured by causing MyGar to pay false or inflated invoices to various contractors, who in turn directed funds to Drabinsky and Gottlieb personally or to another company they controlled. A substantial portion of the falsified expenses were booked as assets. Drabinsky and Gottlieb's balance sheets were thus infused with fantasy as early as 1991.
- ii. Livent officers and employees distorted the company's financial records by shifting expenses between accounting periods and from one activity or production to another. They doctored Livent's accounting software to permit and conceal these manipulations.
- iii. Livent overstated its bottom line by extending the time over which it amortized the costs of putting on its productions and, in some periods, by avoiding amortization altogether. This it did by transferring millions of dollars of "pre-production costs" from shows to fixed assets or from one show to another, and particularly to shows that had not yet opened.
- iv. The company recorded imaginary revenue by entering into loan or financing agreements that it camouflaged as asset sales. Livent purported to sell various rights related to its productions and properties, but simultaneously entered into secret side agreements permitting purchasers to recover what they had paid. The revenue booked from such transactions ran well into the millions of dollars.

123 Livent not only misled the markets, it also fooled its auditor. Deloitte never uncovered the company's schemes. Livent continued to raise investment capital and reinvest it in unprofitable theatre enterprises. Deloitte's auditors report for Livent's Fiscal Year 1997 did not disclose the fraud and, although Deloitte objected when Gottlieb presented a misleading quarterly financial statement to the Audit Committee in August 1997, it did not resign.

124 The truth came to light in 1998. New equity investors appointed new management, who discovered "irregularities". Deloitte retracted its audit opinions for 1996 and 1997. A subsequent investigation and re-audit resulted in restated financial reports. Drabinsky and Gottlieb were suspended, fired, and convicted of fraud.

125 Livent filed for insolvency protection in both Canada and the United States in November 1998 and sold its assets in August 1999. It went into receivership the following month. The trial judge found that Livent lost \$113,000,000 between the time of Deloitte's negligent failure to end its relationship with Livent and Livent's insolvency. He reduced that amount by 25 percent for contingencies and awarded \$84,750,000 in damages. Livent seeks to recover this loss from Deloitte.

## **II. Judicial History**

126 Livent sued Deloitte for \$450,000,000 and other relief. It advanced concurrent claims in tort and contract; the parties agreed that the damages under either head would be the same. Livent claimed that Deloitte was responsible for every dollar Livent lost from the date of Deloitte's breach of duty. Deloitte's defence was that most of the losses claimed were beyond the scope of Deloitte's legal responsibility. The courts below largely sided with Livent.

### **A. Ontario Superior Court of Justice (Commercial List) (*Gans J.*, 2014 ONSC 2176, 11 C.B.R. (6th) 12 (Ont. S.C.J. [Commercial List])**

127 The trial judge held that Deloitte owed a duty of care to provide accurate information to Livent's shareholders. He held that the standard of care under this duty required Deloitte to take steps that would have effectively cut off Livent's access to the capital markets and forced it into formal insolvency as early as 14 months before it ultimately filed for insolvency protection. The trial judge concluded that Deloitte failed to meet this standard of care, either when it failed to discover the fraud and act on that discovery in August 1997, or when it signed off on Livent's 1997 financial statements in April 1998.

128 The trial judge held that the measure of damages was the difference between Livent's value when the breach occurred, and Livent's value at the time of insolvency (\$113,000,000). He reduced this by 25 percent to account for "contingencies" or "trading losses" sustained as a result of Livent's "unprofitable but legitimate theatre business" (paras. 324-26), which he held were too remote to make Deloitte liable.

129 The trial judge also rejected Deloitte's submission that Livent's recovery should be either barred by the defence of illegality, or reduced on account of contributory fault pursuant to s. 3 of the *Negligence Act*, R.S.O. 1990, c. N.1.

130 The trial judge consequently awarded damages to Livent for breach of its duty of care, and alternatively for breach of contract, in the amount of \$84,750,000.

***B. Court of Appeal for Ontario (Strathy C.J. and Blair and Lauwers J.J.A.), 2016 ONCA 11, 128 O.R. (3d) 225 (Ont. C.A.)***

131 The Court of Appeal upheld the trial judge's award and dismissed both the appeal and cross-appeal.

**III. Analysis**

132 The only issue on this appeal is whether Deloitte is liable for the lion's share of the loss Livent sustained after it failed to detect the fraud of the company's principals and report it in its audit statements (the total loss less a 25% discount for contingencies and Livent's improvident investments). Livent claims that if Deloitte had reported the fraud when it should have, it would have been put out of business, which would have saved it from the loss that it suffered thereafter. Instead, it was able to continue to raise more capital and spend it in ways that decreased Livent's net worth. Deloitte argues that it is not liable for the full extent of Livent's pre-liquidation loss because this loss falls outside the scope of Deloitte's duty of care, or is too "remote" from the legal cause.

133 The law of negligent misstatement has limited recovery of pure economic (financial) loss for two reasons. The first reason is that it may be unfair to hold a person who makes a negligent misstatement liable for all loss incurred thereafter, where other decisions and acts contributed to that loss. This is referred to as the fair allocation of loss principle. The second reason is to avoid the spectre of indeterminate liability, which the law of negligence has never countenanced.

134 These two reasons — one of principle and the other of policy — are complementary. They work together to ensure fair outcomes and promote predictability in the law.

135 As Lord Bridge observed in *Caparo Industries plc v. Dickman*, [1990] 1 All E.R. 568 (U.K. H.L.), at p. 576:

To hold the maker of the statement to be under a duty of care in respect of the accuracy of the statement to all and sundry for any purpose for which they may choose to rely on it is not only to subject him, in the classic words of Cardozo C.J., to "liability in an indeterminate amount for an indeterminate time to an indeterminate class" ([*Ultramare Corp. v. Touche*, 174 N.E. 441 (N.Y. 1931), at p. 444]), it is also to confer on the world at large a quite unwarranted entitlement to appropriate for their own purposes the benefit of the expert knowledge or professional expertise attributed to the maker of the statement.

See also *D'Amato v. Badger*, [1996] 2 S.C.R. 1071 (S.C.C.), at para. 18; *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.), at para. 31; *Canadian National Railway v. Norsk Pacific Steamship Co.*, [1992] 1 S.C.R. 1021 (S.C.C.), at p. 1137, per McLachlin J.; *Knight v. Imperial Tobacco Canada Ltd.*, 2011 SCC 42, [2011] 3 S.C.R. 45 (S.C.C.), at para. 99, quoting *Cooper v. Hobart*, 2001 SCC 79, [2001] 3 S.C.R. 537 (S.C.C.), at para. 54.

136 For these reasons, common law courts have rejected a simple "but for" test for recovery of economic loss for negligent misstatement: *BG Checo International Ltd. v. British Columbia Hydro & Power Authority*, [1993] 1 S.C.R. 12 (S.C.C.), at p. 44; *Banque Bruxelles Lambert S.A. v. Eagle Star Insurance Co.*, (*sub nom. South Australia Asset Management Corp. v. York Montague Ltd.*) [1996] 3 All E.R. 365 (U.K. H.L.) ("SAAMCO"), at pp. 369-72, per Lord Hoffmann; *Hughes-Holland v. BPE Solicitors*, [2017] UKSC 21, [2017] 2 W.L.R. 1029 (U.K. S.C.), at para. 38, per Lord Sumption; *Hogarth v. Rocky Mountain Slate Inc.*, 2013 ABCA 57, 542 A.R. 289 (Alta. C.A.), at paras. 37-38, per Slatter J.A.

137 A "but for" test, which asks only whether the loss would not have been incurred if the wrongful act had not been committed, casts the net of liability too widely. It would make auditors or advisors retained for limited purposes the insurers of the entire venture and all that flows from it. It would not matter that the loss would not have occurred but for other decisions (like Livent's ill-judged investment decisions in this case). Nor would it matter that the loss was the result of a complex web of decision making, months and years after the negligent misstatement was produced. All that would be required to recover all subsequent loss from the auditors would be to show that their misstatement played a role in launching the saga of subsequent loss. This is not fair; a person giving advice for one purpose should not be held liable for how other people use that information for other purposes, or be made to carry the entire loss. And, it would lead to indeterminate liability. An auditor giving advice would never know what its exposure might be, or whether its fee is adequate to cover the risk to which it exposes itself.

138 Rejection of a "but for" test for assessing recovery of economic loss is cemented in the common law. But it is worth noting that Quebec civil law also recognizes the need to limit recovery of economic loss to losses that bear a sufficient connection to the wrongful feature of the defendant's conduct: see *Widdrington Estate c. Wightman*, 2013 QCCA 1187 (C.A. Que.), at paras. 229-31 and 243-46 (CanLII); see also D. Jutras, "[Civil Law and Pure Economic Loss: What Are We Missing?](#)" (1987), 12 *Can. Bus. L.J.* 295, at pp. 308-9.

139 Courts have given two doctrinal explanations for limiting recovery of economic loss following from a negligent misstatement. The first is to say that the *scope of the duty of care* of the advice-giver does not cover the loss claimed. The second is to say that the loss is *too remote* from the negligent act and thus was not legally caused by that act.

140 While lawyers may argue over which approach is preferable, the fact once again is that they are complementary — two sides of the same coin. In fact, the inquiry into the duty of care and the inquiry into remoteness invoke similar considerations.

141 The "scope of the duty of care" inquiry looks to the relationship between the defendant's advice and the plaintiff's loss. It asks if that relationship was "proximate". In cases of economic loss, it inquires into the purpose for which the advice was given and asks whether a reasonable person would have expected, or "foreseen", that negligent advice would lead to the loss in question by virtue of the plaintiff's reliance on the advice: *Hercules*, at paras. 24 and 41. Put simply: Did the loss flow from the advice, or from subsequent decisions and circumstances? Thus in *Caparo Industries plc*, at p. 581, Lord Bridge confirmed that the scope of the tort determines the extent of the remedy to which the injured party is entitled. See also *Platform Home Loans Ltd. v. Oyston Shipways Ltd.*, [1999] 1 All E.R. 833 (Eng. H.L.), at p. 847, per Lord Hobhouse.

142 The "remoteness" approach looks at similar factors to the "scope of the duty of care" approach — all pointing to the wrongdoing and its proximity to the loss claimed. The factors to be considered are not closed. The advice-giver's knowledge of the claimant's circumstances, the reasonable expectations arising from the relationship, and the presence of intervening factors that led to the loss may figure in the analysis: *Mustapha v. Culligan of Canada Ltd.*, 2008 SCC 27, [2008] 2 S.C.R. 114 (S.C.C.), at paras. 12 and 14-16; *Vytlilingam (Litigation Guardian of) v. Farmer*, 2007 SCC 46, [2007] 3 S.C.R. 373 (S.C.C.), at para. 31; *Rossy c. Westmount (Ville)*, 2012 SCC 30, [2012] 2 S.C.R. 136 (S.C.C.), at para. 48.

143 I agree with Lord Sumption's observation in *BPE Solicitors*, a recent decision from the United Kingdom Supreme Court, that however one looks at the matter — from the perspective of the scope of the duty of care or from the perspective of remoteness — one arrives at the same point. In his Lordship's words, "[w]hether one describes the principle ... as turning on the scope of the duty or the extent of the liability for breach of it does not alter the way in which the principle applies": para. 38; see also L. N. Klar and C.S.G. Jefferies, *Tort Law* (6th ed. 2017), at pp. 565-66.

144 For the purposes of these reasons, I will first consider whether the losses at issue fall within the scope of Deloitte's duty of care. This inquiry takes us to the two-part analysis for determining the existence of a duty of care and its scope prescribed in *Anns v. Merton London Borough Council*, [1977] 2 All E.R. 492 (U.K. H.L.) — does the relationship between the parties give rise to a *prima facie* duty of care to avoid the type of loss claimed, and, if so, is that duty negated by policy considerations?

145 Courts in the United Kingdom have resiled from a two-step *Anns* test, but continue to insist that the scope of the duty of care must be carefully limited having regard to the relationship between the defendant's conduct and the plaintiff's injuries,

context and policy. They have insisted that there is no such thing as a duty of care in the abstract; the duty is always defined by its scope. As Lord Bridge stated in *Caparo Industries plc*, at p. 581, "[i]t is never sufficient to ask simply whether A owes B a duty of care. It is always necessary to determine the scope of the duty by reference to the kind of damage from which A must take care to save B harmless": see also *BPE Solicitors*, at paras. 21-23; *Sutherland Shire Council v. Heyman (1985)*, 60 A.L.R. 1 (Australia H.C.), at p. 40, per Brennan J.; *Platform Home Loans Ltd.*, at p. 847, per Lord Hobhouse, quoting *Overseas Tankship (U.K.) Ltd. v. Morts Dock & Engineering Co.*, [1961] A.C. 388 (New South Wales P.C.) ("The Wagon Mound No. 1") at p. 425; *Candler v. Crane, Christmas & Co.*, [1951] 1 All E.R. 426 (Eng. C.A.), at p. 436, per Denning L.J., dissenting.

146 The first step of the *Anns* test asks whether there is proximity, or a sufficiently close relationship, between the parties. It focuses on the connection between the defendant's undertaking (the breach of which is the wrongful act) and the loss claimed. Did the defendant owe the plaintiff a *prima facie* duty of care to prevent the loss, having regard to, on one hand, the reasonably foreseeable consequences of the defendant's conduct given the proximity of the parties and, on the other hand, factors concerning the relationship between the parties that negate tort liability? (see *Cooper*, at paras. 30 and 34). Questions of policy relating to the relationship between the parties should be considered at this step of the *Anns* analysis: *Cooper*, at para. 37.

147 The purpose for which the statement was made (the undertaking) is pivotal in determining whether a particular type of economic loss was the reasonably foreseeable consequence of the negligence: *Hercules*, at paras. 37-40. Was it made to enable the company to raise capital? If so, a loss due to failure to raise capital may be recoverable. Was it made for the purpose of permitting shareholders to review the management of the company? If so, shareholders may recover for loss due to their inability to hold the company to account: *Hercules*, at paras. 51-57. In each case, one must determine the purpose for which the statement was made, and ask whether the loss in question is proximate, or closely connected to the failure of the defendant to fulfill that purpose.

148 Where an auditor falsely or wrongfully represents that the audit statements are sound and can therefore be used for their intended purpose, this constitutes negligence, or wrongdoing. Economic loss tied to that particular wrongdoing is recoverable; other loss is not. Whether in the United Kingdom, Quebec or the common law provinces of Canada, courts focus on the precise nature of the wrongdoing to determine what loss is recoverable. As Lord Sumption explained in *BPE Solicitors*, to be a reasonably foreseeable consequence of the defendant's wrongdoing, the economic loss claimed must have "flowed from the right thing, i.e. from the particular feature of the defendant's conduct which made it wrongful": para. 38. Or as Lord Hoffmann said in *SAAMCO*, at p. 371:

Normally the law limits liability to those consequences which are attributable to that which made the act wrongful. In the case of liability in negligence for providing inaccurate information, this would mean liability for the consequences of the information being inaccurate.

See also: *Burns v. Homer Street Development Limited Partnership*, 2016 BCCA 371, 91 B.C.L.R. (5th) 383 (B.C. C.A.), at para. 106; *Hogarth*, at paras. 37-38, per Slatter J.A.

149 Lord Sumption pointed out in *BPE Solicitors*, at para. 44, that the scope of the duty of care and the extent of the defendant's responsibility turns on the specific circumstances that inform the purpose for which the statement was prepared:

A valuer or a conveyancer, for example, will rarely supply more than a specific part of the material on which his client's decision is based. He is generally no more than a provider of what Lord Hoffmann [in *SAAMCO*] called "information". At the opposite end of the spectrum, an investment adviser advising a client whether to buy a particular stock, or a financial adviser advising whether to invest self-invested pension fund in an annuity are likely, in Lord Hoffmann's terminology, to be regarded as giving "advice". Between these extremes, every case is likely to depend on the range of matters for which the defendant assumed responsibility and no more exact rule can be stated.

See also *Aneco Reinsurance Underwriting Ltd. v. Johnson & Higgins Ltd.*, [2001] UKHL 51, [2001] All E.R. (Comm) 929 (U.K. H.L.), at paras. 40-41, per Lord Steyn, and para. 66, per Lord Millett; *Canadian Imperial Bank of Commerce v. Deloitte*

& Touche, 2016 ONCA 922, 133 O.R. (3d) 561 (Ont. C.A.), at paras. 46-47 and 69-71; *Temseel Holdings Ltd. v. Beaumonts Chartered Accountants*, [2002] EWHC 2642, [2003] P.N.L.R. 27 (Eng. Comm. Ct.), at paras. 22-29 and 57-62.

150 The purpose for which the audit report is provided is a matter of fact based on the evidence adduced at trial: *BPE Solicitors*, at para. 44; *Aneco Reinsurance Underwriting Ltd.*, at paras. 40-41, per Lord Steyn, and para. 66, per Lord Millett; *Canadian Imperial Bank of Commerce*, at para. 47; *Temseel Holdings Ltd.*, at paras. 57-62. Legal obligations imposed by statute may be relevant: *Hercules*, at para. 49.

151 Against this background, I turn to the question at hand: What was the scope of the duty of care owed by Deloitte to Livent? The key to answering this question is the purpose for which Deloitte prepared the statements, which in turn defines the wrongful act — the negligent failure to provide the correct information for the intended purpose.

152 In this case, three purposes of Livent's audit statements are discernable: (1) to report accurately on Livent's finances and provide it with audit opinions on which it could rely for the purpose of attracting investment; (2) to uncover heretofore undetected errors or wrongdoing by Livent or its personnel for the purpose of enabling Livent itself to correct or otherwise respond to the misfeasance; and (3) to provide audit reports on which Livent's shareholders could rely to supervise the company's management (see e.g. Part XII, *Business Corporations Act*, R.S.O. 1990, c. B.16; trial reasons, at paras. 89-96 and 280). Livent was entitled to recover for losses occasioned by its own or its shareholders' reliance on Deloitte's audit work for these purposes.

153 The scope of Deloitte's duty of care is defined solely by these purposes. Did its negligence prevent Livent from attracting investment? Did its negligence prevent Livent from uncovering undetected wrongdoing for the purpose of allowing Livent to correct the misfeasance? Finally, did its negligence prevent shareholders from supervising the company's management? Loss that results from inability to attract investment, from inability of Livent to correct undetected wrongdoing, or from inability of the shareholders to exercise their supervisory authority, may fall within the scope of Deloitte's duty of care.

154 The first possibility is that Deloitte's wrongful act deprived Livent of the ability to attract investment capital. Livent does not rely on this; in fact, Livent attracted a great deal of capital on the strength of Deloitte's statements. Indeed, that is the essence of its complaint — if it had not been able to attract this money, it would not have been able to spend it on new theatre ventures that failed and decreased Livent's worth. The company's assets were not diminished by an inability to attract investment, but by Livent's improvident management of those investments, revealed only on insolvency.

155 The second possibility is that the wrongful act prevented Livent — the company itself — from detecting misfeasance in the company's management which Livent's officials would have corrected if they had known the true state of affairs. This possibility envisions the situation where a company's management, acting honestly and diligently, is unable to deal with internal misfeasance because the auditors negligently failed to reveal it.

156 This is not Livent's situation. Livent led no evidence that its management did not know of Drabinsky's and Gottlieb's misfeasance; indeed, it likely could not have done so. Drabinsky and Gottlieb, the fraudsters, were themselves the management. Far from relying on the audited statements as assurance that everything was well with the company, Drabinsky and Gottlieb knew the audit reports were inaccurate. There is no evidence that anyone at a lower level of Livent management would have blown the whistle if Livent's statements had revealed the fraud at an earlier date.

157 The third possibility is that Deloitte's wrongdoing prevented Livent's shareholders from exercising shareholder supervision in a manner that would have ended the corporation's loss-creating activities at an earlier date. Livent argues (and my colleagues Gascon and Brown JJ. accept) that it relied on Deloitte to produce a report on the basis of which its shareholders could discharge their supervisory function, which all agree was one of the purposes for which the audited statements were prepared. Livent argues, and my colleagues conclude, that all loss that shareholder supervision might have avoided is recoverable — including the decline in the value of the company.

158 This proposition faces two difficulties. The first is that Livent never proved, nor did the trial judge find, the elements necessary to establish it. The second is a related policy concern: to allow recovery in the absence of the required proof would be to open the door to indeterminate recovery. I will consider each of these difficulties in turn.

159 First, although the trial judge's reasons refer to Deloitte's duty to Livent's shareholders as established in *Hercules*, the factual basis for liability based on impaired shareholder supervision was lacking. Livent's theory of the case was simply that all loss as a result of improvident investments after the negligent audits was compensable, on a "but for" basis. Livent did not prove and the trial judge did not find that Livent's shareholders relied on Deloitte's negligent audit statements, or that had they received and relied on accurate statements, they would have acted in a way that would have prevented Livent from carrying on business and diminishing its assets in the period between the issuance of the relevant statements and Livent's insolvency.

160 The trial judge, accepting Livent's theory of the case, held that the duty of care must be broad enough to catch all losses that would be captured by a "but for" test. He stated the following:

In my view, the ultimate issuance or withholding of a clean opinion is but one aspect of conducting an audit in accordance with [generally accepted auditing standards]. It is not close to being the complete embodiment of the duty of care. Indeed, if [the plaintiff's] argument were accepted, it would preclude the applicability of the "but for" test. Instead of asking whether damages would have been sustained but for the negligent failure to detect certain errors or fraud, one would be restricted to asking whether or not damages would have been sustained but for the provision of a clean opinion.

[Emphasis added; para. 285.]

161 The broad view of the duty of care taken by Livent, and accepted by the trial judge meant that the trial judge failed to consider the parameters of the shareholders' reasonable and foreseeable reliance as required in *Hercules* when defining the scope of the duty of care with respect to losses stemming from impaired shareholder supervision. My colleagues conclude otherwise, noting that the trial judge believed that the shareholders were entitled to rely on Deloitte's negligent audits as an indication of Livent's health. Crucially, however, the trial judge did not ask whether the shareholders had in fact relied on the audits — a critical element to the cause of action. He did not ask whether, if they had relied, this reliance prevented them from taking steps to replace directors or officers or otherwise alter course. He did not ask whether this would have included shutting down Livent on March 31st, 1998 (or at least earlier than when it was shut down in November 1998). Finally, he did not ask whether these actions, had they been taken, would have prevented the losses that Livent built up during the seven-month period in question. If the trial judge had asked these questions, he would have been obliged to answer them in the negative, since Livent offered no proof to support affirmative answers.

162 I leave aside for the purposes of this case the difficulty that the shareholders, unlike in *Hercules*, are not parties to the claim or the action. Assuming this would not pose a problem, it is possible to speculate that the necessary facts could have been proven (although given the short time period, it seems unlikely). But the more fundamental point is that Livent did not prove these matters, and that as a result, the factual basis for establishing loss on the basis of shareholder supervision was entirely lacking. The hypothetical chain of events required to establish liability on this ground completely bypasses the complexity of shareholder decision making.

163 Livent's position and the trial judge's approach collapse the distinction between shareholder decision making, for which an auditor provides information for one purpose — holding management accountable with a view to the best interest of the company — with management decision making, for which the auditor provides information for a different purpose — responding to error and wrongdoing. Conceiving liability in this way creates a misalignment between the scope of the duty of care, the type of loss that is therein contemplated, and the actual elements that must be proven in order to make a successful claim.

164 The second and related difficulty the shareholder supervision argument faces in this case is that it would lead to unfair allocation of loss and indeterminate liability for auditors' statements, negating the duty of care: *Hercules*, at paras. 36-37.

165 Livent's position — that Deloitte is liable for all loss without proof of the elements required to advance a case based on impaired shareholder supervision — would result in an unfair allocation of loss as well as indeterminacy of damages. On the shareholder supervision theory advanced by Livent, breach of a duty owed primarily to the collectivity of shareholders (who do not advance a claim) and only derivatively to the corporation, would result in liability for every dollar that Livent spent after the point in time the shareholders became entitled to rely on the statements. The auditor would be the virtual guarantor of

everything Livent — not the collectivity of shareholders to which the duty was owed — did thereafter. This would not be a fair allocation of responsibility. The same scenario would raise the spectre of indeterminate liability. Auditors would be unable to reasonably predict when they are providing services to clients what their ultimate liability would be. It would be out of their control. No matter how bad the decisions made by the client thereafter, no matter how complex the web of dealings that led to the ultimate loss — things that cannot be foreseen in advance — the auditor would be liable for the total loss, on the basis that it would not have occurred "but for" the negligent act.

166 For the foregoing reasons, I conclude that the losses at issue have not been shown to fall within the scope of Deloitte's duty of care. The first step of the *Anns* test is not established. It is unnecessary to go on to ask whether *prima facie* liability is negated by policy considerations unrelated to the relationship between the parties. However, were it necessary to do so, the policy considerations of unfair allocation of loss and indeterminacy would preclude imposing liability on Deloitte.

167 I add a doctrinal side-note at this point. In *Hercules*, this Court, per La Forest J., held that the spectre of indeterminate loss might be a policy consideration negating liability of certain loss at the second step of the *Anns* test. However, since *Cooper* it has been clear that policy considerations relating to the relationship between the parties fall to be considered at the first step of *Anns*. It may not therefore be necessary to resort to the second step to consider the implications of indeterminate liability: see J. Blom, "Do We Really Need the *Anns* Test for Duty of Care in Negligence?" (2016), 53 *Alta. L. Rev.* 895, at pp. 906 and 908.

168 It remains for future cases to explore the limits of an auditor's liability for impaired shareholder supervision. Short of finding that an auditor who provides information on which shareholders will exercise their oversight powers assumes responsibility for all of the potential consequences of carrying on business, the facts as found by the trial judge do not enable us to do so here.

169 Livent's failure to prove that any of the loss it suffered can be attributed to its shareholders' reliance on the negligent 1997 year-end audit report for the purpose of corporate oversight is a sufficient basis on which to allow the appeal in its entirety. But there is further problematic aspect of the shareholder supervision theory on which Livent now seeks to rely. It is one of principle.

170 As explained above, an auditor that provides a year-end report for the purpose of enabling a company's shareholders to supervise management does not, absent proof, assume responsibility for what the shareholders decide to do with that information. The purpose of an annual audit report is to inform shareholder decision making, not to govern it. The auditor does not underwrite the entire risk associated with the shareholders' exercise of business judgment; it is liable only for exposing shareholders to the risk of the information it has provided being wrong. Even if the whole loss would have been avoided if the auditor had met the standard of care, the company may recover in damages only that part of the loss that may be attributed to the auditor's breach of its duty of care, which is restricted by the purpose or purposes for which it provided its opinion. The auditor is not liable for the indeterminate quantum of loss that the shareholders' course of action (or inaction) may trigger, since determining that course of action is beyond the auditor's undertaking of responsibility, and thus outside the scope of its duty of care. Similarly, loss that cannot be attributed to the auditor's breach will be too remote to recover.

171 For this reason, the language of lost opportunity is unavailing. In any case concerned with the tortious provision of information, the plaintiff may claim that, had it only known the truth, it would have had the chance to make different choices than it ultimately did. Unless the provider of information has assumed responsibility not only for the information but also for the decision to be informed by it, what the plaintiff would have done differently if it had been provided with different information is immaterial. Rather, the question is the extent to which the loss that in fact resulted may be attributed to the wrongness (i.e., the tortious quality) of the information provided.

172 On the trial judge's findings, Deloitte never assumed responsibility for any of the decisions — whether of Livent's management or of its shareholders collectively — that may be said to have occasioned Livent's loss. What Livent proved is that it relied on Deloitte's clean opinions to raise funds from third parties, and that it was successful in doing so. Deloitte is not liable to Livent for loss arising from Livent's use of these funds, even if certain of Deloitte's opinions were prepared for the purpose of *attracting* them, because Livent did not prove that Deloitte undertook responsibility for how Livent *spent* them.

173 The foregoing analysis is based on the scope of Deloitte's duty of care. The same result would follow on a remoteness approach to the question of liability for economic loss as a result of negligent misstatement. The question on this approach is whether the loss claimed is too remote from the wrongful act for the act to be the "legal cause" of the loss. The basic question is whether the loss is reasonably foreseeable, having regard to a variety of factors, including the relationship between the parties and the expectations that flow from it, the circumstances of the case, and other factors bearing on the connection between the wrongful act and the loss claimed including external or intervening influences. In the end, a close and proximate connection between wrongful act and the loss claimed must be established, having regard to all these things and to the purpose for which the information was furnished.

174 It follows that Livent cannot recover the losses it claims against Deloitte. The claim in tort must be dismissed. The result is the same with respect to Livent's action in contract; here too the losses would be too remote: see *Hofstrand Farms Ltd. v. British Columbia*, [1986] 1 S.C.R. 228 (S.C.C.), at pp. 243-44, citing *Baud Corp., N.V. v. Brook* (1978), [1979] 1 S.C.R. 633 (S.C.C.); S. M. Waddams, *The Law of Damages* (5th ed. 2012), at §14.720. Given the trial judge's determination, at para. 243, that the elements of the action in contract were identical to the elements of the action in tort, it follows that the trial judge's conclusion that there was a breach in contract is erroneous.

175 Although in many respects I agree with Gascon and Brown JJ.'s articulation of the general framework that governs this matter, I part company with my colleagues in two key respects. First, I take the view that, for Livent to make out its claim, it must prove on the evidence the elements required to establish Deloitte's liability on the basis of impaired shareholder supervision. My colleagues suggest that, had Deloitte provided sound audit reports, Livent's shareholders and management may have made decisions that would have limited the company's losses. While this may be true, it is not enough to rely on unproven assertions to define the scope of the duty of care and to subsequently demonstrate causation. My colleagues' approach suggests that an auditor will generally become the underwriter for any losses suffered by a client following a negligent audit report. This, notwithstanding subsequent decisions — reliant or capricious — made by the client's shareholders. I conclude, in contrast, that reliance cannot be presumed, but must be proved.

176 Second, I take a different view of indeterminate liability than my colleagues. They assert that liability is not indeterminate where a reviewing court can set a value or time frame for a plaintiff's claimed loss *ex post facto*. However, the common law's policy against indeterminacy is directed at ensuring that auditors and other advisors can determine the scope of their liability at the time they take on an engagement and render their services. The question is whether an auditor or other advisor was able to gauge the scale of its potential liability — in terms of the types of losses for which it undertook responsibility — before embarking on a course of conduct. Although Deloitte might have been in a position to identify the total net value of Livent, Livent has not proved that Deloitte bore responsibility for the myriad ways that Livent could have gone about depleting its value after receiving the auditor's statements. This is what makes the liability identified by my colleagues indeterminate and therefore outside the scope of the duty of care.

177 Having concluded that Deloitte is not liable for the losses claimed, it is not necessary to consider the apportionment of damages under s. 3 of the *Negligence Act*, nor is it necessary to consider whether Deloitte can raise the defence of illegality against Livent.

#### **IV. Disposition**

178 I would allow the appeal, with costs to Deloitte.

*Appeal allowed in part.*

*Pourvoi accueilli en partie.*

Civil practice and procedure --- Pleadings — Statement of claim — Striking out for absence of reasonable cause of action —

Plain and obvious

Plaintiffs purchased units in A Inc.'s unincorporated mutual fund that only owned shares of packaged ice producer A Inc. — Fund's public disclosures between 2002 and 2008 claimed competitiveness of ice industry and lawful conduct by fund and A Inc. — Fund units lost significant value in 2008 during U.S. investigation that led to A Inc.'s 2009 guilty plea to anti-competitive conspiracy — Plaintiffs brought class action against fund, A Inc. and certain officers, directors, or trustees of A Inc. or fund — Defendants brought motion to strike portions of statement of claim; plaintiffs brought motions for leave to pursue secondary market misrepresentations and for certification of action — Defendants' motion granted in part; plaintiffs' motions granted — Common law causes of action pleaded against fund would be struck, as it lacked legal personality, but plaintiffs had claim under s. 130 of Ontario Securities Act against fund as "issuer" of misrepresentative prospectus — Lack of details in pleading of anti-trust conspiracy did not warrant its striking but rather demand for particulars — Plaintiffs granted leave to amend statement of claim to plead provisions of securities acts of other provinces, and to comply with limitation period in s. 138.14(b)(ii) of Act — Act's requirement of material disclosure in prospectus informed and did not replace common law duty of care, and s. 130 of Act did not subsume common law claims — It was not plain and obvious that pleading of negligence or negligent misrepresentation against directors of A Inc. and trustees of fund would fail, and those claims raised separate causes of action.

Securities --- Trading in securities — Prospectus — Misrepresentation

Plaintiffs purchased units in A Inc.'s unincorporated mutual fund that only owned shares of packaged ice producer A Inc. — Fund's public disclosures between 2002 and 2008 claimed competitiveness of ice industry and lawful conduct by fund and A Inc. — Fund units lost significant value in 2008 during U.S. investigation that led to A Inc.'s 2009 guilty plea to anti-competitive conspiracy — Plaintiffs brought class action against fund, A Inc. and certain officers, directors, or trustees of A Inc. or fund — Defendants brought motion to strike portions of statement of claim; plaintiffs brought motions for leave to pursue secondary market misrepresentations and for certification of action — Defendants' motion granted in part; plaintiffs' motions granted — Plaintiff met leave test under s. 138.8 of Securities Act for pursuing claim for misrepresentation in secondary market — Plaintiffs could rely on disclosure documents from 2002, when Part XXIII.1 of Act was not in force, as alleged misrepresentations repeated from that date formed one continuing fact situation — Plaintiffs had good faith intentions in seeking leave, given financial interest, intent to hold defendants accountable and deter others, and sufficient objective evidence of defendants' possible liability — As "promoter", A Inc. was "influential person" under s. 138.3(1)(d) who knowingly influenced release of impugned documents — Plaintiffs established reasonable chance of successfully proving liability of A Inc., of actual or de facto officers or directors M, B, J, L and C and, as "influential persons", of each defendant trustee of fund — Plaintiffs established reasonable possibility that defendants were aware of anti-competitive conduct.

Torts --- Negligence — Duty and standard of care — Duty of care

Plaintiffs purchased units in A Inc.'s unincorporated mutual fund that only owned shares of packaged ice producer A Inc. — Fund's public disclosures between 2002 and 2008 claimed competitiveness of ice industry and lawful conduct by fund and A Inc. — Fund units lost significant value in 2008 during U.S. investigation that led to A Inc.'s 2009 guilty plea to anti-competitive conspiracy — Plaintiffs brought class action against fund, A Inc. and certain officers, directors, or trustees of A Inc. or fund — Defendants brought motion to strike certain portions of statement of claim; plaintiffs brought motions for leave to pursue

secondary market misrepresentations and for certification of action — Defendants' motion granted in part; plaintiffs' motions granted — Defendants' claim that imposing common law duty of care would create requirements beyond those codified in Securities Act should be left to trial, as plaintiffs made out *prima facie* duty of care to secondary market outside Ontario — Defendant argued that recognizing *prima facie* duty of care to entire secondary market raised spectre of indeterminate liability — Defendants knew class of persons who would rely on continuous disclosure documents that defendants prepared to attract investments from members of investing public — Act's remedy did not negate duty of care — It was not plain and obvious that proposed common law duty of care would create insurance scheme for short-term unit-holders or have negative chilling effect on business sector — Harmonization with laws of foreign jurisdiction could not trump well-settled Canadian principles for evaluating existence of common law duty of care.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiffs purchased units in A Inc.'s unincorporated mutual fund that only owned shares of packaged ice producer A Inc. — Fund's public disclosures between 2002 and 2008 claimed competitiveness of ice industry and lawful conduct by fund and A Inc. — Fund units lost significant value in 2008 during U.S. investigation that led to A Inc.'s 2009 guilty plea to anti-competitive conspiracy — Plaintiffs brought class action against fund, A Inc. and certain officers, directors, or trustees of A Inc. or fund — Defendants brought motion to strike certain portions of statement of claim; plaintiffs brought motions for leave to pursue secondary market misrepresentations and for certification of action — Defendants' motion granted in part; plaintiffs' motions granted — Pleadings disclosed causes of action, including under s. 130 of Securities Act, negligence, negligent misrepresentation and breach of trust — Proposed class of persons and entities who acquired units of fund during class period met requirements for identifiable class.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiffs purchased units in A Inc.'s unincorporated mutual fund that only owned shares of packaged ice producer A Inc. — Fund's public disclosures between 2002 and 2008 claimed competitiveness of ice industry and lawful conduct by fund and A Inc. — Fund units lost significant value in 2008 during U.S. investigation that led to A Inc.'s 2009 guilty plea to anti-competitive conspiracy — Plaintiffs brought class action against fund, A Inc. and certain officers, directors, or trustees of A Inc. or fund — Defendants brought motion to strike certain portions of statement of claim; plaintiffs brought motions for leave to pursue secondary market misrepresentations and for certification of action — Defendants' motion granted in part; plaintiffs' motions granted — Pleadings disclosed causes of action, including under s. 130 of Securities Act, negligence, negligent misrepresentation and breach of trust — Proposed class of persons and entities who acquired units of fund during class period met requirements for identifiable class — Defendants challenged proposed common issues relating to negligence, which cause of action they had unsuccessfully sought to strike from pleadings — Issues relating to existence and breach of duty of care were common, as was damage caused to class members — Cause of action in negligent misrepresentation required proof of reliance, which sometimes meant that such claims were unsuitable for certification — Alleged misrepresentations here were consistent and repetitive, such that they could be essentially treated as one and readily managed as common issue — Claim for punitive damages could proceed as common issue.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiffs purchased units in A Inc.'s unincorporated mutual fund that only owned shares of packaged ice producer A Inc. — Fund's public disclosures between 2002 and 2008 claimed competitiveness of ice industry and lawful conduct by fund and A Inc. — Fund units lost significant value in 2008 during U.S. investigation that led to A Inc.'s 2009 guilty plea to anti-competitive conspiracy — Plaintiffs brought class action against fund, A Inc. and certain officers, directors, or trustees of A Inc. or fund — Defendants brought motion to strike certain portions of statement of claim; plaintiffs brought motions for leave to pursue secondary market misrepresentations and for certification of action — Defendants' motion granted in part; plaintiffs' motions granted — Pleadings disclosed causes of action, including under s. 130 of Securities Act, negligence, negligent misrepresentation and breach of trust — Proposed class of persons and entities who acquired units of fund during class period met requirements for identifiable class — There was no evidence of alternate procedure for redress for class members whose securities lost value due to alleged misrepresentation — Certification here clearly advanced interests of access to justice, as U.S. investigation into illegal activity was not appropriate substitute — Action here was brought to seek compensation for failure

to disclose anti-competitive conduct, rather than for such conduct itself — Class action was preferable procedure — Plaintiffs were appropriate representative plaintiffs, and litigation plan was sufficient.

MOTION by defendants to strike portions of plaintiffs' statement of claim; MOTIONS by plaintiffs for leave to pursue secondary market misrepresentations and for certification of class action.

**Tausendfreund J.:**

**Overview**

1 The plaintiffs have commenced a proposed class proceeding. They claim that the defendants published misrepresentations relating to the sale of publicly traded securities in both the primary and secondary market. These securities experienced a substantial market value decline which the plaintiffs seek to recoup for the proposed class. This action is at the procedural infancy stage. To date, only the Statement of Claim has been filed. The parties have brought the following motions:

(a) The defendants seek an order that certain portions of the Amended Amended Statement of Claim dated September 3, 2010 ("Statement of Claim") advancing the plaintiffs' common law and statutory causes of action be struck, under Rule 21.01, and/or as improperly pleaded under Rule 25 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194, as amended.

(b) The plaintiffs seek:

(i) leave to pursue the alleged secondary market misrepresentations (the "Part XXIII.1 claim") under to s. 138.8(1) of Part XXIII.1 of the *Securities Act*, R.S.O. 1990, c. S.5 (the "OSA").

(ii) certification of the proposed class action pursuant to s. 5(1) of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 (the "CPA").

## Facts

2 The plaintiffs are residents of Ontario. Each purchased units of the defendant, Arctic Glacier Income Fund ("Income Fund") over the Toronto Stock Exchange during the class period.

3 The defendant, Arctic Glacier Inc. ("Arctic"), is a producer, marketer and distributor of packaged ice to consumers in Canada and the United States. Arctic is incorporated under the laws of Alberta and is headquartered in Winnipeg, Manitoba.

4 The Income Fund is an unincorporated mutual fund trust and is a reporting issuer in ten provinces, including Ontario. The other defendants are certain Officers, Directors and/or Trustees of Arctic and/or the Income Fund ("the Individual Defendants").

5 The Income Fund's purpose is to market Arctic as an Income Fund for public trading on the TSX.

6 When it was created, the Income Fund's sole assets were all the shares of Arctic. As such, the trading value of the Income Fund's units is based entirely on the financial and business results of Arctic. Facts and changes that are material to Arctic's business are facts and changes material to the value of the Income Fund's units.

7 Arctic Glacier International Inc. ("Arctic International"), a company incorporated in the State of Delaware in the United States, is a wholly-owned direct subsidiary of Arctic, and is the principal operating subsidiary of the Income Fund and Arctic in the United States.

8 In 2007, approximately 82% of the Income Fund's sales were generated in the United States and the balance in Canada.

9 Between 2002 and 2008, the Income Fund stated in public disclosures, including prospectuses, that the packaged ice industry was very competitive. The defendants also represented in these documents that the Income Fund and its subsidiaries were good corporate citizens operating lawfully in a very competitive market.

10 In March 2008, the Income Fund announced that it had become aware that the United States Department of Justice ("the DoJ") was conducting an anti-trust investigation of the packaged ice industry and that it was cooperating fully with the DoJ in this regard. Arctic's news release of March 9, 2008 included the following:

Arctic Glacier is a good corporate citizen with strong, institutionalized internal policies and controls. We have always followed best practices in corporate governance and public disclosure, and we will continue to do so.

11 In September 2008, the Income Fund announced that it was suspending its income trust distributions, due, at least in part, to the cost of responding to the DoJ investigation.

12 In 2009, Arctic International pleaded guilty to a charge of participating, during the proposed Class Period, in a criminal, anti-competitive conspiracy in the United States. Under the terms of the plea agreement, Arctic International agreed to pay a fine of US \$9 million, payable in installments over five years. In the U.S. plea agreement, Arctic International admitted that:

Beginning January 1, 2001 and continuing until at least July 17, 2007, the defendant (Arctic International) and co-conspirators entered into and engaged in a conspiracy to suppress and eliminate competition by allocating packaged-ice customers in Southeastern Michigan and the Detroit, Michigan Metropolitan area. The charged conspiracy unreasonably restrained inter-state trade and commerce, in violation of s. 1 of the Sherman Act...

13 The trading price of the Income Fund units lost significant value during the March-September 2008 period.

14 The plaintiffs plead a proposed class period from March 13, 2002 to September 16, 2008. They commenced this proposed class action on September 25, 2008.

15 I will now address each of the three motions sequentially.

#### A. Defendants' Motion to Strike

16 The defendants move under Rule 21.01(1) and Rule 25.11 of the *Rules of Civil Procedure* to strike certain parts of the Statement of Claim. The relevant parts of the rules are:

**21.01(1)** A party may move before a judge,

...

(b) to strike out a pleading on the ground that it discloses no reasonable cause of action or defence,

and the judge may make an order or grant judgment accordingly.

**25.11** The court may strike out or expunge all or part of a pleading or other document, with or without leave to amend, on the ground that the pleading or other document,

- (a) may prejudice or delay the fair trial of the action;
- (b) is scandalous, frivolous or vexatious; or
- (c) is an abuse of the process of the court.

17 As one would expect, the defendants have yet to file a statement of defence. Accordingly, I must read the Statement of Claim generously and be guided by the test applicable to Rule 21.01(1)(b) that a pleading should not be struck unless it is "plain and obvious" that the existence of the cause of action could not be established at trial. However, the "plain and obvious" test does not absolve the plaintiffs from their obligation to observe the rules of pleadings and should not be seen as encouraging them to neglect such obligations: *Falloncrest Financial Corp. v. Ontario* (1995), 27 O.R. (3d) 1 (Ont. C.A.) and *Williams v. Canada (Attorney General)* (2005), 76 O.R. (3d) 763 (Ont. S.C.J.) at paras. 15 and 17.

18 With respect to the application of Rule 25.11, I am guided by the principles summarized by Nordheimer J. in *Abdi Jama (Litigation Guardian of) v. McDonald's Restaurants of Canada Ltd.*, [2001] O.J. No. 1068 (Ont. S.C.J.) at para. 21:

**21.** The defendants claim that the amended statement of claim is prolix, pleads evidence, will prejudice or delay the fair trial of the action and is scandalous, frivolous or vexatious. Various paragraphs of the amended statement of claim are challenged on this basis... it is worthwhile to set out the principles that should be applied to this aspect of the motion. Those principles include:

- (a) motions under rule 25.11 should only be granted in the "clearest of cases";
- (b) any fact which can effect [sic] the determination of the rights of the parties can be pleaded but the court will not allow facts to be alleged that are immaterial or irrelevant to the issues in the action;
- (c) portions of a pleading that are irrelevant, argumentative or inserted for colour, or that constitute bare allegations should be struck out as scandalous;
- (d) facts may be pleaded but not the evidence by which those facts are to be proved;
- (e) similar facts may be pleaded as long as the added complexity arising from their pleading does not outweigh their potential probative value. [Citations omitted]

19 It is now settled that pleadings in actions under the *CPA* not only have to follow the usual rules, but must demonstrate a proper cause of action against each defendant: *Shaw v. BCE Inc.*, [2003] O.J. No. 2695 (Ont. S.C.J.) at para. 5; *Pearson v. Inco Ltd.* (2002), 33 C.P.C. (5th) 264 (Ont. S.C.J.) at para. 84.

### ***The Pleadings at Issue***

20 Under Rules 21 and 25, the defendants challenge various causes of action and remedies sought in the Statement of Claim:

- (i) the common law pleading against the Income Fund;
- (ii) the pleading of an underlying Anti-Trust Conspiracy;
- (iii) the pleading under s. 130 of the *Securities Act*;
- (iv) the pleading of negligence; and
- (v) the pleading of negligent misrepresentation.

### ***The Common Law Pleading Against the Income Fund***

21 The plaintiffs assert both statutory and common law causes of action against the Income Fund. These will be discussed separately.

22 The statutory causes of action against the Income Fund are asserted under ss. 130 and 138.3 of the *OSA*. The claim under s. 138.3 may only be pursued with leave. This will be discussed in more detail.

23 In para. 13 of the Statement of Claim, the plaintiffs describe the Income Fund as an unincorporated, open-ended mutual trust fund. Rule 9.01 of the *Rules of Civil Procedure* provides:

- 9.01(1) a proceeding may be brought by or against an executor, administrator or trustee as representing an estate or trust and its beneficiaries without joining the beneficiaries as parties.

24 In *Whiting v. Menu Foods Operating Ltd.* (2007), 53 C.P.C. (6th) 124 (Ont. S.C.J.), Lax J. relied on Rule 9.01(1) to determine that the proper parties in an action against a trust are the trustees (para. 25) and that a trust is an entity that is not capable of being sued in Ontario (para. 29).

25 The defendants assert that the plaintiffs cannot name the Income Fund as a defendant to the common law causes of action, as it lacks legal personality. Strathy J. affirmed this principle in *Cannon v. Funds for Canada Foundation*, [2010] O.J. No. 3486 (Ont. S.C.J.) at paras. 64-66:

- 64.** The trust is, however, most correctly described as a relationship. Waters quotes at p. 3 from G.W. Jeeton and L.A. Sheridan, *The Law of Trusts*, 10<sup>th</sup> ed...:

A trust is the relationship which arises whenever a person (called the trustee) is compelled in equity to hold property, whether real or personal, and whether by legal or equitable title, for the benefit of some persons (of whom he may be one, and who are termed beneficiaries) or for some object permitted by law, in such a way that the real benefit of the property accrues, not to the trustees, but to the beneficiaries or other objects of the trust.

- 65.** It is well-established that a trust itself does not have legal personality - it operates through its trustees... It is also held accountable through its trustees.

**66.** The trustee derives his, her or its powers from the trust instrument ... Where a third party suffers an injury as a result of the use of the trust funds, or as a result of actions of the trustee ... then the third party is entitled ... to look to the trustee for redress ... It is through the trustee that compensation is obtained.

26 I find that there is no common law right of action against the Income Fund. The pleadings in the Statement of Claim alleging negligence, negligent misrepresentation and breach of trust are struck as against the Income Fund.

27 The claim against the Income Fund under s. 130 of the *OSA* creates a statutory right of action for misrepresentations contained in a prospectus. Where a person has purchased securities in an offering made through the prospectus, that right of action is available against an "issuer." The *OSA* defines an "issuer" as a person or company who has outstanding, issues or proposes to issue, a security. The *OSA* defines a "person" to include "a trust."

28 I find that the plaintiffs have a statutory claim against the Income Fund under s. 130 of the *OSA*. Pleadings with respect to it will stand. As stated, the claim under s. 138.3 of the *OSA* will be reviewed below.

#### ***Pleading of an Underlying Anti-Trust Conspiracy***

29 The plaintiffs have pleaded that Arctic was engaged in an anti-trust conspiracy. However, that allegation is not advanced as a cause of action. The Statement of Claim alleges a course of illegal conduct by the defendants, or some of them. In their pleadings, the plaintiffs point to the defendants' alleged failure to disclose illegal activity and their allegedly false and materially misleading statements with respect to the nature and legality of their business activities as the foundation for the claims. The plaintiffs give that course of conduct the collective moniker of "Anti-Competitive Conspiracy."

30 The defendants state that to plead this conspiracy as the factual foundation for the claims advanced, the plaintiffs must plead all the requisite elements of the tort of conspiracy. This, the plaintiffs have not done. These elements are summarized in *Apotex Inc. v. Plantex USA Inc.* (2005), 5 B.L.R. (4th) 116 (Ont. S.C.J.) at para. 56:

The statement of claim should describe who the several parties are and their relationship with each other. It should allege the agreements between the defendants to conspire, and state precisely what the purpose or what were the objects of the alleged conspiracy, and it must then proceed [sic] to set forth, with clarity and precision, the overt acts which are alleged to have been done by each of the alleged conspirators in pursuance and in furtherance of the conspiracy; and lastly, it must allege the injury and damage occasioned to the plaintiff thereby.

31 In support of their position that all of the requisite elements of the tort of conspiracy must be pleaded, the defendants rely on *Aristocrat Restaurants Ltd. v. Ontario*, [2003] O.J. No. 5331 (Ont. S.C.J.) and *Sudbury Downs v. Ontario Harness Horse Assn.* (2003), [2002] O.J. No. 5505 (Ont. S.C.J.). In my view, both of these cases must be distinguished from the present case, as both pleaded conspiracy as a cause of action, which is not advanced here.

32 I find that the pleading of the anti-trust conspiracy may stand. If the defendants should require further details, the appropriate recourse is a demand for particulars.

#### ***Pleading Under Section 130 of the OSA***

33 The plaintiffs plead that the prospectuses of the Income Fund issued during the class period contained misrepresentations which are actionable under s. 130 of the *OSA*.

34 The defendants assert two deficiencies with the s. 130 *OSA* pleading:

(a) They state that neither plaintiff can advance this personal cause of action since neither purchased their units in the primary market; and

(b) This pleading must be limited to:

- (i) persons who purchased in Ontario; and
- (ii) reliance on those fund prospectuses should be within three years of the issuance of the Notice of Action in this matter on September 25, 2008, as contemplated by the limitation period set out in s. 138.14(b)(ii) of the *OSA*.

*(a) Representative Plaintiffs*

35 The plaintiffs concede that neither of them was a prospectus purchaser on the primary market. The defendants state that this is fatal to the plaintiffs' claim under s. 130(1) of the *OSA*.

36 It is well settled that for each defendant named in a class action there must be a representative plaintiff who has a valid cause of action against that defendant: See *Hughes v. Sunbeam Corp. (Canada) Ltd.*, [2002] O.J. No. 3457 (Ont. C.A.) at para. 15. Each of the plaintiffs in this case has pleaded at least one cause of action against each of the defendants.

37 On this issue, I am guided by *Boulanger v. Johnson & Johnson Corp.*, [2003] O.J. No. 1374 (Ont. Div. Ct.) at para. 41, which states that plaintiffs may assert causes of action which are not their personal causes of action but which are asserted by them on behalf of class members.

*(b) Territorial Restrictions and Limitation Period*

38 The defendants assert that the class must be limited to those persons who purchased securities in Ontario, as each province has different securities legislation. In Ontario there appear to be two divergent lines of authority on this point. Both are 2010 decisions, released just two days apart. In *Coulson v. Citigroup Global Markets Canada Inc.*, 2010 ONSC 1596 (Ont. S.C.J.), Perell J. considered the objection of the defendants that the plaintiffs proposed a national class, yet pleaded only s. 130 of the *OSA*. The defendants in that case proposed that the class be limited to purchasers who acquired common shares pursuant to the prospectus as a result of a distribution in Ontario. Perell J. agreed with the position of the defendants and held:

**146.** The fundamental point is that persons who cannot rely on s. 130 of the Ontario *Securities Act* must rely, if at all, on the securities legislation of other provinces, but this legislation has not been pleaded in the case at bar...

**147.** ...while the Defendants do not object to a national class, they do object to the class definition including persons who do not have a claim under s. 130 of the *OSA*. They argue that the class definition is too broad because it includes purchasers who would not have a claim against the underwriters pursuant to s. 130 of the Ontario *Securities Act*.

**148.** I agree with the Defendants' argument...

39 The plaintiffs rely on *McKenna v. Gammon Gold Inc.*, 2010 ONSC 1591 (Ont. S.C.J.), the decision released two days before *Coulson*. Strathy J. in *Gammon Gold Inc.* followed *Silver v. Imax Corp.* (2009), 86 C.P.C. (6th) 273 (Ont. S.C.J.) ("Imax") and held:

**117.** Like Van Rensburg J. in *Silver v. Imax - Certification*, I do not find it necessary at this stage to make a determination of the law applicable to the claims of non-resident members of the class who purchased their securities from underwriters in other provinces. Given the similarity between s. 130 of the *Securities Act* and the securities law of other provinces of Canada, this may not be an issue with respect to Class Members from other provinces.

40 I am reminded that on a motion to strike, which is before me, I must afford the claim a generous interpretation. I prefer the more permissive and less technical approach taken by Strathy J. in *Gammon Gold*, *supra*. However, relying on *Boulanger v. Johnson & Johnson Corp.*, *supra* at paras. 54 and 55, to permit this claim for a national class to stand, I will require the plaintiffs to amend the Statement of Claim to plead the relevant provisions of the securities acts of those other provinces which the plaintiffs propose to have included in this class proceeding. For that purpose, leave to further amend is granted.

41 The defendant, Johnson, is not a trustee of the fund. Accordingly, the claim under s. 130 of the *OSA* as against the defendant, Johnson, is struck.

42 The limitation period in s. 138.14(b)(ii) of the *OSA* limits the plaintiffs' cause of action under s. 130 of the *OSA* to the two fund prospectuses issued after September 26, 2005. Each Statement of Claim must be amended to that end.

**Pleading of Negligence Simpliciter**

43 The plaintiffs advance a cause of action in negligence *simpliciter* based on Income Fund representations to the primary market during the class period through the four Fund prospectuses published prior to the s. 138.14 *OSA* limitation period and the two published afterwards. The Statement of Claim includes the following pleading:

**92.** ... each of the Defendants ... ought to have known that the Income Fund's Class Period prospectuses were materially misleading as detailed above. Accordingly, the Defendants have violated their duties to the Class Members.

**93.** The reasonable standard of care expected in the circumstances required the Defendants ... to act fairly, reasonably, honestly, candidly and with due care in the course of compiling and disseminating the Income Fund's prospectuses.

**94.** The Defendants ... failed to meet the standard of care required by issuing prospectuses during the Class Period that were materially false and/or misleading as described above.

**96.** The negligence of the Defendants ... resulted in the damage to Class Members who purchased under a prospectus. Had the Defendants ... complied with their duty of care ... then the Units offered by such prospectuses either would not have been offered to and purchased by the Class Members or, alternatively, such Units would have been offered at prices that corresponded to their true value...

**97.** As a result, those Class Members who purchased Units under a prospectus bought their Units at inflated prices, and suffered a corresponding loss...

44 The defendants state that there is no common law duty of care owed by public issuers and their officers, directors and/or trustees through the publication of their prospectuses and seek to have those pleadings struck. The defendants state that the plaintiffs' duty of care analysis is flawed for three separate reasons:

- (a) There is no such duty of care owed by the Income Fund at common law. It has been replaced by s. 130 of the *OSA*.
- (b) The duty of care owed by the directors and trustees is to the Income Fund and not to the unitholders; and
- (c) In any event, the claim of negligence is subsumed by the pleading of negligent misrepresentation and is therefore duplicative.

*(a) Has section 130 of the OSA replaced the common law duty of care?*

45 Section 130 of the *OSA* states:

**130(1)** Where a prospectus ... contains a misrepresentation, a purchaser who purchases a security offered by the prospectus during the period of distribution has, without regard to whether the purchaser relied on the misrepresentation, a right of action for damages against:

- (a) the issuer ...
- (b) each underwriter ...
- (c) every director of the issuer ...

46 Section 1 of the *OSA* defines a "misrepresentation" as:

- (a) an untrue statement of material fact, or
- (b) an omission to state a material fact ...

47 In s. 1 of the *OSA*, a "material fact," when used in relation to securities issued or proposed to be issued, means a fact that would reasonably be expected to have a significant effect on the market price or value of the securities.

48 The defendant relies on *Menegon v. Philip Services Corp.* (2001), 23 B.L.R. (3d) 151 (Ont. S.C.J.). This was a proposed class action regarding prospectus misrepresentations in which the plaintiffs intended to assert a common law duty of care said to be owed to a class of investors by the underwriters.

49 On motion by the defendants, the Court in *Menegon* struck out that portion of the claim. I find that *Menegon* is to be distinguished from the present case, at least on the basis that in *Menegon* the proposed defendants were underwriters who do not stand in the same relationship of proximity to shareholders as do directors and officers of the corporation in which those shareholders have invested.

50 In my view, s. 130 of the *OSA* does not create a duty, rather it provides a remedy. The statutory duty is found in s. 56 of the *OSA* which provides:

**56(1)** A prospectus shall provide full, true and plain disclosure of all material facts relating to the securities issued or proposed to be distributed and shall comply with the requirements of Ontario securities law.

51 Rather than replacing the common law duty of care, s. 56(1) of the *OSA* informs of that duty. This concept was recognized in *Saskatchewan Wheat Pool v. Canada*, [1983] 1 S.C.R. 205 (S.C.C.) and *Haskett v. Trans Union of Canada Inc.*, [2003] O.J. No. 771 (Ont. C.A.) at para. 25.

52 I find that s. 130 of the *OSA* does not subsume common law claims, but preserves them. In that regard, I am also guided by s. 130(10) of the *OSA* which states:

**(10)** The right of action for rescission or damages conferred by this section is in addition to and without derogation from any other right the purchaser may have at law.

*(b) Do directors and trustees owe a duty of care to investors?*

53 The defendants state that the cause of action in negligence against the directors and trustees must be struck, as it creates an untenable conflict of interest for those individuals. The defendants rely on *Alvi v. Misir* (2004), 73 O.R. (3d) 566 (Ont. S.C.J. [Commercial List]), in which a claim was brought by shareholders against directors of a corporation for their activities as directors. The Court in that case held at para. 57:

**57.** In view of the fact that the statutory duties of good faith, loyalty and care are owed to the corporation, the directors cannot have separate duties of the same nature owing to the shareholders. Such parallel duties would create untenable and unrealistic conflicts...

54 I distinguish *Alvi* from the facts before me. Here, the plaintiffs assert a cause of action on behalf of the proposed class at a time when they were not shareholders, but chose to purchase Income Fund units and thereby became "shareholders." Those decisions to purchase units resulted in damage to Class Members, as pleaded in paras. 96 & 97 of the Statement of Claim:

**96.** The negligence of the Defendants resulted in the damage to Class Members who purchased under a prospectus. Had the Defendants complied with their duty of care by conducting reasonable due diligence into the Income Fund's business and affairs prior to the issuance of each of the Income Fund's Class Period prospectuses, then the Units offered by such prospectuses either would not have been offered to and purchased by the Class Members or, alternatively, such Units

would have been offered at prices that corresponded to their true value. When the Anti-Competitive Conspiracy and the participation of Arctic and its affiliates therein were disclosed, the artificial inflation in the price of the Units was removed, and the trading price of the Units was corrected to reflect the true state of Arctic's business, affairs and financial position.

**97.** As a result, those Class Members who purchased Units under a prospectus bought their Units at inflated prices, and suffered a corresponding loss upon the disclosure of the Anti-Competitive Conspiracy and the participation of Arctic and its affiliates therein.

55 The plaintiffs assert that the duties of the named trustees are owed specifically to the beneficiaries of the trust, namely the unit-holding plaintiffs. An assertion that the trustees of the Income Fund do not owe fiduciary duties to those beneficiaries ignores the essential nature of a trust.

56 In any event, I find that at this stage of the proposed class proceeding, it is not "plain and obvious" that the pleading of negligence against the directors of the company and the trustees of the Fund will fail.

(c) *Are the claims in negligence and negligent misrepresentation duplicative?*

57 The defendants state that the pleadings in negligence and negligent misrepresentation rely on the same duty of care. In support of their position that the claim of negligence is subsumed by the pleading of negligent misrepresentation and should therefore be struck, the defendants rely on *Deep v. M.D. Management* (2007), 35 B.L.R. (4th) 86 (Ont. S.C.J.) and *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.).

58 In *Deep* the Court struck the plaintiff's pleading in negligence in part because it failed to raise a cause of action separate from the cause of action for negligent misrepresentation. In like manner, the motions judge in *Imax* struck out the pleading of negligence, finding that the negligence pleading in that case was in substance a pleading of negligent misrepresentation. Justice van Rensburg stated at para. 88 in *Imax*:

**88.** The negligence pleading in this case is in substance a pleading of negligent misrepresentation without the ingredient of reliance. There is also no pleading that the alleged negligence caused damage to the plaintiffs and no separate claim for a remedy based on negligence. Accordingly, the claims sounding in negligence *simpliciter* ... will not be permitted to proceed and the claim shall be amended accordingly.

59 A review of the pleadings in the case before me indicates that unlike *Deep* and *Imax*, the claims of negligence and negligent misrepresentation are pleaded quite differently and raise separate causes of action. The negligence *simpliciter* claim asserts that the securities issued pursuant to the prospectuses would not have been issued, or would have been issued at a substantially reduced offering price, but for the negligence of the defendants. The negligent misrepresentation pleading, on the other hand, points to a number of misrepresentations contained in various prospectuses and public disclosures.

60 To further distinguish these pleadings of negligence *simpliciter* from those considered by Justice van Rensburg in *Imax* in para. 88 above, I note para. 97 of the Statement of Claim in this action which states, referring to the allegations of negligence:

**97.** As a result, those Class Members who purchased Units under a prospectus bought their Units at inflated prices, and suffered a corresponding loss ...

61 Materially identical pleadings in negligence and negligent misrepresentation were sustained in *McCann v. CP Ships Ltd.*, [2009] O.J. No. 5182 (Ont. S.C.J.), *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman* (2001), 18 B.L.R. (3d) 260 (Ont. S.C.J.) and *Metzler Investment GmbH v. Gildan Activewear Inc.*, [2009] O.J. No. 5695 (Ont. S.C.J.).

62 In finding that the claim of negligence *simpliciter* advanced here focuses specifically on the theory that the prospectuses would not have been issued, or would have been issued showing a reduced offering price for the units, but for the negligence of the defendants, and that it therefore relies on a materially different theory than a negligent misrepresentation allegation, I also have regard to the B.C. Court of Appeal decision of *Collette v. Great Pacific Management Co.*, [2004] B.C.J. No. 381 (B.C. C.A.). In that case, the appellant sought damages for losses on units of two mortgages he purchased. The appellant alleged that

the respondents breached due diligence obligations regarding the mortgage investments before offering the units for sale. On the issue of whether individual reliance must be shown, the Court stated at paras. 33 & 34:

**33.** The respondents submit that the investors cannot succeed without proof of reliance on the misrepresentation by each investor individually, particularly with respect to the claims for negligent misrepresentation. The chambers judge concluded that proof of reliance was required for the claims in tort but not in contract.

**34.** The reason for insistence on reliance is to establish causation. If causation can be established otherwise, then reliance is not required: see *Henderson, supra*, per Lord Goff at 776, and *Yorkshire Trust Co. v. Empire Acceptance Corp. Ltd. (1986)*, 24 D.L.R. (4<sup>th</sup>) 140 at 145-47, 69 B.C.L.R. 357 at 354-55, 22 E.T.R. 96 (S.C.) per McLachlin J. Here if the mortgage units had not passed the due diligence test they would not have been offered for sale by the respondents to any clients. Causation is therefore established between a breach of due diligence duty and the investors' loss, independently of proof of individual reliance. In my view, proof of reliance does not present an obstacle to the appellant's case as framed. The appellant's case adequately links a breach of duty causally to the investors' losses.

63 I also note that the claim of negligence is limited to primary market purchasers while the negligent misrepresentation claim focuses on secondary market purchasers.

64 For reasons noted, I decline to strike the plaintiffs' claim of negligence *simpliciter*.

#### ***The Pleading of Negligent Misrepresentation***

65 The plaintiffs advance a cause of action in negligent misrepresentation, based on the Income Fund's public disclosures in both the primary and the secondary markets. Relevant parts of these pleadings in the Statement of Claim are:

**98.** On behalf of all Class Members, the Plaintiffs plead negligent misrepresentation.

**99.** The Income Fund's disclosure documents referenced above were prepared, at least in part, for the purpose of attracting investments and with the intention that Class Members would rely upon the documents in making the decision to purchase Units. The Defendants ... knew or ought to have known that the Plaintiffs and the Class Members would rely upon those disclosure documents in making their decision to purchase the Units, and the Defendants ... intended that the Plaintiffs and the Class Members so rely.

**100.** The Individual Defendants and Arctic made those omissions and the Misrepresentation and the related misrepresentations alleged herein by authorizing, permitting and/or acquiescing in the drafting and issuance of the disclosure documents referenced above, and/or by signing them.

**101.** The Defendants ... made the omissions, the Misrepresentation, and the related misrepresentations alleged herein negligently, intending that the Plaintiffs and the other Class Members would rely upon them, which the Class Members did to their detriment.

**102.** The Plaintiffs and each other Class Member relied upon the Defendants' ... omissions, the Misrepresentation, and the related misrepresentations alleged herein by reading and acting upon disclosure documents containing the omissions, the Misrepresentation, and the related misrepresentations alleged herein, or alternatively, by reading and acting upon documents that contained information derived from the omissions, the Misrepresentation, and the related misrepresentations.

**103.** Further, given the relationship as pleaded below between the Income Fund's disclosures and the price of the Units, the Plaintiffs and each other Class Member relied upon the said omissions, the Misrepresentations and the related misrepresentations by the act of purchasing or acquiring Units in the open market.

**104.** The Plaintiffs and each other Class Member suffered damages and loss, as particularized below, as a result of such reliance.

66 To establish the tort of negligent misrepresentation, the plaintiffs must establish the required elements recited by the Supreme Court of Canada in *Queen v. Cognos Inc.*, [1993] 1 S.C.R. 87 (S.C.C.) at p. 110:

1. There must be a duty of care based on a "special relationship" between the representor and the representee;
2. The representation in question must be untrue, inaccurate, or misleading;
3. The representor must have acted negligently in making said misrepresentation;
4. The representee must have relied, in a reasonable manner, on said negligent misrepresentation; and
5. The reliance must have been detrimental to the representee in the sense that damages resulted.

67 To identify the existence and scope of a duty of care in a claim of negligent misrepresentation, in *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.) at para. 20 the Supreme Court of Canada applied what has become known as the two-stage *Anns* test (see *Anns v. Merton London Borough Council* (1977), [1978] A.C. 728 (U.K. H.L.)). The first stage of the *Anns* test requires that there be a relationship between the parties justifying the imposition of a duty of care. It calls for considerations of foreseeability, proximity and policy. At the second stage of the *Anns* test, the court should consider whether there are any residual policy considerations militating against the recognition of a duty of care.

68 The defendants state that no duty of care can exist as pleaded by the plaintiffs. Accordingly, I must review in detail the application of the two-stage *Anns* test.

#### *Relationship of Proximity*

69 The defendants assert that the plaintiffs failed to plead the material facts necessary to demonstrate a special relationship of proximity, as neither reasonable foreseeability nor reasonable reliance was pleaded. The plaintiffs have asserted that a duty of care was owed to class members. The defendants in response submit that this pleading lacks the necessary relational proximity. The defendants rely on *Attis v. Canada (Minister of Health)* (2008), 93 O.R. (3d) 35 (Ont. C.A.) at para. 68 for the assertion that a duty of care cannot be owed only to the class members who purchased units, as opposed to the general public in this type of transaction. In my view, *Attis* does not assist the defendants. That decision focuses on the relationship between the government, policy decisions and members of the public. Further, the Court specifically states at para. 68 that relational proximity was not pleaded, contrary to the present case.

70 The defendants state that there is no direct causal proximity between the defendants' release of the documents and the plaintiffs' loss. They state that the decline in the price of the units of the Income Fund on the open market is the result of numerous forces and events. They state that this type of indirect relationship between the defendants' conduct and the proposed class members' losses is insufficient to ground a finding of proximity. They rely on *Paxton v. Ramji*, 2008 ONCA 697 (Ont. C.A.) at para. 71 in support of that position. In *Paxton*, the Ontario Court of Appeal considered whether a physician treating a female for acne, simultaneously owed a duty to a child then neither planned nor conceived, but subsequently born to that female person. The "indirect relationship" reviewed in para. 71 of *Paxton* related specifically to that fact situation and, in my view, has no application to the present case.

71 The defendants further rely on *D. (B.) v. Children's Aid Society of Halton (Region)*, 2007 SCC 38 (S.C.C.) at para. 27, stating that the proximity analysis must be grounded in the statutory scheme, where one exists. Yet, similarly to s. 130(10), s. 138.13 of the OSA provides,

**138.13** The right of action for damages and the defences to an action under s. 138.3 are in addition to, and without derogation from, any other rights or defences the plaintiff or defendant may have in an action brought otherwise than under this Part.

I am also guided by Justice van Rensburg's analysis of this issue in *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.):

**40** While there are no reported cases in Ontario where a common law claim of misrepresentation in the secondary market has been considered at trial, such claims have been permitted to proceed under a Rule 21 or class proceeding certification motion in *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236 (C.A.); *Mondor v. Fisherman*, [2001] O.J. No. 4620 (S.C.), *Lawrence v. Atlas Cold Storage Holdings Inc.*, [2006] O.J. No. 3748 (S.C.J.) and *McCann v. CP Ships Limited*, [2009] O.J. No. 5182...

**47** The present case is similar to *Mondor* and can be distinguished from *Menegon*. The Claim concerns representations made as part of a reporting issuer's continuous disclosure obligations, and not, as in *Menegon*, representations intended for the primary market that were made in a prospectus. The continuous disclosure obligations of a reporting issuer are prescribed by and under the *OSA*, and the intended recipients of such disclosure are the investing public.

**48** Section 138.3 of the *OSA* provides for liability of issuers, their directors and in certain circumstances their officers and intermediaries to persons who acquired or disposed of an issuer's securities between the time a material misrepresentation in secondary market disclosure was made and its correction. While there is a specific statutory remedy, s. 138.13 of the *OSA* provides that the statutory right of action for damages and the defences to an action "are in addition to and without derogation from, any other rights or defences the plaintiff or defendant may have in an action brought otherwise than under this Part."

**49** There is no inconsistency or conflict between the pursuit of a statutory remedy for secondary market misrepresentation that imposes liability without proof of reliance but subject to a damages cap and other limitations, and a claim alleging a common law duty of care for negligent misrepresentation arising out of the same circumstances, where reliance is an element of the tort. The public policy concern of conflict with an existing statutory regime or remedy does not arise in this case.

**72** In my view, the position advanced by the defendants that imposing a duty of care at common law could create requirements above and beyond those codified in the *OSA* should be left for trial and should not be resolved at this embryonic stage of the action. I find that the plaintiffs have made out a *prima facie* duty of care for pleading purposes. That takes me to the second stage of the *Anns* test.

#### *Residual Policy Considerations*

**73** The defendants assert that recognizing a *prima facie* duty of care to the entire secondary market would raise the spectre of indeterminate liability as the entire investing public is not a limited class. They rely on *Hercules, supra*, in which the Supreme Court addressed certain policy considerations to limit or constrain the scope of possible unlimited liability. These comments of the Court are of note:

**41.** A *prima facie* duty of care will arise on the part of a defendant in a negligent misrepresentation action when it can be said (a) that the defendant ought reasonably to have foreseen that the plaintiff would rely on his representation and (b) that reliance by the plaintiff, in the circumstances, would be reasonable.

**74** The Supreme Court also noted at para. 46 that indeterminate liability would not inhere on the specific facts of those cases where:

**46.** ... the defendant knew the identity of the plaintiff (**or the class of plaintiffs**) who would rely on the statement at issue, but also because the statement itself was used by the plaintiff for precisely the purpose or transaction for which it was prepared.

[Emphasis added.]

*Did the defendants know the identity of the plaintiffs?*

75 The defendants rely on *Haig v. Bamford* (1976), [1977] 1 S.C.R. 466 (S.C.C.) and *NPV Management Ltd. v. Anthony* (2003), 231 D.L.R. (4th) 681 (N.L. C.A.) for the proposition that the investing public is not a limited class.

76 The plaintiffs in this case have pleaded:

**99.** The Income Fund's disclosure documents ... were prepared, at least in part, for the purpose of attracting investment and with the intention that Class Members would rely upon the documents in making the decision to purchase Units. The Defendants ... knew or ought to have known that the Plaintiffs and the Class Members would rely upon those disclosure documents in making their decision to purchase the Units, and the Defendants ... intended that the Plaintiffs and the Class Members so rely.

77 I return to *Hercules*, *supra*, and note that the Court, in para. 46 of that decision, included "a class of plaintiffs" when it stated at para. 37:

**37.** ... in cases where the defendant knows the identity of the plaintiff (**or of a class of plaintiffs**) and where the defendant's statements are used for the specific purpose or transaction for which they were made, policy considerations surrounding **indeterminate liability will not be of any concern** since the scope of liability can readily be circumscribed. Consequently, such considerations will not override a positive finding on the first branch of the *Anns/Kamloops* test and a duty of care may quite properly be found to exist.

[Emphasis added.]

78 *Haig*, *supra* did not involve a public company. In that case, accountants prepared reports for a client with the knowledge that the documents were to be used to seek investments from a circumscribed class of investors. While the class of potential investors in this case is larger, the defendants here knew the class of persons who would rely on the continuous disclosure documents which the defendants prepared "for the purpose of attracting investments and with the intention that Class Members would rely upon the documents in making the decision to purchase Units."

79 *NPV*, *supra* must be distinguished on the basis that the pleadings in the present case allege that the impugned statements were made to attract investments. In *NPV*, the statements at issue were made to satisfy reporting and disclosure requirements.

80 I am also guided by the finding of Justice van Rensburg in *Imax*, *supra*. She held that the pleadings in *Imax*, which in this regard are materially similar to the pleadings in the present case, rendered *NPV* inapplicable.

81 The defendants' claim that the continuous disclosures made by the Income Fund were primarily for the purpose of fulfilling statutory requirements is to suggest that a securities issuer exists for the purpose of fulfilling statutory obligations. That ignores the obvious focus of these disclosures which is to attract investors. The intended recipients of such disclosure documents are members of the investing public, as pleaded in para. 97 of the Statement of Claim.

#### *The Effect of Recognizing a Duty of Care*

82 The defendants raise a number of residual policy considerations which do not address the relationship between the parties, but the effect of recognizing a duty of care on other legal obligations: see *Cooper v. Hobart*, [2001] 3 S.C.R. 537 (S.C.C.), at 554.

83 First, they state that a *prima facie* duty of care may be negated when other causes of action provide remedies for the impugned conduct. They assert that the *OSA* provides such a remedy. As I stated above and as noted in *Imax*, *supra* at paras. 47 and 48, the specific statutory remedy of s. 138.13 of the *OSA* is "in addition to and without derogation from any other rights or defences..."

84 The second concern raised by the defendants is that establishing the proposed common law duty of care would have a negative effect upon long-term unitholders by effectively creating an insurance scheme for short-term unitholders. In addition, the defendants say, it would have a negative chilling effect on the Canadian business sector. However, the plaintiffs assert that

refusing to require corporate directors and officers to disclose the truth to the investing public would also have a negative effect on society. I am not persuaded at this early stage in the proceedings that it is plain and obvious that the claim of negligent misrepresentation will fail on this issue.

85 Third, the defendants argue that Canadian common law duties should be harmonized on this issue with those determined by American courts. In my view, harmonization with the laws of a foreign jurisdiction cannot trump well-settled Canadian principles for evaluating the existence of a duty of care at common law. Canadian and American laws differ in many respects. It is not the role of this court to seek uniformity for its own sake with the laws of a foreign jurisdiction.

*Actual Pleading of Detrimental Reliance*

86 Relying on *Lysko v. Braley* (2006), 79 O.R. (3d) 721 (Ont. C.A.) at para. 30, the defendants state that to plead reliance, the Statement of Claim must contain assertions that the plaintiffs altered their position by relying on the misrepresentation which resulted in a loss. The plaintiffs plead, although in a very general way:

**102.** The Plaintiffs and each other Class Member relied upon the Defendants' ... omissions, the Misrepresentation, and the related misrepresentations alleged herein by reading and acting upon disclosure documents containing the omissions, the misrepresentations...

**103.** ... the Plaintiffs and each other Class Member relied upon the said omissions, the Misrepresentation and the related misrepresentations by the act of purchasing or acquiring Units in the open market.

**104.** ... the Plaintiffs and each other Class Member suffered damages and loss, as particularized below, as a result of such reliance.

87 In my view, the appropriate remedy here is that of a demand for particulars.

88 The plaintiffs assert that reliance can be inferred from the act of purchasing units on the secondary market. The defendants state that reliance on such an inference is indistinguishable from the American doctrine of "fraud on the market." This theory was canvassed by Cumming J. in *Mondor, supra*:

**59.** The "fraud on the market theory" is an implied statutory cause of action arising from Rule 10b-5 of the United States Securities and Exchange Commission. ... The theory results in deemed reliance where an actionable misrepresentation is established on the part of a company and there has been the purchase of its shares by an investor in the secondary market. This statutory cause of action was described by the United States Supreme Court in *Basic Incorporated v. Max L. Levinson*, 485 U.S. 224(1988) at 241 as follows:

[It] is based on the hypothesis that, in an open and developed securities market, the price of a company's stock is determined by the available material information regarding the company and its business... Misleading statements will therefore defraud purchasers of stock even if the purchasers do not directly rely on the misstatements... The causal connection between the defendants' fraud and the plaintiffs' purchase of each stock in such a case is not less significant than in a case of direct reliance on misrepresentations.

**60.** The theory negates the necessity of requiring proof of subjective reliance from each member of the proposed plaintiff class. The theory has been described as a legal fiction which has the effect of overcoming the need to prove reliance...

**61.** The "fraud on the market theory" has been expressly rejected by Canadian courts because, *inter alia*, Canadian securities legislation does not include a similar concept, and that actual reliance is a necessary component under Canadian law concerning negligent and fraudulent misrepresentation.

89 In *Mondor* at paras. 65-67, Cumming J. held that actual reliance on a misrepresentation is a question of fact which may be inferred from all the circumstances. He then stated at para. 69:

**69.** To foreclose the consideration of an arguable issue past the pleading stage, a moving party must show that there is an existing bar in the form of a decided case directly on point from the same jurisdiction demonstrating that the very issue has been squarely dealt with and rejected: *Dalex Co. v. Schwartz Levitsky Feldman* (1994), 19 O.R. (3d) 463. Had the plaintiffs simply pleaded the "fraud on the market theory" I would have foreclosed that consideration. Given, however, that the case law recognizes that a person's reliance upon a representation may be inferred from all the circumstances, in my view it would be premature to foreclose the consideration of this issue in the case at hand beyond the pleading stage.

90 This reasoning applies to the facts of this case. I am also guided on this issue by the comments of Rady J. in *McCann*, *supra* at para. 59:

**59.** It seems to me that the case law is in a state of evolution and the court, in certain circumstances, is prepared to relax the otherwise strict requirement to establish individual reliance. I think it would be an error to conclude, at this stage of the proceedings, that the plaintiff cannot possibly succeed in a claim for negligent misrepresentation. I would adopt the language of Justice Rooke in the *Eaton* case at para. 91 that "it is simply too early to determine whether, and to what extent, individual reliance will need to be examined in this case. A trial on the common issues will determine this need..."

91 For these reasons, the pleading of negligent misrepresentation may proceed to trial.

## B. Plaintiffs' Motion for Leave Pursuant to Part XXIII.1 of the OSA

### *Overview*

92 Part XXIII.1 of the *OSA* became law on December 31, 2005. Prior to its promulgation, Canadian securities class actions were based essentially upon the common law, in particular, the tort of negligent/fraudulent misrepresentation. The intent of the legislation is described by Lax J. in *Ainslie v. CV Technologies Inc.* (2008), 93 O.R. (3d) 200 (Ont. S.C.J.) at para. 9:

...to create a system of statutory liability that would contain enough checks and balances ... so that issuers and their directors would be deterred from inadequate or untimely disclosure...

93 The two seminal parts of this legislation are:

**138.3(1)** Where a responsible issuer or a person or company with actual, implied or apparent authority to act on behalf of a responsible issuer releases a document that contains a misrepresentation, a person or company who acquires or disposes of the issuer's security during the period between the time when the document was released and the time when the misrepresentation contained in the document was publicly corrected has, without regard to whether the person or the company relied on the misrepresentation, a right of action for damages against,

- (a) the responsible issuer;
- (b) each director of the responsible issuer at the time the document was released;
- (c) each officer of the responsible issuer...
- (d) each influential person, and each director and officer of an influential person, who knowingly influenced,
  - (i) the responsible issuer ... to release the document, or
  - (ii) a director or officer of the responsible issuer to authorize, permit or acquiesce in the release of the document; ...

**138.8(1)** No action may be commenced under section 138.3 without leave of the court granted upon motion with notice to each defendant. The court shall grant leave only where it is satisfied that,

- (a) the action is being brought in good faith; and

(b) there is a reasonable possibility that the action will be resolved at trial in favour of the plaintiff.

(2) Upon an application under this section, the plaintiff and each defendant shall serve and file one or more affidavits setting forth the material facts upon which each intends to rely.

94 In attempting to interpret this legislation and to apply it to the facts of this motion, I am guided by the approach proposed by E.A. Driedger and adopted by the Supreme Court of Canada in numerous cases, including *A.U.P.E. v. Lethbridge Community College*, [2004] 1 S.C.R. 727 (S.C.C.) at para. 25:

**25.** ...the words of an Act are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament.

95 As already noted, the defendants on the above motion to strike and on this leave motion have chosen not to file any responding material. The plaintiffs suggest that this alone should be fatal to the defendants' opposition to the plaintiffs' motion to seek leave. The plaintiffs rely on s. 138.8(2) which states that each side "shall serve and file one or more affidavits setting forth the material facts upon which each intends to rely." The plaintiffs also rely on the comments by van Rensburg J. in *Silver v. Imax Corp.*, [2008] O.J. No. 1844 (Ont. S.C.J.):

**17.** The *Securities Act* provides its own procedure in respect of the statutory remedy, that specifically requires proposed defendants to put forward information ... and that specifically authorizes examination on such information ...

**19.** We are left with what the statute prescribes - a mandatory requirement for each plaintiff and each proposed defendant to set out facts by affidavit, with a right to cross-examine the deponents of such affidavits.

96 However, these comments should be put into context by noting that they were made by van Rensburg J. on a motion to compel answers to questions refused during cross-examinations on a pending motion. Lax J. in *Ainslie, supra*, like Justice van Rensburg in *Imax Corp., supra*, was one of the first to consider an action brought under Part XXIII.1 of the *OSA*. In *Ainslie*, Justice Lax considered a motion by the plaintiffs to compel the defendants to file and serve an affidavit under s 138.8(2) of the *OSA*. I particularly note paras. 23 and 25 of that decision:

**23.** I respectfully suggest that these comments should be confined to the facts and circumstances at issue in *IMAX*. These comments were made in *obiter* in resolving a refusals motion in circumstances where the defendants had filed affidavit material. It is important to recognize that in *IMAX*, the court was not addressing the interpretation of s. 138.8(2).

**25.** Properly interpreted, the ordinary meaning of s. 138.8(2) is that a proposed defendant must file an affidavit only where it intends to lead evidence of material facts in response to the motion for leave.

97 I subscribe to this view advanced in *Ainslie* that the ruling in *IMAX* should be confined to the special facts of the refusals motion before the court. I find that the defendants, in opposing the plaintiffs' "leave" motion, may do so in the absence of filing any material.

#### **Limitation Period**

98 As a further preliminary matter, I must address the limitation period, as it applies to a claim under Part XXIII.1 of the *OSA*. The class period proposed by the plaintiffs is March 13, 2002 to September 18, 2008. Part XXIII.1 of the *OSA* did not come into force until December 31, 2005. Section 138.14 of the *OSA* provides:

**138.14** No action shall be commenced under s. 138.3,

(a) in the case of a misrepresentation in a document, later than the earlier of,

(i) three years after the date on which the document containing the misrepresentation was first released...

99 It is common ground that a three-year limitation period applies. What is at issue is the retrospective effect, if any, of Part XXIII.1 of the *OSA*.

100 The plaintiffs issued the Notice of Action on September 25, 2008. The defendants state that Part XXIII.1 is not retroactive and therefore the limitation period in s. 138.14 precludes the plaintiffs from relying on any core documents prior to September 26, 2005.

101 The plaintiffs state that Part XXIII.1 should be applied prospectively to an ongoing factual matrix. They rely on *Union des consommateurs c. Dell Computer Corp.*, [2007] 2 S.C.R. 801 (S.C.C.) at paras. 113-15:

**113.** Professor P.-A. Côté writes in *The Interpretation of Legislation in Canada* (3rd ed. 2000), at p. 169, that "retroactive operation of a statute is highly exceptional, whereas prospective operation is the rule". He adds that: "[a] statute has immediate effect when it applies to a legal situation that is ongoing at the moment of its commencement: the new statute governs the future developments of this situation" (p. 152). A legal situation is ongoing if the facts or effects are occurring at the time the law is being modified (p. 153). A statute of immediate effect can therefore modify the future effects of a fact that occurred before the statute came into force without affecting the prior legal situation of that fact.

**115.** Can the facts of the case at bar be characterized as those of an ongoing legal situation? If they can, the new legislation applies. If all the effects of the situation have occurred, the new legislation will not apply to the facts.

102 The retrospective application of a statute to a series of events that occurred both before and after that legislation came into force was addressed by the Supreme Court in *Épiciers unis Métro-Richelieu inc., division "Econogros" c. Collin*, [2004] 3 S.C.R. 257 (S.C.C.) at p. 280-81:

**46.** The principles of retroactivity, immediate application and retrospectivity of new legislation must not be confused with each other. **New legislation does not operate retroactively when it is applied to a situation made up of a series of events that occurred before and after it came into force or with respect to legal effects straddling the date it came into force** (Côté, *supra*, at p. 175). If events are under way when it comes into force, the new legislation will apply in accordance with the principle of immediate application, that is, it governs the future development of the legal situation (Côté, *supra*, at pp. 152 *et seq.*). If the legal effects of the situation are already occurring when the new legislation comes into force, the principle of retrospective effect applies. **According to this principle, the new legislation governs the future consequences of events that happened before it came into force but does not modify effects that occurred before that date** (Côté, *supra*, at pp. 133 *et seq.* and pp. 194 *et seq.*). When new legislation modifies those prior effects, its effect is retroactive (Côté, *supra*, at pp. 133 *et seq.*). Professor Driedger gave a good explanation of this distinction between retroactive and retrospective effect:

A retroactive statute is one that operates as of a time prior to its enactment. A retrospective statute is one that operates for the future only. It is prospective, but it imposes new results in respect of a past event. A retroactive statute operates backwards. **A retrospective statute operates forwards, but it looks backwards in that it attaches new consequences for the future to an event that took place before the statute was enacted.** A retrospective statute changes the law from what it was; **a retrospective statute changes the law from what it otherwise would be with respect to a prior event.**

(E.A. Driedger, "Statutes: Retroactive Retrospective Reflections" (1978), 56 *Can. Bar Rev.* 264, at pp. 268-69)

[Emphasis added.]

103 The Statement of Claim details a series of 53 documents disseminated by the Income Fund for public consumption between March 13, 2002 and June 30, 2008. In many of these documents, the Income Fund repeatedly asserts that it is a good corporate citizen operating lawfully in a competitive industry. The plaintiffs allege that this repeated assertion is a misrepresentation. Whether that is so is an issue to be left to the trial judge, assuming leave is granted. What I find at this

stage of the proceedings is that this repeated misrepresentation is one continuing fact situation: *Canada (Attorney General) v. Confederation Trust Co.*, [2003] O.J. No. 2754 (Ont. S.C.J.) at paras. 26-28. As such, commencing with the Income Fund Prospectus of March 13, 2002, the plaintiffs may rely on the disclosure documents in support of their position that these documents contain misrepresentations.

104 I also rely on s. 138.3(6) of the *OSA* to find that these representations made by the Income Fund, if found to be misrepresentations, may be treated and relied upon by the plaintiffs as a single misrepresentation.

#### ***The Statutory Leave Procedure***

105 Section 138.8(1) of the *OSA* requires that any action claiming secondary market misrepresentation must have leave of the court. The section provides as follows:

**138.8(1)** No action may be commenced under s. 138.3 without leave of the court granted upon motion with notice to each defendant. The court shall grant leave only where it is satisfied that,

- (a) the action is being brought in good faith; and
- (b) there is a reasonable possibility that the action will be resolved at trial in favour of the plaintiff.

106 Regarding the purpose of the leave test, I adopt these comments of van Rensburg J. in *Silver v. Imax Corp.* (2009), 66 B.L.R. (4th) 222 (Ont. S.C.J.):

**293.** The statutory cause of action for secondary market misrepresentation also serves a dual purpose, of permitting the recovery of damages by a shareholder, and as a deterrent to breach of a reporting issuer's continuous disclosure obligations under the *OSA*.

**294.** Similarly, the statutory cause of action was introduced as remedial legislation; that is, in recognition of the obstacles to pursuing claims for secondary market misrepresentation under common law. Accordingly, the leave test prescribed by the legislature should be interpreted so as to permit access to the courts by shareholders with legitimate claims.

#### ***Leave Test - Part I: Is the action brought in good faith?***

107 The first test under s. 138.8 is whether the action is brought in good faith. This is not to be presumed and must be established by the plaintiffs on a balance of probabilities: see *Silver v. Imax Corp.* (2009), 66 B.L.R. (4th) 222 (Ont. S.C.J.) at para. 295.

108 Each of the plaintiffs in their affidavits state:

I have also commenced this action to ensure that the defendants are held accountable for their behaviour and to deter similar conduct by others. I have no ulterior motive, nor any improper or collateral purpose in commencing this action.

109 The plaintiffs also note that the proposed defendants, Gary D. Cooley ("Cooley") and Frank Larson ("Larson") pleaded guilty in the U.S. to conspiracy of a commercial nature involving some of these corporate defendants. The plaintiffs rely on these guilty pleas as evidence of their belief that they have a chance of success against Larson and Cooley in this proposed class action. The plaintiffs have a financial interest in the action, as they acquired units during the Class Period. They also note that there is no evidence:

- (a) that they have brought this motion for an improper purpose;
- (b) of malice, bad faith or dishonesty;
- (c) of a prior conflict between the parties; or

(d) an intention to seek an improper advantage.

110 Neither the defendants nor the proposed defendant Larson dispute a finding that the plaintiffs are acting in good faith. That leaves the proposed defendant Cooley. He states that there is no evidence that he knowingly influenced the Income Fund with respect to the alleged misrepresentations and that accordingly there is no evidence from which the plaintiffs can establish good faith with regards to the claims they advance against Cooley.

111 To determine whether the plaintiffs' claim against Cooley has been brought in good faith in the context of s. 138.8, I have regard to the definition of "good faith" in *Black's Law Dictionary*, 9<sup>th</sup> ed., B. Garner, Ed. (St. Paul: Thomson Reuters, 2009):

A state of mind consisting in (1) honesty in belief or purpose, (2) faithfulness to one's duty or obligation, (3) observance of reasonable commercial standards or fair dealing in a given trade or business, or (4) absence of intent to defraud or to seek unconscionable advantage.

112 I am also guided by the analysis of van Rensburg J. in *Silver v. Imax Corp.* (2009), 66 B.L.R. (4th) 222 (Ont. S.C.J.):

**308.** I interpret "good faith" in the context of s. 138.8, to require the plaintiffs to establish that they are bringing their action in the honest belief that they have an arguable claim, and for reasons that are consistent with the purpose of the statutory cause of action and not for an oblique or collateral purpose. "Good faith" involves a consideration of the subjective intentions of the plaintiffs in bringing their action, which is to be determined by considering the objective evidence.

113 The good faith inquiry with regards to Cooley involves an analysis of the objective evidence within the context of the legislative scheme. For liability to accrue under s. 138.3, an individual must be a responsible issuer, a director or officer of a responsible issuer or an influential person at the time the impugned document was released. The plaintiffs allege that at the relevant time Cooley was either an officer or an influential person.

114 Section 1(1) of the *OSA* defines "officer":

with respect to an issuer or registrant, means,

- (a) a chair or vice-chair of the board of directors, a chief executive officer, a chief operating officer, a chief financial officer, a president, a vice-president, a secretary, an assistant secretary, a treasurer, an assistant treasurer and a general manager,
- (b) every individual who is designated as an officer under a by-law or similar authority of the registrant or issuer, and
- (c) every individual who performs functions similar to those normally performed by an individual referred to in clause (a) or (b).

115 It is admitted that Cooley was a vice-president of Sales and Marketing of Arctic and Arctic International, Inc. Although he was not a director or trustee of the Income Fund, it should be noted that Arctic International is wholly-owned by Arctic Glacier Inc. which, in turn, is wholly-owned by the Income Fund.

116 As per s. 1(1)(a) of the above definition in the *OSA*, a vice-president of an issuer is an officer for purposes of s. 138.8. Having determined that Cooley was a vice-president, it is necessary to determine whether he was a vice-president of a responsible issuer. To answer this question at this stage of the analysis, I must only determine that there is enough objective evidence for the plaintiffs to support their good faith intentions in seeking leave to advance their s. 138.3 claims.

117 The definition of a "responsible issuer" is found in s. 138.1:

"responsible issuer" means,

- (a) a reporting issuer, or

(b) any other issuer with a real and substantial connection to Ontario, any securities of which are publicly traded;

A "reporting issuer" is defined in s. 1(1) of the *OSA*. Of particular note is subsection (e):

"reporting issuer" means an issuer ...

(e) that is the company whose existence continues following the exchange of securities of a company by or for the account of such company with another company or the holders of the securities of that other company in connection with,

(i) A statutory amalgamation or arrangement ...

where one of the amalgamating or merged companies or the continuing company has been a reporting issuer for at least twelve months

118 When the Income Fund was created, securities were exchanged so that the Income Fund became the holder of all the issued common shares of Arctic. At that time, Arctic Group, the predecessor of Arctic, had been in existence for more than 12 months.

119 I find that there is sufficient objective evidence for the purposes of the good faith determination to find that Cooley was an officer of a responsible issuer and might be liable under s. 138.3 through his acquiescence to the release of the misrepresentational documents.

120 As stated, the remaining defendants and the proposed defendant Larson do not challenge the assertion that the plaintiffs have brought this action in good faith. With respect to them and the proposed defendant Cooley, I note that the plaintiffs have a personal financial interest in the action as well as a stated intent in starting this action to hold the defendants accountable for their behaviour and to deter similar conduct by others. There is no evidence of ulterior motive or conflict of interest. Accordingly, I find that the plaintiffs have met the "good faith" test under s. 138.8(1)(a) of the *OSA*.

#### ***Part II of the Statutory Leave Test: Is there a reasonable possibility that the plaintiffs will succeed at trial?***

121 To be granted leave on this motion, the plaintiffs must demonstrate at least a reasonable possibility of success at trial, assuming a finding that the action has been brought in good faith: see s. 138.8(1)(a) and (b) of the *OSA*. As stated in *Silver v. Imax Corp.* (2009), 66 B.L.R. (4th) 222 (Ont. S.C.J.) at para. 330:

**330.** The statutory leave provision is designed to prevent an abuse of the court's process through the commencement of actions that have no real foundation, actions that are based on speculation or suspicion rather than evidence.

122 The legislative history of Part XXIII.1 of the *OSA* was extensively reviewed by van Rensburg J. in *Silver v. Imax Corp.* (2009), 66 B.L.R. (4th) 222 (Ont. S.C.J.) and by Lax J. in *Ainslie*, *supra*. Drawing on these reviews, I am satisfied that Part XXIII.1 is on the one hand remedial, while on the other, it seeks "to protect defendants from coercive litigation and to reduce their exposure to costly proceedings." (*Ainslie*, *supra* at para. 15). It is this latter aim that the test in s. 138.8(1)(b) seeks to address. Having found that the plaintiffs brought this action in good faith, I must now decide whether "there is a reasonable possibility that the action will be resolved at trial in favour of the plaintiff[s]."

123 The task here is to attempt to bring clarity to the meaning of "reasonable possibility," as that phrase relates to these facts.

124 In the context of a dangerous offender application brought by the Crown in *R. v. E. (E.)*, [2003] O.J. No. 1518 (Ont. S.C.J.), the defence sought to show that there was a reasonable possibility of eventual control of the accused in the community. In attempting to bring meaning to those words, the court stated:

**41.** ... it is important to underline the word reasonable. It is not a mere possibility, or any possibility, but one that is reasonable. Clearly, that means a possibility that has a reasonable possibility of success, in the mind of the Court.

42. The "possibility" must have an air of reality, and have more substance than simply faith or hope.

125 As already noted, statutory language should be read in its grammatical and ordinary sense. A review of dictionary meanings of these words indicates the following: *The Canadian Oxford Dictionary* (Toronto: Oxford University Press, 1998) defines "reasonable" as:

1. Having sound judgment; moderate; ready to listen to reason.
2. In accordance with reason; not absurd.
3. Within the limits of reason; fair, moderate ...

126 *Black's Law Dictionary*, *supra*, defines "reasonable" as:

1. Fair, proper, or moderate under the circumstances.
2. According to reason.

127 The *Canadian Oxford Dictionary*, *supra*, defines "possibility" as:

1. The state or fact of being possible, or an occurrence of this.
2. A thing that may exist or happen ...

128 *Black's Law Dictionary*, *supra*, defines "possibility" as:

1. An event that may or may not happen ...

129 Van Rensburg J. in *Silver v. Imax Corp.* (2009), 66 B.L.R. (4th) 222 (Ont. S.C.J.) at paras. 313-346, considered the language of s. 138.8(1)(b). I find no reason to depart from her analysis. In particular, I note the following paras:

**324.** "Reasonable" is used instead of "mere" to denote that there must be something more than a *de minimis* possibility or chance that the plaintiff will succeed at trial. The adjective "reasonable" also reminds the court that the conclusion that a plaintiff has a reasonable possibility of success at trial must be based on a reasoned consideration of the evidence.

**326.** In undertaking this evaluation the court must keep in mind that there are limitations on the ability of the parties to fully address the merits because of the motion procedure. There is no exchange of affidavits of documents, no discovery (although affiants may be cross-examined) and witnesses cannot be summoned. The credibility of a witness' evidence given by affidavit in a motion, irrespective of how searching an out-of-court cross-examination may be, can only be fully determined when it is tested in open court.

**330.** The statutory leave provision is designed to prevent an abuse of the court's process through the commencement of actions that have no real foundation, actions that are based on speculation or suspicion rather than evidence.

130 In my view, in assessing the existence of a reasonable possibility of success at trial, I must consider the relevant evidence, within the context of this motion. The applicable standard is more than a mere possibility of success, but is a lower threshold than a probability.

### **Section 138.3 — Elements to be Proven**

131 The plaintiffs have limited their claim to rely only on core documents. For the purposes of this motion, the defendants do not oppose the following aspects of the pleaded s. 138.3 offences regarding the core documents, namely that:

- the Fund is a "responsible issuer";

- the Fund documents are "documents" that were released by the Fund;
- the Fund documents contain a "misrepresentation";
- the Plaintiffs acquired the Fund's securities during the Class period;
- the Trustees of the Fund, namely Clark, Nagy, Filmon and Swaine, are "directors" of the Fund;
- McMahon was a *de facto* "officer" of the Fund in his roles as CEO and CFO of Arctic Glacier Inc.;
- Bailey became *de facto* "officer" of the Fund as of December 29, 2006 ... when he became CFO of Arctic Glacier Inc.; and
- Johnson, as a director, and McMahon and Bailey as officers of Arctic Glacier Inc., are "influential persons" of the Fund because they are "directors" and "officers" of a subsidiary of the Fund.

132 To demonstrate that they have a reasonable possibility of success at trial, the plaintiffs must do so with each element of s. 138.3 and with each defendant: *Imax, supra*, at paras. 334-336.

133 Based on the admissions by the defendants, I find that the elements of the cause of action in s. 138.3 have been met for the purposes of this motion as against the Income Fund. Accordingly, leave under s. 138.8 is granted as against the Fund.

134 The defendants dispute, however, that there is a reasonable possibility of success at trial with respect to Arctic as a responsible issuer or an influential person. The defendants assert that Arctic is not an "influential person" because it is not a "promoter" or an "insider" of the Fund. Consequently, the defendants argue that Arctic's directors and officers are not directors and officers of a "responsible issuer" or an "influential person."

135 The defendants also dispute that the trustees of the Fund can be characterized as "influential persons" of the Fund, because they are not "promoters." Finally, the defendants allege that Bailey was not an "officer" of Arctic before December 29, 2006 and that he was not an "expert" of the Fund.

#### ***The Trustees***

136 The defendants admit that the defendants Clark, Nagy, Filmon and Swaine, as trustees of the Income Fund, are "directors" of the Income Fund, under s. 138.3(1)(b) of the *OSA*. As directors of a responsible issuer, namely the Income Fund, liability accrues to the trustees under s. 138.3(1)(b), subject to any statutory defences.

137 The plaintiffs also state that these defendants Clark, Nagy, Filmon and Swaine are liable under s. 138.3(1)(b) of the *OSA* as "influential persons" within the meaning of 138.3(1)(d) of the *OSA*. An "influential person" is defined in s. 138.1 of the *OSA*:

"influential person" means, in respect of a responsible issuer...

(a) a promoter...

"Promoter" is defined in s. 1(1) of the *OSA*:

"promoter" means,

(a) a person or company who, acting alone or in conjunction with one or more other persons, companies or a combination thereof, directly or indirectly, takes the initiative in founding, organizing or substantially reorganizing the business of an issuer ...

These defendants, as trustees of the Income Fund, were directly involved in the formation of the Income Fund, which the defendants have conceded is "an issuer." Each trustee, as an "influential person" acting as the controlling mind of the Income Fund, would knowingly have influenced the Income Fund as the responsible issuer to release the core documents in question.

Accordingly, I find that there is a reasonable chance of success at trial against the defendants Clark, Nagy, Filmon and Swaine under s. 138.3 as "directors" and as "influential persons."

### **Arctic Glacier Inc.**

138 The plaintiffs assert that Arctic is liable under s. 138.3 as an "influential person" of the Income Fund. "Influential person" is defined in s. 138.1 of the *OSA*:

"influential person" means, in respect of a responsible issuer...

(a) a promoter...

139 The defendants have conceded that the Fund is a "responsible issuer" under the *OSA*. The plaintiffs assert that Arctic is a "promoter" of the Income Fund. "Promoter" is defined in s. 1(1) of the *OSA*:

"promoter" means,

(a) a person or company who ... takes the initiative in founding, organizing ... the business of an issuer, or ...

The plaintiffs submit that Arctic is a promoter, as it was involved in the formation of the Fund. The defendants dispute this characterization, stating that there is no evidence to support the finding that Arctic took the "initiative in founding or organizing" the business of the Income Fund. In support of their position, the plaintiffs point to the 2003 Renewal Annual Information Form issued by Arctic which states in part:

### **Recent Developments**

The Arctic Group Inc. ("Arctic Group"), the predecessor corporation to Arctic Glacier Inc. was incorporated in 1996. In November 2001, the board of directors and management of Arctic Group considered several alternatives to enhance shareholder value ... The board of directors of Arctic Group concluded that the best alternative to accomplish these goals would be to convert Arctic Group into an income trust fund.

### **Arrangement Agreement**

On January 31, 2002, Arctic Glacier, Arctic Group and the Fund entered into the Arrangement Agreement which provided for implementation of the Arrangement pursuant to Section 193 of the ABCA. ... The Arrangement became effective on March 22, 2002. On the Effective Date, each of the events below occurred in the following sequence:

(a) all of the right, title and interest of Arctic Group securityholders in the Arctic Group securities was transferred to Arctic Glacier in exchange for Subordinated Notes ...

(d) Arctic Glacier and Arctic Group were amalgamated and continued as one corporation and:

(i) all of the issued and outstanding Arctic Group securities, all of which were then held by Arctic Glacier, were cancelled without any repayment of capital; and

(ii) the name of the amalgamated corporation became "Arctic Glacier Inc." ...

Upon completion of the Arrangement, the Fund became the holder of all of the issued and outstanding Common Shares and Subordinated Notes.

140 I find that Arctic and its predecessor, Arctic Group Inc., were "at the very heart of the ... reorganization of the company" and that Arctic is thus a "promoter": see *Gordian Financial Group Inc., Re* (1995), 4 A.S.C.S. 1690 (Alta. Securities Comm.) at para. 34.

141 As a "promoter," Arctic is an "influential person." For liability to accrue to Arctic as an "influential person" under s. 138.3(1)(d), the plaintiffs must show that Arctic as an influential person, knowingly influenced,

- (i) the responsible issuer or any person or company acting on behalf of the responsible issuer to release the document, or
- (ii) a director or officer of the responsible issuer to authorize, permit or acquiesce in the release of the document ...

The Income Fund has no separate business and is entirely dependent upon the operations of Arctic. The documents at issue are reports of the business of Arctic. Additionally, these reports were signed by Arctic's officers. It follows that Arctic must have influenced the release of the impugned documents.

142 I find that Arctic, as an "influential person," knowingly influenced the release of the impugned documents. Accordingly, I find that the plaintiffs have a reasonable possibility of success at trial against Arctic as "an influential person."

143 The plaintiffs submit that Arctic can also be characterized as a "responsible issuer" as it is a "reporting issuer." A responsible issuer is defined in s. 138.1 as a "reporting issuer." This term is defined in s. 1(1) of the *OSA*:

"reporting issuer" means an issuer...

(e) that is the company whose existence continues following the exchange of securities of a company by or for the account of such company with another company or the holders of the securities of that other company in connection with,

- (i) a statutory amalgamation or arrangement...

where one of the amalgamating or merged companies or the continuing company has been a reporting issuer for at least twelve months...

Referencing the 2003 Renewal Annual Information Form, the plaintiffs assert that as Arctic Group completed its initial public offering on March 25, 1997, it was in existence for at least 12 months prior to the amalgamation and was thus a "reporting issuer."

144 The defendants assert that Arctic is not a "reporting issuer." They state that on March 22, 2002, after Arctic Group was amalgamated into the new Income Fund, the common shares of Arctic were de-listed from the TSX when units of the Fund commenced trading. The Alberta Securities Commission followed with a decision on September 30, 2002 deeming Arctic to no longer be a reporting issuer under the securities legislation of Alberta, Saskatchewan, Manitoba, Ontario and Quebec. Accordingly, the defendants state Arctic has not been a "reporting issuer" as of March 22, 2002. I agree.

145 I find that Arctic is not a "responsible issuer."

#### ***Defendant McMahon***

146 McMahon was the Executive Vice President of Arctic from April 2003 until December 2006, and Chief Financial Officer from April 2001 until December 2006. He became a director of Arctic September 21, 2007 and was the Chief Executive Officer of the Income Fund from December 2006 onwards. The defendants have admitted that McMahon, as CFO and CEO of Arctic was a *de facto* "officer" of the Income Fund for the entire Class Period.

147 The term "officer" is defined in s. 1(1) of the *OSA*:

An officer, with respect to an issuer... means,

(a) a chair or vice-chair of the board of directors, chief executive officer, a chief operating officer, a chief financial officer, a president, a vice-president, a secretary, an assistant secretary, a treasurer, an assistant treasurer and a general manager...

(c) every individual who performs functions similar to those normally performed by an individual referred to in clause (a)

148 The Income Fund performs its operations entirely through Arctic whose officers perform the role which officers of the Income Fund would, if the Income Fund had officers. It apparently does not. The various documents filed by the plaintiffs on this motion appear to indicate that the officers of Arctic held themselves out to be officers of the Income Fund, at least in the core documents.

149 Under s. 138.3(1)(c) of the *OSA*, officers of responsible issuers are liable if they "authorized, permitted or acquiesced in the release of the document."

150 Throughout the Class Period, McMahon signed Form 52-109FT2. Therein he certified that he reviewed the annual or interim filings of the fund and with respect to each such document that they "do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made." Initially, McMahon signed some annual filings directly.

151 I find that during the Class Period, McMahon was an officer of the Income Fund and that, as such, the plaintiffs have a reasonable chance of successfully proving his liability under s. 138.3(1)(c) of the *OSA* at trial.

#### ***Defendant Bailey***

152 Bailey was CFO of Arctic as of December 29, 2006 and continued to hold that position at least for the balance of the Class Period. Prior to that date, from October 6, 2003 to December 29, 2006, Bailey was the Vice President of Accounting and Corporate Comptroller of Arctic. The defendants have admitted for purposes of this motion that Bailey was a *de facto* officer of the Income Fund. As did McMahon, Bailey signed Form 52-109FT2 throughout the Class Period certifying that he reviewed the impugned documents and that they did not contain any untrue statements. He also signed some of the impugned documents directly. As is the case with McMahon, I find that the plaintiffs have established at least a reasonable possibility of success at trial as against Bailey as an officer of the Income Fund for the class period starting December 29, 2006.

153 For the period prior to December 29, 2006, when Bailey held the position of the VP of Accounting and Corporate Comptroller of Arctic, the plaintiffs characterize this position as an "officer" of the Income Fund. They rely on *Momentas Corp., Re 2006 LNONOSC 778* at para. 101 where the Ontario Securities Commission ("OSC") articulated the test for determining if a person is a *de facto* director or officer. The OSC found that if a person is "an integral part of the mind and management of the company," then that person is a *de facto* director or officer. The defendants dispute this characterization and the application of the *Momentas Corp.* test to these facts. They state that the only evidence with respect to Bailey's role in Arctic prior to December 29, 2006, is a reference to Bailey, as one of the officers of Arctic, as senior management of the Income Fund. The defendants state that this is insufficient. I agree.

154 The plaintiffs plead that Bailey is liable as an "expert," as per s. 138.3(1)(e) of the *OSA* in his role as an officer of Arctic prior to December 29, 2006. "Expert" is defined in s. 138.1 of the *OSA*:

"expert" means a person or company whose profession gives authority to a statement made in a professional capacity by the person or company including, without limitation, an accountant...

Prior to December 2006, Bailey was the VP of Accounting at Arctic. However, there is no evidence that statements, opinions or reports in the core documents made by Bailey prior to that date were made in his capacity as an "expert" (rather than as an officer of Arctic.) Further, there is no evidence that Bailey consented to being an "expert" as required by section 138.3(1)(e) (iii). I find that there is no reasonable possibility of establishing at trial that Bailey is an "expert" of the Fund.

155 The defendants have admitted that Bailey, as an officer of Arctic, is an "influential person" of the Fund from December 2006 onwards and I so find.

**Defendant Johnson**

156 The defendants have admitted that during the Class Period, Johnson was a director of Arctic. I have found that Arctic is an "influential person" as defined in s. 138.1 of the *OSA*. For purposes only of this motion, the defendants admit that Johnson, as a director of Arctic is an "influential person" of the Income Fund, as a "director" of Arctic, a subsidiary of the Income Fund.

157 I find that there is a reasonable possibility that the plaintiffs will succeed at trial against Johnson as an "influential person" of the Income Fund under s. 138.3(1)(d). In my view, a sufficiently strong inference can be drawn that Johnson as a director of a subsidiary of the Income Fund was in a position to knowingly influence the Income Fund to release the impugned documents.

**Proposed Defendant Larson**

158 The parties agree that during the Class Period, Larson was a senior Vice President, and from 2003 onwards, the Executive Vice-President of Arctic, although a resident and citizen of the United States. Based on my finding above, as an officer of Arctic, he was a *de facto* officer of the Income Fund.

159 As an officer of the Income Fund, liability would accrue against him if he authorized, permitted or acquiesced to the release of the impugned documents.

160 That leads me to the interpretation of the "acquiescence" threshold. The plaintiffs state that "acquiescence" is a low threshold which is met by Larson's position as Executive Vice-President of Arctic. They rely on *Katsigiannis v. Kottick-Katsigiannis* (2001), 55 O.R. (3d) 456 (Ont. C.A.), in which the Court, at para. 47, stated that: "[t]o acquiesce' is to agree tacitly, silently or passively to something ... acquiescence implies unstated consent."

161 Both Cooley and Larson have admitted their involvement in certain anti-competitive conduct by Arctic in the U.S. through its American subsidiary, Arctic International.

162 The defendants rely on *JLL Patheon Holdings, LLC v. Patheon Inc.* (2009), 64 B.L.R. (4th) 98 (Ont. S.C.J.). In the context of a third-party proxy solicitation, the Court held at para. 49:

... the ordinary meaning of "acquiescence" upon which JLL relies carries with it the correlative that the party has at least some element of control over the act in question in the sense of being able to oppose successfully the occurrence of the legal consequences that flow from "acquiescence." This is captured by the reference to "implied consent" in the definition of "acquiesce" in Black's Law Dictionary 7<sup>th</sup> ed., which reads as follows: "To accept tacitly or passively; to give implied consent to (an act)." That concept is also present in the definition in the *Katsigiannis* decision.

163 As Larson (and as did Cooley), by virtue of his guilty plea, admitted his involvement in anti-competitive conduct in the United States, it is clear that he, as an officer of the Income Fund (which was a responsible issuer), was probably aware that at least certain of the core documents in question contained misrepresentations. That is sufficient, in my view, to find that there is a reasonable possibility that the plaintiffs will succeed at trial against Larson as a *de facto* officer of the Income Fund.

164 The plaintiffs have also asserted that Larson was "an influential person" who would have liability if he "knowingly influenced the release of the impugned documents." Though I am satisfied that the plaintiffs have met the test with respect to "acquiesce," I am not satisfied that they have done so with respect to "knowingly influenced the release of the documents." Accordingly, I find that the plaintiffs do not have a reasonable possibility of proving at trial that Larson is an "influential person" under s. 138.3 of the *OSA*.

**Proposed Defendant Cooley**

165 Cooley became Vice President, Sales and Marketing of Arctic prior to the filing of the third quarter 2005 Report. The plaintiffs claim no prior liability as against Cooley. Both Cooley and Larson are listed in the Income Fund's 2006 Annual Report as senior management.

166 The same reasoning as applied to Larson also applies to this proposed defendant. I find that the plaintiffs have a reasonable possibility of success against Cooley as a *de facto* officer of the Income Fund, a responsible issuer, under s. 138.3(1)(c), but not as an "influential person."

#### ***Evidence of Anti-Competitive Conduct***

167 To be granted leave, the plaintiffs must show that the evidence would support a finding, at least of a "reasonable possibility" that the Income Fund knew of or acquiesced in certain anti-competitive behaviour by one or more of its subsidiaries. To that end, the plaintiffs rely on two time periods, namely March 2002 to December 2004 and December 2004 to September 2008.

#### *March 2002 to December 2004*

168 During the period of 2002 - 2004, the plaintiffs allege that Arctic was engaged in unlawful, anti-competitive conduct in Alberta, as evidenced by an action filed by a competitor of Arctic, namely Polar Ice Express Inc. In this case, *Polar Ice Express Inc. v. Arctic Glacier Inc.*, 2007 ABQB 717 (Alta. Q.B.), released December 3, 2007, Polar Ice contended that Arctic unlawfully interfered with Polar Ice's contractual relations and commercial interests in 2002. The plaintiffs in the present case point to the following findings made by the trial judge:

- (a) In 2002, Arctic's sales manager for the Edmonton Region offered a \$10,000 bribe to an employee of a customer, to grant Arctic an exclusive contract to supply ice;
- (b) Arctic targeted stores approached by Polar and cut its price only to those stores;
- (c) Arctic made other offers to liquor outlets and to Sobeys to match or even undercut Polar's price as a direct and deliberate attempt to induce those businesses to breach their contracts with Polar;
- (d) The conduct of Arctic to that end was egregious which ordinarily would call for punitive damages;
- (e) The trial judge did not award punitive damages but awarded damages in the amount of \$50,000.

169 The plaintiffs state that this conduct was not disclosed during the class period, during which the defendants continued to represent themselves as "good corporate citizens."

170 In response, the defendants state:

- (a) It is unclear when the impugned activity became known to Arctic. As the decision was not released until December 2007, Arctic could not have been aware of those findings prior to that date.
- (b) The trial judge did not make a finding of systemic corporate wrongdoing.
- (c) This Alberta decision is not sufficient evidence to support a finding that the plaintiffs have a reasonable possibility of success at trial with regard to the 2002 - 2004 period.

171 The question is whether the defendants had knowledge of the conduct or Polar's allegations in that action prior to the release of that decision in December 2007. In my view, it is at least reasonably possible that the defendants were aware of the conduct or allegations raised in that action. Accordingly, I find that the plaintiffs have a reasonable possibility of success at trial with regard to the 2002 - 2004 period.

#### *December 2004 to September 2008*

172 In December 2004, Arctic International, a wholly-owned subsidiary of Arctic, and consequently the Income Fund, acquired the Party Time Ice group of companies ("Party Time") based in Michigan. Party Time was then the largest ice business in Michigan, serving a population base of ten million people.

173 In 2009, Arctic International admitted to its participation in an anti-competitive conspiracy in Michigan during the period of January 1, 2001 to at least July 17, 2007. Arctic International pleaded guilty to a charge of participating in a criminal, anti-competitive conspiracy in the United States. Under the terms of the plea agreement, Arctic International agreed to pay a fine of \$9 million U.S. Under the terms of the plea agreement, Arctic International admitted that:

Beginning January 1<sup>st</sup>, 2001, and continuing until at least July 17<sup>th</sup>, 2007, the exact dates being unknown to the United States, the defendant and co-conspirators entered into and engaged in a conspiracy to suppress and eliminate competition by allocating packaged-ice customers in southeastern Michigan and the Detroit, Michigan, metropolitan area. The charged conspiracy unreasonably restrained interstate trade and commerce, in violation of Section 1 of the Sherman Act...

174 Canadian counsel for the Income Fund and the Corporate Secretary testified under oath that Arctic International had participated in the conspiracy.

175 The plaintiffs state that from the acquisition of Party Time in December 2004 until the end of the Class Period, there should be no doubt that the Income Fund's subsidiary, Arctic International, was not a "good corporate citizen operating lawfully in a very competitive market," contrary to the representations in the defendant company's core documents.

176 The defendants state that the U.S. Department of Justice charges were not laid within the Class Period and there is no evidence that the defendants knew or ought to have known about the anti-competitive activities in Michigan.

177 Although the evidentiary trail at this stage is not perfect, I nevertheless conclude that the plaintiffs have demonstrated at least a 'reasonable possibility' of success at trial with respect to the period of December 2004 to the end of the Class Period.

178 In the context of this leave motion, the defendants, as they did in the motion to strike, raised the concern that the plaintiffs failed to adequately plead an "anti-competitive conspiracy." As I did in the strike motion and based on the same reasoning, I find that the pleading of an anti-competitive conspiracy may stand.

### **Conclusion**

179 For reasons noted, I find that the plaintiffs have met the "leave test" under s. 138.8 of the *OSA*. The plaintiffs may pursue a statutory claim for misrepresentation in the secondary market under s. 138.3(1) of the *OSA* against the defendants, and the proposed defendants Cooley and Larson, subject to my findings in these reasons. An order may go granting the plaintiffs' leave to plead the causes of action in Part XXIII.1 of the *OSA*, and that the proposed defendants, Cooley and Larson may be added as party defendants.

### **C. Certification Motion**

180 The plaintiffs, by motion, seek an order certifying this action as a class proceeding.

181 Section 5(1) of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 ("CPA") articulates the test for certification:

5(1) The court shall certify a class proceeding on a motion under section 2, 3 or 4 if,

- (a) the pleadings or the notice of application discloses a cause of action;
- (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
- (c) the claims or defences of the class members raise common issues;

- (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
- (e) there is a representative plaintiff or defendant who,
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

182 Certification of a class proceeding is mandatory if all five of the s. 5(1) requirements are met.

183 In considering the requirements detailed in s. 5(1) of the *CPA*, I remain mindful of these additional provisions in the *CPA*:

5(5) An order certifying a class proceeding is not a determination of the merits of the proceeding.

6. The court shall not refuse to certify a proceeding as a class proceeding solely on any of the following grounds:

1. The relief claimed includes a claim for damages that would require individual assessment after determination of the common issues.
2. The relief claimed relates to separate contracts involving different class members.
3. Different remedies are sought for different class members.
4. The number of class members or the identity of each class member is not known.
5. The class includes a subclass whose members have claims or defences that raise common issues not shared by all class members.

184 The test for certification is a procedural endeavour. It is not meant to be a test of the merits of the action. The question at a certification stage is not whether the plaintiffs' claims are likely to succeed on the merits, but whether the action can be appropriately prosecuted as a class proceeding: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 16.

185 This point was further developed by the Ontario Court of Appeal in *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 50:

**50.** *Hollick* also makes clear that this does not entail any assessment of the merits at the certification stage. Indeed, on a certification motion, the court is ill-equipped to resolve conflicts in the evidence or to engage in finely calibrated assessments of evidentiary weight. What it must find is some basis in fact for the certification requirement in issue.

186 I also note this general observation on class proceedings by van Rensburg J. in *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.) at para. 10:

**10.** Class actions offer three important advantages. They serve judicial economy by avoiding unnecessary duplication in fact-finding and legal analysis. By allowing fixed litigation costs to be divided over a large number of plaintiffs, access to justice is improved by making economical the prosecution of claims that would otherwise be too costly to prosecute individually. Class actions serve efficiency and justice by ensuring that actual and potential wrongdoers do not ignore their obligations to the public (this is the "behaviour modification" element) (*Western Canadian Shopping Centres v. Dutton*, [2001] 2 S.C.R. 534, paras. 27-29). See also *Hollick v. Toronto (City)*, [2001] 3 S.C.R. 158 at paras. 14-16.

**Section 5(1)(a) CPA: Do the pleadings disclose a cause of action?**

187 Section 5(1)(a) articulates the same test I addressed above in the defendants' motion to strike.

188 The *CPA* is remedial and should be given a broad and liberal interpretation, as affirmed by McLachlin C.J.C. in *Hollick*, *supra* at paras. 14-16:

**14.** The legislative history of the *Class Proceedings Act, 1992*, makes clear that the Act should be construed generously. Before Ontario enacted the *Class Proceedings Act, 1992*, class actions were prosecuted in Ontario under the authority of Rule 12.01 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194. That rule provided that

[w]here there are numerous persons having the same interest, one or more of them may bring or defend a proceeding on behalf or for the benefit of all, or may be authorized by the court to do so.

While that rule allowed courts to deal with relatively simple class actions, it became clear in the latter part of the 20<sup>th</sup> century that Rule 12.01 was not well-suited to the kinds of complicated cases that were beginning to come before the courts. These cases reflected "[t]he rise of mass production, the diversification of corporate ownership, the advent of the mega-corporation, and the recognition of environmental wrongs": *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534, 2001 SCC 46 at para. 26. They often involved vast numbers of interested parties and complex, intertwined legal issues — some common to the class, some not. While it would have been possible for courts to accommodate moderately complicated class actions by reliance on their own inherent power over procedure, this would have required courts to devise *ad hoc* solutions to procedural complexities on a case-by-case basis: see *Western Canadian Shopping Centres*, at para. 51. The *Class Proceedings Act, 1992*, was adopted to ensure that the courts had a procedural tool sufficiently refined to allow them to deal efficiently, and on a principled rather than *ad hoc* basis, with the increasingly complicated cases of the modern era.

**15.** The Act reflects an increasing recognition of the important advantages that the class action offers as a procedural tool. As I discussed at some length in *Western Canadian Shopping Centres* (at paras. 27-29), class actions provide three important advantages over a multiplicity of individual suits. First, by aggregating similar individual actions, class actions serve judicial economy by avoiding unnecessary duplication in fact-finding and legal analysis. Second, by distributing fixed litigation costs amongst a large number of class members, class actions improve access to justice by making economical the prosecution of claims that any one class members would find too costly to prosecute on his or her own. Third, class actions serve efficiency and justice by ensuring that actual and potential wrongdoers modify their behaviour to take full account of the harm they are causing, or might cause, to the public. In proposing that Ontario adopt class action legislation, the Ontario Law Reform Commission identified each of these advantages: see Ontario Law Reform Commission, *Report on Class Actions* (1982), vol. I, at pp. 117-45; see also Ministry of the Attorney General, *Report of the Attorney General's Advisory Committee on Class Action Reform* (February 1990), at pp. 16-18. In my view, it is essential therefore that courts not take an overly restrictive approach to the legislation, but rather interpret the Act in a way that gives full effect to the benefits foreseen by the drafters.

16 It is particularly important to keep this principle in mind at the certification stage. In its 1982 report, the Ontario Law Reform Commission proposed that new class action legislation include a "preliminary merits test" as part of the certification requirements. The proposed test would have required the putative class representative to show that "there is a reasonable possibility that material questions of fact and law common to the class will be resolved at trial in favour of the class": *Report on Class Actions*, *supra*, vol. III, at p. 862. Notwithstanding the recommendation of the Ontario Law Reform Commission, Ontario decided not to adopt a preliminary merits test. Instead it adopted a test that merely requires that the statement of claim "disclos[e] a cause of action": see *Class Proceedings Act, 1992*, s. 5(1)(a). Thus the certification stage is decidedly not meant to be a test of the merits of the action: see *Class Proceedings Act, 1992*, s. 5(5) ("An order certifying a class proceeding is not a determination of the merits of the proceeding"); see also *Caputo v. Imperial Tobacco Ltd. (1997)*, 34 O.R. (3d) 314 (Gen. Div.), at p. 320 ("any inquiry into the merits of the action will not be relevant on a

motion for certification"). Rather the certification stage focuses on the form of the action. The question at the certification stage is not whether the claim is likely to succeed, but whether the suit is appropriately prosecuted as a class action: see generally *Report of the Attorney General's Advisory Committee on Class Action Reform*, at pp. 30-33.

189 I also note the principles applicable to a s. 5(1)(a) determination articulated by Cumming J. in *Ford v. F. Hoffmann-La Roche Ltd.* (2005), 74 O.R. (3d) 758 (Ont. S.C.J.) at para. 17:

- (a) no evidence is admissible for the purposes of determining the s. 5(1)(a) criterion;
- (b) all allegations of fact pleaded, unless patently ridiculous or incapable of proof, must be accepted as proved and thus assumed to be true;
- (c) the pleading will be struck out only if it is plain, obvious and beyond doubt that the plaintiff cannot succeed and only if the action is certain to fail because it contains a radical defect;
- (d) the novelty of the cause of action will not militate against the plaintiff;
- (e) matters of law not fully settled in the jurisprudence must be permitted to proceed; and
- (f) the statement of claim must be read generously to allow for inadequacies due to drafting frailties and the plaintiff's lack of access to key documents and discovery information: *Hunt v. T & N plc* [1990] 2 S.C.R. 959, [1990] S.C.J. No. 93 (S.C.C.), at pp. 990-91 S.C.R.; *Anderson v. Wilson* 44 O.R. (3d) 673, [1999] O.J. No. 2494 (C.A.), at p. 679 O.R.; *Hollick, supra*, at para. 25; *M.C.C. v. Canada (Attorney General)* [2004] O.J. No. 4924, 247 D.L.R. (4<sup>th</sup>) 667 (C.A.), at para. 41.

190 The plaintiffs assert that the pleadings disclose at least four valid causes of action:

*(i) Section 130 of the OSA*

191 Within the three year limitation period from September 25, 2005 to September 25, 2008, the plaintiffs allege that their pleadings disclose a valid cause of action under s. 130 of the *OSA*. This section creates primary market remedies by assigning liability to issuers and associated persons when misrepresentations are published in prospectuses. As the plaintiffs' pleadings claim that the prospectuses issued May 17, 2006 and January 25, 2007 contained misrepresentations, the Statement of Claim discloses a valid cause of action under s. 130 of the *OSA*.

192 The plaintiffs also advance a claim under s. 130 of the *OSA* as against the Income Fund and its trustees: Clark, Nagy, Filmon and Swaine. Section 130(1)(e) of the *OSA* assigns liability to those who signed the prospectuses. In addition to the trustees, the defendant McMahon signed both prospectuses and the defendant Bailey signed the prospectus issued January 25, 2007.

193 On the defendants' motion to strike, I ruled that the plaintiffs' claim under s. 130 of the *OSA* may stand subject to proposed amendments to the Statement of Claim for which I granted leave to amend.

*(ii) Negligence Simpliciter*

194 On the defendants' motion to strike, I ruled that the plaintiffs' claim of negligence simpliciter may stand.

*(iii) Negligent Misrepresentation*

195 On this cause of action I have ruled, in response to the defendants' motion to strike, that this pleading may stand.

*(iv) Breach of Trust*

196 The plaintiffs plead a breach of trust against the trustees of the Income Fund, namely Clark, Nagy, Filmon and Swaine. This claim is not contested by the defendants.

197 Accordingly, I find that the pleadings disclose a cause of action as required by s. 5(1)(a).

**Section 5(1)(b) CPA: Is there an identifiable class of two or more persons that would be represented by the representative plaintiffs?**

198 The plaintiffs have defined the proposed class as follows:

All persons and entities, wherever they may reside or be domiciled, other than Excluded Persons, who acquired Units of [the Income Fund] during the period from March 13, 2002 to September 16, 2008.

199 This portion of the certification test is meant to address three jurisprudential principles, noted in *Bywater v. Toronto Transit Commission* (1998), 27 C.P.C. (4th) 172 (Ont. Gen. Div.) at para. 10 and in *Hollick, supra* at para. 17:

- (a) Identifying those persons who have a potential claim for relief against the defendants;
- (b) Defining the parameters of the lawsuit so as to identify those persons who are bound by the result; and
- (c) Describing who is entitled to notice pursuant to the Act.

200 McLachlin C.J.C. in *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) ("WCSC"), an appeal arising from the Alberta class action legislation with a test for certification similar to the CPA, stated at para. 38:

**38.** The [class] definition should state objective criteria by which members of the class can be identified. While the criteria should bear a rational relationship to the common issues asserted by all class members, the criteria should not depend on the outcome of the litigation. It is not necessary that every class member be named or known.

201 In analyzing this step of the certification test, I am also guided by these comments in *Hollick, supra* at para. 21:

**21.** The requirement is not an onerous one. The representative need not show that everyone in the class shares the same interest in the resolution of the asserted common issue. There must be some showing, however, that the class is not unnecessarily broad — that is, that the class could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issue. Where the class could be defined more narrowly, the court should either disallow certification or allow certification on condition that the definition of the class be amended...

202 I note that the lack of territorial limitations to the proposed class is not a barrier to certification: *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.) at para. 129 and *Pysznyj v. Orsu Metals Corp.*, 2010 ONSC 1151 (Ont. S.C.J.) at paras. 13-19.

203 The defendants state that the class as proposed is too large. They say that it is unworkable, as it includes all those who purchased units during the Class Period and not just those who still held units at the end of the Class Period in September 2008. These unitholders, the defendants state, were unaffected by the alleged misrepresentations, as they sold prior to the fall in the market price triggered by the DoJ investigation.

204 It may well be that individual issues may arise and that certain subclasses in due course may need to be identified. That issue would appear to be addressed by s. 6 of the CPA. I am also guided by these comments in *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.) at paras. 106 and 107:

**106.** In any event, a proposed class will not be overbroad simply because it may include persons who ultimately will not have a claim against the defendants...

**107.** The submission by the defendants in this case that the class is overbroad because some of the class members may not have claims depends on their contention that there will be individual issues (such as reliance and damages) to be decided after the common issues have been determined. While the plaintiffs assert that reliance (based on the efficient market theory) and damages (contending that an aggregate assessment will be appropriate) will not be individual issues

in this case, even if they are wrong and individual issues remain after the determination of the common issues, this is not an impediment to certification. As Cullity J. noted in *Heward v. Eli Lilly & Co.*, [2007] O.J. No. 404 (S.C.), at para. 69, "whenever, because of the existence of individual issues, a judgment on the common issues in favour of the plaintiffs will not determine a defendant's liability, it will always be possible — and invariably likely — that an acceptable class will include persons who will not have valid claims".

205 Although "early sellers" may eventually be found not to have suffered a loss as a result of the alleged misrepresentations, it is arbitrary at this stage to so conclude and this issue should be left for trial: *McKenna v. Gammon Gold Inc.*, [2010] O.J. No. 1057 (Ont. S.C.J.) at para. 122.

206 I am also guided by these comments of the Supreme Court of Canada in *WCSC*, *supra* at para. 39:

**39.** ...there must be issues of fact or law common to all class members. Commonality tests have been a source of confusion in the courts. The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be "common" only where its resolution is necessary to the resolution of each class member's claim. It is not essential that the class members be identically situated vis-à-vis the opposing party. Nor is it necessary that common issues predominate over non-common issues or that the resolution of the common issues would be determinative of each class member's claim. However, the class members' claims must share a substantial common ingredient to justify a class action. Determining whether the common issues justify a class action may require the court to examine the significance of the common issues in relation to individual issues.

207 In my view, any possible individual issues which may arise pale in comparison to the issues of the proposed class. Any such individual issues can and should be addressed by the trial judge and should not stand in the way of certification.

208 I find that the proposed class meets the requirements for an identifiable class under s. 5(1)(b).

#### ***Section 5(1)(c) CPA: Do the claims raise common issues?***

209 The term "common issue" is defined in the *CPA*:

1. "common issues" means,
  - (a) common but not necessarily identical issues of fact, or
  - (b) common but not necessarily identical issues of law that arise from common but not necessarily identical facts;

210 Cumming J. in *Ford*, *supra* at para. 33 summarized the law regarding this step of the certification test:

**33.** The definition of "common issues" in s. 1 of the *CPA* "represents a conscious attempt by the Ontario legislature to avoid setting the bar for certification too high". The common issues need only to "advance the litigation. Resolution through the class proceeding of the entire action, or even resolution of a particular legal claim ... is not required." This requirement has been described by the Court of Appeal "as a low bar". The Supreme Court of Canada has held that in framing the common issues, the guiding question should be "whether allowing the suit to proceed as a representative one would avoid duplication of fact finding or legal analysis". The common issues question should be approached purposively: *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236, [2000] O.J. No. 4014 (C.A.), at pp. 248-49 O.R.; *M.C.C. v. Canada*, *supra*, at para. 52; *Western Canadian Shopping Centres*, *supra*, at para. 39; *Rumley v. British Columbia*, [2001] 3 S.C.R. 184, [2001] S.C.J. No. 39, at para. 29.

211 The underlying question, as held by the Supreme Court of Canada, is "whether allowing the suit to proceed as a representative one would avoid duplication of fact-finding or legal analysis": *Rumley v. British Columbia*, [2001] 3 S.C.R. 184 (S.C.C.) at para. 29.

212 The plaintiffs have proposed this list of common issues:

[1] Did some or all of the following disclosure documents of the Income Fund contain a misrepresentation?

(The plaintiffs provide a detailed list of core documents issued by the Income Fund between March 13, 2002 and September 2008.)

[2] If the answer to [1] is yes, are the defendants or some of them liable to Class Members pursuant to Section 138.3 of the *Securities Act*?

[3] If the answer to [2] is yes, what damages are payable by each defendant in respect of that liability?

[4] If the answer to [1] regarding the prospectus of May 17, 2006 and of January 25, 2007 is yes, are the defendants or some of them liable to Class Members or some of them pursuant to s. 130 of the *Securities Act*?

[5] If the answer to [4] is yes, what damages are payable by each defendant in respect of that liability?

[6] Did the defendants, or any of them, owe the Class Members a duty of care? If so, which defendants owed what duty and to whom?

[7] If the answer to [6] is yes, did any or all of the defendants breach their duty of care? If so, which defendants breached their duty and how?

[8] If the answer to [7] is yes, did the defendants' breach of their duty of care cause damage to those Class Members? If so, what is the appropriate measure of that damage?

[9] In respect of the Class Members' negligent misrepresentation claim, what is the procedure whereby class members must demonstrate their individual reliance upon the defendants' misrepresentations?

[10] Did the trustees or some of them commit a breach of trust?

[11] If so, what damages are payable by the Trustees to the Class Members in respect of their breach of trust?

[12] Is the Income Fund vicariously liable or otherwise responsible for the acts of the other defendants?

[13] Is Arctic Glacier Inc. vicariously liable or otherwise responsible for the acts of the other defendants?

[14] Should one or more defendants pay punitive damages to the Class? If so, who, in what amount, and to whom?

[15] Should the defendants pay the cost of administering and distributing the recovery? If so, which defendants should pay, and how much?

213 The plaintiffs assert that these claims will substantially advance the case on behalf of the Class. They have characterized the misrepresentations throughout the class period as a single ongoing misrepresentation and assert that the unit prices reflected that misrepresentation. As such, the plaintiffs state, the effect of the misrepresentation on the unit prices over time is an issue common to every Class Member.

214 The defendants concede all but five of the proposed common issues. The defendants challenge common issues 6, 7, 8, 9 and 14. The defendants raise these questions:

[6] Did the defendants or any of them, owe the Class Members a duty of care?

215 On the defendants' motion to strike the claim of negligence simpliciter, I declined to strike that claim. I noted that the pleadings with respect to that claim assert that the securities issued pursuant to the prospectuses would not have been issued, or would have been issued at a substantially reduced offering price, but for the negligence of the defendants.

216 Paragraph 97 of the Statement of Claim, referring to the allegations of negligence, reads:

97. As a result, those Class Members who purchased Units under a prospectus bought their Units at inflated prices and suffered a corresponding loss...

217 I find that this is a common issue.

[7] If the answer to [6] is yes, did any or all of the defendants breach their duty of care?

218 Although the alleged breach, namely the misrepresentations, took place over a period of about six years, these alleged misrepresentations repeated themselves and differed very little, if any, in substance from one to the other. In my view, these representations can be viewed as a single misrepresentation. Accordingly, I find that this purported breach would likely not require individual assessment and thus qualifies as a common issue.

[8] If the answer to [7] is yes, did the defendants' breach of their duty of care cause damage to those Class Members?

219 The pleaded damage to the Class Members is either a loss of value of their securities or their purchase of them at inflated values. These, in my view, are common issues.

220 In arriving at that view, I am guided, in part, by these comments of van Rensburg J. in *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.) at para. 182:

**182.** Ultimately, the question when determining the common issues is to distinguish between issues that might be common to the class (or a subclass) and individual issues, and to ensure that issues that will require individual determinations are not included in the list of common issues. The fact that not all members of the class may be affected in the same way by the determination does not prevent the issue from being included as a common issue. Again, the cases emphasize that a common issue is not necessarily one where success for one member of the class necessarily results in success for all members.

***[9] In respect of the Class Members' negligent misrepresentation claim, can class members' reliance be adequately demonstrated as a common issue?***

221 The defendants assert that reliance is inherently individual and thus cannot be a common issue. They state that the individual nature of the reliance requirement is such that it would overwhelm the other common issues. The defendants rely in part on *Williams v. Mutual Life Assurance Co. of Canada* (2000), 51 O.R. (3d) 54 (Ont. S.C.J.). In that case, Cumming J. refused to certify a negligent misrepresentation claim, as the outcome of such cases would depend on a "myriad of individual evidentiary factors." He stated at para. 39: "[a] common issue cannot be dependent upon findings of fact which have to be made with respect to each individual claimant."

222 The plaintiffs suggest that reliance can be inferred using the efficient market theory which presumes that misrepresentations to the market are reflected in the unit price. Thus, any purchaser can be deemed or inferred to have relied on such statements through the act of purchasing units.

223 It is generally accepted that a cause of action in negligent misrepresentation requires proof of reliance. For that reason, courts have concluded that negligent misrepresentation claims are unsuitable for certification: *McKenna v. Gammon Gold Inc.*, *supra* at para. 135.

224 As found by Strathy J. in *Gammon Gold*, *ibid.* at paras. 136 and 137:

**136.** Issues of reasonable reliance have usually been considered to be individual issues that are not capable of being resolved on a common basis: *Lacroix v. Canada Mortgage and Housing Corp.*, [2009] O.J. No. 316, 68 C.P.C. (6<sup>th</sup>) 111 (S.C.J.) at para. 97; *Lawrence v. Atlas Cold Storage Holding Inc.* (2006), 34 C.P.C. (6<sup>th</sup>) 41, [2006] O.J. No. 3748 (S.C.J.), at paras. 91-93; *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236 (C.A.) at para. 57; *Serhan (Estate Trustee) v. Johnson & Johnson* (2004), 72 O.R. (3d) 296 (S.C.J.) at paras. 57-60.

**137.** Exceptions may be made where there is a single representation made to all members of the class or there are limited number of representations that have a common import: see, for example, *Hickey-Button v. Loyalist College of Applied Arts and Technology*, 211 O.A.C. 301, [2006] O.J. No. 2393.

225 Proof of reliance in a case of negligent misrepresentation can be made by inference, as opposed to direct evidence: *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2001] O.J. No. 4620 (Ont. S.C.J.) and *Lawrence v. Atlas Cold Storage Holdings Inc.* (2006), 34 C.P.C. (6th) 41 (Ont. S.C.J.). Two recent actions were certified in the face of claims of negligent misrepresentation: see *McCann v. CP Ships*, *supra* and *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.).

226 Strathy J. in *Gammon Gold*, *supra* came to a different conclusion. He described the misrepresentations before him at paras. 160-161:

**160.** In this case, multiple misrepresentations are alleged ... in press releases, regulatory filings, conference calls, annual reports and a multitude of other written and oral forms. The alleged misrepresentations relate to a variety of complaints, not simply the level of gold production. The plaintiff complains of undisclosed equipment failures, contracts with insiders, stock option expenses, non-compliant financial statements and inadequate disclosure controls. Individual inquiries would have to be made into what alleged misrepresentations were made to each class member and whether he or she relied upon any of those representations...

**161.** There is no basis on which reliance could be resolved as a common issue. The need to determine the issue individually would give rise to a multitude of questions in each case concerning the representations communicated to a particular investor, the experience and sophistication of the investor, other information or recommendations made to the investor and whether there was a causal connection between the misrepresentation(s) and the acquisition of the security...

227 It appears, as stated by Rady J. in *McCann*, *supra* at para. 59 that the case law on this issue is "in a state of evolution." I recognize that depending on the type and number of alleged misrepresentations in a particular case, these could in certain circumstances overwhelm the common issues and would, as such, not be suitable to be resolved as a class proceeding. I find that the alleged misrepresentations made in this case in core documents are consistent and repetitive and can essentially be treated as one. As such, I distinguish these misrepresentations factually from those detailed in para. 160 in *Gammon Gold*, *supra*.

228 In my view, the alleged misrepresentations here can be readily managed as a common issue and may proceed as such.

[14] Should one or more defendants pay punitive damages to the Class? If so, who, in what amount, and to whom?

229 I am guided by and accept the reasoning on this issue by Strathy J. in *Gammon Gold*, *supra*. He distinguished *Robinson v. Medtronic Inc.*, [2009] O.J. No. 4366 (Ont. S.C.J.) but accepted Perell J.'s reasoning on the question of whether a claim for punitive damages is appropriate for certification. Strathy J. held at para. 170:

**170.** Applying Justice Perell's test to the case presently before me, I find that the requirements for the certification of punitive damages as a common issue have been met. The nature of the present securities class action, as opposed to the product liability action before Perell J., makes the degree of misconduct, causation, harm, and the quantification of compensatory damages determinable by the common issues judge. There is no need for individual proof of loss to enable a common issues judge to assess punitive damages.

230 I agree. The claim for punitive damages may proceed as a common issue.

**Section 5(1)(d) CPA: Would a class proceeding be the preferable procedure for resolution of the common issues?**

231 In assessing this question, one should start with *Hollick*, *supra* at paras. 27-31. The Ontario Court of Appeal in *Markson v. MBNA Canada Bank*, [2007] O.J. No. 1684 (Ont. C.A.) summarized the principles set out in *Hollick* as follows (para. 69):

1. The preferability inquiry should be conducted through the lens of the three principal advantages of a class proceeding: judicial economy, access to justice and behaviour modification;
2. "Preferable" is to be construed broadly and is meant to capture the two ideas of whether the class proceeding would be a fair, efficient and manageable method of advancing the claim and whether a class proceeding would be preferable to other procedures such as joinder, test cases, consolidation and any other means of resolving the dispute; and,
3. The preferability determination must be made by looking at the common issues in context, meaning, the importance of the common issues must be taken into account in relation to the claims as a whole.

232 The plaintiffs state that in view of the large number of potential class members, certification of this action would enhance judicial economy, even if it would not resolve the claims of every class member. This was the finding in *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236 (Ont. C.A.) at para. 58: "[c]ertification can be the preferable procedure in situations far short of final resolution of the lawsuit."

233 The plaintiffs also rely on *Canadian Imperial Bank of Commerce v. Deloitte & Touche*, [2003] O.J. No. 2069 (Ont. Div. Ct.) at para. 38:

**38.** ...[T]here is no reasonably available alternative procedure to a class proceeding which is preferable, since the decision in one action will not bind the defendants with respect to the common issues. Given these facts, a class proceeding will promote the objective of judicial economy.

234 The defendants interpret "judicial economy" differently. They state that as the DoJ in the United States has already completed a full investigation and charged culpable individuals and entities, a further judicial inquiry would not serve the goal of judicial economy. They state that this proposed litigation would impose crippling investigation-related costs on existing security-holders for a second time. However, the DoJ investigation was in relation to illegal acts in the United States and had no bearing on possible losses suffered by individual investors for whom compensation is sought in this proposed class action. In my view, in a judicial economy inquiry, the focus should be on the preferable procedure for hearing specific claims, not on whether litigating a specific issue would be economical for the defendant corporation.

235 The defendants have not advanced any evidence to suggest an alternate procedure for redress for Class Members whose securities have lost value as a result of the alleged misrepresentation: see *1176560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.*, [2002] O.J. No. 4781 (Ont. S.C.J.) at para. 27:

**27.** ...it would be antithetical to permit the defendants to defeat certification by simple reliance on bald assertions that joinder, consolidation, test cases or similar proceedings are preferable to a class proceeding. This is a simple shopping list of procedures that may be available in all cases. Mere assertion that the procedures exist affords no support for the proposition that they are to be preferred. The defendant must support the contention that another procedure is to be preferred with an evidentiary foundation. As stated in *Hollick* [at para. 22]:

In my view, the Advisory Committee's report appropriately requires the class representative to come forward with sufficient evidence to support certification, and appropriately allows the opposing party an opportunity to respond with evidence of its own.

236 The plaintiffs urge that certification will enhance access to justice for Class Members, as the cost of litigating the matter individually would be far greater than the particular loss at issue. In my view, certification here clearly advances the interests of

access to justice. The claims of the Class Members have yet to be investigated by any Canadian judicial body and the American DoJ investigation into illegal activity is not an appropriate substitute.

237 As noted in *Paron v. Alberta (Minister of Environmental Protection)*, 2006 ABQB 375 (Alta. Q.B.) at para. 99, "the objective of behaviour modification is to ensure that actual and potential wrongdoers do not ignore their obligations to the public." The defendants submit that the fines imposed as a result of the guilty pleas in the United States have already achieved the objective of behaviour modification. However, as noted by the plaintiffs, this action is not brought to seek compensation for anti-competitive behaviour, but for the failure to disclose such anti-competitive behaviour, a wrong not addressed by those guilty pleas.

238 In finding that the plaintiffs have met the s. 5(1)(d) requirement, I also rely on these comments by Leitch J. in *Metzler Investment GmbH v. Gildan Activewear Inc.* (September 24, 2010), Doc. 58574CP (Ont. S.C.J.) at para. 11:

**11.** ...the costs of pursuing this action on an individual basis would be prohibitive and uneconomical for any Class Member thereby reducing access to justice and insulating the defendants from these claims. In addition, a class proceeding allows a single determination of the significant legal issues in this case thus eliminating the prospect of a multiplicity of proceedings. Finally, as noted by the plaintiff, its ability to access the courts to prosecute claims against violators of securities law is an important means of enhancing investor protection and restoring investor confidence, while creating an incentive for public corporations to take precautions which will protect market integrity.

***Section 5(1)(e): Is there a representative plaintiff who:***

- i. *will fairly and adequately represent the interests of the class?*
- ii. *has produced a workable litigation and notification plan?*
- iii. *does not have conflicts of interest with other class members on the common issues?*

239 In assessing adequate and fair representation of class interests, the Supreme Court in *WCSC, supra* noted at para. 41:

**41.** In assessing whether the proposed representative is adequate, the court may look to the motivation of the representative, the competence of the representative's counsel, and the capacity of the representative to bear any costs that may be incurred by the representative in particular (as opposed to by counsel or by the class members generally). The proposed representative need not be "typical" of the class, nor the "best" possible representative. The court should be satisfied, however, that the proposed representative will vigorously and capably prosecute the interests of the class...

240 The plaintiffs note that both representative plaintiffs indicated their intention to prosecute the claims with the view to advancing the best interests of the Class Members. There is no evidence to suggest otherwise.

241 The plaintiffs have prepared a litigation plan. As stated in *Fakhri v. Alfalfa's Canada Inc.*, [2003] B.C.J. No. 2618 (B.C. S.C.) at para. 77:

**77.** The purpose of the plan for proceeding at the certification stage is to aid the court by providing a framework within which the case may proceed and to demonstrate that the representative plaintiff and class counsel have a clear grasp of the complexities involved in the case which are apparent at the time of certification and a plan to address them. The court does not scrutinize the plan at the certification hearing to ensure that it will be capable of carrying the case through to trial and resolution of the common issues without amendment. It is anticipated that plans will require amendments as the case proceeds and the nature of the individual issue are demonstrated by the class members.

242 The defendants have not refuted the sufficiency of the plaintiffs' litigation plan.

243 Any conflicts of interest must be actual and current to disqualify the proposed representative plaintiffs: *Eaton v. HMS Financial Inc.*, [2008] A.J. No. 1127 (Alta. Q.B.) at paras. 186-187. The defendants' suggestion that the representative plaintiffs may have a conflict of interest is but speculative. There is nothing before me to support a finding of an actual conflict.

244 I find that the plaintiffs have met the s. 5(1)(e) requirement.

245 I am satisfied that this action should be certified.

246 For a summary of my findings on the three motions addressed above, see Schedule A, attached.

247 If required, counsel may bring the matter of costs before me within 60 days.

#### Schedule A — Table of Findings

##### ***Motion to Strike Pleadings***

	<b><i>Finding</i></b>
a. Common law claims against the Income Fund	Motion to strike granted
b. "Anti-Trust Conspiracy"	Motion to strike dismissed
c. Section 130 of the <i>OSA</i>	Motion to strike dismissed{ <sup>*</sup> }
d. Common law claim in negligence	Motion to strike dismissed
e. Common law claim in negligent misrepresentation	Motion to strike dismissed

**Notes:** \* However, plaintiffs must amend Statement of Claim to plead all provincial securities acts upon which they wish to rely. In addition, the s. 130 claim is struck as against the defendant Johnson.

##### ***Motion for Leave***

	<b><i>Finding</i></b>
Is the failure to file evidence fatal to the defendants' case?	No
Does s. 138.3 apply prospectively?	Yes
The test for leave (s. 138.8)	Yes
a. Is the action brought in good faith?	Yes
b. Is there a reasonable possibility of success at trial...	Yes - leave granted
i. Against the Income Fund?	No - leave denied
ii. Against Arctic as a "responsible issuer"?	Yes - leave granted
iii. Against Arctic as an "influential person"?	Yes - leave granted
iv. Against trustees as "directors"?	Yes - leave granted
v. Against trustees as influential persons"?	Yes - leave granted
vi. Against McMahon as an "officer"	Yes - leave granted
vii. Against Bailey as an "officer" from Dec. 29, 2006 onwards?	Yes - leave granted
viii. Against Bailey as an "officer" prior to Dec. 29, 2006?	No - leave denied
ix. Against Bailey as an "expert"?	No - leave denied
x. Against Bailey as an "influential person" from Dec. 29, 2006 onwards?	Yes - leave granted
xi. Against Johnson as a "director"?	Yes - leave granted
xii. Against Johnson as an "influential person"?	Yes - leave granted
xiii. Against Larson as an "officer"?	Yes - leave granted
xiv. Against Larson as an "influential person"?	No - leave denied
xv. Against Cooley as an "officer"?	Yes - leave granted
xvi. Against Cooley as an "influential person"?	No - leave denied
xvii. That the Income Fund knew or acquiesced to the anti-competitive conduct from 2002-2004?	Yes - leave granted
xviii. That the Income Fund knew or acquiesced to the anti-competitive conduct from 2004-2008?	Yes - leave granted

***Motion for Certification***

	<b><i>Finding</i></b>
Section 5(1)(a): Do the pleadings disclose a cause of action?	Yes
Section 5(1)(b): Is there an identifiable class of two or more persons that would be represented by the representative plaintiffs?	Yes
Section 5(1)(c): Do the claims raise common issues? The defendants concede all but the following proposed common issues:	
a. Common issues #6, #7 and #8?	Yes
b. Common issue #9?	Yes
c. Common issue #14 common?	Yes
Section 5(1)(d): Is a class proceeding the preferable procedure for resolution of the common issues?	Yes
Section 5(1)(e): Is there a representative plaintiff who...	
a. Will fairly and adequately represent the interests of the class?	Yes
b. Has produced a workable litigation and notification plan?	Yes
c. Does not have conflicts of interest with other class members on the common issues	Yes

*Defendants' motion granted in part; plaintiffs' motions granted.*

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiffs brought motion for certification — Motion dismissed — Although defendant had strong argument that it owed investors no duty of care, it was not plain and obvious that pleaded cause of action for negligence could not succeed — Plaintiff's case was not built on any falsity in financial statement but rather on notion that defendant was not in position to opine given producer's lack of financial controls and so should not have issued clean audit report — It would be for trial judge to determine whether novel claim was within range of exceptions to general principles limiting recoveries for pure economic losses in negligence-based torts — It was not plain and obvious that negligent misrepresentation claim was legally untenable.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiffs brought motion for certification — Motion dismissed — Identities of 57 members of proposed class of accredited investors were ascertainable so defining them by definition seemed to be mere technicality — Global class should not be certified in case at bar — It would not seem reasonable to proposed class members that their legal claims be found to have real and substantial connection to Ontario — Residence of defendant in Ontario was essentially only connection to Ontario — Investors were non-residents of Ontario making substantial investments in American dollars in American corporation in transaction governed by American corporate and securities law — While transaction included audit report from Ontario auditor, standard of care for that audit would be determined by American accounting standards under which report was provided — Ontario did not have substantial connection with this American financing and corporate reorganization.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Common issue or interest

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiffs brought motion for certification — Motion dismissed — Theory of plaintiff's case was that defendant did not meet applicable accounting standards when it gave clean audit report — Plaintiff complained that audit report gave credence to financial statements that, even if they happened to correctly state assets, liabilities and accounts, could not be relied on due to producer's lack of financial controls — Pleadings, as revised, raised common issues as to whether defendant breached duty and standard of care and made misrepresentation by delivering audit report — Precedent establish that reasonable reliance, causation and ultimate liability questions did not raise common issues as they were dependent on individual findings of fact for each investor.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiffs brought motion for certification — Motion

dismissed — Plaintiff's claim for its almost \$1 million investment would justify taking on litigation risk, so it genuinely did not need class action — Plaintiff's claim could be joined to other top 10 investors in action without needing certification, and it would have heft of being claim for around \$3 million — There were no significant economic barriers to litigating by plaintiff or any other accredited investors — Common issues trial, dealing with existence of duty of care and of misrepresentations, would be manageable and would make substantial contribution to resolving claims of all class members — Class action as whole would achieve only modest judicial economy over individual actions or joinder because individual issue trials would be needed for reliance, causation, damages and any claims of contributory negligence — Joinder of claims would be preferable proceeding to class action.

#### Table of Authorities

MOTION by plaintiff for certification of class action against defendant accounting firm, for negligence or negligent misrepresentation in production of clean audit report.

**Perell J.:**

**A. Introduction**

1 The Plaintiff, Excalibur Special Opportunities LP, is a Canadian investor. Under United States legislation, it was one of 57 "accredited investors" that invested in Southern China Livestock, a Chinese hog producer, whose American owners were reorganizing and financing operations with a reverse takeover and a private placement of common shares and warrants.

2 The class of investors was comprised of 50 Americans, five investors from around the world, and two Canadians.

3 In 2010, the American promoters and marketers of the private placement provided the accredited investors with a Private Placement Memorandum that indicated that the plan was to eventually go public under U.S. securities legislation. The Private Placement Memorandum included as an exhibit an Audit Report prepared by the Defendant, Schwartz Levitsky Feldman LLP

("SLF"), which is a Toronto and Montreal accounting firm that had a group that specialized in the audits of Chinese businesses and that was qualified to give an opinion in accordance with Generally Accepted Accounting Principles ("GAAP") and the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB").

4 In this proposed class action against SLF, Excalibur says that SLF provided a "Clean Audit Report" and that without this Clean Audit Report, the private placement would never have gotten off the ground. Excalibur says that all the accredited investors relied on the Clean Audit Report in making their decision to invest in Southern China Livestock.

5 The 57 investors invested \$7,594,965, but within a year they learned that Southern China Livestock lacked financial controls over its all-cash-business. Excalibur says that "this shocking disclosure" was entirely at odds with a Clean Audit Report, because under generally accepted accounting principles, a Clean Audit Report is categorically not possible for an all-cash-business that lacks financial controls.

6 Following the shocking disclosure, within 22 months, Southern China Livestock went out of business, the investors lost their investment, and Excalibur commenced a class action on behalf of the accredited investors.

7 Excalibur sues SLF to recover the \$7,594,965 lost by the investors, and it now seeks to certify its action as a class proceeding under the *Class Proceedings Act, 1992*, S.O. 1992, c. 6.

8 Excalibur submits that in providing a Clean Audit Report, SLF committed the torts of negligent misrepresentation and negligence causing the investors to lose their investment. In other words, Excalibur submits that in breach of a duty of care, SLF spoke falsely (negligent misrepresentation) and alternatively in breach of a duty of care, SLF ought not to have spoken at all (negligence).

9 SLF resists certification and submits that none of the certification criteria have been satisfied.

10 In particular, SLF submits that: (a) Excalibur has not pleaded a tenable cause of action for negligent misrepresentation and negligence; (b) the proposed class definition is overly broad; (c) a global class definition should not be certified; (d) the proposed common issues do not satisfy the test for common issues; (d) a class action is not the preferable procedure because Excalibur does not need a class action to obtain access to justice and the individual issues overwhelm the utility of a common issues trial; (e) Excalibur is not an appropriate Representative Plaintiff; and (f) Excalibur's litigation plan is deficient and unfair to SLF's procedural rights because 56 of the 57 Class Members are avoiding a non-residents' civil procedure obligation to post security for costs.

11 For the reasons that follow, I conclude that: (a) Excalibur has pleaded a tenable action for negligent misrepresentation and negligence, and, therefore, the first criterion for certification is satisfied; (b) subject to the issue of a global class definition, the class definition is not overly broad; (c) although a global class definition may be certified, Excalibur's action is not appropriate for a global class and, therefore, the second criterion for certification is not satisfied; (d) some of the proposed common issues satisfy the common issues criterion, and the third criterion for certification is satisfied; (e) the preferable procedure criterion is not satisfied in the case at bar; and (f) standing alone (i.e. on the assumption that the other criteria have been satisfied) the fifth criterion for certification is satisfied because Excalibur is an appropriate Representative Plaintiff and its litigation plan has no fatal deficiencies, but the plan and the notice of certification should specify that Class Members from outside of Ontario may be required to post security for costs for their individual issues trials.

12 In the result, the first criterion (cause of action), the third criterion (common issues) and the fifth criterion (representative plaintiff) are satisfied, but the second criterion (class definition) and the fourth criterion certification motion (preferable procedure) are not satisfied.

13 Since all of the criterion for certification must be satisfied, the motion for certification is dismissed.

## B. Factual Background

### 1. The Investment in Southern China Livestock and its Aftermath

14 Excalibur is a limited partnership organized under the laws of Manitoba operating as an investment fund based in Toronto. It is registered as an extra-provincial limited partnership in Ontario. It invests in small-cap private companies and small-cap publicly traded companies.

15 SLF is a firm of chartered accountants with offices in Toronto and Montreal. It is registered with the PCAOB and is licenced to audit companies listed in the United States.

16 SLF has a "China Group" led by Gerry Goldberg, a partner in its Toronto office. The firm holds itself out to be an expert in conducting financial due diligence and auditing services for companies based in China.

17 Southern China Livestock owned or operated 19 hog farms in China through subsidiary corporations. It itself was owned by American corporations.

18 On January 28, 2010, SLF issued an Audit Report with respect to Southern China Livestock's fiscal year-ends' September 30, 2008 and September 30, 2009. The single-page Audit Report was addressed to "the Shareholders of Southern China Livestock".

19 The Audit Report, which accompanied the financial statements, stated:

Schwartz Levitsky Feldman LLP

CHARTERED ACCOUNTANTS

LICENSED PUBLIC ACCOUNTANTS

TORONTO - MONTREAL

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Shareholders of Southern China Livestock International Inc.

We have audited the consolidated balance sheets of Southern China Livestock International Inc. as at September 30, 2009 and 2008 and the consolidated statements of income and comprehensive income, stockholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the management of Southern China Livestock International Inc. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The company is not required to have nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal controls over financing reporting. Accordingly, we express no such opinion.

In our opinion, these consolidated financial statements referred to above present fairly, in all material respects, the financial position of Southern China Livestock International Inc. as of September 30, 2009 and 2008 and the results of its operations and its cash flows for the years then ended in accordance with generally accepted accounting principles in the United States of America.

Toronto, Ontario, Canada

January 28, 2010

1167 Caledonia Road

Toronto, Ontario, M6A 2X1

Tel: 416 785 5353

Fax: 416 785 5663

20 Pausing here, it is an important point to note that in this proposed class action, Excalibur does not specify in what way, if at all, Southern China Livestock's consolidated financial statements did not present fairly, in all material respects, its financial position and the results of its operations and its cash flows in accordance with GAAP. Rather, as noted above, Excalibur alleges that given the lack of adequate financial controls, the financial statements were not able to present Southern China Livestock's financial position in accordance with GAAP.

21 Returning to the narrative, in March 2010, Rodman & Renshaw LLP of New York, U.S.A., acted as placement agents for a private placement to purchase shares and warrants in Southern China Livestock.

22 Concurrently, with the private placement, Southern China Livestock, which itself was a Nevada company incorporated in 2009, was being reorganized pursuant to a reverse takeover of Expedite, 4 Inc., a Delaware company incorporated in 2007.

23 Southern China Livestock sought to raise between USD \$5 million and USD \$10 million by the private placement. Its stated plan was to use the proceeds primarily to acquire hog farms (73%), to create a fertilizer production line (12%), and to finance general working capital (15%).

24 The private placement was offered to "accredited investors" under an exemption to the prospectus requirements of the U.S. *Securities Act of 1993*. Investors were offered investment Units at a price of USD \$10 per Unit. Each Unit was comprised of two common shares of Southern China Livestock, and one warrant to purchase an additional common share.

25 Excalibur became interested in Southern China Livestock's private placement.

26 Suresh Madan is Executive Vice President and portfolio manager for Excalibur. He is a chartered financial analyst and highly experienced in reading financial statements and offering memorandum. He has an MBA degree. He is familiar with the standards of the PCAOB. Mr. Madan communicated with a representative of Rodman & Renshaw LLP.

27 On March 12, 2010 Mr. Madan received a copy of the Private Placement Memorandum, which is 230 pages in length, including 154 pages of attached exhibits. Exhibit B was SLF's Audit Report and the consolidated financial statements of Southern China Livestock.

28 Mr. Madan read the Private Placement Memorandum, in his words "page for page, word for word." It took him three to four hours of close reading. He then spoke to William Hechter, the President of Excalibur, and they discussed the investment opportunity and its risks.

29 The Private Placement Memorandum was the only material that Excalibur considered before deciding to invest in Southern China Livestock.

30 Mr. Madan's evidence was:

We were taking certain risks, no doubt. But we were also aware that this company had a U.S. certified form of auditor who had looked at the financial statements and had given a clean audit. That reassured us that the financial statements are

correct. ... The main comfort was the clean audit opinion, even though in a far-off geography. The clean audit opinion from a Toronto-based company was [a] very significant factor in that comfort.

31 Excalibur states that in deciding to participate in the private placement, in addition to relying on SLF's Audit Report, it relied on SLF's reputation and expertise as a licenced auditor, and its advertised experience in auditing Chinese companies.

32 The Private Placement Memorandum indicated that after the reverse takeover, Southern China Livestock would seek registration of its shares with the United States Securities and Exchange Commission ("SEC") for a public offering of its shares.

33 The Private Placement Memorandum included the following statements about the nature of the investment and the associated risks [capitals in the original]:

THESE ARE SPECULATIVE SECURITIES WHICH INVOLVE A HIGH DEGREE OF RISK. ONLY THOSE INVESTORS WHO CAN BEAR THE LOSS OF THEIR ENTIRE INVESTMENT SHOULD INVEST IN THESE UNITS. SEE "RISK FACTORS".

AN INVESTOR MUST RELY ON ITS OWN EXAMINATION OF THE ISSUER AND THE TERMS OF THE OFFERING, INCLUDING THE RISKS INVOLVED. ... THERE IS NO MARKET FOR THE SECURITIES BEING OFFERED, AND THERE COULD BE NO ASSURANCE THAT ANY MARKET WILL DEVELOP. INVESTORS SHOULD BE AWARE THAT THEY MAY BE REQUIRED TO BEAR THE FINANCIAL RISK OF AN INVESTMENT AND THE SECURITIES FOR AN INDEFINITE PERIOD OF TIME.

[Investors are] not to construe the contents of this Memorandum as legal or investment advice. Each prospective investor must consult with his own legal counsel, accountant, and financial advisor as to legal, tax, financial and related matters concerning the Company or an investment therein.

... [Investors] are urged to request from us any additional information that they may consider necessary to make an informed decision or to verify the information set forth in this Memorandum.

If less than \$10 million is raised [through the Offering], the Company may not have sufficient funds to move forward with its expansion and acquisition strategy.

34 The Private Placement Memorandum contained an 11-page section entitled "Risk Factors," which stated, among other things, that: (a) Southern China Livestock may not be able to comply with the *Securities Exchange Act's* Internal Control Reporting Requirements; (b) Southern China Livestock may not receive the auditor's attestation that it maintained effective internal control over financial reporting, which would be required in 2011; and (c) Southern China Livestock's revenue is dependent in large part on significant orders from a limited number of customers.

35 On March 15, 2010, Excalibur signed a Subscription Agreement to invest in Southern China Livestock.

36 The Subscription Agreement required an investor to represent that it was an "accredited investor;" i.e., Excalibur acknowledged that it had \$5 million of assets.

37 Here it may be noted that to be an accredited investor, individuals had to represent they had a net worth of at least \$1 million or two years of \$200,000 plus income.

38 The Subscription Agreement required each investor to acknowledge that:

2.6 Investment Purpose. [The] investment is not a liquid investment.

...

2.10 Information. ... the Subscriber and its advisors, if any, have been furnished with all materials relating to the business, finances and operations of the Company ... that have been requested by the Subscriber or its advisors ... [and that] the Subscriber and its advisors, if any, have been afforded the opportunity to ask questions of the Company.

2.11 Acknowledgement of Risk. The Subscriber agrees, acknowledges and understands that its investment in the Units involves a significant degree of risk, including, without limitation that (a) the Company is a development stage business with limited operating history and requires substantial funds in addition to the proceeds from the sale of the Units; (b) an investment in the Company is highly speculative and only subscribers who can afford the loss of their entire investment should consider investing in the Company and the Units; (c) the Subscriber may not be able to liquidate its investment; (d) transferability of the Securities (including the underlying Common Stock) is extremely limited; and (e) in the event of a disposition of the Securities (including the underlying Common Stock), the Subscriber can sustain the loss of its entire investment. The Subscriber agrees, acknowledges and understands that such risks are set forth in greater detail in the Memorandum, and further that Subscriber has carefully reviewed and considered the risk factors discussed in the "Risk Factors" section of the Memorandum.

...

2.11.2 Acknowledgements of Risk Associated with Investing in a PRC Entity. The [proposed investor] has been apprised that the Company conducts all of its business in the PRC. Accordingly, the Company is subject to laws and regulations applicable to foreign investments in China and, in particular, laws applicable to foreign-invested enterprises....

...

2.13 Transfer or Resale. The [proposed investor] may have to bear the risk of holding the securities for an indefinite period of time ....

39 On March 29, 2010, the reverse takeover was completed, and the investment offering closed. Two further closings were completed over the next 60 days. In total, \$7,594,965 was raised in the private placement.

40 To be more precise, the first closing raised \$5,340,000 from 48 investors, including Excalibur, which invested \$400,000. The closing book received by Excalibur included a copy of the signature page of the Subscription Agreement from every other participant in the first closing. In subsequent closings on April 30, 2010 and May 6, 2010, a further \$2,254,965 was raised from nine additional investors for a total of 57 investors.

41 Using information from the closing documents and the corporate filings, it appears that 57 accredited investors purchased units in Southern China Livestock. The residence of these investors is set out in the following chart:

<i>Number of Investors (57)</i>	<i>Residence</i>
10	New York
9	California
4	Connecticut
4	New Jersey
4	Pennsylvania
3	Florida
3	Illinois
3	Texas
2	Nevada
2	Ohio
2	Other U.S. States
1	British Columbia
1	Cayman Islands
1	Malaysia
1	North Carolina

1	Ontario
1	Samoa
1	Tennessee
1	Utah
1	United Kingdom
1	Unknown
1	Wisconsin

42 The Breakdown of the amount invested by the investor is as set out in the following chart:

<b>Number of Investors (57)</b>	<b>Amount Invested</b>
19	\$1 to \$49,000
12	\$50,000 to \$99,000
8	\$100,000 to \$199,000
7	\$200,000 to \$399,000
3	\$400,000 and over
8	[unclear]

43 From the proceeds of the private placement, SLF was paid \$45,000 for its services.

44 On May 27, 2010, Southern China Livestock filed a registration statement (preliminary prospectus), Form S-1 with the SEC with the intention of proceeding with an initial public offering including the Units sold to Excalibur and the other investors.

45 Included in the Form S-1 filing was the SLF Audit Report that had been included in the Private Placement Memorandum. Unlike the situation with the Private Placement Memorandum, SLF's consent to use its opinion was included in the filing.

46 On November 5, 2010, Excalibur purchased 50,000 additional Units from another investor who had participated in the First Closings, Gibralt Capital Corporation, for \$550,000. Thus, Excalibur invested \$950,000 in Southern China Livestock.

47 On December 23, 2010, Southern China Livestock filed its annual 10-K Report under American securities legislation that included a Management's Discussion and Analysis section. Management indicated that its cash transactions involved employees using their own bank accounts to deposit net transaction funds and to make purchases of supplies for the hog business.

48 The Form 10-K disclosed that: (a) the sale of hogs were primarily cash sales, handled by farm employees; (b) the employees maintained corporate funds in bank accounts that were in their own names; (c) Southern China Livestock had little or no control over the activities of these employees; (d) disclosure controls were ineffective; and (e) internal controls over financial reporting were not effective, including deficiencies in internal accounting staff's recording transactions.

49 As noted above, Excalibur describes this disclosure of information as a "shocking discovery." Excalibur says that the revelations contained in the Form 10-K cast doubt on the accuracy of private placement materials, and indicated to it for the first time that the Audit Report could not have fairly and fully represented the financial state of Southern China Livestock.

50 Six months' later, in June and July 2011, Southern China Livestock's North American directors resigned.

51 On August 15, 2011, Southern China Livestock withdrew its registration statement (preliminary prospectus), Form S-1 with the SEC, professedly because it had elected not to pursue the sale of its securities.

52 Southern China Livestock went dark, and its shares and warrants are now worthless.

53 SLF has never filed a formal withdrawal as auditors of Southern China Livestock, or advised through a filing with the SEC that its opinions can no longer be relied upon.

54 Excalibur filed an affidavit sworn by Matthew Medlin, a Certified Public Accountant and Managing Director of Duff & Phelps LLC in Washington, DC. Mr. Medlin did not provide any opinion as to whether the disclosed internal control situation should have caused SLF to withhold or qualify its audit opinion.

55 Rather, Mr. Medlin described the Generally Accepted Auditing Standards ("GAAS") of the PCAOB that would have been applicable in auditing Southern China Livestock's financial statements for 2008 and 2009 and the risks associated with an audit that could have had an impact on the audit procedures performed by SLF.

56 Mr. Medlin deposed as to what he would have expected SLF to do to address those risks, and he indicated that he would be able to opine on whether SLF complied with GAAS when auditing Southern China Livestock's consolidated financial statements from SLF's audit file if given access to the audit file.

## **2. The Proposed Class Action**

57 On October 31, 2012, Excalibur commenced a proposed class action. It seeks damages of USD \$7,594,965 on behalf of itself and the other investors for SLF's alleged negligence and negligent misrepresentations.

58 Excalibur proposes the following definition for Class Membership:

All persons or entities who purchased investment units ("Units") of Expedite 4, Inc. between March 29, 2010 and December 23, 2010, and who continued to hold any of the shares or warrants comprising the Units as of December 23, 2010, other than Excluded Parties, where the Excluded Parties are:

the Defendant, including its partners, employees, successors and assigns;

the officers, directors, employees, agents, legal representatives, subsidiaries, affiliates, predecessors, successors and assigns of Expedite 4, Inc., Southern China Livestock International Inc., or Southern China Livestock Inc., and any entity in which any of the foregoing have or had any legal or *de facto* controlling interest; and

Rodman & Renshaw LLC and Newbridge Securities Corporation (together the "Placement Agents"), including their officers, directors, senior management employees, predecessors, successors and assigns (the "Class").

59 Excalibur has actually ascertained the identity of the 57 investors. The 48 proposed Class Members who participated in the First Closings were identified in the closing documents. The identities of the additional nine proposed Class Members were disclosed in public filings.

60 Every member of the class is alleged to have received and relied upon the Clean Audit Report (the misrepresentation) and to have suffered a total loss of their investment as a result of the negligence and negligent misrepresentation of SLF.

61 Claims for negligence and negligent misrepresentation require a duty of care. Excalibur's pleaded allegation of a duty of care can be summarized as follows:

SLF held itself as capable of providing audit services to Chinese companies entering the U.S. capital markets. Southern China Livestock required an accredited auditor for this purpose, and it hired SLF to prepare an essential prerequisite Audit Report for inclusion in a Private Placement Memorandum. SLF knew that without an Auditor's Report from a PCAOB-registered firm, neither the reverse takeover nor the financing could be completed. SLF knew that the Private Placement Memorandum would be distributed to an exclusive group of qualified investors, like Excalibur, who would rely on the Audit Report in making an investment decision. SLF prepared the Audit Report to be relied on and consented to its inclusion in the Private Placement Memorandum. SLF knew that potential investors would be harmed if the information contained in the Auditor's Report was materially false, inaccurate or misleading. Therefore, SLF owed the investors a duty of care to exercise the care, skill and diligence of an auditor of public companies in planning and carrying out its audit and in preparing the Auditor's Report in accordance with GAAS and the rules and standards of the PCAOB.

62 A claim for negligent misrepresentation requires a misrepresentation. Excalibur's allegations of misrepresentation are found in paragraphs 56 and 57 of the Statement of Claim, which state:

56. Given the absence of proper internal controls, Southern China's irregular operational structure and the volume of cash transactions, Southern China's business was highly susceptible to theft and fraud. As a result, Southern China's ability to carry on business in the ordinary course and to continue as a going concern was tenuous. The Auditor's Report could not have fairly represented the true financial state of [Southern China Livestock].

57. In light of the true state of affairs regarding [Southern China Livestock's] operations in 2008 and 2009, and as described in detail below, SLF could not have obtained the degree of comfort and verification required under GAAS and the PCAOB standards to complete an audit of [Southern China Livestock] without significant reservations and qualifications, if SLF could complete any audit at all.

63 The pleaded allegation of misrepresentation can be summarized as follows:

In the Auditor's Report, SLF stated that it conducted the audits in accordance with PCAOB standards and it gave an unqualified "clean" opinion about Southern China Livestock's consolidated financial statements for the fiscal years ended September 30, 2008 and 2009. However, the Memorandum did not disclose Southern China Livestock's true state of affairs, which was that Southern China Livestock had little financial control over the revenue and expenses of its all cash business. Given these circumstances, the Auditor's Report could not have fairly represented the true financial state of the business.

64 It is an element of the tort of negligence that the defendant's breach of duty cause harm to the plaintiff. It is an element of the tort of negligent misrepresentation that the plaintiff suffers harm from having reasonably relied on the defendant's false statement. Excalibur's pleaded allegations of causation of harm and reasonable reliance causing harm for itself and for Class Members can be summarized as follows:

It was reasonable for prospective investors, including the Plaintiff and the Class Members, to rely on the Auditor's Report in deciding to invest in Southern China Livestock because it was prepared by SLF specifically for the Financing and in the ordinary course of SLF's business of providing accounting and audit services to Chinese companies in accordance with GAAS and PCAOB standards. Excalibur and all the Class Members relied on the representation of a clean Audit Report in deciding to invest in Southern China Livestock to their detriment. Excalibur and the Class would never have invested in the Units absent the assurance of a clean Audit Report by SLF.

65 A claim for negligence requires acts of negligence or breaches of the standard of care. Excalibur's pleaded allegation of negligence can be summarized as follows:

SLF was negligent: (a) in permitting the Auditor's Report to be included in the Private Placement Memorandum when it knew that the Class would rely upon SLF's reputation and expertise as auditors licenced by the PCAOB in deciding to invest in the Company and when it knew or ought to have known that it did not exercise the requisite care, skill and diligence of a reasonably competent auditor; (b) in failing to exercise the requisite care, skill and diligence of a reasonably competent auditor of a public company in carrying out its audit to ensure that the Auditor's Report accurately presented Southern China Livestock's financial condition and performance; (c) in failing to conduct its audits in accordance with GAAS and GAAP; (d) in failing to detect and to warn about significant weaknesses in [Southern China Livestock's] governance and internal controls; (e) in failing to plan and perform an audit as part of its audit obligations, SLF was required to plan and perform its audit in accordance with the standards of the PCAOB and GAAS to obtain reasonable assurance as to whether [Southern China Livestock's] consolidated financial statements were free from material misstatement.

66 In its reply factum, Excalibur describes its complaint and the negligence of SLF as follows:

The Plaintiff's complaint is that SLF was negligent in conducting the audits of [Southern China Livestock], as it could never have issued a clean Audit Report if it had done its job competently, and that the Audit Report, which said that the

audits had been conducted in accordance with the standards of the PCAOB, and opined that "these consolidated financial statements ... present fairly, in all material respects, the financial position of [Southern China Livestock] was materially false and misleading.

67 Pausing here to foreshadow the discussion and analysis later, it will be my opinion that Excalibur has combined its claim for negligent misrepresentation with its claim for negligence by alleging that that SLF's misrepresentation was speaking when it ought not to have spoken at all.

68 In my opinion, by pleading that the absence of proper internal controls for a cash business meant that SLF's Audit Report could not have fairly represented the true financial state of the business is to combine SLF's alleged misrepresentation with SLF's alleged negligence. As I will explain below, this combining of the torts creates analytical problems for the certification of Excalibur's action. It does not, however, mean that tenable causes of action were not pleaded.

69 Returning to the topic of Excalibur's proposed class action, the proposed common issues for the class action are set out later in this Decision, and I will leave the discussion of the common issues and also the discussion about the factual basis for the preferable procedure and representative plaintiff criteria until later in this Decision.

70 In the class action, SLF has delivered a Statement of Defence in which it denies liability.

71 In its Statement of Defence, SLF states that it did not make any misrepresentation in its Audit Report. It denies that it made any representation negligently. It denies a duty of care to the investors. It denies and states that it is not aware of any false statements in the financial statements. It states that it took all necessary steps to obtain sufficient audit evidence in performing the audit and that the audit was planned, performed, and completed in compliance with the applicable industry standards, including those established by PCAOB.

72 SLF denies that it caused the investors to lose their investment or that the losses had anything to do with what was stated in the Audit Report. It denies that any investor relied on the Audit Report and it pleads the *Negligence Act*, R.S.O. 1990, c. N.8 and states that if any investor lost its investment it was due to its own negligence.

73 SLF pleads contributory negligence and states that if Excalibur or any investor lost its investment, they have only their own negligence to blame.

## C. Discussion and Analysis

### 1. Introduction to Certification

74 Pursuant to s. 5(1) of the *Class Proceedings Act*, 1992, the court shall certify a proceeding as a class proceeding if: (a) the pleadings disclose a cause of action; (b) there is an identifiable class; (c) the claims of the Class Members raise common issues of fact or law; (d) a class proceeding would be the preferable procedure; and (e) there is a representative plaintiff who would adequately represent the interests of the class without conflict of interest and who has produced a workable litigation plan.

75 For an action to be certified as a class proceeding, there must be a cause of action shared by an identifiable class from which common issues arise that can be resolved in a fair, efficient, and manageable way that will advance the proceeding and achieve access to justice, judicial economy, and the modification of behaviour of wrongdoers: *Sauer v. Canada (Minister of Agriculture)*, [2008] O.J. No. 3419 (Ont. S.C.J.) at para. 14, leave to appeal to Div. Ct. refused, [2009] O.J. No. 402 (Ont. Div. Ct.).

76 On a certification motion, the question is not whether the plaintiff's claims are likely to succeed on the merits, but whether the claims can appropriately be prosecuted as a class proceeding: *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) at para. 16.

77 The test for certification is to be applied in a purposive and generous manner, to give effect to the important goals of class actions — providing access to justice for litigants; promoting the efficient use of judicial resources; and sanctioning wrongdoers

to encourage behaviour modification: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at paras. 26 to 29; *Hollick v. Metropolitan Toronto (Municipality)*, *supra* at paras. 15 and 16.

78 The purpose of a certification motion is to determine how the litigation is to proceed and not to address the merits of the plaintiff's claim; there is to be no preliminary review of the merits of the claim: *Hollick v. Metropolitan Toronto (Municipality)*, *supra* at paras. 28 and 29.

## **2. Cause of Action Criterion**

79 The first criterion for certification is that the plaintiff's pleading discloses a cause of action. The "plain and obvious" test for disclosing a cause of action from *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.) is used to determine whether a proposed class proceeding discloses a cause of action for the purposes of s. 5 (1)(a) of the *Class Proceedings Act*, 1992.

80 Thus, to satisfy the first criterion for certification, a claim will be satisfactory, unless it has a radical defect or it is plain and obvious that it could not succeed: *Anderson v. Wilson* (1999), 44 O.R. (3d) 673 (Ont. C.A.) at p. 679, leave to appeal to S.C.C. ref'd, (2000), [1999] S.C.C.A. No. 476 (S.C.C.); *1176560 Ontario Ltd. v. Great Atlantic & Pacific Co. of Canada Ltd.* (2002), 62 O.R. (3d) 535 (Ont. S.C.J.) at para. 19, leave to appeal granted, (2003), 64 O.R. (3d) 42 (Ont. Div. Ct.), aff'd (2004), 70 O.R. (3d) 182 (Ont. Div. Ct.).

81 In a proposed class proceeding, in determining whether the pleading discloses a cause of action, no evidence is admissible, and the material facts pleaded are accepted as true, unless patently ridiculous or incapable of proof. The pleading is read generously and it will be unsatisfactory only if it is plain, obvious, and beyond a reasonable doubt that the plaintiff cannot succeed: *Hollick v. Metropolitan Toronto (Municipality)*, *supra* at para. 25; *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 41, leave to appeal to the S.C.C. ref'd, [2005] S.C.C.A. No. 50 (S.C.C.), rev'd (2003), 65 O.R. (3d) 492 (Ont. Div. Ct.); *Abdool v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.) at p. 469.

82 Excalibur submits that it has satisfied the first criterion with its pleadings of negligence and of negligent misrepresentation.

83 The elements of a claim in negligence are: (1) the defendant owes the plaintiff a duty of care; (2) the defendant's behaviour breached the standard of care; (3) the plaintiff suffered compensable damages; (4) the damages were caused by the defendant's breach; and, (5) the damages are not too remote in law. See *Mustapha v. Culligan of Canada Ltd.*, [2008] 2 S.C.R. 114 (S.C.C.) at para. 3.

84 The elements of a claim of negligent misrepresentation are: (1) duty of care based on a special relationship between the plaintiff and the defendant; (2) an untrue, inaccurate, or misleading representation; (3) the defendant making the representation negligently; (4) the plaintiff having reasonably relied on the misrepresentation; and, (5) the plaintiff suffering damages as a consequence of relying on the misrepresentation. See *Queen v. Cognos Inc.*, [1993] 1 S.C.R. 87 (S.C.C.); *Hedley Byrne & Co. v. Heller & Partners Ltd.* (1963), [1964] A.C. 465 (U.K. H.L.).

85 The essence of Excalibur's negligence claim is that SLF breached a duty of care by issuing a Clean Audit Report and but for a Clean Audit Report the private placement would not have been able to proceed. Thus, SLF's negligence caused the investors loss. The essence of Excalibur's negligent misrepresentation claim is that the issuing of a Clean Audit Report in the circumstances of this case was a false statement made in breach of a duty of care.

86 Excalibur submits that if SLF had completed a proper audit, it would not have been able to issue a Clean Audit Report and Southern China Livestock would never have been able to proceed with the private placement and the investors would never have lost their investment.

87 Excalibur's claim in negligence and its claim in negligent misrepresentation are tort claims for pure economic losses. The law about pure economic loss claims against auditors and accountants has raised controversies in the case law about when auditors and accountants have a duty of care to persons with whom the auditors have no direct contractual or professional relationship. See: *Haig v. Bamford* (1976), [1977] 1 S.C.R. 466 (S.C.C.); *Caparo Industries plc v. Dickman*, [1990] 2 A.C. 605

(U.K. H.L.); *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.); *Livent Inc. (Receiver of) v. Deloitte & Touche*, 2014 ONSC 2176 (Ont. S.C.J. [Commercial List]).

88 SLF submits that it is plain and obvious that the cause of action for negligence cannot succeed for two reasons: (1) the action is subsumed in the negligent misrepresentation pleading; the pleading of negligence is an attempt to indirectly advance a negligent misrepresentation allegation without the reliance and other constituent elements; and (2) to permit the negligence claim to be advanced independently would violate the prohibition against general negligence claims for pure economic loss.

89 I can understand why SLF might think that the negligence action is subsumed in the negligent misrepresentation action, because, as I foreshadowed above, and as I will discuss further below, Excalibur has combined misspeaking with the negligence of speaking at all, but it does not follow that it is plain and obvious that the pleaded cause of action for negligence cannot succeed. The situation rather is that SLF has a strong argument that it owed the investors no duty of care which argument will have to be tested at a trial or a summary judgment motion.

90 SLF's two-branched argument is similar to the argument that was made to and rejected by the late Justice Lax in *Robinson v. Rochester Financial Ltd.*, [2010] O.J. No. 187 (Ont. S.C.J.), leave to appeal ref'd 2010 ONSC 1899 (Ont. Div. Ct.). It is similar to the argument made to and rejected by me in *Lipson v. Cassels Brock & Blackwell LLP*, 2011 ONSC 6724 (Ont. S.C.J.), rev'd on other grounds 2013 ONCA 165 (Ont. C.A.).

91 In both *Robinson* and *Lipson*, the defendant law firms had prepared tax opinions for the promoters of the investment opportunity, and the investors anticipated receiving tax credits under the *Income Tax Act*. The investors alleged that the law firms' legal opinions were a necessary precondition to the marketing of the investments and that they had relied on the existence of the opinions as a factor in deciding whether to make the investment. In *Robinson*, Justice Lax disagreed with the law firm's argument that the investors' claim in negligence was a disguised negligent misrepresentation claim; rather, she viewed it as a discrete negligence claim pleading duty of care, standard of care, breach of the standard of care, causation, and damages. Justice Lax concluded that it was at least arguable that the lawyers ought to have foreseen that the tax opinion would be used to market the program and that the participants would suffer damages if the opinion was negligently prepared. Justice Lax appreciated that the negligence claim was a novel cause of action given that the investors were not the clients of the law firm and that the opinion had been prepared only for the promoter clients.

92 I followed the *Robinson* decision in my *Lipson* decision on the duty of care point of a negligence analysis, and noted that the facts for a duty of care in *Lipson* were stronger than in the *Robinson* case because the lawyer's wrote the legal opinion so that they might be relied on by potential donors, their agents and professional advisors for the purpose of the transactions contemplated by this opinion while in *Robinson*, the opinion was just for the promoters, although it was foreseeable that they would use it to market the donation program to potential donors.

93 In the respective decisions, Justice Lax and I did not decide that the lawyers had a duty of care. We decided only that it was not plain and obvious that they did not have a duty of care in the circumstances of the respective cases. For whatever its worth, I regard the argument for a duty of care in the present case as weaker than the argument in *Robinson* but strong enough to meet the very low threshold of s. 5(1)(a) of the *Class Proceedings Act*, 1992.

94 I say that the argument is weaker in the immediate case because in both *Robinson* and *Lipson* the legal opinion was in fact incorrect, but in the case at bar, the audit opinion that the financial statements fairly represented the true financial state of Southern China Livestock may have been factually correct. As noted several times above, Excalibur's case, both in negligence and for negligent misrepresentation, is not built upon any falsity in the financial statement (none has yet been identified), but rather it is built on the notion that SLF was not in position to opine one way or the other and, therefore, ought not to have expressed a Clean Audit Report that it allegedly knew or ought to have known would be relied on and but for which the private placement and investments would not have proceeded.

95 It will be for a trial judge to determine whether Excalibur's novel claim is within the range of established or new exceptions to the general principles that limit recoveries for pure economic losses in negligence based torts. For present purposes, I am satisfied that it is not plain and obvious that Excalibur's negligence claim is legally untenable.

96 For present purposes, I am also satisfied that that it is not plain and obvious that Excalibur's negligent misrepresentation claim is legally untenable.

97 The law has recognized that there can be misrepresentations by express false statements and misrepresentations by silence, where the silence conveys a message. Excalibur's negligent misrepresentation claim suggests that there can be a misrepresentation by failing to be silent; i.e. there are circumstances where a speaker has a duty of care to make no comment because he or she knows that a comment will be relied upon.

98 Thus, Excalibur's allegation of misrepresentation is a novel claim, but it will be for another day to determine how the claim aligns with the line of cases that have addressed whether a corporation's auditors have a duty to care beyond the duties owed to the corporation.

99 In my opinion, the cause of action criterion is satisfied for both the negligence claim and the negligent misrepresentation claim.

### ***3. Identifiable Class Criterion***

100 I turn now to the second criterion for certification of a class action, the identifiable class criterion.

101 The definition of an identifiable class serves three purposes: (1) it identifies the persons who have a potential claim against the defendant; (2) it defines the parameters of the lawsuit so as to identify those persons bound by the result of the action; and (3) it describes who is entitled to notice: *Bywater v. Toronto Transit Commission*, [1998] O.J. No. 4913 (Ont. Gen. Div.).

102 In defining Class Membership, there must be a rational relationship between the class, the causes of action, and the common issues, and the class must not be unnecessarily broad or over-inclusive: *Pearson v. Inco Ltd.* (2005), 78 O.R. (3d) 641 (Ont. C.A.) at para. 57, rev'd [2004] O.J. No. 317 (Ont. Div. Ct.), which had aff'd [2002] O.J. No. 2764 (Ont. S.C.J.).

103 The proposed definition of the class is set out earlier in this Decision, and SLF submits that the proposed class definition is too broad for three reasons: (1) there is no need to extend the class period beyond May 6, 2010, the date of the final round of the offering; (2) the description of the class should embrace only those who received the Representation; and (3) there should not be a global class.

104 The identities of the 57 members of the proposed class are already known or ascertainable and defining them by a definition seems a mere technicality.

105 SLF acknowledged that its first two objections to the class definition were technical and would make no difference to defining the class and identifying its members. Therefore, putting aside the matter of whether there should be a global class, I see no merit to SLF's criticism of the class definition, which otherwise would satisfy the second criterion for certification.

106 There is, however, in my opinion, merit in SLF's argument that a global class should not be certified in the case at bar and therefore, the identifiable class criterion is not satisfied.

107 I have no doubt that there is jurisdiction under the *Class Proceedings Act, 1992* to certify in Ontario national and global class actions where the Class Members will include persons and corporations from across Canada or from across the world.

108 National and global class actions have been certified in Ontario. See: *Bendall v. McGhan Medical Corp.* (1993), 14 O.R. (3d) 734 (Ont. Gen. Div.); *Robertson v. Thomson Corp.* (1999), 43 O.R. (3d) 161 (Ont. Gen. Div.); *Carom v. Bre-X Minerals Ltd.* (1999), 44 O.R. (3d) 173 (Ont. S.C.J.), aff'd (1999), 46 O.R. (3d) 315 (Ont. Div. Ct.), rev'd on other grounds (2000), 51

O.R. (3d) 236 (Ont. C.A.); *Wilson v. Servier Canada Inc.* (2000), 50 O.R. (3d) 219 (Ont. S.C.J.); *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2001] O.J. No. 4620 (Ont. S.C.J.); *Brimner v. VIA Rail Canada Inc.* (2000), 50 O.R. (3d) 114 (Ont. S.C.J.); *Cheung v. Kings Land Developments Inc.* (2001), 55 O.R. (3d) 747 (Ont. S.C.J.), leave to appeal refused [2002] O.J. No. 336 (Ont. Div. Ct.); *McNaughton Automotive Ltd. v. Co-operators General Insurance Co.* (2003), 66 O.R. (3d) 466 (Ont. S.C.J.); *Baxter v. Canada (Attorney General)*, [2005] O.J. No. 2165 (Ont. S.C.J.); *McCutcheon v. Cash Store Inc.* (2006), 80 O.R. (3d) 644 (Ont. S.C.J.); *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.), leave to appeal refused 2011 ONSC 1035 (Ont. S.C.J.); *Pysznyj v. Orsu Metals Corp.*, 2010 ONSC 1151 (Ont. S.C.J.); *Ramdath v. George Brown College of Applied Arts & Technology*, 2010 ONSC 2019 (Ont. S.C.J.); *Green v. Canadian Imperial Bank of Commerce*, 2012 ONSC 3637 (Ont. S.C.J.) at paras. 587-592, varied 2014 ONCA 90 (Ont. C.A.); *Drywall Acoustic Lathing and Insulation, Local 675 Pension Fund (Trustees) v. SNC-Lavalin Group Inc.*, 2012 ONSC 5288 (Ont. S.C.J.).

109 In the immediate case, the question to be decided is not whether there can be a global class action, the question is when is it appropriate to certify a global class.

110 A review of the above cases reveals that whether an Ontario court will certify a national or global class is a matter of conflicts of law, which is to say, it is a matter of the law about the jurisdiction of an Ontario court over a case with a foreign element, be it events in a foreign land, foreign parties, foreign witnesses, foreign law, or foreign courts that have a connection or a better connection with the parties and the case.

111 A review of the case law reveals that the factors relevant to whether or not to certify a national or global class include: (a) whether the Ontario court has jurisdiction *simpliciter* over the defendant; (b) whether the Ontario court can assume jurisdiction over a non-resident Class Member, which assumption of jurisdiction largely depends upon whether Ontario has a real and substantial connection with the subject matter of the jurisdiction and on principles of order and fairness and comity between courts; (c) whether it would be reasonable for the non-resident Class Member to expect that his or her rights would be determined by what to him or her would be a foreign court; and (d) whether the non-resident plaintiff can be accorded procedural fairness including adequate notice and a meaningful opportunity to opt-out.

112 In *McNaughton Automotive Ltd. v. Co-operators General Insurance Co.*, *supra*, the plaintiffs sued the defendant insurers and alleged that they had breached a statutory condition in their policies of automobile insurance concerning the calculation of salvage costs. Justice Haines concluded that the administration of justice would not be served by certifying a national class where: (1) the contract was made outside of Ontario pursuant to the laws of another jurisdiction; (2) the defendant was licenced under and subject to the laws of the other jurisdiction; (3) the alleged breach occurred outside Ontario; (4) the claimants resided outside of Ontario; (5) the events which gave rise to the claim occurred outside Ontario; and (6) the damages were sustained outside Ontario. Justice Haines concluded that there was a demonstrated absence of any real connection between the potential out-of-province Class Members and Ontario.

113 In *Ramdath v. George Brown College of Applied Arts & Technology*, *supra*, the Class Members were former students of George Brown College that claimed that the College's online and printed course calendars misrepresented that the completion of an academic program would entitle the students to three industry designations. The College is an Ontario community college, and the courses were taught in Toronto. There were 119 Class Members of which 78 were international students that the College had recruited from India (22), China (11), Japan, Turkey, Brazil, Russia, South Korea, Syria, Thailand, and Mexico. On the certification motion, the College did not dispute that the Ontario court had jurisdiction *simpliciter*, but it led evidence that the courts in India and China would not likely give preclusive effect to an Ontario judgment in a class action. In other words, the College submitted that if it was successful in the class action, the Ontario judgment would not preclude re-litigation in China or India because the foreign courts would not recognize the Ontario judgment as binding.

114 Justice Strathy, as he then was, certified the global class notwithstanding the objections of the College. He was satisfied that Ontario had a close connection to the subject matter of the litigation and that all the parties would have expected that claims arising from their relationship would be litigated in Ontario and nowhere else. He stated at paragraph 71 of his judgment:

71. In this case, looked at from the perspective of both the international students and George Brown, there would be every reason for both to expect that claims arising from their relationship would be litigated in Ontario. Given that George Brown is based in Ontario, the students came to college in Ontario and lived in Ontario, and the contract was performed in Ontario, it is hard to imagine that either party would have contemplated that George Brown would be sued in China, India or any one of the other foreign jurisdictions if the relationship broke down. There is, in any event, a real and substantial connection with Ontario and there is no such connection with any other single jurisdiction.

115 Justice Strathy was not impressed with the objection in to a global class in *Ramdath* that it was unlikely that the courts in India and China would preclude re-litigation should the College be successful in defending the Ontario action. He stated at paragraphs 84 and 87 of his judgment:

84 .... To echo the observations of Cumming J. in *Wilson v. Servier Canada Inc.* (2000), 50 O.R. (3d) 219, [2000] O.J. No. 3392, referred to above, at para. 28, if this court properly has jurisdiction over absent plaintiffs and the defendants, why should it decline to hear the case because another jurisdiction refuses to accede to the accepted norms of international law and, in particular, the principle of comity?

87. Applying the approach of *Vivendi*, it seems to me that the cumulative effect of these risks, while not zero, is insufficient to outweigh the many good reasons why the court can and should take jurisdiction, including the evidence that it is the only realistic way to provide access to justice for many international Class Members. Applying the approach of *Morguard*, *Wilson v. Servier*, and the International Bar Association Guidelines, as long as this Court follows international norms for taking jurisdiction, and is concerned for order and fairness, it is entitled to expect that other countries will recognize its orders. In this case, the jurisdictional factors almost exclusively point to Ontario, and it is unlikely that any Class Member would commence a proceeding in any other jurisdiction. It is appropriate for this Court to take jurisdiction over non-resident Class Members in these circumstances, particularly where the Class Members are as easily identifiable as in this case.

116 In the case at bar, there was some discussion during the argument of the certification motion about the significance, if any, to be given to the factor of the likelihood that an American court would recognize a judgment of the Ontario court dismissing Excalibur's action against an Ontario defendant. The proposition that was debated was that this was a relevant factor because it would not be fair to the defendant to have to go through a class proceeding only to have the Class Members re-litigate in another jurisdiction.

117 Upon reflection, it now strikes me that this discussion misses the point because the issue about whether there should be a global class is not so much whether a class proceeding procedure would be unfair to the defendant but more about whether including the foreigners in the Ontario proceeding would be fair to the foreigners. In that regard, the question of whether a foreign court would enforce the unfavourable foreign judgment begs the question because as noted by Justice Strathy in *Ramdath v. George Brown College of Applied Arts & Technology*, *supra*, it generally can be assumed that the foreign court will enforce the Ontario judgment if it was fair for the Ontario court to extend its jurisdiction to the foreign Class Members.

118 Thus, determining the likelihood of the enforceability of the Ontario judgment in a foreign court begs the question of whether the Ontario court should extend its jurisdiction to a foreigner represented by the Representative Plaintiff. I think, however, the discussion of the likely enforceability of the Ontario judgment is useful because it focusses attention on the issue of when would it be fair for an Ontario court to assume jurisdiction and bind a foreigner to its judgment.

119 The case law identifies one such circumstance when it would be fair to join foreign plaintiffs to an Ontario action; namely, when the foreigner would expect that his or her rights would be determined by what to him or her would be a foreign court.

120 This fairness factor in assuming jurisdiction was discussed by Justice Sharpe in *Parsons v. McDonald's Restaurants of Canada Ltd.* (2005), 74 O.R. (3d) 321 (Ont. C.A.) [hereinafter Currie], where the Court of Appeal established the test for recognition by an Ontario court of a foreign judgment that had approved a class action settlement. Recognizing the foreign court's settlement approval would bar or preclude an action for the same relief in Ontario.

121 *Currie* involved the enforcement of a U.S. judgment approving a class action settlement that purported to bind Ontario residents. The plaintiff, Greg Currie, brought a proposed class action alleging wrongdoing in relation to promotional games offered to customers of McDonald's Restaurants of Canada Ltd. However, McDonald's Canada moved for a stay of the action because there had been a class action in Illinois that included the Canadian customers among the certified class of claimants. The Illinois court had certified the class action for settlement purposes and approved a notice plan in which notice was given in Canada by means of notice in Maclean's Magazine. Although, Mr. Currie did not participate in the Illinois proceedings, he did not opt out, and McDonald's Canada argued that he was bound by the settlement approved by the Illinois court.

122 In a judgment written by Justice Sharpe, the Court of Appeal concluded that the Ontario court should not recognize the Illinois class action judgment because the notice of the right to opt-out and the notice plan were inadequate to satisfy the principles of natural justice, and thus it was not fair to bind Mr. Currie and the other Canadians to bar them from pursuing their claims.

123 Justice Sharpe discussed the topic of national and international class actions and how the principles of conflicts of law should apply in circumstances where there were non-resident plaintiffs in a global class action. Justice Sharpe appreciated that the underlying issue was when should a domestic court assume jurisdiction over foreign plaintiffs and purport to bind them. He stated that in *Morguard Investments Ltd. v. De Savoye*, [1990] 3 S.C.R. 1077 (S.C.C.), the Supreme Court of Canada identified the twin principles of "order and fairness" and "real and substantial connection" as the foundation of conflict of laws principles for a court assuming jurisdiction and for a court deciding whether to recognize a foreign court's judgment.

124 Justice Sharpe noted that embedded in the principle of order and fairness were the notions that courts should respect each other's role in dispensing justice in a global community, but courts should also exercise jurisdictional restraint.

125 Justice Sharpe noted that the real and substantial test was the overriding factor in the determination of jurisdiction, and he stated at paragraph 11 that the real and substantial connection test was a restraining factor; he stated:

The "real and substantial connection" test serves to control the assertion of jurisdiction. It is described variously in *Morguard*, at pp. 1104-9, as a connection "between the subject-matter of the action and the territory where the action is brought", "between the jurisdiction and the wrongdoing", "between the damages suffered and the jurisdiction", "between the defendant and the forum province", "with the transaction or the parties", and "with the action". The real and substantial connection test is a flexible one, "a term not yet fully defined" (*Tolofson v. Jensen*, [1994] 3 S.C.R. 1022 at 1049), and there is no strict or rigid test to be applied. (*Hunt v. T & N plc.*, [1993] 4 S.C.R. 289 at 325).

126 At paragraph 12 of his judgment, Justice Sharpe noted that the real and substantial connection test requires a substantial connection between the cause of action and the court. He stated:

*Morguard* dealt with the recognition and enforcement of inter-provincial judgments. In *Beals*, those same principles were adapted and applied to international judgments. Writing for the majority, at para. 37, Major J. described real and substantial connection as "the overriding factor in the determination of jurisdiction." He stated at para. 32:

The "real and substantial connection" test requires that a significant connection exist between the cause of action and the foreign court. Furthermore, a defendant can reasonably be brought within the embrace of a foreign jurisdiction's law where he or she has participated in something of significance or was actively involved in that foreign jurisdiction. A fleeting or relatively unimportant connection will not be enough to give a foreign court jurisdiction. The connection to the foreign jurisdiction must be a substantial one.

127 Then, in a passage, that I think is particularly pertinent to the case at bar, Justice Sharpe identified the expectations of the party who would be bound by the foreign court as an important factor about how the principles of order and fairness should apply when a court is deciding whether to assume jurisdiction over a foreign plaintiff or in deciding whether to recognize a foreign judgment as binding on its domestic plaintiff. He stated in paragraph 18:

To determine whether the assumption of jurisdiction by the foreign court satisfies the real and substantial connection test and the principles of order and fairness, it is necessary to consider the situation from the perspective of the party against whom enforcement is sought. In many cases, the actions of the non-resident Class Member will assist in determining jurisdiction. Take, for example, the case of an Ontario resident who orders goods from a foreign mail order merchant or who buys securities on a foreign stock exchange. The Ontario resident has engaged in a cross-border transaction with a foreign entity. The cause of action arises at least in part in the foreign jurisdiction. It would not be unreasonable, from the perspective of the Ontario resident, to expect that legal claims arising from the transaction could be properly litigated in the foreign jurisdiction. Nor is it unreasonable, whether from the perspective of the foreign defendant or from that of the Ontario plaintiff, to expect that class action litigation in the foreign jurisdiction should dispose finally of the Ontario plaintiff's claim.

128 I regard this passage as pertinent to the case at bar because from the perspective of all of the proposed Class Members, including Excalibur, the proposed Representative Plaintiff, it is hard to imagine a case where it would less reasonable to expect that his or her legal claims had a real and substantial connection to Ontario.

129 The residence of SLF in Ontario is essentially the only connection with Ontario and while that connection certainly gives the Ontario court jurisdiction over SLF and while Ontario courts would welcome foreigners to sue in Ontario that is a different thing from Ontario courts exercising the restraint required of them under the principles of order and fairness in assuming jurisdiction when the foreign plaintiff would have expected to pursue his or her rights in a court that did have a substantial connection with the subject matter of the litigation.

130 The investors in the case at bar were non-residents of Ontario making substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law. Although the transaction included an Audit Report from an Ontario auditor, the standard of care associated with that audit would largely be determined by the American accounting standards under which the Audit Report was provided. It would be to exercise no restraint at all to conclude that Ontario had a substantial connection with this American financing and corporate reorganization.

131 Here it may be noted that the fairness and propriety of assuming jurisdiction over foreign plaintiffs in a class action and the appropriateness of recognizing foreign judgments in a class action involve not only judgments that might favour the defendant but also judgments that arguably are not favourable enough for the Class Members. Justice Sharpe was also alert to this factor in *Parsons v. McDonald's Restaurants of Canada Ltd.*, *supra* where he stated at paragraph 17:

.... The settling defendants, plainly bound by the judgment, seek to enforce it as widely and as broadly as possible in order to preclude further litigation against them. Henry Paul Monaghan, "[Antisuit Injunctions and Preclusion Against Absent Nonresident Class Members](#)" (1998) 98 *Columbia Law Review* 1148 at 1155-56, warns of the need to guard against potential abuses by settling class action defendants who "welcome class action suits as a vehicle for limiting overall liability, sometimes at bargain-basement prices." Before enforcing a foreign class action judgment against Ontario residents, we should ensure that the foreign court had a proper basis for the assertion of jurisdiction and that the interests of Ontario residents were adequately protected.

132 The case at bar may be used to illustrate the point. Assume the Ontario court approved a settlement in which the class recovered approximately 24 cents on the dollar; visualize 40% of \$7.6 million (\$3 million) less administration costs of (\$0.3 million) and less a 30% contingency fee of (\$0.9 million). Anecdotally, I would say that a 40% gross recovery is at the high end of settlements of securities actions, but any of the 56 Class Members that reside outside of Ontario might not think the settlement was fair and they would rue that they did not opt out and pursue claims in their own courts. Or assuming the disgruntled investor kept his or her eye on his or her domestic court's limitation periods, he or she might decide to wait and see what happens in Ontario and then resort to his or her domestic courts if unhappy with the outcome.

133 These observations provide a transition to a discussion to the global class that was certified in *Silver v. Imax Corp.*, *supra*. A review of this case supports my conclusion that it would not be appropriate to certify a global class in the immediate case.

134 In *Silver v. Imax Corp.*, [2009] O.J. No. 5585 (Ont. S.C.J.), leave to appeal refused 2011 ONSC 1035 (Ont. S.C.J.), the plaintiffs purchased IMAX shares on the TSX. They alleged that IMAX and certain of its officers and directors misrepresented the reporting of revenues and that IMAX's financial statements were not in compliance with GAAP. The plaintiffs alleged that IMAX, whose shares traded on both the TSX and NASDAQ, had made misrepresentations in its Form 10-K filed with the Ontario Securities Commission and the U.S. Securities and Exchange Commission. When there was a corrective disclosure, IMAX's share price dropped 40%. The plaintiffs sued IMAX for negligence, negligent misrepresentation, conspiracy, and for a statutory claim under Part XXIII.1 of the Ontario *Securities Act*, R.S.O. c. S.5.

135 The plaintiffs proposed a global class of all persons (other than Excluded Persons) who acquired IMAX shares during the Class Period on the TSX and on NASDAQ and held some of those securities at the close of trading on August 9, 2006. The evidence was that approximately 15% of the proposed Class Members made their purchases on the TSX and approximately 85% made their purchases on NASDAQ. Thus, it appeared that 85% of class were non-residents. Justice van Rensburg certified the global class.

136 IMAX's main argument against the global class was that the global class should not be certified because given the nature of the claims being advanced, it was likely that the Ontario court would have to apply foreign law and this would make the Ontario proceedings unmanageable and not the preferable procedure. Justice van Rensburg concluded, however, that it was premature to decide what law applied and, in any event, the possible application of foreign law by itself would not stand against the certification of a global class.

137 I pause here to note that the parties have agreed that the question of what law applies to the Class Members' tort claims is not to be a factor that would get in the way of certifying a global class.

138 In opposing a global class in Ontario, IMAX also relied on the fact that there was a rival class action in the United States, but Justice van Rensburg concluded that the prospect that a similar proceeding might be certified in another jurisdiction was not sufficient to prevent the Ontario court from certifying a global class, if it was otherwise appropriate to do so.

139 Justice van Rensburg recognized that global classes had been certified in Ontario before, and that the precise issue was when (not whether) an Ontario could certify a national or global action. She stated at paragraph 120 of her judgment that the issue of certifying a global class involved whether Ontario had a real and substantial connection with the Class Members' claims and whether the assumption of jurisdiction would be consistent with the conflict of laws principles of order and fairness.

140 In *Silver v. Imax Corp.*, Justice van Rensburg was satisfied that Ontario had a real and substantial connection with the claims asserted on behalf of the non-resident members of the global class. She stated at paragraph 130:

Such connection exists in this case. IMAX is a CBCA corporation with its head office in Ontario. It is a reporting issuer under the OSA and its shares are traded on the TSX. The alleged Representation was made in Ontario through the issuance of the Company's Form 10-K and press releases from IMAX's Mississauga head office (although arguably it may have been made in IMAX's offices in New York as well). The alleged wrongful actions of the Individual Defendants in connection with the preparation and reporting of IMAX's financial statements are alleged to have taken place in Ontario as well as New York. The proposed common issues respecting liability that concern the conduct of the defendants accordingly have a substantial connection to this jurisdiction.

141 Justice van Rensburg felt that the concerns about order and fairness, which focussed on the fairness of involving non-residents in an Ontario action and potentially binding them to a judgment that their domestic court might recognize, could be addressed by paying careful attention to the notice and communications with non-resident members and to the potential needs for subclasses as the action proceeded. The notice procedure was particularly important because it informed Class Members about their right to opt out and about how the judgment might bind them if they did not opt out.

142 Thus, Justice van Rensburg certified the global class. She was very sensitive to the order and fairness concerns and especially sensitive to the fact that there was the parallel proceeding in the United States that were relevant to advising the Class

Members about their rights. She gave detailed reasons when approving the notice and the notice plan for the certification order and the notice made it clear that the Class Members did not have to opt out of the Ontario class action if they ultimately wished to participate in a settlement in the United States. See *Silver v. Imax Corp.*, 2012 ONSC 1047 (Ont. S.C.J.).

143 Ultimately, the United States action was certified for settlement purposes. The settlement was conditional on the Ontario court amending its class definition to exclude all persons who would be bound by the settlement of the U.S. Proceedings, which was concerned with purchasers on NASDAQ and not purchasers on the TSX. The idea was that IMAX was prepared to settle with the NASDAQ purchasers provided that they could not also participate in the Ontario action in which they had an overlapping claim.

144 Justice van Rensburg granted a motion to amend the class definition, which practically speaking substantially truncated if not eradicated the global class. Justice van Rensburg was prepared to recognize that the American court had a real and substantial connection to the matter and that its order should be respected by the Ontario court. See *Silver v. Imax Corp.*, 2013 ONSC 1667 (Ont. S.C.J.), leave to appeal to the Div. Ct. refused 2013 ONSC 6751 (Ont. S.C.J.).

145 Pausing here, to contrast the situation in *IMAX* with the situation in the case at bar. In *IMAX*, the non-residents constituted 85% of the class and in the case at bar, the non-residents constitute 98% of the class. Like IMAX, SLF is a resident of Ontario and does carry on business here, but the business that SLF carried on in the case at bar concerned: (a) an American company that owned a Chinese business; (b) an American corporate and financing transaction; (c) the American regulation of private placements in its marketplace for corporate securities; (d) the ownership of the shares, the promoting, and the marketing of them by Americans; (e) an American company's filings under American securities legislation; and (f) alleged non-compliance with the standards of the PCAOB (United States). Unlike in *Silver v. Imax Corp.*, in the case at bar the Canadian regulator (the OSC) was not involved.

146 I have no reason to doubt the correctness of Justice van Rensburg's decision certifying a global action in *Silver v. Imax Corp.*, but I do not think that her judgment supports a global class in the circumstances of the immediate case.

147 I think that the order and fairness concerns could be addressed in the immediate case, as they were in *Silver v. Imax Corp.* by a satisfactory notice plan, but recalling that the real and substantial connection test is to be exercised with restraint, I do not think that Ontario has a real and substantial connection with the claims of 56 of the 57 investors, and I think that Ontario's connection with the claim of Excalibur, a Manitoba partnership carrying on its investment business in Ontario, is modest if not trivial.

148 Ontario has a connection to the proposed class action but it is not a real and substantial connection.

149 I appreciate that unlike the situation in *Silver v. Imax Corp.*, the foreign investors do not have the alternative of a United States class action, but the existence or non-existence of a companion American class action, while relevant to the principles of order and fairness, would not infuse the Ontario court with a real and substantial connection with the investors claims against SLF.

150 And, the foreign investors who have been waiting and seeing what happens with the proposed Ontario class action now have their answer, and they may take whatever steps to sue SLF as they may be advised.

151 I conclude that Excalibur has not satisfied the second criterion for certification (class definition).

#### **4. Common Issues Criterion**

152 In the case at bar, the failure to satisfy the second criterion is irremediable and, therefore, the certification motion should be dismissed. However, given that appeals are virtually inevitable in proposed class actions, I will go on to consider the other certification criteria.

153 The third criterion for certification is the common issues criterion. For an issue to be a common issue, it must be a substantial ingredient of each Class Member's claim and its resolution must be necessary to the resolution of each Class Member's claim: *Hollick v. Metropolitan Toronto (Municipality)*, *supra* at paragraph 18.

154 With regard to the common issues, "success for one member must mean success for all. All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent." That is, the answer to a question raised by a common issue for the plaintiff must be capable of extrapolation, in the same manner, to each member of the class: *Western Canadian Shopping Centres Inc. v. Dutton*, *supra* at para. 40; *Ernewein v. General Motors of Canada Ltd.*, 2005 BCCA 540 (B.C. C.A.) at para. 32; *Wuttunee v. Merck Frosst Canada Ltd.*, 2009 SKCA 43 (Sask. C.A.) at paras. 145-46 and 160; *McCracken v. Canadian National Railway* [2012 CarswellOnt 8010 (Ont. C.A.)], *supra*, at para. 183.

155 An issue is not a common issue if its resolution is dependent upon individual findings of fact that would have to be made for each Class Member: *Fehringer v. Sun Media Corp.*, [2003] O.J. No. 3918 (Ont. Div. Ct.) at paras. 3, 6.

156 Common issues cannot be dependent upon findings which will have to be made at individual trials, nor can they be based on assumptions that circumvent the necessity for individual inquiries: *Nadolny v. Peel (Region)*, [2009] O.J. No. 4006 (Ont. S.C.J.) at paras. 50-52; *Collette v. Great Pacific Management Co.*, [2003] B.C.J. No. 529 (B.C. S.C.) at para. 51, varied on other grounds (2004), 42 B.L.R. (3d) 161 (B.C. C.A.); *McKenna v. Gammon Gold Inc.*, [2010] O.J. No. 1057 (Ont. S.C.J.) at para. 126, leave to appeal granted [2010] O.J. No. 3183 (Ont. Div. Ct.), varied 2011 ONSC 5882 (Ont. Div. Ct.).

157 The common issue criterion presents a low bar: *Carom v. Bre-X Minerals Ltd.* (2000), 51 O.R. (3d) 236 (Ont. C.A.) at para. 42; *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at para. 52; 2038724 Ontario Ltd. v. Quizno's Canada Restaurant Corp., [2009] O.J. No. 1874 (Ont. Div. Ct.), aff'd [2010] O.J. No. 2683 (Ont. C.A.), leave to appeal to S.C.C. refused (2011), [2010] S.C.C.A. No. 348 (S.C.C.). An issue can be a common issue even if it makes up a very limited aspect of the liability question and even though many individual issues remain to be decided after its resolution: *Cloud v. Canada (Attorney General)* *supra*, at para. 53.

158 Excalibur proposes the following common issues:

1. Did the Defendant meet applicable GAAS and PCAOB standards in the preparation of its Auditor's Report for Southern China Livestock in respect of the consolidated financial statements for 2008 and 2009 (the "Auditor's Report")?
2. Did the Defendant owe the Class Members a duty of care in respect of the preparation of the Auditor's Report?
3. Did the Defendant owe the Class Members a duty of care in permitting the Auditors Report to be included as an exhibit to Expedite 4, Inc.'s Private Placement Memorandum?
4. What is the applicable standard of care owed by the Defendant to the Class Members?
5. Was the Defendant negligent in the manner in which it prepared the Auditor's Report?
6. Did the Defendant breach its duty of care owed to the Class Members by issuing an unqualified, clean audit opinion in the Auditor's Report that was included as an exhibit to the Private Placement Memorandum?
7. Was the information contained in the Auditor's Report materially false, inaccurate or misleading?
8. Was it reasonably foreseeable that the Class Members would rely on the representations made in the Auditor's Report in deciding whether or not to invest in Expedite 4, Inc. through the private placement, or at any time up until December 23, 2010?
9. Was it reasonable for the Class Members to have relied on the Auditor's Report in deciding whether or not to participate in the private placement, or in purchasing any Units at any time up until December 23, 2010?

10. Did the Defendant know or should it have known that the Class Members would be harmed if the information contained in the Auditor's Report was materially false, inaccurate or misleading?

11. Can the court infer on a class-wide basis that the Class Members relied on the representations made in the Auditors' Report when deciding to invest in Southern China Livestock?

12. Did the Class Members suffer the loss of their entire investment in Southern China Livestock, and if so, was the loss caused or contributed to by the negligence, including the negligent misrepresentations, of the Defendant?

13. If so, is the Defendant liable to the Class Members for the loss of their investment?

14. Did the Defendant fail to meet GAAS and PCAOB standards in its preparation of the Auditor's Report for Southern China Livestock for 2010 (the "2010 Auditors' Report")?

15. Was the Defendant negligent in the preparation of the 2010 Auditor's Report?

16. If so, did the Defendant's negligence cause or contribute to the loss of investment suffered by the Class Members?

17. Should the law of Ontario be applied by the trial judge in determining if the Defendant was negligent, or made a negligent misrepresentation in the Auditor's Report?

159 Questions 1 (as revised), 2, 3, 4, 7 (as revised), and 17 satisfy the test for certification as common issues.

160 In my opinion, Questions 5, 6, 8, 9, 10, 11, 12, 13, 14, 15, and 16 should not be certified.

161 Question 1, as presently drafted, is unsatisfactory because it invites a fishing expedition about the auditing of financial statements that may be a perfectly accurate representation of the financial position of Southern China Livestock.

162 As explained above, the theory of Excalibur's case is much narrower than identified mistakes in the financial statements, and it is that SLF did not meet applicable GAAS and PCAOB standards when it gave a Clean Audit Report in circumstances when it could not do so. Excalibur's complaint is that the Audit Report gave credence to financial statements that could not be relied upon even if they happened to correctly state the assets and liabilities and accounts of Southern China Livestock.

163 Question 1 needs to be drafted to conform with Excalibur's action and not to encourage a fishing expedition to discover another theory of the case. Therefore, to be certified, Question 1 should be revised as follows:

1. Given the lack of financial controls for Southern China Livestock's business, did the Defendant meet applicable GAAS and PCAOB standards or breach a duty of care by delivering an Auditor's Report for Southern China Livestock International Inc. in respect of the consolidated financial statements for 2008 and 2009 (the "Auditor's Report")?

164 A similar criticism can be made of Question 5, which, in any event, is redundant once Question 1 is revised and certified.

165 Questions 6, 14, 15, and 16 are redundant and should not be certified.

166 Question 7 requires revision because it too encourages a fishing expedition for a different case of negligent misrepresentation, and Question 7 is not connected to the negligent misrepresentation action as it has been actually pleaded by Excalibur, which, as noted above, makes the misrepresentation the negligence of delivering a Clean Audit Report. (SLF's misrepresentation is speaking when it ought not to have spoken at all.) To be certified Question 7 should be revised as follows:

7. Given the lack of financial controls for Southern China Livestock's business, did the Defendant make a misrepresentation by delivering an Auditor's Report for Southern China Livestock International Inc. in respect of the consolidated financial statements for 2008 and 2009 (the "Auditor's Report")?

167 Questions 8 and 10 should not be certified, because they are redundant to Question 2 and conflate on the one hand a duty of care analysis, where the foreseeability of reliance is part of the analysis, with, on the other hand, the reasonable reliance element of the tort of negligent representation, which is a matter of fact or perhaps inferred fact.

168 Question 9 should not be certified because it wants for commonality. Whether it is reasonable for a Class Member to have relied on the Auditor's Report is an individual issue and it cannot be made a common issue by the act of pluralizing the question.

169 Questions 9, 11, 12, and 13 are the reliance, causation, and ultimate liability questions, and, as I will shortly explain, these questions do not satisfy the common issues criterion.

170 In any event, Question 11 would require revision to conform with the theory of Excalibur's case, which relies on the delivery of the Audit Report as a representation. As repeatedly noted, Excalibur's case is not about whether the investors relied on representations made in the Audit Report but on the Clean Audit Report being itself a misrepresentation. Thus, if Question 11 were certifiable, it should be revised as follows:

11. Can the court infer on a class-wide basis that the Class Members relied on the Defendant's Audit Report when deciding to invest in Southern China Livestock?

171 Similarly, if Question 12 were certifiable, it would require modest revision to change the word "misrepresentations" (plural) to "misrepresentation" (singular).

172 I return to *Lipson v. Cassels Brock & Blackwell LLP*, *supra*, to explain why Questions 9, 11, 12, and 13 do not satisfy the common issues criterion.

173 In *Lipson*, the lawyers were sued for negligence and negligent misrepresentation with respect to a legal opinion that was part of an investment offering. As noted above, it was not plain and obvious that there were not tenable causes of action.

174 On the matter of common issues, in *Lipson*, I held that the reasonable reliance element of the tort of negligent misrepresentation did not present a common issue. I also held that the causation element of the tort of negligence did not present a common issue. The Representative Plaintiff appealed my later ruling, and I was reversed by the Court of Appeal.

175 On the common issue criterion in the *Lipson* appeal, Justice Goudge stated at paragraphs 92-99 as follows:

**Did the motion judge err in finding that causation in simple negligence is not a proper common issue?**

92. The motion judge found that Mr. Lipson's pleading disclosed a cause of action in negligent misrepresentation and also in simple negligence, and that it was not plain and obvious that these claims would fail. He also found that, for both causes of action, whether Cassels Brock owed the class a duty of care and whether it had breached that duty were proper common issues.

93. However, the motion judge found that, for both causes of action, the question of whether Cassels Brock's breach caused the class damage was not a proper common issue but instead had to be answered on an individual basis for each Class Member.

94. Mr. Lipson contests this finding as it applies to his claim in simple negligence. He says that, for that cause of action, causation should be certified as a common issue.

95. For the following reasons, we agree.

96. In finding that Mr. Lipson's claim in simple negligence was properly disclosed by his pleading, the motion judge looked to Mr. Lipson's allegations that the Cassels Brock legal opinion was a necessary precondition for the marketing of the program, that Cassels Brock ought to have foreseen that for the promoters the opinion was fundamentally necessary for

the presentation of the program, and that those who then bought into the program would suffer damage if the opinion had been negligently prepared.

97 Thus, the claim in simple negligence is distinct from Mr. Lipson's claim in negligent misrepresentation, which required proof of reliance on the opinion by individual class members in deciding to participate in the program.

98. Framed in this way, the cause of action in simple negligence does not require a showing of reliance on the Cassels Brock opinion by individual Class Members. The allegation is that Class Members suffered damage because they participated in the program, which, but for Cassels Brock's negligent opinion, would not have been marketed by the promoters and thus not available to Class Members. In our view, this issue is common to the claims of all Class Members.

99. It may be that, at the trial of this common issue, evidence will emerge that the Cassels Brock legal opinion was not a necessary precondition for the promoters to market the program. For example, there may be evidence that the promoters were satisfied to go to market without any legal opinion, or because of legal opinions other than those of Cassels Brock. However, that determination is for the trial. At this stage, there need only be some basis in fact supporting Mr. Lipson's simple negligence claim. That requirement was met here. In addition to Mr. Lipson's pleading that the legal opinion was a necessary precondition, there was evidence of the promoters' accountant who said as much.

176 Because I am bound by the Court of Appeal's judgment, I conclude that in the immediate case, Questions 11, 12, and 13 did not want for commonality.

177 I am also aware of authorities that hold that reliance need not always be treated as an individual issue in class actions, because depending on the nature of the misrepresentation class-wide reliance may be inferred from the facts. See: *O.P.S.E.U. v. Ontario*, 13 C.P.C. (6th) 178 (Ont. S.C.J.) at para. 68; *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2001] O.J. No. 4620 (Ont. S.C.J.); *Lawrence v. Atlas Cold Storage Holdings Inc.*, [2006] O.J. No. 3748 (Ont. S.C.J.); *Hickey-Button v. Loyalist College of Applied Arts & Technology*, [2006] O.J. No. 2393 (Ont. C.A.). *Cannon v. Funds for Canada Foundation*, 2012 ONSC 3009 (Ont. S.C.J.), leave to appeal denied 2012 ONSC 6101 (Ont. Div. Ct.); *Ironworkers Ontario Pension Fund (Trustee of) v. Manulife Financial Corp.*, 2013 ONSC 4083 (Ont. S.C.J.), leave to appeal to Div. Ct. denied 2014 ONSC 1347 (Ont. Div. Ct.).

178 However, the finding that reliance may sometimes be inferred does not complete the analysis of the common issues criterion, because common issues cannot be based on assumptions that circumvent the necessity for individual inquiries: *Nadolny v. Peel (Region)*, *supra*; *Collette v. Great Pacific Management Co.*, *supra*; *McKenna v. Gammon Gold Inc.*, *supra*.

179 In the case at bar, not only does SLF challenge the fundamental premise that reliance and causation can be established from the external factor of the Audit Report allegedly being a prerequisite to the private placement being marketed, it pleads that the investors did not rely on the Audit Report and it pleads that the investors were contributorily negligent.

180 Thus, even if the court were to agree that reasonable reliance or causation in fact were established at the common issues trial by inference, the ultimate determination of SLF's liability and the amount of it would still be dependent upon individual findings of fact about reliance and about the contributory negligence of each individual investor. The case law establishes that even where the defendant is solely responsible for the damage suffered by a negligent misrepresentation, the plaintiff's damages will be reduced on the grounds of contributory negligence: *Grand Restaurants of Canada Ltd. v. Toronto (City)* (1981), 32 O.R. (2d) 757 (Ont. H.C.), affd. (1982), 39 O.R. (2d) 752 (Ont. C.A.); *Empire Life Insurance Co. v. Krystal Holdings Inc.*, [2008] O.J. No. 4661 (Ont. S.C.J.); *O'Connell v. Jackson* (1971), [1972] 1 Q.B. 270 (Eng. C.A.).

181 In *Avco Financial Services Realty Ltd. v. Norman* (2003), 64 O.R. (3d) 239 (Ont. C.A.), leave to appeal ref'd [2003] S.C.C.A. No. 300 (S.C.C.), Justice Charron discussed the distinction between the reasonable reliance component of negligent misrepresentation and contributory negligence at para. 32:

32. On the question of contributory negligence, the focus is on the event that occasioned the loss. The injured party's conduct, in all the circumstances surrounding that event, must be considered in order to determine whether it acted

reasonably in its own interest or whether it contributed to the loss by its own fault. The circumstances surrounding the event that occasioned the loss, depending on the particular facts of the case, may be much wider in scope than the circumstances surrounding the negligent misrepresentation. Hence, at this stage of the inquiry, the reasonableness of the injured party's reliance on the misrepresentation must be assessed in the context of the event that occasioned the loss. According to the test for contributory negligence set out earlier at para. 26, the injured party will be found guilty of contributory negligence if it ought to have foreseen that it may harm itself by failing to act reasonably and prudently.

182 A class action is a procedural statute, and it does not take away SLF's right to prove that individual Class Members did not prove all of the constituent elements of negligence or negligent misrepresentation or that there were some Class Members that have only themselves or others to blame in whole or in part for investing in Southern China Livestock.

183 To use the metaphor sometimes used in this context, certifying the issue of inferred reliance as a common issue would move the forensic yardsticks but there would be no first down and instead there would be a third down punt to the defendant at an individual issues trial. Inferred reliance would not significantly advance the action, and certifying the issue would achieve no judicial economy, because, in any event, there will be individual issues trials to allow SLF to rebut the inference by evidence of how the 57 investors each went about making his, her, or its decision to invest in Southern China Livestock.

184 My analysis here is similar to that of the Court of Appeal in *Lacroix v. Canada Mortgage and Housing Corp.*, 2012 ONCA 243 (Ont. C.A.), where the Court upheld a decision of Justice Charbonneau not to certify as a common issue whether Canada Mortgage and Housing Corp. (CMHC) had made a misrepresentation about the Class Members' entitlements to pension plan benefits.

185 Justice Charbonneau found that there was no evidence of a common misrepresentation and no evidence for reliance to be inferred on a class-wide basis. The Court of Appeal held that while there might be cases where reliance could be inferred from the facts, Justice Charbonneau had reasonably found that reliance was very much an individual issue in the proposed class action.

186 Then, the court added a second reason for deciding that the reliance question was not a common issue; i.e., it was not a common issue, because the CMHC was entitled to defend the claim on the basis that individual members' decisions were unconnected to the misrepresentation. Justice Laskin writing for the court stated at para. 125:

The motion judge also reasonably held that even if CMHC had a "duty to notify the plan members that they had a right to share in an eventual distribution of surplus and that they would forgo that right if they left the plan", and that, therefore, its breach of this duty amounted to a mis-representation by omission, still class-wide reliance could not be inferred. CMHC would be entitled to defend the claim on the basis that individual members' decisions to leave the plan were unconnected to the misrepresentation: see *Plaza Fiberglass Manufacturing Ltd. v. Cardinal Insurance Co.* (1994), 18 O.R. (3d) 663 (C.A.).

187 My conclusion that Questions 9, 11, 12, and 13 do not satisfy the common issues criterion does not by itself threaten the certification of Excalibur's action as a class action. Where there are other common issues that would justify certification, the action may be certified and reasonable reliance may be dealt with as an individual issue: *Green v. Canadian Imperial Bank of Commerce*, 2014 ONCA 90 (Ont. C.A.) at paras. 97-104; *Carom v. Bre-X Minerals Ltd.* *supra* at paras. 252-255 (C.A.).

188 I conclude that Excalibur has satisfied the third criterion for certification for Questions 1 (as revised), 2, 3, 4, 7 (as revised), and 17.

##### **5. Preferable Procedure Criterion**

189 For the purposes of the following preferable procedure analysis, I will assume that there is a global class of 57 Class Members with claims in negligence and negligent misrepresentation with the certifiable common issues discussed above; namely: Questions 1 (as revised), 2, 3, 4, 7 (as revised), and 17.

190 Preferability captures the ideas of: (a) whether a class proceeding would be an appropriate method of advancing the claims of the Class Members; and (b) whether a class proceeding would be better than other methods such as joinder, test

cases, consolidation, and any other means of resolving the dispute: *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.) at paragraph 69, leave to appeal to S.C.C. ref'd, [2007] S.C.C.A. No. 346 (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)*, *supra*.

191 Relevant to the preferable procedure analysis are the factors listed in s. 6 of the *Class Proceedings Act*, 1992, which states:

6. The court shall not refuse to certify a proceeding as a class proceeding solely on any of the following grounds:

1. The relief claimed includes a claim for damages that would require individual assessment after determination of the common issues.
2. The relief claimed relates to separate contracts involving different Class Members.
3. Different remedies are sought for different Class Members.
4. The number of Class Members or the identity of each Class Member is not known.
5. The class includes a subclass whose members have claims or defences that raise common issues not shared by all Class Members.

192 For a class proceeding to be the preferable procedure for the resolution of the claims of a given class, it must represent a fair, efficient, and manageable procedure that is preferable to any alternative method of resolving the claims: *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.) at paragraphs 73-75, leave to appeal to S.C.C. ref'd, [2005] S.C.C.A. No. 50 (S.C.C.).

193 Whether a class proceeding is the preferable procedure is judged by reference to the purposes of access to justice, behaviour modification, and judicial economy and by taking into account the importance of the common issues to the claims as a whole, including the individual issues: *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.) at para. 69, leave to appeal to S.C.C. ref'd, [2007] S.C.C.A. No. 346 (S.C.C.); *Hollick v. Metropolitan Toronto (Municipality)*, *supra*.

194 In considering the preferable procedure criterion, the court should consider: (a) the nature of the proposed common issue(s); (b) the individual issues which would remain after determination of the common issue(s); (c) the factors listed in the *Act*; (d) the complexity and manageability of the proposed action as a whole; (e) alternative procedures for dealing with the claims asserted; (f) the extent to which certification furthers the objectives underlying the *Act*; and (g) the rights of the plaintiff(s) and defendant(s): *Chadha v. Bayer Inc.* (2001), 54 O.R. (3d) 520 (Ont. Div. Ct.) at para. 16, aff'd (2003), 63 O.R. (3d) 22 (Ont. C.A.), leave to appeal to S.C.C. ref'd, [2003] S.C.C.A. No. 106 (S.C.C.).

195 The Court must identify alternatives to the proposed class proceeding: *Fischer v. IG Investment Management Ltd.*, 2013 SCC 69 (S.C.C.) at para. 35; *Hollick v. Metropolitan Toronto (Municipality)*, *supra* at para. 28. The proposed representative plaintiff bears the onus of showing that there is some basis in fact that a class proceeding would be preferable to any other reasonably available means of resolving the Class Members' claims, but if the defendant relies on a specific non-litigation alternative, the defendant has the evidentiary burden of raising the non-litigation alternative: *Fischer v. IG Investment Management Ltd.*, *supra* at paras. 48-49.

196 In *Fischer v. IG Investment Management Ltd.*, *supra* at paras. 24 to 38, the Supreme Court of Canada reiterated that the preferability analysis must be conducted through the lens of judicial economy, behaviour modification and access to justice. Justice Cromwell for the Court stated that access to justice has both a procedural and substantive dimension. The procedural aspect focusses on whether the claimants have a fair process to resolve their claims. The substantive aspect focuses on the results to be obtained and is concerned with whether the claimants will receive a just and effective remedy for their claims if established.

197 In *Fischer v. IG Investment Management Ltd.*, Justice Cromwell pointed out that when considering alternatives to a class action, the question is whether the alternative has potential to provide effective redress for the substance of the plaintiffs' claims and to do so in a manner that accords suitable procedural rights. He said that there are five questions to be answered

when considering whether alternatives to a class action will achieve access to justice: (1) Are there economic, psychological, social, or procedural barriers to access to justice in the case? (2) What is the potential of the class proceeding to address those barriers? (3) What are the alternatives to class proceedings? (4) To what extent do the alternatives address the relevant barriers? (5) How do the two proceedings compare?

198 In considering the preferable procedure criterion, one should consider the type or genre of class action, because in terms of access to justice, the needs of plaintiffs suffering personal injuries are different than the needs of plaintiffs suffering a purely economic loss, and the needs of those suffering economic losses are different depending upon whether the loss is a deprivation or a missed expected financial gain.

199 The type of remedy being sought be it declaratory, compensatory, or restitutionary may also make a difference to whether a class proceeding is the preferable procedure for the resolution of the Class Members' claims. Providing injured parties with access to justice cannot be divorced from ensuring that the ultimate remedy provides substantive justice where warranted: *Fischer v. IG Investment Management Ltd.*, *supra*, at para. 24; F. Iacobucci, "What Is Access to Justice in the Context of Class Actions?" in J. Kalajdzic, ed., *Accessing Justice: Appraising Class Actions Ten Years After Dutton, Hollick & Rumley* (2011), 17 at p. 20.

200 And one should now add to the preferable procedure factors the factor of the relationship between access to justice, which is the preeminent concern of class proceedings, and proportionality in civil procedures. The importance of proportionality to access to justice was recently expressed by the Supreme Court of Canada in *Combined Air Mechanical Services Inc. v. Flesch*, 2014 SCC 7 (S.C.C.) at paras. 1-2, 27, where the Court stated:

Ensuring access to justice is the greatest challenge to the rule of law in Canada today. Trials have become increasingly expensive and protracted. Most Canadians cannot afford to sue when they are wronged or defend themselves when they are sued, and cannot afford to go to trial. ... Increasingly, there is recognition that a culture shift is required in order to create an environment promoting timely and affordable access to the civil justice system. This shift entails simplifying pre-trial procedures and moving the emphasis away from the conventional trial in favour of proportional procedures tailored to the needs of the particular case. The balance between procedure and access struck by our justice system must come to reflect modern reality and recognize that new models of adjudication can be fair and just.

There is growing support for alternative adjudication of disputes and a developing consensus that the traditional balance struck by extensive pre-trial processes and the conventional trial no longer reflects the modern reality and needs to be re-adjusted. A proper balance requires simplified and proportionate procedures for adjudication, and impacts the role of counsel and judges. This balance must recognize that a process can be fair and just, without the expense and delay of a trial, and that alternative models of adjudication are no less legitimate than the conventional trial.

201 With all the relevant factors in mind, I begin the preferable procedure analysis for the immediate case by noting that the case at bar is quite far from the quintessential case where a class action has been held to be the preferable procedure to obtain access to justice, behavior modification, and judicial economy.

202 In the quintessential case of a class proceeding for a purely economic loss, the proposed Representative Plaintiff genuinely needs a class proceeding to obtain access to justice, rather than just wanting a class proceeding for its several advantages and the intense pressure it exerts on the Defendant to settle.

203 In the quintessential economic loss case, the Representative Plaintiff's individual claim would not justify suing the Defendant, and so an individual action is out of the question; only a class action will achieve access to justice. In the quintessential case, there is an economic barrier to access to justice because the individual cannot bring forward a claim because of the high cost that litigation would entail in comparison to the modest value of the claim. The modest individual recovery, the litigation expense, the forensic challenges of proving wrongdoing, and the risk of an adverse costs award make anything other than a class action prohibitive and unfeasible.

204 In the quintessential case for an economic loss, behaviour modification is genuinely achieved because but for a class action, the Defendant would have gotten away with its economic wrongdoing because those wronged as individuals would not be able to bring the Defendant to the seat of justice, unless they joined together as members of a class action. Financially, it would not make sense to pursue the Defendant and financially a Class Counsel would not be interested in prosecuting the case unless there was an appropriate upside for taking on the risks.

205 In the quintessential case, considerable judicial economy will be achieved by the common issues trial, which in the best case will be dispositive of the litigation and lead to a distribution of the proceeds in accordance with the considerable administrative resources of the *Class Proceedings Act, 1992*.

206 Unlike the quintessential case, in the case at bar, Excalibur has an almost \$1 million claim that would justify taking on the litigation risk. Excalibur itself does not genuinely need a class action to obtain access to justice. If Excalibur was joined by just the other top 10 investors in an action against SLF (which would not need to be certified and for which there would be no doubt about the court's jurisdiction *simpliciter*), the action would have the heft of being a claim for around USD \$3 million. There is ample here for a contingency fee, and Class Counsel would not be confronted with the risks associated with obtaining certification.

207 In other words, unlike the situation in *Fischer v. IG Investment Management Ltd.*, *supra*, which was an investor class action populated mainly by investors with claims that would not justify individual actions, there are no significant economic barriers to litigating that would need to be overcome by a class action procedure. The investors are known and any of them with claims that are uneconomical to litigate could be just as easily carried as co-plaintiffs without the formality and expense of a certification motion. There are also no psychological or social barriers, such as might be present in an employment or franchise class action, where the Class Members may be intimidated or reluctant to sue their boss or franchisor. There is no psychological or social barrier that presents itself and the forensic resources of the parties are about equal in terms of the availability of capable lawyers and qualified expert witnesses.

208 Perhaps, with a few exceptions, the Class Members also do not need a class action in order to obtain access to justice. The Class Members, even the smaller ones, are "accredited investors" which means they are, by definition, not without resources to litigate.

209 In the case at bar, it is debatable whether behaviour modification is needed beyond the behaviour modification that comes from an regular tort action. SLF did not rip off the investors who were strangers to it and with whom SLF had no retainer. All SLF got out of the refinancing of Southern China Livestock was \$45,000 for auditing statements for which there is no evidence that the statements are not accurate. Accidentally or coincidentally the statements might have been accurate at the time they were issued, but the allegation is that it was negligent for SLF to issue the Audit Report accurate or not. SLF is being sued in a novel action that may extend the liability of auditors. In any event, an unsuccessful defence of a \$1 million action will get the lesson out to the accounting profession that auditors are exposed to this type of liability.

210 In the case at bar, the common issues trial would be manageable and make a substantial contribution to resolving the claims of all of the Class Members, but the class action as a whole would achieve only modest judicial economy over individual actions or the joinder of claims, and the judicial economy it achieves is likely to be attenuated in the case at bar, because there would be individual issue trials because SLF has a right to advance its contributory negligence defence and damages cannot be determined in the aggregate.

211 That the case at bar is far from the quintessential economic loss class action, however, does not mean that it does not satisfy the preferable procedure criterion. Similar pure economic cases with self-sufficient representative plaintiffs have been certified; see: *Lipson v. Cassels Brock & Blackwell LLP*, 2013 ONCA 165 (Ont. C.A.) varying 2011 ONSC 6724 (Ont. S.C.J.); *Cannon v. Funds for Canada Foundation*, 2012 ONSC 399 (Ont. S.C.J.), leave to appeal to Div. Ct. ref'd. 2012 ONSC 6101 (Ont. Div. Ct.); 2012 ONSC 399 (Ont. S.C.J.); *Robinson v. Rochester Financial Ltd.*, [2010] O.J. No. 187 (Ont. S.C.J.), leave to appeal ref'd 2010 ONSC 1899 (Ont. Div. Ct.); *CC&L Dedicated Enterprise Fund (Trustee of) v. Fisherman*, [2001] O.J. No.

4622 (Ont. S.C.J.), *Delgrossio v. Paul* (1999), 45 O.R. (3d) 605 (Ont. Gen. Div.); *Elms v. Laurentian Bank of Canada*, 2001 BCCA 429 (B.C. C.A.).

212 So the preferable procedure analysis must go forward to determine whether the case at bar although far from the quintessential economic loss case, nevertheless, is the preferable procedure for the Class Members' claims.

213 In making a preferable procedure analysis, it is necessary to consider the alternatives to a class action. The preferable procedure analysis recognizes that a class action is not the only way for a group to litigate.

214 As noted above in *Fischer v. IG Investment Management Ltd.*, *supra*, the Supreme Court stated that when considering alternatives to a class action, the question is whether the alternative has potential to provide effective redress for the substance of the plaintiffs' claims and to do so in a manner that accords suitable procedural rights.

215 In the case at bar, the alternative of a joinder of claims would provide effective redress for Excalibur and another other investors who could join the action as co-plaintiffs. A joinder of claims would provide suitable procedural rights. A joinder of claims would have avoided a certification motion, although perhaps not a motion to challenge the jurisdiction of the Ontario court as forum *non conveniens* given that the United States would be the expected venue for all of the investors. In comparison to a class action, a joinder of claims would provide access to justice for those class members with meritorious claims, promote adequate behaviour modification of the defendant and provide a similar amount of judicial economy to that which would be achieved by a class action.

216 In my opinion, in the circumstances of the case at bar, a joinder of claims is preferable to a class action, which, although manageable would be and has shown itself to be more procedurally cumbersome and protracted than a regular action. With the benefit of hindsight, this almost two-year old action might be past discoveries and be ready to set down for trial if it had not been delayed by the pursuit of certification under the *Class Proceedings Act, 1992*.

217 Like all of the criterion for certification, the preferable procedure criterion sets a very low and easy to satisfy standard, but it is not so low that it is satisfied automatically because a representative plaintiff can form a group of claimants with manageable common issues, which is more or less all that Excalibur has done in the case at bar. And in the case at bar, the formation of a class is without showing that Ontario has a real and substantial connection to the investors' claims and is without showing that a class action is necessary to overcome any barriers to access to justice. In the case at bar, a class action is not necessary to achieve behaviour modification and a class action would not be particularly helpful in providing judicial economy.

218 In my opinion, the fourth criterion for certification (preferable procedure) is not satisfied in the case at bar.

## **6. Representative Plaintiff Criterion**

219 The fifth and final criterion for certification as a class action is that there is a representative plaintiff who would adequately represent the interests of the class without conflict of interest and who has produced a workable litigation plan.

220 The representative plaintiff must be a member of the class asserting claims against the defendant, which is to say that the representative plaintiff must have a claim that is a genuine representation of the claims of the members of the class to be represented or that the representative plaintiff must be capable of asserting a claim on behalf of all of the Class Members as against the defendant: *Drady v. Canada (Minister of Health)*, [2007] O.J. No. 2812 (Ont. S.C.J.) at paras. 36-45; *Attis v. Canada (Minister of Health)*, [2003] O.J. No. 344 (Ont. S.C.J.) at para. 40, aff'd [2003] O.J. No. 4708 (Ont. C.A.).

221 Provided that the representative plaintiff has his or her own cause of action, the representative plaintiff can assert a cause of action against a defendant on behalf of other Class Members that he or she does not assert personally, provided that the causes of action all share a common issue of law or of fact: *Boulanger v. Johnson & Johnson Corp.*, [2002] O.J. No. 1075 (Ont. S.C.J.) at para. 22, leave to appeal granted, [2002] O.J. No. 2135 (Ont. S.C.J.), varied (2003), 64 O.R. (3d) 208 (Ont. Div. Ct.) at paras. 41, 48, varied [2003] O.J. No. 2218 (Ont. C.A.); *Matoni v. C.B.S. Interactive Multimedia Inc.*, [2008] O.J. No.

197 (Ont. S.C.J.), at paras. 71-77; *Voutour v. Pfizer Canada Inc.*, [2008] O.J. No. 3070 (Ont. S.C.J.); *LeFrancois v. Guidant Corp.*, [2008] O.J. No. 1397 (Ont. S.C.J.) at para. 55.

222 Whether the representative plaintiff can provide adequate representation depends on such factors as: his or her motivation to prosecute the claim; his or her ability to bear the costs of the litigation; and the competence of his or her counsel to prosecute the claim: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 41.

223 Assuming that all of the other criteria had been satisfied, then Excalibur would have satisfied the representative plaintiff criterion. There are no fatal flaws in their litigation plan.

224 Had I certified the action I would have made it clear that should the action proceed to individual issue trials, the non-resident Class Members (all of them except Excalibur) would be exposed to costs for the individual issues trial (this is normal) and with that exposure to costs, they would also be exposed to SLF bringing a motion for security for costs (also a normal incident of litigation involving non-residents).

#### **D. Conclusion**

225 For the above reasons, I dismiss the certification motion.

226 If the parties cannot agree about the matter of costs, they may make submissions in writing beginning with SLF's submissions within 30 days of the release of these Reasons for Decision followed by Excalibur's submissions within a further 30 days.

*Motion dismissed.*

**Headnote**

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiff unsuccessfully brought motion for certification as motion judge found that it was unreasonable to anticipate that members of prospective class would expect that claims had real and substantial connection to Ontario — Plaintiff appealed; defendant brought motion for leave to cross-appeal — Prospective representative plaintiff was not one of many small investors, but rather size of its investment demonstrated that it did not need class action to make this economical, as it could proceed on its own — It was apparent that joinder was appropriate for problem and for process — Motion judge's ruling in respect of preferable procedure should stand because joinder could respond to issues without additional steps that accompany class proceeding — Class proceedings should be used when they were needed, not just because they could be made to apply and appeared convenient — Class action was directed by more public concerns: access to justice, behaviour modification and judicial economy.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiff unsuccessfully brought motion for certification as motion judge found that it was unreasonable to anticipate that members of prospective class would expect that claims had real and substantial connection to Ontario — Plaintiff appealed; defendant brought motion for leave to cross-appeal — Prospective representative plaintiff was not one of many small investors, but rather size of its investment demonstrated that it did not need class action to make this economical, as it could proceed on its own — It was apparent that joinder was appropriate for problem and for process — Motion judge's ruling in respect of preferable procedure should stand because joinder could respond to issues without additional steps that accompany class proceeding — Class proceedings should be used when they were needed, not just because they could be made to apply and appeared convenient — Class action was directed by more public concerns: access to justice, behaviour modification and judicial economy.

because they could be made to apply and appeared convenient — Class action was directed by more public concerns: access to justice, behaviour modification and judicial economy.

Civil practice and procedure --- Parties — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiff was Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiffs unsuccessfully brought motion for certification as motion judge found that it was unreasonable to anticipate that members of prospective class would expect that claims had real and substantial connection to Ontario — Plaintiffs appealed; defendant brought motion for leave to cross-appeal — Prospective representative plaintiff was not one of many small investors, but rather size of its investment demonstrated that it did not need class action to make this economical, as it could proceed on its own — It was apparent that joinder was appropriate for problem and for process — Motion judge's ruling in respect of preferable procedure should stand because joinder could respond to issues without additional steps that accompany class proceeding — Class proceedings should be used when they were needed, not just because they could be made to apply and appeared convenient — Class action was directed by more public concerns: access to justice, behaviour modification and judicial economy.

The plaintiff was a Canadian investor, who was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China. Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm. Accredited investors invested some \$7.5 million before learning that the producer lacked financial controls over its all-cash-business. The producer went out of business. The plaintiff brought a class action against the defendant for negligence and negligent misrepresentation. The plaintiff unsuccessfully brought a motion for certification. Motion judge found that it was unreasonable to anticipate that the members of the prospective class could expect that claims had real and substantial connection to Ontario. The plaintiff appealed. The defendant brought motion for leave to cross-appeal.

**Held:** The appeal was dismissed; the motion for leave to cross-appeal was dismissed.

Per Lederer J. (Lederman J. concurring): The prospective representative plaintiff was not one of many small investors, but rather the size of its investment demonstrated that plaintiff did not need class action to make this economical, as plaintiff was able to proceed on its own. It was apparent that joinder was appropriate for the problem and for the process. The motion judge's ruling in respect of the preferable procedure should stand because joinder could respond to plaintiff's issues without additional steps that accompany class proceeding. Class proceedings should be used when they were needed, not just because they could be made to apply and appeared to be convenient. A class action was directed by more to public concerns, such as access to justice, behaviour modification and judicial economy.

Per Sachs J. (dissenting): The class action should be certified and the appeal allowed. The key to the motion judge's assessment of the global issue was his finding that the action did not have a real and substantial connection to Ontario. In this case, three of the four presumptive connection factors existed that entitled a court to assume jurisdiction over the dispute. The action was an action for negligence and negligent misrepresentation against a defendant who resided in Ontario, carried on business in Ontario, and performed the work at issue out of its Toronto office. The plaintiff's action was a claim against a firm of accountants that resided in Ontario, and actively conducted business here, in relation to an audit that the firm performed in Ontario. Conceived in this way, it could not be said that the action did not have real and substantial connection with Ontario. The unnamed class members were all easily identifiable. The proposed class action satisfied the preferable procedure criterion. The motion judge erred in finding that joinder was an available procedure in the absence of any evidence that the other class members would be prepared to assume the burdens, risks and responsibilities of commencing their own claim, that they would be able to or would want to retain the same counsel, or that the defendant would retain the same counsel.

APPEAL by plaintiff from judgment reported at *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP* (2014), 2014 ONSC 4118, 2014 CarswellOnt 9299, 31 B.L.R. (5th) 46 (Ont. S.C.J.), dismissing motion for class action certification and MOTION by defendant for leave to cross-appeal.

**Lederer J.:**

**Introduction**

1 This is an appeal. The appellant commenced a class action. A motion to certify it as a class proceeding was heard by Mr. Justice Perell. He found that the pleadings disclosed causes of action both in negligence and negligent misrepresentation, but that it would be unreasonable to anticipate that members of the prospective class (including the proposed representative plaintiff) would expect that the claims had a real and substantial connection to Ontario. Thus, Mr. Justice Perell found there was no class (in this case, a global class, one that included members beyond the boundaries of Canada and around the world) that could be established. Moreover, the motion judge concluded that a class proceeding was not the "preferable procedure" for resolution of the common issues.<sup>1</sup> A joinder of claims would provide "effective redress" and "suitable procedural rights".<sup>2</sup> The motion was dismissed. This is the order that is being appealed. It was a final order. Accordingly, the appeal is as of right.<sup>3</sup>

2 The defendant brought what it referred to as a cross-appeal. Among the questions to be considered on any motion to certify a class action is the identification of the issues common to the members of the prospective class.<sup>4</sup> Mr. Justice Perell noted that the failure to identify a proper class was "irremediable" but, upon observing that appeals were "virtually inevitable in proposed class actions"<sup>5</sup>, went on to consider the other certification criteria, including the defining of common issues. It is this part of the reasons of Mr. Justice Perell that the defendant seeks to cross-appeal. The plaintiff takes the position that, as a cross-appeal, this is a nullity. First, an appeal is from an order, not from the reasons which support the order. In this case, the order issued did nothing other than dismiss the motion and provide for submissions as to costs. As part of an order, the identification of common issues would not be final. Even if the findings of the motion judge, in identifying common issues, were subject to appeal, leave would be required. Counsel for the plaintiff submitted this part of the proceeding brought before this court should not be heard, at least not as a cross-appeal. As will become apparent, the appeal is to be dismissed. This being so, the propriety of the "cross-appeal" does not matter. Nonetheless, it may be as well that I make some brief comment.

3 Clearly, it would make little, if any, sense to hear the appeal and then, if successful, require the defendant to obtain leave and proceed with the "cross-appeal" as to the defining of common issues on another day. In the same vein, it would unnecessarily complicate the process to adjourn the appeal, or require that it not be heard until after a motion seeking leave to bring a proposed cross-appeal had been dealt with. The better view, as suggested by counsel for the plaintiff and consistent with the proposition that it is orders and not reasons that are appealed, would be to recognize that concerns for the appropriateness of any identified

common issues is not properly seen as the subject of a cross-appeal but, rather, intrinsic to the appeal itself. The definition of common issues is, after all, one of the constituent requirements of a determination whether or not to certify a class proceeding. A question to be answered would concern the impact any identified common issues may have on whether the class action should be certified. In this case, an issue raised was whether Mr. Justice Perell was correct in finding that it was not plain and obvious that a separate cause of action for negligence (as opposed to negligent misrepresentation) would not succeed. Any submission that the motion judge was in error could bear upon the fundamental question of whether the class proceeding should be certified.

4 There is a further subsidiary appeal. It concerns the award of costs made following separate submissions that addressed the issue. As part of its response to the motion to certify the class action, the defendant retained and produced two affidavits in the name of J. Peter Coll, described by the motions judge as a senior lawyer with a New York firm with expertise in American securities law.<sup>6</sup> His firm submitted an account in the amount of \$107,660.25 USD. This was included in the costs award made by Mr. Justice Perell against the plaintiff in favour of the defendant. If the plaintiff is unsuccessful in its appeal, that is, if the decision to dismiss the certification of this proceeding as a class action is upheld, the plaintiff seeks leave to appeal the finding that the costs associated with the participation of J. Peter Coll should be paid by the plaintiff to the defendant. Typically, one would expect an appellant to appeal a determination of the costs to be awarded where its appeal as to the merits is successful. The appellant before this court (the plaintiff in the action) seeks to vary the award as to costs if it is unsuccessful on its appeal. I will return to this later in these reasons.

## Background

5 The facts are not controversial. South China Livestock was a Chinese hog producer. In 2009, it began the process of entering the North American capital markets through a reverse takeover and a private placement financing. The defendant, Schwartz Levitsky Feldman LLP ("SLF"), is a Toronto and Montreal accounting firm. It audits American, Canadian and international public companies. It had (and may still have)<sup>7</sup> a group that specialized in the audits of Chinese businesses. In 2010, the American promoters and marketers of the private placement provided accredited investors with a Private Placement Memorandum. It included, as an exhibit, an Audit Report prepared by SLF. The audit report is described as being "clean", which I understand to mean that it would not have raised any concerns in the minds of potential investors as they reviewed the Private Placement Memorandum. The plaintiff, Excalibur Special Opportunities LP ("Excalibur"), is a limited partnership investment fund based in Toronto. It was one of 57 investors who, in response to the Private Placement Memorandum, invested a total of \$7,594,965. Within a year, it became apparent that South China Livestock operated without financial control over what was an all-cash business. The plaintiff says that this is entirely at odds with the clean Audit Report. In such circumstances, under generally accepted accounting principles, such a report is not possible. In short order, South China Livestock went out of business, the investors lost their investment, and the plaintiff commenced this class action on behalf of the investors. The plaintiff says it relied on the Audit Report when it decided to invest. In its claim, the plaintiff alleges that SLF was negligent in conducting its audit and that the Audit Report contains misrepresentations. The action it commenced is founded on these allegations.

## Class Actions

6 In considering this appeal, it may be worthwhile to give some consideration to the substance of, and policy foundation for, class actions. The *Class Proceedings Act* is a procedural statute. Proceeding under its ambit does not affect the cause or substance of the action. Nothing which is not negligence within a more typical proceeding suddenly becomes negligence just because the case is framed as a class proceeding. The legislation presents a means to conduct litigation. It does not apply every time a "person", individual or group that finds herself, himself or itself harmed or damaged in common with others. There is no inherent right to proceed on a class basis. The procedure offered by the legislation is in furtherance of understood policy objectives: (1) access to justice; (2) behaviour modification; and, (3) judicial economy. This was reviewed by Mr. Justice Perell, as follows:

In the quintessential economic loss case, the Representative Plaintiff's individual claim would not justify suing the Defendant, and so an individual action is out of the question; only a class action will achieve access to justice. In the quintessential case, there is an economic barrier to access to justice because the individual cannot bring forward a claim

because of the high cost that litigation would entail in comparison to the modest value of the claim. The modest individual recovery, the litigation expense, the forensic challenges of proving wrongdoing, and the risk of an adverse costs award make anything other than a class action prohibitive and unfeasible.

In the quintessential case for an economic loss, behaviour modification is genuinely achieved because but for a class action, the Defendant would have gotten away with its economic wrongdoing because those wronged as individuals would not be able to bring the Defendant to the seat of justice, unless they joined together as members of a class action. Financially, it would not make sense to pursue the Defendant and financially a Class Counsel would not be interested in prosecuting the case unless there was an appropriate upside for taking on the risks.

In the quintessential case, considerable judicial economy will be achieved by the common issues trial, which in the best case will be dispositive of the litigation and lead to a distribution of the proceeds in accordance with the considerable administrative resources of the *Class Proceedings Act, 1992*.<sup>8</sup>

## Standard of Review

7 Generally, the standard of review can be summarized as one of correctness with respect to issues of law or legal principle. The standard of review for findings of fact is such that findings cannot be reversed unless there is a palpable and overriding error. Questions of mixed fact and law are on a spectrum depending on the nature of the issue under review. If the issue is one that is particular to the case at hand without any impact beyond the decision to be made, it will tend to the palpable and overriding error (reasonableness)<sup>9</sup> end of the spectrum. If it has a broader impact beyond the specific case, into the general law with precedential value, it will tend to the correctness side.<sup>10</sup>

8 Appellate courts have acknowledged that class actions are a highly technical area of the law and recognized the special expertise of judges who deal regularly with these matters. Substantial deference is owed on certification decisions.<sup>11</sup>

## Analysis

### (a) Preferable Procedure

9 Central to the idea that class proceedings respond to the three policy directives is the requirement that the court, in considering whether to certify a class action, determine that proceeding pursuant to the *Class Proceedings Act* would be the "...preferable procedure for the resolution of the common issues".<sup>12</sup> Mr. Justice Perell began by reviewing what goes into a consideration of the issue.

10 To be the preferable procedure, a class proceeding must represent a fair, efficient and manageable procedure that is preferable to any alternative method of resolving claims.<sup>13</sup> Whether a class proceeding is the preferable procedure is measured by reference to the underlying policy objectives (access to justice, behaviour modification and judicial economy)<sup>14</sup> and the extent to which certification furthers those objectives.<sup>15</sup> In considering an alternative to a class proceeding, the court should examine whether that option could provide suitable procedural protections and effective redress for the claims being made.<sup>16</sup> Mr. Justice Perell went further. He added to the factors to be considered in assessing and identifying the preferable procedure. He included, as a consideration, "... the relationship between access to justice, which is the preeminent concern of class proceedings, and proportionality in civil procedures".<sup>17</sup> Counsel for the plaintiff noted that, for a preferable procedure analysis, this was a new criteria, but acknowledged that it is part of such an examination "since it encompasses the concept of judicial economy".<sup>18</sup>

11 Mr. Justice Perell concluded that a class proceeding was not the preferable procedure. In the circumstances, joinder was available, appropriate and preferable. Counsel for the plaintiff objected to this determination. She began by pointing out that the potential for joinder as the preferable process was not raised by counsel in the submissions that were made. This was an idea that

found its origins in the mind of the judge and found favour with him in the absence of comment from the parties. In submitting that this was improper and a ground for setting aside the order, counsel relied on *Cavanaugh v. Grenville Christian College*.<sup>19</sup>

12 Five students of a private school sought to certify a class action against the school, its administration and the local Anglican Diocese. The action against the Diocese was dismissed. This was appealed to the Court of Appeal and the ruling upheld. The action against the school and the administration was not dismissed but, at the same time, was not certified. There was a preferable procedure. The motion judge, as here, was Mr. Justice Perell. This part of his decision was appealed to the Divisional Court, which set aside his finding and certified the class. The Court determined that the motion judge "...made a palpable and overriding error in the analysis and the decision of the preferable procedure"<sup>20</sup> and, then, went on to observe that the motion judge "...had imposed a procedure not advocated by the defendants and for which he heard no submissions from either party."<sup>21</sup> The plaintiff submitted that, in this case, the same mistake was made. To my mind, this idea needs to be examined more carefully.

13 I begin by returning to the understanding that the *Class Proceedings Act* is a procedural statute. There is responsibility left with the court to find the "preferable procedure".<sup>22</sup> It cannot have been intended that, if a defendant fails to rise to the challenge, the court is left with no option but to allow a proceeding to move forward as a class action even if that procedure is unsuitable. It has been held that it is the party seeking certification of a class action that bears the burden of showing some basis in fact for each of the certification criterion. This includes a requirement that the plaintiff show that a class action would be preferable to any other reasonably available means of resolving the claims of the class members.<sup>23</sup> It is worth remembering that the report of the Law Reform Commission of Ontario, which resulted in the present *Class Proceedings Act*, begins its review by noting and repeating that "joinder" or "compulsory joinder" did not appropriately address the concerns to which class actions could respond.<sup>24</sup> Joinder is not simply an alternative, it is the default position in considering whether a class proceeding is or is not the preferable procedure. Mr. Justice Perell did not impose joinder on the plaintiff, he simply pointed out that joinder "...would provide effective redress for Excalibur and... other investors could join the action as co-plaintiffs".<sup>25</sup>

14 The circumstances in *Cavanaugh v. Grenville Christian College* were quite different. Having said that an alternative procedure had been imposed by Mr. Justice Perell, the Divisional Court went on to explain:

The procedure arose in the context of a factually different case, a medical malpractice claim which had its origins as a proposed class action but which was discontinued after the parties agreed to ask Justice Perell to case manage the proceedings.<sup>26</sup>

15 In *Cavanaugh v. Grenville Christian College*, Mr. Justice Perell went beyond offering that joinder could be an effective alternative. Having concluded that the case he was considering was ill-suited to a class proceeding, Mr. Justice Perell observed that there was a preferable procedure. He referred to three cases, all of which were related, and reviewed one of them in detail.<sup>27</sup>

*Hudson v. Austin*<sup>28</sup> began as a class proceeding. It was a malpractice action brought on behalf of 99 patients of one doctor. Mr. Justice Perell agreed to case manage the action. The representative plaintiff was granted leave to discontinue her proposed class action. Ninety-nine individual claims were brought against the defendant doctor. The plaintiffs in those actions were represented by a team of lawyers. The defendant was represented by the same lawyers in all of the actions. Contingency fee arrangements were made in respect of each of the plaintiffs. Some of the cases were set down for trial, 19 of the plaintiffs moved for summary judgment and made settlement offers which were accepted by the defendant. The balance of the actions settled. In *Cavanaugh v. Grenville Christian College*, Mr. Justice Perell noted that the procedure adopted in *Hudson v. Austin* served the parties well and responded to the policy directives which inform class proceedings: access to justice, judicial economy and behaviour modification.<sup>29</sup> It is this process which the Divisional Court took to have been imposed by Mr. Justice Perell without submissions and without input from the parties. To my mind, this has little, if any, application here. In this case, Mr. Justice Perell has done nothing other than observe that the traditional procedures which, absent a class proceeding, are in place to deal with situations like this, remain and are available. This was not, as counsel for the plaintiff would have it, a reprise of the "preferability analysis" undertaken by, Mr. Justice Perell in *Cavanaugh v. Grenville Christian College*.<sup>30</sup>

16 There is no error of law or otherwise in the consideration given by Mr. Justice Perell to the applicability of joinder to the situation presented by this case.

17 I turn to the question of the merits of the decision of Mr. Justice Perell as it addressed the question of the preferable procedure. It has been established that, for the preferable procedure criterion, particular deference should be paid to the decision of the motion judge.<sup>31</sup>

18 Much of the submissions made with respect to this issue reflected on the economics of the action. This speaks to the idea that where there are many people who have been harmed, each in small amounts, that would not support going to court but, where the numbers involved have the effect of generating significant, if undeserved, rewards for the wrong-doer, a class proceeding can be an effective tool. The plaintiff believes this logic applies in this case.

19 It was submitted on behalf of the plaintiff that Mr. Justice Perell made his decision "...because he concluded that the plaintiff and the class were sufficiently wealthy to pursue claims on an individual basis."<sup>32</sup> It is true that Mr. Justice Perell noted that all the members of the prospective class were accredited investors "...which means that that they are, by definition, not without resources to litigate".<sup>33</sup> However, this was not the foundation of his decision as to the preferable procedure. It is not the basis of his analysis of the economics of the lawsuit.

20 This is not a case where there is a large class, many of whom have not been identified. The class is made up of 57 investors, all of whom have been identified, all but one of whom have been contacted by mail or e-mail. One letter was returned as undeliverable<sup>34</sup>. Relying on a chart found in the decision of Mr. Justice Perell,<sup>35</sup> counsel for the plaintiff pointed out that, of the 57 investors, 39 placed funds valued at less than \$200,000 (19 put in from \$1 to \$49,000, 12 put in \$50,000 to \$99,000 and 8 put in \$100,000 to \$199,000). The proposed representative plaintiff (Excalibur) invested \$950,000. Counsel for the plaintiff, as part of her oral submissions, suggested that for anyone with an interest of less than \$100,000, it would not be economical to pursue a remedy, certainly not in court. The issues are complex. Individual actions would not be sustainable. Thus, the circumstances are ripe for certification as a class proceeding.

21 This is not how Mr. Justice Perell saw or dealt with the issue:

...unlike the situation in *AIC Limited, supra*, which was an investor class action populated mainly by investors with claims that would not justify individual actions, there are no significant economic barriers to litigating that would need to be overcome, by a class action procedure. The investors are known and any of them with claims and that are uneconomical to litigate could be just as easily carried as co-plaintiffs without the formality and expense of a certification motion. There are no psychological or social barriers, such as might be present in an employment or franchise class action, where the Class Members may be intimidated or reluctant to sue their boss or franchisor. There is no psychological or social barrier that presents itself and the forensic resource of the parties are about equal in terms of the availability of capable lawyers and qualified expert witnesses.<sup>36</sup>

22 In this case, the prospective representative plaintiff (Excalibur) is not one of many small investors. The size of its investment (\$950,000) demonstrates that it does not need a class action to make this economical. It could proceed on its own. As noted by Mr. Justice Perell:

...in the case at bar, Excalibur has almost \$1 million claim that would justify taking on the litigation risk. Excalibur itself does not genuinely need a class action to obtain access to justice. If Excalibur was joined by just the other top 10 investors in an action against SLF (which would not need to be certified and for which there would be no doubt about the court's jurisdiction *simpliciter*), the action would have the heft of being a claim for around USD \$3 million. There is ample here for a contingency fee, and Class Counsel would not be confronted with the risks associated with obtaining certification.<sup>37</sup>

23 Counsel for the plaintiff expressed concern that, in considering whether a class proceeding was the preferable procedure, Mr. Justice Perell was required, and failed, to consider five questions identified in *Fischer v. IG Investment Management Ltd.*<sup>38</sup> to be answered when considering whether alternatives to a class action would achieve access to justice. They are listed by Mr. Justice Perell in his reasons.<sup>39</sup> Each is considered by him, albeit not under a listed heading or within a discrete paragraph. However, these questions are not to be "...considered in isolation or in a specific order, but should inform the overall comparative analysis".<sup>40</sup> In the decision of Mr. Justice Perell, some are specifically dealt with and the answers to others are infused as part of and found throughout the discussion of the preferable procedure criterion as follows:

- Question 1: (Are there economic, psychological, social or procedural barriers to access to justice in this case?) see *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP, supra*, (fn. 2) (Perell J.), at paras. 206 and 207, quoted herein respectively, at paras. 22 and 21;
- Question 2: (What is the potential of the class proceeding to address those barriers?) at *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP, supra*, (fn. 2) (Perell J.), at paras. 206 and 207 there are no barriers and, thus, no concern for whether they can be addressed;
- Question 3: (What are the alternatives to class proceedings?) joinder;
- Question 4: (To what extent do the alternatives address the relevant barriers?) There are no barriers, as with question 2, there is nothing to address; and,
- Question 5: (How do the two proceedings compare?) at *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP, supra*, (fn. 2) (Perell J.), at paras. 189 to 218 this is the substance of the review, undertaken by Mr. Justice Perell, as a whole.

24 I pause to recall the particular deference that is to be paid to the motion judge when it comes to the issue of whether a class proceeding is the preferable procedure. The question is whether by failing to respond to the direction of past cases or to respond to them in an appropriate way the motion judge has acted in a fashion that is demonstrative of an error of principle that would amount to a palpable and overriding error. It is not a question of whether a court reviewing this situation would answer these questions differently.

25 With this understanding, it becomes apparent that joinder is appropriate to the problem and the process and that the ruling of the motion judge in respect of the preferable procedure should stand. Joinder can respond to the issues without the additional steps (certification motion, identification of common issues and separation to deal with individual issues) that accompany a class proceeding. There is no reason to suggest that it cannot accommodate the needs of all those who wish to take part, each with an eye to the nature and value of their involvement. "A common procedural barrier is that there is no other procedure [other than a class proceeding] to afford meaningful redress."<sup>41</sup> Here there is joinder. There is no error of principle in the determination made by Mr. Justice Perell. In any event, to the extent that this part of his decision represents an issue of mixed fact and law (the application of the specific facts to the legal principles applicable to selecting a preferable procedure); it is particular to the facts of this case. Unlike the finding in *Cavanaugh v. Grenville Christian College*, there is no palpable and overriding error. In short, the deference owed to the motion judge dictates that his decision on this issue should be sustained.

26 There are additional concerns to be borne in mind. A class action occupies an unusual place in our civil justice system. Typically, litigation is between two (or more) identified parties. There is a *lis inter partes*. The parties play an immediate role and take a direct responsibility for the carriage of the action. A class action is directed by more public concerns: access to justice, behaviour modification and judicial economy. These broader concerns are the purpose behind the process. They change the role of the immediate parties and the general purpose of litigation, which is to resolve disputes between members of our society. We should be careful to use class proceedings when they are needed, not just because they can be made to apply and appear convenient. The decision of Mr. Justice Perell, where it considers the preferable procedure, reflects this concern. He found that in this case, the action can be carried forward in a way that does not impinge on any of the three underlying policy concerns

and without the added procedural requirements of a class proceeding. It may be, as the report of the Law Reform Commission suggested, that joinder will not always be an appropriate means of proceeding; that does not mean it never is. In this case, the motion judge found it both viable and appropriate. It can do the job.

27 The determination of Mr. Justice Perell that a class proceeding is not the preferable procedure is sustained. This being so, the class proceeding will not be certified. There is not much point in going further. Nonetheless, I should say a little more.

**(b) The Class**

28 Much of the submissions made by counsel concerned the requirement that there be "...an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;..."<sup>42</sup>

29 The identities of the 57 members of the proposed class were already known. They subscribed to the private placement. As noted by Mr. Justice Perell, providing for a definition of the class "...seems a mere technicality".<sup>43</sup>

30 The plaintiff sought to certify a "global class". For certification in Ontario, this was essential. The prospective representative plaintiff, Excalibur, was the only class member identified as resident in Ontario. With only one "member", the action would not qualify for certification. This confirms the observation and suggests the possibility that Excalibur could proceed on its own, joined by whatever other plaintiffs wished to take part, having made the appropriate arrangements. Having said this, there are a number of cases that demonstrate the willingness of the courts in Ontario to take jurisdiction and certify a global class. In his reasons, Mr. Justice Perell referred to a number of them.<sup>44</sup>

31 In this case, the issue of whether a global class could be certified centred on whether "...Ontario has a real and substantial connection with the subject matter of the jurisdiction and on principles..." and "...whether it would be reasonable for the non-resident Class Member to expect that his or her rights would be determined by what to him or her would be a foreign court."<sup>45</sup>

32 With respect to the latter, it was pointed out that, of the 55 prospective class members who were known to have received communication from class counsel (this would exclude Excalibur and the party where the letter was returned), 9 class members and 3 brokers, whose clients participated in the private placement, had made it known that they or their clients were interested in participating in the proposed class proceedings and had no objection to the litigation going forward in Ontario.<sup>46</sup> Counsel for the plaintiff noted that this demonstrated that 20% of the class was content that the action go forward as a class proceeding in Ontario. This is not an objective exercise, where 12 (or 20%) would be enough but 11 (or 19%) would not. This should be the result of a subjective analysis taking into account all of the relevant factors.

33 With respect to the former, Mr. Justice Perell and counsel for the plaintiff see the circumstances of this case quite differently. For the judge, the case is founded on the financing of an American corporation. It concerns investors, not resident in Ontario, making substantial investments in American dollars in that corporation.<sup>47</sup> For counsel, the case is about an audit done in Ontario by an auditor whose business is located in Toronto and Montreal. The proposition is that, if the perspective of the judge is correct, there is no real and substantial connection to Ontario but, if counsel is right, there is.

34 The resolution of these questions is dependent upon the particular facts of the case at hand. Given the determination that the decision of Mr. Justice Perell with respect to the preferable procedure is to be sustained, there is nothing to be gained by addressing them in these reasons.

35 Having said this it is apparent that the motion judge bore this in mind in his assessment of the matter as it was placed before him:

The investors in the case at bar were non-residents of Ontario making substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law. Although the transaction included an Audit Report from an Ontario auditor, the standard of care associated with that audit would largely be determined by the American accounting standards under which the Audit Report was provided. It would be to

exercise no restraint at all to conclude that Ontario had a substantial connection with this American financing and corporate reorganization.<sup>48</sup>

36 The motion judge did not forget that this was an action against a Canadian-based accounting firm. He determined, looking at the facts as a whole, that this was not sufficient to demonstrate a real and substantial connection to Ontario. Deference would suggest that this finding should be left to stand.

### **(c) The Appeal as to Costs**

37 The plaintiff's appeal has failed. It is in these circumstances that it seeks leave to appeal the inclusion of the accounts submitted by J. Peter Coll in the award of costs made by Mr. Justice Perell. The parties agreed as to costs, save for the matter of the disbursement in relation to the two affidavits sworn by J. Peter Coll.<sup>49</sup>

38 Appeals as to costs are rare. Costs are a matter of discretion. The judge hearing the matter is accorded a high degree of deference. Leave to appeal costs should be granted sparingly and only in obvious cases. There must be "strong grounds" upon which an appellate court could find that a judge exercised his or her discretion on a wrong principle.<sup>50</sup> The determination of the appropriate award of costs is best left to the judge (or court) that heard the proceeding which is the basis for the award. There must be an error in principle.

39 Being ready for an appearance in court may dictate the preparation of evidence that, in the end, is not required. At the argument of a preliminary motion, it may turn out to be irrelevant and yet, without the benefit of being able to look back, have been appropriate, not premature and something the other side should have anticipated.

40 This is the essence of the determination made by Mr. Justice Perell when he concluded that "...in the context of defending a proposed action that involved an overwhelming number of American investors, it was within the reasonable expectation of Excalibur that SLF would obtain expert advice about the potential application of American law and how it might influence the proposed class action".<sup>51</sup> There is no error in principle in the award made by Mr. Justice Perell, in particular as to the accounts of J. Peter Coll.

41 Leave to appeal is refused.

## **Conclusion**

42 Both the appeal and the motion for leave to appeal are dismissed.

## **Costs**

43 If the parties are unable to agree as to costs, the court will consider written submissions on the following terms:

1. On behalf of the defendant, within 15 days after the release of these reasons, such submissions are to be no longer than 4 pages, double-spaced, excluding any Costs Outline, Bill of Costs or case law that may be included;
2. On behalf of the plaintiff, within 10 days, such submissions are to be no longer than 4 pages, double-spaced, excluding any Costs Outline, Bill of Costs or case law that may be included;
3. On behalf of the defendant, if necessary in reply, such submissions are to be no longer than 2 pages, double-spaced.

## **H. Sachs J. (dissenting):**

### **Overview**

44 I have had the benefit of reading the reasons of Lederer J. and agree with his summary of the issues raised on this appeal, his summary of the background giving rise to this proceeding and his analysis regarding the standard of review that

is applicable to the motion judge's decision. I also agree with his view that the issues raised in the cross-appeal are properly dealt with as part of the appeal.

45 As summarized by Lederer J., the motion judge found that the plaintiff's claim failed to meet two of the criteria for certification - namely, the identifiable class criterion and the preferable procedure criterion. Additionally, while he concluded that the claim satisfied the cause of action criterion in respect of negligence and negligent misrepresentation, he recast the plaintiff's claim for negligence and concluded that more than half of the common issues proposed by the plaintiff should not be certified.

46 On this appeal, the plaintiff argues that the motion judge erred in his analysis of the identifiable class criterion, the preferable procedure criterion and in his failure to certify all of the common issues it proposed.

47 The parties asked the certification judge to address one issue as to costs, a disbursement in relation to two affidavits that were submitted by the defendant. The plaintiff submits that the motion judge erred in ordering it to pay the defendant for this disbursement.

48 In its cross-appeal, the defendant argues that the motion judge erred in finding that the plaintiff's claim disclosed a cause of action in negligence that could be distinguished from its claim for negligent misrepresentation.

49 For the reasons that follow, I would allow the appeal, set aside the order of the motion judge and certify the action, including most, if not all, of the common issues proposed by the plaintiff. Given my view as to the merits of the appeal, I would also allow the appeal with respect to costs.

#### **The Identifiable Class Criterion — Should the motion judge have certified a global class?**

50 The motion judge agreed that the plaintiff was proposing a class of 57 members whose identities were known or could be readily ascertained. However, because the plaintiff was the only class member who resided in Ontario, the motion judge properly asked himself whether Ontario should take jurisdiction over the foreign class members. In answering this question, he correctly identified that the Ontario court does have jurisdiction to certify a global class.

51 The motion judge found that Ontario had only a "modest if not trivial" connection to the representative plaintiff's claim, and an even weaker connection to the other 56 non-resident investors' claims. As such, according to the motion judge, it would not have been contemplated by the class that their rights arising out of the investment they made would be adjudicated in Ontario. Therefore, order and fairness dictated that the foreign class members not be included in an Ontario class proceeding. As put by the motion judge, at paras. 129 and 130 of his reasons:

[129] The residence of [the defendant] in Ontario is essentially the only connection with Ontario and while that connection certainly gives the Ontario court jurisdiction over [the defendant] and while Ontario courts would welcome foreigners to sue in Ontario that is a different thing from Ontario courts exercising the restraint required of them under the principles of order and fairness in assuming jurisdiction when the foreign plaintiff would have expected to pursue his or her rights in a court that did have a substantial connection with the subject matter of the litigation.

[130] The investors in the case at bar were non-residents of Ontario making substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law. Although the transaction included an Audit Report from an Ontario auditor, the standard of care associated with that audit would largely be determined by the American accounting standards under which the Audit Report was provided. It would be to exercise no restraint at all to conclude that Ontario had a substantial connection with this American financing and corporate reorganization.

52 In assessing the motion judge's reasoning on this issue, it is important to recognize several key points. The proposed class action is an action against a firm of accountants that is resident in Ontario and actively carries on business here. Its only other office is in Montreal. It has no assets in the United States.

53 The subject of the action is the audit work done in Ontario by this accounting firm. The partner who did the work is a partner in the firm's Toronto office.

54 The proposed representative plaintiff is a Toronto-based investment fund that is registered in Manitoba. The investment in question was made out of their Toronto office.

55 Key to the motion judge's assessment of the global class issue was his finding that the action did not have a real and substantial connection to Ontario (motion judge's reasons, para. 148).

56 In *Van Breda v. Village Resorts Ltd.*, 2012 SCC 17 (S.C.C.), at para. 90, the Supreme Court outlined the factors that are "presumptive connecting factors that, *prima facie*, entitle a court to assume jurisdiction over a dispute" in a tort case. They are: "(a) the defendant is domiciled or resident in the province; (b) the defendant carries on business in the province; (c) the tort was committed in the province; and (d) a contract connected with the dispute was made in the province."

57 If the plaintiff establishes that one or more of these factors exist, "the court might presume, absent indications to the contrary, that the claim is properly before it under the conflict rules" (*Van Breda*, at para. 80).

58 In this case, three of the four presumptive factors exist. The action is an action for negligence and negligence misrepresentation (both torts) against a defendant who resides in Ontario, carries on business in Ontario and did the work at issue out of its Toronto office.

59 In this case, the motion judge felt that the action concerned a matter involving investors, 98% of whom were not resident in Ontario and who made "substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law" (motion judge's reasons, para. 130). Therefore, according to the motion judge, the relationship between Ontario and the proposed action was a weak one.

60 If the action was against the people who were in charge of arranging or promoting the financing for the American corporation that made the investment in question, I would agree with the motion judge's assessment of the connection between Ontario and the proposed action. However, this is not the action that the representative plaintiff is proposing to pursue. Its action is a claim against a firm of accountants that resides in Ontario and actively conducts business here in relation to an audit that the firm performed in Ontario. Conceived of in this way, it cannot be said that the action does not have a real and substantial connection with Ontario.

61 It may be that in order to determine liability, reference will have to be had to the American accounting standards under which the Audit Report was provided. However, as the motion judge noted, "the parties have agreed that the question of what law applies to the Class Members' tort claims is not to be a factor that would get in the way of certifying a global class" (motion judge's reasons, para. 137).

62 Thus, while I agree that substantial deference is owed to a motion judge's assessment, particularly in the area of fact-finding, I find that that deference must yield in the face of what I find to be an analysis on the identifiable class criterion that was driven by a mischaracterization of the plaintiff's action.

63 Once a real and substantial connection has been established, the court cannot decline to exercise jurisdiction in a non-class action case unless the defendant invokes *forum non conveniens* (*Van Breda*, at para. 102). When doing so, "The defendant must identify another forum that has an appropriate connection under the conflict rules and that should be allowed to dispose of the action" (*Van Breda*, at para. 103).

64 In this case, the defendant has not identified another jurisdiction that is seeking to assert jurisdiction over this action. The defendant has never said that it will attorn to the jurisdiction of any other court. Thus, if this action is to be pursued, the choice in practical terms is Ontario or nowhere.

65 In class actions, as the motion judge correctly identified, assuming jurisdiction over unnamed foreign plaintiffs does involve additional considerations of "order and fairness". In his analysis on jurisdiction, the motion judge found that one of the factors to be considered in deciding whether or not to certify a global class was "whether it would be reasonable for the non-resident Class Member to expect that his or her rights would be determined by what to him or her would be a foreign court" (para. 111).

66 In discussing the question of "when it would be fair to join foreign plaintiffs to an Ontario action; namely, when the foreigner would expect that his or her rights would be determined by what to him or her would be a foreign court" (motion judge's reasons, para. 119), the motion judge refers to the discussion by Sharpe J., in *Parsons v. McDonald's Restaurants of Canada Ltd.* (2005), 74 O.R. (3d) 321 (Ont. C.A.) [hereinafter *Currie*].

67 In *Currie*, Sharpe J. was dealing with the question of whether an Ontario court should recognize and enforce a foreign judgment in a class action proceeding that purported to bind Canadian class members. In dealing with this issue, Sharpe J. refers to the "principles of order and fairness" and the notion of "judicial restraint", but does so with reference to the need for the court to ask whether the court that issued the judgment properly assumed jurisdiction, and whether there were adequate procedural rights afforded to the unnamed non-resident class members.

68 In the course of his reasons, Sharpe J.A. states that "[t]o determine whether the assumption of jurisdiction by the foreign court satisfies the real and substantial connection test and the principles of order and fairness, it is necessary to consider the situation from the perspective of the party against whom enforcement is sought" (para. 18). In that case, the unnamed Canadian class members, who were all McDonald's customers, had done nothing to invoke the jurisdiction of the Illinois court. Therefore, in addressing the concerns of "fairness", it was necessary to consider the adequacy of the procedural rights afforded to those plaintiffs.

69 In the context of those procedural rights, Sharpe J.A. finds that it is first necessary to conclude that the representative plaintiff will adequately represent the rights of the unnamed plaintiffs. It is then important that the unnamed plaintiffs be given adequate notice of the claim, including notice of the fact that if they did not opt out, their rights could be affected by the foreign proceeding. Finally, it is important that the unnamed plaintiffs be given an adequate opportunity to opt out of the proceeding.

70 In *Silver v. Imax Corp.* [2009 CarswellOnt 7873 (Ont. S.C.J.)], 2009 CanLII 72334, leave to appeal denied 2011 ONSC 1035 (Ont. S.C.J.), van Rensburg J. uses the following quote to explain the meaning of the "order and fairness" requirement in the context of class actions with foreign plaintiffs:

[162] As Jones and Baxter have observed:

When asserting jurisdiction over a defendant, either in an individual or class proceeding, 'order and fairness' will usually be satisfied by the demonstration of a 'real and substantial' connection with the forum. But in the interjurisdictional class action context, 'order and fairness' towards foreign plaintiffs imports further requirements. Just as defendants cannot be bound by a court's process and decision unless served and given an opportunity to answer the case against them, so too plaintiffs cannot be bound unless they also have an opportunity to 'participate', at least as that word is understood in the world of opt-out class actions; that is, that there be notice adequate to serve the interests of justice.

71 This connection between the reasonable expectations of unnamed plaintiffs, who have done nothing to invoke a court's jurisdiction, and the consequent need for heightened procedural concerns meets the criticisms of La Forest J., in *Tolofson v. Jensen*, [1994] 3 S.C.R. 1022 (S.C.C.), about the inappropriateness of developing choice of law rules that focus on "somewhat fictional" concepts such as the expectations of the parties. As put by La Forest J., at para. 35:

What strikes me about the Anglo-Canadian choice of law rules as developed over the past century is that they appear to have been applied with insufficient reference to the underlying reality in which they operate and to general principles that should apply in responding to that reality. Often the rules are mechanistically applied. At other times, they seem to be

based on the expectations of the parties, a somewhat fictional concept, or a sense of 'fairness' about the specific case, a reaction that is not subjected to analysis, but which seems to be born of a disapproval of the rule adopted by a particular jurisdiction. The truth is that a system of law built on what a particular court considers to be the expectations of the parties, or what it thinks is fair, **without engaging in further probing about what it means by this**, does not bear the hallmarks of a rational system of law.

[Emphasis added]

72 In this case, there is no concern about the representative plaintiff adequately representing the interests of the unnamed plaintiffs. The unnamed class members are all easily identifiable. Thus, arrangements can be made to contact them, tell them about the class action and clearly bring home to them the fact that their rights could be affected by the proceeding if they do not opt out. In this way, any order and fairness concerns could be alleviated.

73 Given the fact that Ontario does have a real and substantial connection to the proposed class action, that the defendant is not asserting that another jurisdiction is the more appropriate one in which to adjudicate the action and that the necessary procedural protections can be put in place to notify the unnamed foreign plaintiffs of how their rights could be affected if they do not opt out of the action, there is no principled reason why this action is not appropriate for the certification of a global class.

### The Preferable Procedure Criterion

74 The motion judge concluded that a class action was not the preferable procedure for the determination of the proposed claims. He determined that joinder was a fairer, more efficient and manageable way of resolving the plaintiff's claim. His reasons for this finding may be summarized as follows:

- (a) The named plaintiff, Excalibur, has an almost one million dollar claim that "would justify taking on the litigation risk. Excalibur itself does not genuinely need a class action to obtain access to justice. If Excalibur was joined by just the other top 10 investors in an action against [the defendant] (which would not need to be certified and for which there would be no doubt about the court's jurisdiction *simpliciter*), the action would have the heft of being a claim for around USD \$3 million. There is ample here for a contingency fee, and Class Counsel would not be confronted with the risks associated with obtaining certification" (motion judge's reasons, para. 206).
- (b) In some cases there are psychological or social barriers that would prevent individuals from bringing legal proceedings on their own. There are no such barriers in this case (motion judge's reasons, para. 207).
- (c) The "forensic resources of the parties are about equal in terms of the availability of capable lawyers and qualified expert witnesses" (motion judge's reasons, para. 207). As 'accredited' investors, all of the class members have the resources to litigate (motion judge's reasons, para. 208).
- (d) Any behaviour modification that is needed can be achieved through an individual tort action (motion judge's reasons, para. 209).
- (e) While the determination of the common issues would "make a substantial contribution to resolving the claims of all the Class Members", there would have to be individual issue trials to determine issues such as damages and whether or not there was contributory negligence (motion judge's reasons, para. 210).
- (f) In this case a joinder of claims is preferable to a class action. While a class action would be manageable in this case, it is procedurally more cumbersome than a regular action and joinder "would provide access to justice to those class members with meritorious claims, promote adequate behaviour modification of the defendant and provide a similar amount of judicial economy to that which would be achieved by a class action" (motion judge's reasons, para. 215).

75 In his analysis on preferable procedure, the motion judge focuses on the fact that this action is not the "quintessential economic loss class action", as the representative plaintiff's claim is large enough to justify suing the defendant and all of the

class members have the resources to participate in individual litigation. According to the plaintiff, the motion judge erred in principle by grafting on a "means-based test" onto the preferable procedure criterion.

76 I do not see the motion judge's analysis as going that far. In para. 211, he specifically recognizes that economic loss cases where the amounts being claimed are larger and the proposed class members are "self-sufficient" have been certified. Thus, he went on to consider whether, in spite of the fact that the claim was "far from the quintessential economic loss case, nevertheless [a class action] is the preferable procedure for the Class Members' claims" (motion judge's reasons, para. 212).

77 It is at this point that he considers joinder and it is in this aspect of his reasons that I find that his analysis fell into error and that it did so because of his erroneous view that the action as a whole did not have a real and substantial connection with Ontario. This becomes clear at para. 217 of his reasons where he states:

Like all of the criterion for certification, the preferable procedure criterion sets a very low and easy to satisfy standard, but it is not so low that it is satisfied automatically because a representative plaintiff can form a group of claimants with manageable common issues, which is more or less all that Excalibur has done in the case at bar. And in the case at bar, **the formation of the class is without showing that Ontario has a real and substantial connection to the investors' claims** and is without showing that a class action is necessary to overcome any barriers to access to justice. In the case at bar, a class action is not necessary to achieve behaviour modification and a class action would not be particularly helpful in providing judicial economy.

[Emphasis added]

78 If the motion judge had conducted the access to justice analysis mandated by the Supreme Court of Canada, in *Fischer v. IG Investment Management Ltd.*, 2013 SCC 69 (S.C.C.), through a lens that accepted that Ontario did have a real and substantial connection to all of the investors' claims, he could not have concluded that joinder was a preferable mechanism for pursuing those claims.

79 I first note that there was no evidence before the motion judge that joinder was available as an alternative procedure. In particular, there was no evidence that the other class members would be prepared to assume the burdens, risks and responsibilities of commencing their own claim, that they would be able to or would want to retain the same counsel, or that the defendant would retain the same counsel to defend these theoretical actions.

80 *Fischer v. IG Investment Management Ltd.* requires the court to first identify what the barriers are to access to justice. In this case, the motion judge found that there were no such barriers, given the size of the representative plaintiff's claim (\$950,000) and the fact that all of the class members were accredited investors.

81 At para. 27 of *Fischer v. IG Investment Management Ltd.*, the Supreme Court states that:

The most common barrier is an economic one, which arises when an individual cannot bring forward a claim because of the high cost that litigation would entail in comparison to the modest value of the claim.

82 In the case at bar, 19 of the proposed class members' claims are for \$1-\$50,000, and 12 claims are for \$50,000-\$99,000. The cost of pursuing these claims individually would dwarf the potential recovery for these investors.

83 The defendant has also asserted that it will bring a motion for security for costs against the foreign plaintiffs. This will present another economic barrier. If the action were certified as a class proceeding, these motions would be brought after the resolution of the most expensive part of the proceeding (the common issues) and the exposure for security for costs would be much more limited.

84 The risk of an adverse costs award is also a real economic barrier, especially for the smaller claims. In this regard, it is important to note that there is no evidence that the Class members are a cohesive group who would or could agree upon a form of joint retainer and the allocation of the costs of the litigation.

85 If the actions were successfully pursued individually by the foreign Class members in jurisdictions other than Ontario, they would then be put to the further expense and delay of bringing a proceeding to enforce a foreign judgment against the defendant in Ontario. Since the defendant has not acknowledged its willingness to attorn to any jurisdiction, any proceeding to enforce a foreign judgment could be met by further jurisdictional challenges.

86 *Fischer v. IG Investment Management Ltd.* next requires the court to look at the potential of a proposed class action to address the barriers to access to justice. First, a proposed class action will allow the members with smaller claims to have the most contentious and costly part of their claims determined in the common issues trial. As the motion judge acknowledged, the resolution of the common issues would "make a substantial contribution" to resolving their claims (motion judge's reasons, para. 210). Further, they will be able to do so without exposing themselves to the risk of an adverse costs award. If their actions are successful, they will have an Ontario judgment that they will be able to enforce in Ontario against a defendant who is a resident in Ontario.

87 The third part of the *Fischer v. IG Investment Management Ltd.* analysis asks the motion judge to identify the alternative to the proposed class proceeding. In this case, the alternative identified was joinder.

88 The fourth and fifth questions that are part of the *Fischer v. IG Investment Management Ltd.* framework mandate that the court address the extent to which the proposed alternative will address the relevant barriers and to compare the two proceedings.

89 The frailties of consolidation and joinder as alternative procedures were recognized by the Law Reform Commission in its 1982 *Report on Class Actions, Vol. 1*, Ministry of the Attorney General, pp. 82-86:

... Joinder and consolidation, as means of securing relief for the victims of a mass wrong, suffer from many of the same disadvantages as individual proceedings. Clearly, joinder and consolidation will be of minimal assistance to individuals with small claims. While some small claims may be transformed by joinder or consolidation into claims that are individually recoverable - because the cost of proving certain issues can be shared - most such claims will continue to be individually nonrecoverable. The reasons for this are quite straightforward. The individual litigant will be liable to pay his own lawyer's fees, whether the action succeeds or fails. Moreover, if the action fails, he will likely be ordered to pay a portion of the defendant's costs. Consequently, most small claims, even though they be aggregated will remain individually nonrecoverable.

Even in the case of claims that are individually recoverable, joinder and consolidation may not be the most expeditious or economical method of disposing of the claims. For example, in the case of joinder or consolidation, the defendant in the action would be free to examine for discovery all the named plaintiffs with respect to the issue of liability, even though such discovery might be repetitious an [sic] unnecessary...

Joinder and consolidation, as procedural alternatives in the mass wrongs context, suffer from one other major drawback. If the victims of a mass wrong are a less than cohesive group, all are unlikely to be joined in one action. ... the result will be a multiplicity of proceedings, with the concomitant risk of inconsistent verdicts, additional expense for the parties and a greater burden on the courts.

90 In the present case, there is no evidence that would suggest that these identified frailties would not exist.

91 Thus, from an access to justice perspective, if one accepts that the smaller claims do have a real and substantial connection to Ontario, it cannot be said that joinder is preferable to a class action as a route to pursuing those claims.

92 Further, in terms of judicial economy, while class actions require certification motions, joinder requires that each plaintiff be subject to extensive discovery obligations on all the issues, which can be costly, can delay the action and give rise to additional interlocutory attendances.

93 In this case, a class action will also promote judicial economy by resolving the common issues in one proceeding, thereby avoiding a multiplicity of actions. If the individual issues require individual determinations, the flexible procedures available to

the court under the *Class Proceedings Act*, 1992, S.O. 1992, c. 6, for the adjudication of these issues allow for the real possibility that these issues will be determined in an efficient manner, substantially reducing the burden the court would bear if all 57 members were required to bring separate proceedings.

94 With respect to the third goal of class actions, behaviour modification, class actions have been recognized as having a greater effect than individual actions when it comes to supplementing and enhancing the regulatory oversight of companies seeking to raise capital, thereby promoting confidence in the capital markets (*Green v. Canadian Imperial Bank of Commerce*, 2014 ONCA 90 (Ont. C.A.), at paras. 35-36). In this case, the action could have the salutary effect of discouraging the defendant from conducting audits of foreign public companies without ensuring that proper plans and checks, and adequate qualified supervision is in place to ensure compliance with the governing standards.

95 Again, while I recognize that a motion judge's finding with respect to the preferable procedure criterion is the one to which the most deference is owed, I find that, in this instance, the motion judge's analysis cannot stand as his analysis was driven by his error in finding that Ontario was not the proper forum for the adjudication of the foreign class members' claims.

96 For the reasons given above, I would allow the appeal on this point and find that the proposed class action does satisfy the preferable procedure criterion.

### Cause of Action Criterion

97 In its cross-appeal, the defendant asserts that the motion judge erred in finding that the plaintiff has a tenable cause of action in negligence that is distinct from negligent misrepresentation. According to the defendant, central to the plaintiff's claim in negligence is the fact that the audit report was "clean" and that, according to the plaintiff, it ought not to have been. In essence, the defendant argues, this is a misrepresentation.

98 In making this submission, the defendant points to the Supreme Court of Canada decision, in *Hercules Management Ltd. v. Ernst & Young*, [1997] 2 S.C.R. 165 (S.C.C.), and submits that, in *Hercules*, the Supreme Court of Canada expressed a concern that auditor's liability not "go unchecked".

99 *Hercules* was a negligent misrepresentation action. There is nothing, in *Hercules*, that excludes claims in negligence *simpliciter* from being brought against auditors.

100 In this case, the plaintiff is alleging that the defendant failed to exercise the requisite degree of care, skill and diligence of a reasonably competent auditor of a public company in carrying out its audit of the company's financial statements and in failing to prepare the SLF Audit Report in accordance with the U.S. Generally Accepted Auditing Standards ("GAAS") and the rules and standards of the Public Company Accounting Oversight Board (the "PCAOB"). According to the plaintiff, if the defendant had prepared a proper audit, it would not have been able to issue a clean report and the company would never have been able to proceed with the private placement. This is a negligence claim.

101 There are several instances where the court has recognized and certified actions asserting claims in both negligence and negligent misrepresentation where a professional opinion is alleged to have been rendered negligently and both (a) the opinion is alleged to be a necessary precondition to the marketing of a particular scheme or product; and (b) the class is said to have reasonably relied on the opinion to their detriment: see *Robinson v. Rochester Financial Ltd.*, 2010 ONSC 463 (Ont. S.C.J.), leave to appeal denied 2010 ONSC 1899 (Ont. Div. Ct.); *Lipson v. Cassels Brock & Blackwell LLP*, 2011 ONSC 6724 (Ont. S.C.J.), rev'd in part, 2013 ONCA 165 (Ont. C.A.); *Cannon v. Funds for Canada Foundation*, 2012 ONSC 399 (Ont. S.C.J.), leave to appeal denied 2012 ONSC 6101 (Ont. Div. Ct.); *Ironworkers Ontario Pension Fund (Trustee of) v. Manulife Financial Corp.*, 2013 ONSC 4083 (Ont. S.C.J.), leave to appeal denied 2014 ONSC 1347 (Ont. Div. Ct.); *Murphy v. BDO Dunwoody LLP* [2006 CarswellOnt 4127 (Ont. S.C.J.)], 2006 CanLII 22809.

102 For these reasons, I find that the motion judge made no error in principle in finding that the cause of action criterion had been met for both of the causes of action asserted by the plaintiff.

### Common Issues Criterion

103 Both the plaintiff and the defendant assert that the motion judge erred in the common issues that he certified. I will deal with each of the proposed common issues in turn.

#### ***Proposed Common Issue 1: Did the Defendant meet the applicable GAAS and PCAOB standards in the preparation of the Auditor's Report for Southern China Livestock in respect of the consolidated financial statements for 2008 and 2009 (the "Auditor's Report")?***

104 The motion judge found that this question, as drafted, is "unsatisfactory because it invites a fishing expedition about the auditing of financial statements that may be a perfectly accurate representation of the financial position of Southern China Livestock" (motion judge's reasons, para. 161). Therefore, he found that the following common issue would have been suitable for certification:

Given the lack of financial controls for Southern China Livestock's business, did the Defendant meet applicable GAAS and PCAOB standards or breach a duty of care by delivering an Auditor's Report for Southern China Livestock International Inc. in respect of the consolidated financial statements for 2008 and 2009 (the 'Auditor's Report')?

105 The plaintiff asserts that the motion judge erred in law and in principle in reframing Proposed Common Issue 1. The defendant argues that the applicable standard of care is an individual issue and should not have been certified as a common issue.

106 In my view, the motion judge was correct in identifying the question of a failure to meet the asserted applicable standards as a common issue. In this case, the pleadings assert that in order to obtain the financing, the company was required to retain an auditor who was registered in the United States with the PCAOB and that auditor was required to review and give an opinion about the company's financial statements in accordance with PCAOB's rules and standards, as well as U.S. GAAS. Thus, the reference to these standards in the first proposed common issue is an appropriate one.

107 However, I take issue with how the motion judge redrafted the first common issue. The motion judge found that there was no assertion that the financial statements were an inaccurate representation of the company's financial circumstances. However, the Statement of Claim makes it clear that the plaintiff is asserting that the company's financial statements "were, in no way, a fair presentation of International's financial position for the periods stated" (Statement of Claim, para. 58).

108 At this stage, the plaintiff is not required to establish the evidence upon which it relies in making this assertion. As Belobaba J. explained, in *Quinte v. Eastwood Mall Inc.*, 2014 ONSC 249 (Ont. S.C.J.), at para. 46:

...As the Supreme Court of Canada recently affirmed in *Pro-Sys Consultants*, the common issue requirement asks not 'whether there is some basis in fact for the claim itself' but 'whether these questions are common to all the class members'. The Court made clear that evidence that the acts alleged actually occurred is not required. All that is needed is 'some assurance...that the questions are capable of resolution on a common basis.' [cites omitted]

109 Essentially, the plaintiff's claim is that if the defendant had actually met the standards set out by the PCAOB and GAAS in the manner in which it conducted its audit, it would not have and could not have issued a clean audit report. Thus, a question directed at whether the defendant did meet those standards is an appropriate one. Therefore, I agree with the plaintiff that the motion erred in law in reframing Proposed Common Issue 1 and I would certify the issue as originally put forward.

#### ***Proposed Common Issue 2: Did the Defendant owe the Class Members a duty of care in respect of the preparation of the Auditor's Report?***

110 The motion judge found that this issue was suitable for certification as drafted. The defendant submits that the determination of this issue is an individual issue as whether the defendant owed the class members a duty of care depends on the law of the state in which each class member resides. According to the defendant, the law that applies is the law of the place where the alleged misrepresentation was received.

111 The question of which law to apply is a question for the trial judge to decide. At this point, the defendant has not filed a defence pleading the application of any foreign law. Further, as van Rensburg J. confirmed, in *Silver v. Imax Corp.*, supra, at para. 152:

It is not obvious, in the context of a class action involving a global class and misrepresentations communicated from a single source, that the applicable law will be that of the place where each individual class member sustained damage. Such an approach would ignore the fact that class proceeding is an aggregate action and not a collection of individual claims. It is also not obvious that the applicable common law principles and defences would vary from place to place such that the court would have to consider the potential application of multiple laws.

112 Proposed Common Issue 17 addresses the assertion by the plaintiff that the appropriate law to apply is the law of Ontario since this is the jurisdiction from which the defendant disseminated the information and it is the jurisdiction from which the defendant conducts business.

113 I agree with the motion judge that both of these issues are suitable for certification.

***Proposed Common Issue 3: Did the Defendant owe the Class Members a duty of care in permitting the Auditors Report to be included as an exhibit to Expedite 4, Inc.'s Private Placement Memorandum?***

114 The motion judge found that this issue was suitable for certification. For the reasons given by the motion judge, I agree.

***Proposed Common Issue 4: What is the applicable standard of care owed by the Defendant to the Class Members?***

115 The motion judge found that this issue was suitable for certification. For the reasons given by the motion judge, I agree.

***Proposed Common Issue 5: Was the Defendant negligent in the manner in which it prepared the Auditor's Report?***

116 The motion judge found that this issue was not suitable for certification as it was redundant.

117 If Proposed Common Issue 5 is directed at establishing whether the tort of negligence has been made out, this can only be done if the requisite elements of the tort have been established. These elements are the subject of other questions.

118 If Proposed Common Issue 5 is directed at the question of whether the defendant breached an applicable standard of care in the manner in which it prepared the Auditor's Report, then the question should be rephrased to read "Did the defendant breach the applicable standard of care in the manner in which it prepared the Auditor's Report?"

***Proposed Common Issue 6: Did the Defendant breach its duty of care owed to Class Members by issuing an unqualified, clean audit opinion in the Auditor's Report that was included as an exhibit to the Private Placement Memorandum?***

119 The motion judge found that this issue was not suitable for certification as it was redundant.

120 Proposed Common Issue 6 is directed at establishing whether if the answer to Proposed Common Issue 3 is "yes", then was the duty of care breached in the manner specified in Proposed Common Issue 6? This issue is directed at the plaintiff's negligence claim and is appropriate for certification.

***Proposed Common Issue 7: Was the information contained in the Auditor's Report materially false, inaccurate or misleading?***

121 The motion judge found that this question was not connected to the negligent misrepresentation claim as pleaded and, therefore, he reframed the question to read:

Given the lack of financial controls for Southern China Livestock's business, did the defendant make a misrepresentation by delivering an Auditor's Report for Southern China Livestock International Inc. in respect of the consolidated financial statements for 2008 and 2009 (the 'Auditor's Report').

122 According to the motion judge, the negligent misrepresentation asserted by the plaintiff can be characterized as "[the defendant] speaking when it ought not to have spoken at all" (motion judge's reasons, para. 166).

123 In its Statement of Claim, the plaintiff makes a number of assertions about the misleading, false and inaccurate nature of the Audit Report. These include assertions that the report misrepresented the manner in which the defendant carried out its work and misrepresented the fact that the company's financial statements complied with generally accepted accounting principles.

124 Proposed Common Issue 7 is directed at these allegations and captures the claim the plaintiff is actually making more accurately than the motion judge's reframed question.

***Proposed Common Issue 8: Was it reasonably foreseeable that the Class Members would rely on the representations made in the Auditor's Report in deciding whether or not to invest in Expedite 4, Inc. through the private placement, or at any time until December 23, 2010?***

125 The motion judge found that this question should not be certified as it is redundant to Proposed Common Issue 2, which asks whether or not the defendant owed the Class Members a duty of care in respect of the preparation of the Auditor's Report.

126 In a negligent misrepresentation context, as opposed to a simple negligence context, an essential component of the proximity analysis is that "the defendant ought reasonably to foresee that the plaintiff will rely on his or her representation" (*Hercules*, para. 24).

127 Proposed Common Issue 8 is directed at this essential element of the plaintiff's negligent misrepresentation claim. This is in contrast to Proposed Common Issue 2, which is focussed on the duty of care that needs to be established to sustain a negligence claim.

128 Thus, in my view, Proposed Common Issue 8 is not redundant to Proposed Common Issue 2 and it is appropriate for certification.

***Proposed Common Issue 9: Was it reasonable for the Class Members to have relied on the Auditor's Report in deciding whether or not to participate in the private placement, or in purchasing any Units at any time up until December 23, 2010?***

129 The motion judge found that this question should not be certified as reliance is an issue that will have to be determined on an individual basis. I agree.

***Proposed Common Issue 10: Did the Defendant know or should it have known that the Class Members would be harmed if the information contained in the Auditor's Report was materially false, inaccurate or misleading?***

130 The motion judge found that this question was redundant and should not be certified.

131 Part of establishing a duty of care in negligence is establishing a sufficiently close relationship between the plaintiff and the defendant such that it would be in the reasonable contemplation of the defendant that carelessness on his or her part would cause damage to the plaintiff (*Hercules*, para. 22).

132 Proposed Common Issue 10 is directed at this essential element of negligence and is, therefore, suitable for certification.

***Proposed Common Issues 11, 12 and 13***

133 In paragraph 176 of his reasons, the motion judge found that these questions "did not want for commonality", yet he refused to certify them.

134 Question 11 is directed at the issue of whether this is a case where reliance can be inferred. The fact that the answer to the question may be "no" does not mean that the question should not be certified.

135 Question 12 is directed at the issue of causation, something that the Court of Appeal, in *Lipson*, has found is suitable for certification in a negligence case. Thus, I would certify the question as it relates to the tort of negligence.

136 Question 13 is directed to the question of the ultimate liability of the defendant to the Class Members, something that will have to await the determination of the individual issues trials.

#### ***Proposed Common Issues 14, 15 and 16***

137 The motion judge refused to certify these common issues on the ground that they were redundant. I agree.

#### ***Proposed Common Issue 17***

138 For the reasons set out in my discussion of Proposed Common Issue 2, I agree with the motion judge that this issue should be certified.

#### **Conclusion**

139 For these reasons, I would allow the appeal, set aside the order of the motion judge and issue an order certifying the action as a class proceeding in relation to the common issues detailed in these reasons.

140 Given this conclusion, I would also allow the plaintiff's appeal as to costs.

*Appeal dismissed; motion for leave to cross-appeal dismissed.*

<sup>9</sup> In *New Brunswick (Board of Management) v. Dunsmuir*, [2008] 1 S.C.R. 190, 2008 SCC 9 (S.C.C.), at para 161, the standards of reasonableness and palpable and overriding error are set up against each other:

Whether undergoing appellate review or administrative law review, decisions on questions of fact always attract deference. The use of different terminology-'palpable and overriding error' versus 'unreasonable decision'-does not change the substance of the review. Indeed, in the context of appellate review of court decisions, this Court has recognized that these expressions as well as others all

encapsulate the same principle of deference with respect to a trial judge's findings of fact... (Referring to *H.L. v. Canada (Attorney General)*, [2005] 1 S.C.R. 401, 2005 S.C.C. 25 (CanLII), at paras. 55-56).

(CanLII), at para. 33, leave to appeal ref'd at [2007] S.C.C.A. No. 346 (S.C.C.).
- 12     *Class Proceedings Act*, (fn.1), s. 5(1)(d).
- 13     *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP*, *supra*, (fn. 2) (Perell J.), at para. 192, relying on *Cloud v. Canada (Attorney General)* (2004), 73 O.R. (3d) 401 (Ont. C.A.), at paras. 73-75, leave to appeal to the S.C.C. ref'd [2005] S.C.C.A. No. 50 (S.C.C.).
- 14     *Ibid*, at paras. 193 and 196, relying on *Markson v. MBNA Canada Bank* (2007), 85 O.R. (3d) 321 (Ont. C.A.), at para. 69, leave to appeal to the S.C.C, ref'd [2007] S.C.C.A. No. 346 (S.C.C.); and, *Fischer v. IG Investment Management Ltd.*, [2013] 3 S.C.R. 949, 2013 SCC 69 (S.C.C.), at paras.24-38.
- 15     *Ibid*, at para. 194, relying on *Chadha v. Bayer Inc.* (2001), 54 O.R. (3d) 520 (Ont. Div. Ct.), at para. 16, aff'd (2003), 63 O.R. (3d) 22 (Ont. C.A.), leave to appeal to S.C.C. ref'd [2003] S.C.C.A. No. 106 (S.C.C.), which refers to this among other criteria to be considered when a court assesses the preferable process. The listed criteria are:
- (a) the nature of the proposed common issue(s),
- (b) the individual issues which would remain after determination of the common issue(s),
- (c) the factors listed in the *Act*,
- (d) the complexity and manageability of the proposed action as a whole,
- (e) alternative procedures for dealing with the claims asserted,
- (f) the extent to which certification furthers the objectives underlying the *Act*, and
- (g) the rights of the plaintiff(s) and defendant(s).
- 16     *Ibid*, at para. 197, relying on *Fischer v. IG Investment Management Ltd.*, *supra*, (fn. 14). Mr. Justice Perell lists five questions Mr Justice Cromwell referred to in that case as having to be answered when considering whether an alternative to a class action will achieve access to justice:
- (1) Are there economic, psychological, social, or procedural barriers to access to justice in the case?
- (2) What is the potential of the class proceeding to address those barriers?
- (3) What are the alternatives to class proceedings?
- (4) To what extent do the alternatives address the relevant barriers?
- (5) How do the two proceedings compare?
- 17     Rule 1.04(1.1) of the *Rules Of Civil Procedure* notes:
- In applying these rules, the court shall make orders and give directions that are proportionate to the importance and complexity of the issues, and to the amount involved, in the proceeding.
- In making this observation, Mr. Justice Perell (*Ibid*, at para. 200) quoted *Hryniak v. Mauldin*, 2014 SCC 7 (S.C.C.), at paras. 1-2 and 27: Ensuring access to justice is the greatest challenge of the rule of law in Canada today. Trials have become increasingly expensive and protracted. Most Canadians cannot afford to sue when they are wronged or defend themselves when they are sued, and cannot afford to go to trial. ... Increasingly, there is recognition that a culture shift is required in order to create an environment promoting timely

and affordable access to the civil justice system. This shift entails simplifying pre-trial procedures and moving the emphasis away from the conventional trial in favour of proportional procedures tailored to the needs of the particular case. The balance between procedure and access struck by our justice system must come to reflect modern reality and recognize that new models of adjudication can be fair and just.

...

There is growing support for alternative adjudication of disputes and a developing consensus that the traditional balance struck by extensive pre-trial processes and the conventional trial no longer reflects the modern reality and needs to be readjusted. A proper balance requires simplified and proportionate procedures for adjudication, and impacts the role of counsel and judges. This balance must recognize that a process can be fair and just, without the expense and delay of a trial, and that alternative models of adjudication are no less legitimate than the conventional trial.

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Pleadings disclose cause of action

Plaintiff was Canadian investor whom was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiff unsuccessfully brought motion for certification as motion judge found that it was unreasonable to anticipate that members of prospective class would expect that claims had real and substantial connection to Ontario — Plaintiff's appeal was dismissed — Trial judge found joinder was appropriate — Trial judge found motion judge's ruling in respect of preferable procedure should stand because joinder could respond to issues without additional steps that accompany class proceeding — Trial judge found class proceedings to be used when they were needed, not just because they could be made to apply and appeared convenient — Trial judge found class action was directed by more public concerns: access to justice, behaviour modification and judicial economy — Plaintiff investor appealed — Appeal allowed — Motion judge erred in failing to find real and substantial connection between Ontario and subject matter, and erred by considering whether it would be reasonable for non-resident class members to expect that their rights would be determined by foreign court as independent factor — Ontario court is not required to approach issue of taking jurisdiction in restrained manner — Motion judge focused incorrectly on private placement transaction in United States, instead of preparation of audit report in Ontario — On claims as pleaded, case was auditors' negligence case involving Ontario auditors in context of private placement in United States — Ontario's connection to claim was neither modest or trivial — Motion judge erred in holding that class proceeding was not preferable procedure — Motion judge did not properly consider barriers to access to justice for all proposed class members, choosing to focus instead on those with highest value claims — Class action would allow members with smaller claims to have the most contentious and costly part of their claims determined in common issues trial — Common issues certified.

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Identifiable class

Civil practice and procedure --- Class and representative proceedings — Representative or class proceedings under class proceedings legislation — Certification — Plaintiff's class proceeding — Preferable procedure

Plaintiff was Canadian investor whom was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China — Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm — Accredited investors invested some \$7.5 million before learning that producer lacked financial controls over its all-cash-business — Producer went out of business — Plaintiff brought class action against defendant for negligence and negligent misrepresentation — Plaintiff unsuccessfully brought motion for certification as motion judge found that it was unreasonable to anticipate that members of prospective class would expect that claims had real and substantial connection to Ontario — Plaintiff's appeal was dismissed — Trial judge found joinder was appropriate — Trial judge found motion judge's ruling in respect of preferable procedure should stand because joinder could respond to issues without additional steps that accompany class proceeding — Trial judge found class proceedings to be used when they were needed, not just because they could be made to apply and appeared convenient — Trial judge found class action was directed by more public concerns: access to justice, behaviour modification and judicial economy — Plaintiff investor appealed — Appeal allowed — Motion judge erred in failing to find real and substantial connection between Ontario and subject matter, and erred by considering whether it would be reasonable for non-resident class members to expect that their rights would be determined by foreign court as independent factor — Ontario court is not required to approach issue of taking jurisdiction in restrained manner — Motion judge focused incorrectly on private placement transaction in United States, instead of preparation of audit report in Ontario — On claims as pleaded, case was auditors' negligence case involving Ontario auditors in context of private placement in United States — Ontario's connection to claim was neither modest or trivial — Motion judge erred in holding that class proceeding was not preferable procedure — Motion judge did not properly consider barriers to access to justice for all proposed class members, choosing to focus instead on those with highest value claims — Class action would allow members with smaller claims to have the most contentious and costly part of their claims determined in common issues trial — Common issues certified.

The plaintiff was a Canadian investor whom was among 57 accredited investors under United States legislation for transaction refinancing American-owned hog producer in China. Accredited investors were provided with memorandum that included clean audit report prepared by defendant accounting firm. Accredited investors invested some \$7.5 million before learning that the producer lacked financial controls over its all-cash-business. The producer went out of business. The plaintiff brought a class action against the defendant for negligence and negligent misrepresentation. The plaintiff unsuccessfully brought a motion for certification. The motion judge found that it was unreasonable to anticipate that the members of the prospective class could expect that claims had real and substantial connection to Ontario.

The plaintiff's appeal was dismissed. The trial judge found the prospective representative plaintiff was not one of many small investors, but rather the size of its investment demonstrated that plaintiff did not need a class action to make this economical, as the plaintiff was able to proceed on its own. It was apparent that joinder was appropriate for the problem and for the process. The motion judge's ruling in respect of the preferable procedure should stand as joinder could respond to plaintiff's issues without additional steps. The trial judge found that class proceedings should be used when they were needed, not just because they could be made to apply and appeared to be convenient. A class action was directed by more to public concerns, such as access to justice, behaviour modification and judicial economy.

The plaintiff investor appealed.

**Held:** The appeal was allowed.

Per MacFarland J.A. (Cronk J.A. concurring): The motion judge erred in failing to find a real and substantial connection between Ontario and the subject matter of the dispute.

The motion judge erred by considering whether it would be reasonable for the non-resident class members to expect that their rights would be determined by a foreign court as an independent factor in determining whether to take jurisdiction.

An Ontario court is not required to approach the issue of taking jurisdiction in a restrained manner, and to the extent that the motion judge found that it was, he was in error.

When the motion judge concluded that Ontario did not have a real and substantial connection with the claims of all but one investor, he focused incorrectly on the private placement transaction in the United States, instead of preparation of the audit report in Ontario.

The motion judge misconceived the nature and substance of the proposed claim and in so doing, fell into error in his jurisdictional analysis. On the claims as pleaded, there was little question that the substance of the dispute had a real and substantial connection to Ontario. The case was an auditors' negligence case involving Ontario auditors in the context of a private placement in the United States. Had the motion judge properly characterized the nature of the proposed action, he could not have concluded that Ontario's connection to the claim was either "modest" or "trivial". The motions judge disregarded the pleadings in describing the nature of the claim.

The motion judge erred in holding that a class proceeding was not the preferable procedure. To extent that the motion judge suggested that a plaintiff must establish that a class proceeding is necessary, rather than preferable to other methods, he erred in doing so. The Divisional Court majority erred in describing joinder as the "default" procedure against which the merits of a class proceeding should be assessed. The motion judge did not properly consider the barriers to access to justice for all the proposed class members, choosing to focus instead on those with the highest value claims.

A class action would allow the members with smaller claims to have the most contentious and costly part of their claims determined in the common issues trial. Class actions have a greater effect than individual actions in supplementing and enhancing the regulatory oversight of companies seeking to raise capital.

The common issues were certified.

Per Blair J.A. (dissenting): The appeal should be dismissed. The motion judge did not err in law or commit any palpable and overriding error of fact or of mixed fact and law in refusing to certify a global class or in determining that a class proceeding was not the preferable procedure. His determinations were entitled to deference,

The motion judge did not misinterpret the phrase real and substantial connection. The purpose of his analysis was to determine whether the Ontario court should, not whether it could, assume jurisdiction, and what he was searching for was whether there was a sufficient connection between Ontario and the subject matter of the dispute for that purpose. The error regarding the use of language was not an error that affected the validity of the outcome.

The motion judge did not suggest that court must exercise restraint in finding that it has jurisdiction, once the existence of a presumptive factor has been found to exist, but rather as focusing on the need for a restrained approach when deciding whether the court should assume jurisdiction over a global class.

The plaintiff's action was not mischaracterized. There was no error in the motion judge's approach to the broader jurisdiction question or in his broader characterization of the subject matter of the proposed class proceeding for the purpose of addressing the reasonable expectations of the proposed non-resident class members. The claim against the Ontario auditor could not be determined outside of the almost entirely foreign-related factual matrix. Only one member of the proposed class was resident in Ontario.

The motions judge properly analyzed the proper procedure issue. There was a basis for determining that a class proceeding was not the preferable procedure.

The motion judge did not proceed on the basis that joinder was the default procedure, and was not persuaded that the appellant had met the onus of showing the preferable procedure criterion was satisfied.

APPEAL by plaintiff from judgment reported at *Excalibur Special Opportunities LP v. Schwartz Levitsky Feldman LLP* (2015), 2015 ONSC 1634, 2015 CarswellOnt 8853, 386 D.L.R. (4th) 313, 337 O.A.C. 123, 45 B.L.R. (5th) 46 (Ont. Div. Ct.), dismissing appeal from motion refusing to certify class proceeding.

**J. MacFarland J.A.:**

1 The appellant, Excalibur Special Opportunities LP, was one of 57 investors that lost money in an expressly high-risk investment. It sought to certify a class action against the respondent, Schwartz Levitsky Feldman LLP ("SLF"), an accounting firm, for negligence and negligent misrepresentation over an audit report that Excalibur and the other investors claimed to have relied on in deciding to invest. The motion judge denied Excalibur's motion for certification. A majority of the Divisional Court upheld the motion judge's order. Excalibur now appeals with leave to this court.

**BACKGROUND**

**Southern China Livestock and the Private Placement Memorandum**

2 Southern China Livestock International Inc., incorporated in Nevada, USA, owned or operated hog farms in China through various subsidiary corporations. Seeking to raise capital to expand its operations, Southern China Livestock retained a New York-based investment bank, Rodman & Renshaw LLP, to solicit investors.

3 In 2010, Rodman & Renshaw put out a 230-page Private Placement Memorandum (the "Memorandum") to accredited investors — individuals with a net worth of at least US\$1 million or two years of income over US\$200,000.

4 One of the exhibits to the Memorandum was a one-page audit report prepared by SLF for the fiscal years 2008 and 2009. SLF is a Montreal and Toronto-based accounting firm with stated expertise in auditing Chinese companies. The audit

report stated that the financial statements fairly represented Southern China Livestock's financial position for those years, in accordance with generally accepted accounting principles.

- 5 SLF's audit report is the basis for the proposed class action. It reads in full:

Schwartz Levitsky Feldman LLP

CHARTERED ACCOUNTANTS

LICENSED PUBLIC ACCOUNTANTS

TORONTO - MONTREAL

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Shareholders of Southern China Livestock International Inc.

We have audited the consolidated balance sheets of Southern China Livestock International Inc. as at September 30, 2009 and 2008 and the consolidated statements of income and comprehensive income, stockholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the management of Southern China Livestock International Inc. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The company is not required to have nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal controls over financing reporting. Accordingly, we express no such opinion.

In our opinion, these consolidated financial statements referred to above present fairly, in all material respects, the financial position of Southern China Livestock International Inc. as of September 30, 2009 and 2008 and the results of its operations and its cash flows for the years then ended in accordance with generally accepted accounting principles in the United States of America.

- 6 SLF was paid \$45,000 for preparing the audit report.

### ***Excalibur Special Opportunities LP***

7 Excalibur is a limited partnership organized in Manitoba and operating as an investment fund based in Toronto. It invests in small-cap private and public companies. After reviewing the Memorandum "page for page, word for word", Excalibur invested a total of US\$950,000 in Southern China Livestock between March and November 2010.

### ***The Other Investors***

8 Southern China Livestock raised a total of US\$7.6 million through the private placement from a total of 57 investors. Excalibur was one of only two Canadian investors and the only from Ontario (the other was from British Columbia). 50 of the 57 investors were American. All told, 98% of the proposed class members were non-residents of Ontario:

Number of investors (57)	Residence
50	U.S.
2	Canada
1	Cayman Islands
1	Samoa
1	Malaysia
1	United Kingdom
1	Unknown

9 The majority of investors invested under US\$100,000. With its US\$950,000 investment, Excalibur was by far one of the most heavily-invested:

Number of investors (57)	Amount invested
19	\$1 to \$49,000
12	\$50,000 to \$99,000
8	\$100,000 to \$199,000
7	\$200,000 to \$399,000
3	\$400,000 and over
8	(unclear)

### ***The Downfall of Southern China Livestock***

10 In December 2010, Southern China Livestock filed a report mandated under U.S. securities law that Excalibur later described as "shocking". The report revealed that:

- Hogs were sold primarily for cash by farm employees;
- The employees maintained corporate funds in bank accounts under their own names;
- Southern China Livestock had little or no control over the employees' activities;
- Disclosure controls were ineffective; and
- Internal controls over financial reporting were not effective.

11 In June and July 2011, Southern China Livestock's North American directors resigned. A month later, Southern China Livestock withdrew its preliminary prospectus from the Securities and Exchange Commission. As the motion judge described it, at para. 52: "Southern China Livestock went dark, and its shares and warrants are now worthless."

### ***The Proposed Class Action***

12 In October 2012, Excalibur commenced a proposed class action against SLF on behalf of the 57 investors, seeking damages equal to the value of their investments. The essence of the claim is that in light of the true state of Southern China Livestock's financial affairs in 2008 and 2009 — i.e. that it had little control over the revenue and expenses of its all-cash business — SLF could not have provided a clean audit report in accordance with generally accepted accounting principles, as it had professed to do.

#### ***The Motion Judge's Certification Decision***

13 The motion judge dismissed Excalibur's certification motion on two bases.

14 First, he held that the class definition criterion under s. 5(1)(b) of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6, was not met because the proposed claim lacked a real and substantial connection to Ontario. While Excalibur and SLF are both based in Toronto, the remaining proposed plaintiffs are all non-residents of Ontario, the company in which they invested was based in the United States, and the transactions were governed by American law.

15 Second, the motion judge held that the preferable procedure criterion under s. 5(1)(d) was not met because joinder was a more appropriate mechanism for resolving the plaintiffs' claims. The motion judge contrasted this case with what he called "the quintessential economic loss case", where a class proceeding is the only way for plaintiffs to achieve the goals of access to justice, behaviour modification and judicial economy. By contrast, in this case, Excalibur itself has a nearly US\$1 million claim, and if it joined with just the other top 10 investors, their combined claims would be worth about US\$3 million. This, he held, would amply justify the litigation risk and would have the same corrective effect as a class action, without the additional procedural hurdles.

16 In all other respects, the motion judge was of the view that, with modifications to some of the proposed common issues, the remaining requirements of s. 5(1) of the *Class Proceedings Act, 1992*, were met.

#### ***The Appeal to Divisional Court***

17 Excalibur appealed to the Divisional Court, where the majority deferred to and affirmed the motion judge's decision.

18 Justice Sachs in dissent was of the view that the motion judge erred in failing to find a real and substantial connection between Ontario and the proposed action. That error informed his preferable procedure analysis, in which he fell into further error by failing to conduct the comparative access to justice analysis mandated by the Supreme Court of Canada in *Fischer v. IG Investment Management Ltd.*, 2013 SCC 69, [2013] 3 S.C.R. 949 (S.C.C.).

#### **ISSUES ON APPEAL**

19 There are two issues before this court. The first is whether the Divisional Court majority erred in deferring to the motion judge's determination that there was no real and substantial connection between Ontario and the subject matter of the dispute. The second is whether the majority further erred in deferring to the motion judge's determination that joinder was the preferable procedure to advance the issues raised in the pleadings. Indeed, the Divisional Court went so far as to describe joinder as the "default" procedure and cautioned that: "[w]e should be careful to use class proceedings when they are needed, not just because they can be made to apply and appear convenient": at para. 26.

20 Although SLF challenges some of Excalibur's proposed common issues, it does not contest that the common issues criterion is satisfied generally. I proceed on the basis that all other requirements of s. 5(1) of the Act are satisfied, with the exception of those which are the subject of this appeal.

21 For the following reasons I would allow the appeal essentially for the reasons articulated by Sachs J. in the Divisional Court.

#### **ANALYSIS**

(1) *The motion judge erred in failing to find a real and substantial connection between Ontario and the subject matter of the dispute*

22 As I have explained, of the 57 known investors who formed the putative class, only one was resident in Ontario. The vast majority of investors who lost money in Southern China Livestock were U.S. residents. The motion judge concluded that, in these circumstances, it would not be appropriate to certify a global class proceeding because there was no real and substantial connection between Ontario and the dispute.

23 The motion judge explained that in defining class membership, there must be a rational relationship between the class, the causes of action, and the common issues, and the class must not be unnecessarily broad or over-inclusive: at para. 102.

24 He also accepted, at para. 107, that there is jurisdiction under the *Class Proceedings Act, 1992* to certify a national or global class action where the class members will include persons and corporations from across Canada and around the world. The issue for the motion judge was not whether there could be a global class action, but whether it was appropriate to certify one in this case: at para. 109.

25 The motion judge set out the factors that in his view governed whether or not to certify a national or global class, at para. 111:

- a) whether the Ontario court has jurisdiction *simpliciter* over the defendant;
- b) whether the Ontario court can assume jurisdiction over a non-resident class member, which largely depends on whether Ontario has a real and substantial connection with the subject matter of the action and on principles of order, fairness and comity between courts;
- c) whether it would be reasonable for the non-resident class members to expect that their rights would be determined by what to them would be a foreign court; and
- d) whether the non-resident plaintiffs can be accorded procedural fairness, including adequate notice and a meaningful opportunity to opt out.

26 The motion judge held that the third factor was fatal to Excalibur's motion. Relying on this court's decision in *Parsons v. McDonald's Restaurants of Canada Ltd. (2005)*, 74 O.R. (3d) 321 (Ont. C.A.) [hereinafter *Currie*], the motion judge held, at paras. 124 and 129, that he had to approach the question whether there was a real and substantial connection between the cause of action and the Ontario court with "restraint", having regard to the reasonable expectations of the foreign plaintiffs.

27 With this in mind, the motion judge held that from the class members' perspective, "it is hard to imagine a case where it would be less reasonable to expect that his or her legal claims had a real and substantial connection to Ontario": at para. 128.

28 The motion judge explained, at para. 130:

The investors in the case at bar were non-residents of Ontario making substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law. Although the transaction included an Audit Report from an Ontario auditor, the standard of care associated with that audit would largely be determined by the American accounting standards under which the Audit Report was provided. It would be to exercise no restraint at all to conclude that Ontario had a substantial connection with this American financing and corporate reorganization.

29 The Divisional Court majority deferred to this conclusion.

30 On appeal, Excalibur takes no issue with factors (a), (b) and (d), but submits that the motion judge erred by including factor (c) as an independent consideration for the court in determining whether to take jurisdiction in a global class proceeding.

It submits that the motion judge further erred in relying on this court's decision in *Currie* for the proposition that he had to exercise "restraint" in applying the real and substantial connection test.

31 I agree with these submissions.

32 *Currie* was concerned with the enforcement of an American settlement agreement that purported to bind Canadian class members. The jurisdictional issue in that case involved the order and fairness implications of enforcing that judgment against the absent Canadian class members. As Excalibur notes in its factum, at para. 50:

When Sharpe J.A. stated, "embedded in the principles of order and fairness is also the notice of jurisdictional restraint," he was observing that fairness includes the foreign court having had a real and substantial connection to the cause of action or the parties, as well as having afforded adequate procedural rights to the non-resident class members. His concern was re-iterated as "Before enforcing a foreign class action judgment against Ontario residents, we should ensure that the foreign court had a proper basis for the assertion of jurisdiction and that the interests of Ontario residents were adequately protected."

33 I agree with Excalibur that *Currie* does not stand for the proposition that an Ontario court should approach the issue of taking jurisdiction in a restrained manner. To the extent that the motion judge found that it did, he erred, as did the Divisional Court majority in upholding that determination.

34 The test to determine whether to take jurisdiction over foreign class members begins with an inquiry into jurisdiction *simpliciter*, on the principles set out in *Van Breda v. Village Resorts Ltd.*, 2012 SCC 17, [2012] 1 S.C.R. 572 (S.C.C.).

35 There cannot be much question that the court has jurisdiction *simpliciter* in this case. This is an action for negligence and negligent misrepresentation against a defendant who resides in Ontario, carries on business in Ontario and did the audit report, the subject of the dispute, in Toronto. Thus, three of the four presumptive connecting factors outlined in *Van Breda* are present on the facts of the case as pleaded.

36 When the motion judge concluded, at para. 147, that Ontario did not have a real and substantial connection with the claims of 56 of the 57 investors and had only a "modest if not trivial" connection with Excalibur, he focused incorrectly on the private placement transaction in the U.S., instead of SLF's preparation of the audit report in Ontario.

37 At para. 60 of her dissenting reasons in the Divisional Court, Sachs J. stated:

If the action was against the people who were in charge of arranging or promoting the financing for the American corporation that made the investment in question, I would agree with the motion judge's assessment of the connection between Ontario and the proposed action. However, this is not the action that the representative plaintiff is proposing to pursue. Its action is a claim against a firm of accountants that resides in Ontario and actively conducts business here in relation to an audit that the firm performed in Ontario. Conceived of in this way, it cannot be said that the action does not have a real and substantial connection with Ontario.

38 I agree with these comments. The motion judge misconceived the nature and substance of the proposed claim and in so doing, fell into error in his jurisdictional analysis. It is for the plaintiffs to plead their case as they see fit and to succeed or fail on that basis. It is not the court's role to re-write the claim advanced. The following excerpts from Excalibur's statement of claim make it clear that the motion judge mischaracterized the claim it sought to certify:

22. Through the Private Placement Memorandum, SLF and International represented to potential investors that International's audited financial statements were prepared under US generally accepted accounting principles and that the initial audit of International's financial statements performed by SLF was in accordance with PCAOB [Public Company Accounting Oversight Board] standards.

...

27. In 2010, SLF held itself out as experienced and capable of providing audit services for Chinese companies looking to enter the North American public markets. It represented that it concluded its audits of Chinese companies in accordance with the standards of the PCAOB and in accordance with GAAS [generally accepted accounting standards].

...

33. SLF knew that the Private Placement Memorandum was an offering that was made and distributed to an exclusive group of selected and qualified investors such as the Plaintiff and the other Class Members. SLF knew that the Private Placement Memorandum, inclusive of the Auditor's Report, would be relied upon by all prospective investors when making their decision to purchase the Units.

34. The Auditor's Report was prepared by SLF for the specific purpose of improving the investment decisions of prospective investors in the Company, and with the intent that investors would rely upon the information in the audit.

35. SLF consented to the inclusion of its Auditors' Report in Private Placement Memorandum and the dissemination of its Auditors' Report to prospective investors, including the Class Members, as part of the Private Placement Memorandum in connection with Financing.

36. SLF knew that all investors, including the Plaintiff and the Class Members, would reasonably rely on SLF's knowledge and skill and on SLF's opinion in the Auditors' Report for purposes of making a decision about whether to purchase the securities of International through the Financing.

39 At paras. 57-62 of the statement of claim, the particulars of the alleged negligence on the part of SLF are set out. They include:

57. In light of the true state of affairs regarding International's operations in 2008 and 2009, and as described in detail below, SLF could not have obtained the degree of comfort and verification required under GAAS and the PCAOB standards to complete an audit of International without significant reservations and qualifications, if SLF could complete any audit at all.

58. International's financial statements were, in no way, a fair presentation of International's financial position for the periods stated. The Representation was materially false, inaccurate and misleading. Excalibur and the Class Members relied on the clean Auditors' Report to their detriment, and have suffered the loss of their investments as a result, Excalibur and the Class would never have invested in the Units absent the assurance of a clean audit report by SLF.

59. SLF was negligent in failing to exercise the requisite care, skill and diligence of a reasonably competent auditor of a public company in carrying out its audit to ensure that the Auditors' Report accurately presented International's financial condition and performance, all as described below.

60. SLF was also negligent in permitting the Auditors' Report to be included as an exhibit to the Private Placement Memorandum when it knew or ought to have known that it did not exercise the requisite care, skill and diligence of a reasonably competent auditor of a public company in carrying out the audit of International.

61. SLF was negligent in the preparation of the Auditors' Report in that, among other things:

- (a) it failed to conduct its audits in accordance with GAAS;
- (b) it failed to properly supervise its audit staff;
- (c) it failed to ensure that the financial statements were prepared in accordance with GAAP;
- (d) it failed to obtain an adequate understanding of International's business operations and control systems prior to conducting its audit procedures;

- (e) it failed to detect significant weaknesses in International's governance and internal controls;
- (f) it failed to detect significant weaknesses in International's risk management system;
- (g) it failed to report that the financial statements did not fairly present International's financial position in accordance with applicable accounting principles;
- (h) it failed in its duty to warn of facts discovered, or that ought to have been discovered by the application of ordinary diligence, care, skill and GAAS, and other facts indicative of dishonesty, negligence or unreliability of certain senior management of International;
- (i) it failed to comply with the rules and standards of the PCAOB to which its audit was subject:
  - (i) in failing to adequately assess the risk of material misstatement and to compensate by formulating sufficient, appropriate and alternative audit procedures;
  - (ii) by failing to adequately supervise the audit, particularly in circumstances where all of the field work was carried out in China;
  - (iii) in failing to obtain appropriate audit evidence;
  - (iv) by failing to identify weaknesses in internal controls and carrying out necessary audit testing;
  - (v) by failing to sufficiently pursue and evaluate related party transactions;
- (j) it failed to seek or require sufficient and appropriate audit evidence about payables and receivables including the proper supervision and follow-up of the confirmation process; and
- (k) it failed to obtain an adequate or sufficient and appropriate audit evidence in accordance with GAAS.

62. SLF received total audit and audit-related fees of approximately \$365,000 for its services to International.

40 On the claims as pleaded, there is little question that the substance of this dispute, focused as it is on the Auditor's Report prepared by SLF, does have a real and substantial connection to Ontario. This is an auditors' negligence case, involving Ontario auditors in the context of a private placement in the United States. At its core, it does not concern the regulation of such placements in the United States.

41 Considerations of order and fairness are not seriously challenged here. The identity of all class members but one is known and they can be notified directly about the claim and their opt-out options. This is not a situation where there are unknown and indeterminate class members.

42 In my view, had the motion judge properly characterized the nature of the proposed action he could not have concluded that Ontario's connection to the claim was either "modest" or "trivial".

43 Indeed, the majority in the Divisional Court acknowledged as much at para. 33 of their reasons:

[The motion judge] and counsel for the plaintiff see the circumstances of this case quite differently. For the judge, the case is founded on the financing of an American Corporation. It concerns investors, not resident in Ontario, making substantial investments in American dollars in that corporation. For counsel, the case is about an audit done in Ontario by an auditor whose business is located in Toronto and Montreal. The proposition is that, if the perspective of the judge is correct, there is no real and substantial connection to Ontario but, if counsel is right, there is. [Citation omitted.]

44 The majority concluded that it did not have to resolve the issue in light of its decision to uphold the motion judge's preferable procedure analysis, but noted that "[d]eference would suggest" the motion judge's analysis of the real and substantial connection issue should be left to stand: at para. 36.

45 I respectfully disagree. There was in my view a clear error here on the part of the motion judge, which displaces the deference normally accorded to judges on motions for certification. He disregarded the pleadings in describing the nature of the claim.

46 I also agree with the conclusion of Sachs J. on this issue, at paras. 51-54 and 60 of her dissent:

The motion judge found that Ontario had only a "modest if not trivial" connection to the representative plaintiff's claim, and an even weaker connection to the other 56 non-resident investors' claims. As such, according to the motion judge, it would not have been contemplated by the class that their rights arising out of the investment they made would be adjudicated in Ontario. Therefore, order and fairness dictated that the foreign class members not be included in an Ontario class proceeding. As put by the motion judge, at paras. 129 and 130 of his reasons:

[129] The residence of [the defendant] in Ontario is essentially the only connection with Ontario and while that connection certainly gives the Ontario court jurisdiction over [the defendant] and while Ontario courts would welcome foreigners to sue in Ontario that is a different thing from Ontario courts exercising the restraint required of them under the principles of order and fairness in assuming jurisdiction when the foreign plaintiff would have expected to pursue his or her rights in a court that did have a substantial connection with the subject matter of the litigation.

[130] The investors in the case at bar were non-residents of Ontario making substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law. Although the transaction included an Audit Report from an Ontario auditor, the standard of care associated with that audit would largely be determined by the American accounting standards under which the Audit Report was provided. It would be to exercise no restraint at all to conclude that Ontario had a substantial connection with this American financing and corporate reorganization.

In assessing the motion judge's reasoning on this issue, it is important to recognize several key points. The proposed class action is an action against a firm of accountants that is resident in Ontario and actively carries on business here. Its only other office is in Montreal. It has no assets in the United States.

The subject of the action is the audit work done in Ontario by this accounting firm. The partner who did the work is a partner in the firm's Toronto office.

The proposed representative plaintiff is a Toronto-based investment fund that is registered in Manitoba. The investment in question was made out of their Toronto office.

...  
If the action was against the people who were in charge of arranging or promoting the financing for the American corporation that made the investment in question, I would agree with the motion judge's assessment of the connection between Ontario and the proposed action. However, this is not the action that the representative plaintiff is proposing to pursue. Its action is a claim against a firm of accountants that resides in Ontario and actively conducts business here in relation to an audit that the firm performed in Ontario. Conceived of in this way, it cannot be said that the action does not have a real and substantial connection with Ontario.

*(2) The motion judge erred in holding that a class proceeding was not the preferable procedure*

47 In addition to finding that a global class was inappropriate, the motion judge concluded that a joinder of claims was preferable to a class action, "which, although manageable would be and has shown itself to be more procedurally cumbersome

and protracted than a regular action": at para. 216. While the motion judge adverted to the Supreme Court's decision in *Fischer v. IG Investment Management Ltd.* and the five questions to be considered in the preferability analysis, he did not conduct the comparative analysis that case prescribes. He simply concluded that this case was far removed from what he described as the "quintessential economic loss case", in which an individual action is "out of the question" because of the high cost of litigation relative to the low value of the claim: at para. 203.

48 By contrast, in this case, the motion judge noted that Excalibur itself has an almost \$1 million claim. He proposed that if Excalibur was joined "by just the other top 10 investors in an action against SLF (which would not need to be certified and for which there would be no doubt about the court's jurisdiction *simpliciter*), the action would have the heft of being a claim for around USD \$3 million": at para. 206.

49 In short, the motion judge concluded, at paras. 206 and 208:

Excalibur itself does not genuinely need a class action to obtain access to justice.

....

Perhaps, with a few exceptions, the Class Members also do not need a class action in order to obtain access to justice. The Class Members, even the smaller ones, are "accredited investors" which means they are, by definition, not without resources to litigate.

50 The majority in the Divisional Court deferred to the motion judge's conclusion on this point, and went further, stating, at para. 13: "[j]oinder is not simply an alternative, it is the default position in considering whether a class proceeding is or is not the preferable procedure."

51 If the motion judge meant to suggest that a plaintiff must establish that a class proceeding is necessary to obtain access to justice, rather than preferable to other methods, he erred in doing so. Further, the Divisional Court majority erred in describing joinder as the "default" procedure against which the merits of a class proceeding should be assessed. The majority cite no authority for this assertion, which appears to contradict the Supreme Court's jurisprudence on the preferable procedure criterion.

52 For example, at para. 35 of *Fischer v. IG Investment Management Ltd.*, under the heading "What Are the Alternatives to Class Proceedings?", the Supreme Court instructs:

The motions court must identify alternatives to the proposed class proceedings. As McLachlin C.J. held in *Hollick*, "the preferability analysis requires the court to look to all reasonably available means of resolving the class members' claims, and not just at the possibility of individual actions": para. 31 (emphasis added). Here, the court considers both other potential court procedures (such as joinder, test cases, consolidation and so on: *Hollick*, at para. 28) and non-court proceedings.

53 The court is to look at "all reasonably available means of resolving the class members' claims". To me this contradicts any suggestion that joinder is "the default" position.

54 Beyond this, I agree with Sachs J. that the motion judge's error in his real and substantial connection analysis tainted his analysis of the preferable procedure, as demonstrated by his conclusion, at para. 217 of his reasons:

Like all of the [criteria] for certification, the preferable procedure criterion sets a very low and easy to satisfy standard, but it is not so low that it is satisfied automatically because a representative plaintiff can form a group of claimants with manageable common issues, which is more or less all that Excalibur has done in the case at bar. And in the case at bar, **the formation of the class is without showing that Ontario has a real and substantial connection to the investors' claims** and is without showing that a class action is necessary to overcome any barriers to access to justice. In the case at bar, a class action is not necessary to achieve behaviour modification and a class action would not be particularly helpful in providing judicial economy. [Emphasis added by Sachs J.]

55 Justice Sachs held that if the motion judge had conducted the access to justice analysis mandated by *Fischer v. IG Investment Management Ltd.* through a lens that accepted that Ontario had a real and substantial connection to the investors' claims, he could not have concluded that joinder was a preferable mechanism. She offered several reasons why.

56 First, Sachs J. noted, at para. 79, that there was no evidence before the motion judge that joinder was available as an alternative procedure. In particular, there was no evidence that the other class members would be prepared to assume the burdens, risks and responsibilities of commencing their own claims, that they would want or be able to retain the same counsel, or that the defendant would retain the same counsel to defend the hypothetical actions.

57 Second, contrary to the instruction in *Fischer v. IG Investment Management Ltd.*, the motion judge did not properly consider the barriers to access to justice for all the proposed class members, choosing to focus instead on those with the highest value claims. Justice Sachs explained that 19 of the proposed class members' claims are for under \$50,000, and another 12 claims are for between \$50,000 and \$99,000. As she put it, at para. 82: "[t]he cost of pursuing these claims individually would dwarf the potential recovery for these investors." The foreign plaintiffs also face the spectre of motions for security for costs.

58 Third, there was no evidence before the motion judge that the proposed class members are a cohesive group who would or could agree on a form of joint retainer and an allocation of the costs of the litigation. And, since SLF had not acknowledged its willingness to attorn to any jurisdiction, even a successful foreign judgment would pose further jurisdictional challenges.

59 On the other hand, a class action will allow the members with smaller claims to have the most contentious and costly part of their claims determined in the common issues trial. If successful, these plaintiffs will have an Ontario judgment that they will be able to enforce in Ontario against a defendant who resides in Ontario. While a class action requires the additional procedural burden of certification, joinder brings with it its own procedural challenges.

60 Finally, Sachs J. noted that class actions have been recognized as having a greater effect than individual actions in supplementing and enhancing the regulatory oversight of companies seeking to raise capital: *Green v. Canadian Imperial Bank of Commerce*, 2014 ONCA 90, 118 O.R. (3d) 641 (Ont. C.A.), varied 2015 SCC 60, [2015] 3 S.C.R. 801 (S.C.C.), at paras. 35-36.

61 Justice Sachs concluded, at para. 95:

Again, while I recognize that a motion judge's finding with respect to the preferable procedure criterion is one to which deference is owed, I find that, in this instance, the motion judge's analysis cannot stand as his analysis was driven by his error in finding that Ontario was not the proper forum for the adjudication of the foreign class members' claims.

62 I would adopt this reasoning. In my view, on the basis of the foregoing analysis the preferability requirement is met and the Divisional Court majority erred in deferring to the motion judge's holding to the contrary. Even the motion judge here recognized that a resolution of the common issues on the facts of this case would make a "substantial contribution" to resolving the class members' claims: at para. 210.

(3) *This court should certify the common issues as reframed by Sachs J.*

63 Although the motion judge refused to certify Excalibur's class proceeding, he went on to consider its proposed common issues in the event of an appeal. He held that several of the proposed common issues were redundant and that others were defective because they required adjudication on a case-by-case basis, specifically on those issues that claimed reliance on SLF's allegedly negligent misrepresentations. Nevertheless, the motion judge held that several of the proposed common issues were properly certifiable.

64 The Divisional Court majority declined to deal with SLF's objections to the motion judge's treatment of the common issues (which the majority held was mischaracterized as a "cross-appeal") given its ultimate decision to uphold the motion judge's determinations on the global class and preferable procedure criteria.

65 Justice Sachs considered the common issues in light of her conclusion that the motion judge had misconceived the nature of Excalibur's action, leading him to err in his global class and preferable procedure analyses. At paras. 103-138, she carefully considered each of the proposed common issues. She agreed with the motion judge's reformulation of some of the common issues and restored or modified others.

66 On appeal, Excalibur asks that this court certify the common issues as Sachs J. did in her dissenting reasons. I would grant this request. I agree with Sachs J.'s conclusions on the common issues and would adopt her reasoning.

## **CONCLUSION**

67 For the foregoing reasons I would allow the appeal, set aside the order of the Divisional Court, and substitute in its place an order certifying the action as a class proceeding in relation to the common issues as set out in Schedule A to Excalibur's notice of appeal.

68 As per the parties' agreement, I would award Excalibur \$60,000 in costs, inclusive of the costs of the appeal and the motion for leave to appeal. The parties did not address the disposition of costs in the courts below. If the parties cannot agree on that issue, they may make brief written submissions (no more than 3 pages) to the court within 15 days of the release of these reasons.

### ***E.A. Cronk J.A.:***

I agree.

### ***R.A. Blair J.A. (dissenting):***

69 I have had the opportunity to review the draft reasons of my colleague, Justice MacFarland. Respectfully, I disagree with her determination of the appeal.

70 In my view, Perell J. did not err in law, nor did he commit any palpable and overriding error of fact or of mixed fact and law in refusing to certify a global class or in determining that a class proceeding was not the preferable procedure. His determinations are entitled to deference, which the majority of the Divisional Court properly accorded him. I would dismiss the appeal.

71 More particularly, my colleague, and the dissenting justice in the Divisional Court, conclude that the motion judge erred in law by:

(i) mischaracterizing the plaintiff's claim by focusing on the private placement issue in the United States instead of treating the claim as a simple action in auditor's negligence against an Ontario auditor who performed the work out of its Ontario office;

(ii) taking into account, in determining whether the Ontario court should assume jurisdiction, whether it would be reasonable for the non-resident class members to expect that their rights would be determined by what to them would be a foreign court; and by

(iii) failing to conduct a proper preferable procedure analysis, concluding that a joinder of actions was an acceptable alternative, and therefore failing to hold that a class proceeding was the preferable procedure in the circumstances.

72 I come to a different conclusion for the following reasons.

## **Discussion and Analysis**

73 My colleague has succinctly summarized the background facts. I need not expand on them further except as may be necessary in the context of the analysis.

74 I agree that the issue on this appeal is whether the majority in the Divisional Court erred in deferring to the motion judge's decisions with respect to the certification of a global class and the preferable procedure issue. However, if the motion judge committed no reversible legal error and made no palpable and overriding error of fact or of mixed fact and law — which, on my analysis of his reasons, is the case — his decisions in that regard are entitled to deference and may not be overturned simply because judges at a different level might have arrived at different conclusions. Hence the focus of the analysis here is rightly on the decision of the motion judge.

### ***The Identifiable Class Analysis***

75 Much of my disagreement with my colleague's reasoning, and that of the dissenting justice in the Divisional Court, stems from what I see as a misplaced emphasis, here and below, on the expression "real and substantial connection". It is important in this case, I think, to focus on what the motion judge was doing, rather than concentrating too closely on the language he used in explaining what it was that he was doing.

76 In the post-*Van Breda v. Village Resorts Ltd.*, 2012 SCC 17, [2012] 1 S.C.R. 572 (S.C.C.) era, "real and substantial connection" has a particular connotation. Where one or more of the four presumptive factors outlined by the Supreme Court of Canada in that case are established, a real and substantial connection between the jurisdiction and the subject matter of the proceeding — the hallmark of a court's competence to assume jurisdiction over a case with a foreign element — is presumed to exist and the court acquires jurisdiction *simpliciter*. That is not the end of the matter, however. The presumptive factors may be rebutted, and, even if they are not, the court may still go on to consider whether, in spite of the fact that it *has jurisdiction*, it should take the next step and *assume jurisdiction* over the foreign element in the proceeding.

77 Here, there has never been any dispute that the Ontario court has jurisdiction *simpliciter* over the proposed class action, and therefore that there is a real and substantial connection in the *Van Breda* sense; the action is brought against an auditor defendant that is domiciled, resident and carrying on business in Ontario and that at least performed the impugned audit out of its Toronto office. The motion judge recognized this. The parties accept it.

78 The motion judge undeniably articulated his reasons in terms of a real and substantial connection. But as I read those reasons as a whole, it is clear that he was not using the term in the *Van Breda* sense, nor was he seeking to analyse whether a *Van Breda* type of connection existed or denying that it did. The purpose of his analysis was to determine whether the Ontario court *should*, not whether it *could* assume jurisdiction over a global class, and what he was searching for was whether there was a sufficient connection between Ontario and the subject matter of the dispute for that purpose.

79 The motion judge's review of the evidence and his conclusion that Ontario had a connection but not a real and substantial connection to the action must be read with that in mind.

80 That this was the thrust of the motion judge's approach to the global class decision is evident from a number of passages in his reasons, including the following:

[109] In the immediate case, the question to be decided is not whether there can be a global class action, the question is when is it appropriate to certify a global class.

...

[117] Upon reflection, it now strikes me that this discussion <sup>1</sup> misses the point because the issue about whether there should be a global class is not so much whether a class proceeding procedure would be unfair to the defendant but more about whether including the foreigners in the Ontario proceeding would be fair to the foreigners. In that regard, the question of whether a foreign court would enforce the unfavourable foreign judgment begs the question because as noted by Justice Strathy in *Ramdat v. George Brown College of Applied Arts & Technology*,<sup>2</sup> it generally can be assumed that the foreign court will enforce the Ontario judgment if it was fair for the Ontario court to extend its jurisdiction to the foreign Class Members.

[118] Thus, determining the likelihood of the enforceability of the Ontario judgment in a foreign court begs the question of whether the Ontario court should extend its jurisdiction to a foreigner represented by the Representative Plaintiff. I think, however, the discussion of the likely enforceability of the Ontario judgment is useful because it focusses attention on the issue of when would it be fair for an Ontario court to assume jurisdiction and bind a foreigner to its judgment.

...

[123] Justice Sharpe<sup>3</sup> discussed the topic of national and international class actions and how the principles of conflicts of law should apply in circumstances where there were non-resident plaintiffs in a global class action. Justice Sharpe appreciated that the underlying issue was when should a domestic court assume jurisdiction over foreign plaintiffs and purport to bind them. [Emphasis and footnotes added.]

81 It was from this perspective that the motion judge viewed his task of determining whether to certify the proposed global class here — a class more than 98% of which would be comprised of non-resident members. And it was from this perspective that the motion judge concluded it was appropriate to consider, in the course of performing that task, whether it would be reasonable for the non-resident class member to expect that his or her rights would be determined in and by a foreign court. His concern was to ensure that it was fair and appropriate in the circumstances for the Ontario court *to assume jurisdiction* over the non-resident members of the proposed class.

82 While it may be that the motion judge erred, or at least strayed, in casting his analysis in the language of "real and substantial connection", it is not an error that affects the validity of the outcome of his analysis. Viewed in the foregoing manner, and as I shall explain below, I see no error in his consideration of the reasonable expectation of the non-resident members of the proposed class or in his characterization of the proposed class action in broader terms than that of a straightforward auditor's negligence case brought against an Ontario auditor in Ontario.

83 On the other hand, I respectfully suggest that my colleague and the dissenting justice in the Divisional Court concentrate too narrowly on the notion that the motion judge erred in failing to find a real and substantial connection between Ontario and the subject matter of the dispute in the *Van Breda* sense. They conclude that the motion judge erred in taking this approach and that he compounded this error by adapting the cautionary note of Sharpe J.A. in *Currie*, to the effect that courts should approach the issue of taking jurisdiction with restraint, to the circumstances of this case. I am unable to accept this critique, however.

84 As I have explained above, the motion judge did not fail to find a real and substantial connection between Ontario and the subject matter of the dispute in the *Van Breda* sense. He accepted that Ontario had jurisdiction *simpliciter*.

85 Likewise, the idea that a court should exercise restraint in assuming jurisdiction over a case with a foreign element is not new. Indeed, I would argue that it is deeply-rooted in our entire approach to that issue. Sharpe J.A. merely reflected this state of affairs when he said, in *Currie* at para. 10, that "embedded in the principles of order and fairness is also the notion of jurisdictional restraint". In doing so, he referenced the following comment of La Forest J. in *Morguard Investments Ltd. v. De Savoye*, [1990] 3 S.C.R. 1077 (S.C.C.), at p. 1103:

[I]t hardly accords with principles of order and fairness to permit a person to sue another in any jurisdiction, without regard to the contacts that jurisdiction may have to the defendant or the subject-matter of the suit . . . Thus, fairness to the [party against whom enforcement is sought] requires that the judgment be issued by a court acting through fair process and with properly restrained jurisdiction. [Emphasis added.]

86 The notion of restraint is reinforced by the provisions in the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194 dealing with service of defendants outside of Ontario. Rule 17 permits such service without leave of the court in a defined list of circumstances but requires leave of the court in other circumstances. In either event, it permits the foreign party served the originating process to move for an order setting aside the service or staying the proceeding before delivering a defence. This is consistent with the approach whereby courts do not willy-nilly assume jurisdiction over a case with a foreign element. There is a built-in restraint to that approach.

87 One of the mechanisms through which that restraint is exercised is through the need to find a real and substantial connection between the jurisdiction and the subject matter of the dispute. *Van Breda* has clarified, and taken some of the uncertainty out of, the process of determining whether such a connection exists by establishing a set of presumptive factors. I accept that the notion of restraint may not apply to a determination of whether one or more of the presumptive factors exist, but I observe that even the presumptive factors are subject to rebuttal which is consistent with the underlying concept of jurisdictional restraint.

88 The notion of restraint is further evident in common law courts' long-standing power to decline to assume jurisdiction over a foreign party, even though they have the jurisdiction to do so, on the basis of the *forum non conveniens* doctrine. This is a second step if jurisdiction continues to be challenged after one or more of the presumptive factors establishing a real and substantial connection have been found to exist. As LeBel J. put it in *Van Breda*, at para. 104:

When it is invoked, the doctrine of *forum non conveniens* requires a court to go beyond a strict application of the test governing the recognition and assumption of jurisdiction. It is based on a recognition that a common law court retains a residual power to decline to exercise its jurisdiction in appropriate, but limited, circumstances in order to assure fairness to the parties and the efficient resolution of the dispute. [Emphasis added.]

89 It was in this context that the motion judge invoked the notion of restraint and undertook his consideration of whether the proposed non-resident class members would reasonably expect that their rights would be dealt with in the Ontario courts. I do not read his reasons as suggesting that a court must exercise restraint in finding that it *has* jurisdiction, once the existence of a presumptive factor has been found to exist, but rather as focusing on the need for a restrained approach (perhaps better described as a balanced approach) when deciding whether the court *should assume* jurisdiction over a global class. I see no error in this approach.

90 The dissenting justice in the Divisional Court observed, correctly, that several of the *Van Breda* presumptive factors were present in this case. She concluded that the motion judge erred in not finding that there was a real and substantial connection between Ontario and the proposed action because he mischaracterized the plaintiff's action. There are two responses to this.

91 First, as noted above, although he used the "real and substantial connection" language, the motion judge was not addressing the concept in the *Van Breda* sense of jurisdiction *simpliciter*. He was addressing whether the court *should assume* jurisdiction over the non-resident class members and whether there was a sufficient connection between Ontario and the subject matter of the dispute for that purpose.

92 The appellant asserts that the respondent did not argue *forum non conveniens* before the motion judge and points to *Van Breda* for the proposition that once a presumptive factor has been established and the court has jurisdiction, it cannot decline to exercise that jurisdiction unless the defendant invokes *forum non conveniens*.

93 I would not give effect to that submission here. As the respondent submits, while there are overlapping concepts and analytical considerations between jurisdiction and whether the court should certify a global class, the two are not identical. The argument below focussed on the underlying issue of "order and fairness" which is important to the question of when a domestic court will assume jurisdiction over foreign plaintiffs and purport to bind them. It was not essential to invoke the magic phrase "*forum non conveniens*" in order to conduct the analysis in these circumstances.

94 Secondly, he did not err, in my view, by mischaracterizing the subject matter of the proposed class proceeding. The dissenting justice in the Divisional Court chose to characterize that subject matter narrowly: as a simple claim in auditor's negligence against an Ontario auditor. The motion judge — properly in my view — approached it more broadly because he was attempting to resolve not the narrower issue of whether the court *had* jurisdiction but the wider issue of whether it *should assume* jurisdiction over a global class. To adopt the language of respondent's counsel in its factum, "[a] Court will not certify a class over which it has no jurisdiction, but it will not necessarily certify a global class just because it can assert jurisdiction."

95 It was in that regard that the motion judge asked himself about the reasonable expectations of the proposed non-resident class members, and stated the following at paras. 129-130:

The residence of SLF in Ontario is essentially the only connection with Ontario and while that connection certainly gives the Ontario court jurisdiction over SLF and while Ontario courts would welcome foreigners to sue in Ontario that is a different thing from Ontario courts exercising the restraint required of them under the principles of order and fairness in assuming jurisdiction when the foreign plaintiff would have expected to pursue his or her rights in a court that did have a substantial connection with the subject matter of the litigation.

The investors in the case at bar were non-residents of Ontario making substantial investments in American dollars in an American corporation in a transaction that was governed by American corporate and securities law. Although the transaction included an Audit Report from an Ontario auditor, the standard of care associated with that audit would largely be determined by the American accounting standards under which the Audit Report was provided. It would be to exercise no restraint at all to conclude that Ontario had a substantial connection with this American financing and corporate reorganization. [Emphasis added.]

96 Respectfully, I see no error in the motion judge's approach to the broader "whether to assume jurisdiction over a global class action" question or in his broader characterization of the subject matter of the proposed class proceeding for the purpose of addressing the reasonable expectations of the proposed non-resident class members. It may be that at one level the proposed action is simply a claim in negligence against an Ontario auditor. That claim cannot be determined, however, outside of the almost entirely foreign-related factual matrix alluded to by the motion judge and cited above. Keep in mind, as well, that Excalibur is the only member of the proposed class that is resident in Ontario.

97 The motion judge was not establishing new law when he considered, as one of the circumstances when it would be fair to join foreign plaintiffs to an Ontario action, the question of whether it would be reasonable for the non-resident class member to expect that his or her rights would be determined by what to him or her would be a foreign court. Other courts, including this Court in *Currie*, have done so. See also, for example, *Ramdath*. In addressing this issue, he was entitled to take a broader view of the subject matter of the proposed class proceeding.

98 The dissenting justice in the Divisional Court did a comparative analysis between the present case and *Currie*. She distinguished *Currie* on the basis that certain procedural protections that were lacking in the foreign proceeding for the Ontario plaintiffs that were to be bound by the settlement could be satisfied here, essentially because the unnamed non-residents were known and could be notified of these proceedings. I do not think this assists, however. The motion judge did not resort to or rely on *Currie* for its procedural protection component. He relied on it for the restraint proposition on which — for the reasons I have outlined above — he was entitled to proceed for purposes of determining whether the Ontario court *should* assume jurisdiction.

99 Absent error in law or palpable and overriding error of fact or of mixed fact and law, his decision is entitled to deference. I see no such error here. There is, therefore, no basis to interfere with his determination that it was not appropriate to certify a global class in this proceeding, as the majority in the Divisional Court concluded.

#### *The Preferable Procedure Analysis*

100 What I have already said affects my view of the motion judge's treatment of the preferable procedure criterion too. Because I am not persuaded that he erred in arriving at his decision not to certify a global class, his analysis of the preferable procedure issue cannot be tainted by viewing the preferable procedure analysis through the wrong lens.

101 Nor do I accept, as my colleague concludes, that the motion judge did not conduct the comparative analysis mandated by the Supreme Court of Canada in *Fischer v. IG Investment Management Ltd.*, 2013 SCC 69, [2013] 3 S.C.R. 949 (S.C.C.). Absent any such error, it is not for an appellate court to conduct its own *Fischer* analysis and substitute its own view of the preferable procedure criterion for that of the motion judge.

102 Respectfully, the motion judge did not simply conclude that this case was far removed from the "quintessential economic loss case" in which an individual action was "out of the question" because of the high cost of litigation to the low value of the claim, as my colleague asserts. His *Fischer* analysis occupies over 20 paragraphs of his reasons. It acknowledges that

"the preferability analysis must be conducted through the lens of judicial economy, behaviour modification and access to justice" (para. 196) — the touchstones underpinning the rationale for class proceedings. It specifically addresses the five *Fischer* questions that are to be answered when considering whether processes will achieve access to justice (para. 197) and directly or indirectly explores the application of each of those questions to the access to justice issue on the facts before him (paras. 198-218). This includes a canvassing of:

- any economic, psychological, social, or procedural barriers to access to justice (he found none);
- the need to ensure the ultimate remedy provides substantive justice;
- whether behaviour modification was needed beyond the behaviour modification that would come from a normal tort action or another alternative (again, he found no such need); and
- the need to consider the alternatives to a class proceeding and whether the alternative has the potential to provide effective redress for the substance of the plaintiffs' claims in a manner that accords suitable procedural rights.

103 The motion judge concluded that a joinder of claims was an alternative that satisfied the foregoing requirements in the circumstances of this case. He summarized his conclusions in this regard in the following fashion (paras. 215 and 216):

In the case at bar, the alternative of a joinder of claims would provide effective redress for Excalibur and [any] other investors who could join the action as co-plaintiffs. A joinder of claims would provide suitable procedural rights. A joinder of claims would have avoided a certification motion, although perhaps not a motion to challenge the jurisdiction of the Ontario court as *forum non conveniens* given that the United States would be the expected venue for all of the investors. In comparison to a class action, a joinder of claims would provide access to justice for those class members with meritorious claims, promote adequate behaviour modification of the defendant and provide a similar amount of judicial economy to that which would be achieved by a class action.

In my opinion, in the circumstances of the case at bar, a joinder of claims is preferable to a class action, which, although manageable would be and has shown itself to be more procedurally cumbersome and protracted than a regular action. With the benefit of hindsight, this almost two-year old action might be past discoveries and be ready to set down for trial if it had not been delayed by the pursuit of certification under the *Class Proceedings Act, 1992*.

104 Then, in an observation with which I substantially agree, he concluded:

Like [each] of the criterion for certification, the preferable procedure criterion sets a very low and easy to satisfy standard, but it is not so low that it is satisfied automatically because a representative plaintiff can form a group of claimants with manageable common issues, which is more or less all that Excalibur has done in the case at bar. And in the case at bar, the formation of a class is without showing that Ontario has a real and substantial connection<sup>4</sup> to the investors' claims and is without showing that a class action is necessary to overcome any barriers to access to justice. In the case at bar, a class action is not necessary to achieve behaviour modification and a class action would not be particularly helpful in providing judicial economy. [Footnote added.]

105 Certification is not the automatic or default outcome of an application for certification of a class action. As the majority in the Divisional Court pointed out, "[t]here is no inherent right to proceed on a class basis". Section 5(1) of the *Class Proceedings Act, 1992*, sets out the requirements for certification and the onus is on the moving party to show that those requirements, including that a class proceeding would be the preferable proceedings, have been met.

106 We charge trial judges to exercise the responsibility of gatekeepers in this process, and substantial deference is owed to their certification decisions. Appellate intervention should be restricted to matters of general principle. See *Anderson v. Wilson* (1999), 175 D.L.R. (4th) 409 (Ont. C.A.), at para. 12, leave to appeal to S.C.C. refused, (2000), [1999] S.C.C.A. No. 476 (Ont. C.A.); *Markson v. MBNA Canada Bank*, 2007 ONCA 334, 282 D.L.R. (4th) 385 (Ont. C.A.), at para. 33, leave to appeal to S.C.C. refused, [2007] S.C.C.A. No. 346 (Ont. C.A.).

107 Here, there was a basis in the record for the motion judge's determination that a class proceeding was not the preferable procedure in the circumstances of this case. The appellant complains that he failed to conduct a comparative analysis and argues, for example, that he failed to look at the potential negative aspects of the joinder alternative. However, his reasons show that the motion judge did consider comparative factors and the fact that he did not specifically mention potential difficulties with a joinder proceeding does not mean that he failed to consider them (he recognized, for example, that a joinder of claims might not have avoided a jurisdictional challenge).

108 Although the motion judge did refer, during his comparative analysis, to what he viewed as the quintessential case of a class proceeding for economic loss, he made it clear that the preferable procedure analysis must be conducted in relation to the case at bar, even though it was far from the quintessential case, and he recognized that class proceedings have been certified in other — even similar — cases involving economic loss. At paras. 211-214 of his reasons he said:

That the case at bar is far from the quintessential economic loss class action, however, does not mean that it does not satisfy the preferable procedure criterion. Similar pure economic cases with self-sufficient representative plaintiffs have been certified.

So the preferable procedure analysis must go forward to determine whether the case at bar although far from the quintessential economic loss case, nevertheless, is the preferable procedure for the Class Members' claims.

In making a preferable procedure analysis, it is necessary to consider the alternatives to a class action. The preferable procedure analysis recognizes that a class action is not the only way for a group to litigate.

As noted above in *AIC Limited v. Fischer*, *supra*, the Supreme Court stated that when considering alternatives to a class action, the question is whether the alternative has potential to provide effective redress for the substance of the plaintiffs' claims and to do so in a manner that accords suitable procedural rights. [Citations omitted.]

109 It was just this analysis that the motion judge conducted.

110 Before leaving this aspect of the appeal, I should say that I agree with the appellant and with my colleague that the majority of the Divisional Court erred in stating that "[j]oinder is not simply an alternative, it is the default position in considering whether a class proceeding is or is not the preferable procedure" (para. 13). Nothing in the *Class Proceedings Act* or in the jurisprudence justifies such an observation, in my view. However, the motion judge did not proceed on that basis. He conducted the *Fischer* exercise, including a comparative analysis of a class proceeding and joinder. For the reasons cited above, he was not persuaded that the appellant had met the onus of showing the preferable procedure criterion was satisfied.

111 Again, in the absence of reversible error in law or principle or a palpable and overriding error of fact or of mixed fact and law — none of which exist here — it is not for an appellate court to re-do the preferable procedure analysis and substitute its own views for that of the motion judge, whose decision is entitled to deference. Whether there may be credible arguments favouring a different result on the preferable procedure analysis is not the question.

112 I would not give effect to this ground of appeal.

## Disposition

113 For the foregoing reasons, I would dismiss the appeal. Given that disposition, it is not necessary for me to deal with the way in which the motion judge framed the common issues.

114 The Divisional Court refused to grant the appellant leave to appeal a portion of the costs award in favour of the respondent. That issue is therefore not properly before this court.

*Appeal allowed.*

Footnotes

- 1 This passage followed a review of certain authorities dealing with principles of comity and the circumstances in which foreign courts may or may not recognize Ontario judgments.

MOTION by plaintiffs for court approval of global settlement agreement.

#### *Winkler R.S.J.:*

1 This is a motion seeking approval of a settlement, together with a companion motion for approval of class counsel fees, brought in two related class proceedings involving Nortel Networks Corporation. Similar approval motions have been brought in the United States District Court, Southern District of New York and in the courts in the provinces of British Columbia and Quebec. By order dated June 22, 2006, this court granted certification, on consent, under the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 for the purposes of settlement of these two class proceedings, which are styled as *Frohlinger v. Nortel Networks Corp.* ("Frohlinger") and *Gallardi v. Nortel Networks Corporation et al.* ("Gallardi"). The classes for which certification issued pursuant to these Ontario proceedings were national classes except for residents of British Columbia and Quebec. The classes covered by the U.S. proceedings are world-wide. The plaintiffs in both of the actions, supported by the corporate defendant, some of the individual defendants, and plaintiffs in related proceedings in other jurisdictions, move before this court for approval of a settlement that is a proposed global resolution aimed at concluding all outstanding litigation, based on similar claims, in Canada and the United States. Although some of the individual defendants have not joined in support of the settlement for other reasons, none of those defendants are objecting to the approval of the settlement.

2 For the reasons that follow, I approve the settlement as being "fair, reasonable and in the best interests of the class" and approve class counsel fees, as sought, in the total amount of \$5,000,000 plus disbursements and applicable taxes.

## Background

3 The *Frohlinger* action was commenced with a different representative plaintiff in Ontario on February 23, 2001. Following various amendments, the claim now alleges that during the period between October 24, 2000, and February 15, 2001, Nortel Networks Corporation ("Nortel"), and certain of its officers, issued a series of materially false and misleading press releases and financial statements relating to its financial performance. It is alleged that the price of Nortel securities were artificially inflated during the relevant period as a result of these statements. On February 15, 2001, Nortel issued a press release significantly lowering its next quarterly and full year financial performance guidance to investors. During the next trading day, the share price suffered a drop of approximately \$15.00 or 33% from its closing price on February 15. Shortly thereafter class actions were commenced in the United States, Ontario, British Columbia and Quebec on behalf of purchasers of Nortel securities during the relevant periods. The class actions in the United States were consolidated in the U.S. District Court for the Southern District of New York as *In re Nortel Networks Securities Litigation*. This consolidated litigation is referred to as "Nortel I".

4 The *Gallardi* action was commenced in relation to allegedly misleading financial reports and press releases that are claimed to have caused an artificial inflation in the Nortel securities market price during the period between April 23, 2003 and April 27, 2004. Class actions filed in the United States in relation to these claims have also been consolidated in the Southern District of New York. That consolidated litigation is referred to as "Nortel II".

5 While the class periods are the same in the respect of the *Frohlinger* and Nortel I actions, and in the *Gallardi* and Nortel II actions, the classes are otherwise defined differently to accord with certain distinctions in the class action jurisprudence in Canada and the United States. While these differences are discussed in greater detail below, the practical reality is that the distinctions will not have an impact on the approval of this settlement.

6 Ontario-based pension funds acted as lead plaintiffs in each of the Nortel I and Nortel II actions in the United States, which is indicative of the fact that Nortel securities were widely held on both sides of the border. The U.S. actions advanced more quickly than the Ontario actions for various reasons, and settlement negotiations, under the supervision of Senior United States District Judge Robert W. Sweet, were initiated in September 2005 between the U.S. lead plaintiffs and the defendants. The negotiations culminated in a two-day mediation with Judge Sweet in early February 2006. A conditional agreement in principle was announced in a Nortel press release on February 8, 2006.

7 Neither the plaintiffs nor the class counsel in the Canadian actions participated in the settlement negotiations in the United States. However, since it was intended that the settlement would represent a global resolution of all outstanding class action litigation, further discussions were necessary in order to have the Canadian classes adopt the settlement and thereby achieve the desired global resolution. The end result was a settlement agreement dated June 20, 2006, accepted by all parties to all of the outstanding class actions in both countries. That settlement has now been presented to this court for approval. Approval has also been sought from the courts in New York, British Columbia and Quebec pursuant to the terms of the settlement agreement. In order for the settlement to take effect it must be approved by all of the courts.

## The Settlement

8 Settlement is to be encouraged in litigation. In a class action context, a settlement ought to be approved by the court where it is "fair, reasonable and in the best interests of the class as a whole". In determining whether a proposed settlement meets that test, a number of factors are to be considered but these factors are guidelines rather than rigid criteria. As stated in *Kelman v. Goodyear Tire & Rubber Co.*, [2005] O.J. No. 175 (Ont. S.C.J.) at para. 12 and 13:

[para12] When considering the approval of negotiated settlements, the court ought to have regard to a number of factors, including:

- (i) Likelihood of recovery or likelihood of success;
- (ii) Amount and nature of discovery, evidence or investigation;
- (iii) Settlement terms and conditions;
- (iv) Recommendation and experience of counsel;
- (v) Future expense and likely duration of litigation and risk;
- (vi) Recommendation of neutral parties, if any;
- (vii) Number of objectors and nature of objections;
- (viii) The presence of good faith, arms length bargaining and the absence of collusion;
- (ix) The degree and nature of communications by counsel and the representative plaintiffs with class members during the litigation; and
- (x) Information conveying to the court the dynamics of and the positions taken by the parties during the negotiation.

(See *Dabbs v. Sun Life Assurance Company of Canada* (1998), 40 O.R. (3d) 429 (Gen. Div.) at 440-44; *Parsons v. The Canadian Red Cross Society*, [1999] O.J. No. 3572 (Sup. Ct.) at paras. 71 and 72.)

[para 13] However, these factors provide a guide for analysis rather than a rigid set of criteria that must be applied to every settlement. In practice, it may well be the case that all of the factors are not applicable or, alternatively, should not be given equal weight. (See Parsons at para. 73.) (Emphasis added.)

9 The settlement contains terms relating to direct compensation to class members as well as indirect benefits through the adoption of certain corporate governance changes. In respect of direct compensation, the settlement is divided into two pools, one for each of the Nortel I (*Frohlinger*) and Nortel II (*Gallardi*) actions. Compensation is in the form of cash and shares of Nortel in each pool. In the Nortel I action, class members will share in a pool of U.S. \$438.6 million in cash and 314,333,875 Nortel common shares. In the Nortel II action, the pool of compensation to be shared among class members will consist of U.S. \$370.1 million in cash and 314,333,875 Nortel common shares. I note that the court was advised at the hearing that Nortel may move to consolidate its shares and in the event such consolidation occurs before distribution of the settlement, the actual number of shares issued to the classes will reflect the consolidation.

10 Estimates of what each class member will actually receive vary, as they must in a settlement of this nature, because of the uncertainties wrought by the yet to be calculated valuation of individual claims, the unknown number of class members who will actually file a claim and the normal fluctuations in share prices on a going forward basis.

11 The global amount of the settlement was negotiated based on the underlying principle of Nortel's ability to pay while still remaining a viable going concern. This is similar to the approach undertaken in *Kelman*, as set out at para. 16-17:

[16]...it is clear that the overriding concern was the ability of the defendants to pay a larger amount by way of settlement without putting their solvency at risk....

[17] In consideration of the limits on funds available for settlement, and the other risk factors inherent in litigation, I am satisfied that the plaintiffs achieved through the negotiation the maximum available amount for satisfaction of the claims in total, short of trial...Further, there is some evidence that had the matter proceeded to trial, although a judgment for a larger amount may have been obtained, the actual recovery by the class may have been significantly less because of the solvency issues of the defendants. (Internal citation omitted.)

12 Based on the evidence before this court from the plaintiffs and the experts retained to analyze Nortel's ability to pay by the lead plaintiffs in the U.S. actions, I am satisfied that, as in *Kelman*, the settlement provides "the maximum available amount for satisfaction of the claims in total, short of trial". Moreover, the manner in which this settlement was achieved, with the supervision of Judge Sweet, satisfies a number of the criteria set out in *Kelman* and the cases referred to therein for settlement approval. Although the settlement discussions largely took place in the context of the U.S. actions, they were conducted by experienced counsel, who had undertaken extensive investigation into the claims, under the supervision of an experienced judge as a neutral third party. There can be no doubt that the result was achieved through arms length hard bargaining. The further steps required to obtain adoption of the bargained settlement in the Canadian class actions, with the concomitant due diligence conducted by Canadian class counsel, provides additional comfort to the court that the settlement represents a fair compromise.

13 The fact that an action is certified on consent for settlement purposes does not obviate the requirement that the action as framed must meet the certification criteria under s. 5(1) of the *CPA*. (See: *Baxter v. Canada (Attorney General)*, [2006] O.J. No. 4968 (Ont. S.C.J.) at paras. 24 and 25). That includes the requirement that there be an "identifiable class" which must be defined objectively without resort to merits-based identifiers. (See: *Western Canadian Shopping Centres Inc. v. Dutton*, [2001] 2 S.C.R. 534 (S.C.C.) at para. 38.)

14 In the *Frohlinger* Action the class has been defined as:

All persons and entities, except Excluded Persons and members of the British Columbia Class and the Quebec Class, who, while resident in Canada at the time, purchased Nortel common stock or call options on Nortel common stock, or wrote (sold) put options on Nortel common stock during the [period between October 24, 2000 through February 15, 2001, inclusive].

15 In the *Gallardi* Action the class has been defined as:

All persons and entities, except Excluded Persons and members of the Quebec Class, who, while resident in Canada at the time, purchased Nortel common stock or call options on Nortel common stock, or wrote (sold) put options on Nortel common stock during the [period between April 24, 2003, and April 27, 2004, inclusive]

The Ontario classes are defined as national classes so as to include all Canadian residents except those resident in British Columbia and Quebec. The relevant British Columbia and Quebec actions have similar class definitions, save for the obvious inclusion of different residential requirements and the omission of reference to jurisdictional exclusions. The classes for purposes of the U.S. proceedings are world-wide classes which include persons wherever located.

16 In the U.S. proceedings on the other hand, the Nortel I class has been defined as:

All persons and entities, wherever located, who bought Nortel common stock or call options on Nortel common stock during the period October 24, 2000 through February 15, 2001, inclusive, and suffered damages thereby, including, but not limited to, those persons or entities who traded in Nortel Securities on the New York Stock Exchange and/or the Toronto Stock Exchange. (Emphasis added.)

Save for the differing class period, the Nortel II class is similarly defined.

17 As can be seen, the class definitions in the U.S. proceedings and those in the Canadian actions are not precisely the same. In the U.S. actions, the classes are defined by reference to "damages" suffered. Under Canadian law, this would be an unacceptable merits-based definition. However, under the settlement and the plan of administration in this case, it is a distinction without a difference for the practical purposes of claims adjudication and compensation distribution to class members. Accordingly, it is not necessary to undertake a comparative analysis of Canadian and American jurisprudence in this area but, in my view, the rationale underlying the Canadian jurisprudence bears further comment in light of the class definitions in the Canadian actions.

18 Although courts in Canada have rejected merits-based class definitions, the courts also recognize that over-inclusive class definitions must also be avoided. In *Ragoonian Estate v. Imperial Tobacco Canada Ltd.* (2005), 78 O.R. (3d) 98 (Ont.

S.C.J.), Cullity J. undertook an extensive review and analysis of the current Canadian case law with respect to class definitions. In his view there was an "inevitable tension between rejecting a merits-based test and requiring that a class must not be over-inclusive". However, in *Ragoonian Estate*, after a probing review of the relevant case law, Cullity J. ultimately determined that the plaintiff could not define a class that was not over-inclusive without resort to merit-based limits and, accordingly, denied certification.

19 As noted by Cullity J., the "inevitable tension" regarding class definitions stems largely from subsequent interpretations of the Supreme Court of Canada decision in *Hollick v. Metropolitan Toronto (Municipality)*, [2001] 3 S.C.R. 158 (S.C.C.) which states, in part, at paras. 19-21:

19 ...[t]he difficult question, however, is whether each of the putative class members does indeed have a claim — or at least what might be termed a "colourable claim" — against the respondent. To put it another way, the issue is whether there is a rational connection between the class as defined and the asserted common issues...

20 The respondent is of course correct to state that implicit in the "identifiable class" requirement is the requirement that there be some rational relationship between the class and common issues. Little has been said about this requirement because, in the usual case, the relationship is clear from the facts. In a single-incident mass tort case (for example, an airplane crash), the scope of the appropriate class is not usually in dispute. The same is true in product liability actions (where the class is usually composed of those who purchased the product), or securities fraud actions (where the class is usually composed of those who owned the stock). In a case such as this, however, the appropriate scope of the class is not so obvious. It falls to the putative representative to show that the class is defined sufficiently narrowly.

21 The requirement is not an onerous one. The representative need not show that everyone in the class shares the same interest in the resolution of the asserted common issue. There must be some showing, however, that the class is not unnecessarily broad — that is, that the class could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issue. Where the class could be defined more narrowly, the court should either disallow certification or allow certification on condition that the definition of the class be amended... (Internal citations omitted.)

20 In reviewing this passage in his Reasons in *Ragoonian*, Cullity J. stated at para. 23:

23 In practical — as well as logical — terms, the problem created by the supposed over-inclusive rule and the prohibition on merits-based class definitions is that they operate in opposition to each other. While the former insists that only those with valid — or, in the words of the Chief Justice, "colourable" — claims are included in the class, the latter restricts the possibility of achieving this end. If they are applied strictly, their combined application will tend to exclude the possibility of any acceptable class definition.

21 The underlying reason for each of these prohibitions is readily apparent. Merits-based class definitions require a determination of each class member's claim as a precondition of ascertaining class membership. Carrying that concept to its logical conclusion, it would mean that at the conclusion of a class proceeding, only those individuals who were successful in their claims would be members of the class and, therefore, bound by the result. Theoretically, unsuccessful claimants would not be "class members" and would be free to commence further litigation because s. 27(3) of the *CPA*, which states in part:

A judgment on common issues of a class or subclass binds every class member who has not opted out of the class proceeding...,

would not bind them or bar them from commencing further actions.

22 The rationale for avoiding over-inclusiveness, on the other hand, is to ensure that litigation is confined to the parties joined by the claims and the common issues which arise.

23 Merits-based definitions are self-evident. Over-inclusive class definitions on the other hand are more elusive. It cannot be the case, as is evident here from the fact that approximately 150,000 claims had been filed as of the date of the hearing, that a class is over-inclusive simply by reason of its numerical size. Similarly, a proper class definition does not include only those persons whose claims will be successful. Rather, as the Chief Justice states in *Hollick*, the essence of a proper class definition goes to the "rational connection between the class as defined and the asserted common issues". It is neither express nor implied in that statement that a class member's "colourable" claim must be one that will ultimately be successful. Indeed, it is the purpose of a class action to resolve claims through the utilization of a common issue phase and an individual issue determination, if necessary.

24 Although the individual issues that exist obviously have an impact on the certification of a class proceeding, the class definition must be connected to the common issues raised by the cause or causes of action asserted. It is this element of commonality, which must be assessed on a case by case basis, that determines the viability of a particular class definition. Hence, where, as here, the allegations are that misstatements led to an artificially inflated share price during certain periods of time, it follows logically that anyone purchasing those shares in a relevant period has a potential claim giving rise to common issues shared with every other purchaser in the same period. As noted in *Hollick*, the relationships between the classes and the common issues asserted in these actions are "clear from the facts". Therefore, in my view, it is not over-inclusive to frame the classes in the manner set out in *Frohlinger* and *Gallardi*. The fact that any person so described may not ultimately be successful in advancing a claim for damages does not preclude their inclusion in the class. As stated by the Chief Justice in *Western Canadian Shopping Centres Inc.* at para. 38:

38 ...the class must be capable of clear definition....The definition should state objective criteria by which members of the class can be identified. While the criteria should bear a rational relationship to the common issues asserted by all class members, the criteria should not depend on the outcome of the litigation. (Emphasis added.)

25 Over-inclusive class definitions can be avoided without resort to merits-based identifiers by adherence to the concept that the core of a class proceeding is the element of commonality. It is implicit in that concept that the cause of action, the scope of the class and the common issues are inextricably inter-related. Indeed, the first three criteria for certification as a class proceeding under s. 5(1) of the *CPA* may be stated in a single sentence as follows: There must be a cause of action, shared by an identifiable class, from which common issues arise.

26 With respect to defining a certifiable common issue, the Chief Justice stated in *Hollick* at para. 18:

...an issue will be common "only where its resolution is necessary to the resolution of each class member's claim". Further, an issue will not be "common" in the requisite sense unless the issue is a "substantial ...ingredient" of each of the class members' claims.

Given this interpretation of "common issue", it can be seen that a class definition will depend in large part on how the cause or causes of action are framed and how the common issues are drawn. However, by necessary extension, a class definition is not over-inclusive if it describes a class of persons who share a claim and whose members share an interest in the resolution of a common issue that is, in turn, a "substantial ingredient" of each of their claims.

27 Moreover, it would be a mistake in the context of a class definition analysis to interpret the terms "colourable" or "valid" claims as only those capable of success. The probability of success of a particular class member's claim cannot be a factor in determining whether a class is properly defined, either as a basis for inclusion or exclusion. To the contrary, a viable cause of action for the purpose of certification is one that is not "certain to fail" because of a "radical defect". (See: *Hunt v. T & N plc*, [1990] 2 S.C.R. 959 (S.C.C.); *Hollick*). It would be contrary to the goals of the *CPA* to require each individual class member's claim to pass a higher threshold. If the terms "valid" or "colourable" are taken to mean a claim which will succeed, it will have the effect of imparting a *de facto* merits-based analysis into the certification test.

28 It must be remembered that the *CPA* is a procedural statute meant to provide a mechanism for the resolution of mass claims. As such, certification is a procedural step in the litigation and not a substantive determination. The statute must be interpreted liberally and a rigid approach to class definition based on concerns about over-inclusiveness may well defeat its purposes.

29 While the class definitions set out in the *Frohlinger* and *Gallardi* actions are necessary to comport with the jurisprudence binding on this court, the reality is that any practical difference between those classes and those defined in the U.S. actions are, as stated above, more apparent than real in the context of the administration of this settlement. In broad terms, the compensation under the settlement will be based on a netting of gains and losses suffered by class members during the relevant class period. Those who make claims under the settlement in the U.S. action will be bound by the judgment even if in the end result it is determined that they are not entitled to compensation because of the netting calculation. Thus, class members whether in Canada or the U.S. will receive identical treatment in respect of their claims, regardless of class definition.

30 The differences in the jurisprudence between the two countries highlights some of the potential difficulties that may arise in cross-border litigation, particularly in respect of class actions. Courts in both countries have thus far been adept and adaptable in developing *ad hoc* procedures to deal with these types of issues. Given the increasing trends toward globalization, it is likely that cross-border litigation will increase. The instant case is an example of this. Here the settlement is global in scope crossing provincial and international boundaries and the jurisdictions in which the underlying proceedings have been commenced include two countries and several provinces. It would be useful if more formal protocols were developed to facilitate the courts and the parties in dealing with these types of cases.

### Counsel Fees

31 I turn then to the fee request of class counsel. I am mindful that the fees sought in Ontario are but a fraction of the total fees that will be sought in applications before the various courts and that any fees approved in other jurisdictions will, as with the Ontario counsel fees, be drawn from the settlement funds. In my view, where both the class compensation and counsel fees are to be drawn from a single settlement fund, any court from which approval is sought as part of a global settlement has jurisdiction to review and assess the reasonableness of the counsel fees being sought in the aggregate. However, the approach taken to this review must also be tempered by the principle of comity in order to ensure that global settlements in multi-jurisdictional litigation, and their attendant benefits for class members, are not unduly impeded.

32 In a global settlement of multi-jurisdictional class action litigation, the total amount that will be available to class members in the form of compensation is an overriding concern. To state the obvious, where compensation and counsel fees are to be drawn from a single fund, the total fees that may be awarded to counsel will reduce the amount available for distribution to class members. Therefore, when more than one court is involved in the approval process, each court must be in a position to assess the total compensation available to class members, and must accordingly be advised of the maximum amount of counsel fees that will be sought in each other jurisdiction involved. This is so in the present case. However, adverting to the principle of comity, the decision of a particular court charged with approving specific counsel fees in its jurisdiction should be respected by each other court.

33 Here, the notices approved by the courts in respect of class certification and proposed settlement included a provision detailing the maximum amount of fees that might be sought by counsel in each jurisdiction. Provided that the amounts sought by counsel in each jurisdiction do not exceed those set out in the notice, I will defer to the decisions of those other courts regarding the specific counsel fees awarded in their respective jurisdictions.

34 The fees sought by Ontario class counsel come before this court for approval. As stated, counsel seek approval of a fee for both actions in a total amount of \$5 million dollars (CDN) plus disbursements and applicable taxes. Although the court was made aware of some individual objections to the global fees for counsel in all of the actions in all jurisdictions, no objectors appeared before this court and no objections were advanced by any party to the proceeding or by the plaintiffs in the other actions. I have reviewed the materials provided in support of the fee request of class counsel and find that the fee is reasonable

given the work performed, the risk undertaken and the result achieved. In my view, the amount sought in respect of the Ontario actions is appropriately reflective of the effort expended by Ontario class counsel. Accordingly, the fee requested is approved.

35 I am prepared to meet with counsel on short notice to fix the terms of the orders, if necessary.

*Motion granted.*

MOTION for certification of class action.

***Perell J.:***

#### **A. Preface**

1 Sometimes, when a group of individuals is harmed, a class action is the only access to procedural and substantive justice. Sometimes, when a group of individuals is harmed, a class action is the preferred or best access to procedural and substantive justice. However, sometimes when a group of individuals is harmed, a class action sacrifices justice and a class action would not lead the harmed individuals to the substantive justice they deserve, but rather it would impede procedural justice and it would diminish or fail to achieve substantive justice. Sometimes, when a group of individuals is harmed, the only access to procedural and substantive justice is for the individuals to soldier on as individuals to obtain the justice they deserve. The case at bar is one such case.

## **B. Introduction**

2 Between 2005 and 2015, the Hospital for Sick Children ("the Hospital") operated the Motherisk Drug Testing Laboratory ("MDTL"). During this time, the laboratory tested the hair of 18,463 individuals to screen for the presence of drugs and alcohol. Some of the test results were used by physicians treating patients. Some of the test results were used as evidence in criminal proceedings. Some of the test results were used as evidence in matrimonial disputes to determine custody and access rights. And some of the test results were used as evidence in child protection proceedings under the *Child and Family Services Act*<sup>1</sup> that could result in the loss of the tested individual's parental rights.

3 One of the individuals tested was Rebecca Green, whose newborn son had been apprehended by the Toronto Children's Aid Society in the summer of 2009. After the apprehension of her baby, Ms. Green agreed to hair testing to regain access and custody. Her test results, however, were positive, and her son remained in foster care between 2009 and 2011, approximately two years, until Ms. Green's test scores reported negative for drug and alcohol use.

4 Three years later, in October 2014, in *R. v. Broomfield*,<sup>2</sup> Ms. Broomfield was charged with several offences arising from the allegation that she had administered a noxious substance to her two-year-old son. At trial, Crown counsel adduced expert evidence about long-term cocaine ingestion from a pharmacologist/toxicologist and a technician from the Motherisk Program. Ms. Broomfield was convicted and she appealed. On the appeal, new evidence was admitted that revealed that there was controversy among the experts about the use of the testing methods at Motherisk. The Court of Appeal set aside the conviction on one of Ms. Broomfield's charges. The Court of Appeal's decision sparked an uproar and a scandal for the Hospital.

5 In 2015, a proposed class action, the action now before the court, was commenced. In this action, Ms. Green alleges that all the laboratory's 18,463 tests were unreliable and that she and others suffered harm as a result of the reliance that courts and others placed on the test results. She sues the Hospital, Dr. Gideon Koren, the founder of the Motherisk Program, and Joey Gareri, one of the managers of the laboratory, for the systemic negligence of releasing unreliable test results.

6 Ms. Green now moves for certification of her proposed class action. The Defendants deny negligence. They also resist certification of the class action.

7 Collectively, the Defendants submit that none of the criterion for the certification of an action as a class proceeding are satisfied, and, in particular, they submit that: (a) Ms. Green's systemic negligence claim fails the cause of action criterion; (b) her class definition is overbroad; (c) she has not established any meaningful common issues; (d) her action does not satisfy the preferable procedure criteria on both the grounds of unmanageability and also because of alternative preferable procedures; and (e) she does not satisfy the representative plaintiff criterion because she has not prepared a workable litigation plan.

8 I agree with some, but not all, of the Defendants' challenges, and for the reasons that follow, I dismiss Ms. Green's certification motion.

## **C. Evidentiary Background**

### **1. Testimonial and Documentary Evidence**

9 Ms. Green supported her certification motion with the following evidence:

- Her affidavit dated November 3, 2016. Ms. Green was cross-examined.
- Affidavits dated November 1, 2016 and July 21, 2017 of Brittany Tovee, a lawyer from Koskie Minsky, LLP, Ms. Green's proposed Class Counsel. Ms. Tovee was cross-examined.

10 The Hospital and Mr. Gareri resisted the certification motion with the following evidence:

Affidavit dated May 29, 2017 of Naveen Hassan, a lawyer from Borden Ladner Gervais LLP, counsel for the Hospital and for Mr. Gareri.

11 Dr. Koren resisted the certification motion with the following evidence:

- Affidavit dated May 30, 2017 of Lifa Jensen-Taillefer, a law clerk from McCarthy, Tétrault LLP, counsel for Dr. Koren.
- An affidavit dated May 24, 2017 from Dr. Alberto Salomone. Dr. Salomone is a forensic toxicologist with a research focus in hair analysis, and, in particular, hair analysis for psychoactive substances and alcohol biomarkers. He holds a PhD in Analytical Chemistry from the University of Turin. He is the Laboratory Supervisor at a laboratory in Turin, Italy that performs over 300,000 biological tests annually, including hair tests for child protection purposes. Dr. Salomone was cross-examined.
- An affidavit dated May 15, 2017 from Jeffrey Wilson, a leading family law and child protection lawyer. Mr. Wilson was cross-examined.

12 On May 4, 2017, Dr. Koren served a Request to Admit on Ms. Green. The request was to admit 186 facts and the authenticity of 25 documents.

13 On May 24, 2017, Ms. Green responded to the Request to Admit. She admitted the authenticity of the documents, and she admitted the truth of 32 queries, but she refused to admit or answer 154 queries because she said the requests: (a) sought admissions of fact pertaining to the merits of the action pre-certification; (b) sought admissions in respect of "some cases", "some individuals" and unnamed "individuals" without further clarity; and (c) sought admissions in respect of issues temporally outside of the proposed class period.

14 Included in the evidentiary record was the *Independent Review of the Motherisk Drug Testing Laboratory at Toronto's Hospital for Sick Children* (the *Independent Review*) authored by the Honourable Susan Lang, the Independent Reviewer.

15 Many of the queries in the Request to Admit concerned facts found in the *Independent Review*. The parties disagreed about the admissibility and utility of this report for the purposes of the certification motion. The Defendants' position was that the *Independent Review* was inadmissible and could not be relied upon by Ms. Green in support of her motion for certification. I will address the admissibility and the utilization of the report in the next section of my Reasons for Decision.

## **2. The *Independent Review of the Motherisk Drug Testing Laboratory at Toronto's Hospital for Sick Children***

16 Relying on *Robb Estate v. St. Joseph's Health Care Centre*,<sup>3</sup> the Defendants submit that *The Independent Review*, which was put into evidence as an exhibit to Ms. Tovee's affidavit, is hearsay evidence. The Defendants submit that the *Independent Review* is inadmissible evidence on this certification motion and inadmissible for any determination of the merits of Ms. Green's action.

17 The Defendants submit that the *Independent Review* was the product of an *ad hoc*, expeditious, largely voluntary or co-operative inquiry process, but not an adjudicative process with procedural and due process protections. Further, the Defendants submit that the *Independent Review* is not admissible because the Independent Reviewer was not empowered by her Terms of Reference to make findings of liability and indeed expressly indicated in the report that she was not doing so. The Defendants submit that the *Independent Review* was not a public inquiry and, therefore, its report is not admissible pursuant to the public inquiry exception to the hearsay rule.

18 Moreover, the Defendants submit that in making her findings, the Independent Reviewer did not apply the standards of proof applicable in a civil trial and it would be unfair and prejudicial to the Defendants to be bound by findings based on evidence for which they had no opportunity of cross-examination. They submit that there was nothing to preclude Ms. Green from obtaining expert evidence for the certification motion, as Dr. Koren has done, and it was her own election and peril that she chose not to do so.

19 Further still, the Defendants submit that the *Independent Review* cannot be used as a form of issue estoppel. Finally, the Defendants submit that Ms. Green cannot rely on the *Independent Review* while at the same time refusing to properly respond to Dr. Koren's Request to Admit, which requested admissions about numerous facts set out in the *Independent Review*.

20 In response, Ms. Green submits that the *Independent Review* is admissible for the purposes of the certification motion, which she emphasizes is just a procedural motion and not a determination of the merits of her action or of the putative class members' claims. Further, she submits that *Robb Estate v. St. Joseph's Health Care Centre* is distinguishable and the case does not apply in the circumstances of a certification motion.

21 Ms. Green submits that the *Independent Review* is admissible pursuant to the public document exception to hearsay<sup>4</sup> or as as a principled hearsay exception in accordance with the principles of necessity and reliability.<sup>5</sup>

22 Moreover, Ms. Green submits that there is no prejudice to the Defendants from admitting the *Independent Review* for the limited purposes of establishing some basis in fact for four of the five certification criteria because: (a) the scope of a certification motion is limited and does not constitute a finding on the merits; (b) many of the documents referred to in the *Independent Review* were the Defendants' documents; and (c) many of the documents referred to in the *Independent Review* were voluntarily produced and authenticated for the purposes of the certification motion.

23 For my part, methinks both parties doth protest too much, and for the following reasons, I shall admit the *Independent Review* for the limited purposes of the certification motion.

24 At the outset, I respectfully say that the submissions of both sides about the use to be made of the *Independent Review* have to be taken with more than a grain of salt of skepticism. Ms. Green's factums did not read as if the culpability of the Defendants was not an issue for the certification criteria, and in this regard, Ms. Green did appear to submit that based on the *Independent Review*, there was proof of systemic negligence perpetuated on a class-wide basis. And in their factums, the Defendants were somewhat two-faced in objecting to the admission of the *Independent Review*, while at the same time asking Ms. Green to admit copious numbers of facts described in the *Independent Review* or found in the Defendants' own documents and forming part of the evidentiary record for the certification motion.

25 In admitting the *Independent Review* for the purposes of the certification motion, I agree with Ms. Green that it cannot be admitted as proof of the merits of her claim, and I agree with the Defendants that the *Independent Review* cannot be the basis of any issue estoppels. There are, however, for the purposes of the certification motion, facts in the *Independent Review* that are admissible and relevant to the certification criterion.

26 Many of the facts contained in the *Independent Review* are admissible for the purposes of the certification hearing because: (a) the fact is not contentious and is common ground among the parties; (b) the fact is not hearsay with respect to the issues to be determined on the certification motion; or (c) the fact is admissible pursuant to a recognized hearsay exception such as the hearsay exception for admissions by a party<sup>6</sup> or the exception for business records.<sup>7</sup> The fact of the *Independent Review* having occurred is part of the historical background to Ms. Green's and the putative class members' claims and some of the *Independent Review* is admissible simply for having been said but not necessarily for the truth of what was said.

27 In these circumstances, it is not necessary for me to determine whether the *Independent Review* is admissible to the public document exception to hearsay or as as a principled hearsay exception in accordance with the principles of necessity and reliability. The *Independent Review* is admissible and the use to be made of it will depend on a contextual analysis of the matter in issue in the discussion that follows.

## **D. Factual and Procedural Background**

### **1. The Motherisk Program**

28 In 1985, Dr. Koren, who is a physician and clinical toxicologist, founded the Motherisk Program at the Hospital for Sick Children. The program's main function was to offer clinical information on the safety of drugs and other chemical agents used by pregnant and lactating women. The program continues to provide this service today.

29 Julia Klein was the manager of the Motherisk laboratory from January to May 2005. Mr. Gareri was the manager from May 2005 to 2015. A quality manager was introduced in 2008. Beginning in 2008, the laboratory used graduate students and fellowship recipients to interpret the hair test results. A laboratory supervisor was introduced to the Motherisk program in 2009. A written standardized interpretation guideline was also introduced in 2009.

30 In the 1990s, the Hospital established and operated the Motherisk laboratory as part of the Motherisk program. This clinical laboratory, which was a significant revenue generator for the Hospital, offered a hair testing service to physicians, hospitals, community health providers, the Crown, child welfare agencies, and to others who requested tests to determine whether an individual was a substance abuser. Child welfare agencies used hair test results when parents sought voluntary access to services, such as assisting a parent manage drug or alcohol use and when the agency was prosecuting a child protection case.

31 Hair testing is a process by which hair strands are analyzed to detect the use of drugs or alcohol. The science was pioneered in 1978, progressively developed, refined and improved, and is now an accepted science practiced throughout the world and endorsed by the United Nations. In contrast to urine and blood testing, which can detect only recent drug and alcohol use, hair testing detects historical consumption.

32 The hair testing process works by detecting metabolites, which are formed by a human body breaking down (metabolizing) drugs or alcohol that have been consumed.

33 Metabolites remain in hair long after ingestion and hair testing is unaffected by periods of abstinence because the test will detect metabolites in older portions of the hair. Because hair grows at an average of 1 cm per month, a single sample can be cut into smaller segments and a segmental analysis of hair allows for comparison of drug or alcohol use in an individual in different periods of time. In contrast to hair analysis, urine analysis shows alcohol consumption over a much shorter period. Generally, alcohol will only remain in a person's system for 12-36 hours, depending on factors such as level of alcohol consumption and hydration level of the subject.

34 There are two main metabolites for alcohol that can be found in human hair: fatty acid ethyl esters ("FAEE") and ethyl glucuronide ("EtG"), which is the most sensitive and most specific biomarker for alcohol and a marker not influenced by hairspray, wax, oil, grease, or ethanol-containing hair products, which may yield false results. However, EtG concentrations may be lowered or false reports may be caused by bleaching, perming, or dyeing of hair. A concentration of 30 pg/mg EtG in scalp hair up to 6 cm is strongly suggestive of excessive alcohol consumption.

35 To test for alcohol, the Motherisk laboratory used FAEE testing which uses gas chromatography — mass spectrometry ("GC-MS") technology.

36 The Motherisk laboratory used ELISA (enzyme-linked immunosorbent assay) to test for: amphetamine, barbiturates, benzodiazepine, benzoylecgonine (a metabolite of cocaine), cannabis/THC, cocaethylene, cocaine, codeine, hydrocodone, hydromorphone, LSD, MDA, MDMA, meperidine, methadone, methamphetamine, morphine, opiates, oxycodone, PCP, and 6-AM. The details of the various methodologies changed as the test methods were refined and improved from time to time as the science continued to be developed.

37 From September 2010 to May 2014, the laboratory confirmed the majority of its test results for drugs of abuse using GC-MS. From May 2014 to the end of the class period, the laboratory confirmed the majority of its test results for drugs of abuse using liquid chromatography — tandem mass spectrometry (LC-MS/MS).

38 The laboratory's general practice was to collect or receive a hair sample, conduct the hair test, report the results, and provide additional information as requested by the customer of its service.

39 Sometimes, the Motherisk laboratory collected the hair sample for the test and in other instances the hair sample was collected and sent to the laboratory for testing. Up until September 2010, only some hair samples were washed before testing at the laboratory. After September 2010, all adult hair samples were washed.

40 The laboratory provided the client with a Results Report, the content of which changed over time, but which always described the concentration of a drug or alcohol metabolite in the sample tested and whether that amount constituted a "positive", "negative", or "trace" result. If asked, the laboratory staff would respond to questions about the test and its interpretation. In some instances, an additional step was taken before the delivery of the Results Report. The additional step was to send the hair sample to a Reference Laboratory, a third-party, for re-testing or confirmation of the results.

41 Between February 2011 and 2015, the laboratory sent all positive alcohol tests for additional testing.

42 Ms. Green alleges that: the laboratory did not have standard operating procedures; it did not comply with chain of custody and other forensic standards; its testing did not conform with recognized standards; it did not properly retain data; and it did not properly interpret and report test results.

43 From 2005-2010 the laboratory used only the ELISA test to test for substance abuse. Ms. Green alleges this was negligent because ELISA is intended to be only a preliminary screening test.

44 Of the 18,463 individuals who were tested by the Motherisk laboratory, a total of 10,004 were reported as having a positive result. 6,958 of the reported positives were individuals referred from child protection agencies.

45 A positive result had substantial significance to the life of the person tested because evidence of substance abuse could prompt intervention by child protection agencies and the outcome of the child protection proceedings could be a diminishment or the complete loss of parental rights. A positive result could also have substantial significance in matrimonial disputes over custody and access.

46 As noted above, the test results were also sometimes used as evidence in criminal proceedings.

47 Before the commencement of this action, the laboratory's test results were used as evidence in numerous reported court decisions.<sup>8</sup>

## ***2. The Background to Ms. Green's Claim***

48 In June 2009, when Ms. Green was seven months pregnant by her then boyfriend, he assaulted her. She attended at the emergency department of Mount Sinai Hospital for treatment for the assault. A social worker reported the matter to the Toronto Children's Aid Society.

49 On July 27, 2009, Ms. Green met a case worker from the Society and arrangements were made for a follow-up meeting, which was to include the boyfriend. The meeting was scheduled for August 10, 2009, but rescheduled at Ms. Green's request to August 21, 2009 and then to August 26, 2009.

50 In the meantime, the Society received a report from Ms. Green's psychiatrist. He reported that Ms. Green had suffered from substance abuse (cocaine and alcohol) and from reciprocated domestic violence with former boyfriends and with her current boyfriend.

51 On August 26, 2009, Ms. Green and her boyfriend met with the Society, but they refused to sign the consent forms requested by the case worker to address the protection of the anticipated newborn.

52 On August 30, 2009, Ms. Green gave birth to a male child. At the time of birth, Ms. Green was addicted to cocaine and alcohol, and the child's urine tested positive for cocaine. The Society immediately apprehended the child.

53 On September 10, 2009, the child was discharged from the hospital and placed with a foster family.

54 On October 6, 2009, Ms. Green attended at the Motherisk laboratory and her hair was tested. The results were positive for alcohol and cocaine. Ms. Green admits that at this time, she was addicted to cocaine and had problems with alcohol.

55 On October 29, 2009, the child was transferred from foster care to the care of his paternal grandmother.

56 On December 3, 2009, Ms. Green and her boyfriend signed an Agreed Statement of Facts, which included an agreement that the court should make a finding that the child was in need of protection, on the basis that: (a) the child's urine tested positive for cocaine; (b) there were incidents of domestic violence between the parents before the child's birth; (c) the child had suffered physical harm, inflicted by the person having charge of the child or caused by that person's failure to care for, provide, supervise, or protect the child adequately; and (d) there was a risk that the child was likely to suffer physical harm, inflicted by the person having charge of the child or caused by that person's failure to care for, provide, supervise, or protect the child adequately.

57 Based on the Agreed Statement of Facts, Ms. Green consented to an Order that her son be placed in the care and custody of his paternal grandmother for six months. On February 10, 2010, an Order was made based on the Agreed Statement of Facts. The Order permitted both parents access to the child. The Order required Ms. Green to undergo hair and or urine tests.

58 On May 4, 2010, Ms. Green presented for hair testing at the Motherisk laboratory. The Results Report of the test indicated that her hair was washed for the FAEE test and that the scores were: (a) positive for FAEE at 7.69 ng/mg (analyzed by GC-MS); (b) positive for cocaine at 0.44 ng/mg; and (c) below limit of detection for benzoylecgonine. The Reference Range interpreted Ms. Green's results for cocaine as "low", meaning in the 5-25 percentile. The laboratory's Interpretation Guideline indicated that these results would not prove cocaine use. The Guideline indicated that Ms. Green was a chronic alcohol abuser.

59 The laboratory's Reference Range for these hair tests noted that higher concentrations of FAEE could occur in hair in the absence of drinking with the use of high-ethanol content haircare products, and that the laboratory recommended that use of any haircare product containing alcohol be discontinued for three months prior to hair analysis.

60 On May 20, 2010, the Society sought to extend the child protection Order, and a hearing was scheduled for July.

61 For the July hearing, Ms. Green and her boyfriend signed an Agreed Statement of Facts stating that the child was in need of protection. The statement revealed that Ms. Green's attendance at an addiction treatment program had not yet been encouraging to change her drug use and that she and her boyfriend had undergone hair tests at the laboratory and both had tested positive for cocaine and alcohol.

62 On December 7, 2010, Ms. Green presented at the laboratory for another hair test. Her results indicated that her hair was washed for the FAEE test. Her test scores were: (a) positive for FAEE at 4.388 ng/mg (GC-MS analyzed); (b) positive (trace) for cocaine (GC-MS analyzed); and (c) negative for benzoylecgonine. The Interpretation Guideline indicated that Ms. Green's trace cocaine and benzoylecgonine results would not prove cocaine use. The laboratory's Interpretation Guideline indicated that Ms. Green was a chronic alcohol abuser.

63 The laboratory's Reference Range again noted that higher concentrations of FAEE could occur in hair in the absence of drinking with the use of high-ethanol content haircare products, and that the laboratory recommended that use of any haircare product containing alcohol be discontinued for three months prior to hair analysis.

64 On April 28, 2011, Ms. Green began attending for urine tests for drug and alcohol at CML Laboratories and more frequently starting in August 2011. With one exception, the urine tests indicated no alcohol.

65 Relying on Dr. Salomone's evidence, Dr. Koren challenges the accuracy and the reliability of Ms. Green's urine tests from CML Laboratories. In Dr. Salomone's opinion, notwithstanding the negative reports, the results of Ms. Green's urine tests are consistent with alcohol abuse during the periods of February to May 2011, and August to November 2011, respectively. He

explained that since Ms. Green's urine tests were done only on weekdays, it is likely that she consumed alcohol on weekends, and obtained negative results during her weekday urine tests.

66 On April 29, 2011, Ms. Green presented at the Motherisk laboratory for another hair test. For the first time, she provided the laboratory with a list of the haircare products she was using. The test results, which were reported on June 10, 2011, indicated that her hair was washed for all analysis. The test scores were: (a) positive for FAEE at 1.899 ng/mg (GC/LC-MS analyzed); (b) positive for EtG at 60 pg/mg (determined by LC-MS/MS at USDTL); and (c) negative for all drugs tested. The Interpretation Guideline indicated that there was strong evidence of frequent excessive alcohol consumption but that evidence of chronic alcohol abuse did not equal a diagnosis of addiction.

67 The Interpretation Guideline indicated that FAEE results could be falsely elevated in hair by use of ethanol-containing hair products and it was recommended to avoid the use of any haircare product containing ethanol for three months prior to hair analysis and that it was not advisable to use the results of hair testing for alcohol markers in isolation from other evidence pertaining to alcohol consumption to determine recent drinking behaviours.

68 On August 12, 2011, the laboratory provided an interpretation letter of Ms. Green's test results to George Asare at the Toronto Children's Aid Society. The letter stated that:

This sample tested positive for EtG at a concentration of 60 pg/mg. The positive test results for both FAEE and EtG provide clear evidence for frequent, heavy alcohol use during the three-month time period represented.

69 It was Dr. Salomone's opinion that this letter was accurate.

70 On September 14, 2011, Ms. Green swore an affidavit in support of a motion for increased access to her son. In her affidavit, she swore that she had worked cooperatively with the Society to address concerns about cocaine, and the four hair samples that she had provided for analysis supported that she was not taking cocaine and that she had not used cocaine for a significant period of time. She said that she had reduced her alcohol consumption and that the December 2010 test results confirmed her cessation of cocaine use and her reduction of alcohol use. She swore that subsequent results showed a further reduction of alcohol use. She swore that she was prepared to comply with all testing requirements to establish that her alcohol consumption did not constitute an unmanageable risk for unsupervised home visits and for overnight access and that she was willing to not consume alcohol during visits with her son.

71 On September 21, 2011, at a court attendance, the terms of the parents' access were varied on consent.

72 On November 16, 2011, Ms. Green attended at the laboratory for another hair test. Her test scores were reported on December 14, 2011 and indicated that her hair was washed for all analysis. The test scores were: (a) positive for FAEE at 1.385 ng/mg (GC/LC-MS analyzed); (b) positive for EtG at 173 pg/mg (determined by LC-MS/MS at USDTL); and (c) negative for all drugs.

73 On January 4, 2012, the laboratory provided another interpretation letter of the November test to Mr. Asare at the Society. The letter concludes that the elevated levels of both FAEE and EtG provide clear evidence of frequent, heavy alcohol consumption during the three-month period represented by the test.

74 It was Dr. Salomone's opinion that this letter was accurate.

75 On December 19, 2011, Ms. Green and her boyfriend attended in court. Given that Ms. Green's hair test results continued to show "frequent excessive alcohol consumption", the Society and the parents agreed to no overnight visits with the child.

76 On January 23, 2012, Ms. Green wrote to the Society and alleged that the laboratory's test results were not accurate and that she intended to obtain a second opinion. However, she did not do so on the advice of a person whose name she cannot recall.

77 On February 24, 2012, Ms. Green attended the laboratory for another hair test. Her test scores were reported on March 16, 2012. The test scores were negative for all substances tested.

78 On March 29, 2012, Ms. Green and her boyfriend's access was increased to include overnight access. The terms of the access included a requirement that the parents would not consume alcohol during or in the 24 hours before a visit. The parents also agreed to attend for random urine screens, if requested.

79 On May 14, 2012, with the Society's consent, the child was placed in the custody of Ms. Green and her boyfriend. The terms of the court supervisory Order included the condition that the parents abstain from drugs and alcohol entirely, enroll in a relapse prevention program, and not expose the child to any form of violence.

80 On November 29, 2012, the supervision order of May 14, 2012 was terminated.

81 In April 2013, the Society closed its file on Ms. Green and her boyfriend.

### ***3. The Internal Review, the Independent Review, and the Motherisk Commission***

82 In October 2014, in *R. v. Broomfield*,<sup>9</sup> the Ontario Court of Appeal sparked a controversy and a public outcry about the reliability of the hair analysis opinions provided by the Motherisk laboratory. As a result of the public outcry, the Hospital ordered an Internal Review.

83 The Province of Ontario also responded to the scandal. On November 26, 2014 by Order in Council, the Province established the Independent Review of the Motherisk Drug Testing Laboratory at Toronto's Hospital for Sick Children. The government appointed the Honourable Susan Lang as Independent Reviewer.

84 The Motherisk laboratory ceased operating in March 2015 and closed permanently in April 2015, for all purposes except research.

85 On December 17, 2015, the Independent Reviewer released a report. Her principal findings were that: (a) the laboratory's test results were unreliable for use in child protection and criminal proceedings; (b) the procedures used were negligently managed; (c) the laboratory never met forensic as opposed to clinical standards for testing; (d) from 2005 to 2010, contrary to recognized forensic standards, the laboratory did not routinely wash hair samples to remove contamination of the sample; (e) the laboratory did not apply or properly apply chain of custody protocols; (f) the laboratory staff were not adequately supervised; (g) the laboratory staff did not have the expertise to give forensic interpretations of the test results; and (h) the use of MDTL hair-testing evidence in child protection and criminal proceedings has serious implications for the fairness of those proceedings and warrants an additional review.

86 In her report, the Independent Reviewer cautioned that she had not made any determination of civil liability or negligence and she specifically warned against using her findings for that basis. The report contained the following caution:

Consistent with the terms of the order in council, in this Report I do not express any conclusion or recommendation regarding professional discipline matters involving any person or the civil or criminal liability of any person or organization. Nothing in this Report should be interpreted as suggesting otherwise.

87 On December 17, 2015, Dr. Michael Apkon, the CEO of the Hospital, issued the following statement:

We deeply regret that the practices in the Motherisk drug testing laboratory didn't meet the high standard of excellence that we have here at SickKids, and we extend our sincere apologies to the children, families and organizations who feel that they may have been impacted in some way.

88 On January 15, 2016, by Order in Council, the Government of Ontario established the Motherisk Commission led by Commissioner Justice Judith Beaman with a mandate that included reviewing all individual cases where a request is made by a person who may have been affected by the hair testing at the Motherisk laboratory. The Commission's mandate also included offering support and assistance to families affected by flawed hair testing.

89 On January 22, 2016, an article in the *Toronto Star* reported that in an interview Dr. Apkon had stated: "We apologize deeply . . . and acknowledge responsibility for the hospital's role. We appreciate that in some cases, we may need to participate in compensating impacted families."

90 Under the Commissioner's leadership, the Motherisk Commission established a Case Review and Remedy Determination Process, under which, based on its own assessment of priorities or upon request from a member of the public, commission legal counsel would review files in which a positive testing result had been made by the laboratory in order to make a recommendation to the Commissioner that she determine that: (a) Motherisk testing did not have a substantial impact on the outcome of the proceedings; (b) Motherisk testing had a substantial impact on the outcome; or (c) it was unclear what role the Motherisk testing played in the outcome, in which case, further information would be gathered.

91 If the Commissioner determined that a substantial impact had occurred, the Commission would notify the affected parties. A substantial impact was defined to mean that the test materially affected the outcome of the case having regard to one or more of the following factors: (a) the creation of a status quo with respect to the child's living arrangements; (b) the position of the Children's Aid Society respecting the direction of the case; and, (c) the decision of the court.

92 Where the Commissioner determined that a test did have a substantial impact on the outcome of a child protection case, the Review Process sets out services that would be offered to the affected persons including: (a) counselling assistance; (b) a meeting with the Commissioner and/or review counsel to discuss the outcome; (c) legal referral; (d) funding for legal services; and (e) any other services the Commissioner deems appropriate, having regard to the fundamental principles set out in the Terms of Reference.

93 The Commissioner also offers services where a test is determined not to have had a substantial impact on a case, including: (a) counselling assistance; (b) a meeting with the Commissioner and/or review counsel to discuss the outcome; (c) a reconsideration of the file review; and (d) any other services the Commissioner deems appropriate, having regard to the fundamental principles set out in the Terms of Reference.

94 In a June 3, 2016 letter posted on the Motherisk Commission webpage, Commissioner Beaman reported on the status of the Commission's work and findings to Executive Directors and Legal Counsel to Children's Aid Societies. In her letter, Commissioner Beaman noted that the Commission had received approximately 425 files that were considered high priority and had reviewed about one-third of them. Seven files were found to reveal a substantial reliance on the Motherisk hair test results, and in those cases, the Commission was working with the agencies, parents, children and others to move them forward so that the children in these cases were not caught in limbo.

95 According to posts made by the Motherisk Commission on its Facebook page in February 2017: (a) the Motherisk Commission had reviewed 545 cases and had identified 24 cases in which tests were a key factor in the removal of children; (b) 146 individuals had contacted the Motherisk Commission; and (c) 29 people have received counselling services.

#### **4. Mr. Wilson's Evidence**

96 In Ontario, the child protection system is governed by the *Child and Family Services Act*.<sup>10</sup> Mr. Wilson's evidence was proffered for a summary judgment motion brought by Dr. Koren in Ms. Green's individual action, but his evidence was used for the certification motion.

97 I did not allow the summary judgment motion to proceed, pre-certification. For present purposes, it is not necessary to set out Mr. Wilson's evidence, which was largely directed at explaining the child protection regime and the associated court proceedings in child protection matters.

98 Mr. Wilson explained the role and relevance of substance abuse evidence in those proceedings but for the present purposes of a certification motion, I need not explicate his evidence.

**5. Ms. Green's Proposed Class Action**

99 On December 22, 2015, Yvonne Marchand, the then proposed representative plaintiff, filed a Notice of Action against the Hospital, Dr. Koren and Mr. Gareri. Ms. Marchand later withdrew to become a putative class member and to bring her own individual action.

100 On January 20, 2016, Ms. Marchand filed a Statement of Claim.

101 On June 17, 2016, Dr. Koren delivered a Statement of Defence.

102 On June 20, 2016, the Hospital and Mr. Gareri delivered a Statement of Defence.

103 The Defendants issued Third Party Claims against 47 Children's Aid Societies.<sup>11</sup>

104 On November 16, 2016, Ms. Green delivered an Amended Statement of Claim and became the proposed representative plaintiff.

105 On December 2, 2016, Dr. Koren delivered an Amended Statement of Defence.

106 On December 9, 2016, the Hospital and Mr. Gareri delivered an Amended Statement of Defence.

107 In light of Ms. Green confining her damages to the several liability of the Defendants, the Defendants discontinued their Third Party Claims against the 47 Children's Aid Societies.

108 In her Statement of Claim, Ms. Green claims the following relief:

(a) an order certifying this action as a class proceeding and appointing her as representative plaintiff for the Class and the Family Law Class;

(b) a declaration that the Defendants were negligent in the operation and supervision of MDTL;

(c) a declaration that the Defendants are liable to the Plaintiff, the Class and the Family Law Class for damages for their negligence in the operation and supervision of MDTL;

(d) a declaration that the Defendants are liable to the Family Class for damages resulting from the injuries to members of the Family Class;

(e) damages for negligence in the amount of \$200,000,000, or such other sum as this Honourable Court may find appropriate;

(f) damages pursuant to section 61 of the *Family Law Act*, R.S.O. 1990, c. F.3 and/or the equivalent legislation in other provinces;

(g) punitive damages in the amount of \$250,000,000;

(h) prejudgment and postjudgment interest pursuant to the *Courts of Justice Act*, R.S.O. 1990, c. C.43;

(i) costs of the action on a substantial indemnity basis or in an amount that provides full indemnity to the plaintiff;

(j) the costs of notice and of administering the plan of distribution of the recovery in this application, plus applicable taxes, pursuant to section 26 of the *Class Proceedings Act*, 1992, S.O. 1992, c. 6; and,

(k) such further and other relief as this Honourable Court may deem just.

109 Ms. Green proposes the following class definition:

- (a) All persons who reside in Canada who tested positive from a hair-strand drug and/or alcohol test administered by the Motherisk Drug Testing Laboratory between January 2005 and April 2015 (the "Class" or "Class Members")
- (b) All parents, grandparents, children, grandchildren, siblings and spouses (within the meaning of section 61 of the *Family Law Act*, R.S.O. 1990, c. F-3, as amended) of a Class Member (the "Family Law Class" or the "Family Law Class Members")

110 Ms. Green's Statement of Claim pleads a claim of so-called systemic negligence. In her Statement of Claim, Ms. Green alleges that the Defendants were negligent in that: (a) the laboratory staff were not qualified to interpret the hair test results; (b) the laboratory negligently relied on the unconfirmed test results of its enzyme-linked immunosorbent assay ("ELISA"), which should only be used as a preliminary screening test; (c) the laboratory had no written standard operating procedures for the hair tests it carried out and did not keep reliable contemporaneous documentation; (d) the laboratory technicians who were assigned to carry out the ELISA tests were not properly supervised resulting in reporting anomalies or errors; (e) the laboratory failed to wash hair samples routinely before analysis; (f) the laboratory had inadequate chain-of-custody procedures; (g) the laboratory had inadequate record keeping practices; and (h) after 2010, the laboratory used gas chromatography-mass spectrometry ("GC-MS") to purportedly confirm test results, but the procedure was flawed.

111 Ms. Green claims compensatory damages for: (a) pain and suffering; (b) impaired ability to participate in normal family affairs and relationships; (c) loss of custody, be it temporary or permanent, on false pretenses, resulting in loss of dignity and interference with familial relations; (d) unnecessarily protracted and more complex legal proceedings, resulting in increased legal costs, including the need for expert responding evidence; (e) requirement of supervised visitation on false pretenses, resulting in loss of dignity and interference with familial relations; (f) exacerbation of depression, anxiety, emotional distress and mental anguish, leading to impairment of mental and emotional well-being; (g) destruction of credibility, character and trustworthiness; (h) loss of friendship and companionship; and (i) an impaired ability to obtain and sustain employment, resulting either in lost or reduced income and ongoing loss of income.

112 I pause here to note that all of the various heads of damages are intensely individualistic and idiosyncratic as is the quantification of the entitlements to compensation. As the discussion below will reveal, the individual nature of both the causation and the quantification of the damages is a critical factor in the analysis of whether Ms. Green's proposed class action satisfies the criteria for certification as a class action.

113 Ms. Green proposes six common issues; namely:

1. By its operation or management of the Motherisk Drug Testing Laboratory between January 2005 and April 2015, did the Defendants breach a duty of care it owed to the Class?
2. If the answer to Common Issue No. 1 is "yes", are the Family Class members entitled to damages pursuant to section 61 of the *Family Law Act*, R.S.O. 1990, c. F-3?
3. If the answer to Common Issue No. 1 is "yes", can the court make an aggregate assessment of damages suffered by all class members as part of the common issues trial?
4. If the answer to Common Issue No. 3 is "yes", in what amount?
5. If the answer to Common Issue No. 1 is "yes", does the Defendants' conduct justify an award of punitive damages?
6. If the answer to Common Issue No. 5 is "yes", what amount of punitive damages ought to be awarded against the Defendants?

114 In their Statements of Defence, the Defendants raise factual defences and legal defences about the duty of care, standard of care, general causation, specific causation, the heads of recoverable damages, the apportionment of liability and also defences based on the class members' claims being: (a) statute-barred under the *Limitations Act, 2002*; <sup>12</sup> (b) precluded by issue estoppel; or by the Defendants being protected by: (c) expert witness immunity; and (d) statutory immunity under s. 142 of the *Courts of Justice Act*, <sup>13</sup> which provides that a person is not liable for any act done in good faith in accordance with an order or process of a court in Ontario.

115 Ms. Green's litigation plan sets out a proposed scheme to manage the action from pre-certification, certification, discovery, the common issues trial, and for the steps following a favourable disposition of the common issues. For present purposes, it is adequate to set out only the portion of the plan that describes the steps prescribed for after the common issues trial. The litigation plan states:

*LITIGATION STEPS FOLLOWING THE DETERMINATION OF COMMON ISSUES FAVOURABLE TO THE CLASS*

....

*Valuation of Damages*

24. Assuming that one or more of common Issues (a) and (c) are resolved in favour of the plaintiff, the plaintiff proposes three (3) methods for assessing and distributing damages for the class members as follows: (a) global punitive damages (to be determined as Common Issue (b) and (I) to be distributed on a pro rata basis; (b) aggregate damages for the individual claimants and their family law claimants (to be determined as Common Issue (e) to be distributed on a pro rata basis); and/or (c) Claims Forms damages of individual claimants and their family law claimants to be determined in individual assessments.

25. The Claims Form will ask each claimant to establish their membership in the class by setting out their allegations and the damage they claim to have suffered.

26. The Claims Form must be filed with the Administrator within six (6) months of the Notice of Resolution, failing which the claimant will be deemed to have waived his or her claim.

27. The Administrator shall, after a review of the Claims Forms and all supporting documentation, determine if the claimant qualifies as a class member (the "Approved Claimant").

*Resolution of the Individual Issues*

28. The plaintiff has requested an aggregate assessment of monetary relief as a common issue. Even with that assessment, it may still be necessary to establish a procedure in accordance with section 25 of the *Class Proceedings Act, 1992*, S.O. 1992, c. 6 to determine the individual damages of Class Members. A simplified process for such claims is set out below.

*Individual Damage Assessments*

29. The plaintiff proposes the following process for individual damages and causation assessments:

- (a) Within a time prescribed by the court, each Approved Claimant will be invited to attend in a place designated by the Court for an impact interview (the "Impact Interview"), to be conducted by a multidisciplinary panel of three (3) practitioners with experience dealing with adoption, custody, access, and related issues (the "Interview Panel");
- (b) The members of the Interview Panels will be chosen by the plaintiffs' counsel in consultation with the defendants and the court, to ensure the appropriate make up and experience of the Interview Panels;

- (c) The Interview Panel will conduct an Impact Interview with each Approved Claimant and will prepare, within thirty (30) days of the Impact Interview, a joint report setting out the Claimant's experiences and the Interview Panel's conclusions as to the impact of the Approved Claimant's experiences (the "Joint Impact Report");
- (d) Within thirty (30) days of the Joint Impact Report, plaintiffs' counsel and defendants' counsel will meet to determine the damages associated to each Approved Claimant (the "Damages Meeting"), if any;
- (e) If the parties are able to agree on the appropriate level of damages for an Approved Claimant, the defendants shall, within thirty (30) days of such agreement, make payment to the class member;
- (f) If the parties are unable to agree on the appropriate level of damages for an Approved Claimant, within thirty (30) days of the Damages Meeting, plaintiffs' counsel and defendants' counsel will attend before a referee designated by the Court to determine causation and the damages attributable to each Approved Claimant (the "Damages Hearing");
- (g) No further evidence is permitted at the Damages Hearing save for the Joint Impact Report and three (3) page statement from the parties' own designated damages/causation expert;
- (h) The time and place of the Damages Hearing will be set by the referee, but all Damages Hearings are to be scheduled within thirty (30) days of the Joint Impact Report;
- (i) The procedures and conduct of the Damages Hearing will be set by the referee subject to the following:
  - (i) All evidence and submissions shall be presented at the Damages Hearing which shall not take more than two (2) hours in total;
  - (ii) Offers to settle are permitted up to one (1) week prior to the scheduled Damages Hearing;
  - (iii) Two (2) weeks prior to the Damages Hearing, each party shall serve and file with the referee a three (3) page statement from the parties' own designated damages expert, if the party so chooses;
  - (iv) The referee may also make requests for further documentation from the parties at any time;
  - (v) Each party shall have an opportunity to provide oral submissions, not to exceed forty-five (45) minutes per party;
  - (vi) The conduct of the Damages Hearing and all procedures shall be determined by the referee having regards to the purposes and goals of the *Class Proceeding Act, 1992*, subject to any order of the Court providing otherwise;
  - (vii) The referee shall render a decision, with reasons, within sixty (60) days after the Damage Hearing;
  - (viii) The referee's decision is final and binding on the parties;
  - (ix) Should the referee's decision be in favour of the Approved Claimant, the defendants shall pay any damages awarded to the Approved Claimant within thirty (30) days of the referee's decision.

#### *Individual Issues Resolution*

30. For the resolution of any individual issues, aside from issues of damages and causation, the plaintiff proposes the following process:

- (a) Within thirty (30) days of the Joint Impact Report, the defendants shall serve on plaintiffs' counsel a statement of dispute of each Approved Claimant setting out what individual issues the defendants are asserting, aside from damages issues, which would limit the Approved Claimants' recovery of damages (the "Statement of Dispute");

(b) Within thirty (30) days of the Statement of Dispute, a referee appointed by the Court shall convene an individual issue hearing (the "Individual Issue Hearing"), with the following process:

(i) The time and place of the Individual Issue Hearing shall be set by the referee, but all Individual Issue Hearings are to be scheduled within thirty (30) days of receiving the Statement of Dispute;

(ii) In advance of the claims process, the referee, in consultation with plaintiffs' counsel, defendants' counsel and the Court, shall establish procedures for the determination of the Individual Issue Hearings, in a manner having regard to the purpose and goals of the *Class Proceedings Act, 1992*, subject to any order of the Court providing otherwise;

(iii) The referee shall render a decision, with reasons, within sixty (60) days after the Individual Issue Hearing;

(iv) The referee's decision is final and binding on the parties;

(v) Should the referee's decision be in favour of the claimant, a Damages Meeting will take place within thirty (30) days of the referee's decision and the damages will be made in accordance with the Individual Damages Assessments procedure set out above.

## ***6. Other Actions Commenced against the Hospital***

116 In addition to the proposed class action, civil actions against the Defendants and others have been commenced with respect to what occurred at the Motherisk laboratory. The plaintiffs include: Frederick Barham, Kera Barnes, and Krista Lee Barnes, Tamara Broomfield, Christopher Hewitt, Jeffrey Hudson and C.H.H., Yvonne Marchand (she also commenced a judicial review proceeding), Ashley Simon Mason, William McIntyre and Natacha LeRoy, Andrew Ross Rebagliati, Christine Rupert (she also brought a judicial review proceeding), Jessica Symanek, Chastity Timmons (hers is a judicial review application), and Tammy Whiteman.

117 Ms. Mason's action joins 101 co-plaintiffs. Mr. Rebagliati's action joins 58 co-plaintiffs. Ms. Symanek's action joins 106 co-plaintiffs.

118 In all, there are 328 plaintiffs proceeding with individual or joinder actions outside of the proposed class action.

## **E. Discussion and Analysis**

### ***1. Overview***

119 The court has no discretion and is required to certify an action as a class proceeding when the following five-part test in s. 5 of the *Class Proceedings Act, 1992* is met: (1) the pleadings disclose a cause of action; (2) there is an identifiable class of two or more persons that would be represented by the representative plaintiff; (3) the claims of the class members raise common issues; (4) a class proceeding would be the preferable procedure for the resolution of the common issues; and (5) there is a representative plaintiff who: (a) would fairly and adequately represent the interests of the class; (b) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and (c) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

120 As the discussion below will explain, in my opinion, Ms. Green's action satisfies the cause of action criterion for a class action, and with some revision, her action technically satisfies the identifiable class criterion. However, while some of her proposed common issues manifest commonality, they do not satisfy the common issues criterion. And, her action fails the preferable procedure criterion and the representative plaintiff criterion.

121 Thus, although a group of claimants has allegedly been wronged, Ms. Green's proposed class action is not suitable for certification and her certification motion must be dismissed.

122 As I shall explain, the major deficiency in Ms. Green's proposed class action is its failure to satisfy the preferable procedure criterion. This deficiency is related to what I shall describe as a design failure that ripples through all the certification criteria. Ms. Green's class action, which is based on systemic negligence, misses the target of providing access to justice and compensation for the injuries actually suffered by the class members and the design of her action impedes achieving genuine access to justice.

123 In the case at bar, procedural and substantive access to justice will inevitably require individual issues trials for the class members with a significant enough injury to justify the expense of complex individual trials about liability. In the case at bar, hundreds of putative class members are already pursuing individual claims and the putative class members should not suffer the disappointment of a class action that will not take them far enough on the path to substantive justice.

124 To explain why I am dismissing Ms. Green's certification motion, I shall: first, outline the general principles about certification of an action as a class action; second, consider the admissibility and adequacy of the evidence in the case at bar; third, analyze the preferable procedure criterion and the representative plaintiff criterion; and, lastly, address the other certification criterion.

125 As I shall explain below, the design failures in the immediate case are similar to the problems in *Dennis v. Ontario Lottery and Gaming Corp.*<sup>14</sup>, which problems led the court to refuse to certify the action as a class action.

## **2. General Principles: Certification**

126 For an action to be certified as a class proceeding, there must be a cause of action shared by an identifiable class from which common issues arise that can be resolved in a fair, efficient, and manageable way that will advance the proceeding and achieve access to justice, judicial economy, and the modification of behaviour of wrongdoers.<sup>15</sup> On a certification motion, the question is not whether the plaintiff's claims are likely to succeed on the merits, but whether the claims can appropriately be prosecuted as a class proceeding.<sup>16</sup> The test for certification is to be applied in a purposive and generous manner, to give effect to the goals of class actions; namely: (1) providing access to justice for litigants; (2) encouraging behaviour modification; and (3) promoting the efficient use of judicial resources.<sup>17</sup>

127 The purpose of a certification motion is to determine how the litigation is to proceed and not to address the merits of the plaintiff's claim; there is to be no preliminary review of the merits of the claim.<sup>18</sup> However, the plaintiff must show "some basis in fact" for each of the certification criteria other than the requirement that the pleadings disclose a cause of action.<sup>19</sup> The "some basis in fact" test sets a low evidentiary standard for plaintiffs, and a court should not resolve conflicting facts and evidence at the certification stage or opine on the strengths of the plaintiff's case.<sup>20</sup> In particular, there must be a basis in the evidence to establish the existence of common issues.<sup>21</sup> To establish commonality, evidence that the alleged misconduct actually occurred is not required; rather, the necessary evidence goes only to establishing whether the questions are common to all the class members.<sup>22</sup> The representative plaintiff must come forward with sufficient evidence to support certification, and the opposing party may respond with evidence of its own to challenge certification.<sup>23</sup> Certification will be denied if there is an insufficient evidentiary basis for the facts on which the claims of the class members depend.<sup>24</sup>

128 On a certification motion, evidence directed at the merits may be admissible if it also bears on the requirements for certification but, in such cases, the issues are not decided on the basis of a balance of probabilities but rather on that of the much less stringent test of "some basis in fact".<sup>25</sup> The evidence on a motion for certification must meet the usual standards for admissibility.<sup>26</sup> While evidence on a certification motion must meet the usual standards for admissibility, the weighing and

testing of the evidence is not meant to be extensive, and if the expert evidence is admissible, the scrutiny of it is modest.<sup>27</sup> In a class proceeding, the close scrutiny of the evidence of experts should be reserved for the trial judge.<sup>28</sup>

### **3. Admissibility and Adequacy of the Evidence**

129 The Defendants submitted that Ms. Green has adduced no expert report and rather relies on the *Independent Review*, which they submit is inadmissible. The Defendants submit that Ms. Green has not satisfied the evidentiary threshold required for certification of her proposed class action.

130 I disagree. Save as noted below, there was ample evidence to satisfy the some basis in fact standard for the certification criteria. I have already addressed the admissibility of the *Independent Review*. Based on its appropriate use and the Defendants' own documents and admissions, there is ample evidence for an analysis of the certification criterion.

131 The Defendants also submit that Ms. Green does not demonstrate that there is a group of similarly situated individuals, as is required by the *Class Proceedings Act, 1992*, for the certification of a class action.

132 I disagree. There is ample evidence from Ms. Green's evidence and from the Defendants' documents that there are numerous individuals that have potential claims against the Defendants about the Motherisk test results. And, I note that Ms. Green is the substitute for Ms. Marchand and that Ms. Marchand and Mr. Barham, Ms. Broomfield, Ms. Mason, Mr. McIntyre, Mr. Rebagliati, Mr. Rupert, Mr. Symanek, and Mr. Whiteman are potential class members if they do not opt out to pursue their individual actions.

### **4. Preferable Procedure Criterion**

#### *(a) Introduction*

133 As noted above, in the case at bar, the most problematic criterion for Ms. Green is the preferable procedure criterion, which is the fourth of the five criteria. To analyze this criterion, I will assume that the cause of action, the identifiable class, and the representative plaintiff criteria have been satisfied. I will also assume that proposed Common Issue No. 1 satisfies the common issues criterion. That question asks: "By its operation or management of the Motherisk Drug Testing Laboratory between January 2005 and April 2015, did the Defendants breach a duty of care it owed to the Class?" With these assumptions and based on the factual background set out above, I shall describe the general principles of a preferable procedure analysis and then apply those principles to the circumstances of the immediate case.

#### *(b) General Principles: Preferable Procedure*

134 Under the *Class Proceedings Act, 1992*, the fourth criterion for certification is the preferable procedure criterion. Preferability captures the ideas of: (a) whether a class proceeding would be an appropriate method of advancing the claims of the class members; and (b) whether a class proceeding would be better than other methods such as joinder, test cases, consolidation, and any other means of resolving the dispute.<sup>29</sup>

135 In *Fischer v. IG Investment Management Ltd.*,<sup>30</sup> the Supreme Court of Canada emphasized that the preferability analysis must be conducted through the lens of judicial economy, behaviour modification, and access to justice. Justice Cromwell for the Court stated that access to justice has both a procedural and substantive dimension. The procedural aspect focuses on whether the claimants have a fair process to resolve their claims. The substantive aspect focuses on the results to be obtained and is concerned with whether the claimants will receive a just and effective remedy for their claims if established. Thus, for a class proceeding to be the preferable procedure for the resolution of the claims of a given class, it must represent a fair, efficient, and manageable procedure that is preferable to any alternative method of resolving the claims.<sup>31</sup> Arguments that no litigation is preferable to a class proceeding cannot be given effect.<sup>32</sup> Whether a class proceeding is the preferable procedure is judged by reference to the purposes of access to justice, behaviour modification, and judicial economy and by taking into account the importance of the common issues to the claims as a whole, including the individual issues.<sup>33</sup>

136 Relevant to the preferable procedure analysis are the factors listed in s. 6 of the *Class Proceedings Act, 1992*, which states:

6. The court shall not refuse to certify a proceeding as a class proceeding solely on any of the following grounds:
  1. The relief claimed includes a claim for damages that would require individual assessment after determination of the common issues.
  2. The relief claimed relates to separate contracts involving different Class Members.
  3. Different remedies are sought for different Class Members.
  4. The number of Class Members or the identity of each Class Member is not known.
  5. The class includes a subclass whose members have claims or defences that raise common issues not shared by all Class Members.

137 To satisfy the preferable procedure criterion, the proposed representative plaintiff must show some basis in fact that the proposed class action would: (a) be a fair, efficient and manageable method of advancing the claim; (b) be preferable to any other reasonably available means of resolving the class members' claims; and (c) facilitate the three principal goals of class proceedings; namely: judicial economy, behaviour modification, and access to justice.<sup>34</sup>

138 In considering the preferable procedure criterion, the court should consider: (a) the nature of the proposed common issue(s) and their importance in relation to the claim as a whole; (b) the individual issues which would remain after determination of the common issue(s); (c) the factors listed in the *Act*; (d) the complexity and manageability of the proposed action as a whole; (e) alternative procedures for dealing with the claims asserted; (f) the extent to which certification furthers the objectives underlying the *Act*; and (g) the rights of the plaintiff(s) and defendant(s).<sup>35</sup>

139 The court must identify alternatives to the proposed class proceeding.<sup>36</sup> The proposed representative plaintiff bears the onus of showing that there is some basis in fact that a class proceeding would be preferable to any other reasonably available means of resolving the class members' claims, but if the defendant relies on a specific non-litigation alternative, the defendant has the evidentiary burden of raising the non-litigation alternative.<sup>37</sup> It is not enough for the plaintiff to establish that there is no other procedure which is preferable to a class proceeding; he or she must also satisfy the court that a class proceeding would be fair, efficient and manageable.<sup>38</sup>

140 In *Fischer v. IG Investment Management Ltd.*, Justice Cromwell pointed out that when the court is considering alternatives to a class action, the question is whether the alternative has potential to provide effective redress for the substance of the plaintiff's claims and to do so in a manner that accords suitable procedural rights. He said that there are five questions to be answered when considering whether alternatives to a class action will achieve access to justice: (1) Are there economic, psychological, social, or procedural barriers to access to justice in the case?; (2) What is the potential of the class proceeding to address those barriers?; (3) What are the alternatives to class proceedings?; (4) To what extent do the alternatives address the relevant barriers?; and (5) How do the two proceedings compare?<sup>39</sup>

141 And in light of the Supreme Court of Canada's directives in *Hryniak v. Mauldin*<sup>40</sup> and *Bruno Appliance and Furniture Inc. v. Hryniak*,<sup>41</sup> one should now add to the preferable procedure factors the factor of the relationship between access to justice, which is the preeminent concern of class proceedings, and proportionality in civil procedures. The proportionality analysis, which addresses how much procedure a litigant actually needs to obtain access to justice, fits nicely with the focus on judicial economy and with the part of the preferable procedure analysis that considers manageability and whether the claimants will receive a just and effective remedy for their claims.

142 In cases, particularly cases where the individual class members' respective harm is nominal, or cases where an aggregate assessment of damages in whole or in part is possible, a class action may more readily satisfy the preferable procedure criterion because the common issues trial may be the only viable means for remedying the wrong and for calling the wrongdoer to account because individual litigation may be prohibitively expensive.<sup>42</sup>

143 In undertaking a preferable procedure analysis in a case in which individual issue trials are inevitable, it should be appreciated that the *Class Proceedings Act*, 1992 envisions the prospect of individual claims being litigated and sections 12 and 25 of the *Act* empowers the court with tools to manage and achieve access to justice and judicial economy in those circumstances, and, thus, the inevitability of individual issues trials is not an obstacle to certification. In the context of misrepresentation claims, numerous actions have been certified notwithstanding individual issues of reliance and damages.<sup>43</sup>

144 That said, in a given particular case, the inevitability of individual issues trials may obviate any advantages from the common issues trial and make the case unmanageable and thus the particular case will fail the preferable procedure criterion.<sup>44</sup> Or, in a given case, the inevitability of individual issues may mean that while the action may be manageable, those individual issue trials are the preferable procedure and a class action is not the preferable procedure to achieve access to justice, behaviour modification, and judicial economy. A class action may not be fair, efficient and manageable having regard to the common issues in the context of the action as a whole and the individual issues that would remain after the common issues are resolved.<sup>45</sup> A class action will not be preferable if, at the end of the day, claimants remain faced with the same economic and practical hurdles that they faced at the outset of the proposed class action.<sup>46</sup>

(c) *Analysis: Preferable Procedure*

145 As noted by Justice Cromwell in *Fischer v. IG Investment Management Ltd.*,<sup>47</sup> access to justice has both a substantive and procedural dimension. In the case at bar, I shall begin the analysis of the preferable procedure criterion by focusing on substantive justice where, in my opinion, there is a design defect in Ms. Green's systemic negligence class action as a means to obtaining substantive justice. Then I shall analyze whether Ms. Green's proposed class action satisfies the procedural, managerial, and judicial efficiency aspects of the preferable procedure criterion.

146 The analysis of access to substantive justice begins with the constituent elements of a negligence claim, including a systemic negligence claim; those elements are: (1) the defendant owes the plaintiff a duty of care; (2) the defendant's behaviour breached the standard of care; (3) the plaintiff suffered compensable damages; (4) the damages were caused in fact by the defendant's breach; and, (5) the damages are not too remote in law.<sup>48</sup>

147 In the case at bar, assuming the action was certified as a class action and assuming Ms. Green was successful at the common issues trial that established that there was a class-wide breach of a duty of care, the remaining four elements of the five constituent elements of the systemic negligence claim, plus the matters of the apportionment of liability and the various defences of the Defendants, would have to be resolved by individual issues trials.

148 Also left for an individual issues trial — and this is the fatal design flaw of Ms. Green's proposed class action - is the class member's individual negligence claim which arises not from the circumstance that Motherisk's tests and reports were commonly unreliable but rather arises from the circumstance that Motherisk's particular test and report about the individual was all of unreliable, false and adversely influential to the outcome of the individual's court proceedings. The design defect in the immediate case is that compensable damages for the interference to and loss of parental rights and the associated personal agony do not follow from the representative plaintiff proving that the hair test reports were generally unreliable but rather follows from the individual class member proving that his or her test specific test results were all of unreliable, false and adversely influential. Describing the design defect somewhat differently, in the case at bar, if a class member took the benefit of a finding at the common issues trial that because of the Defendants' systemic negligence the results of all the hair tests at the Motherisk laboratory were unreliable, that judgment leads to little or no compensatory damages.

149 This truth about the causation of the harm explains why the Motherisk Commission established a Case Review and Remedy Determination Process to identify the cases where the Motherisk testing had "a substantial impact" on the outcome and why primarily in those cases the Commission notified the affected persons. The Motherisk Commission recognized that an unreliable test that did not influence the result of the court proceedings does not occasion a harm for which there might be compensatory damages. In the case at bar, Ms. Green's focus on the systemic negligence of unreliable hair tests misses the point that the significant damages are caused not by the common unreliability of the tests, but by an individual's test being wrong with sometimes tragic consequences.

150 An analogy may be helpful in understanding the design problem. Imagine that the Motherisk laboratory took blood samples to test for the presence of drugs and it was discovered, after the fact, that the laboratory's tests were unreliable and that the technicians had used unsterile equipment for testing the 18,000 patients. Based on those facts, a systemic negligence class action based on the fact that the blood tests were unreliable misses the point that the compensable damages are for those individual class members who were infected or who, individually, upon receiving notice, suffered an emotional shock of sufficient intensity to qualify for damages. In the analogous case, the unreliability of the test results would be neither here nor there in providing access to justice for the actual harm caused by the hospital's negligence in spreading disease.

151 This point can also be illustrated by Ms. Green's case. Assuming she was successful in showing that on a class-wide basis that the Defendants breached a duty of care by producing unreliable tests, Ms. Green, as a class member, would then have an individual issues trial to prove causation of damages from an unreliable test result. Ms. Green would have to prove causation of harm from an unreliable blood test and the quantum of the damages from that harm. However, there are little damages caused simply by an unreliable test result. She could also, of course, - at the individual issues trial — prove that she had been harmed by a false and adversely influential test result. The hard work of proving that the unreliable test actually adversely influenced the result of the court proceedings is a matter that Ms. Green would have to prove at her individual issues trial and the burden of that hard work is not lightened by the results of the common issues trial that established that the Defendants' tests were generally unreliable.

152 *Dennis v. Ontario Lottery and Gaming Corp.*<sup>49</sup> demonstrates how design defects in the theory of the common issues of a proposed class action may cause the action to fail one or more of the certification criterion even if the cause of action and identifiable class criterion are satisfied. In that case, the Ontario Lottery and Gaming Corp. ("OLGC"), which is a crown agency that operates gambling establishments to raise revenues for the province of Ontario, offered a "self-exclusion" program to gamblers who had self-identified themselves as having an addiction to gambling. Over 10,000 gamblers signed up for the program, including Mr. Dennis, who suffered from a personality disorder known as "problem gambling." Under the program, OLGC indicated that it would use its best efforts to deny the self-excluded person entry to all of its gaming venues in the province. Notwithstanding having entered into the program, Mr. Dennis was not denied admission to OLGC's venues, and he continued to gamble. He incurred devastating losses, which in turn led to the loss of his job, the loss of the family's home, strained family relations, and serious mental and physical health issues for Mr. Dennis, his wife, and his children. After he sought psychiatric help and received treatment for his disease, Mr. Dennis brought a proposed class action on behalf of all the persons who had signed up for the program. He sued for breach of contract, negligence, occupier's liability, and waiver of tort. He claimed damages including punitive damages of \$3.5 billion for the class period.

153 Justice [*Calvert v. William Hill Credit Ltd.*, [2008] All E.R. 170 (Eng. Ch. Div.), affd. (2008), [2009] Ch. 330 (Eng. C.A.)] Cullity heard the certification motion, and although he had doubts about Mr. Dennis' various causes of action, he concluded that it was not plain and obvious that Mr. Dennis had not pleaded tenable causes of action. Justice Cullity also concluded that the identifiable class criterion and the representative plaintiff criterion had been satisfied. However, he concluded that the common issues and preferable procedure criteria were not satisfied. For present purposes the heart of Justice Cullity's reasons are found at paragraphs 191-193, 221, 231, and 234-238, which state:

191. In my opinion, the vulnerability of class members is essential to the validity of their claims. Persons who were not problem gamblers would have no tenable claims and there could be no question of certifying the proceeding in respect of such persons. The evidence is that the disorder is progressive and that there is a range of its severity. There is nothing in the

class definition or the formulation of the common issues to confine the claims asserted to members of the class who were vulnerable to any particular degree, if at all, and, in my judgment, the class definition is to that extent objectionably over-inclusive, and the proposed common issues lack commonality. While it can no doubt be presumed that most self-excluded persons were at least apprehensive about their vulnerability, the degree of their addiction, if any, and the significance to be attributed to the concept of personal autonomy could only be determined on an individual basis.

192. If Mr. Dennis, or any of the other class members, had advanced the same claims in individual actions, OLG would have been entitled to raise issues relating to personal autonomy and degrees of vulnerability in connection with elements of liability such as reasonable foresight of harm; proximity; unconscionability; a willing assumption of risk for the purposes of s. 4(1) of the *OLA*; causation of proven losses; contributory negligence; and punitive damages. The right of OLG to pursue such issues on an individual basis is not, in my opinion, excluded by pursuing the claims under the procedure of the *CPA* and defining the class, and the common issues, without reference to the vulnerability of the class members. Nor, for the reasons I will give, can the issues be resolved by reference to statistical probabilities.

193. In *Hollick*, at para. 21, it was accepted that over-inclusive classes can be permitted where the class "could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issue". I do not understand this principle to permit an over-inclusive class to be accepted if the reason why it could not be drafted more narrowly is the inability to provide a limiting class criterion that will establish the rational link with the proposed common issues on which commonality depends. In such a situation, instead of common issues determinable on a class-wide basis, there will be individual issues affecting liability to each member of a diverse group. In my judgment, that is the case here.

....

221. In short, if, as I believe, the degree of vulnerability of members of the primary class is relevant to such other elements of liability, it is not permissible to conclude on the basis of statistical sampling, or a five-minute labelling test, that any of the class members was a vulnerable problem gambler to any particular degree. Individual inquiries would be necessary for this purpose and this would then be an example of the situation referred to by the Chief Justice in *Rumley v. British Columbia*, [2001] 3 S.C.R. 184, [2001] S.C.J. No. 39 (at para. 29), where a determination of the proposed common issues would degenerate into a consideration of the claims of each of a potentially diverse group of individuals. There would have to be an inquiry into the personal circumstances, the gambling history, the extent of the addiction or compulsion to gamble of each class member at particular times, and, if the approach to causation in *Calvert*, [citation omitted in original<sup>50</sup>] his or her likely behaviour if OLG had exercised its best efforts or exercised reasonable care. An attempt to avoid problems of class definition and commonality at the certification stage by relying on statistical evidence at trial for the purpose of narrowing the class is not, in my opinion, acceptable.

....

231. For the reasons given, I am of the opinion that the attempt to define the common issues in a manner that would avoid an inquiry into the status of each class member as a "problem gambler" has not been successful. I am satisfied that a proceeding that requires a consideration of the nature, degree and consequences of each class member's gambling propensities is individualistic to an extent that it is not amenable to resolution under the procedure of the *CPA*. The common issues would have to be so truncated that their resolution would not sufficiently advance the claims of the class members. They would, for the most part, be limited to the interpretation of the forms and the adequacy of OLG's efforts to enforce self-exclusion.

....

234. I agree with counsel for OLG that these individual issues do not lend themselves to a summary determination as is contemplated by s. 25 of the *CPA*. I am satisfied that they cannot be dealt with fairly and adequately without evidence, and a detailed consideration, of the degree of vulnerability, and the circumstances, of each class member. As I have indicated, the

attempt to avoid the individual issues by pleading that all class members were problem gamblers in a severe, or pathological, sense must be rejected. Evidence is required for each of the requirements for certification other than that in s. 5(1)(a).

235. Similarly, the excessively individualistic aspects of the claims asserted by the plaintiffs are not avoided by their counsel's characterization of the claims as "systemic". Where, in cases such as *Rumley v. British Columbia, supra*, such a characterization has been found to be appropriate and helpful, it has been predicated on a material lack of diversity among the members of the class. That is not the case here.

236. The evidence does not support a conclusion that all class members were pathological problem gamblers, and the omission to refer to problem gambling in the formulation of the common issues does not alter the fact that the identification of the class members as vulnerable is fundamental to the plaintiffs' case for certification as well as, in the ultimate analysis, the tenability of their individual claims.

237. This is a situation in which, in my opinion, the procedure under the *CPA* would have disadvantages rather than any significant advantages over individual actions in which the focus would be entirely on the circumstances and experience of a particular individual rather than simultaneously on those of a potentially large class of persons with diverse backgrounds and gambling histories for whom liability could only -- but could not properly -- be established by the use of statistical evidence.

238. In view of the nature of the individual inquiries, and the difficulties of proof relating to the existence of losses, I am not persuaded that certification would appreciably advance the legislative objective of judicial economy. The procedure under the *CPA* has its own associated special costs -- including but not limited to those of giving notice. In view of these costs, and the uniqueness of the personal circumstances and gambling history of each of the class members, I am of the opinion that the expense and complexity of attempting to dispose of all their claims in one inevitably protracted proceeding is likely to outweigh any economy achieved by a resolution of the questions of interpretation, and the adequacy of OLGC's efforts to perform its obligations, in a single trial.

154 The circumstances of the putative class members in the immediate case are similar to the circumstances of the putative class members in *Dennis v. Ontario Lottery and Gaming Corp.* where certification of a class action was refused. Ms. Green's proposed class action requires an individualistic consideration of the influence of the false test results on the predicament of each class member. Those individual issues trials are not amenable to any summary determination as contemplated by s. 25 of the *Class Proceedings Act, 1992*. The determination of the proposed common issues would degenerate into a consideration of the claims of each of a potentially diverse group of individuals. The common issues would not sufficiently advance the claims of the class members and combining a common issues trial with individual issues trials makes the proceeding unmanageable and disadvantageous in comparison to the alternative of individual actions. And there is no appreciable advance in the objective of judicial economy by interposing a common issues trial. The Defendants at the individual issues trials are entitled to raise the defence that the unreliable test results caused no injury in the particular case. They are also entitled to raise other defences and issues associated with the apportionment of damages to the Children's Aid Societies. Falsity and an adverse impact are essential to the validity of the class members' claims and thus the class definition, while technically sufficient, is over-inclusive and the proposed common issue lacks the commonality to connect to a meaningful claim to compensation for the class. None of these problems in the case at bar are avoided by characterizing the class members' claims as systemic.

155 Justice Cullity's decision was affirmed by the Divisional Court and by the Court of Appeal. In the Court of Appeal on the crucial issue of whether a class action was preferable to going directly to individual issues trials, Justice Sharpe stated at paras. 53 and 71:

53. There are certainly cases in which a class action will be an appropriate procedure to deal with a "systemic wrong", a wrong that is said to have caused widespread harm to a large number of individuals. When a systemic wrong causes harm to an undifferentiated class of individuals, it can be entirely proper to use a class proceeding that focuses on the alleged wrong. The determination of significant elements of the claims of individual class members can be decided on a class-

wide basis, and individual issues relating to issues such as causation and damages can be dealt with later on an individual basis, especially when the assessment of damages can be accomplished by application of a simple formula.

....

71. Even if the class definition and common issue requirements were satisfied, it is my view that a class action is not the preferable procedure. A general finding of "systemic wrong" would not avoid the need for protracted individualized proceedings into the vulnerability and circumstances of each class member. A more efficient and expeditious way to adjudicate these claims would be to proceed directly by way of individual actions as it is inevitable that a class proceeding will break down into individual proceedings in any event.

156 It may be noted that Justice Cullity in refusing certification in *Dennis v. Ontario Lottery and Gaming Corp.* referred to *Rumley v. British Columbia*,<sup>51</sup> which is a famous example of a systemic negligence case that was certified as a class action. Notwithstanding the *Rumley* decision and other systemic negligence cases, Justice Cullity and the appellate courts did not certify Mr. Dennis's systemic negligence claim. In the case at bar, Ms. Green also relies on the *Rumley* decision, and she very heavily relies on an application of *Rumley* by the New Brunswick Court of Appeal in *Gay v. Regional Health Authority* 7.<sup>52</sup> It is, therefore, necessary to consider these cases and compare them to the circumstances of Ms. Green's proposed class action.

157 Ms. Rumley was a student at the Jericho Hill School, a residential school for the deaf and blind operated by the Province of British Columbia. The Ombudsman investigated the school, and in a 1993 report, he concluded that sexual, physical, and emotional abuse of children was prevalent at the school throughout its history. In 1995, Thomas Berger, Q.C., the Attorney General's special counsel, issued a report that concluded that sexual abuse had been rampant at Jericho Hill School. After the report was issued, the Attorney General of British Columbia acknowledged that the province was responsible for the care and well-being of the children at the school and that the province was responsible for the abuse that had occurred there. Ms. Rumley commenced a class action on behalf of the abused children.

158 In *Rumley v. British Columbia*, the Supreme Court of Canada agreed with the decision of the British Columbia Court of Appeal that the action could be framed as a systemic negligence action and class members would not have to prove a sexual assault by a particular individual; rather, there was a common issue based on the systemic negligence of the school's failure to have in place procedures that would have prevented sexual abuse. Justice McLachlin, as she then was, wrote the judgment of the Supreme Court. She agreed with Justice MacKenzie of the British Columbia Court of Appeal that all class members shared an interest in the question of whether the school was systemically negligent in failing to have systems in place to prevent sexual abuse, which alleged failure could be determined without reference to the circumstances of any individual class member.

159 Ms. Green's case, however, is to the opposite effect of a systemic negligence claim like *Rumley v. British Columbia*, and the class members' claims cannot be determined without reference to individual circumstances. Ms. Green submits that she can rely on the "but for" test or in the alternative the "material contribution" test for causation to move from a finding that the Defendants breached a duty of care to produce a reliable test to causation of harm across the class.<sup>53</sup> The fallacy in this argument, however, is the harm is caused by the unreliable test being both individually false and individually influential to an adverse outcome in the individual's court proceedings, which are matters to be proven at the individual issues trial.

160 Although there are substantial similarities in some of the factual circumstances of Ms. Green's proposed class action and the certified class action in *Gay v. Regional Health Authority* 7, *supra*, there are fundamental differences in the two cases that make the *Gay* decision, about which I have no criticism, distinguishable. The New Brunswick decision is ultimately of no assistance to Ms. Green.

161 The facts of *Gay v. Regional Health Authority* 7 were that a hospital was opened in Miramichi, New Brunswick, in 1995. Dr. Menon was hired as its Chief of Pathology, Director of Clinical Laboratory Services, and anatomical pathologist. From the outset of his appointment, there were complaints about the quality of his work, but the complaints were not taken seriously. It was not until 2006, when there was an external peer review, that the hospital took remedial steps. The results of the independent review also prompted the provincial government to have all specimens handled by Dr. Menon from 1995 to

2007 reviewed by experts at an independent laboratory in Ontario. The hospital notified the 15,000 implicated patients and their personal physicians or referring surgeons and recommended consultation, which in turn entailed retesting and travel and incidental expenses for the patients and attendant emotional distress and alarm from the news. The province also ordered a Commission of Inquiry that produced a comprehensive report. The Commission found serious and alarming deficiencies in Dr. Menon's work over the years and a pattern of errors that, arguably, should have been detected and corrected sooner.

162 In these circumstances, Albert Gay, Kimberley Doyle, and James Wilson commenced a proposed class action as a hospital-based medical malpractice case founded on systemic failures with class wide effects. The plaintiffs sued for medical malpractice in tort, breach of contract, breach of fiduciary duties, and equitable fraud. In their Statement of Claim, the plaintiffs alleged that all the class members had suffered out-of-pocket expenses and compensable mental distress and anxiety. The Statement of Claim also alleged that some patients had been misdiagnosed because of Dr. Menon's negligence in examining their particular specimens and these members of the class sustained even greater harm, losses and expenses. The class action, however, did not pursue claims for negligence in the assessment of particular specimens, which claims could be pursued by individual class members.

163 Reversing the motions judge,<sup>54</sup> the New Brunswick Court of Appeal certified the action as a class action.<sup>55</sup> In certifying that action, the majority of the Court of Appeal was satisfied that all of the certification criteria were satisfied. In reaching their decision to certify, they noted that some members of the proposed class, such as Mr. Wilson, required additional liability and quantum-related procedures in order to achieve a just result for them, but that this work for individual trials did not constitute a valid reason to deny certification. The majority also noted that every putative class member had a cause of action for the recovery of out-of-pocket expenses that required adjudication and that there were indications that some putative class members had actually suffered particularly severe non-physical harm, in addition to physical injury from the systemic negligence. The majority said that these claims should stand and be processed by way of class action even if it were concluded that damages were not recoverable for so-called every-day mental distress and anxiety on a class-wide basis. The majority concluded that access to justice for the out-of-pocket expenses of all class members and for the genuinely serious emotional harm suffered by some class members would be impossible without a class action and to close the door on recovery for those claims was untenable.

164 In my opinion, the example set by the precedent of *Gay v. Regional Health Authority*<sup>7</sup> does not assist Ms. Green in the immediate case. Unlike the plaintiffs in the New Brunswick case, she cannot connect the alleged systemic negligence of unreliable test results to the damages for which compensation is sought by the class members and the door to recovery that needs opening is success at individual issues trials. Unlike the plaintiffs in the New Brunswick case, who would substantially advance their case by success at the common issues trial, for the reasons set out above the same is not true for Ms. Green and the putative class members. Unlike the plaintiffs in *Gay v. Regional Health Authority*<sup>7</sup>, a finding that there had been systemic negligence would not connect the dots to compensable damages.

165 The circumstance that while there may be a duty of care to provide reliable tests and to interpret them reliably but that the compensatory damages are individual to the person whose test results are false and adversely influential is also demonstrated by other cases relied on by Ms. Green. In *Elliott v. Laboratory Specialists, Inc.*<sup>56</sup> the Louisiana Court of Appeal stated: "The risk of harm in our society to an individual because of a false positive drug test is so significant that any individual wrongfully accused of drug usage by his employer is within the scope of protection of the law" [my emphasis added]. In *Stinson v. Physicians Immediate Care, Ltd.*,<sup>57</sup> the Illinois Court of Appeal noted that the rationale for imposing a duty of care on a testing laboratory was oriented to individual claims of harm:

The drug testing laboratory is in the best position to guard against the injury, as it is solely responsible for the performance of the testing and the quality control procedures. In addition, the laboratory, which is paid to perform the test, is better able to bear the burden financially than the individual wrongfully maligned by a false positive report. [Emphasis added]

166 A point to emphasize in the analysis of preferable procedure is that to whatever degree the common issues trial would advance the claims of a class member to substantive access to justice, i.e., to compensation for his or her injury, that progress will be infinitesimal compared to what the class member must establish at his or her inevitable individual issues trial, where

the class member would be exposed to an adverse costs award if he or she were unsuccessful. In my opinion, a class action is not the preferable procedure for access to substantive justice.

167 For many of the same reasons, I also conclude that a class action is not the preferable procedure for access to procedural justice. In this regard, I note again that if Ms. Green is successful at the common issues trial, then complex individual issues trials are inevitable for the class members. In this regard, I disagree with Ms. Green's litigation plan that aborts the Defendants' procedural rights to defend themselves from a \$450 million systemic negligence claim. As I shall discuss further below, the individual issues trials are beyond the resources of sections 12 and 25 of the *Class Proceedings Act, 1992* to tailor and trim the individual issues trials.

168 In the case at bar, in my opinion, the circumstance that complex individual issues are inevitable takes the case into the territory where the individual issues would completely overwhelm the common issues and make the case unmanageable.<sup>58</sup> A costs benefits analysis indicates that little benefit is added by subjecting the individual claims to the delay of a class action's common issues trial. This harsh truth also reveals that the current class actions regime is not a panacea for all access to justice barriers.

169 Moreover, it is already apparent that a significant number of putative class members who may have substantial claims that are economically viable to litigate in the Superior Court are likely to opt out. Ms. Green submits, however, that while this might be a reason to decertify the action, it is not a reason to refuse to certify the action. I agree with Ms. Green's submission as a general proposition, but in the case at bar, the submission misses the points that regardless of whether or not the class members with substantial claims opt out, the remaining class members who have modest claims will still be confronted with individual issues trials that are not economically viable to litigate. In other words, a class proceeding would only delay matters and not remove the barriers to access to justice for perhaps the overwhelming majority of class members who could establish that the test results were unreliable but who could not prove that the test results were false and adversely influential to the outcome of their own court proceedings.

170 In the case at bar, in my opinion, given the problems confronting substantive access to justice and the problems of efficiency and productivity, discussed above, and given what little will be accomplished by the common issues trial, a more efficient and expeditious way to adjudicate these claims would be to proceed directly by way of individual actions. Moreover, in individual issues trials, class members would not be limited to recovery for the several liability of the Hospital, Dr. Koren, and Mr. Gareri and other potential defendants could be joined, thus enabling the plaintiff to recover completely for his or her injuries.

171 Sometimes a class action rather than removing obstacles to access to justice introduces new ones that impede the goals of access to justice, behaviour modification and judicial economy. The case at bar is one such case. I conclude that the preferable procedure criterion is not satisfied.

## **5. Representative Plaintiff Criterion**

### *(a) Overview*

172 Dr. Koren, but not the Hospital and Mr. Gareri, challenge Ms. Green's qualifications to be a representative plaintiff. All the Defendants submit that the proposed litigation plan does not satisfy the representative plaintiff criterion.

### *(b) General Principles: Representative Plaintiff Criterion*

173 The fifth and final criterion for certification as a class action is that there is a representative plaintiff who would adequately represent the interests of the class without conflict of interest and who has produced a workable litigation plan.

174 The representative plaintiff must be a member of the class asserting claims against the defendant, which is to say that the representative plaintiff must have a claim that is a genuine representation of the claims of the members of the class to be represented or that the representative plaintiff must be capable of asserting a claim on behalf of all of the class members as against the defendant.<sup>59</sup>

175 Provided that the representative plaintiff has his or her own cause of action, the representative plaintiff can assert a cause of action against a defendant on behalf of other class members that he or she does not assert personally, provided that the causes of action all share a common issue of law or of fact.<sup>60</sup>

176 Whether the representative plaintiff can provide adequate representation depends on such factors as: his or her motivation to prosecute the claim; his or her ability to bear the costs of the litigation; and the competence of his or her counsel to prosecute the claim.<sup>61</sup>

177 While a litigation plan is a work in progress, it must correspond to the complexity of the particular case and provide enough detail to allow the court to assess whether a class action is: (a) the preferable procedure; and (b) manageable including the resolution of the common issues and any individual issues that remain after the common issues trial.<sup>62</sup> The litigation plan will not be workable if it fails to address how the individual issues that remain after the determination of the common issues are to be addressed.<sup>63</sup>

178 For managing the class proceedings and in particular the individual issues phase of the proceeding, the litigation plan and the court has the resources of s. 12 and s. 25 of the *Class Proceedings Act, 1992*, which state:

*Court may determine conduct of proceeding*

12. The court, on the motion of a party or class member, may make any order it considers appropriate respecting the conduct of a class proceeding to ensure its fair and expeditious determination and, for the purpose, may impose such terms on the parties as it considers appropriate.

....

*Individual issues*

25. (1) When the court determines common issues in favour of a class and considers that the participation of individual class members is required to determine individual issues, other than those that may be determined under section 24, the court may,

- (a) determine the issues in further hearings presided over by the judge who determined the common issues or by another judge of the court;
- (b) appoint one or more persons to conduct a reference under the rules of court and report back to the court; and
- (c) with the consent of the parties, direct that the issues be determined in any other manner.

*Directions as to procedure*

(2) The court shall give any necessary directions relating to the procedures to be followed in conducting hearings, inquiries and determinations under subsection (1), including directions for the purpose of achieving procedural conformity.

*Idem*

(3) In giving directions under subsection (2), the court shall choose the least expensive and most expeditious method of determining the issues that is consistent with justice to class members and the parties and, in so doing, the court may,

- (a) dispense with any procedural step that it considers unnecessary; and
- (b) authorize any special procedural steps, including steps relating to discovery, and any special rules, including rules relating to admission of evidence and means of proof, that it considers appropriate.

[ . . . ]

**(c) Analysis: Representative Plaintiff Criterion**

179 There is no merit to Dr. Koren's argument that Ms. Green is not qualified to be a representative plaintiff. There, however, is merit to the Defendants' argument that the proposed litigation plan does not satisfy the representative plaintiff criterion.

180 Ms. Green's litigation plan contemplates a common issues trial and, if that trial is successful, an Interview Panel would report on all of the complex issues of causation and damages, based on an interview with the claimant and without the defendants having any rights of disclosure or to be heard. Thereafter, if a settlement is not reached, a Damages Hearing will determine all of the causation and damages issues based only on the report of the Interview Panel and statements from one expert on each side, limited to three pages. The Damages Hearing is to take not more than two hours.

181 I agree with the Defendants that this litigation plan is both unfeasible and palpably procedurally unfair. As the above analysis of the preferable procedure criterion reveals, in the case at bar, very difficult, if not the most difficult, forensic work is assigned to the individual issues phase of the proposed class action. Ms. Green's litigation plan ignores this circumstance.

182 The deficiency in the litigation plan is a manifestation and illustration of the failure of Ms. Green's action to satisfy the preferable procedure criterion. The litigation plan presupposes that there are meaningful and efficient common issues and that s. 12 and s. 25 of the *Class Proceedings Act, 1992* would empower the court to devise suitable means to make the class action manageable and to introduce efficiencies for the individual issues trials. In this last regard, Ms. Green relies on my decisions in *Lundy v. VIA Rail Canada Inc.*<sup>64</sup> The *Lundy* case and the case at bar, however, are not remotely comparable. The *Lundy* case involved a very small class of persons who were passengers on a derailed train, none of whom suffered serious injuries and some of whom walked away with no injuries. It also involved a defendant who had admitted liability, who was not disputing causation, and who was disputing only the quantum of the individual claims after making offers to settle.

183 The *Lundy* case was very suitable for the exercise of the tools of s. 12 and s. 25 of the *Class Proceedings Act*. Ms. Green's case is not comparable and section 12 and section 25 are not meant to sacrifice a defendant's rights to due process when confronted with a multi-million dollar damages claim.

184 I conclude that the representative plaintiff criterion is not satisfied.

**6. *Cause of Action Criterion***

185 Without conceding that there was in law a cause of action against them, the Defendants did not dispute that Ms. Green's action satisfies the cause of action criterion.

186 While they did not dispute that the first criterion for certification had been satisfied, there were aspects of the Defendants' arguments about the other certification criteria that raised, either directly or indirectly, issues about the soundness in law of Ms. Green's and the putative class members' claims. To the extent necessary, I will address these cause of action issues in the discussion below about the other certification criterion.

187 For immediate purposes, I conclude that Ms. Green's action satisfies the cause of action criterion.

**7. *Identifiable Class Criterion***

**(a) *Overview***

188 In submitting that Ms. Green's action did not satisfy the identifiable class criterion, the Defendants' arguments were that: (1) the Family Law Class did not have any cause of action under the family law statutes and should not be included as class members; (2) the putative class members could not be identified together as a class because each putative class member

had an individual relationship with the Defendants; and (3) the class definition was overbroad because it included persons who had no claim or who suffered no injury.

*(b) General Principles: Identifiable Class Criterion*

189 The second certification criterion is the identifiable class criterion. The definition of an identifiable class serves three purposes: (1) it identifies the persons who have a potential claim against the defendant; (2) it defines the parameters of the lawsuit so as to identify those persons bound by the result of the action; and (3) it describes who is entitled to notice.<sup>65</sup> In defining class membership, there must be a rational relationship between the class, the cause of action, and the common issues, and the class must not be unnecessarily broad or over-inclusive.<sup>66</sup>

190 In *Western Canadian Shopping Centres Inc. v. Dutton*,<sup>67</sup> the Supreme Court of Canada explained the importance of and rationale for the requirement that there be an identifiable class:

First, the class must be capable of clear definition. Class definition is critical because it identifies the individuals entitled to notice, entitled to relief (if relief is awarded), and bound by the judgment. It is essential, therefore, that the class be defined clearly at the outset of the litigation. The definition should state objective criteria by which members of the class can be identified. While the criteria should bear a rational relationship to the common issues asserted by all class members, the criteria should not depend on the outcome of the litigation. It is not necessary that every class member be named or known. It is necessary, however, that any particular person's claim to membership in the class be determinable by stated, objective criteria.

*(c) Analysis: Identifiable Class Criterion*

191 It may be the case that the Family Law Class do not have any cause of action under the family law statutes, but this is not plain and obvious and, therefore, I do not agree with the Defendants' arguments that these claimants should not be included as class members

192 While I agree with the premise of the Defendants' argument challenging the class definition that putative class members have an individual relationship with the Defendants, I view this premise as in the first instance more significant to the arguments discussed above that Ms. Green's action does not satisfy the common issues and preferable procedure criterion. In other words, Ms. Green's proposed class definition satisfies the technical requirements of the identifiable class criterion and avoids the sin of a merits-based definition; however, using her proposed definition creates problems for her in satisfying the commonality and preferable procedure criterion.

193 The result, however, of this analysis (as was the case in *Dennis v. Ontario Lottery and Gaming Corp.*) is that it can be said that the class definition is overbroad and fails the identifiable class criterion. While it may be just a matter of semantics with no difference of meaning, I rather conclude that subject to a revision to be discussed next, that Ms. Green has satisfied the second criterion for certification at peril of failing the third and fourth criterion.

194 The revision is to Ms. Green's class definition which is manifestly overbroad to the extent that it includes persons who have no claim or who suffered no injury because their tests had nothing to do with court proceedings in which personal liberties or parental rights were imperiled. The class definition can and should be revised to exclude these persons.

195 Subject to the above revision, I conclude that Ms. Green's action satisfies the identifiable class criterion.

**8. The Common Issues Criterion**

196 For the purposes of determining whether Ms. Green's proposed common issues severally satisfy the common issues criterion, I shall initially assume, notwithstanding the analysis above, that Ms. Green's proposed class action satisfies the other four certification criteria.

(a) General Principles: Common Issues

197 The third criterion for certification is the common issues criterion. For an issue to be a common issue, it must be a substantial ingredient of each class member's claim and its resolution must be necessary to the resolution of each class member's claim.<sup>68</sup> The underlying foundation of a common issue is whether its resolution will avoid duplication of fact-finding or legal analysis of an issue that is a substantial ingredient of each class member's claim and thereby facilitate judicial economy and access to justice.<sup>69</sup> All members of the class must benefit from the successful prosecution of the action, although not necessarily to the same extent. The answer to a question raised by a common issue for the plaintiff must be capable of extrapolation, in the same manner, to each member of the class.<sup>70</sup> In *Pro-Sys Consultants Ltd. v. Microsoft Corp.*,<sup>71</sup> the Supreme Court of Canada describes the commonality requirement as the central notion of a class proceeding which is that individuals who have litigation concerns in common ought to be able to resolve those common concerns in one central proceeding rather than through an inefficient multitude of repetitive proceedings.

198 An issue is not a common issue if its resolution is dependent upon individual findings of fact that would have to be made for each class member.<sup>72</sup> Common issues cannot be dependent upon findings which will have to be made at individual trials, nor can they be based on assumptions that circumvent the necessity for individual inquiries.<sup>73</sup>

199 The common issue criterion presents a low bar.<sup>74</sup> An issue can be a common issue even if it makes up a very limited aspect of the liability question and even though many individual issues remain to be decided after its resolution.<sup>75</sup> A common issue need not dispose of the litigation; it is sufficient if it is an issue of fact or law common to all claims and its resolution will advance the litigation.<sup>76</sup>

200 The commonality requirement does not mean that an identical answer is necessary for all the members of the class, or even that the answer must benefit each of them to the same extent; it is enough that the answer to the question does not give rise to conflicting interests among the members; success for one member must not result in failure for another.<sup>77</sup> Even a significant level of individuality does not preclude a finding of commonality.<sup>78</sup>

(b) Common Issue No. 1

201 The first proposed common issue is:

1. By its operation or management of the Motherisk Drug Testing Laboratory between January 2005 and April 2015, did the Defendants breach a duty of care it owed to the Class?

202 Based on the assumption that the other certification criteria are satisfied, I agree that Common Issue No. 1 is certifiable as a common issue.

203 However, based on the analysis above, I conclude that Common Issue No. 1 does not satisfy the common issues criterion because: (a) it is not a substantial ingredient of each class member's claim; (b) its resolution will not avoid duplication of fact-finding or legal analysis; (c) its answer is not capable of extrapolation, in the same manner, to each member of the class; and (d) its determination will not diminish what will need to be determined in a multitude of individual proceedings.

204 Further, with respect to Dr. Koren and Mr. Gareri, the duty of care issue would appear to be individual and not common across the class. The precise argument advanced by Dr. Koren is that there is no direct patient and medical practitioner relationship between any of the class members and the individual defendants and thus any duty of care would arise from the circumstance that the Hospital was retained by Children's Aid Societies and others to provide evidence for use in individual court proceedings.<sup>79</sup> These novel circumstances, it is submitted, do not give rise to a common duty of care across the class. I agree with this argument.

205 I, therefore, conclude that Common Issue No. 1 does not satisfy the common issues criterion.

(c) *Common Issue No. 2*

206 The second proposed common issue is:

2. If the answer to Common Issue No. 1 is "yes", are the Family Class members entitled to damages pursuant to section 61 of the *Family Law Act*, R.S.O. 1990, c. F-3?

207 For the above reasons applicable to Common Issue No. 1, I conclude that Common Issue No. 2 does not satisfy the common issues criterion.

(d) *Common Issue No. 3*

208 The third proposed common issue is:

3. If the answer to Common Issue No. 1 is "yes", can the court make an aggregate assessment of damages suffered by all class members as part of the common issues trial?

209 For the above reasons applicable to Common Issues No. 1 and No. 2 and also for the following reason, I conclude that Common Issue No. 3 about aggregate damages does not satisfy the common issues criterion.

210 Section 24(1) of the *Class Proceedings Act, 1992* stipulates when the court may assess aggregate damages. Section 24(1) states:

*Aggregate assessment of monetary relief*

24 (1) The court may determine the aggregate or a part of a defendant's liability to class members and give judgment accordingly where,

- (a) monetary relief is claimed on behalf of some or all class members;
- (b) no questions of fact or law other than those relating to the assessment of monetary relief remain to be determined in order to establish the amount of the defendant's monetary liability; and
- (c) the aggregate or a part of the defendant's liability to some or all class members can reasonably be determined without proof by individual class members.

211 For an aggregate assessment of damages to be available "no questions of fact or law other than those relating to the assessment of monetary relief" must "remain to be determined in order to establish the amount of the defendant's monetary liability." An antecedent finding of liability is required before resorting to the aggregate damages provision of the *Class Proceedings Act, 1992*, and if liability cannot be established through the common issues, then an aggregate damages common issue cannot be certified.<sup>80</sup>

212 In the case at bar, there inevitably will be individual issues trials to determine both liability and damages. There is no general experience of damages arising from the unreliable tests. For some putative class members, the unreliable tests may have been coincidentally correct. For other putative class members, the unreliable tests may have been irrelevant to the outcome of the court proceedings because there was reliable probative evidence to justify the outcome. I, therefore, conclude that aggregate damages may not be certified as a common issue.

213 The case at bar is not a case in which any part of the class member's damage claim can be aggregated. The case at bar is a systemic negligence action and there is no base amount of damages that each member of the class may be entitled to from the fact that it is proven that in general the Motherisk laboratory tests were unreliable for use in court proceedings. As noted

above, the entitlement to damages for which compensation is sought must be determined at individual issues trials. No part of the entitlement to damages can be determined at the common issues trial because major constituent elements of the tort of negligence remain to be determined as do the merits of the Defendants' defences to liability, one of which is that the unreliability of the tests caused no harm to the individual class member.

214 I conclude that Common Issue No. 3 does not satisfy the common issues criterion.

*(e) Common Issue No. 4*

215 The fourth proposed common issue is:

4. If the answer to Common Issue No. 3 is "yes", in what amount?

216 Since I shall not certify Common Issue No. 3, it follows that the ancillary Common Issue No. 4 also shall not be certified.

*(f) Common Issue No. 5*

217 The fifth proposed common issue is:

5. If the answer to Common Issue No. 1 is "yes", does the Defendants' conduct justify an award of punitive damages?

218 In cases where individual issues trials are inevitable, it has become *de rigueur* to certify the common issue of whether the defendant's conduct would justify an award of punitive damages but not to certify the issue of determining the amount of those damages. It is also normative that punitive damages alone cannot justify the certification of an action as a class proceeding.<sup>81</sup>

219 In the case at bar, I shall not certify Common Issues No. 5 (and No. 6) for two reasons.

220 First, Common Issue No. 5 is peripheral to the fundamental common issues and it stands alone as the only question that, technically speaking, is certifiable. Punitive damages alone cannot justify the certification of an action as a class proceeding.

221 Second, I find remote to the extreme that after awarding the class members the full compensation they deserve and awarding Class Counsel the fees they deserve, a court would go on to make a multi-million-dollar punitive award against the Hospital for Sick Children. However egregious the conduct of Dr. Koren and Mr. Gareri in increasing the Hospital's not-for-profit revenues and however egregious the failures of the administration of the Hospital to supervise its Motherisk laboratory, and, however tragic and heartbreaking the outcomes in individual cases, a punitive award would ultimately not be visited on the Defendants but rather would be inflicted on the sick children at the Hospital who depend upon taxpayers and philanthropists to provide the financial resources for the otherwise good and necessary work of the hospital.

222 I conclude that Common Issue No. 5 does not satisfy the common issues criterion.

*(g) Common Issue No. 6*

223 The sixth common issue is:

6. If the answer to Common Issue No. 5 is "yes", what amount of punitive damages ought to be awarded against the Defendants?

224 Since I shall not certify Common Issue No. 5 and since Common Issue No. 6 is normally not certifiable in actions where individual issues trials are inevitable, it follows that the ancillary and periphery Common Issue 6 also shall not be certified.

*(h) Conclusion - Common Issues*

225 For the above reasons, I conclude that the common issues criterion is not satisfied.

## F. Conclusion

226 For the above reasons, I dismiss Ms. Green's certification motion.

227 If the parties cannot agree about the matter of costs, they may make submissions in writing beginning with the Defendants' submissions within 20 days from the release of these Reasons for Decision, followed by Ms. Green's submissions within a further 20 days.

*Motion dismissed.*

Fraud and Misrepresentation --- Negligent misrepresentation (Hedley Byrne principle) — Nature and extent of duty of care

Negligence — Chartered accountants' negligent preparation of financial statement.

*Appeal* from the judgment of the Saskatchewan Court of Appeal, [1974] 6 W.W.R. 236, 53 D.L.R. (3d) 85, which allowed the appeal from the judgment of MacPherson J., [1972] 6 W.W.R. 557, 32 D.L.R. (3d) 66, who found the defendants, a firm of chartered accountants, negligent in preparing a financial statement relied upon by the plaintiff, a private investor.

The defendants in the ordinary course of their business prepared a financial statement for a client knowing that the statement would be used to persuade investors to put money into the client's business. The statement contained a serious error in that it showed as income a substantial sum of money which was in fact prepayment on contracts upon which work had not started. As well the defendants did not audit the records of their client although an audited statement had been requested and it appeared an audit had been done. The plaintiff invested \$20,075 on the basis of the financial statement and after discovering the error invested a further \$2,500 to meet a payroll.

On appeal *held*, the appeal was allowed; the defendants were liable to the plaintiff for \$20,075. The respondent accountants, in preparing in the course of their professional duties a financial statement which they knew was to be supplied to members of

a limited class for the purpose of raising funds, owed a duty of care in the preparation of the financial statement to a potential investor even if the accountants were not aware of the identity of the investor.

**Dickson J. (Laskin C.J.C., Ritchie, Spence, Pigeon and Beetz JJ. concurring):**

1 This appeal concerns the liability of an accountant to parties other than his employer for negligent statements. The Court is asked to decide whether there was in the relationship of the parties to the appeal such kind or degree of proximity as to give rise to a duty of care owed by the respondents to the appellant. The damages involved are not large but the question raised is of importance to the accounting profession and to the investing public.

**I**

2 In October 1961 Siegfried Scholler and his brother entered into partnership under the firm name of Scholler Brothers Millwork in the City of Moose Jaw. The firm made cabinets and other furniture and also undertook contracts for interior woodwork. The partnership was dissolved in December 1962, and from then until February 1964 Siegfried Scholler carried on the business as sole proprietor. In early 1964, following a fire, Saskatchewan Economic Development Corporation ("Sedco") agreed to advance Scholler \$34,000 for the purpose of establishing a plant to undertake millwork and the manufacture of furniture in Moose Jaw, conditional upon incorporation of the sole proprietorship. Scholler Furniture & Fixtures Ltd. ("the company") was incorporated and the sole proprietorship came to an end. Scholler was an excellent workman but a poor financial planner. He evinced a compulsive urge to expand the business of the company with the result that by January 1965 a serious shortage of working capital became apparent. Scholler approached Sedco for a further loan of \$20,000 which was approved, contingent upon (i) production of a satisfactory audited financial statement of the company for the period from date of incorporation, 10th February 1964, to 31st March 1965 and (ii) the infusion of \$20,000 of equity capital.

3 Instructions were issued to the firm of R. L. Bamford & Co. ("the accountants"), of whom the respondents (defendants) were partners, to prepare the required financial statement and Scholler began a search for an outside investor. He made it known to the accountants that he was seeking an investor. The trial Judge, MacPherson, J. [reported [1972] 6 W.R.R. 557], made a crucial finding, not disturbed by the Court of Appeal for Saskatchewan [[1974] 6 W.R.R. 236, 53 D.L.R. (3d) 85], that the accountants knew, prior to completion of the financial statement, dated 18th June 1965, at the root of the present litigation, that the statement would be used by Sedco, by the bank with whom the company was doing business and by a potential investor in equity capital.

4 The manager of Sedco, a Mr. Wiltshire, helped Scholler in his search for a potential investor and, with the consent of Scholler, showed a copy of the financial statement to his friend, the plaintiff Haig, who had been looking for a "likely opportunity". Haig discussed the statement with his bank manager and with a chartered accountant. The bottom line of the statement showed that the operations of the company were profitable; the potential was promising; a \$20,000 loan from Sedco and \$20,000 of equity money would provide necessary working capital. Influenced by these considerations Haig, an experienced businessman, purchased in mid-August 1965 shares in the capital stock of the company for \$20,075 and guaranteed the bank loan to the extent of \$20,000. He became president; Scholler became vice-president and operating head. All looked well: there was ample work for the company as the Saskatchewan liquor laws had recently been altered to permit mixed drinking and the formerly all-male beer parlours were being upgraded. But something was wrong. Notwithstanding the addition of \$40,000 in capital, which enabled trade creditors to be paid, within a very short time the company was again troubled by serious cash shortage. The accountants were consulted and investigation soon disclosed the source of the trouble: a \$28,000 prepayment received by the

company in March 1965 on two contracts from Robert Simpson Regina Limited, upon which work had not started, had been treated as if the work had been completed and the moneys earned. The \$28,000 had been credited to revenue by the company's bookkeeper rather than shown as a liability. The accountants had failed to spot the error. On Haig's instructions a new financial statement, dated 29th September 1965, was prepared by the accountants for the period 10th February 1964 to 31st March 1965 in which the \$28,000 prepayment was removed from revenue and shown under liabilities as "deferred revenue — progress advance". In the result, the position as certified by the accountants and the true position of the accounts were as follows:

	Position as certified by accountants	True position
	(18th June 1965 statement)	(29th September 1965 statement)
Sales	\$186,603.64	\$158,603.64
Gross profit	80,896.50	52,896.50
Net profit		
Before tax	26,590.31	(1,994.52)
Net profit		
After tax	20,717.04	nil
Surplus	21,321.04	600.00

5 Instead of making a profit in the period, as shown by the June statement, the company had suffered a loss: instead of buying into a thriving business, as the financial statement of 18th June 1965 would have suggested, Haig bought into a distressed enterprise which never showed a profit. During the six months from 31st March 1965 to 31st August 1965 a net loss of \$21,460.10 was sustained. By early December the company had reached the limit of its bank line of credit. To meet the payroll Haig made a further investment of \$2,500, matched by a like amount from Sedco. A meeting of creditors, held late in the month, decided against further support and at year-end, the company ceased business. Haig lost the \$20,075 paid for shares, the loan of \$2,500, and \$6,500 under the bank guarantee. He sued the accountants, the company and Scholler to recover \$20,075 and \$2,500 but later discontinued against Scholler and the company.

## II

6 The trial Judge negligence on the part of the accountants. I think the evidence amply supports that finding. From the expert testimony, it appears that the engagement of a chartered accountant can be on either an "audit" basis or a "non-audit" basis. If the engagement is for an audit, the accountant does what he considers necessary by way of auditing procedures, tests and verification of internal controls, accounts and records to permit him to give an opinion on the financial statements. In an engagement of the non-audit type, the accountant merely helps the client in the preparation of the financial statement on terms which permit him to accept the client's records and dispense with the checks and verifications expected in an audit. The product of an audit is a financial statement accompanied by an auditor's report expressing an opinion on the financial statement. At the end of a non-audit engagement, a financial statement is issued to which is appended a comment in which the auditor expressly disclaim responsibility.

7 The accountant had performed non-audit accounting services for the partnership, Scholler Brothers Millwork, in 1963, and at that time the financial statement was accompanied by a letter, the final paragraph of which disclaimed in these words:

The attached financial statements have been prepared from the books and records and information furnished, without audit, and we are not able to express an opinion as to the financial position of the business.

8 In the present proceedings the accountants sought to maintain that their engagement in 1965 was of a non-audit nature and that they were performing for the company a mere accounting function in preparing a financial statement from the client's financial records. This submission fails for two reasons: first, Sedco required audited financial statements as a condition of the further loan to the company and the evidence is clear that the statements were prepared in satisfaction of that condition, as the

accountants had been advised by Sedco and the company; second, the auditor's report follows the format generally recognized as appropriate for audited financial statements in these terms:

We have examined the records of Scholler Furniture & Fixtures Ltd. for the period from incorporation, February 10, 1964 to March 31, 1965 and have prepared therefrom the attached Balance Sheet as at the latter date and Statement of Profit and Loss for the period. Our examination included a general review of the accounting procedures and such tests of the accounting records and other supporting evidence as we considered necessary in the circumstances.

The accounts receivable are as shown by the records and we have not confirmed them by direct communication with the recorded debtors.

The inventories of materials and work-in-process were not taken by us or under our supervision and have been accepted as certified to us by Mr. Siegfried Scholler.

Subject to the foregoing reservations we report that, in our opinion, the attached Balance Sheet and related Statement of Profit and Loss present fairly the financial position of Scholler Furniture & Fixtures Ltd. as at March 31, 1965 and the results of operations for the period ended on that date in accordance with generally accepted accounting principles and as shown by the books of the Company.

9 The report would lead the reader to believe that an audit had been done but the evidence shows that no audit was done. The report is qualified in three respects but not with respect to liabilities. Gary Lloyd Davidge, then an articled student in the accountants' office and now a chartered accountant, prepared the impugned financial statements. He testified that he had been instructed by his firm not to do an audit; he believed he was acting as accountant and not auditor; he was not furnished with an audit program. He did not peruse invoices or purchases orders; he did not inquire as to prepayments or as to the state of contracts; he did not analyze the figures as to sales or work in progress; nor did he inquire as to internal controls to determine to what extent the controls could be relied upon to assure the accuracy of the revenue accounts. He left the employ of the accountants before the statement was delivered to the client, in the belief that it would be accompanied by a complete disclaimer as had accompanied the 1963 financial statements of Scholler Brothers Millwork. Notwithstanding all of this, the auditors rendered the quoted opinion in which they said that their examination had included a general review of the accounting records and other supporting evidence as they considered necessary in the circumstances. That was not true. They also expressed the opinion, subject to the three reservations earlier referred to, that the balance sheet and related statement of profit and loss fairly presented the financial position of the company at 31st March 1965. The work done by or on behalf of the accountants did not warrant any such affirmation. In representing to have done an audit when they were aware that an audit had not been done, in my view the accountants were guilty of a serious dereliction of duty. This was more than honest blunder or error in judgment.

### **III**

10 I come then to the question whether Haig, who received the defective financial statements and relied on them to his loss, has a right of recovery from the accountants. MacPherson J. at trial allowed recovery. He held that the accountants knew or ought to have known that the statements would be used by a potential investor in the company; although Haig was not, in the Judge's words, "in the picture" when the statement was prepared, he must be included in the category of persons who could be foreseen by the accountants as relying on the statement and therefore the accountants owed a duty to Haig. The Judge applied a test of foreseeability.

11 The majority in the Court of Appeal for Saskatchewan (Hall J.A. with Maguire J.A. concurring) came to a different conclusion. The majority of the Court were satisfied that the accountants had been informed by Scholler that the statement would be used to induce persons to invest equity capital in the company. Hall J.A. noted that at that time there was no specific person or group in mind as a prospective investor or investors; Haig was not known to the accountants and they were not aware that he had been shown a copy of the statement or that he had been approached to invest in the company. The learned Justice of Appeal observed that the financial statement had been given to Haig without the knowledge of Scholler or the company. With respect, I think this observation is in error as Wiltshire testified that before giving a copy of the statement to Haig he had received

Scholler's permission. The point is, however, of no great consequence for if the accountants, at the request of the company, prepared financial statements for distribution to, inter alia, potential investors, and furnished the company with copies for that purpose, I fail to understand why the company or anyone on its behalf would be expected to seek permission of the accountants before releasing a copy. The learned Justice of Appeal concluded that the accountants owed Haig the duty to be honest but that they were not liable to him for negligence and, since the misrepresentation contained in the financial statement was the result of an "honest blunder", the appeal should be allowed with costs. The dissenting Judge, Woods J.A., was of opinion that the accountants knew that the statement was intended for a special purpose, a purpose that would affect the economic interest of those from whom Scholler would attempt to secure funds, and that Haig fell within this category. The outcome of this appeal rests, it would seem, on whether, to create a duty of care, it is sufficient that the accountants knew that the information was intended to be disseminated among a specific group or class, as MacPherson J. and Woods J.A. would have it, or whether the accountants also needed to be apprised of the plaintiff's identity, as Hall and Maguire JJ.A. would have it.

#### **IV**

12 The increasing growth and changing role of corporations in modern society has been attended by a new perception of the societal role of the profession of accounting. The day when the accountant served only the owner-manager of a company and was answerable to him alone has passed. The complexities of modern industry combined with the effects of specialization, the impact of taxation, urbanization, the separation of ownership from management, the rise of professional corporate managers and a host of other factors have led to marked changes in the role and responsibilities of the accountant and in the reliance which the public must place upon his work. The financial statements of the corporations upon which he reports can affect the economic interest of the general public as well as of shareholders and potential shareholders.

13 With the added prestige and value of his services has come, as the leaders of the profession have recognized, a concomitant and commensurately increased responsibility to the public. It seems unrealistic to be oblivious to these developments. It does not necessarily follow that the doors must be thrown open and recovery permitted whenever someone's economic interest suffers as the result of a negligent act on the part of an accountant. Compensation to the injured party is a relevant consideration but it may not be the only relevant consideration. Fear of unlimited liability for the accountant, "liability in an indeterminate amount for an indeterminate time to an indeterminate class", was considered a relevant factor by Cardozo J. in *Ultramare Corp. v. Touche* (1931), 255 N.Y. 170, 174 N.E. 441 AT 444. From the authorities, it appears that several possible tests could be applied to invoke a duty of care on the part of accountants vis-a-vis third parties: (i) foreseeability of the use of the financial statement and the auditor's report thereon by the plaintiff and reliance thereon; (ii) actual knowledge of the limited class that will use and rely on the statement; (iii) actual knowledge of the specific plaintiff who will use and rely on the statement. It is unnecessary for the purpose of the present case to decide whether test (i), the test of foreseeability, is or is not a proper test to apply in determining the full extent of the duty owed by accountants to third parties. The choice in the present case, it seems to me, is between test (ii) and test (iii) — actual knowledge of the limited class or actual knowledge of the specific plaintiff. I have concluded on the authorities that test (iii) is too narrow and that test (ii), actual knowledge of the limited class, is the proper test to apply in this case.

14 *The English authorities:* I do not think one can do better than begin with Lord Denning's dissent in *Candler v. Crane, Christmas & Co.*, [1951] 2 K.B. 164, [1951] 1 All E.R. 426, which later found favour in *Hedley Byrne & Co. v. Heller & Partners*, [1964] A.C. 465, [1963] 2 All E.R. 575. After identifying accountants as among those under a duty to use care, Lord Denning, in answer to the question "To whom do these professional persons owe this duty?" said (p. 434):

They owe the duty, of course, to their employer or client, and also, I think, to any third person to whom they themselves show the accounts, or to whom they know their employer is going to show the accounts so as to induce him to invest money or take some other action on them. I do not think, however, the duty can be extended still further so as to include strangers of whom they have heard nothing and to whom their employer without their knowledge may choose to show their accounts.

15 And:

The test of proximity in these cases is: Did the accountants know that the accounts were required for submission to the plaintiff for use by him?

16 One can find some support in these words for the position taken by the majority in the Saskatchewan Court of Appeal but their effect is tempered by what appears later in the judgment, p. 435:

It will be noticed that I have confined the duty to cases where the accountants prepares his accounts and makes his report for the guidance of the very person in the very transaction in question. That is sufficient for the decision of this case. I can well understand that it would be going too far to make an accountant liable to any person in the land who chooses to rely on the accounts in matters of business, for that would expose him, in the words of CARDOZO, C.J., in *Ultramares Corp. v. Touche* [supra], to

... liability in an indeterminate amount for an indeterminate time to an indeterminate class.

Whether he would be liable if he prepared his accounts for the guidance of a specific class of persons in a specific class of transactions, I do not say. I should have thought he might be, just as the analyst and lift inspector would be liable in the instances I have given earlier.

17 In the case at bar, the accounts were prepared for the guidance of a "specific class of persons", potential investors, in a "specific class of transactions", the investment of \$20,000 of equity capital. The number of potential investors would, of necessity, be limited because the company, as a private company, was prohibited by s. 3(o) (iii) of The Companies Act of Saskatchewan, R.S.S. 1965, c. 131, from extending any invitation to the public to subscribe for shares or debentures of the company.

18 One comes then to the *Hedley Byrne* case, supra. The argument was raised in that case that the relationship between the parties was not sufficiently close to give rise to any duty. Lord Reid dealt with that argument in these words (p. 580):

It is said that the respondents did not know the precise purpose of the inquiries and did not even know whether National Provincial Bank, Ltd. wanted the information for its own use or for the use of a customer: they knew nothing of the appellants. I would reject that argument. They knew that the inquiry was in connexion with an advertising contract, and it was at least probable that the information was wanted by the advertising contractors. It seems to me quite immaterial that they did not know who these contractors were: there is no suggestion of any speciality which could have influenced them in deciding whether to give information or in what form to give it. I shall therefore treat this as if it were a case where a negligent misrepresentation is made directly to the person seeking information, opinion or advice, and I shall not attempt to decide what kind or degree of proximity is necessary before there can be a duty owed by the defendant to the plaintiff.

19 In the present case the accountants knew that the financial statements were being prepared for the very purpose of influencing, in addition to the bank and Sedco, a limited number of potential investors. The names of the potential investors were not material to the accountants. What was important was the nature of the transaction or transactions for which the statements were intended, for that is what delineated the limits of potential liability. The speech of Lord Morris in *Hedley Byrne* included this observation, p. 588:

It is, I think, a reasonable and proper inference that the bank must have known that the National Provincial were making their inquiry because some customer of theirs was or might be entering into some advertising contract in respect of which Easipower, Ltd., might become under a liability to such customer to the extent of the figures mentioned. The inquiries were from one bank to another. The name of the customer (Hedleys) was not mentioned by the inquiring bank (National Provincial) to the answering bank (the bank): nor did the inquiring bank (National Provincial) give to the customer (Hedleys) the name of the answering bank (the bank). These circumstances do not seem to me to be material. The bank must have known that the inquiry was being made by someone who was contemplating doing business with Easipower Ltd. and that their answer or the substance of it would in fact be passed on to such person.

20 Lord Devlin stood on narrow ground, content with the proposition that wherever there is a relationship equivalent to contract there is a duty of care and such relationship may be either *general*, such as that of solicitor and client and of banker and customer, or *particular*, created ad hoc, in which case it becomes necessary to examine the particular facts to see whether there is an express or implied undertaking of responsibility. This reference to "assumption of responsibility" is crucial in cases involving economic loss, according to C. Harvey, "Economic Losses and Negligence" (1972), 50 Can. Bar Rev. 580. Harvey devises a test for imposing a duty of care in cases of economic loss which he phrases as follows (p. 600):

(A) *person should be bound by a legal duty of care to avoid causing economic loss to another in circumstances where a reasonable man in the position of the defendant would foresee that kind of loss and would assume responsibility for it.*

21 This "assumption of responsibility" test is an interesting one, although it is no more objective than a foreseeability test. It would allow the Court to narrow the scope of liability from that resulting from a foreseeability test, but it would still require a policy determination as to what should be the scope of liability. As Lord Pearce stated in *Hedley Byrne* (p. 615):

How wide the sphere of the duty of care in negligence is to be laid depends ultimately on the courts' assessment of the demands of society for protection from the carelessness of others.

22 Lord Pearce in *Hedley Byrne* adopted Lord Denning's dissent in *Candler's* case, to which I have already referred, noting that the result produced was somewhat similar to the American Restatement of the Law of Torts.

23 Two other cases decided in England might be mentioned briefly, in one of which the ambit of the duty of care was extended and, in the other, restricted. In *Dutton v. Bognor Regis Urban District Council*, [1972] 1 Q.B. 373, [1972] 1 All E.R. 462, it was held that the relationship between a building inspector, who had negligently approved the foundations of a house, and the plaintiff, subsequent purchaser of the house, was sufficiently proximate to form the basis of a duty of care. In *Mutual Life & Citizens' Assur. Co. v. Evatt*, [1971] A.C. 793, [1971] 1 All E.R. 150, a majority of the Privy Council denied recovery to Evatt for negligent advice given to him gratuitously by an insurance company, of which he was a policy holder, for the reason that he did not allege that at or prior to the time of his inquiry the company carried on the business of supplying information or advice on investments or that it claimed to possess any special skill or competence. These considerations are not, of course, present in the case at bar. Here the accountants held themselves out as possessing special qualifications, skill and competence which, for reward, they were prepared to place at the disposal of the public.

24 *The American authorities:* Judgment in the two leading cases was written by Cardozo J. In *Glanzer v. Shepard* (1922), 233 N.Y. 236, the defendants, public weighers, at the request of a seller of beans, made a return of the weight and furnished the plaintiff buyer with a copy. The buyer paid the seller on the faith of the certificate which turned out to be erroneous. The buyers were entitled to recover from the weighers. The certificate was held to be the very "end and aim" of the transaction and not something issued in the expectation that the seller would use it thereafter in the operations of his business as occasion might require.

25 The question whether third parties were protected from the negligence of accountants came before the New York Courts in *Ultramare Corp. v. Touche*, supra. The breach made in the wall of privity by *Glanzer's* case was narrowed in *Ultramare*. In that case, a company showed a balance sheet prepared by the defendants to a factor who advanced money to the company. The factor was unknown to the defendants, and Cardozo J. held that the defendants owed the factor no duty of care. Although the *Ultramare* decision has been followed widely in the United States, it has also been criticized: see Prosser, Law of Torts, 4th ed., pp. 706-709; Hawkins, "Professional Negligence Liability of Public Accountants" (1959), 12 Vand. Law Rev. 797; note, "Accountants' Liability for False and Misleading Statements" (1967), 67 Colum. Law Rev. 1437. *Ultramare* has also been distinguished in a case similar to the one at bar, *Rusch Factors Inc. v. Levin* (1968), 284 F. Supp. 85. In *Rusch*, the Court held that the plaintiff investor, who had relied on the financial statement prepared by the defendant, was actually foreseen by the defendant. Pettine J. distinguished *Ultramare* in these words (p. 91):

There, the plaintiff was a member of an undefined, unlimited class of remote lenders and potential equity holders not actually foreseen but only foreseeable.

26 The *Rusch* case was followed by the United States Court of Appeal (Fourth Circuit) in *Rhode Island Hospital Trust National Bank v. Swartz* (1972), 455 F. 2d 847. That case mentions that *Rusch* has been followed in Iowa and Minnesota.

27 The case before us is closer to *Glanzer* than to *Ultramares*. The very end and aim of the financial statements prepared by the accountants in the present case was to secure additional financing for the company from Sedco and an equity investor; the statements were required primarily for these third parties and only incidentally for use by the company. In the *Ultramares* case, Touche would know that the statements were primarily for company use although they might be read in the ordinary course of business by shareholders, investors, banks and countless others.

28 Prosser, Law of Torts, 4th ed., notes at p. 707 that a duty of reasonable care has been found where a representation is made to a third person with knowledge that he intends to communicate it to the specific individual plaintiff for the purpose of inducing him to act, and that most of the courts have drawn the line there. The following question is posed, however (p. 708):

But what if the defendant is informed that his representation is to be passed on to some more limited group, as a basis for action on the part of some one or more of them?

29 And the answer is in these words (p. 709):

... where the group affected is a sufficiently small one, and particularly, as in the case of the successful bidder, only one person can be expected to suffer loss, the guess may be hazarded that the recovery will be allowed. Certificates of expert examination are intended to be exhibited, not hidden under a bushel; and a rule which denies recovery because the defendant who has provided one for such a purpose does not know the plaintiff's name, or the particulars of the transaction, has a very artificial aspect.

30 The approach taken in the American Restatement of Torts (2d) SS 552 is to permit recovery for loss suffered by the person or one of the persons for whose benefit or guidance the professional person intends to supply the information or knows that the recipient intends to supply it. A duty of care arises if the defendant accountant knows that a third party will receive his statements. This knowledge is not with regard to the specific individual but to a limited class of which he forms a part. An explanatory note in the Restatement shows this:

A is negotiating with a bank for a credit of \$50,000. The bank requires an audit by certified public accountants. A employs B & Company, a firm of accountants, to make the audit, telling them he is going to negotiate a bank loan. A does not get his loan from the first bank but does negotiate a loan with another bank, which relies upon B & Company's certified statements. The audit carelessly overstates the financial resources of A, and in consequence the second bank suffers pecuniary loss. B & Company is subject to liability to the second bank.

31

(See also (1969), 53 Minn. Law Rev. 1357.)

32 *The Canadian authorities:* The *Hedley Byrne* case has been considered by this Court in *Welbridge Holdings Ltd. v. Winnipeg*, [1972] 3 W.W.R. 433, [1971] S.C.R. 957, 22 D.L.R. (3d) 470. Recovery for economic loss caused by negligence has been allowed in *Rivtow Marine Ltd. v. Washington Iron Works*, [1973] 6 W.W.R. 692, [1974] S.C.R. 1189, 40 D.L.R. (3d) 530, where Ritchie J. said, p. 1213:

... I am of opinion that the case of *Hedley Byrne* represents the considered opinion of five members of the House of Lords to the effect that a negligent misrepresentation may give rise to an action for damages for economic loss occasioned thereby without any physical injury to person or property and apart from any contract or fiduciary relationship.

33

V

34 In summary, Haig placed justifiable reliance upon a financial statement which the accountants stated presented fairly the financial position of the company as at 31st March 1965. The accountants prepared such statements for reward in the course of their professional duties. The statements were for benefit and guidance in a business transaction, the nature of which was known to the accountants. The accountants were aware that the company intended to supply the statements to members of a very limited class. Haig was a member of the class. It is true the accountants did not know his name but, as I have indicated earlier, I do not think that is of importance. I can see no good reason for distinguishing between the case in which a defendant accountant delivers information directly to the plaintiff at the request of his employer (*Candler's* case and *Glanzer's* case) and the case in which the information is handed to the employer who, to the knowledge of the accountant, passes it to members of a limited class (whose identity is unknown to the accountant) in furtherance of a transaction the nature of which is known to the accountant. I would accordingly hold that the accountants owed Haig a duty to use reasonable care in the preparation of the accounts.

35 I am of the view, however, that Haig cannot recover from the accountants the sum of \$2,500 which he advanced to the company in December 1965 because by that time he was fully cognizant of the true state of affairs. It cannot be said that the sum was advanced in reliance upon false statements. Haig had the choice of advancing additional money in the hope of saving his original investment. He chose to make a further advance, but the choice was his and not one for which the accountants are liable.

36 I would allow the appeal, set aside the judgment of the Court of Appeal for Saskatchewan and reinstate the judgment of MacPherson J., subject only to disallowance of the claim of \$2,500, the whole with costs in this Court and in the Courts below.

***Martland J. (Judson and de Grandpre JJ. concurring):***

37 I agree with the conclusion reached by my brother Dickson that, based upon the finding of the learned trial Judge [reported [\[1972\] 6 W.W.R. 557](#)] which was not disturbed by the Court of Appeal [[\[1974\] 6 W.W.R. 236, 53 D.L.R. \(3d\) 85](#)], the respondents knew, prior to the completion of the financial statement, that it would be used by Sedco, by the bank with which the company was doing business and by a potential investor in equity capital, the respondents owed a duty of care, in the preparation of that financial statement, to that potential investor (the appellant), even though they were not aware of his actual identity.

38 I would dispose of the appeal in the manner proposed by my brother Dickson.

Practice --- Parties — Representative or class actions — Procedural requirements

Plaintiff brought action as representative of 30,000 nearby residents against city for compensatory and punitive damages for pollution emanating from landfill — Action was not certified as class action — Allowing class action would not serve interests of access to justice, and behavior modification was not serious concern — Class Proceedings Act, 1992, S.O. 1992, c. 6.

Municipal law --- Municipal liability — Practice and procedure — Actions — Parties — General

Plaintiff brought action as representative of 30,000 nearby residents against city for compensatory and punitive damages for pollution emanating from landfill — Action was not certified as class action — Allowing class action would not serve interests of access to justice, and behavior modification was not serious concern — Class Proceedings Act, 1992, S.O. 1992, c. 6.

Environmental law --- Statutory protection of environment — Practice and procedure — Parties

Plaintiff brought action as representative of 30,000 nearby residents against city for compensatory and punitive damages for pollution emanating from landfill — Action was not certified as class action — Allowing class action would not serve interests of access to justice, and behavior modification was not serious concern — Class Proceedings Act, 1992, S.O. 1992, c. 6.

Procédure --- Parties — Recours collectifs — Exigences procédurales

À titre de représentant de 30 000 résidents voisins, le demandeur a intenté contre la ville une action en dommages matériels et exemplaires pour la pollution provenant d'un site d'enfouissement des déchets — Action n'a pas été certifiée comme recours collectif — Autoriser le recours collectif ne favoriserait pas l'accès à la justice, et la modification des comportements ne représentait pas une considération importante — Loi de 1992 sur les recours collectifs, L.O. 1992, c. 6.

Droit municipal --- Responsabilité municipale — Procédure — Actions — Parties — En général

À titre de représentant de 30 000 résidents voisins, le demandeur a intenté contre la ville une action en dommages matériels et exemplaires pour la pollution provenant d'un site d'enfouissement des déchets — Action n'a pas été certifiée comme recours collectif — Autoriser le recours collectif ne favoriserait pas l'accès à la justice, et la modification des comportements ne représentait pas une considération importante — Loi de 1992 sur les recours collectifs, L.O. 1992, c. 6.

Droit de l'environnement --- Protection législative de l'environnement — Procédure — Parties

À titre de représentant de 30 000 résidents voisins, le demandeur a intenté contre la ville une action en dommages matériels et exemplaires pour la pollution provenant d'un site d'enfouissement des déchets — Action n'a pas été certifiée comme recours collectif — Autoriser le recours collectif ne favoriserait pas l'accès à la justice, et la modification des comportements ne représentait pas une considération importante — Loi de 1992 sur les recours collectifs, L.O. 1992, c. 6.

The plaintiff sought to pursue his action against the city as the representative of 30,000 other residents who lived in the vicinity of a landfill owned and operated by the city, from which the plaintiff complained physical and noise pollution was emanating. The motions judge found that the plaintiff had satisfied the certification requirements in s. 5(1) of the *Class Proceedings Act*, 1992 and certified the action as a class proceeding. The Divisional Court overturned the certification order on the grounds that the plaintiff had not stated an identifiable class and had not satisfied the commonality requirement. The certification order was set aside without prejudice to the plaintiff's right to bring a fresh application on further evidence. The Court of Appeal dismissed the plaintiff's appeal, agreeing that commonality had not been established, and affirming the Divisional Court's order except insofar as it would have allowed the plaintiff to bring a fresh application on further evidence. The plaintiff appealed.

**Held:** The appeal was dismissed.

An identifiable class existed within the meaning of s. 5(1)(b) and was defined by reference to objective criteria: a person was a member of the class if he or she owned or occupied property inside a specified area within a specified period of time.

The plaintiff showed a sufficient basis in fact to satisfy the commonality requirement under s. 5(1)(c). The plaintiff submitted complaint records from the Ministry of Environment and Energy and the Metropolitan Works Department which documented hundreds of complaints over a 13-year period.

However, a class proceeding was not the preferable procedure for resolution of the common issues as required by s. 5(1)(d). With respect to judicial economy, any common issue was negligible in relation to the individual issues. While each member of the class would have to establish that the landfill emitted physical or noise pollution, there was no reason to believe that pollution was distributed evenly across the geographical area or time period specified in the class definition.

Allowing the class action would not serve the interests of access to justice. If the claims were so small as to engage access to justice concerns, the no-fault small claims trust fund administered by the Ministry of the Environment to cover individual claims of up to \$5,000 arising out of "offsite impact", would likely provide redress more quickly than the judicial system. If class members had more substantial claims, they would likely find it worthwhile to bring individual actions.

Behavior modification was not a significant concern. Allowing a class action would not serve the end of holding accountable those who cause widespread but individually minimal harm. If individual class members had substantial claims, they would likely be willing to prosecute those claims individually, or, if the claims were small, they could obtain compensation through the trust fund. In either case, the city would be forced to internalize the costs of its conduct.

Le demandeur voulait poursuivre son action contre la ville à titre de représentant des 30 000 autres résidents qui vivaient dans les environs d'un site d'enfouissement des déchets que la ville exploitait en tant que propriétaire. Le demandeur soutenait que de la pollution physique et du bruit provenaient de la décharge. Le juge saisi de la requête a estimé que le demandeur avait satisfait aux exigences de la certification énoncées à l'art. 5(1) de la *Loi de 1992 sur les recours collectifs* et a certifié l'action en tant que recours collectif. La Cour divisionnaire a infirmé l'ordonnance de certification au motif que le demandeur n'avait pas prouvé l'existence d'un groupe identifiable et n'avait pas satisfait à l'exigence des questions communes. L'ordonnance accordant la certification a été annulée sans préjudice au droit du demandeur de présenter une nouvelle demande étayée par une preuve additionnelle. La Cour d'appel a rejeté le pourvoi du demandeur, puisque qu'elle était d'accord que l'existence des questions communes n'avait pas été établie, et a maintenu l'ordonnance de la Cour divisionnaire à l'exception de l'autorisation de présenter une nouvelle demande étayée par une preuve additionnelle. Le demandeur a interjeté appel.

**Arrêt:** Le pourvoi a été rejeté.

Un groupe identifiable existait au sens de l'art. 5(1)b) et il était défini d'après un critère objectif: une personne était membre d'un groupe lorsqu'elle était propriétaire ou occupait un terrain à l'intérieur d'une région spécifique pendant une période de temps spécifique.

Le demandeur a démontré l'existence d'une base factuelle pour remplir l'exigence des questions communes de l'art. 5(1)c). Le demandeur a présenté les rapports de plaintes du ministère de l'Environnement et de l'Énergie et du Service des travaux publics qui documentaient des centaines de plaintes reçues pendant une période de plus de 13 ans.

Un recours collectif n'était toutefois pas la meilleure procédure pour résoudre les questions communes, comme l'exigeait l'art. 5(1)d). En ce qui a trait à l'économie des ressources judiciaires, toute question commune était négligeable relativement aux

questions individuelles. En dépit du fait que chaque membre du groupe aurait à prouver que la décharge faisait de la pollution physique ou du bruit, il n'y avait aucune raison permettant de croire que la pollution était la même dans toute la région géographique ou pendant toute la période de temps indiquée dans la définition du groupe.

Autoriser le recours collectif ne favoriserait pas l'accès à la justice. Si les demandes étaient assez modestes pour que se pose la question de l'accès à la justice, le fonds d'indemnisation pour la responsabilité sans faute, géré par le ministère de l'Environnement dans le but de couvrir les réclamations individuelles d'un maximum de 5 000 \$ qui résultent d'incidents externes, devrait probablement permettre d'obtenir réparation plus rapidement que ne le permettrait la voie judiciaire. Si leurs réclamations étaient plus importantes, les membres du groupe arriveraient probablement à la conclusion qu'il vaut la peine d'intenter une action individuelle.

La modification des comportements ne représentait pas une considération importante. Autoriser le recours collectif ne contribuerait pas à la réalisation de l'objectif voulant que ceux qui causent des dommages étendus mais individuellement minimes en soient tenus responsables. Si les membres individuels du recours collectif avaient des réclamations importantes, ils seraient probablement d'accord pour poursuivre leurs réclamations individuellement; si les réclamations étaient modestes, ils pourraient être indemnisés par le fonds d'indemnisation. Dans tous les cas, la ville serait forcée d'absorber les coûts de son comportement.

(N.S.) 198, (sub nom. *Hollick v. Toronto (City)*) 42 O.R. (3d) 473, 31 C.P.C. (4th) 64, 1998 CarswellOnt 4880, [1998] O.J. No. 5267 (Ont. Div. Ct.), qui avait renversé l'arrêt publié à (1998), 18 C.P.C. (4th) 394, 27 C.E.L.R. (N.S.) 48, 1998

CarswellOnt 1453, [1998] O.J. No. 1288 (Ont. Gen. Div.), qui avait certifié à titre de recours collectif l'action intentée par le demandeur contre la ville en dommages-intérêts matériels et exemplaires pour la pollution provenant de la décharge de la Ville.

**The judgment of the court was delivered by McLachlin C.J.C.:**

1 The question raised by this appeal is whether the appellant has satisfied the certification requirements of Ontario's *Class Proceedings Act, 1992*, S.O. 1992, c. 6, and whether the appellant should accordingly be allowed to pursue his action against the City of Toronto as the representative of some 30,000 other residents who live in the vicinity of a landfill owned and operated by the City. For the following reasons, I conclude that the appellant has not satisfied the certification requirements, and consequently that he may pursue this action only on his own behalf, and not on behalf of the stated class.

**I. Facts**

2 The appellant Hollick complains of noise and physical pollution from the Keele Valley landfill, which is owned and operated by the respondent City of Toronto. The appellant sought certification, under Ontario's *Class Proceedings Act, 1992*, to represent some 30,000 people who live in the vicinity of the landfill, in particular:

- A. All persons who have owned or occupied property in the Regional Municipality of York, in the geographic area bounded by Rutherford Road on the south, Jane Street on the west, King Vaughan Road on the north and Yonge Street on the east, at any time on or after February 3, 1991, or where such person is deceased, the personal representative of the estate of the deceased person; and
- B. All living parents, grandparents, children, grandchildren, siblings, and spouses (within the meaning of s. 61 of the *Family Law Act*) of persons who were owners and/or occupiers . . .

The merits of the dispute between the appellant and the respondent are not at issue on this appeal. The only question is whether the appellant should be allowed to pursue his action as representative of the stated class.

3 Until 1983, the Keele Valley site was a gravel pit owned privately. It operated under a Certificate of Approval issued by the Ministry of the Environment in 1980. After the respondent purchased the site in 1983, the Ministry of the Environment issued a new Certificate of Approval. The 1983 Certificate covers an area of 375.9 hectares, of which 99.2 hectares are actual disposal area. The remainder of the land constitutes a buffer zone. The Certificate restricts Keele Valley to the receipt of non-hazardous municipal or commercial waste, and it sets out various other requirements relating to the processing and storage of waste at the site. It also provides for a Small Claims Trust Fund of \$100,000, administered by the Ministry of the Environment, to cover individual claims of up to \$5,000 arising out of "offsite impact".

4 The Ministry of the Environment monitors the Keele Valley site by employing two full-time inspectors at the site and by reviewing detailed reports that the respondent is required to file with the Ministry. In addition, the City of Vaughan has established the Keele Valley Liaison Committee, which is meant to provide a forum for community concerns related to the site. Until 1998, the appellant participated regularly at meetings of the Liaison Committee. Finally, the respondent maintains a telephone complaint system for members of the community.

5 The appellant's claim is that the Keele Valley landfill has unlawfully been emitting, onto his own lands and onto the lands of other class members:

- (a) large quantities of methane, hydrogen sulphide, vinyl chloride and other toxic gases, obnoxious odours, fumes, smoke and airborne, bird-borne or air-blown sediment, particulates, dirt and litter (collectively referred to as "Physical Pollution"); and
- (b) loud noises and strong vibrations (collectively referred to as "Noise Pollution").

The appellant filed a motion for certification on November 28, 1997. In support of his motion, the appellant pointed out that, in 1996, some 139 complaints were registered with the respondent's telephone complaint system. (Before this Court, the appellant

submitted that "at least 500" complaints were made "to various governmental authorities between 1991 and 1996" (factum, at para. 7.) The appellant also noted that, in 1996, the respondent was fined by the Ministry of Environment in relation to the composting of grass clippings at a facility located just north of the Keele Valley landfill. In the appellant's view, the class members form a well-defined group with a common interest *vis-à-vis* the respondent, and the suit would be best prosecuted as a class action. The appellant seeks, on behalf of the class, injunctive relief, \$500 million in compensatory damages and \$100 million in punitive damages.

6 The respondent disputes the legitimacy of the appellant's complaints and disagrees that the suit should be permitted to proceed as a class action. The respondent claims that it has monitored air emissions from the Keele Valley Site and the data confirm that "none of the air levels exceed Ministry of the Environment trigger levels". It notes that there are other possible sources for the pollution of which the appellant complains, including an active quarry, a private transfer station for waste, a plastics factory, and an asphalt plant. In addition, some farms in the area have private compost operations. The respondent also argues that the number of registered complaints — it says that 150 people complained over the six-year period covered in the motion record — is not high given the size of the class. Finally, it notes that, to date, no claims have been made against the small claims trust fund.

## II. Judgments

7 The motions judge, Jenkins J., found that the appellant had satisfied each of the five certification requirements set out in s. 5(1) of the *Class Proceedings Act*, 1992: ([1998](#), 27 C.E.L.R. (N.S.) 48 (Ont. Gen. Div.). He found that the appellant's statement of claim disclosed causes of action under s. 99 of the *Environmental Protection Act*, R.S.O. 1990, c. E. 19, and under the rule in *Rylands v. Fletcher* ([1868](#)), L.R. 3 H.L. 330 (U.K. H.L.); that the appellant had defined an identifiable class of two or more persons; that the issues of liability and punitive damages were common to the class; and that a class action would be the preferable procedure for resolving the complaints of the class. Finally, he found that the appellant would be an adequate representative for the class and that the appellant had set out a workable litigation plan. Though Jenkins J. struck out the appellant's claim for injunctive relief on the ground that damages would be a sufficient remedy and rejected his claims under the *Family Law Act*, R.S.O. 1990, c. F. 3, on the grounds that the facts pleaded "cannot . . . establish a basis for a claim for loss of care, guidance, and companionship" (p. 62). Jenkins J. concluded that the appellant had satisfied the certification requirements of s. 5(1). Accordingly he ordered that the appellant be allowed to pursue his action as representative of the stated class.

8 The Ontario Divisional Court, *per* O'Leary J., overturned the certification order on the grounds that the appellant had not stated an identifiable class and had not satisfied the commonality requirement: ([1998](#), 42 O.R. (3d) 473 (Ont. Div. Ct.). O'Leary J. interpreted the identifiable class requirement to require that "there be a class that can all pursue the same cause of action" against the defendant. He noted that "[t]o pursue such cause of action, the members of the class must have suffered the interference with use and enjoyment of property complained of in the statement of claim" (p. 479). O'Leary J. concluded that the appellant had not stated an identifiable class (at pp. 479-80):

[T]he evidence does not make it likely that th[e] 30,000 [class members] suffered such interference. It cannot be assumed that the complaints made to Toronto make it likely that the landfill was the cause of the odour or thing complained about. . . . [E]ven if one were to assume that the Keele Valley landfill site was the source of all the complaints, 150 people making complaints over a seven-year period does not make it likely that some 30,000 persons had their enjoyment of their property interfered with.

For the same reasons, he concluded that the appellant had not satisfied the commonality requirement, writing that "[b]ecause the class that was certified . . . bears no resemblance to any group that was on the evidence likely injured by the landfill operation, there are no apparent common issues relating to the members of the class" (p. 480). O'Leary J. set aside the certification order without prejudice to the plaintiff's right to bring a fresh application on further evidence.

9 The Court of Appeal for Ontario, *per* Carthy J.A., dismissed Hollick's appeal ([1999](#), 46 O.R. (3d) 257 (Ont. C.A.)), agreeing with the Divisional Court that commonality had not been established. Citing *Bywater v. Toronto Transit Commission* ([1998](#), 27 C.P.C. (4th) 172 (Ont. Gen. Div.)), Carthy J.A. noted that the definition of a class should not depend on the merits of

the litigation. However, he saw no bar to a court's looking beyond the pleadings to determine whether the certification criteria had been satisfied. "If it were otherwise", he noted, "any statement of claim alleging the existence of an identifiable group of people would foreclose further consideration by the court" (p. 264). Carthy J.A. acknowledged that a court should not test the existence of a class by demanding evidence that each member of the purported class have, individually, a claim on the merits. The court should, however, demand "evidence to give some credence to the allegation that . . . 'there is an identifiable class . . . '".

10 Carthy J.A. did not find it necessary to resolve the issue of whether the appellant had stated an identifiable class, because in his view the appellant had not satisfied the commonality requirement. In Carthy J.A.'s view, proof of nuisance was essential to each of the appellant's claims. Because a nuisance claim requires the plaintiff to make an *individualized* showing of harm, there was no commonality between the class members. Carthy J.A. wrote (at pp. 266-67):

This group of 30,000 people is not comparable to patients with implants, the occupants of a wrecked train or those who have been drinking polluted water. They are individuals whose lives have each been affected, or not affected, in a different manner and degree and each may or may not be able to hold the respondent liable for a nuisance. . . .

No common issue other than liability was suggested and I cannot devise one that would advance the litigation.

Carthy J.A. dismissed the appeal, affirming the Divisional Court's order except insofar as it would have allowed the appellant to bring a fresh application on further evidence.

### III. Legislation

11 *Class Proceedings Act, 1992*, S.O. 1992, c. 6

**5.** (1) The court shall certify a class proceeding on a motion under section 2,3 or 4 if,

- (a) the pleadings or the notice of application discloses a cause of action;
- (b) there is an identifiable class of two or more persons that would be represented by the representative plaintiff or defendant;
- (c) the claims or defences of the class members raise common issues;
- (d) a class proceeding would be the preferable procedure for the resolution of the common issues; and
- (e) there is a representative plaintiff or defendant who,
  - (i) would fairly and adequately represent the interests of the class,
  - (ii) has produced a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members of the proceeding, and
  - (iii) does not have, on the common issues for the class, an interest in conflict with the interests of other class members.

**6.** The court shall not refuse to certify a proceeding as a class proceeding solely on any of the following grounds:

1. The relief claimed includes a claim for damages that would require individual assessment after determination of the common issues.
2. The relief claimed relates to separate contracts involving different class members.
3. Different remedies are sought for different class members.
4. The number of class members or the identity of each class member is not known.

5. The class includes a subclass whose members have claims or defences that raise common issues not shared by all class members.

#### IV. Issues

12 Should the appellant be permitted to prosecute this action on behalf of the class described in his statement of claim?

#### V. Analysis

13 Ontario's *Class Proceedings Act, 1992*, like similar legislation adopted in British Columbia and Quebec, allows a member of a class to prosecute a suit on behalf of the class: see Ontario *Class Proceedings Act, 1992*, s. 2(1); see also Quebec *Code of Civil Procedure*, R.S.Q., c. C-25, Book IX; British Columbia *Class Proceedings Act*, R.S.B.C. 1996, c. 50. In order to commence such a proceeding, the person who seeks to represent the class must make a motion for an order certifying the action as a class proceeding and recognizing him or her as the representative of the class: see *Class Proceedings Act, 1992*, s. 2(2). Section 5 of the Act sets out five criteria by which a motions judge is to assess whether the class should be certified. If these criteria are satisfied, the motions judge is required to certify the class.

14 The legislative history of the *Class Proceedings Act, 1992*, makes clear that the Act should be construed generously. Before Ontario enacted the *Class Proceedings Act, 1992*, class actions were prosecuted in Ontario under the authority of Rule 12.01 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194. That rule provided that

[w]here there are numerous persons having the same interest, one or more of them may bring or defend a proceeding on behalf or for the benefit of all, or may be authorized by the court to do so.

While that rule allowed courts to deal with relatively simple class actions, it became clear in the latter part of the 20th century that Rule 12.01 was not well-suited to the kinds of complicated cases that were beginning to come before the courts. These cases reflected "[t]he rise of mass production, the diversification of corporate ownership, the advent of the mega-corporation, and the recognition of environmental wrongs": *Western Canadian Shopping Centres Inc. v. Dutton*, 2001 SCC 46 (S.C.C.), at para. 26. They often involved vast numbers of interested parties and complex, intertwined legal issues — some common to the class, some not. While it would have been possible for courts to accommodate moderately complicated class actions by reliance on their own inherent power over procedure, this would have required courts to devise *ad hoc* solutions to procedural complexities on a case-by-case basis: see *Western Canadian Shopping Centres Inc.*, at para. 51. The *Class Proceedings Act, 1992*, was adopted to ensure that the courts had a procedural tool sufficiently refined to allow them to deal efficiently, and on a principled rather than *ad hoc* basis, with the increasingly complicated cases of the modern era.

15 The Act reflects an increasing recognition of the important advantages that the class action offers as a procedural tool. As I discussed at some length in *Western Canadian Shopping Centres Inc.* (at paras. 27-29), class actions provide three important advantages over a multiplicity of individual suits. First, by aggregating similar individual actions, class actions serve judicial economy by avoiding unnecessary duplication in fact-finding and legal analysis. Second, by distributing fixed litigation costs amongst a large number of class members, class actions improve access to justice by making economical the prosecution of claims that any one class member would find too costly to prosecute on his or her own. Third, class actions serve efficiency and justice by ensuring that actual and potential wrongdoers modify their behaviour to take full account of the harm they are causing, or might cause, to the public. In proposing that Ontario adopt class action legislation, the Ontario Law Reform Commission identified each of these advantages: see Ontario Law Reform Commission, *Report on Class Actions* (1982), vol. I, at pp. 117-45; see also Ministry of the Attorney General, *Report of the Attorney General's Advisory Committee on Class Action Reform* (February 1990), at pp. 16-18. In my view, it is essential therefore that courts not take an overly restrictive approach to the legislation, but rather interpret the Act in a way that gives full effect to the benefits foreseen by the drafters.

16 It is particularly important to keep this principle in mind at the certification stage. In its 1982 report, the Ontario Law Reform Commission proposed that new class action legislation include a "preliminary merits test" as part of the certification requirements. The proposed test would have required the putative class representative to show that "there is a reasonable

possibility that material questions of fact and law common to the class will be resolved at trial in favour of the class": *Report on Class Actions*, *supra*, vol. III, at p. 862. Notwithstanding the recommendation of the Ontario Law Reform Commission, Ontario decided not to adopt a preliminary merits test. Instead it adopted a test that merely requires that the statement of claim "disclose[] a cause of action": see *Class Proceedings Act, 1992*, s. 5(1)(a). Thus the certification stage is decidedly not meant to be a test of the merits of the action: see *Class Proceedings Act, 1992*, s. 5(5) ("An order certifying a class proceeding is not a determination of the merits of the proceeding"); see also *Caputo v. Imperial Tobacco Ltd. (1997)*, 34 O.R. (3d) 314 (Ont. Gen. Div.), at p. 320 ("any inquiry into the merits of the action will not be relevant on a motion for certification"). Rather the certification stage focuses on the *form* of the action. The question at the certification stage is not whether the claim is likely to succeed, but whether the suit is appropriately prosecuted as a class action: see generally *Report of the Attorney General's Advisory Committee on Class Action Reform*, at pp. 30-33.

17 With these principles in mind, I turn now to the case at bar. The issue is whether the appellant has satisfied the certification requirements set out in s. 5 of the Act. The respondent does not dispute that the appellant's statement of claim discloses a cause of action. The first question, therefore, is whether there is an identifiable class. In my view, there is. The appellant has defined the class by reference to objective criteria; a person is a member of the class if he or she owned or occupied property inside a specified area within a specified period of time. Whether a given person is a member of the class can be determined without reference to the merits of the action. While the appellant has not named every member of the class, it is clear that the class is bounded (that is, not unlimited). There is, therefore, an identifiable class within the meaning of s. 5(1)(b): see J. H. Friedenthal, M. K. Kane and A. R. Miller, *Civil Procedure* (2nd ed. 1993), at pp. 726-27; *Bywater*, *supra*, at pp. 175-76; *Western Canadian Shopping Centres Inc.*, *supra*, at para. 38.

18 A more difficult question is whether "the claims . . . of the class members raise common issues", as required by s. 5(1)(c) of the *Class Proceedings Act, 1992*. As I wrote in *Western Canadian Shopping Centres Inc.*, the underlying question is "whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis". Thus an issue will be common "only where its resolution is necessary to the resolution of each class member's claim" (para. 39). Further, an issue will not be "common" in the requisite sense unless the issue is a "substantial . . . ingredient" of each of the class members' claims.

19 In this case there is no doubt that, if each of the class members has a claim against the respondent, some aspect of the issue of liability is common within the meaning of s. 5(1)(c). For any putative class member to prevail individually, he or she would have to show, among other things, that the respondent emitted pollutants into the air. At least this aspect of the liability issue (and perhaps other aspects as well) would be common to all those who have claims against the respondent. The difficult question, however, is whether each of the putative class members does indeed have a claim — or at least what might be termed a "colourable claim" — against the respondent. To put it another way, the issue is whether there is a rational connection between the class as defined and the asserted common issues: see *Western Canadian Shopping Centres Inc.*, at para. 38 ("the criteria [defining the class] should bear a rational relationship to the common issues asserted by all class members"). In asserting that there is such a relationship, the appellant points to the numerous complaints against the Keele Valley landfill filed with the Ministry of Environment. In the appellant's view, the large number of complaints shows that many others in the putative class, if not all of them, are similarly situated *vis-à-vis* the respondent. For its part the respondent asserts that "150 people making complaints over a seven-year period does not make it likely that some 30,000 people had their enjoyment of their property interfered with" (Divisional Court's judgment, at pp. 479-80). The respondent also quotes the Ontario Court of Appeal's judgment (at p. 264), which declined to find commonality on the grounds that:

[i]n circumstances such as are described in the statement of claim one would expect to see evidence of the existence of a body of persons seeking recourse for their complaints, such as, a history of "town meetings", demands, claims against the no fault fund, [and] applications to amend the certificate of approval . . .

20 The respondent is of course correct to state that implicit in the "identifiable class" requirement is the requirement that there be some rational relationship between the class and common issues. Little has been said about this requirement because, in the usual case, the relationship is clear from the facts. In a single-incident mass tort case (for example, an air plane crash), the scope of the appropriate class is not usually in dispute. The same is true in product liability actions (where the class is usually composed of those who purchased the product), or securities fraud actions (where the class is usually composed of those who

owned the stock). In a case such as this, however, the appropriate scope of the class is not so obvious. It falls to the putative representative to show that the class is defined sufficiently narrowly.

21 The requirement is not an onerous one. The representative need not show that *everyone* in the class shares the same interest in the resolution of the asserted common issue. There must be some showing, however, that the class is not *unnecessarily* broad — that is, that the class could not be defined more narrowly without arbitrarily excluding some people who share the same interest in the resolution of the common issue. Where the class could be defined more narrowly, the court should either disallow certification or allow certification on condition that the definition of the class be amended: see W. K. Branch, *Class Actions in Canada* (1998), § 4.205; *Webb v. K-Mart Canada Ltd.* (1999), 45 O.R. (3d) 389 (Ont. S.C.J.) (claim for compensation for wrongful dismissal; class definition overbroad because included those who could be proven to have been terminated for just cause); *Mouhteros v. DeVry Canada Inc.* (1998), 41 O.R. (3d) 63 (Ont. Gen. Div.) (claim against school for misrepresentations about marketability of students after graduation; class definition overinclusive because included students who had found work after graduation).

22 The question arises, then, to what extent the class representative should be allowed or required to introduce evidence in support of a certification motion. The recommendations of the Ontario Law Reform Commission's 1982 report on this point should perhaps be given limited weight because, as discussed above, those recommendations were made in the context of a proposal that the certification stage include a preliminary merits test: see *Report on Class Actions, supra*, vol. II, at pp. 422-26 (recommending that *both* the representative plaintiff and the defendant be *required*, at the certification stage, to file one or more affidavits setting out all the facts upon which they intend to rely, and that the parties be permitted to examine the deponents of any such affidavits). The 1990 Report of the Attorney General's Advisory Committee is perhaps a better guide. That Report suggests that "[u]pon a motion for certification . . . , the representative plaintiff *shall* and the defendant *may* serve and file one or more affidavits setting forth the material facts upon which each intends to rely" (emphasis added): see *Report of the Attorney General's Advisory Committee on Class Action Reform, supra*, at p. 33. In my view the Advisory Committee's report appropriately requires the class representative to come forward with sufficient evidence to support certification, and appropriately allows the opposing party an opportunity to respond with evidence of its own.

23 This appears to be the existing practice of Ontario courts. In *Caputo, supra*, the representative brought a class action against cigarette manufacturers claiming that they had knowingly misled the public about the risks associated with smoking. In support of the certification motion, the class representative filed only a solicitor's affidavit based on information and belief. The court held that the evidence adduced by the class representative was insufficient to support certification, and that the defendant manufacturers should be allowed to examine the individual class members in order to obtain the information required to allow the court to decide the certification motion. The "primary concern", the court wrote, is "[t]he adequacy of the record", which "will vary in the circumstances of each case" (p. 319).

24 In *Taub v. Manufacturers Life Insurance Co.* (1998), 40 O.R. (3d) 379 (Ont. Gen. Div.), the representative sought to bring a class action on behalf of the residents in her apartment building, alleging that mould in the building was exposing the residents to health risks. The representative provided no evidence, however, suggesting that the mould had been found anywhere but in her own apartment. The court wrote (at pp. 380-81) that "the CPA requires the representative plaintiff to provide a certain *minimum evidentiary basis* for a certification order" (emphasis added). While the *Class Proceedings Act, 1992* does not require a preliminary merits showing, "the judge must be satisfied of certain basi[c] facts required by s. 5 of the CPA as the basis for a certification order."

25 I agree that the representative of the asserted class must show some basis in fact to support the certification order. As the court in *Taub* held, that is not to say that there must be affidavits from members of the class or that there should be any assessment of the merits of the claims of other class members. However, the *Report of the Attorney General's Advisory Committee on Class Action Reform* clearly contemplates that the class representative will have to establish an evidentiary basis for certification: see *Report*, at p. 31 ("evidence on the motion for certification should be confined to the [certification] criteria"). The Act, too, obviously contemplates the same thing: see s. 5(4) ("The court may adjourn the motion for certification to permit the parties to amend their materials or pleadings or to permit further evidence."). In my view, the class representative must show some basis in fact for each of the certification requirements set out in s.5 of the Act, other than the requirement that the pleadings disclose

a cause of action. That latter requirement is of course governed by the rule that a pleading should not be struck for failure to disclose a cause of action unless it is "plain and obvious" that no claim exists: see Branch, *supra*, at § 4.60.

26 In my view the appellant has met his evidentiary burden here. Together with his motion for certification, the appellant submitted some 115 pages of complaint records, which he obtained from the Ontario Ministry of Environment and Energy and the Toronto Metropolitan Works Department. The records of the Ministry of Environment and Energy document almost 300 complaints between July 1985 and March 1994, approximately 200 complaints in 1995, and approximately 150 complaints in 1996. The Metropolitan Works Department records document almost 300 complaints between July 1983 and the end of 1993. As some people may have registered their complaints with both the Ministry of Energy and the Metropolitan Works Department, it is difficult to determine exactly how many separate complaints were brought in any year. It is sufficiently clear, however, that many individuals besides the appellant were concerned about noise and physical emissions from the landfill. I note, further, that while some areas within the geographical area specified by the class definition appear to have been the source of a disproportionate number of complaints, complaints were registered from many different areas within the specified boundaries. I conclude, therefore, that the appellant has shown a sufficient basis in fact to satisfy the commonality requirement.

27 I cannot conclude, however, that "a class proceeding would be the preferable procedure for the resolution of the common issues", as required by s. 5(d). The parties agree that, in the absence of legislative guidance, the preferability inquiry should be conducted through the lens of the three principal advantages of class actions — judicial economy, access to justice, and behaviour modification: see also *Abdool v. Anaheim Management Ltd.* (1995), 21 O.R. (3d) 453 (Ont. Div. Ct.); compare British Columbia *Class Proceedings Act*, s. 4(2) (listing factors that court must consider in assessing preferability). Beyond that, however, the appellant and respondent part ways. In oral argument before this Court, the appellant contended that the court must look to the common issues alone, and ask whether the common issues, taken in isolation, would be better resolved in a class action rather than in individual proceedings. In response, the respondent argued that the common issues must be viewed contextually, in light of all the issues — common and individual — raised by the case. The respondent also argued that the inquiry should take into account the availability of alternative avenues of redress.

28 The Report of the Attorney General's Advisory Committee makes clear that "preferable" was meant to be construed broadly. The term was meant to capture two ideas: first the question of "whether or not the class proceeding [would be] a fair, efficient and manageable method of advancing the claim", and second, the question of whether a class proceeding would be preferable "in the sense of preferable to other procedures such as joinder, test cases, consolidation, and so on": *Report of the Attorney General's Advisory Committee on Class Action Reform*, *supra*, at p. 32. In my view, it would be impossible to determine whether the class action is preferable in the sense of being a "fair, efficient and manageable method of advancing the claim" without looking at the common issues in their context.

29 The Act itself, of course, requires only that a class action be the preferable procedure for "the resolution of the *common issues*" (emphasis added), and not that a class action be the preferable procedure for the resolution of the class members' claims. I would not place undue weight, however, on the fact that the Act uses the phrase "resolution of the common issues" rather than "resolution of class members' claims". As one commentator writes,

The [American] class action [rule] requires that the class action be the superior method to resolve the "controversy." The B.C. and Ontario Acts require that the class proceeding be the preferable procedure for the resolution of the "common issues" (as opposed to the entire controversy). [This] distinction[] can be seen as creating a lower threshold for certification in Ontario and B.C. than in the U.S. However, it is still important in B.C. and Ontario to assess the litigation as a whole, including the individual hearing stage, in order to determine whether the class action is the preferable means of resolving the common issues. In the abstract, common issues are always best resolved in a common proceeding. However, it is important to adopt a practical cost-benefit approach to this procedural issue, and to consider the impact of a class proceeding on class members, the defendants, and the court.

See Branch, *supra*, at § 4.690. I would endorse that approach.

30 The question of preferability, then, must take into account the importance of the common issues in relation to the claims as a whole. It is true, of course, that the Act contemplates that class actions will be allowable even where there are substantial individual issues: see s. 5. It is also true that the drafters rejected a requirement, such as is contained in the American federal class action rule, that the common issues "predominate" over the individual issues: see *Federal Rules of Civil Procedure*, Rule 23(b) (3) (stating that class action maintainable only if "questions of law or fact common to the members of the class predominate over any questions affecting only individual members"); see also British Columbia *Class Proceedings Act*, s. 4(2)(a) (stating that, in determining whether a class action is the preferable procedures, the court must consider "whether questions of fact or law common to the members of the class predominate over any questions affecting only individual members"). I cannot conclude, however, that the drafters intended the preferability analysis to take place in a vacuum. There must be a consideration of the common issues in context. As the Chair of the Attorney General's Advisory Committee put it, the preferability requirement asks that the class representative "demonstrate that, given all of the circumstances of the particular claim, [a class action] would be preferable to other methods of resolving these claims and, in particular, that it would be preferable to the use of individual proceedings" (emphasis added): M. G. Cochrane, *Class Actions: A Guide to the Class Proceedings Act*, 1992 (1993), at p. 27.

31 I think it clear, too, that the court cannot ignore the availability of avenues of redress apart from individual actions. As noted above, the preferability requirement was intended to capture the question of whether a class proceeding would be preferable "in the sense of preferable to other procedures such as joinder, test cases, consolidation and so on": see *Report of the Attorney General's Advisory Committee on Class Action Reform*, *supra*, at p. 32; see also Cochrane, *supra*, at p. 27; M. A. Eizenga, M. J. Peerless and C. M. Wright, *Class Actions Law and Practice* (loose-leaf), at § 3.62 ("[a]s part of the determination with respect to preferability, it is appropriate for the court to review alternative means of adjudicating the dispute which is before it"). In my view, the preferability analysis requires the court to look to all reasonably available means of resolving the class members' claims, and not just at the possibility of individual actions.

32 I am not persuaded that the class action would be the preferable means of resolving the class members' claims. Turning first to the issue of judicial economy, I note that any common issue here is negligible in relation to the individual issues. While each of the class members must, in order to recover, establish that the Keele Valley landfill emitted physical or noise pollution, there is no reason to think that any pollution was distributed evenly across the geographical area or time period specified in the class definition. On the contrary, it is likely that some areas were affected more seriously than others, and that some areas were affected at one time while other areas were affected at other times. As the Divisional Court noted, "[e]ven if one considers only the 150 persons who made complaints — those complaints relate to different dates and different locations spread out over seven years and 16 square miles" (p. 480). Some class members are close to the site, some are further away. Some class members are close to other possible sources of pollution. Once the common issue is seen in the context of the entire claim, it becomes difficult to say that the resolution of the common issue will significantly advance the action.

33 Nor would allowing a class action here serve the interests of access to justice. The appellant posits that class members' claims may be so small that it would not be worthwhile for them to pursue relief individually. In many cases this is indeed a real danger. As noted above, one important benefit of class actions is that they divide fixed litigation costs over the entire class, making it economically feasible to prosecute claims that might otherwise not be brought at all. I am not fully convinced, however, that this is the situation here. The central problem with the appellant's argument is that, if it is in fact true that the claims are so small as to engage access to justice concerns, it would seem that the Small Claims Trust Fund would provide an ideal avenue of redress. Indeed, since the Small Claims Trust Fund establishes a no-fault scheme, it is likely to provide redress far more quickly than would the judicial system. If, on the other hand, the Small Claims Trust Fund is not sufficiently large to handle the class members' claims, one must question whether the access to justice concern is engaged at all. If class members have substantial claims, it is likely that they will find it worthwhile to bring individual actions. The fact that no claims have been made against the Small Claims Trust Fund may suggest that the class members' claims are either so small as to be non-existent or so large as to provide sufficient incentive for individual action. In either case access to justice is not a serious concern. Of course, the existence of a compensatory scheme under which class members can pursue relief is not in itself grounds for denying a class action — even if the compensatory scheme promises to provide redress more quickly: see *Rumley v. British Columbia*,

**2001 SCC 69** (S.C.C.), at para. 38. The existence of such a scheme, however, provides one consideration that must be taken into account when assessing the seriousness of access-to-justice concerns.

34 For similar reasons I would reject the argument that behaviour modification is a significant concern in this case. Behavioural modification may be relevant to determining whether a class action should proceed. As noted in *Western Canadian Shopping Centres Inc.*, *supra*, at para. 29, "[w]ithout class actions, those who cause widespread but individually minimal harm might not take into account the full costs of their conduct, because for any one plaintiff the expense of bringing suit would far exceed the likely recovery". This concern is certainly no less pressing in the context of environmental litigation. Indeed, Ontario has enacted legislation that reflects a recognition that environmental harm is a cost that must be given due weight in both public and private decision-making: see *Environmental Bill of Rights, 1993*, S.O. 1993, c. 28; *Environmental Protection Act*, R.S.O. 1990, c. E.19. I am not persuaded, however, that allowing a class action here would serve that end. If individual class members have substantial claims against the respondent, we should expect that they will be willing to prosecute those claims individually; on the other hand if their claims are small, they will be able to obtain compensation through the Small Claims Trust Fund. In either case, the respondent will be forced to internalize the costs of its conduct.

35 I would note, further, that Ontario's environmental legislation provides other avenues by which the complainant here could ensure that the respondent takes full account of the costs of its actions. While the existence of such legislation certainly does not foreclose the possibility of environmental class actions, it does go some way toward addressing legitimate concerns about behaviour modification: see *Environmental Bill of Rights, 1993*, ss. 61(1) (stating that "[a]ny two persons resident in Ontario who believe that an existing policy, Act, regulation or instrument of Ontario should be amended, repealed or revoked in order to protect the environment may apply to the Environmental Commissioner for a review of the policy, Act, regulation or instrument by the appropriate minister") and 74(1) (stating that "[a]ny two persons resident in Ontario who believe that a prescribed Act, regulation or instrument has been contravened may apply to the Environmental Commissioner for an investigation of the alleged contravention by the appropriate minister"); *Environmental Protection Act*, ss. 14(1) (stating that "[d]espite any other provision of this Act or the regulations, no person shall discharge a contaminant or cause or permit the discharge of a contaminant into the natural environment that causes or is likely to cause an adverse effect"); 172(1) (stating that "[w]here a person complains that a contaminant is causing or has caused injury or damage to livestock or to crops, trees or other vegetation which may result in economic loss to such person, the person may, within fourteen days after the injury or damage becomes apparent, request the Minister to conduct an investigation"); and 186(1) (stating that "[e]very person who contravenes this Act or the regulations is guilty of an offence").

36 I conclude that the action does not meet the requirements set out in s. 5(1) of Ontario's *Class Proceedings Act, 1992*. Even on the generous approach advocated above, the appellant has not shown that a class action is the preferable means of resolving the claims raised here.

37 I should make one note on the scope of the holding in this case. The appellant took pains to characterize this case as raising the issue of whether Ontario's *Class Proceedings Act, 1992* permits environmental class actions. I would not frame the issue so broadly. While the appellant has not met the certification requirements here, it does not follow that those requirements could never be met in an environmental tort case. The question of whether an action should be permitted to be prosecuted as a class action is necessarily one that turns on the facts of the case. In this case there were serious questions about preferability. Other environmental tort cases may not raise the same questions. Those cases should be decided on their facts.

38 The appeal is dismissed. There will be no costs to either party.

*Appeal dismissed.*

Practice --- Pleadings — Statement of claim — Striking out for absence of reasonable cause of action — Cause not known in law

Practice --- Pleadings — Statement of claim — Striking out for absence of reasonable cause of action — Facts pleaded not supporting claim

Civil procedure — Pleadings — Striking out — No reasonable cause of action — Plaintiff suffering from disease allegedly caused by exposure to asbestos suing some defendants in negligence and alleging all defendants conspired to withhold information about dangers associated with asbestos — Defendant applying to have conspiracy action dismissed on grounds that statement of claim disclosed no reasonable cause of action — Action to be struck where it is "plain and obvious" statement of claim discloses no reasonable cause of action — Plaintiff's claim raising difficult points of law but still disclosing reasonable cause of action — Allegation of negligence not barring allegation of conspiracy — Determination of plaintiff's chance of success being improper on motion to strike.

The plaintiff was exposed to asbestos fibres during his employment as an electrician servicing various mining operations run by the defendants. He alleged that all of the defendants knew that asbestos could cause disease in those exposed to its fibres. In addition to suing the defendant mining companies for negligence, the plaintiff alleged that all of the defendants conspired to withhold information about the dangers associated with asbestos and that as a result of the conspiracy he contracted mesothelioma. One of the defendants applied to have the action against it, based solely on the conspiracy allegation, dismissed on the basis that it disclosed no reasonable claim. The trial judge allowed the motion. The Court of Appeal allowed an appeal from that decision stating that it was not possible at this stage of the proceedings to determine whether the facts supported an action in conspiracy. The defendants appealed.

**Held:**

Appeal dismissed.

The test to be applied to determine whether an action may be struck for disclosing no reasonable claim is to consider, assuming that the facts as stated in the statement of claim can be proved, whether it is "plain and obvious" that the plaintiff's statement of claim discloses no reasonable cause of action. If there is a chance that the plaintiff might succeed, then the plaintiff should be allowed to proceed to have the action tried. Neither the length and complexity of the issues, the novelty of the cause of action, nor the potential for the defendant to present a strong defence should prevent the plaintiff from proceeding with his or her case. Only if the action is certain to fail because it contains a radical defect, such as those listed in R. 19(24) should the relevant portions of a plaintiff's statement of claim be struck for disclosing no reasonable claim.

Here, it was plain and obvious that allowing this action to proceed would not amount to an abuse of process. While there has clearly been judicial reluctance to extend the scope of the tort of conspiracy beyond the commercial context, this court has never suggested that the tort could not have application in other contexts. Further, although the view has been expressed that modern commercial realities suggest that the action has lost much of its usefulness, it would be highly inappropriate to deny the plaintiff the opportunity to present his case when his allegations expressly fit within the court's previous pronouncements on the law on civil conspiracy.

The fact that a pleading reveals "an arguable, difficult or important point of law" cannot justify striking out part of the statement of claim. On the contrary, if a statement of claim raises such points of law, then it may well be critical that the action be allowed to proceed. Only in this way can we be sure that the common law in general, and the law of torts in particular, will continue to evolve to meet the legal challenges that arise in our modern industrial society.

A cause of action in conspiracy is not precluded on the ground that the plaintiff also alleges another cause of action. While it may be arguable that if one succeeds under a distinct nominate tort against an individual defendant then an action in conspiracy should not be available against that defendant, it is far from clear that the mere fact that a plaintiff alleges that a defendant committed other torts is a bar to pleading the tort of conspiracy. Whether the plaintiff should be barred from recovery under the tort of conspiracy can only be ascertained when it has first been established that the defendant did in fact commit the other alleged torts. Further, it is inappropriate on a motion to strike out a statement of claim to get into the question of whether the plaintiff's allegations concerning other nominate torts will be successful. This is a matter that should be considered at trial where evidence as to the other torts can be led and decided upon accordingly before turning to the determination of the tort of conspiracy.

**Words and phrases considered:**

**PLAIN AND OBVIOUS TEST**

[Considering] how the rules regarding the striking out of a statement of claim are to be applied, [the Supreme Court of Canada] has . . . consistently upheld the "plain and obvious" test.

. . . in *Operation Dismantle Inc. v. R.*, [1985] 1 S.C.R. 441 . . . At pp. 486-487 . . . I provided the following summary of the law in this area (with which the rest of the Court concurred):

The law then would appear to be clear. The facts pleaded are to be taken as proved. When so taken, the question is do they disclose a reasonable cause of action, i.e. a cause of action "with some chance of success" [*Drummond-Jackson v. British Medical Association*, [1970] 1 All E.R. 1094] or, as Le Dain J. put it in *Dowson v. Government of Canada* (1981), 37 N.R. 127 (F.C.A.), at p. 138, is it "plain and obvious that the action cannot succeed?"

Appeal from judgment of British Columbia Court of Appeal, [1989] B.C.W.L.D. 1516 (sub nom. *Hunt v. T & N plc*), setting aside judgment of Hollinrake J. dismissing action against one defendant for failing to disclose reasonable claim.

**The judgment of the court was delivered by Wilson J.:**

1 The issue raised in these appeals is whether it is open to the respondent to proceed with an action against the appellants for the tort of conspiracy. In particular, the appeals raise the question whether those portions of the respondent's statement of claim in which he alleges that the appellants conspired to withhold information concerning the effects of asbestos fibres disclose a reasonable claim within the meaning of R. 19(24)(a) of the British Columbia Rules of Court.

**1. The Facts**

2 The respondent, George Hunt, is a retired electrician who alleges that he was exposed to asbestos fibres over the course of his employment. Mr. Hunt has brought an action against Atlas Turner Inc., Asbestos Corporation Limited, The Asbestos Institute, Babcox & Wilcox Industries Ltd., Bell Asbestos Mines Limited, Caposite Insulations Ltd., Carey Canada Inc., Flintkote Mines Limited, Holmes Insulation Ltd., Johns-Manville Amiante Canada Inc., Lac D'Amiante du Québec Ltée., National Asbestos Mines Limited, The Quebec Asbestos Mining Association and T & N plc ("the defendants").

3 Mr. Hunt alleges that the defendants were involved in the mining of asbestos and the production and supply of a variety of asbestos products between 1940 and 1967. He alleges that after 1934 the defendants knew that asbestos fibres could cause disease in those exposed to the fibres. In addition to suing Atlas Turner, Babcock, Caposite, Holmes, Johns-Manville and T & N in negligence, Mr. Hunt alleges that all of the defendants conspired to withhold information about the dangers associated with asbestos and that as a result of that conspiracy he contracted mesothelioma.

4 The relevant portions of Mr. Hunt's statement of claim read as follows:

16. At various times, the particulars of which are well known to the defendants, including the period between 1940 and 1967, the defendants mined and processed asbestos and designed, manufactured, packaged, advertised, promoted, distributed and sold a variety of products containing asbestos fibres (the "Products"), the particulars of which are also well known to the defendants.

17. After about 1934 the defendants knew or ought to have known that the asbestos fibres contained in the Products could cause diseases, including cancer and asbestosis, in those who worked with or were otherwise exposed to those fibres.

18. After about 1934, some or all of the defendants conspired with each other with the predominant purpose of injuring the plaintiff [sic] and others who would be exposed to the asbestos fibres in the Products, by preventing this knowledge

becoming public knowledge and, in particular, by preventing it reaching the plaintiff and others who would be exposed to the asbestos fibres in the Products.

19. Alternatively, after about 1934, some or all of the defendants conspired with each other to prevent by unlawful means this knowledge becoming public knowledge and, in particular, to prevent it reaching the plaintiff and others who would be exposed to the asbestos fibres in the Products, in circumstances where the defendants knew or ought to have known that injury to the plaintiff and others who would be exposed to the asbestos fibres in the Products would result from the defendants' acts.

20. The defendants' acts in furtherance of the conspiracy referred to in paragraphs 18 and 19 include:

- (a) fraudulently, deceitfully or negligently suppressing, distorting and misrepresenting the results of medical and scientific research on the disease-causing effects of asbestos;
- (b) fraudulently, deceitfully or negligently misrepresenting the disease-causing effects of asbestos by disseminating incorrect, incomplete, outdated, misleading and distorted information about those effects;
- (c) fraudulently, deceitfully or negligently attempting to discredit doctors and scientists who claimed that asbestos caused disease;
- (d) fraudulently, deceitfully or negligently marketing and promoting the Products without any or adequate warning of the dangers they posed to those exposed to them; and
- (e) fraudulently, deceitfully or negligently attempting to influence to their benefit government regulation of the use of asbestos and the Products.

5 Carey Canada Inc. brought an application before the Supreme Court of British Columbia under R. 19(24)(a) of the British Columbia Rules of Court seeking to have the action against it, which was based solely on the allegations of conspiracy, dismissed on the basis that it disclosed no reasonable claim. Rule 19(24) provides:

(24) At any stage of a proceeding the court may order to be struck out or amended the whole or any part of an endorsement, pleading, petition or other document on the ground that

- (a) it discloses no reasonable claim or defence as the case may be, or
- (b) it is unnecessary, scandalous, frivolous or vexatious, or
- (c) it may prejudice, embarrass or delay the fair trial or hearing of the proceeding, or
- (d) it is otherwise an abuse of the process of the court,

and may grant judgment or order the proceeding to be stayed or dismissed and may order the costs of the application to be paid as between solicitor and client.

## 2. The Courts Below

### (a) *Supreme Court of British Columbia*

6 Hollinrake J. accepted Carey Canada's submission that the only damage that could be the subject of a conspiracy action was "direct damage". Although counsel's memorandum summarizing Hollinrake J.'s oral reasons for judgment does not explain precisely what he understood the term "direct damage" to mean, it would appear that he meant damage suffered by a plaintiff that flows directly from acts aimed specifically at that plaintiff. Hollinrake J. stated:

Dealing with the issue of direct or indirect damage, in the first kind of conspiracy Estey J. refers to the "predominant purpose" of the defendants' conduct [see *Can. Cement LaFarge Ltd. v. B.C. Lightweight Aggregate Ltd.*, [1983] 1 S.C.R. 452 at 471, [1983] 6 W.W.R. 385, 21 B.L.R. 254, 24 C.C.L.T. 111, 145 D.L.R. (3d) 385, 72 C.P.R. (2d) 1, 47 N.R. 191 [B.C.]]. I think this does import direct damage. The second type of conspiracy refers to conduct "directed towards the plaintiff". I think this imports direct damage. I think these conclusions are justified by what happened in *Can. Cement LaFarge Ltd.*

Hollinrake J. therefore allowed the motion and dismissed the action against Carey Canada as disclosing no reasonable claim.

**(b) British Columbia Court of Appeal**

7 By order of the British Columbia Court of Appeal (dated 30th March 1989), Flintkote Mines Limited and T & N plc were named as respondents to the appeal in the Court of Appeal.

8 Anderson J.A. (Macfarlane and Esson JJ.A. concurring) allowed the appeal [[1989] B.C.W.L.D. 1516 (sub nom. *Hunt v. T & N plc*)] and set aside Hollinrake J.'s order. Anderson J.A. explained his reasons:

(1) The cases relied upon by counsel for the respondent Carey Canada Inc. and the learned trial judge to the effect that there is no such tort as a conspiracy to injure by unlawful means where the damage is indirect, all relate to the area of competition in the marketplace and to labour-management disputes. They may not be applicable to the very different circumstances alleged in this case and to the very different social considerations.

(2) The arguments as to law and fact are intricate and complex and should be dealt with at trial after all the evidence is adduced. At this stage of the proceedings it is impossible to reach the conclusion that there is no cause of action in fact or law: see *Minnes v. Minnes* (1962), 39 W.W.R. 112 at 122, 34 D.L.R. (2d) 497 (B.C.C.A.).

9 Esson J.A. (Anderson and Macfarlane JJ.A. agreeing) gave additional reasons stressing that the "language of predominant purpose and direct damage" in *Can. Cement LaFarge Ltd.* had arisen in cases that involved competition and pure economic loss. In Mr. Hunt's case, however, the context was very different. Mr. Hunt had suffered personal injury and claimed that by conspiring to suppress information the defendants had created a foreseeable risk of causing him the harm which he in fact suffered. It was not possible at this stage in the proceedings to determine that the damage was not sufficiently direct to be able to support an action rooted in the tort of conspiracy. Esson J.A. specifically declined to embark upon a detailed consideration of the law of conspiracy, noting:

It has not generally been part of our tradition and, given the complexity and novelty of some of the issues raised in this case, it would I think be particularly undesirable to render such decisions, as it were, in a vacuum. For those reasons, as well as the reasons given by Mr. Justice Anderson, I agree in allowing the appeal.

**3. The Issues**

10 The issues that arise in this appeal are:

11 1. *In what circumstances may a statement of claim (or portions of it) be struck out?*

12 2. Should Mr. Hunt's allegations based on the tort of conspiracy be struck out?

**4. Analysis**

13

**(1) In What Circumstances May a Statement of Claim be Struck Out?**

14 Carey Canada's motion to have the action dismissed was made pursuant to R. 19(24)(a) of the British Columbia Rules of Court. This rule stipulates that a court may strike out any part of a statement of claim that "discloses no reasonable claim". The rules of practice with respect to striking out a statement of claim are similar in other provinces. In Ontario, for example, R. 21.01 of the Rules of Civil Procedure states:

21.01 (1) A party may move before a judge,

(a) for the determination, before trial, of a question of law raised by a pleading in an action where the determination of the question may dispose of all or part of the action, substantially shorten the trial or result in a substantial savings of costs; or

(b) to strike out a pleading on the ground that it discloses no reasonable cause of action or defence,

and the judge may make an order or grant judgment accordingly.

(2) No evidence is admissible on a motion,

(a) under clause (1)(a), except with leave of a judge or on consent of the parties;

(b) under clause (1)(b). [emphasis added]

15 Rule 19(24) of the British Columbia Rules of Court and analogous provisions in other provinces are the result of a "codification" of the court's power under its inherent jurisdiction to stay actions that are an abuse of process or that disclose no reasonable cause of action: see McLachlin and Taylor, British Columbia Practice, 2nd ed. (1979), vol. 1, p. 19-71. This process of codification first took place in England shortly after the Supreme Court of Judicature Act, 1873 [36 & 37 Vict, c. 66], was enacted. It is therefore of some interest to review the interpretation the courts in England have given to their rules relating to the striking out of a statement of claim.

#### (a) England

16 In *Metro. Bank, Ltd. v. Pooley*, 10 App. Cas. 210, [1881-85] All E.R. Rep. 949 (H.L.), the Lord Chancellor explained at p. 951 that before the Supreme Court of Judicature Act, 1873, courts were prepared to stay a "manifestly vexatious suit which was plainly an abuse of the authority of the court" even though there was no written rule stating that courts could do so. The Lord Chancellor noted that "[t]he power seemed to be inherent in the jurisdiction of every court of justice to protect itself from the abuse of its procedure." That is, it was open to courts to ensure that their process was not used simply to harass parties through the initiation of actions that were obviously without merit.

17 Before the advent of the Supreme Court of Judicature Act, 1873, and the new Rules of the Supreme Court (enacted in 1883) it had been open to parties to use a "demurrer" to challenge a statement of claim. That is, it had been open to a defendant to admit all the facts that the plaintiff's pleadings alleged and to assert that these facts were not sufficient in law to sustain the plaintiff's case. When a demurrer was pleaded the question of law that was thereby raised was immediately set down for argument and decision: see 36 Hals. (4th) 4, para. 2, n. 7, and 26, para. 35, n. 5; Milsom, Historical Foundations of the Common Law, 2nd ed. (1981), at p. 72; and Baker, An Introduction to English Legal History, 2nd ed. (1979), at p. 69. But a formal and technical practice eventually grew up around demurrer and judges were notoriously reluctant to provide definitive answers to the points of law that were thereby raised. As the Lord Chancellor explained in *Pooley*, it was eventually thought best to replace demurrers with an easier summary process for getting rid of an action that was on its face manifestly groundless. It was with this objective in mind that O. 25, r. 4, of the 1883 Rules of the Supreme Court came into force:

4. The court or a judge may order any pleading to be struck out, on the ground that it discloses no reasonable cause of action or answer, and in any such case or in case of the action or defence being shown by the pleading to be frivolous or vexatious, the court or a judge may order the action to be stayed or dismissed, or judgment entered accordingly, as may be just.

Commenting on the relative merits of demurrs and the new rule, Chitty J. observed in *Peru Republic v. Peruvian Guano Co.* (1887), 36 Ch. D. 489 at 496:

Having regard to the terms of rule 4, and to the decisions on it, I think that this rule is more favourable to the pleading objected to than the old procedure by demurrer. Under the new rule the pleading will not be struck out unless it is demurrable and something worse than demurrable. If, notwithstanding defects in the pleading, which would have been fatal on a demurrer, the Court sees that a substantial case is presented the Court should, I think, decline to strike out that pleading; but when the pleading discloses a case which the Court is satisfied will not succeed, then it should strike it out and put a summary end to the litigation.

18 One of the most important points advanced in the early decisions dealing with O. 25, r. 4, was the proposition that the rule was derived from the courts' power to ensure both that they remained a forum in which genuine legal issues were addressed and that they did not become a vehicle for "vexatious" actions without legal merit designed solely to harass another party. In *Pooley*, supra, at p. 954, Lord Blackburn asserted that the new rule "considerably extends the power of the court to act in such a manner as I have stated, and enables it to stay an action on further grounds than those on which it could have been stayed at common law." Nonetheless, as Chitty J. subsequently observed in *Peruvian Guano Co.*, the rule was not intended to prevent a "substantial case" from coming forward. Its summary procedures were only to be used where it was apparent that allowing the case to go forward would amount to an abuse of the court's process.

19 In one of the better known decisions concerning the circumstances in which resort should be had to the rule Lindley M.R. stated (*Hubbuck & Sons Ltd. v. Wilkinson, Heywood & Clark*, [1899] 1 Q.B. 86 at 91 (C.A.)):

The second and more summary procedure is only appropriate to cases which are plain and obvious, so that any master or judge can say at once that the statement of claim as it stands is insufficient, even if proved, to entitle the plaintiff to what he asks. *The use of the expression "reasonable cause of action" in rule 4 shews that the summary procedure there introduced is only intended to be had recourse to in plain and obvious cases.* [emphasis added]

Lindley M.R.'s observations made clear that even if the rule expanded the court's power to stay actions, courts were to use the rule only in those exceptional instances where it was "plain and obvious" that, even if one accepted the version of the facts put forward in the statement of claim, the plaintiff's case did not disclose a reasonable cause of action. The question was not whether the plaintiff could succeed since this was a matter properly left for determination at trial. The question was simply whether the plaintiff was advancing a "reasonable" argument that could properly form the subject matter of a trial.

20 The Master of the Rolls had made this very point some six years earlier (*A.G. of Duchy of Lancaster v. London & North Western Ry. Co.*, [1892] 3 Ch. 274 at 276-77 (C.A.)):

Then the Vice-Chancellor says: "*The questions raised upon this application are of such importance and such difficulty that I cannot say that this pleading discloses no reasonable cause of action, or that there is anything frivolous or vexatious;* therefore, I shall let the parties plead in the usual way." It appears to me that this is perfectly right. To what extent is the Court to go on inquiring into difficult questions of fact or law in the exercise of the power which is given under Order xxv., rule 4? It appears to me that the object of the rule is to stop cases which ought not to be launched — cases which are obviously frivolous or vexatious, or obviously unsustainable; and if it will take a long time, as is suggested, to satisfy the Court by historical research or otherwise that the County Palatine has no jurisdiction, I am clearly of opinion that such a motion as this ought not to be made. There may be an application in Chambers to get rid of vexatious actions; but to apply the rule to a case like this appears to me to misapply it altogether. [emphasis added]

Thus, the fact that the plaintiff's case was a complicated one could not justify striking out the statement of claim. Complex matters that disclosed substantive questions of law were most appropriately addressed at trial where evidence concerning the facts could be led and where arguments about the merits of a plaintiff's case could be made.

21 The requirement that it be "plain and obvious" that some or all of the statement of claim discloses no reasonable cause of action before it can be struck out, as well as the proposition that it is singularly inappropriate to use the rule's summary procedure to prevent a party from proceeding to trial on the grounds that the action raises difficult questions, has been affirmed repeatedly in the last century: see *Dyson v. A.G.*, [1911] 1 K.B. 410 (C.A.); *Evans v. Barclays Bank & Galloway*, [1924] W.N. 97 (C.A.); *Kemsley v. Foot*, [1951] 2 K.B. 34, [1951] 1 T.L.R. 197, [1951] 1 All E.R. 331 (C.A.); and *Nagle v. Feilden*, [1966] 2 Q.B. 633, [1966] 2 W.L.R. 1027, [1966] 1 All E.R. 689 (C.A.). Lord Justice Fletcher Moulton's observations in *Dyson*, at pp. 418-19, are particularly instructive:

Now it is unquestionable that, both under the inherent power of the Court and also under a specific rule to that effect made under the Judicature Act, the Court has a right to stop an action at this stage if it is wantonly brought without the shadow of an excuse, so that to permit the action to go through its ordinary stages up to trial would be to allow the defendant to be vexed under the form of legal process when there could not at any stage be any doubt that the action was baseless. *But from this to the summary dismissal of actions because the judge in chambers does not think they will be successful in the end lies a wide region, and the Courts have properly considered that this power of arresting an action and deciding it without trial is one to be very sparingly used, and rarely, if ever, excepting in cases where the action is an abuse of legal procedure.* They have laid down again and again that this process is not intended to take the place of the old demurrer by which the defendant challenged the validity of the plaintiff's claim as a matter of law. Differences of law, just as differences of fact, are normally to be decided by trial after hearing in Court, and not to be refused a hearing in Court by an order of the judge in chambers. Nothing more clearly indicates this to be the intention of the rule than the fact that the plaintiff has no appeal as of right from the decision of the judge at chambers in the case of such an order as this. So far as the rules are concerned an action may be stopped by this procedure without the question of its justifiability ever being brought before a Court. *To my mind it is evident that our judicial system would never permit a plaintiff to be "driven from the judgment seat" in this way without any Court having considered his right to be heard, excepting in cases where the cause of action was obviously and almost incontestably bad.* [emphasis added]

22 A more recent and no less instructive discussion of these principles may be found in Lord Pearson's reasons in *Drummond-Jackson v. Br. Medical Assn.*, [1970] 1 W.L.R. 688, [1970] 1 All E.R. 1094 (C.A.). I note that in *Drummond-Jackson* the Court of Appeal dealt with Rules of the Supreme Court, O. 18, r. 19 (the provision that replaced R.S.C., O. 25, r. 4, in 1962), a provision very similar to the rules that now govern the striking out of pleadings in Canada:

19.—(1) The Court may at any stage of the proceedings order to be struck out or amended any pleading or the indorsement of any writ in the action, or anything in any pleading or in the indorsement, on the ground that—

- (a) it discloses no reasonable cause of action or defence, as the case may be; or
- (b) it is scandalous, frivolous or vexatious; or
- (c) it may prejudice, embarrass or delay the fair trial of the action; or
- (d) it is otherwise an abuse of the process of the court;

and may order the action to be stayed or dismissed or judgment to be entered accordingly as the case may be.

(2) No evidence shall be admissible on an application under paragraph (1)(a).

23 Responding to Lord Denning's suggestion that the potential length and complexity of a trial should be taken into account when considering whether to strike out a statement of claim, Lord Pearson (with whom Sir Gordon Willmer concurred in separate reasons) reaffirmed the proposition that Lord Justice Lindley had advanced some 80 years earlier in *A.G. of Duchy of Lancaster*: length and complexity were *not* appropriate factors to consider when deciding whether a statement of claim should be struck out. Lord Pearson said at pp. 1101-1102:

Over a long period of years it has been firmly established by many authorities that the power to strike out a statement of claim as disclosing no reasonable cause of action is a summary power which should be exercised only in plain and obvious cases ...

In my opinion the traditional and hitherto accepted view — that the power should only be used in plain and obvious cases — is correct according to the evident intention of the rule for several reasons. First, there is in r 19 (1) (a) the expression "reasonable cause of action", to which Sir Nathaniel Lindley MR called attention in *Hubbuck & Sons Ltd v. Wilkinson, Heywood and Clark Ltd.* No exact paraphrase can be given, but I think "reasonable cause of action" means a cause of action with some chance of success, when (as required by r 19 (2)) only the allegations in the pleading are considered. If when those allegations are examined it is found that the alleged cause of action is certain to fail, the statement of claim should be struck out. In *Nagle v. Feilden Danckwerts* LJ said:

The summary remedy which has been applied to this action is one which is only to be applied in plain and obvious cases, when the action is one which cannot succeed or is in some way an abuse of the process of the court.

Salmon LJ said:

It is well settled that a statement of claim should not be struck out and the plaintiff driven from the judgment seat unless the case is unarguable.

Secondly, r 19(1)(a) takes some colour from its context in r 19(1) (b) — "scandalous, frivolous and vexatious" — r 19 (1) (c) — "prejudice, embarrass or delay the fair trial of the action" — and r 19 (1) (d) — "otherwise an abuse of the process of the court". *The defect referred to in r 19 (1) (a) is a radical defect ranking with those referred to in the other paragraphs.* Thirdly, an application for the statement of claim to be struck out under this rule is made at a very early stage of the action when there is only the statement of claim without any other pleadings and without any evidence at all. *The plaintiff should not be "driven from the judgment seat" at this very early stage unless it is quite plain that his alleged cause of action has no chance of success.* [emphasis added]

Lord Pearson concluded at p. 1102:

That is the basis of the rule and practice on which one has to approach the question whether the plaintiff's statement of claim in the present case discloses any reasonable cause of action. *It is not permissible to anticipate the defence or defences — possibly some very strong ones — which the defendants may plead and be able to prove at the trial, nor anything which the plaintiff may plead in reply and seek to rely on at the trial.* [emphasis added]

24 In England, then, the test that governs an application under R.S.C., O. 18, r. 19, has always been and remains a simple one: assuming that the facts as stated in the statement of claim can be proved, is it "plain and obvious" that the plaintiff's statement of claim discloses no reasonable cause of action? Is there a defect in the statement of claim that can properly be characterized as a "radical defect" ranking with the others listed in O. 18, r. 19? If it is plain and obvious that the action is certain to fail because it contains some such radical defect, then the relevant portions of the statement of claim may properly be struck out. To allow such an action to proceed, even although it was certain to fail, would be to permit the defendant to be "vexed" and would therefore amount to the very kind of abuse of the court's process that the rule was meant to prevent. But if there is a chance that the plaintiff might succeed, then that plaintiff should not be "driven from the judgment seat". Neither the length and complexity of the issues of law and fact that might have to be addressed nor the potential for the defendant to present a strong defence should prevent a plaintiff from proceeding with his or her case. Provided that the plaintiff can present a "substantive" case, that case should be heard.

## (b) Canada

### (i) Ontario and British Columbia Courts of Appeal

25 In Canada, provincial courts of appeal have long had to grapple with the very same issues concerning the rules with respect to statements of claim that courts in England have dealt with for over a century. As noted earlier, the rules of practice in this country are to a large extent modelled on England's rules of practice. It comes as no surprise, therefore, that the test Canadian courts of appeal have adopted is in essence the same one that the courts in England favour.

## Ontario

26 In Ontario, for example, the Court of Appeal dealt with R. 124 (the predecessor to R. 21.01) in *Ross v. Scottish Union and National Ins. Co.* (1920), 47 O.L.R. 308, 53 D.L.R. 415 (C.A.). The rule followed closely the wording of England's R.S.C. 1883, O. 25, r. 4, and read as follows:

124. A judge may order any pleading to be struck out on the ground that it discloses no reasonable cause of action or answer, and in any such case, or in case of the action or defence being shown to be frivolous or vexatious, may order the action to be stayed or dismissed, or judgment to be entered accordingly.

27 In *Ross*, Magee J.A. embraced the "plain and obvious" test developed in England, stating at p. 316:

That inherent jurisdiction is partly embodied in our Rule 124, which allows pleadings to be struck out as disclosing no reasonable cause of action or defence, and thereby, in such case, or if the action or defence is shewn to be vexatious or frivolous, the action may be stayed or dismissed or judgment be entered accordingly. *The Rule has only been acted upon in plain and obvious cases, and it should only be so when the Court is satisfied that the case is one beyond doubt, and that there is no reasonable cause of action or defence.* [emphasis added]

Magee J.A. went on to note at p. 317:

To justify the use of Rule 124, a statement of claim should not be merely demurrable, but it should be manifest that it is something worse, so that it will not be curable by amendment: *Dadswell v. Jacobs* (1887), 34 Ch. D. 278, 281; *Republic of Peru v. Peruvian Guano Co.* (1887), 36 Ch. D. 489; and it is not sufficient that the plaintiff is not likely to succeed at the trial: *Boaler v. Holder* (1886), 54 T.L.R. 298.

28 At an early date, then, the Ontario Court of Appeal had modelled its approach to R. 124 on the approach that had been consistently favoured in England. And over time the Ontario Court of Appeal has gone on to show the same concern that statements of claim not be struck out in anything other than the clearest of cases. As Laidlaw J.A. put it in *R. v. Clark*, [1943] O.R. 501 at 515, [1943] 3 D.L.R. 684 (C.A.):

The power to strike out proceedings should be exercised with great care and reluctance. Proceedings should not be arrested and a claim for relief determined without trial, except in cases where the Court is well satisfied that a continuation of them would be an abuse of procedure: *Evans v. Barclay's Bank et al.*, [1924] W.N. 97. But if it be made clear to the Court that an action is frivolous or vexatious, or that no reasonable cause of action is disclosed, it would be improper to permit the proceedings to be maintained.

29 More recently, in *Gilbert Surgical Supply Co. v. F.W. Horner Ltd.*, [1960] O.W.N. 289 at 289-90, 34 C.P.R. 17 (C.A.), Aylesworth J.A. observed that the fact that an action might be novel was no justification for striking out a statement of claim. The court would still have to conclude that "the plaintiff's action could not possibly succeed or that clearly and beyond all doubt, no reasonable cause of action had been shown".

30 Thus, the Ontario Court of Appeal has firmly embraced the "plain and obvious" test and has made clear that it too is of the view that the test is rooted in the need for courts to ensure that their process is not abused. The fact that the case the plaintiff wishes to present may involve complex issues of fact and law or may raise a novel legal proposition should not prevent a plaintiff from proceeding with his action.

## British Columbia

31 In British Columbia the Court of Appeal has approached the matter in a similar way. The predecessor to the rule that Carey Canada invokes in this appeal was worded in exactly the same way as England's R.S.C. 1883, O. 25, r. 4. Not surprisingly the British Columbia Court of Appeal's treatment of that rule has been similar to that taken in England and Ontario. For example, in *Minnes v. Minnes* (1962), 39 W.W.R. 112 at 122-23, 34 D.L.R. (2d) 497 (B.C.C.A.), Tysoe J.A. observed:

In my respectful view it is only in plain and obvious cases that recourse should be had to the summary process under O. 25, R. 4, and the power given by the Rule should be exercised only where the case is absolutely beyond doubt. *So long as the statement of claim, as it stands or as it may be amended, discloses some question fit to be tried by a judge or jury, the mere fact that the case is weak or not likely to succeed is no ground for striking it out.* If the action involves investigation of serious questions of law or questions of general importance, or if the facts are to be known before rights are definitely decided, the Rule ought not to be applied. [emphasis added]

For his part Norris J.A. noted at p. 116 (agreeing with Tysoe J.A.):

I might add that upon the motion, with respect, *it was not for the learned trial judge as it is not for this court to consider the issues between the parties as they would be considered on trial.* All that was required of the plaintiff on the motion was that she should show that on the statement of claim, accepting the allegations therein made as true, there was disclosed from that pleading with such amendments as might reasonably be made, a proper case to be tried. [emphasis added]

The law as stated in *Minnes v. Minnes* was recently reaffirmed in *McNaughton v. Baker*, [1988] 4 W.W.R. 742, 25 B.C.L.R. (2d) 17 at 23, 28 C.P.C. (2d) 49 (C.A.), per McLachlin J.A. Similarly, Anderson and Esson JJ.A. relied on *Minnes v. Minnes* in this appeal.

32 Once again then the "plain and obvious" test has been firmly embraced. The British Columbia Court of Appeal has confirmed that the summary proceedings available under the rule in question do not afford an appropriate forum in which to engage in a detailed examination of the strengths and weaknesses of the plaintiff's case. The sole question is whether, assuming that all the facts the plaintiff alleges are true, the plaintiff can present a question "fit to be tried". The complexity or novelty of the question that the plaintiff wishes to bring to trial should not act as a bar to that trial taking place.

#### *(ii) Supreme Court of Canada*

33 While this court has had a somewhat limited opportunity to consider how the rules regarding the striking out of a statement of claim are to be applied, it has nonetheless consistently upheld the "plain and obvious" test. Justice Estey, speaking for the court in *A.G. Can. v. Inuit Tapirisat of Can.*, [1980] 2 S.C.R. 735 at 740, 115 D.L.R. (3d) 1, 33 N.R. 304 [Fed.], stated:

As I have said, all the facts pleaded in the statement of claim must be deemed to have been proven. On a motion such as this a court should, of course, dismiss the action or strike out any claim made by the plaintiff only in plain and obvious cases and where the court is satisfied that "the case is beyond doubt": *Ross v. Scottish Union and National Insurance Co.*

34 I had occasion to affirm this proposition in *Operation Dismantle Inc. v. R.*, [1985] 1 S.C.R. 441, 12 Admin. L.R. 16, 13 C.R.R. 287, 18 D.L.R. (4th) 481, 59 N.R. 1 [Fed.]. At pp. 486-87 I provided the following summary of the law in this area (with which the rest of the court concurred):

The law then would appear to be clear. The facts pleaded are to be taken as proved. When so taken, the question is do they disclose a reasonable cause of action, *i.e.* a cause of action "with some chance of success" (*Drummond-Jackson v. British Medical Association*, [1970] 1 All E.R. 1094) or, as Le Dain J. put it in *Dowson v. Government of Canada* (1981), 37 N.R. 127 (F.C.A.), at p. 138, is it "plain and obvious that the action cannot succeed?"

And at p. 477 I observed:

It would seem then that as a general principle the Courts will be hesitant to strike out a statement of claim as disclosing no reasonable cause of action. *The fact that reaching a conclusion on this preliminary issue requires lengthy argument will not be determinative of the matter nor will the novelty of the cause of action militate against the plaintiffs.* [emphasis added]

35 Most recently, in *Dumont v. Can. (A.G.)*, [1990] 1 S.C.R. 279, [1990] 4 W.W.R. 127, 67 D.L.R. (4th) 159, I made clear at p. 280 that it was my view that the test set out in *Inuit Tapirisat* was the correct test. The test remained whether the outcome of the case was "plain and obvious" or "beyond reasonable doubt".

36 Thus, the test in Canada governing the application of provisions like R. 19(24)(a) of the British Columbia Rules of Court is the same as the one that governs an application under R.S.C., O. 18, r. 19: assuming that the facts as stated in the statement of claim can be proved, is it "plain and obvious" that the plaintiff's statement of claim discloses no reasonable cause of action? As in England, if there is a chance that the plaintiff might succeed, then the plaintiff should not be "driven from the judgment seat". Neither the length and complexity of the issues, the novelty of the cause of action, nor the potential for the defendant to present a strong defence should prevent the plaintiff from proceeding with his or her case. Only if the action is certain to fail because it contains a radical defect ranking with the others listed in R. 19(24) of the British Columbia Rules of Court should the relevant portions of a plaintiff's statement of claim be struck out under R. 19(24)(a).

37 The question therefore to which we must now turn in this appeal is whether it is "plain and obvious" that the plaintiff's claims in the tort of conspiracy disclose no reasonable cause of action or whether the plaintiff has presented a case that is "fit to be tried", even though it may call for a complex or novel application of the tort of conspiracy.

## **(2) Should Mr. Hunt's Allegations Based on the Tort of Conspiracy Be Struck from his Statement of Claim?**

38 In the last decade the tort of conspiracy has received a considerable amount of attention. In England, for example, both the House of Lords and the Court of Appeal have recently had occasion to review the tort in some detail. These decisions have made clear that the tort of conspiracy may apply in at least two situations: (i) where the defendants agree to use lawful means to harm the plaintiff and (ii) where the defendants use unlawful means to harm the plaintiff. The law with respect to the first situation is not in doubt (*Metall und Rohstoff A.G. v. Donaldson, Lufkin & Jenrette Inc.*, [1989] 3 W.L.R. 563 at 593, per Slade L.J.):

If A and B agree to commit acts which would be lawful if done by either of them alone but which are done in combination and cause damage to C, no tortious conspiracy actionable at the suit of C exists *unless the predominant purpose of A and B in making the agreement and carrying out the acts which cause the damage is to injure C and not to protect the lawful commercial interests of A and B.* This proposition is established by five decisions at the highest level: *Mogul Steamship Co. Ltd. v. McGregor, Gow & Co.*, [1892] A.C. 25; *Quinn v. Leathem*, [1901] A.C. 495; *Sorrell v. Smith*, [1925] A.C. 700; *Crofter Hand Woven Harris Tweed Co. Ltd. v. Veitch*, [1942] A.C. 435 and *Lonrho Ltd. v Shell Petroleum Co. Ltd. (No. 2)*, [1982] A.C. 173. [emphasis added]

Courts in England have, however, encountered greater difficulty in stating with precision the applicable principles governing situations in which unlawful means are employed. In particular, they have struggled to decide whether the plaintiff must establish, not just that the defendants used means that were unlawful and resulted in harm to the plaintiff, but also that the defendants actually intended to harm the plaintiff.

39 In *Lonrho v. Shell Petroleum Co.*, [1982] A.C. 173, [1980] 1 W.L.R. 627, the House of Lords dealt with a consultative case stated by arbitrators in which it was asked to consider whether the tort of conspiracy could be extended to embrace a situation where the agreement in question resulted in a contravention of penal law (unlawful means) but did not include an intention to injure the plaintiff. In the process of deciding whether the tort should be so extended Lord Diplock noted at pp. 188-89:

My Lords, conspiracy as a criminal offence has a long history. It consists of "the agreement of two or more persons to effect any unlawful purpose, whether as their ultimate aim, or only as a means to it, and the crime is complete if there is such agreement, even though nothing is done in pursuance of it." I cite from Viscount Simon L.C.'s now classic speech in *Crofter Hand Woven Harris Tweed Co. Ltd. v. Veitch*, [1942] A.C. 435, 439. Regarded as a civil tort, however, conspiracy is a

highly anomalous cause of action. The gist of the cause of action is damage to the plaintiff; so long as it remains unexecuted the agreement which alone constitutes the crime of conspiracy, causes no damage; it is only acts done in execution of the agreement that are capable of doing that. So the tort, unlike the crime, consists not of agreement but of concerted action taken pursuant to agreement.

40 Lord Diplock went on to observe that he was of the view that the rationale that had apparently fueled the development of the tort in the late 19th and early 20th centuries, namely, that "a combination may make oppressive or dangerous that which if it proceeded only from a single person would be otherwise" (see *Mogul S.S. Co. v. McGregor, Gow & Co. (1889)*, 23 Q.B.D. 598 at 616, per Bowen L.J.) was somewhat anachronistic in light of modern commercial developments. Nevertheless he did not feel that this meant that the tort could now be dispensed with. He said at p. 189:

But to suggest today that acts done by one street-corner grocer in concert with a second are more oppressive and dangerous to a competitor than the same acts done by a string of supermarkets under a single ownership or that a multinational conglomerate such as Lonrho or oil company such as Shell or B.P. does not exercise greater economic power than any combination of small businesses, is to shut one's eyes to what has been happening in the business and industrial world since the turn of the century and, in particular, since the end of World War II. The civil tort of conspiracy to injure the plaintiff's commercial interests where that is the predominant purpose of the agreement between the defendants and of the acts done in execution of it which caused damage to the plaintiff, must I think be accepted by this House as too well-established to be discarded however anomalous it may seem today. It was applied by this House 80 years ago in *Quinn v. Leathem*, [1901] A.C. 495, and accepted as good law in the *Crofters case* [1924] A.C. 435, where it was made clear that injury to the plaintiff and not the self-interest of the defendants must be the predominant purpose of the agreement in execution of which the damage-causing acts were done.

41 Having set out this groundwork and having thereby confirmed that the tort of conspiracy was applicable in circumstances where the defendants entered into an agreement the predominant purpose of which was to injure the plaintiff, Lord Diplock turned to the question whether the tort should be extended beyond these confines. He concluded at p. 189:

This House, in my view, has an unfettered choice whether to confine the civil action of conspiracy to the narrow field to which alone it has an established claim or whether to extend this already anomalous tort beyond those narrow limits that are all that common sense and the application of the legal logic of the decided cases require.

My Lords, my choice is unhesitatingly the same as that of Parker J. and all three members of the Court of Appeal. I am against extending the scope of the civil tort of conspiracy beyond acts done in execution of an agreement entered into by two or more persons for the purpose not of protecting their own interests but of injuring the interests of the plaintiff.

42 Lord Diplock's observations made clear that in order to succeed with the tort of conspiracy in England a plaintiff would have to demonstrate that the purpose for which parties acted in accordance with their agreement was to harm the plaintiff. The English Court of Appeal has recently had an opportunity to consider Lord Diplock's judgment in *Lonrho* (see *Metall und Rohstoff A.G. v. Donaldson, Lufkin & Jenrette Inc.*, supra) and has confirmed at p. 604 that "the House plainly intended the presence of a predominant intention to injure to be the touchstone of an actionable conspiracy." The Court of Appeal continued:

Where the predominant intention to injure is absent but the defendants pursuant to agreement commit torts against the plaintiff, the House held, we conclude, that common sense and the legal logic of the decided cases are satisfied if the plaintiff is denied a remedy in conspiracy and left to sue on the substantive torts.

Thus, regardless of whether the alleged conspirators used lawful or unlawful means, the law in England required the plaintiff to establish that the defendants entered into the agreement with the predominant purpose of injuring the plaintiff.

43 Although Canadian jurisprudence has taken note of the developments in England, the law governing the tort of conspiracy in Canada is not in all respects the same as the law set out in *Lonrho*. Indeed, this court had occasion to consider both the tort of conspiracy and Lord Diplock's observations in *Lonrho* in *Can. Cement Lafarge Ltd. v. B.C. Lightweight Aggregate Ltd.*, supra. Justice Estey stated at p. 468:

The question which must now be considered is whether the scope of the tort of conspiracy in this country extends beyond situations in which the defendants' predominant purpose is to cause injury to the plaintiff, and includes cases in which this intention to injure is absent but the conduct of the defendants is by itself unlawful, and in fact causes damage to the plaintiff.

44 This passage made clear that this court agreed with the House of Lords that where a plaintiff alleges that the defendants entered into an agreement whose predominant purpose was to injure the plaintiff and where the plaintiff alleges that he or she has in fact suffered damage as a result of the agreement, then regardless of the lawfulness of the means that the defendants are alleged to have used to implement the agreement the plaintiff will have made out a cognizable claim in the tort of conspiracy.

45 But what of situations in which the plaintiff alleges that there was an agreement that involved the use of unlawful means and that resulted in the plaintiff's suffering damage? Must the plaintiff also establish that the predominant purpose of the agreement was to injure him or her? It is in answering this question that Estey J. chose to follow a somewhat different path from Lord Diplock. Estey J. was of the view that it was not appropriate to go as far as the House of Lords had gone in precluding the action. He said at pp. 471-72:

Although the law concerning the scope of the tort of conspiracy is far from clear, I am of the opinion that whereas the law of tort does not permit an action against an individual defendant who has caused injury to the plaintiff, the law of torts does recognize a claim against them in combination as the tort of conspiracy if:

(1) whether the means used by the defendants are lawful or unlawful, the predominant purpose of the defendants' conduct is to cause injury to the plaintiff; or,

(2) *where the conduct of the defendants is unlawful*, the conduct is directed towards the plaintiff (alone or together with others), and *the defendants should know in the circumstances that injury to the plaintiff is likely to and does result*. In situation (2) it is not necessary that the predominant purpose of the defendants' conduct be to cause injury to the plaintiff but, in the prevailing circumstances, it must be a constructive intent derived from the fact that the defendants should have known that injury to the plaintiff would ensue. In both situations, however, there must be actual damage suffered by the plaintiff. [emphasis added]

46 Estey J.'s summary of the law in Canada suggests that in cases falling into the second category it may not be necessary to prove actual intent. As G.H.L. Fridman has noted in *The Law of Torts in Canada* (1990), vol. 2, at p. 265:

The difference between the English and Canadian formulations of the tort of conspiracy lies in the way the intent of the defendants is expressed. The language of Lord Diplock seems to indicate that the necessary intent should be actual. That of Estey J. suggests that it may be possible for a court to infer an intent to injure from the circumstances even if the defendants deny they acted with any such intent.

Fridman goes on to observe at pp. 265-66:

In modern Canada, therefore, conspiracy as a tort comprehends three distinct situations. In the first place there will be an actionable conspiracy if two or more persons agree and combine to act unlawfully with the pre-dominating purpose of injuring the plaintiff. Second, there will be an actionable conspiracy if the defendants combine to act lawfully with the predominating purpose of injuring the plaintiff. Third, an actionable conspiracy will exist if defendants combine to act unlawfully, their conduct is directed towards the plaintiff (or the plaintiff and others), and the likelihood of injury to the plaintiff is known to the defendants or should have been known to them in the circumstances.

In my view, this passage provides a useful summary of the current state of the law in Canada with respect to the tort of conspiracy. Whether it is "good law", it seems to me, it is not for the court to consider in this proceeding where the issue is simply whether the plaintiff's pleadings disclose a reasonable cause of action. I agree completely with Esson J.A. that it is not appropriate at this stage to engage in a detailed analysis of the strengths and weaknesses of Canadian law on the tort of conspiracy.

47 I note that in this appeal Mr. Hunt was clearly fully aware of Estey J.'s observation in *Can. Cement LaFarge Ltd.*, when he prepared paras. 18 and 19 of his statement of claim. Paragraph 18 of his statement of claim follows faithfully the first proposition that Estey J. put forward at p. 471, alleging that some or all of the defendants "conspired with each other with the predominant purpose of injuring" Mr. Hunt. Paragraph 19 of the statement of claim presents an alternative argument that is faithful to the wording of Estey J.'s second proposition, alleging that "some or all of the defendants conspired with each other to prevent by unlawful means this knowledge becoming public knowledge and, in particular, to prevent it reaching the plaintiff and others who would be exposed to the asbestos fibres in the Products, in circumstances where the defendants knew or ought to have known that injury to the plaintiff" would result. If there is a defect in Mr. Hunt's statement of claim, it is certainly *not* that paras. 18 or 19 fail to follow the language of this court's most recent pronouncement on the conditions that must be met in order to ground a claim in the tort of conspiracy. In other words, given this court's most recent pronouncement on the circumstances in which the law of torts will recognize such a claim, it is not "plain and obvious" that the plaintiff's statement of claim fails to disclose a reasonable claim.

48 The defendants contend, however, that this court's recent pronouncements, as well as those of courts in England, make clear that the tort of conspiracy cannot be invoked outside a commercial law context and that it certainly cannot be invoked in personal injury litigation. They point out that in *Lonrho*, *supra*, at p. 189, Lord Diplock was not prepared to extend the tort to cover the facts of the case before him. They emphasize that Estey J. displayed a measure of sympathy for Lord Diplock's reluctance to extend the scope of the tort when he stated at p. 473 of *Can. Cement LaFarge Ltd.*:

The tort of conspiracy to injure, even without the extension to include a conspiracy to perform unlawful acts where there is a constructive intent to injure, has been the target of much criticism throughout the common law world. It is indeed a commercial anachronism as so aptly illustrated by Lord Diplock in *Lonrho, supra*, at pp. 188-89. In fact, the action may have lost much of its usefulness in our commercial world, and survives in our law as an anomaly. Whether that be so or not, it is now too late in the day to uproot the tort of conspiracy to injure from the common law. No doubt the reaction of the courts in the future will be to restrict its application for the very reasons that some now advocate its demise.

49 Finally, the defendants point to my observations in *Frame v. Smith*, [1987] 2 S.C.R. 99, 9 R.F.L. (3d) 225, [1988] 1 C.N.L.R. 152, 42 D.L.R. (4th) 81, 42 C.C.L.T. 1, 23 O.A.C. 84, 78 N.R. 40, where I had occasion to consider whether the tort of conspiracy might be extended to cover a case in which a father was suing his former wife for denying him access to his children. Although I was in dissent in the final result, the court agreed with my observations about the tort of conspiracy (see La Forest J. at p. 109). The defendants place a good deal of weight on my suggestion that "the criticisms which have been levelled at the tort give good reason to pause before extending it beyond the commercial context" (at p. 124). I concluded that even though the tort could in theory be extended to the facts of *Frame*, it was not desirable to extend the tort to the custody and access context.

50 Not surprisingly, the defendants contend that it would be equally inappropriate to extend the tort of conspiracy to cover the facts of this case. The difficulty I have, however, is that in this appeal we are asked to consider whether the allegations of conspiracy should be struck from the plaintiff's statement of claim, not whether the plaintiff will be successful in convincing a court that the tort of conspiracy should extend to cover the facts of this case. In other words, the question before us is simply whether it is "plain and obvious" that the statement of claim contains a radical defect.

51 Is it plain and obvious that allowing this action to proceed amounts to an abuse of process? I do not think so. While there has clearly been judicial reluctance to extend the scope of the tort beyond the commercial context, I do not think this court has ever suggested that the tort could not have application in other contexts. While Estey J. expressed the view in *Can. Cement LaFarge Ltd.*, *supra*, at p. 473, that the action had lost much of its usefulness, and while I noted in *Frame v. Smith*, at pp. 124-25, that some have even suggested that consideration should be given to abolishing the tort entirely (see Burns, "Civil Conspiracy: An Unwieldy Vessel Rides a Judicial Tempest" (1982), 16 U.B.C. L. Rev. 229, at p. 254), we both affirmed the ongoing existence of the tort at the date of these judgments. In my view, it would be highly inappropriate for this court to deny a litigant who is capable of fitting his allegations into Estey J.'s two-pronged summary of the law on civil conspiracy the opportunity to persuade a court that the facts are as alleged and that the tort of conspiracy should be held to apply on these facts.

While courts should pause before extending the tort beyond its existing confines, careful consideration might conceivably lead to the conclusion that the tort has a useful role to play in new contexts.

52 I note that in *Frame v. Smith*, at p. 126, I was not prepared to extend the tort of conspiracy to the custody and access context both because such an extension was not in the best interests of children and because such an extension would not have been consistent with the rationale that underlies the tort of conspiracy: "namely that the tort be available where the fact of combination creates an evil which does not exist in the absence of combination" [p. 125]. But in the appeal now before us it seems to me much less obvious that a similar conclusion would necessarily be reached. If the facts as alleged by the plaintiff are true, and for the purposes of this appeal we must assume that they are, then it may well be that an agreement between corporations to withhold information about a toxic product might give rise to harm of a magnitude that could not have arisen from the decision of just one company to withhold such information. There may, accordingly, be good reason to extend the tort to this context. However, this is precisely the kind of question that it is for the trial judge to consider in light of the evidence. It is not for this court on a motion to strike out portions of a statement of claim to reach a decision one way or the other as to the plaintiff's chances of success. As the law that spawned the "plain and obvious" test makes clear, it is enough that the plaintiff has some chance of success.

53 The issues that will arise at the trial of the plaintiff's action in conspiracy will unquestionably be difficult. The plaintiff may have to make complex submissions about whether the evidence establishes that the defendants conspired either with a view to causing him harm or in circumstances where they should have known that their actions would cause him harm. He may well have to make novel arguments concerning whether it is enough that the defendants knew or ought to have known that a class of which the plaintiff was a member would suffer harm. The trial judge might conclude, as some of the defendants have submitted, that the plaintiff should have sued the defendants as joint tortfeasors rather than alleging the tort of conspiracy. But this court's statements in *Inuit Tapirisaq* and *Operation Dismantle Inc.*, as well as decisions such as *Dyson* and *Drummond-Jackson*, make clear that none of these considerations may be taken into account on an application brought under R. 19(24) of the British Columbia Supreme Court Rules.

54 In my view, Anderson and Esson J.J.A. were entirely correct in suggesting that it should be left to the trial judge to ascertain whether the plaintiff can establish that the predominant purpose of the alleged conspiracy was to injure the plaintiff. It seems to me that they were also correct in suggesting that it should be left to the trial judge to consider the merits of any arguments that may be advanced to the effect that the "predominant purpose" test should be modified in the context of this case. Similarly, it seems to me that the argument that some of the defendants advanced, to the effect that Quebec's Business Concerns Records Act, R.S.Q. 1977, c. D-12, might limit the range of information that the defendants could produce at trial, is a matter that is not relevant to the question whether the plaintiff's statement of claim discloses a reasonable claim.

55 The fact that a pleading reveals "an arguable, difficult or important point of law" cannot justify striking out part of the statement of claim. Indeed, I would go so far as to suggest that where a statement of claim reveals a difficult and important point of law, it may well be critical that the action be allowed to proceed. Only in this way can we be sure that the common law in general, and the law of torts in particular, will continue to evolve to meet the legal challenges that arise in our modern industrial society.

56 Finally, the defendants also submit that a cause of action in conspiracy is not available when a plaintiff has available another cause of action. Since the plaintiff has alleged in para. 20 of his statement of claim that the defendants engaged in various tortious acts, the defendants contend that it is not open to the plaintiff to proceed with his claim in conspiracy.
